The Secretary shall enter into appropriate arrangements with the National Academies of Sciences and Engineering to ensure that there be periodic reviews and assessments of the programs authorized by this division, as well as the measurable cost and performance-based goals for such programs as established under section 2004, and the progress on meeting such goals. Such reviews and assessments shall be conducted at least every 5 years, or more often as the Secretary considers necessary, and the Secretary shall transmit to the appropriate congressional committees reports containing the results of such reviews and assessments.

DIVISION D

SEC. 4101. CAPACITY BUILDING FOR ENERGY-EFFICIENT, AFFORDABLE HOUSING.

Section 4(b) of the HUD Demonstration Act of 1993 (42 U.S.C. 9816 note) is amended—

(1) in paragraph (1), by inserting before the semicolon at the end the following: “, including capabilities regarding the provision of energy efficient, affordable housing and residential energy conservation measures”; and

(2) in paragraph (2), by inserting before the semicolon the following: “, including such activities relating to the provision of energy efficient, affordable housing and residential energy conservation measures that benefit low-income families”.

SEC. 4102. INCREASE OF CDBG PUBLIC SERVICES CAP FOR ENERGY CONSERVATION AND EFFICIENCY ACTIVITIES.

Section 105(a)(8) of the Housing and Community Development Act of 1974 (42 U.S.C. 5305(a)(8)) is amended—

(1) by inserting “or efficiency” after “energy conservation”; and

(2) by striking “, and except that” and inserting “; except that”; and

(3) by inserting before the period at the end the following: “; and except that each percentage limitation under this paragraph on the amount of assistance provided under this title that may be used for the provision of public services is hereby increased by 10 percent, but such percentage increase may be used only for the provision of public services concerning energy conservation or efficiency”.

SEC. 4103. FHA MORTGAGE INSURANCE INCENTIVES FOR ENERGY EFFICIENT HOUSING.

(a) SINGLE FAMILY HOUSING MORTGAGE INSURANCE.—Section 203(b)(2) of the National Housing Act (12 U.S.C. 1709(b)(2)) is amended, in the first undesignated paragraph beginning after subparagraph (B)(iii) (relating to solar energy systems)—

(1) by inserting “or paragraph (10)”; and

(2) by striking “20 percent” and inserting “30 percent”.

(b) MULTIFAMILY HOUSING MORTGAGE INSURANCE.—Section 207(c) of the National Housing Act (12 U.S.C. 1713(c)) is amended, in the second undesignated paragraph beginning after paragraph (3) (relating to solar energy systems and residential energy conservation measures), by striking “20 percent” and inserting “30 percent”.

(c) COOPERATIVE HOUSING MORTGAGE INSURANCE.—Section 213(p) of the National Housing Act (12 U.S.C. 1715e(p)) is amended by striking “20 per centum” and inserting “30 percent”.

(d) REHABILITATION AND NEIGHBORHOOD CONSERVATION HOUSING MORTGAGE INSURANCE.—Section 220(d)(3)(B)(iii) of the National Housing Act (12 U.S.C. 1715k(d)(3)(B)(iii)) is amended by striking “20 per centum” and inserting “30 percent”.

(e) LOW-INCOME MULTIFAMILY HOUSING MORTGAGE INSURANCE.—Section 221(k) of the National Housing Act (12 U.S.C. 1715l(k)) is amended by striking “20 per centum” and inserting “30 percent”.

(f) ELDERLY HOUSING MORTGAGE INSURANCE.—The proviso at the end of section 213(c)(2) of the National Housing Act (12 U.S.C. 1715v(c)(2)) is amended by striking “20 per centum” and inserting “30 percent”.

(g) CONDOMINIUM HOUSING MORTGAGE INSURANCE.—Section 234(j) of the National Housing Act (12 U.S.C. 1715y(j)) is amended by striking “20 per centum” and inserting “30 percent”.

SEC. 4104. PUBLIC HOUSING CAPITAL FUND.

Section 9(d)(1) of the United States Housing Act of 1937 (42 U.S.C. 1437g(d)(1)) is amended—

(1) in subparagraph (I), by striking “and” at the end;

(2) in subparagraph (K), by striking the period at the end and inserting “; and”; and

(3) by adding at the end the following new subparagraph:

“(L) improvement of energy and water-use efficiency by installing fixtures and fittings that conform to the American Society of Mechanical Engineers/American National Standards Institute standards A112.19.2-1998 and A112.18.1-2000, or any revision thereto, applicable at the time of installation, and by increasing energy efficiency and water conservation by such other means as the Secretary determines are appropriate.”.

SEC. 4105. GRANTS FOR ENERGY-CONSERVING IMPROVEMENTS FOR ASSISTED HOUSING.

Section 251(b)(1) of the National Energy Conservation Policy Act (42 U.S.C. 8231(1)) is amended—

(1) by striking “financed with loans” and inserting “assisted”;

(2) by inserting after “1959,” the following: “which are eligible multifamily housing projects (as such term is defined in section 512 of the Multifamily Assisted Housing Reform and Affordability Act of 1997 (42 U.S.C. 1437f note)) and are subject to a mortgage restructuring and rental assistance sufficiency plans under such Act.”; and

(3) by inserting after the period at the end of the first sentence the following new sentence: “Such improvements may also include the installation of energy and water conserving fixtures and fittings that conform to the American Society of Mechanical Engineers/American National Standards Institute standards A112.19.2-1998 and A112.18.1-2000, or any revision thereto, applicable at the time of installation.”.

SEC. 4106. NORTH AMERICAN DEVELOPMENT BANK.

Part 2 of subtitle D of title V of the North American Free Trade Agreement Implementation Act (22 U.S.C. 290m-290m-3) is amended by adding at the end the following:

“SEC. 545. SUPPORT FOR CERTAIN ENERGY POLICIES.

“Consistent with the focus of the Bank’s Charter on environmental infrastructure projects, the Board members representing the United States should use their voice and vote to encourage the Bank to finance projects related to clean and efficient energy, including energy conservation, that prevent, control, or reduce environmental pollutants or contaminants.”.

DIVISION E

SEC. 5000. SHORT TITLE.

This division may be cited as the “Clean Coal Power Initiative Act of 2001”.

SEC. 5001. FINDINGS.

Congress finds that—

(1) reliable, affordable, increasingly clean electricity will continue to power the growing United States economy;

(2) an increasing use of electrotechnologies, the desire for continuous environmental improvement, a more competitive electricity market, and concerns about rising energy prices add importance to the need for reliable, affordable, increasingly clean electricity;

(3) coal, which, as of the date of the enactment of this Act, accounts for more than ½ of all electricity generated in the United States, is the most abundant fossil energy resource of the United States;

(4) coal comprises more than 85 percent of all fossil resources in the United States and exists in quantities sufficient to supply the

United States for 250 years at current usage rates;

(5) investments in electricity generating facility emissions control technology over the past 30 years have reduced the aggregate emissions of pollutants from coal-based generating facilities by 21 percent, even as coal use for electricity generation has nearly tripled;

(6) continuous improvement in efficiency and environmental performance from electricity generating facilities would allow continued use of coal and preserve less abundant energy resources for other energy uses;

(7) new ways to convert coal into electricity can effectively eliminate health-threatening emissions and improve efficiency by as much as 50 percent, but initial deployment of new coal generation methods and equipment entails significant risk that generators may be unable to accept in a newly competitive electricity market; and

(8) continued environmental improvement in coal-based generation and increasing the production and supply of power generation facilities with less air emissions, with the ultimate goal of near-zero emissions, is important and desirable.

SEC. 5002. DEFINITIONS.

In this division:

(1) **COST AND PERFORMANCE GOALS.**—The term “cost and performance goals” means the cost and performance goals established under section 5004.

(2) **SECRETARY.**—The term “Secretary” means the Secretary of Energy.

SEC. 5003. CLEAN COAL POWER INITIATIVE.

(a) **IN GENERAL.**—The Secretary shall carry out a program under—

(1) this division;

(2) the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5901 et seq.);

(3) the Energy Reorganization Act of 1974 (42 U.S.C. 5801 et seq.); and

(4) title XIII of the Energy Policy Act of 1992 (42 U.S.C. 13331 et seq.), to achieve cost and performance goals established by the Secretary under section 5004.

SEC. 5004. COST AND PERFORMANCE GOALS.

(a) **REVIEW AND ASSESSMENT.**—The Secretary shall perform an assessment that establishes measurable cost and performance goals for 2005, 2010, 2015, and 2020 for the programs authorized by this division. Such assessment shall be based on the latest scientific, economic, and technical knowledge.

(b) **CONSULTATION.**—In establishing the cost and performance goals, the Secretary shall consult with representatives of—

(1) the United States coal industry;

(2) State coal development agencies;

(3) the electric utility industry;

(4) railroads and other transportation industries;

(5) manufacturers of advanced coal-based equipment;

(6) institutions of higher learning, national laboratories, and professional and technical societies;

(7) organizations representing workers;

(8) organizations formed to—

(A) promote the use of coal;

(B) further the goals of environmental protection; and

(C) promote the production and generation of coal-based power from advanced facilities; and

(9) other appropriate Federal and State agencies.

(c) **TIMING.**—The Secretary shall—

(1) not later than 120 days after the date of the enactment of this Act, issue a set of draft cost and performance goals for public comment; and

(2) not later than 180 days after the date of the enactment of this Act, after taking into consideration any public comments received, submit to the Committee on Energy and Commerce and the Committee on Science of the House of Representatives, and to the Senate, the final cost and performance goals.

SEC. 5005. AUTHORIZATION OF APPROPRIATIONS.

(a) **CLEAN COAL POWER INITIATIVE.**—Except as provided in subsection (b), there are authorized to be appropriated to the Secretary to carry out the Clean Coal Power Initiative under section 5003 \$200,000,000 for each of the fiscal years 2002 through 2011, to remain available until expended.

(b) **LIMIT ON USE OF FUNDS.**—Notwithstanding subsection (a), no funds may be used to carry out the activities authorized by this Act after September 30, 2002, unless the Secretary has transmitted to the Committee on Energy and Commerce and the Committee on Science of the House of Representatives, and to the Senate, the report required by this subsection and 1 month has elapsed since that transmission. The report shall include, with respect to subsection (a), a 10-year plan containing—

(1) a detailed assessment of whether the aggregate funding levels provided under subsection (a) are the appropriate funding levels for that program;

(2) a detailed description of how proposals will be solicited and evaluated, including a list of all activities expected to be undertaken;

(3) a detailed list of technical milestones for each coal and related technology that will be pursued;

(4) recommendations for a mechanism for recoupment of Federal funding for successful commercial projects; and

(5) a detailed description of how the program will avoid problems enumerated in General Accounting Office reports on the Clean Coal Technology Program, including problems that have resulted in unspent funds and projects that failed either financially or scientifically.

(c) **APPLICABILITY.**—Subsection (b) shall not apply to any project begun before September 30, 2002.

SEC. 5006. PROJECT CRITERIA.

(a) **IN GENERAL.**—The Secretary shall not provide funding under this division for any project that does not advance efficiency, environmental performance, and cost competitiveness well beyond the level of technologies that are in operation or have been demonstrated as of the date of the enactment of this Act.

(b) **TECHNICAL CRITERIA FOR CLEAN COAL POWER INITIATIVE.**—

(1) **GASIFICATION.**—(A) In allocating the funds authorized under section 5005(a), the Secretary shall ensure that at least 80 percent of the funds are used only for projects on coal-based gasification technologies, including gasification combined cycle, gasification fuel cells, gasification coproduction and hybrid gasification/combustion.

(B) The Secretary shall set technical milestones specifying emissions levels that coal gasification projects must be designed to and reasonably expected to achieve. The milestones shall get more restrictive through the life of the program. The milestones shall be designed to achieve by 2020 coal gasification projects able—

(i) to remove 99 percent of sulfur dioxide;

(ii) to emit no more than .05 lbs of NOx per million BTU;

(iii) to achieve substantial reductions in mercury emissions; and

(iv) to achieve a thermal efficiency of 60 percent (higher heating value).

(2) OTHER PROJECTS.—For projects not described in paragraph (1), the Secretary shall set technical milestones specifying emissions levels that the projects must be designed to and reasonably expected to achieve. The milestones shall get more restrictive through the life of the program. The milestones shall be designed to achieve by 2010 projects able—

(A) to remove 97 percent of sulfur dioxide;

(B) to emit no more than .08 lbs of NO_x per million BTU;

(C) to achieve substantial reductions in mercury emissions; and

(D) to achieve a thermal efficiency of 45 percent (higher heating value).

(c) FINANCIAL CRITERIA.—The Secretary shall not provide a funding award under this division unless the recipient has documented to the satisfaction of the Secretary that—

(1) the award recipient is financially viable without the receipt of additional Federal funding;

(2) the recipient will provide sufficient information to the Secretary for the Secretary to ensure that the award funds are spent efficiently and effectively; and

(3) a market exists for the technology being demonstrated or applied, as evidenced by statements of interest in writing from potential purchasers of the technology.

(d) FINANCIAL ASSISTANCE.—The Secretary shall provide financial assistance to projects that meet the requirements of subsections (a), (b), and (c) and are likely to—

(1) achieve overall cost reductions in the utilization of coal to generate useful forms of energy;

(2) improve the competitiveness of coal among various forms of energy in order to maintain a diversity of fuel choices in the United States to meet electricity generation requirements; and

(3) demonstrate methods and equipment that are applicable to 25 percent of the electricity generating facilities that use coal as the primary feedstock as of the date of the enactment of this Act.

(e) FEDERAL SHARE.—The Federal share of the cost of a coal or related technology project funded by the Secretary shall not exceed 50 percent.

(f) APPLICABILITY.—Neither the use of any particular technology, nor the achievement of any emission reduction, by any facility receiving assistance under this title shall be taken into account for purposes of making any determination under the Clean Air Act in applying the provisions of that Act to a facility not receiving assistance under this title, including any determination concerning new source performance standards, lowest achievable emission rate, best available control technology, or any other standard, requirement, or limitation.

SEC. 5007. STUDY.

(a) IN GENERAL.—Not later than 1 year after the date of the enactment of this Act, and once every 2 years thereafter through 2016, the Secretary, in cooperation with other appropriate Federal agencies, shall transmit to the Committee on Energy and Commerce and the Committee on Science of the House of Representatives, and to the Senate, a report containing the results of a study to—

(1) identify efforts (and the costs and periods of time associated with those efforts) that, by themselves or in combination with other efforts, may be capable of achieving the cost and performance goals;

(2) develop recommendations for the Department of Energy to promote the efforts identified under paragraph (1); and

(3) develop recommendations for additional authorities required to achieve the cost and performance goals.

(b) EXPERT ADVICE.—In carrying out this section, the Secretary shall give due weight to the expert advice of representatives of the entities described in section 5004(b).

SEC. 5008. CLEAN COAL CENTERS OF EXCELLENCE.

As part of the program authorized in section 5003, the Secretary shall award competitive, merit-based grants to universities for the establishment of Centers of Excellence for Energy Systems of the Future. The Secretary shall provide grants to universities that can show the greatest potential for advancing new clean coal technologies.

DIVISION F

SEC. 6001. SHORT TITLE.

This division may be cited as the “Energy Security Act”.

TITLE I—GENERAL PROTECTIONS FOR ENERGY SUPPLY AND SECURITY

SEC. 6101. STUDY OF EXISTING RIGHTS-OF-WAY ON FEDERAL LANDS TO DETERMINE CAPABILITY TO SUPPORT NEW PIPELINES OR OTHER TRANSMISSION FACILITIES.

(a) IN GENERAL.—Within 1 year after the date of the enactment of this Act, the head of each Federal agency that has authorized a right-of-way across Federal lands for transportation of energy supplies or transmission of electricity shall review each such right-of-way and submit a report to the Secretary of Energy and the Chairman of the Federal Energy Regulatory Commission regarding—

(1) whether the right-of-way can be used to support new or additional capacity; and

(2) what modifications or other changes, if any, would be necessary to accommodate such additional capacity.

(b) CONSULTATIONS AND CONSIDERATIONS.—In performing the review, the head of each agency shall—

(1) consult with agencies of State, tribal, or local units of government as appropriate; and

(2) consider whether safety or other concerns related to current uses might preclude the availability of a right-of-way for additional or new transportation or transmission facilities, and set forth those considerations in the report.

SEC. 6102. INVENTORY OF ENERGY PRODUCTION POTENTIAL OF ALL FEDERAL PUBLIC LANDS.

(a) INVENTORY REQUIREMENT.—The Secretary of the Interior, in consultation with the Secretary of Agriculture and the Secretary of Energy, shall conduct an inventory of the energy production potential of all Federal public lands other than national park lands and lands in any wilderness area, with respect to wind, solar, coal, and geothermal power production.

(b) LIMITATIONS.—

(1) IN GENERAL.—The Secretary shall not include in the inventory under this section the matters to be identified in the inventory under section 604 of the Energy Act of 2000 (43 U.S.C. 6217).

(2) WIND AND SOLAR POWER.—The inventory under this section—

(A) with respect to wind power production shall be limited to sites having a mean average wind speed—

(i) exceeding 12.5 miles per hour at a height of 33 feet; and

(ii) exceeding 15.7 miles per hour at a height of 164 feet; and

(B) with respect to solar power production shall be limited to areas rated as receiving 450 watts per square meter or greater.

(c) EXAMINATION OF RESTRICTIONS AND IMPEDIMENTS.—The inventory shall identify the extent and nature of any restrictions or impediments to the development of such energy production potential.

(d) GEOTHERMAL POWER.—The inventory shall include an update of the 1978 Assessment of Geothermal Resources by the United States Geological Survey.

(e) COMPLETION AND UPDATING.—The Secretary—

(1) shall complete the inventory by not later than 2 years after the date of the enactment of this Act; and

(2) shall update the inventory regularly thereafter.

(f) REPORTS.—The Secretary shall submit to the Committee on Resources of the House of Representatives and to the Committee on Energy and Natural Resources of the Senate and make publicly available—

(1) a report containing the inventory under this section, by not later than 2 years after the effective date of this section; and

(2) each update of such inventory.

SEC. 6103. REVIEW OF REGULATIONS TO ELIMINATE BARRIERS TO EMERGING ENERGY TECHNOLOGY.

(a) IN GENERAL.—Each Federal agency shall carry out a review of its regulations and standards to determine those that act as a barrier to market entry for emerging energy-efficient technologies, including fuel cells, combined heat and power, and distributed generation (including small-scale renewable energy).

(b) REPORT TO CONGRESS.—No later than 18 months after date of the enactment of this Act, each agency shall provide a report to the Congress and the President detailing all regulatory barriers to emerging energy-efficient technologies, along with actions the agency intends to take, or has taken, to remove such barriers.

(c) PERIODIC REVIEW.—Each agency shall subsequently review its regulations and standards in this manner no less frequently than every 5 years, and report their findings to the Congress and the President. Such reviews shall include a detailed analysis of all agency actions taken to remove existing barriers to emerging energy technologies.

SEC. 6104. INTERAGENCY AGREEMENT ON ENVIRONMENTAL REVIEW OF INTERSTATE NATURAL GAS PIPELINE PROJECTS.

(a) IN GENERAL.—The Secretary of Energy, in coordination with the Federal Energy Regulatory Commission, shall establish an administrative interagency task force to develop an interagency agreement to expedite and facilitate the environmental review and permitting of interstate natural gas pipeline projects.

(b) TASK FORCE MEMBERS.—The task force shall include a representative of each of the Bureau of Land Management, the United States Fish and Wildlife Service, the Army Corps of Engineers, the Forest Service, the Environmental Protection Agency, the Advisory Council on Historic Preservation, and such other agencies as the Secretary of Energy and the Federal Energy Regulatory Commission consider appropriate.

(c) TERMS OF AGREEMENT.—The interagency agreement shall require that agencies complete their review of interstate pipeline projects within a specific period of time after referral of the matter by the Federal Energy Regulatory Commission.

(d) SUBMITTAL OF AGREEMENT.—The Secretary of Energy shall submit a final interagency agreement under this section to the Congress by not later than 6 months after the effective date of this section.

SEC. 6105. ENHANCING ENERGY EFFICIENCY IN MANAGEMENT OF FEDERAL LANDS.

(a) **SENSE OF THE CONGRESS.**—It is the sense of Congress that Federal land managing agencies should enhance the use of energy efficient technologies in the management of natural resources.

(b) **ENERGY EFFICIENT BUILDINGS.**—To the extent economically practicable, the Secretary of the Interior and the Secretary of Agriculture shall seek to incorporate energy efficient technologies in public and administrative buildings associated with management of the National Park System, National Wildlife Refuge System, National Forest System, and other public lands and resources managed by such Secretaries.

(c) **ENERGY EFFICIENT VEHICLES.**—To the extent economically practicable, the Secretary of the Interior and the Secretary of Agriculture shall seek to use energy efficient motor vehicles, including vehicles equipped with biodiesel or hybrid engine technologies, in the management of the National Park System, National Wildlife Refuge System, and other public lands and managed by the Secretaries.

SEC. 6106. EFFICIENT INFRASTRUCTURE DEVELOPMENT.

(a) **IN GENERAL.**—The Secretary of Energy and the Chairman of the Federal Energy Regulatory Commission shall jointly undertake a study of the location and extent of anticipated demand growth for natural gas consumption in the Western States, herein defined as the area covered by the Western System Coordinating Council.

(b) **CONTENTS.**—The study under subsection (a) shall include the following:

(1) A review of natural gas demand forecasts by Western State officials, such as the California Energy Commission and the California Public Utilities Commission, which indicate the forecasted levels of demand for natural gas and the geographic distribution of that forecasted demand.

(2) A review of the locations of proposed new natural gas-fired electric generation facilities currently in the approval process in the Western States, and their forecasted impact on natural gas demand.

(3) A review of the locations of existing interstate natural gas transmission pipelines, and interstate natural gas pipelines currently in the planning stage or approval process, throughout the Western States.

(4) A review of the locations and capacity of intrastate natural gas pipelines in the Western States.

(5) Recommendations for the coordination of the development of the natural gas infrastructure indicated in paragraphs (1) through (4).

(c) **REPORT.**—The Secretary shall report the findings and recommendations resulting from the study required by this section to the Committee on Energy and Commerce of the House of Representatives and to the Committee on Energy and Natural Resources of the Senate no later than 6 months after the date of the enactment of this Act. The Chairman of the Federal Energy Regulatory Commission shall report on how the Commission will factor these results into its review of applications of interstate pipelines within the Western States to the Committee on Energy and Commerce of the House of Representatives and to the Committee on Energy and Natural Resources of the Senate no later than 6 months after the date of the enactment of this Act.

TITLE II—OIL AND GAS DEVELOPMENT**Subtitle A—Offshore Oil and Gas****SEC. 6201. SHORT TITLE.**

This subtitle may be referred to as the “Royalty Relief Extension Act of 2001”.

SEC. 6202. LEASE SALES IN WESTERN AND CENTRAL PLANNING AREA OF THE GULF OF MEXICO.

(a) **IN GENERAL.**—For all tracts located in water depths of greater than 200 meters in the Western and Central Planning Area of the Gulf of Mexico, including that portion of the Eastern Planning Area of the Gulf of Mexico encompassing whole lease blocks lying west of 87 degrees, 30 minutes West longitude, any oil or gas lease sale under the Outer Continental Shelf Lands Act occurring within 2 years after the date of the enactment of this Act shall use the bidding system authorized in section 8(a)(1)(H) of the Outer Continental Shelf Lands Act (30 U.S.C. 1337(a)(1)(H)), except that the suspension of royalties shall be set at a volume of not less than the following:

(1) 5 million barrels of oil equivalent for each lease in water depths of 400 to 800 meters.

(2) 9 million barrels of oil equivalent for each lease in water depths of 800 to 1,600 meters.

(3) 12 million barrels of oil equivalent for each lease in water depths greater than 1,600 meters.

(b) **RELATIONSHIP TO EXISTING AUTHORITY.**—Except as expressly provided in this section, nothing in this section is intended to limit the authority of the Secretary of the Interior under the Outer Continental Shelf Lands Act (43 U.S.C. 1301 et seq.) to provide royalty suspension.

SEC. 6203. SAVINGS CLAUSE.

Nothing in this subtitle shall be construed to affect any offshore pre-leasing, leasing, or development moratorium, including any moratorium applicable to the Eastern Planning Area of the Gulf of Mexico located off the Gulf Coast of Florida.

SEC. 6204. ANALYSIS OF GULF OF MEXICO FIELD SIZE DISTRIBUTION, INTERNATIONAL COMPETITIVENESS, AND INCENTIVES FOR DEVELOPMENT.

(a) **IN GENERAL.**—The Secretary of the Interior and the Secretary of Energy shall enter into appropriate arrangements with the National Academy of Sciences to commission the Academy to perform the following:

(1) Conduct an analysis and review of existing Gulf of Mexico oil and natural gas resource assessments, including—

(A) analysis and review of assessments recently performed by the Minerals Management Service, the 1999 National Petroleum Council Gas Study, the Department of Energy’s Offshore Marginal Property Study, and the Advanced Resources International, Inc. Deepwater Gulf of Mexico model; and

(B) evaluation and comparison of the accuracy of assumptions of the existing assessments with respect to resource field size distribution, hydrocarbon potential, and scenarios for leasing, exploration, and development.

(2) Evaluate the lease terms and conditions offered by the Minerals Management Service for Lease Sale 178, and compare the financial incentives offered by such terms and conditions to financial incentives offered by the terms and conditions that apply under leases for other offshore areas that are competing for the same limited offshore oil and gas exploration and development capital, including offshore areas of West Africa and Brazil.

(3) Recommend what level of incentives for all water depths are appropriate in order to

ensure that the United States optimizes the domestic supply of oil and natural gas from the offshore areas of the Gulf of Mexico that are not subject to current leasing moratoria. Recommendations under this paragraph should be made in the context of the importance of the oil and natural gas resources of the Gulf of Mexico to the future energy and economic needs of the United States.

(b) **REPORT.**—Not later than 180 days after the date of the enactment of this Act, the Secretary of the Interior shall submit a report to the Committee on Resources in the House of Representatives and the Committee on Energy and Natural Resources in the Senate, summarizing the findings of the National Academy of Sciences pursuant to subsection (a) and providing recommendations of the Secretary for new policies or other actions that could help to further increase oil and natural gas production from the Gulf of Mexico.

Subtitle B—Improvements to Federal Oil and Gas Management**SEC. 6221. SHORT TITLE.**

This subtitle may be cited as the “Federal Oil and Gas Lease Management Improvement Demonstration Program Act of 2001”.

SEC. 6222. STUDY OF IMPEDIMENTS TO EFFICIENT LEASE OPERATIONS.

(a) **IN GENERAL.**—The Secretary of the Interior and the Secretary of Agriculture shall jointly undertake a study of the impediments to efficient oil and gas leasing and operations on Federal onshore lands in order to identify means by which unnecessary impediments to the expeditious exploration and production of oil and natural gas on such lands can be removed.

(b) **CONTENTS.**—The study under subsection (a) shall include the following:

(1) A review of the process by which Federal land managers accept or reject an offer to lease, including the timeframes in which such offers are acted upon, the reasons for any delays in acting upon such offers, and any recommendations for expediting the response to such offers.

(2) A review of the approval process for applications for permits to drill, including the timeframes in which such applications are approved, the impact of compliance with other Federal laws on such timeframes, any other reasons for delays in making such approvals, and any recommendations for expediting such approvals.

(3) A review of the approval process for surface use plans of operation, including the timeframes in which such applications are approved, the impact of compliance with other Federal laws on such timeframes, any other reasons for delays in making such approvals, and any recommendations for expediting such approvals.

(4) A review of the process for administrative appeal of decisions or orders of officers or employees of the Bureau of Land Management with respect to a Federal oil or gas lease, including the timeframes in which such appeals are heard and decided, any reasons for delays in hearing or deciding such appeals, and any recommendations for expediting the appeals process.

(c) **REPORT.**—The Secretaries shall report the findings and recommendations resulting from the study required by this section to the Committee on Resources of the House of Representatives and to the Committee on Energy and Natural Resources of the Senate no later than 6 months after the date of the enactment of this Act.

SEC. 6223. ELIMINATION OF UNWARRANTED DENIALS AND STAYS.

(a) **IN GENERAL.**—The Secretary shall ensure that unwarranted denials and stays of

lease issuance and unwarranted restrictions on lease operations are eliminated from the administration of oil and natural gas leasing on Federal land.

(b) **PREPARATION OF LEASING PLAN OR ANALYSIS.**—In preparing a management plan or leasing analysis for oil or natural gas leasing on Federal lands administered by the Bureau of Land Management or the Forest Service, the Secretary concerned shall—

(1) identify and review the restrictions on surface use and operations imposed under the laws (including regulations) of the State in which the lands are located;

(2) consult with the appropriate State agency regarding the reasons for the State restrictions identified under paragraph (1);

(3) identify any differences between the State restrictions identified under paragraph (1) and any restrictions on surface use and operations that would apply under the lease; and

(4) prepare and provide upon request a written explanation of such differences.

(c) **REJECTION OF OFFER TO LEASE.**—

(1) **IN GENERAL.**—If the Secretary rejects an offer to lease Federal lands for oil or natural gas development on the ground that the land is unavailable for oil and natural gas leasing, the Secretary shall provide a written, detailed explanation of the reasons the land is unavailable for leasing.

(2) **PREVIOUS RESOURCE MANAGEMENT DECISION.**—If the determination of unavailability is based on a previous resource management decision, the explanation shall include a careful assessment of whether the reasons underlying the previous decision are still persuasive.

(3) **SEGREGATION OF AVAILABLE LAND FROM UNAVAILABLE LAND.**—The Secretary may not reject an offer to lease Federal land for oil and natural gas development that is available for such leasing on the ground that the offer includes land unavailable for leasing. The Secretary shall segregate available land from unavailable land, on the offeror's request following notice by the Secretary, before acting on the offer to lease.

(d) **DISAPPROVAL OR REQUIRED MODIFICATION OF SURFACE USE PLANS OF OPERATIONS AND APPLICATION FOR PERMIT TO DRILL.**—The Secretary shall provide a written, detailed explanation of the reasons for disapproving or requiring modifications of any surface use plan of operations or application for permit to drill with respect to oil or natural gas development on Federal lands.

(e) **PRESERVATION OF FEDERAL AUTHORITY.**—Nothing in this section or in any identification, review, or explanation prepared under this section shall be construed—

(1) to limit the authority of the Federal Government to impose lease stipulations, restrictions, requirements, or other terms that are different than those that apply under State law; or

(2) to affect the procedures that apply to judicial review of actions taken under this subsection.

SEC. 6224. LIMITATION ON COST RECOVERY FOR APPLICATIONS.

Notwithstanding sections 304 and 504 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1734, 1764) and section 9701 of title 31, United States Code, the Secretary shall not recover the Secretary's costs with respect to applications and other documents relating to oil and gas leases.

SEC. 6225. CONSULTATION WITH SECRETARY OF AGRICULTURE.

Section 17(h) of the Mineral Leasing Act (30 U.S.C. 226(h)) is amended to read as follows:

“(h)(1) In issuing any lease on National Forest System lands reserved from the public domain, the Secretary of the Interior shall consult with the Secretary of Agriculture in determining stipulations on surface use under the lease.

“(2)(A) A lease on lands referred to in paragraph (1) may not be issued if the Secretary of Agriculture determines, after consultation with the Regional Forester having administrative jurisdiction over the National Forest System Lands concerned, that the terms and conditions of the lease, including any prohibition on surface occupancy for lease operations, will not be sufficient to adequately protect such lands under the National Forest Management Act of 1976 (16 U.S.C. 1600 et seq.).

“(B) The authority of the Secretary of Agriculture under this paragraph may be delegated only to the Undersecretary of Agriculture for Natural Resources and Environment.

“(3) The Secretary of Agriculture shall include in the record of decision for a determination under paragraph (2)(A)—

“(A) any written statement regarding the determination that is prepared by a Regional Forester consulted by the Secretary under paragraph (2)(A) regarding the determination; or

“(B) an explanation why such a statement by the Regional Forester is not included.

Subtitle C—Miscellaneous

SEC. 6231. OFFSHORE SUBSALT DEVELOPMENT.

Section 5 of the Outer Continental Shelf Lands Act of 1953 (43 U.S.C. 1334) is amended by adding at the end the following:

“(k) **SUSPENSION OF OPERATIONS FOR SUBSALT EXPLORATION.**—Notwithstanding any other provision of law or regulation, to prevent waste caused by the drilling of unnecessary wells and to facilitate the discovery of additional hydrocarbon reserves, the Secretary may grant a request for a suspension of operations under any lease to allow the reprocessing and reinterpretation of geophysical data to identify and define drilling objectives beneath allocthonous salt sheets.”.

SEC. 6232. PROGRAM ON OIL AND GAS ROYALTIES IN KIND.

(a) **APPLICABILITY OF SECTION.**—Notwithstanding any other provision of law, the provisions of this section shall apply to all royalty in kind accepted by the Secretary of the Interior under any Federal oil or gas lease or permit under section 36 of the Mineral Leasing Act (30 U.S.C. 192), section 27 of the Outer Continental Shelf Lands Act (43 U.S.C. 1353), or any other mineral leasing law, in the period beginning on the date of the enactment of this Act through September 30, 2006.

(b) **TERMS AND CONDITIONS.**—All royalty accruing to the United States under any Federal oil or gas lease or permit under the Mineral Leasing Act (30 U.S.C. 181 et seq.) or the Outer Continental Shelf Lands Act (43 U.S.C. 1331 et seq.) shall, on the demand of the Secretary of the Interior, be paid in oil or gas. If the Secretary of the Interior makes such a demand, the following provisions apply to such payment:

(1) Delivery by, or on behalf of, the lessee of the royalty amount and quality due under the lease satisfies the lessee's royalty obligation for the amount delivered, except that transportation and processing reimbursements paid to, or deductions claimed by, the lessee shall be subject to review and audit.

(2) Royalty production shall be placed in marketable condition by the lessee at no cost to the United States.

(3) The Secretary of the Interior may—

(A) sell or otherwise dispose of any royalty oil or gas taken in kind (other than oil or gas taken under section 27(a)(3) of the Outer Continental Shelf Lands Act (43 U.S.C. 1353(a)(3)) for not less than the market price; and

(B) transport or process any oil or gas royalty taken in kind.

(4) The Secretary of the Interior may, notwithstanding section 3302 of title 31, United States Code, retain and use a portion of the revenues from the sale of oil and gas royalties taken in kind that otherwise would be deposited to miscellaneous receipts, without regard to fiscal year limitation, or may use royalty production, to pay the cost of—

(A) transporting the oil or gas,

(B) processing the gas, or

(C) disposing of the oil or gas.

(5) The Secretary may not use revenues from the sale of oil and gas royalties taken in kind to pay for personnel, travel, or other administrative costs of the Federal Government.

(c) **REIMBURSEMENT OF COST.**—If the lessee, pursuant to an agreement with the United States or as provided in the lease, processes the royalty gas or delivers the royalty oil or gas at a point not on or adjacent to the lease area, the Secretary of the Interior shall—

(1) reimburse the lessee for the reasonable costs of transportation (not including gathering) from the lease to the point of delivery or for processing costs; or

(2) at the discretion of the Secretary of the Interior, allow the lessee to deduct such transportation or processing costs in reporting and paying royalties in value for other Federal oil and gas leases.

(d) **BENEFIT TO THE UNITED STATES REQUIRED.**—The Secretary may receive oil or gas royalties in kind only if the Secretary determines that receiving such royalties provides benefits to the United States greater than or equal to those that would be realized under a comparable royalty in value program.

(e) **REPORT TO CONGRESS.**—For each of the fiscal years 2002 through 2006 in which the United States takes oil or gas royalties in kind from production in any State or from the Outer Continental Shelf, excluding royalties taken in kind and sold to refineries under subsection (h), the Secretary of the Interior shall provide a report to the Congress describing—

(1) the methodology or methodologies used by the Secretary to determine compliance with subsection (d), including performance standards for comparing amounts received by the United States derived from such royalties in kind to amounts likely to have been received had royalties been taken in value;

(2) an explanation of the evaluation that led the Secretary to take royalties in kind from a lease or group of leases, including the expected revenue effect of taking royalties in kind;

(3) actual amounts received by the United States derived from taking royalties in kind, and costs and savings incurred by the United States associated with taking royalties in kind; and

(4) an evaluation of other relevant public benefits or detriments associated with taking royalties in kind.

(f) **DEDUCTION OF EXPENSES.**—

(1) **IN GENERAL.**—Before making payments under section 35 of the Mineral Leasing Act (30 U.S.C. 191) or section 8(g) of the Outer Continental Shelf Lands Act (30 U.S.C. 1337(g)) of revenues derived from the sale of royalty production taken in kind from a

lease, the Secretary of the Interior shall deduct amounts paid or deducted under subsections (b)(4) and (c), and shall deposit such amounts to miscellaneous receipts.

(2) **ACCOUNTING FOR DEDUCTIONS.**—If the Secretary of the Interior allows the lessee to deduct transportation or processing costs under subsection (c), the Secretary may not reduce any payments to recipients of revenues derived from any other Federal oil and gas lease as a consequence of that deduction.

(g) **CONSULTATION WITH STATES.**—The Secretary of the Interior—

(1) shall consult with a State before conducting a royalty in kind program under this title within the State, and may delegate management of any portion of the Federal royalty in kind program to such State except as otherwise prohibited by Federal law; and

(2) shall consult annually with any State from which Federal oil or gas royalty is being taken in kind to ensure to the maximum extent practicable that the royalty in kind program provides revenues to the State greater than or equal to those which would be realized under a comparable royalty in value program.

(h) **PROVISIONS FOR SMALL REFINERIES.**—

(1) **PREFERENCE.**—If the Secretary of the Interior determines that sufficient supplies of crude oil are not available in the open market to refineries not having their own source of supply for crude oil, the Secretary may grant preference to such refineries in the sale of any royalty oil accruing or reserved to the United States under Federal oil and gas leases issued under any mineral leasing law, for processing or use in such refineries at private sale at not less than the market price.

(2) **PRORATION AMONG REFINERIES IN PRODUCTION AREA.**—In disposing of oil under this subsection, the Secretary of the Interior may, at the discretion of the Secretary, prorate such oil among such refineries in the area in which the oil is produced.

(i) **DISPOSITION TO FEDERAL AGENCIES.**—

(1) **ONSHORE ROYALTY.**—Any royalty oil or gas taken by the Secretary in kind from onshore oil and gas leases may be sold at not less than the market price to any department or agency of the United States.

(2) **OFFSHORE ROYALTY.**—Any royalty oil or gas taken in kind from Federal oil and gas leases on the Outer Continental Shelf may be disposed of only under section 27 of the Outer Continental Shelf Lands Act (43 U.S.C. 1353).

(j) **PREFERENCE FOR FEDERAL LOW-INCOME ENERGY ASSISTANCE PROGRAMS.**—In disposing of royalty oil or gas taken in kind under this section, the Secretary may grant a preference to any person, including any State or Federal agency, for the purpose of providing additional resources to any Federal low-income energy assistance program.

SEC. 6233. MARGINAL WELL PRODUCTION INCENTIVES.

To enhance the economics of marginal oil and gas production by increasing the ultimate recovery from marginal wells when the cash price of West Texas Intermediate crude oil, as posted on the Dow Jones Commodities Index chart, is less than \$15 per barrel for 180 consecutive pricing days or when the price of natural gas delivered at Henry Hub, Louisiana, is less than \$2.00 per million British thermal units for 180 consecutive days, the Secretary shall reduce the royalty rate as production declines for—

(1) onshore oil wells producing less than 30 barrels per day;

(2) onshore gas wells producing less than 120 million British thermal units per day;

(3) offshore oil wells producing less than 300 barrels of oil per day; and

(4) offshore gas wells producing less than 1,200 million British thermal units per day.

SEC. 6234. REIMBURSEMENT FOR COSTS OF NEPA ANALYSES, DOCUMENTATION, AND STUDIES.

(a) **IN GENERAL.**—The Mineral Leasing Act (30 U.S.C. 181 et seq.) is amended by inserting after section 37 the following:

“REIMBURSEMENT FOR COSTS OF CERTAIN ANALYSES, DOCUMENTATION, AND STUDIES

“SEC. 38. (a) **IN GENERAL.**—The Secretary of the Interior may, through royalty credits, reimburse a person who is a lessee, operator, operating rights owner, or applicant for an oil or gas lease under this Act for amounts paid by the person for preparation by the Secretary (or a contractor or other person selected by the Secretary) of any project-level analysis, documentation, or related study required under the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) with respect to the lease.

“(b) **CONDITIONS.**—The Secretary may provide reimbursement under subsection (b) only if—

“(1) adequate funding to enable the Secretary to timely prepare the analysis, documentation, or related study is not appropriated;

“(2) the person paid the costs voluntarily; and

“(3) the person maintains records of its costs in accordance with regulations prescribed by the Secretary.”

(b) **APPLICATION.**—The amendments made by this section shall apply with respect to any lease entered into before, on, or after the date of the enactment of this Act.

(c) **DEADLINE FOR REGULATIONS.**—The Secretary shall issue regulations implementing the amendments made by this section by not later than 90 days after the date of the enactment of this Act.

SEC. 6235. ENCOURAGEMENT OF STATE AND PROVINCIAL PROHIBITIONS ON OFFSHORE DRILLING IN THE GREAT LAKES.

(a) **FINDINGS.**—The Congress finds the following:

(1) The water resources of the Great Lakes Basin are precious public natural resources, shared and held in trust by the States of Illinois, Indiana, Michigan, Minnesota, New York, Ohio, Pennsylvania, and Wisconsin, and the Canadian Province of Ontario.

(2) The environmental dangers associated with off-shore drilling in the Great Lakes for oil and gas outweigh the potential benefits of such drilling.

(3) In accordance with the Submerged Lands Act (43 U.S.C. 1301 et seq.), each State that borders any of the Great Lakes has authority over the area between that State's coastline and the boundary of Canada or another State.

(4) The States of Illinois, Michigan, New York, Pennsylvania, and Wisconsin each have a statutory prohibition of off-shore drilling in the Great Lakes for oil and gas.

(5) The States of Indiana, Minnesota, and Ohio do not have such a prohibition.

(6) The Canadian Province of Ontario does not have such a prohibition, and drilling for and production of gas occurs in the Canadian portion of Lake Erie.

(b) **ENCOURAGEMENT OF STATE AND PROVINCIAL PROHIBITIONS.**—The Congress encourages—

(1) the States of Illinois, Michigan, New York, Pennsylvania, and Wisconsin to continue to prohibit off-shore drilling in the Great Lakes for oil and gas;

(2) the States of Indiana, Minnesota, and Ohio and the Canadian Province of Ontario to enact a prohibition of such drilling; and

(3) the Canadian Province of Ontario to require the cessation of any such drilling and any production resulting from such drilling.

TITLE III—GEOTHERMAL ENERGY DEVELOPMENT

SEC. 6301. ROYALTY REDUCTION AND RELIEF.

(a) **ROYALTY REDUCTION.**—Section 5(a) of the Geothermal Steam Act of 1970 (30 U.S.C. 1004(a)) is amended by striking “not less than 10 per centum or more than 15 per centum” and inserting “not more than 8 per centum”.

(b) **ROYALTY RELIEF.**—

(1) **IN GENERAL.**—Notwithstanding section 5 of the Geothermal Steam Act of 1970 (30 U.S.C. 1004(a)) and any provision of any lease under that Act, no royalty is required to be paid—

(A) under any qualified geothermal energy lease with respect to commercial production of heat or energy from a facility that begins such production in the 5-year period beginning on the date of the enactment of this Act; or

(B) on qualified expansion geothermal energy.

(2) **3-YEAR APPLICATION.**—Paragraph (1) applies only to commercial production of heat or energy from a facility in the first 3 years of such production.

(c) **DEFINITIONS.**—In this section:

(1) **QUALIFIED EXPANSION GEOTHERMAL ENERGY.**—The term “qualified expansion geothermal energy”—

(A) subject to subparagraph (B), means geothermal energy produced from a generation facility for which the rated capacity is increased by more than 10 percent as a result of expansion of the facility carried out in the 5-year period beginning on the date of the enactment of this Act; and

(B) does not include the rated capacity of the generation facility on the date of the enactment of this Act.

(2) **QUALIFIED GEOTHERMAL ENERGY LEASE.**—The term “qualified geothermal energy lease” means a lease under the Geothermal Steam Act of 1970 (30 U.S.C. 1001 et seq.)—

(A) that was executed before the end of the 5-year period beginning on the date of the enactment of this Act; and

(B) under which no commercial production of any form of heat or energy occurred before the date of the enactment of this Act.

SEC. 6302. EXEMPTION FROM ROYALTIES FOR DIRECT USE OF LOW TEMPERATURE GEOTHERMAL ENERGY RESOURCES.

(a) **IN GENERAL.**—Section 5 of the Geothermal Steam Act of 1970 (30 U.S.C. 1004) is amended—

(1) in paragraph (c) by redesignating subparagraphs (1) and (2) as subparagraphs (A) and (B);

(2) by redesignating paragraphs (a) through (d) in order as paragraphs (1) through (4);

(3) by inserting “(a) **IN GENERAL.**—” after “SEC. 5.”; and

(4) by adding at the end the following new subsection:

“(b) **EXEMPTION FOR USE OF LOW TEMPERATURE RESOURCES.**—

“(1) **IN GENERAL.**—In lieu of any royalty or rental under subsection (a), a lease for qualified development and direct utilization of low temperature geothermal resources shall provide for payment by the lessee of an annual fee of not less than \$100, and not more than \$1,000, in accordance with the schedule issued under paragraph (2).

“(2) **SCHEDULE.**—The Secretary shall issue a schedule of fees under this section under

which a fee is based on the scale of development and utilization to which the fee applies.

“(3) DEFINITIONS.—In this subsection:

“(A) LOW TEMPERATURE GEOTHERMAL RESOURCES.—The term ‘low temperature geothermal resources’ means geothermal steam and associated geothermal resources having a temperature of less than 195 degrees Fahrenheit.

“(B) QUALIFIED DEVELOPMENT AND DIRECT UTILIZATION.—The term ‘qualified development and direct utilization’ means development and utilization in which all products of geothermal resources, other than any heat utilized, are returned to the geothermal formation from which they are produced.”.

(b) EFFECTIVE DATE.—The provisions of this section shall take effect on October 1, 2003.

SEC. 6303. AMENDMENTS RELATING TO LEASING ON FOREST SERVICE LANDS.

The Geothermal Steam Act of 1970 is amended—

(1) in section 15(b) (30 U.S.C. 1014(b))—

(A) by inserting “(1)” after “(b)”; and

(B) in paragraph (1) (as designated by subparagraph (A) of this paragraph) in the first sentence—

(i) by striking “with the consent of, and” and inserting “after consultation with the Secretary of Agriculture and”; and

(ii) by striking “the head of that Department” and inserting “the Secretary of Agriculture”; and

(2) by adding at the end the following:

“(2)(A) A geothermal lease for lands withdrawn or acquired in aid of functions of the Department of Agriculture may not be issued if the Secretary of Agriculture, after the consultation required by paragraph (1) and consultation with any Regional Forester having administrative jurisdiction over the lands concerned, determines that no terms or conditions, including a prohibition on surface occupancy for lease operations, would be sufficient to adequately protect such lands under the National Forest Management Act of 1976 (16 U.S.C. 1600 et seq.).

“(B) The authority of the Secretary of Agriculture under this paragraph may be delegated only to the Undersecretary of Agriculture for Natural Resources and Environment.

“(3) The Secretary of Agriculture shall include in the record of decision for a determination under paragraph (2)(A)—

“(A) any written statement regarding the determination that is prepared by a Regional Forester consulted by the Secretary under paragraph (2)(A) regarding the determination; or

“(B) an explanation why such a statement by the Regional Forester is not included.

SEC. 6304. DEADLINE FOR DETERMINATION ON PENDING NONCOMPETITIVE LEASE APPLICATIONS.

Not later than 90 days after the date of the enactment of this Act, the Secretary of the Interior shall, with respect to each application pending on the date of the enactment of this Act for a lease under the Geothermal Steam Act of 1970 (30 U.S.C. 1001 et seq.), issue a final determination of—

(1) whether or not to conduct a lease sale by competitive bidding; and

(2) whether or not to award a lease without competitive bidding.

SEC. 6305. OPENING OF PUBLIC LANDS UNDER MILITARY JURISDICTION.

(a) IN GENERAL.—Except as otherwise provided in the Geothermal Steam Act of 1970 (30 U.S.C. 1001 et seq.) and other provisions of Federal law applicable to development of

geothermal energy resources within public lands, all public lands under the jurisdiction of a Secretary of a military department shall be open to the operation of such laws and development and utilization of geothermal steam and associated geothermal resources, as that term is defined in section 2 of the Geothermal Steam Act of 1970 (30 U.S.C. 1001), without the necessity for further action by the Secretary or the Congress.

(b) CONFORMING AMENDMENT.—Section 2689 of title 10, United States Code, is amended by striking “including public lands,” and inserting “other than public lands.”.

(c) TREATMENT OF EXISTING LEASES.—Upon the expiration of any lease in effect on the date of the enactment of this Act of public lands under the jurisdiction of a military department for the development of any geothermal resource, such lease may, at the option of the lessee—

(1) be treated as a lease under the Geothermal Steam Act of 1970 (30 U.S.C. 1001 et seq.), and be renewed in accordance with such Act; or

(2) be renewed in accordance with the terms of the lease, if such renewal is authorized by such terms.

(d) REGULATIONS.—The Secretary of the Interior, with the advice and concurrence of the Secretary of the military department concerned, shall prescribe such regulations to carry out this section as may be necessary. Such regulations shall contain guidelines to assist in determining how much, if any, of the surface of any lands opened pursuant to this section may be used for purposes incident to geothermal energy resources development and utilization.

(e) CLOSURE FOR PURPOSES OF NATIONAL DEFENSE OR SECURITY.—In the event of a national emergency or for purposes of national defense or security, the Secretary of the Interior, at the request of the Secretary of the military department concerned, shall close any lands that have been opened to geothermal energy resources leasing pursuant to this section.

SEC. 6306. APPLICATION OF AMENDMENTS.

The amendments made by this title apply with respect to any lease executed before, on, or after the date of the enactment of this Act.

SEC. 6307. REVIEW AND REPORT TO CONGRESS.

The Secretary of the Interior shall promptly review and report to the Congress regarding the status of all moratoria on and withdrawals from leasing under the Geothermal Steam Act of 1970 (30 U.S.C. 1001 et seq.) of known geothermal resources areas (as that term is defined in section 2 of that Act (30 U.S.C. 1001), specifying for each such area whether the basis for such moratoria or withdrawal still applies.

SEC. 6308. REIMBURSEMENT FOR COSTS OF NEPA ANALYSES, DOCUMENTATION, AND STUDIES.

(a) IN GENERAL.—The Geothermal Steam Act of 1970 (30 U.S.C. 1001 et seq.) is amended by adding at the end the following:

“REIMBURSEMENT FOR COSTS OF CERTAIN ANALYSES, DOCUMENTATION, AND STUDIES

“SEC. 38. (a) IN GENERAL.—The Secretary of the Interior may, through royalty credits, reimburse a person who is a lessee, operator, operating rights owner, or applicant for a lease under this Act for amounts paid by the person for preparation by the Secretary (or a contractor or other person selected by the Secretary) of any project-level analysis, documentation, or related study required under the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) with respect to the lease.

“(b) CONDITIONS.—The Secretary shall may provide reimbursement under subsection (a) only if—

“(1) adequate funding to enable the Secretary to timely prepare the analysis, documentation, or related study is not appropriated;

“(2) the person paid the costs voluntarily; and

“(3) the person maintains records of its costs in accordance with regulations prescribed by the Secretary.”.

(b) APPLICATION.—The amendments made by this section shall apply with respect to any lease entered into before, on, or after the date of the enactment of this Act.

(c) DEADLINE FOR REGULATIONS.—The Secretary shall issue regulations implementing the amendments made by this section by not later than 90 days after the date of the enactment of this Act.

TITLE IV—HYDROPOWER

SEC. 6401. STUDY AND REPORT ON INCREASING ELECTRIC POWER PRODUCTION CAPABILITY OF EXISTING FACILITIES.

(a) IN GENERAL.—The Secretary of the Interior shall conduct a study of the potential for increasing electric power production capability at existing facilities under the administrative jurisdiction of the Secretary.

(b) CONTENT.—The study under this section shall include identification and description in detail of each facility that is capable, with or without modification, of producing additional hydroelectric power, including estimation of the existing potential for the facility to generate hydroelectric power.

(c) REPORT.—The Secretary shall submit to the Congress a report on the findings, conclusions, and recommendations of the study under this section by not later than 12 months after the date of the enactment of this Act. The Secretary shall include in the report the following:

(1) The identifications, descriptions, and estimations referred to in subsection (b).

(2) A description of activities the Secretary is currently conducting or considering, or that could be considered, to produce additional hydroelectric power from each identified facility.

(3) A summary of action that has already been taken by the Secretary to produce additional hydroelectric power from each identified facility.

(4) The costs to install, upgrade, or modify equipment or take other actions to produce additional hydroelectric power from each identified facility.

(5) The benefits that would be achieved by such installation, upgrade, modification, or other action, including quantified estimates of any additional energy or capacity from each facility identified under subsection (b).

(6) A description of actions that are planned, underway, or might reasonably be considered to increase hydroelectric power production by replacing turbine runners.

(7) A description of actions that are planned, underway, or might reasonably be considered to increase hydroelectric power production by performing generator uprates and rewinds.

(8) The impact of increased hydroelectric power production on irrigation, fish, wildlife, Indian tribes, river health, water quality, navigation, recreation, fishing, and flood control.

(9) Any additional recommendations the Secretary considers advisable to increase hydroelectric power production from, and reduce costs and improve efficiency at, facilities under the jurisdiction of the Secretary.

SEC. 6402. INSTALLATION OF POWERFORMER AT FOLSOM POWER PLANT, CALIFORNIA.

(a) **IN GENERAL.**—The Secretary of the Interior may install a powerformer at the Bureau of Reclamation Folsom power plant in Folsom, California, to replace a generator and transformer that are due for replacement due to age.

(b) **REIMBURSABLE COSTS.**—Costs incurred by the United States for installation of a powerformer under this section shall be treated as reimbursable costs and shall bear interest at current long-term borrowing rates of the United States Treasury at the time of acquisition.

(c) **LOCAL COST SHARING.**—In addition to reimbursable costs under subsection (b), the Secretary shall seek contributions from power users toward the costs of the powerformer and its installation.

SEC. 6403. STUDY AND IMPLEMENTATION OF INCREASED OPERATIONAL EFFICIENCIES IN HYDROELECTRIC POWER PROJECTS.

(a) **IN GENERAL.**—The Secretary of Interior shall conduct a study of operational methods and water scheduling techniques at all hydroelectric power plants under the administrative jurisdiction of the Secretary that have an electric power production capacity greater than 50 megawatts, to—

(1) determine whether such power plants and associated river systems are operated so as to maximize energy and capacity capabilities; and

(2) identify measures that can be taken to improve operational flexibility at such plants to achieve such maximization.

(b) **REPORT.**—The Secretary shall submit a report on the findings, conclusions, and recommendations of the study under this section by not later than 18 months after the date of the enactment of this Act, including a summary of the determinations and identifications under paragraphs (1) and (2) of subsection (a).

(c) **COOPERATION BY FEDERAL POWER MARKETING ADMINISTRATIONS.**—The Secretary shall coordinate with the Administrator of each Federal power marketing administration in—

(1) determining how the value of electric power produced by each hydroelectric power facility that produces power marketed by the administration can be maximized; and

(2) implementing measures identified under subsection (a)(2).

(d) **LIMITATION ON IMPLEMENTATION OF MEASURES.**—Implementation under subsections (a)(2) and (b)(2) shall be limited to those measures that can be implemented within the constraints imposed on Department of the Interior facilities by other uses required by law.

SEC. 6404. SHIFT OF PROJECT LOADS TO OFF-PEAK PERIODS.

(a) **IN GENERAL.**—The Secretary of the Interior shall—

(1) review electric power consumption by Bureau of Reclamation facilities for water pumping purposes; and

(2) make such adjustments in such pumping as possible to minimize the amount of electric power consumed for such pumping during periods of peak electric power consumption, including by performing as much of such pumping as possible during off-peak hours at night.

(b) **CONSENT OF AFFECTED IRRIGATION CUSTOMERS REQUIRED.**—The Secretary may not under this section make any adjustment in pumping at a facility without the consent of each person that has contracted with the United States for delivery of water from the

facility for use for irrigation and that would be affected by such adjustment.

(c) **EXISTING OBLIGATIONS NOT AFFECTED.**—This section shall not be construed to affect any existing obligation of the Secretary to provide electric power, water, or other benefits from Bureau of Reclamation facilities.

TITLE V—ARCTIC COASTAL PLAIN DOMESTIC ENERGY

SEC. 6501. SHORT TITLE.

This title may be cited as the “Arctic Coastal Plain Domestic Energy Security Act of 2001”.

SEC. 6502. DEFINITIONS.

In this title:

(1) **COASTAL PLAIN.**—The term “Coastal Plain” means that area identified as such in the map entitled “Arctic National Wildlife Refuge”, dated August 1980, as referenced in section 1002(b) of the Alaska National Interest Lands Conservation Act of 1980 (16 U.S.C. 3142(b)(1)), comprising approximately 1,549,000 acres.

(2) **SECRETARY.**—The term “Secretary”, except as otherwise provided, means the Secretary of the Interior or the Secretary’s designee.

SEC. 6503. LEASING PROGRAM FOR LANDS WITHIN THE COASTAL PLAIN.

(a) **IN GENERAL.**—The Secretary shall take such actions as are necessary—

(1) to establish and implement in accordance with this title a competitive oil and gas leasing program under the Mineral Leasing Act (30 U.S.C. 181 et seq.) that will result in an environmentally sound program for the exploration, development, and production of the oil and gas resources of the Coastal Plain; and

(2) to administer the provisions of this title through regulations, lease terms, conditions, restrictions, prohibitions, stipulations, and other provisions that ensure the oil and gas exploration, development, and production activities on the Coastal Plain will result in no significant adverse effect on fish and wildlife, their habitat, subsistence resources, and the environment, and including, in furtherance of this goal, by requiring the application of the best commercially available technology for oil and gas exploration, development, and production to all exploration, development, and production operations under this title in a manner that ensures the receipt of fair market value by the public for the mineral resources to be leased.

(b) **REPEAL.**—Section 1003 of the Alaska National Interest Lands Conservation Act of 1980 (16 U.S.C. 3143) is repealed.

(c) **COMPLIANCE WITH REQUIREMENTS UNDER CERTAIN OTHER LAWS.**—

(1) **COMPATIBILITY.**—For purposes of the National Wildlife Refuge System Administration Act of 1966, the oil and gas leasing program and activities authorized by this section in the Coastal Plain are deemed to be compatible with the purposes for which the Arctic National Wildlife Refuge was established, and that no further findings or decisions are required to implement this determination.

(2) **ADQUACY OF THE DEPARTMENT OF THE INTERIOR’S LEGISLATIVE ENVIRONMENTAL IMPACT STATEMENT.**—The “Final Legislative Environmental Impact Statement” (April 1987) on the Coastal Plain prepared pursuant to section 1002 of the Alaska National Interest Lands Conservation Act of 1980 (16 U.S.C. 3142) and section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) is deemed to satisfy the requirements under the National Environmental

Policy Act of 1969 that apply with respect to actions authorized to be taken by the Secretary to develop and promulgate the regulations for the establishment of a leasing program authorized by this title before the conduct of the first lease sale.

(3) **COMPLIANCE WITH NEPA FOR OTHER ACTIONS.**—Before conducting the first lease sale under this title, the Secretary shall prepare an environmental impact statement under the National Environmental Policy Act of 1969 with respect to the actions authorized by this title that are not referred to in paragraph (2). Notwithstanding any other law, the Secretary is not required to identify non-leasing alternative courses of action or to analyze the environmental effects of such courses of action. The Secretary shall only identify a preferred action for such leasing and a single leasing alternative, and analyze the environmental effects and potential mitigation measures for those two alternatives. The identification of the preferred action and related analysis for the first lease sale under this title shall be completed within 18 months after the date of the enactment of this Act. The Secretary shall only consider public comments that specifically address the Secretary’s preferred action and that are filed within 20 days after publication of an environmental analysis. Notwithstanding any other law, compliance with this paragraph is deemed to satisfy all requirements for the analysis and consideration of the environmental effects of proposed leasing under this title.

(d) **RELATIONSHIP TO STATE AND LOCAL AUTHORITY.**—Nothing in this title shall be considered to expand or limit State and local regulatory authority.

(e) **SPECIAL AREAS.**—

(1) **IN GENERAL.**—The Secretary, after consultation with the State of Alaska, the city of Kaktovik, and the North Slope Borough, may designate up to a total of 45,000 acres of the Coastal Plain as a Special Area if the Secretary determines that the Special Area is of such unique character and interest so as to require special management and regulatory protection. The Secretary shall designate as such a Special Area the Sadlerochit Spring area, comprising approximately 4,000 acres as depicted on the map referred to in section 6502(1).

(2) **MANAGEMENT.**—Each such Special Area shall be managed so as to protect and preserve the area’s unique and diverse character including its fish, wildlife, and subsistence resource values.

(3) **EXCLUSION FROM LEASING OR SURFACE OCCUPANCY.**—The Secretary may exclude any Special Area from leasing. If the Secretary leases a Special Area, or any part thereof, for purposes of oil and gas exploration, development, production, and related activities, there shall be no surface occupancy of the lands comprising the Special Area.

(4) **DIRECTIONAL DRILLING.**—Notwithstanding the other provisions of this subsection, the Secretary may lease all or a portion of a Special Area under terms that permit the use of horizontal drilling technology from sites on leases located outside the area.

(f) **LIMITATION ON CLOSED AREAS.**—The Secretary’s sole authority to close lands within the Coastal Plain to oil and gas leasing and to exploration, development, and production is that set forth in this title.

(g) **REGULATIONS.**—

(1) **IN GENERAL.**—The Secretary shall prescribe such regulations as may be necessary to carry out this title, including rules and regulations relating to protection of the fish and wildlife, their habitat, subsistence resources, and environment of the Coastal

Plain, by no later than 15 months after the date of the enactment of this Act.

(2) **REVISION OF REGULATIONS.**—The Secretary shall periodically review and, if appropriate, revise the rules and regulations issued under subsection (a) to reflect any significant biological, environmental, or engineering data that come to the Secretary's attention.

SEC. 6504. LEASE SALES.

(a) **IN GENERAL.**—Lands may be leased pursuant to this title to any person qualified to obtain a lease for deposits of oil and gas under the Mineral Leasing Act (30 U.S.C. 181 et seq.).

(b) **PROCEDURES.**—The Secretary shall, by regulation, establish procedures for—

(1) receipt and consideration of sealed nominations for any area in the Coastal Plain for inclusion in, or exclusion (as provided in subsection (c)) from, a lease sale;

(2) the holding of lease sales after such nomination process; and

(3) public notice of and comment on designation of areas to be included in, or excluded from, a lease sale.

(c) **LEASE SALE BIDS.**—Bidding for leases under this title shall be by sealed competitive cash bonus bids.

(d) **ACREAGE MINIMUM IN FIRST SALE.**—In the first lease sale under this title, the Secretary shall offer for lease those tracts the Secretary considers to have the greatest potential for the discovery of hydrocarbons, taking into consideration nominations received pursuant to subsection (b)(1), but in no case less than 200,000 acres.

(e) **TIMING OF LEASE SALES.**—The Secretary shall—

(1) conduct the first lease sale under this title within 22 months after the date of the enactment of this title; and

(2) conduct additional sales so long as sufficient interest in development exists to warrant, in the Secretary's judgment, the conduct of such sales.

SEC. 6505. GRANT OF LEASES BY THE SECRETARY.

(a) **IN GENERAL.**—The Secretary may grant to the highest responsible qualified bidder in a lease sale conducted pursuant to section 6504 any lands to be leased on the Coastal Plain upon payment by the lessee of such bonus as may be accepted by the Secretary.

(b) **SUBSEQUENT TRANSFERS.**—No lease issued under this title may be sold, exchanged, assigned, sublet, or otherwise transferred except with the approval of the Secretary. Prior to any such approval the Secretary shall consult with, and give due consideration to the views of, the Attorney General.

SEC. 6506. LEASE TERMS AND CONDITIONS.

(a) **IN GENERAL.**—An oil or gas lease issued pursuant to this title shall—

(1) provide for the payment of a royalty of not less than 12½ percent in amount or value of the production removed or sold from the lease, as determined by the Secretary under the regulations applicable to other Federal oil and gas leases;

(2) provide that the Secretary may close, on a seasonal basis, portions of the Coastal Plain to exploratory drilling activities as necessary to protect caribou calving areas and other species of fish and wildlife;

(3) require that the lessee of lands within the Coastal Plain shall be fully responsible and liable for the reclamation of lands within the Coastal Plain and any other Federal lands that are adversely affected in connection with exploration, development, production, or transportation activities conducted under the lease and within the Coastal Plain

by the lessee or by any of the subcontractors or agents of the lessee;

(4) provide that the lessee may not delegate or convey, by contract or otherwise, the reclamation responsibility and liability to another person without the express written approval of the Secretary;

(5) provide that the standard of reclamation for lands required to be reclaimed under this title shall be, as nearly as practicable, a condition capable of supporting the uses which the lands were capable of supporting prior to any exploration, development, or production activities, or upon application by the lessee, to a higher or better use as approved by the Secretary;

(6) contain terms and conditions relating to protection of fish and wildlife, their habitat, and the environment as required pursuant to section 6503(a)(2);

(7) provide that the lessee, its agents, and its contractors use best efforts to provide a fair share, as determined by the level of obligation previously agreed to in the 1974 agreement implementing section 29 of the Federal Agreement and Grant of Right of Way for the Operation of the Trans-Alaska Pipeline, of employment and contracting for Alaska Natives and Alaska Native Corporations from throughout the State;

(8) prohibit the export of oil produced under the lease; and

(9) contain such other provisions as the Secretary determines necessary to ensure compliance with the provisions of this title and the regulations issued under this title.

(b) **PROJECT LABOR AGREEMENTS.**—The Secretary, as a term and condition of each lease under this title and in recognizing the Government's proprietary interest in labor stability and in the ability of construction labor and management to meet the particular needs and conditions of projects to be developed under the leases issued pursuant to this title and the special concerns of the parties to such leases, shall require that the lessee and its agents and contractors negotiate to obtain a project labor agreement for the employment of laborers and mechanics on production, maintenance, and construction under the lease.

SEC. 6507. COASTAL PLAIN ENVIRONMENTAL PROTECTION.

(a) **NO SIGNIFICANT ADVERSE EFFECT STANDARD TO GOVERN AUTHORIZED COASTAL PLAIN ACTIVITIES.**—The Secretary shall, consistent with the requirements of section 6503, administer the provisions of this title through regulations, lease terms, conditions, restrictions, prohibitions, stipulations, and other provisions that—

(1) ensure the oil and gas exploration, development, and production activities on the Coastal Plain will result in no significant adverse effect on fish and wildlife, their habitat, and the environment;

(2) require the application of the best commercially available technology for oil and gas exploration, development, and production on all new exploration, development, and production operations; and

(3) ensure that the maximum amount of surface acreage covered by production and support facilities, including airstrips and any areas covered by gravel berms or piers for support of pipelines, does not exceed 2,000 acres on the Coastal Plain.

(b) **SITE-SPECIFIC ASSESSMENT AND MITIGATION.**—The Secretary shall also require, with respect to any proposed drilling and related activities, that—

(1) a site-specific analysis be made of the probable effects, if any, that the drilling or related activities will have on fish and wildlife, their habitat, and the environment;

(2) a plan be implemented to avoid, minimize, and mitigate (in that order and to the extent practicable) any significant adverse effect identified under paragraph (1); and

(3) the development of the plan shall occur after consultation with the agency or agencies having jurisdiction over matters mitigated by the plan.

(c) **REGULATIONS TO PROTECT COASTAL PLAIN FISH AND WILDLIFE RESOURCES, SUBSISTENCE USERS, AND THE ENVIRONMENT.**—Before implementing the leasing program authorized by this title, the Secretary shall prepare and promulgate regulations, lease terms, conditions, restrictions, prohibitions, stipulations, and other measures designed to ensure that the activities undertaken on the Coastal Plain under this title are conducted in a manner consistent with the purposes and environmental requirements of this title.

(d) **COMPLIANCE WITH FEDERAL AND STATE ENVIRONMENTAL LAWS AND OTHER REQUIREMENTS.**—The proposed regulations, lease terms, conditions, restrictions, prohibitions, and stipulations for the leasing program under this title shall require compliance with all applicable provisions of Federal and State environmental law and shall also require the following:

(1) Standards at least as effective as the safety and environmental mitigation measures set forth in items 1 through 29 at pages 167 through 169 of the "Final Legislative Environmental Impact Statement" (April 1987) on the Coastal Plain.

(2) Seasonal limitations on exploration, development, and related activities, where necessary, to avoid significant adverse effects during periods of concentrated fish and wildlife breeding, denning, nesting, spawning, and migration.

(3) That exploration activities, except for surface geological studies, be limited to the period between approximately November 1 and May 1 each year and that exploration activities shall be supported by ice roads, winter trails with adequate snow cover, ice pads, ice airstrips, and air transport methods, except that such exploration activities may occur at other times, if—

(A) the Secretary determines, after affording an opportunity for public comment and review, that special circumstances exist necessitating that exploration activities be conducted at other times of the year; and

(B) the Secretary finds that such exploration will have no significant adverse effect on the fish and wildlife, their habitat, and the environment of the Coastal Plain.

(4) Design safety and construction standards for all pipelines and any access and service roads, that—

(A) minimize, to the maximum extent possible, adverse effects upon the passage of migratory species such as caribou; and

(B) minimize adverse effects upon the flow of surface water by requiring the use of culverts, bridges, and other structural devices.

(5) Prohibitions on public access and use on all pipeline access and service roads.

(6) Stringent reclamation and rehabilitation requirements, consistent with the standards set forth in this title, requiring the removal from the Coastal Plain of all oil and gas development and production facilities, structures, and equipment upon completion of oil and gas production operations, except that the Secretary may exempt from the requirements of this paragraph those facilities, structures, or equipment that the Secretary determines would assist in the management of the Arctic National Wildlife Refuge and that are donated to the United States for that purpose.

(7) Appropriate prohibitions or restrictions on access by all modes of transportation.

(8) Appropriate prohibitions or restrictions on sand and gravel extraction.

(9) Consolidation of facility siting.

(10) Appropriate prohibitions or restrictions on use of explosives.

(11) Avoidance, to the extent practicable, of springs, streams, and river system; the protection of natural surface drainage patterns, wetlands, and riparian habitats; and the regulation of methods or techniques for developing or transporting adequate supplies of water for exploratory drilling.

(12) Avoidance or reduction of air traffic-related disturbance to fish and wildlife.

(13) Treatment and disposal of hazardous and toxic wastes, solid wastes, reserve pit fluids, drilling muds and cuttings, and domestic wastewater, including an annual waste management report, a hazardous materials tracking system, and a prohibition on chlorinated solvents, in accordance with applicable Federal and State environmental law.

(14) Fuel storage and oil spill contingency planning.

(15) Research, monitoring, and reporting requirements.

(16) Field crew environmental briefings.

(17) Avoidance of significant adverse effects upon subsistence hunting, fishing, and trapping by subsistence users.

(18) Compliance with applicable air and water quality standards.

(19) Appropriate seasonal and safety zone designations around well sites, within which subsistence hunting and trapping shall be limited.

(20) Reasonable stipulations for protection of cultural and archeological resources.

(21) All other protective environmental stipulations, restrictions, terms, and conditions deemed necessary by the Secretary.

(e) **CONSIDERATIONS.**—In preparing and promulgating regulations, lease terms, conditions, restrictions, prohibitions, and stipulations under this section, the Secretary shall consider the following:

(1) The stipulations and conditions that govern the National Petroleum Reserve-Alaska leasing program, as set forth in the 1999 Northeast National Petroleum Reserve-Alaska Final Integrated Activity Plan/Environmental Impact Statement.

(2) The environmental protection standards that governed the initial Coastal Plain seismic exploration program under parts 37.31 to 37.33 of title 50, Code of Federal Regulations.

(3) The land use stipulations for exploratory drilling on the KIC-ASRC private lands that are set forth in Appendix 2 of the August 9, 1983, agreement between Arctic Slope Regional Corporation and the United States.

(f) **FACILITY CONSOLIDATION PLANNING.**—

(1) **IN GENERAL.**—The Secretary shall, after providing for public notice and comment, prepare and update periodically a plan to govern, guide, and direct the siting and construction of facilities for the exploration, development, production, and transportation of Coastal Plain oil and gas resources.

(2) **OBJECTIVES.**—The plan shall have the following objectives:

(A) Avoiding unnecessary duplication of facilities and activities.

(B) Encouraging consolidation of common facilities and activities.

(C) Locating or confining facilities and activities to areas that will minimize impact on fish and wildlife, their habitat, and the environment.

(D) Utilizing existing facilities wherever practicable.

(E) Enhancing compatibility between wildlife values and development activities.

SEC. 6508. EXPEDITED JUDICIAL REVIEW.

(a) **FILING OF COMPLAINT.**—

(1) **DEADLINE.**—Subject to paragraph (2), any complaint seeking judicial review of any provision of this title or any action of the Secretary under this title shall be filed in any appropriate district court of the United States—

(A) except as provided in subparagraph (B), within the 90-day period beginning on the date of the action being challenged; or

(B) in the case of a complaint based solely on grounds arising after such period, within 90 days after the complainant knew or reasonably should have known of the grounds for the complaint.

(2) **VENUE.**—Any complaint seeking judicial review of an action of the Secretary under this title may be filed only in the United States Court of Appeals for the District of Columbia.

(3) **LIMITATION ON SCOPE OF CERTAIN REVIEW.**—Judicial review of a Secretarial decision to conduct a lease sale under this title, including the environmental analysis thereof, shall be limited to whether the Secretary has complied with the terms of this division and shall be based upon the administrative record of that decision. The Secretary's identification of a preferred course of action to enable leasing to proceed and the Secretary's analysis of environmental effects under this division shall be presumed to be correct unless shown otherwise by clear and convincing evidence to the contrary.

(b) **LIMITATION ON OTHER REVIEW.**—Actions of the Secretary with respect to which review could have been obtained under this section shall not be subject to judicial review in any civil or criminal proceeding for enforcement.

SEC. 6509. RIGHTS-OF-WAY ACROSS THE COASTAL PLAIN.

(a) **EXEMPTION.**—Title XI of the Alaska National Interest Lands Conservation Act of 1980 (16 U.S.C. 3161 et seq.) shall not apply to the issuance by the Secretary under section 28 of the Mineral Leasing Act (30 U.S.C. 185) of rights-of-way and easements across the Coastal Plain for the transportation of oil and gas.

(b) **TERMS AND CONDITIONS.**—The Secretary shall include in any right-of-way or easement referred to in subsection (a) such terms and conditions as may be necessary to ensure that transportation of oil and gas does not result in a significant adverse effect on the fish and wildlife, subsistence resources, their habitat, and the environment of the Coastal Plain, including requirements that facilities be sited or designed so as to avoid unnecessary duplication of roads and pipelines.

(c) **REGULATIONS.**—The Secretary shall include in regulations under section 6503(g) provisions granting rights-of-way and easements described in subsection (a) of this section.

SEC. 6510. CONVEYANCE.

In order to maximize Federal revenues by removing clouds on title to lands and clarifying land ownership patterns within the Coastal Plain, the Secretary, notwithstanding the provisions of section 1302(h)(2) of the Alaska National Interest Lands Conservation Act (16 U.S.C. 3192(h)(2)), shall convey—

(1) to the Kaktovik Inupiat Corporation the surface estate of the lands described in paragraph 2 of Public Land Order 6959, to the

extent necessary to fulfill the Corporation's entitlement under section 12 of the Alaska Native Claims Settlement Act (43 U.S.C. 1611); and

(2) to the Arctic Slope Regional Corporation the subsurface estate beneath such surface estate pursuant to the August 9, 1983, agreement between the Arctic Slope Regional Corporation and the United States of America.

SEC. 6511. LOCAL GOVERNMENT IMPACT AID AND COMMUNITY SERVICE ASSISTANCE.

(a) **FINANCIAL ASSISTANCE AUTHORIZED.**—

(1) **IN GENERAL.**—The Secretary may use amounts available from the Coastal Plain Local Government Impact Aid Assistance Fund established by subsection (d) to provide timely financial assistance to entities that are eligible under paragraph (2) and that are directly impacted by the exploration for or production of oil and gas on the Coastal Plain under this title.

(2) **ELIGIBLE ENTITIES.**—The North Slope Borough, Kaktovik, and other boroughs, municipal subdivisions, villages, and any other community organized under Alaska State law shall be eligible for financial assistance under this section.

(b) **USE OF ASSISTANCE.**—Financial assistance under this section may be used only for—

(1) planning for mitigation of the potential effects of oil and gas exploration and development on environmental, social, cultural, recreational and subsistence values;

(2) implementing mitigation plans and maintaining mitigation projects; and

(3) developing, carrying out, and maintaining projects and programs that provide new or expanded public facilities and services to address needs and problems associated with such effects, including firefighting, police, water, waste treatment, medivac, and medical services.

(c) **APPLICATION.**—

(1) **IN GENERAL.**—Any community that is eligible for assistance under this section may submit an application for such assistance to the Secretary, in such form and under such procedures as the Secretary may prescribe by regulation.

(2) **NORTH SLOPE BOROUGH COMMUNITIES.**—A community located in the North Slope Borough may apply for assistance under this section either directly to the Secretary or through the North Slope Borough.

(3) **APPLICATION ASSISTANCE.**—The Secretary shall work closely with and assist the North Slope Borough and other communities eligible for assistance under this section in developing and submitting applications for assistance under this section.

(d) **ESTABLISHMENT OF FUND.**—

(1) **IN GENERAL.**—There is established in the Treasury the Coastal Plain Local Government Impact Aid Assistance Fund.

(2) **USE.**—Amounts in the fund may be used only for providing financial assistance under this section.

(3) **DEPOSITS.**—Subject to paragraph (4), there shall be deposited into the fund amounts received by the United States as revenues derived from rents, bonuses, and royalties under on leases and lease sales authorized under this title.

(4) **LIMITATION ON DEPOSITS.**—The total amount in the fund may not exceed \$10,000,000.

(5) **INVESTMENT OF BALANCES.**—The Secretary of the Treasury shall invest amounts in the fund in interest bearing government securities.

(e) **AUTHORIZATION OF APPROPRIATIONS.**—To provide financial assistance under this section there is authorized to be appropriated to

the Secretary from the Coastal Plain Local Government Impact Aid Assistance Fund \$5,000,000 for each fiscal year.

SEC. 6512. REVENUE ALLOCATION.

(a) FEDERAL AND STATE DISTRIBUTION.—

(1) IN GENERAL.—Notwithstanding section 6504 of this Act, the Mineral Leasing Act (30 U.S.C. 181 et. seq.), or any other law, of the amount of adjusted bonus, rental, and royalty revenues from oil and gas leasing and operations authorized under this title—

(A) 50 percent shall be paid to the State of Alaska; and

(B) the balance shall be deposited into the Renewable Energy Technology Investment Fund and the Royalties Conservation Fund as provided in this section.

(2) ADJUSTMENTS.—Adjustments to bonus, rental, and royalty amounts from oil and gas leasing and operations authorized under this title shall be made as necessary for overpayments and refunds from lease revenues received in current or subsequent periods before distribution of such revenues pursuant to this section.

(3) TIMING OF PAYMENTS TO STATE.—Payments to the State of Alaska under this section shall be made semiannually.

(b) RENEWABLE ENERGY TECHNOLOGY INVESTMENT FUND.—

(1) ESTABLISHMENT AND AVAILABILITY.—There is hereby established in the Treasury of the United States a separate account which shall be known as the “Renewable Energy Technology Investment Fund”.

(2) DEPOSITS.—Fifty percent of adjusted revenues from bonus payments for leases issued under this title shall be deposited into the Renewable Energy Technology Investment Fund.

(3) USE, GENERALLY.—Subject to paragraph (4), funds deposited into the Renewable Energy Technology Investment Fund shall be used by the Secretary of Energy to finance research grants, contracts, and cooperative agreements and expenses of direct research by Federal agencies, including the costs of administering and reporting on such a program of research, to improve and demonstrate technology and develop basic science information for development and use of renewable and alternative fuels including wind energy, solar energy, geothermal energy, and energy from biomass. Such research may include studies on deployment of such technology including research on how to lower the costs of introduction of such technology and of barriers to entry into the market of such technology.

(4) USE FOR ADJUSTMENTS AND REFUNDS.—If for any circumstances, adjustments or refunds of bonus amounts deposited pursuant to this title become warranted, 50 percent of the amount necessary for the sum of such adjustments and refunds may be paid by the Secretary from the Renewable Energy Technology Investment Fund.

(5) CONSULTATION AND COORDINATION.—Any specific use of the Renewable Energy Technology Investment Fund shall be determined only after the Secretary of Energy consults and coordinates with the heads of other appropriate Federal agencies.

(6) REPORTS.—Not later than 1 year after the date of the enactment of this Act and on an annual basis thereafter, the Secretary of Energy shall transmit to the Committee on Science of the House of Representatives and the Committee on Energy and Natural Resources of the Senate a report on the use of funds under this subsection and the impact of and efforts to integrate such uses with other energy research efforts.

(c) ROYALTIES CONSERVATION FUND.—

(1) ESTABLISHMENT AND AVAILABILITY.—There is hereby established in the Treasury of the United States a separate account which shall be known as the “Royalties Conservation Fund”.

(2) DEPOSITS.—Fifty percent of revenues from rents and royalty payments for leases issued under this title shall be deposited into the Royalties Conservation Fund.

(3) USE, GENERALLY.—Subject to paragraph (4), funds deposited into the Royalties Conservation Fund—

(A) may be used by the Secretary of the Interior and the Secretary of Agriculture to finance grants, contracts, cooperative agreements, and expenses for direct activities of the Department of the Interior and the Forest Service to restore and otherwise conserve lands and habitat and to eliminate maintenance and improvements backlogs on Federal lands, including the costs of administering and reporting on such a program; and

(B) may be used by the Secretary of the Interior to finance grants, contracts, cooperative agreements, and expenses—

(i) to preserve historic Federal properties;

(ii) to assist States and Indian Tribes in preserving their historic properties;

(iii) to foster the development of urban parks; and

(iv) to conduct research to improve the effectiveness and lower the costs of habitat restoration.

(4) USE FOR ADJUSTMENTS AND REFUNDS.—If for any circumstances, refunds or adjustments of royalty and rental amounts deposited pursuant to this title become warranted, 50 percent of the amount necessary for the sum of such adjustments and refunds may be paid from the Royalties Conservation Fund.

(d) AVAILABILITY.—Moneys covered into the accounts established by this section—

(1) shall be available for expenditure only to the extent appropriated therefor;

(2) may be appropriated without fiscal-year limitation; and

(3) may be obligated or expended only as provided in this section.

TITLE VI—CONSERVATION OF ENERGY BY THE DEPARTMENT OF THE INTERIOR

SEC. 6601. ENERGY CONSERVATION BY THE DEPARTMENT OF THE INTERIOR.

(a) IN GENERAL.—The Secretary of the Interior shall—

(1) conduct a study to identify, evaluate, and recommend opportunities for conserving energy by reducing the amount of energy used by facilities of the Department of the Interior; and

(2) wherever feasible and appropriate, reduce the use of energy from traditional sources by encouraging use of alternative energy sources, including solar power and power from fuel cells, throughout such facilities and the public lands of the United States.

(b) REPORTS.—The Secretary shall submit to the Congress—

(1) by not later than 90 days after the date of the enactment of this Act, a report containing the findings, conclusions, and recommendations of the study under subsection (a)(1); and

(2) by not later than December 31 each year, an annual report describing progress made in—

(A) conserving energy through opportunities recommended in the report under paragraph (1); and

(B) encouraging use of alternative energy sources under subsection (a)(2).

SEC. 6602. AMENDMENT TO BUY INDIAN ACT.

Section 23 of the Act of June 25, 1910 (25 U.S.C. 47; commonly known as the “Buy Indian Act”) is amended by inserting “energy products, and energy by-products,” after “printing,”.

TITLE VII—COAL

SEC. 6701. LIMITATION ON FEES WITH RESPECT TO COAL LEASE APPLICATIONS AND DOCUMENTS.

Notwithstanding sections 304 and 504 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1734, 1764) and section 9701 of title 31, United States Code, the Secretary shall not recover the Secretary's costs with respect to applications and other documents relating coal leases.

SEC. 6702. MINING PLANS.

Section 2(d)(2) of the Mineral Leasing Act (30 U.S.C. 202a(2)) is amended—

(1) by inserting “(A)” after “(2)”; and

(2) by adding at the end the following:

“(B) The Secretary may establish a period of more than 40 years if the Secretary determines that the longer period—

“(i) will ensure the maximum economic recovery of a coal deposit; or

“(ii) the longer period is in the interest of the orderly, efficient, or economic development of a coal resources.”.

SEC. 6703. PAYMENT OF ADVANCE ROYALTIES UNDER COAL LEASES.

(a) IN GENERAL.—Section 7(b) of the Mineral Leasing Act of 1920 (30 U.S.C. 207(b)) is amended to read as follows:

“(b)(1) Each lease shall be subjected to the condition of diligent development and continued operation of the mine or mines, except where operations under the lease are interrupted by strikes, the elements, or casualties not attributable to the lessee.

“(2)(A) The Secretary of the Interior, upon determining that the public interest will be served thereby, may suspend the condition of continued operation upon the payment of advance royalties.

“(B) Such advance royalties shall be computed based on the average price for coal sold in the spot market from the same region during the last month of each applicable continued operation year.

“(C) The aggregate number of years during the initial and any extended term of any lease for which advance royalties may be accepted in lieu of the condition of continued operation shall not exceed 20.

“(3) The amount of any production royalty paid for any year shall be reduced (but not below zero) by the amount of any advance royalties paid under such lease to the extent that such advance royalties have not been used to reduce production royalties for a prior year.

“(4) This subsection shall be applicable to any lease or logical mining unit in existence on the date of the enactment of this paragraph or issued or approved after such date.

“(5) Nothing in this subsection shall be construed to affect the requirement contained in the second sentence of subsection (a) relating to commencement of production at the end of 10 years.”.

(b) AUTHORITY TO WAIVE, SUSPEND, OR REDUCE ADVANCE ROYALTIES.—Section 39 of the Mineral Leasing Act (30 U.S.C. 209) is amended by striking the last sentence.

SEC. 6704. ELIMINATION OF DEADLINE FOR SUBMISSION OF COAL LEASE OPERATION AND RECLAMATION PLAN.

Section 7(c) of the Mineral Leasing Act (30 U.S.C. 207(c)) is amended by striking “and not later than three years after a lease is issued,”.

TITLE VIII—INSULAR AREAS ENERGY SECURITY

SEC. 6801. INSULAR AREAS ENERGY SECURITY.

Section 604 of the Act entitled "An Act to authorize appropriations for certain insular areas of the United States, and for other purposes", approved December 24, 1980 (Public Law 96-597; 94 Stat. 3480-3481), is amended—

(1) in subsection (a)(4) by striking the period and inserting a semicolon;

(2) by adding at the end of subsection (a) the following new paragraphs:

"(5) electric power transmission and distribution lines in insular areas are inadequate to withstand damage caused by the hurricanes and typhoons which frequently occur in insular areas and such damage often costs millions of dollars to repair; and

"(6) the refinement of renewable energy technologies since the publication of the 1982 Territorial Energy Assessment prepared pursuant to subsection (c) reveals the need to reassess the state of energy production, consumption, infrastructure, reliance on imported energy, and indigenous sources in regard to the insular areas."

(3) by amending subsection (e) to read as follows:

"(e)(1) The Secretary of the Interior, in consultation with the Secretary of Energy and the chief executive officer of each insular area, shall update the plans required under subsection (c) by—

"(A) updating the contents required by subsection (c);

"(B) drafting long-term energy plans for such insular areas with the objective of reducing, to the extent feasible, their reliance on energy imports by the year 2010 and maximizing, to the extent feasible, use of indigenous energy sources; and

"(C) drafting long-term energy transmission line plans for such insular areas with the objective that the maximum percentage feasible of electric power transmission and distribution lines in each insular area be protected from damage caused by hurricanes and typhoons.

"(2) Not later than May 31, 2003, the Secretary of the Interior shall submit to Congress the updated plans for each insular area required by this subsection."; and

(4) by amending subsection (g)(4) to read as follows:

"(4) POWER LINE GRANTS FOR TERRITORIES.—

"(A) IN GENERAL.—The Secretary of the Interior is authorized to make grants to governments of territories of the United States to carry out eligible projects to protect electric power transmission and distribution lines in such territories from damage caused by hurricanes and typhoons.

"(B) ELIGIBLE PROJECTS.—The Secretary may award grants under subparagraph (A) only to governments of territories of the United States that submit written project plans to the Secretary for projects that meet the following criteria:

"(i) The project is designed to protect electric power transmission and distribution lines located in one or more of the territories of the United States from damage caused by hurricanes and typhoons.

"(ii) The project is likely to substantially reduce the risk of future damage, hardship, loss, or suffering.

"(iii) The project addresses one or more problems that have been repetitive or that pose a significant risk to public health and safety.

"(iv) The project is not likely to cost more than the value of the reduction in direct damage and other negative impacts that the project is designed to prevent or mitigate.

The cost benefit analysis required by this criterion shall be computed on a net present value basis.

"(v) The project design has taken into consideration long-term changes to the areas and persons it is designed to protect and has manageable future maintenance and modification requirements.

"(vi) The project plan includes an analysis of a range of options to address the problem it is designed to prevent or mitigate and a justification for the selection of the project in light of that analysis.

"(vii) The applicant has demonstrated to the Secretary that the matching funds required by subparagraph (D) are available.

"(C) PRIORITY.—When making grants under this paragraph, the Secretary shall give priority to grants for projects which are likely to—

"(i) have the greatest impact on reducing future disaster losses; and

"(ii) best conform with plans that have been approved by the Federal Government or the government of the territory where the project is to be carried out for development or hazard mitigation for that territory.

"(D) MATCHING REQUIREMENT.—The Federal share of the cost for a project for which a grant is provided under this paragraph shall not exceed 75 percent of the total cost of that project. The non-Federal share of the cost may be provided in the form of cash or services.

"(E) TREATMENT OF FUNDS FOR CERTAIN PURPOSES.—Grants provided under this paragraph shall not be considered as income, a resource, or a duplicative program when determining eligibility or benefit levels for Federal major disaster and emergency assistance.

"(F) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this paragraph \$5,000,000 for each fiscal year beginning after the date of the enactment of this paragraph."

DIVISION G

SEC. 7101. BUY AMERICAN.

No funds authorized under this Act shall be available to any person or entity that has been convicted of violating the Buy American Act (41 U.S.C. 10a-10c).

DIVISION H

Sec. 8101. PROHIBITION ON HUMAN CLONING.

(a) IN GENERAL.—Title 18, United States Code, is amended by inserting after chapter 15, the following:

"CHAPTER 16—HUMAN CLONING

"Sec.

"301. Definitions.

"302. Prohibition on human cloning.

"§ 301. Definitions

"In this chapter:

"(1) HUMAN CLONING.—The term 'human cloning' means human asexual reproduction, accomplished by introducing nuclear material from one or more human somatic cells into a fertilized or unfertilized oocyte whose nuclear material has been removed or inactivated so as to produce a living organism (at any stage of development) that is genetically virtually identical to an existing or previously existing human organism.

"(2) ASEXUAL REPRODUCTION.—The term 'asexual reproduction' means reproduction not initiated by the union of oocyte and sperm.

"(3) SOMATIC CELL.—The term 'somatic cell' means a diploid cell (having a complete set of chromosomes) obtained or derived from a living or deceased human body at any stage of development.

"§ 302. Prohibition on human cloning

"(a) IN GENERAL.—It shall be unlawful for any person or entity, public or private, in or affecting interstate commerce, knowingly—

"(1) to perform or attempt to perform human cloning;

"(2) to participate in an attempt to perform human cloning; or

"(3) to ship or receive for any purpose an embryo produced by human cloning or any product derived from such embryo.

"(b) IMPORTATION.—It shall be unlawful for any person or entity, public or private, knowingly to import for any purpose an embryo produced by human cloning, or any product derived from such embryo.

"(c) PENALTIES.—

"(1) CRIMINAL PENALTY.—Any person or entity that violates this section shall be fined under this title or imprisoned not more than 10 years, or both.

"(2) CIVIL PENALTY.—Any person or entity that violates any provision of this section shall be subject to, in the case of a violation that involves the derivation of a pecuniary gain, a civil penalty of not less than \$1,000,000 and not more than an amount equal to the amount of the gross gain multiplied by 2, if that amount is greater than \$1,000,000.

"(d) SCIENTIFIC RESEARCH.—Nothing in this section restricts areas of scientific research not specifically prohibited by this section, including research in the use of nuclear transfer or other cloning techniques to produce molecules, DNA, cells other than human embryos, tissues, organs, plants, or animals other than humans."

(b) STUDY AND REPORT.—

(1) IN GENERAL.—The General Accounting Office shall conduct a study to assess the need (if any) for amendment of the prohibition on human cloning, as defined in section 301 of title 18, United States Code, as added by this section, which study shall include—

(A) a discussion of new developments in medical technology concerning human cloning and somatic cell nuclear transfer, the need (if any) for somatic cell nuclear transfer to produce medical advances, current public attitudes and prevailing ethical views concerning the use of somatic cell nuclear transfer, and potential legal implications of research in somatic cell nuclear transfer; and

(B) a review of any technological developments that may require that technical changes be made to chapter 16 of title 18, United States Code, as added by this section.

(2) REPORT.—The General Accounting Office shall transmit to Congress, within 4 years after the date of enactment of this Act, a report containing the findings and conclusions of its study, together with recommendations for any legislation or administrative actions which it considers appropriate.

(c) CLERICAL AMENDMENT.—The table of chapters for part I of title 18, United States Code, is amended by inserting after the item relating to chapter 15 the following:

"16. Human Cloning 301".

(d) EFFECTIVE DATE.—This section, and the amendments made by this section, shall take effect the day after the date of enactment of this Act, and shall expire on the date that is 180 days after the date of enactment of this Act.

SA 2172. Mr. HOLLINGS submitted an amendment intended to be proposed by him to the bill S. 1743, to create a temporary reinsurance mechanism to enhance the availability of terrorism

insurance; which was referred to the Committee on Commerce, Science, and Transportation, as follows:

At the appropriate place, insert the following:

SEC. . TAX-EXEMPT STATUS OF TERRORISM RISK-RELATED INCREASED PREMIUM PASSTHROUGH ACCOUNTS.

Amounts received by participating insurers as increased premiums under section 9(a) and deposited in the separate segregated account required by section 9(b), and amounts earned as interest, dividends, or other income on funds deposited in such account, shall be exempt from all Federal, State, and local income and excise taxes, and may not be taken into account for the purpose of determining any other tax liability of the participating insurer.

SA 2173. Mr. BURNS submitted an amendment intended to be proposed by him to the bill H.R. 10, to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the end, add the following:

TITLE IX—CAPITAL GRANTS FOR RAILROAD TRACK

SEC. 901. ESTABLISHMENT OF PROGRAM.

(a) **AUTHORITY.**—Chapter 223 of title 49, United States Code, is amended to read as follows:

“CHAPTER 223—CAPITAL GRANTS FOR RAILROAD TRACK

“Sec.

“22301. Capital grants for railroad track.

“§ 22301. Capital grants for railroad track

“(a) ESTABLISHMENT OF PROGRAM.—

“(1) ESTABLISHMENT.—The Secretary of Transportation shall establish a program of capital grants for the rehabilitation, preservation, or improvement of railroad track (including roadbed, bridges, and related track structures) of class II and class III railroads. Such grants shall be for rehabilitating, preserving, or improving track used primarily for freight transportation to a standard ensuring that the track can be operated safely and efficiently, including grants for rehabilitating, preserving, or improving track to handle 286,000 pound rail cars. Grants may be provided under this chapter—

“(A) directly to the class II or class III railroad; or

“(B) with the concurrence of the class II or class III railroad, to a State or local government.

“(2) STATE COOPERATION.—Class II and class III railroad applicants for a grant under this chapter are encouraged to utilize the expertise and assistance of State transportation agencies in applying for and administering such grants. State transportation agencies are encouraged to provide such expertise and assistance to such railroads.

“(3) INTERIM REGULATIONS.—Not later than December 31, 2001, the Secretary shall issue temporary regulations to implement the program under this section. Subchapter II of chapter 5 of title 5 does not apply to a temporary regulation issued under this paragraph or to an amendment to such a temporary regulation.

“(4) FINAL REGULATIONS.—Not later than October 1, 2002, the Secretary shall issue final regulations to implement the program under this section.

“(b) MAXIMUM FEDERAL SHARE.—The maximum Federal share for carrying out a project under this section shall be 80 percent

of the project cost. The non-Federal share may be provided by any non-Federal source in cash, equipment, or supplies. Other in-kind contributions may be approved by the Secretary on a case by case basis consistent with this chapter.

“(c) PROJECT ELIGIBILITY.—For a project to be eligible for assistance under this section the track must have been operated or owned by a class II or class III railroad as of the date of the enactment of the Railroad Track Modernization Act of 2001.

“(d) USE OF FUNDS.—Grants provided under this section shall be used to implement track capital projects as soon as possible. In no event shall grant funds be contractually obligated for a project later than the end of the third Federal fiscal year following the year in which the grant was awarded. Any funds not so obligated by the end of such fiscal year shall be returned to the Secretary for reallocation.

“(e) ADDITIONAL PURPOSE.—In addition to making grants for projects as provided in subsection (a), the Secretary may also make grants to supplement direct loans or loan guarantees made under title V of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 822(d)), for projects described in the last sentence of section 502(d) of such title. Grants made under this subsection may be used, in whole or in part, for paying credit risk premiums, lowering rates of interest, or providing for a holiday on principal payments.

“(f) EMPLOYEE PROTECTION.—The Secretary shall require as a condition of any grant made under this section that the recipient railroad provide a fair arrangement at least as protective of the interests of employees who are affected by the project to be funded with the grant as the terms imposed under section 11326(a), as in effect on the date of the enactment of the Railroad Track Modernization Act of 2001.

“(g) LABOR STANDARDS.—

“(1) PREVAILING WAGES.—The Secretary shall ensure that laborers and mechanics employed by contractors and subcontractors in construction work financed by a grant made under this section will be paid wages not less than those prevailing on similar construction in the locality, as determined by the Secretary of Labor under the Act of March 3, 1931 (known as the Davis-Bacon Act; 40 U.S.C. 276a et seq.). The Secretary shall make a grant under this section only after being assured that required labor standards will be maintained on the construction work.

“(2) WAGE RATES.—Wage rates in a collective bargaining agreement negotiated under the Railway Labor Act (45 U.S.C. 151 et seq.) are deemed for purposes of this subsection to comply with the Act of March 3, 1931 (known as the Davis-Bacon Act; 40 U.S.C. 276a et seq.).

“(h) STUDY.—The Secretary shall conduct a study of the projects carried out with grant assistance under this section to determine the public interest benefits associated with the light density railroad networks in the States and their contribution to a multimodal transportation system. Not later than March 31, 2003, the Secretary shall report to Congress any recommendations the Secretary considers appropriate regarding the eligibility of light density rail networks for Federal infrastructure financing.

“(i) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary of Transportation \$350,000,000 for each of the fiscal years 2002 through 2004 for carrying out this section.”.

(b) CONFORMING AMENDMENT.—The item relating to chapter 223 in the table of chapters

of subtitle V of title 49, United States Code, is amended to read as follows:

“223. CAPITAL GRANTS FOR RAILROAD TRACK 22301”.

SA 2174. Mr. BURNS submitted an amendment intended to be proposed by him to the bill H.R. 10, to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the end, add the following:

TITLE IX—RAILROAD COMPETITION, ARBITRATION, AND SERVICE

SEC. 901. SHORT TITLE; AMENDMENT OF TITLE 49, UNITED STATES CODE.

(a) **SHORT TITLE.**—This title may be cited as the “Railroad Competition, Arbitration, and Service Act of 2001”.

(b) **AMENDMENT OF TITLE 49, UNITED STATES CODE.**—Except as otherwise expressly provided, whenever in this title an amendment or repeal is expressed in terms of an amendment to, or a repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of title 49, United States Code.

SEC. 902. PURPOSES.

The purposes of this title are as follows:

(1) To eliminate unreasonable barriers to competition among rail carriers.

(2) To provide for use of expedited, private means for the resolution of disputes between shippers and carriers.

SEC. 903. CLARIFICATION OF RAIL TRANSPORTATION POLICY.

Section 10101 is amended—

(1) by inserting “(a) IN GENERAL.—” before “In regulating”; and

(2) by adding at the end the following:

“(b) PRIMARY OBJECTIVES.—The primary objectives of the rail transportation policy of the United States are as follows:

“(1) To ensure effective competition among rail carriers at origins and destinations.

“(2) To maintain reasonable rates for rail transportation where effective competition among rail carriers has not been achieved.

“(3) To maintain consistent and efficient rail transportation service for shippers.”.

SEC. 904. ARBITRATION OF CERTAIN RAIL RATE, SERVICE, AND OTHER DISPUTES.

(a) **IN GENERAL.—**

(1) **AUTHORITY.**—Chapter 117 of title 49 is amended by adding the following section after section 11707:

“§ 11708. Arbitration of certain rail rate, service, and other disputes

“(a) ELECTION OF ARBITRATION.—A dispute described in subsection (b) shall be submitted for resolution by arbitration upon the election of any party to the dispute that is not a rail carrier.

“(b) COVERED DISPUTES.—(1) Except as provided in paragraph (2), subsection (a) applies to any dispute between a party described in subsection (a) and a rail carrier that—

“(A) arises under section 10701(c), 10701(d), 10702, 10704(a)(1), 10707, 10741, 10745, 10746, 11101(a), 11102, 11121, 11122, or 11706 of this title; and

“(B) involves—

“(i) the payment of money;

“(ii) a rate charged by the rail carrier; or

“(iii) transportation by the rail carrier.

“(2) Subsection (a) does not apply to a dispute if the resolution of the dispute would necessarily involve the promulgation of regulations generally applicable to all rail carriers.

“(c) ARBITRATION PROCEDURES.—The Secretary of Transportation shall prescribe in

regulations the procedures for the resolution of disputes submitted for arbitration under subsection (a). The regulations shall include the following:

“(1) Procedures, including time limits, for the selection of an arbitrator or panel of arbitrators for a dispute from among arbitrators listed on the roster of arbitrators established and maintained by the Secretary under subsection (d)(1).

“(2) Policies, requirements, and procedures for the compensation of each arbitrator for a dispute to be paid by the parties to the dispute.

“(3) Procedures for expedited arbitration of a dispute, including procedures for discovery authorized in the exercise of discretion by the arbitrator or panel of arbitrators.

“(d) **SELECTION OF ARBITRATORS.**—(1) The Secretary of Transportation shall establish, maintain, and revise as necessary a roster of arbitrators who—

“(A) are experienced in transportation or economic issues within the jurisdiction of the Board or issues similar to those issues;

“(B) satisfy requirements for neutrality and other qualification requirements prescribed by the Secretary;

“(C) consent to serve as arbitrators under this section; and

“(D) are not officers or employees of the United States.

(2) For a dispute involving an amount not in excess of \$1,000,000, the regulations under subsection (c) shall provide for arbitration by a single arbitrator selected by—

“(A) the parties to the dispute; or

“(B) if the parties cannot agree, the Secretary of Transportation, from the roster of arbitrators prescribed under paragraph (1).

“(3)(A) For a dispute involving an amount in excess of \$1,000,000, the regulations under subsection (c) shall provide for arbitration by a panel of three arbitrators selected as follows:

“(i) One arbitrator selected by the party electing the arbitration.

“(ii) One arbitrator selected by the rail carrier or all of the rail carriers who are parties to the dispute, as the case may be.

“(iii) One arbitrator selected by the two arbitrators selected under clauses (i) and (ii).

“(B) If a selection of an arbitrator is not made under clause (ii) or (iii) of subparagraph (A) within the time limits prescribed in the regulations, then the Secretary shall select the arbitrator from the roster of arbitrators prescribed under paragraph (1).

“(e) **DISPUTES ON RATES OR CHARGES.**—(1) The requirements of this subsection apply to a dispute submitted under this section for resolution of an issue of the reasonableness of a rate or charge imposed by a rail carrier.

“(2)(A) Subject to subparagraph (B), the decision of an arbitrator or panel of arbitrators in a dispute on an issue described in paragraph (1) shall be one of the final offers of the parties to the dispute.

“(B) A decision under subparagraph (A) may not provide for a rate for transportation by a rail carrier that would result in a revenue-variable cost percentage for such transportation that is less than 180 percent, as determined under standards applied in the administration of section 10707(d) of this title.

“(3) If the party electing arbitration of a dispute described in paragraph (1) seeks compensation for damages incurred by the party as a result of a specific rate or charge imposed by a rail carrier for the transportation of items for the party and the party alleges an amount of damages that does not exceed \$500,000 for any year as a result of the imposition of the specific rate or charge, the arbi-

trator, in making a decision on the dispute, shall consider the rates or charges, respectively, that are imposed by rail carriers for the transportation of similar items under similar circumstances in rail transportation markets where there is effective competition, as determined under standards applied by the Board in the administration of section 10707(a) of this title.

“(f) **TIME FOR ISSUANCE OF ARBITRATION DECISION.**—Notwithstanding any other provision of this subtitle limiting the time for the taking of an action under this subtitle, the arbitrator or panel of arbitrators for a dispute submitted for resolution under this section shall issue a final decision on the dispute within the maximum period after the date on which the arbitrator or panel is selected to resolve the dispute under this section, as follows:

“(1) In the case of a dispute involving \$1,000,000 or less, 120 days.

“(2) In the case of a dispute involving more than \$1,000,000, 180 days.

“(g) **AUTHORIZED RELIEF.**—A decision of an arbitrator or panel of arbitrators under this section may grant relief in either or both of the following forms:

“(1) Monetary damages, to the extent authorized to be provided by the Board in such a dispute under this subtitle.

“(2) An order that requires specific performance of any obligation under a statute determined to be applicable, including any limitation of rates to reasonable rates, for any period not in excess of two years beginning on the date of the decision.

“(h) **JUDICIAL CONFIRMATION AND REVIEW.**—The following provisions of title 9 shall apply to an arbitration decision issued in a dispute under this section:

“(1) Section 9 (relating to confirmation of an award in an arbitration decision), which shall be applied as if the parties had entered into an agreement under title 9 to submit the dispute to the arbitration and had provided in that agreement for a judgment of an unspecified court to be entered on the award made pursuant to the arbitration.

“(2) Section 10 (relating to judicial vacation of an award in an arbitration decision).”

(2) **CLERICAL AMENDMENT.**—The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 11707 the following:

“11708. Arbitration of certain rail rate, service, and other disputes.”

(b) **TIME FOR IMPLEMENTING CERTAIN REQUIREMENTS.**—Not later than 180 days after the date of the enactment of this Act, the Secretary of Transportation shall promulgate regulations, prescribe a roster of arbitrators, and complete any other action that is necessary for the implementation of section 11708 of title 49, United States Code (as added by subsection (a)).

SEC. 905. ELIMINATION OF BARRIERS TO COMPETITION BETWEEN CLASS I CARRIERS AND CLASS II AND CLASS III CARRIERS.

(a) **RESTRICTION ON APPROVAL OR EXEMPTION OF CARRIERS' ACTIVITIES BY SURFACE TRANSPORTATION BOARD.**—Section 10901 is amended by adding at the end the following new subsection:

“(e)(1) The Board may not issue under this section a certificate authorizing an activity described in subsection (a), or exempt from the applicability of this section under section 10502 of this title such an activity that involves a transfer of interest in a line of railroad, by a Class I rail carrier to a Class II or III rail carrier if the activity directly or indirectly would result in—

“(A) a restriction of the ability of the Class II or Class III rail carrier to interchange traffic with other carriers; or

“(B) a restriction of competition between or among rail carriers in the region affected by the activity in a manner or to an extent that would violate antitrust laws of the United States (notwithstanding any exemption from the applicability of antitrust laws that is provided under section 10706 of this title or any other provision of law).

“(2) Any party to an activity referred to in paragraph (1) that has been carried out, or any rail shipper affected by such an activity, may request the Board to review the activity to determine whether the activity has resulted in a restriction described in that paragraph. If, upon review of the activity, the Board determines that the activity resulted in such a restriction and the restriction has been in effect for at least 10 years, the Board shall declare the restriction to be unlawful and terminate the restriction unless the Board finds that the termination of the restriction would materially impair the ability of an affected rail carrier to provide service to the public or would otherwise be inconsistent with the public interest.

“(3) In this subsection:

“(A) The term ‘antitrust laws’ has the meaning given that term in subsection (a) of the first section of the Clayton Act (15 U.S.C. 12(a)), except that such term also means section 5 of the Federal Trade Commission Act (15 U.S.C. 45) to the extent that such section 5 applies to unfair methods of competition.

“(B) The terms ‘class I rail carrier’, ‘class II rail carrier’, and ‘class III rail carrier’ mean, respectively, a rail carrier classified under regulations of the Board as a Class I rail carrier, Class II rail carrier, and Class III rail carrier.”

(b) **APPLICABILITY TO PREVIOUSLY APPROVED OR EXEMPTED ACTIVITIES.**—Paragraph (2) of section 10901(e) of title 49, United States Code (as added by subsection (a)), shall apply with respect to any activity referred to in that paragraph for which the Surface Transportation Board issued a certificate authorizing the activity under section 10901 of such title, or exempted the activity from the necessity for such a certificate under section 10502 of such title, before, on, or after the date of the enactment of this Act.

SEC. 906. SYSTEM WIDE COMPETITION.

(a) **TRACKAGE RIGHTS.**—Chapter 111 is amended by inserting after section 11102 the following new section:

“§ 11102a. Trackage rights

“(a) **ALTERNATIVE RAIL CARRIER SERVICE.**—(1) A person who uses or seeks to use rail service for major train load shipments to or from a facility (whether located in a terminal area or served by terminal facilities) that has physical access solely to one rail carrier may request, as provided in this subsection, that rail service for such shipments be provided to or from that facility by—

“(A) an existing Class I rail carrier; or

“(B) an existing Class II rail carrier, existing Class III rail carrier, or new rail service provider that, as determined by the Federal Railroad Administration before the person makes the request—

“(i) is or is likely to be capable of transporting the major train load shipments over the facilities of the one rail carrier to or from the facility with the physical access solely to that rail carrier;

“(ii) is or is likely to be capable of doing so in compliance with applicable Federal Railroad Administration regulations and with

the operating and safety rules of the rail carrier responsible for dispatching for the use of the facilities; and

“(iii) has or is likely to have the financial ability (or insurance coverage with limits customary in the railroad industry) to satisfy liability claims arising from its operations.

“(2) For the purposes of this section a major train load shipment is any train load shipment that consists of 50 or more rail cars and is tendered all at one time on a single bill of lading.

“(b) PROCEDURE FOR REQUESTING SERVICE.—(1) A person seeking under subsection (a) to obtain from an alternative rail service provider transportation for major train load shipments to or from a facility described in paragraph (1) of that subsection shall file with the Board a notice of intent to request that service. The notice shall include the following:

“(A) A description of the facilities to be used by the alternative service provider.

“(B) A statement that the person has attempted without success, through negotiations with the rail carrier that has been providing the person with rail service to or from the facility, to obtain the proposed service from that rail carrier on terms similar to those available from the alternative rail service provider.

“(C) Any other details of the proposed service.

“(D) If the alternative rail service provider is a provider described in subparagraph (B) of subsection (a)(1), a certification by the Federal Railroad Administration of the determinations required for eligibility under that subparagraph.

“(2)(A) Subject to subparagraph (D), rail service described in a notice filed with the Board under paragraph (1) may be provided by the alternative rail service provider referred to in the notice beginning 60 days after the notice is so filed unless, before the expiration of that 60-day period, the Board determines that the alternative rail service provider's use of the facilities involved—

“(i) will be unsafe;

“(ii) is not operationally feasible; or

“(iii) will substantially impair the ability of the other rail carrier or rail carriers using the facilities to provide transportation over those facilities in accordance with the reasonable requirements of the customers served by the other carrier or carriers as of the date of the Board's determination.

“(B) The rail carrier or carriers that own or provide transportation over the facilities to be used by an alternative rail service provider in rail service covered by a notice filed with the Board under paragraph (1) shall have the burden of proving the matters described in clauses (i), (ii), and (iii) of subparagraph (A).

“(C) The Board shall consult with the Federal Railroad Administration in determining the facts regarding any allegation by a rail carrier or rail carriers that an alternative rail service provider's use of facilities would be unsafe.

“(D) An alternative rail service provider may not begin to provide any rail service under subparagraph (A) before the provider's train crews are qualified to operate over the facilities to be used to provide the service, as determined under rules applicable to such operations.

“(c) DISPATCHING AND OTHER RESPONSIBILITIES.—(1) The rail carrier responsible for controlling rail operations on, or for dispatching for the use of, facilities used by any alternative rail service provider pursuant to

a notice filed with the Board under subsection (b) shall—

“(A) continue to perform those functions for all rail carriers using the facilities, including the alternative rail service provider; and

“(B) dispatch trains for the alternative rail service provider, without discrimination, on the same basis that the rail carrier would apply if it were providing the transportation for the traffic transported by the alternative rail service provider.

“(2) The Board shall have jurisdiction over, and shall promptly resolve, any disputes arising under paragraph (1)(B).

“(d) COMPENSATION FOR USE OF FACILITIES.—(1) An alternative rail service provider that, pursuant to a notice filed with the Board under subsection (b), is providing transportation over facilities owned by another rail carrier shall compensate the owner of the facilities on such terms as the alternative rail service provider and the owner may agree. The terms of compensation shall be adjusted annually, as the parties may agree, effective as of the anniversary of the date on which the alternative rail service provider began to use the facilities.

“(2)(A) The terms of compensation for an owner of facilities for the use of facilities by an alternative rail service provider shall be established on a basis that provides for the alternative rail service provider to compensate the owner at a level that—

“(i) defrays the relevant costs incurred by the owner for transportation over those facilities to the extent of a share that is proportionate to the use of those facilities by the alternative rail service provider in relation to the use of those facilities by all users of the facilities; and

“(ii) provides the owner with a reasonable return on and of the owner's net book investment in road property for the facilities (exclusive of write-ups or write-downs resulting from mergers and consolidations of any of the facilities that were acquired from another rail carrier on or after July 1, 1995).

“(B) For the purposes of subparagraph (A), an alternative rail service provider's proportionate share of the total relevant costs incurred by the owner of facilities for the use of facilities during the first 12 months of the provider's use of the facilities pursuant to a notice filed with the Board under subsection (b) shall be the ratio of—

“(i) the extent to which the alternative rail service provider is reasonably expected to use the facilities during that 12-month period, measured in gross ton-miles, to

“(ii) the total volume of the use of the facilities by all users of the facilities during the 12 calendar months preceding the month in which the notice was filed with the Board, measured in gross ton-miles.

“(C) For the purpose of calculating an annual adjustment of the terms of compensation for an owner of facilities for the use of those facilities for rail service by an alternative rail service provider, the ratio applied under subparagraph (A) for determining the alternative rail service provider's proportionate share of the total relevant costs incurred by the owner of facilities for the use of facilities shall be the ratio of—

“(i) the total volume of the use of the facilities by the alternative rail service provider during the 12 calendar months preceding the month in which the adjustment takes effect, measured in gross ton-miles, to

“(ii) the total volume of the use of the facilities by all users of the facilities during those 12 months, measured in gross ton-miles.

“(D) For the purposes of subparagraph (A), the total relevant costs for use of facilities shall include the following:

“(i) Roadway maintenance expenses.

“(ii) Costs reasonably related to the dispatching or control of the operation of users' trains.

“(iii) Any ad valorem taxes.

“(3)(A) If the owner of facilities to be used by an alternative rail service provider pursuant to a notice filed with the Board under subsection (b) and the alternative rail service provider do not agree on the terms of compensation for the initial use of the facilities before the expiration of the 60-day period applicable to the notice under paragraph (2) of that subsection (b), either party (or the person requesting the rail service from the alternative rail service provider) may request the Board to establish the terms of compensation. The Board shall establish those terms of compensation, in accordance with the standards applicable under this subsection, within 60 days after receiving such a request. The terms so established shall be effective retroactively as of the date on which the 60-day period applicable under subsection (b)(2) expires.

“(B) If the owner of facilities and an alternative rail service provider do not agree on an annual adjustment to terms of compensation under paragraph (1) before the anniversary of the date on which the alternative rail service provider began to use the facilities, either party may submit the dispute to the Board. The Board shall resolve the dispute within 60 days after the dispute is submitted. Any adjustment pursuant to a resolution of the dispute shall take effect retroactively as of that anniversary date.

“(e) NEW AND ENHANCED FACILITIES.—(1) If it is necessary for an owner of facilities to construct a new connecting track or interlocker or any other new facility or to improve a connecting track, interlocker, or other facility of that owner solely to accommodate the commencement of rail service by an alternative rail service provider under this section, the person requesting the rail service by the alternative rail service provider over those facilities shall pay the entire reasonable cost of the construction or improvement. The owner constructing the new facility or facilities shall own the newly constructed or improved facility or facilities, as the case may be.

“(2) If, at any time during the period of use of facilities by one or more alternative rail service providers pursuant to this section, it is necessary to construct or improve facilities to ensure the safe or efficient operation of rail service by the alternative rail service providers and all other rail carriers using the facilities to provide rail service, the reasonable cost of the construction or improvement shall be shared by the owner and each of the users of the facilities on such terms as those parties may agree. Any dispute concerning such terms shall be promptly resolved by the Board upon the request of any such user.

“(f) RELATIONSHIP TO OTHER AUTHORITIES.—This section may not be construed to provide an exclusive remedy, nor to limit the availability of any other remedy under this part, to users of rail transportation for the enhancement of intramodal rail competition.”.

(b) CLERICAL AMENDMENT.—The table of contents at the beginning of such chapter is amended by inserting after section 11102 the following new item:

“11102a. Trackage rights.”.

SEC. 907. EFFECTIVE DATES.

(a) IN GENERAL.—Except as provided in subsection (b), this title and the amendments made by this title shall take effect on January 1, 2002.

(b) EXCEPTIONS.—Section 906 and the amendment made by that section shall take effect on the date of enactment of this Act.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be authorized to meet during the session of the Senate on November 29, 2001, at 10 a.m., to conduct a hearing on "Housing and Community Development Needs: The FY 2003 HUD Budget."

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Thursday, November 29, 2001, at 10:30 a.m. to hold a nomination hearing.

Agenda

Nominees: John V. Hanford, III, of Virginia, to be Ambassador at Large for International Religious Freedom; Arthur E. Dewey, of Maryland, to be an Assistant Secretary of State (Population, Refugees, and Migration); and John D. Ong, of Ohio, to be Ambassador to Norway.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. REID. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet to conduct a markup on Thursday, November 29, 2001, at 10 a.m. in Dirksen room 226.

Agenda

I. Committee Business: Subcommittees.

II. Unfinished Business: S. 986, A bill to allow media coverage of court proceedings [Grassley/Schumer/Leahy/Smith/Allard/Feingold / Specter/Durbin/DeWine/Allen/Edwards/Cantwell].

III. Nominations: Harris L. Hartz to be United States Circuit Court Judge for the Tenth Circuit; John D. Bates to be United States District Court Judge for the District of Columbia; Kurt D. Engelhardt to be United States District Court Judge for the Eastern District of Louisiana; Joe L. Heaton to be United States District Court Judge for the Western District of Oklahoma; William P. Johnson to be United States District Court Judge for the District of New Mexico; Clay D. Land to be United States District Court Judge for the Middle District of Georgia; Frederick J. Martone to be United States District Court Judge for the District of Arizona; Danny C. Reeves to be United States District Court Judge for the Eastern District of Kentucky; Julie A.

Robinson to be United States District Court Judge for the District of Kansas; James E. Rogan to be Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office at the Department of Commerce; and Thomas L. Sansonetti to be Assistant Attorney General for the Environment and Natural Resources Division.

To be United States Attorney: David R. Dugas for the Middle District of Louisiana; Edward H. Kubo for the District of Hawaii; James A. McDevitt for the Eastern District of Washington; David E. O'Meilia for the Northern District of Oklahoma; Sheldon S. Sperling for the Eastern District of Oklahoma; Johnny Keane Sutton for the Western District of Texas; and Richard S. Thompson for the Southern District of Georgia.

IV. Bills: S. 304, Drug Abuse Education, Prevention, and Treatment Act of 2001 [Hatch/Leahy/Biden/DeWine/Thurmond].

V. Resolutions:

S. Res. 140, A resolution designating the week beginning September 15, 2002, as "National Civic Participation Week" [Roberts/Feinstein/Reid/Warner].

H. Con. Res. 88, Expressing the sense of the Congress that the President should issue a proclamation recognizing a National Lao-Hmong Recognition Day.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Thursday, November 29, 2001 at 2:30 p.m. to hold a nomination hearing.

Agenda

Nominees: James McGee, of Florida, to be Ambassador to the Kingdom of Swaziland; Kenneth Moorefield, of Florida, to be Ambassador to the Gabonese Republic; and John Price, of Utah, to be Ambassador to the Republic of Mauritius, and to serve concurrently and without additional compensation as Ambassador to the Federal and Islamic Republic of The Comoros and Ambassador to the Republic of Seychelles.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON INTERNATIONAL SECURITY, PROLIFERATION AND FEDERAL SERVICES

Mr. REID. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs' Subcommittee on International Security, Proliferation and Federal Services be authorized to meet on Thursday, November 29, 2001 at 9:30 A.M. for a hearing entitled "Combating Proliferation of Weapons of Mass Destruction (WMD) with Non-Proliferation Programs: Non-Proliferation Assistance Coordination Act of 2001, Part II."

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS CONSENT REQUEST—S. 180

Mr. REID. Mr. President, I ask unanimous consent that the Chair lay before the Senate a message from the House on S. 180, that the Senate disagree to the House amendment, agree to the request for a conference with the House on the disagreeing votes of the two Houses, and that the Chair be authorized to appoint conferees on the part of the Senate, with no intervening action.

The PRESIDING OFFICER. Is there objection?

Mr. MURKOWSKI. On behalf of the majority leader, I object.

The PRESIDING OFFICER. Objection is heard.

EXECUTIVE SESSION

EXECUTIVE CALENDAR

Mr. REID. Mr. President, I ask unanimous consent that the Senate proceed to executive session to consider the following nominations: Nos. 573, 574, 576, 577 through 582, and the nominations on the Secretary's desk; that the nominations be confirmed, the motions to reconsider be laid upon the table, any statements thereon be printed in the RECORD, the President be immediately notified of the Senate's action, and the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations considered and confirmed are as follows:

FEDERAL HOUSING FINANCE BOARD

John Thomas Korsmo, of North Dakota, to be a Director of the Federal Housing Finance Board for a term expiring February 27, 2002.

John Thomas Korsmo, of North Dakota, to be a Director of the Federal Housing Finance Board for a term expiring February 27, 2009. (Reappointment)

Franz S. Leichter, of New York, to be a Director of the Federal Housing Finance Board for a term expiring February 27, 2006.

Allan I. Mendelowitz, of Connecticut, to be a Director of the Federal Housing Finance Board for a term expiring February 27, 2007.

Colonel James T. Hirai, 0000
Colonel Paul S. Izzo, 0000
Colonel James L. Kennon, 0000
Colonel Mark T. Kimmitt, 0000
Colonel Robert P. Lennox, 0000
Colonel Douglas E. Lute, 0000
Colonel Timothy P. McHale, 0000
Colonel Richard W. Mills, 0000
Colonel Benjamin R. Mixon, 0000
Colonel James R. Moran, 0000
Colonel James R. Myles, 0000
Colonel Larry C. Newman, 0000
Colonel Carroll F. Pollett, 0000
Colonel Robert J. Reese, 0000
Colonel Stephen V. Reeves, 0000
Colonel Richard J. Rowe, Jr., 0000
Colonel Edward J. Sinclair, 0000
Colonel Eric F. Smith, 0000
Colonel Abraham J. Turner, 0000
Colonel Volney J. Warner, 0000
Colonel John C. Woods, 0000
Colonel Howard W. Yellen, 0000

The following named officer for appointment in the United States Army to the grade indicated under title 10, U.S.C., section 624:

To be major general

Brig. Gen. Lester Martinez-Lopez, 0000

NOMINATIONS PLACED ON THE SECRETARY'S
DESK

AIR FORCE

PN1175 Air Force nominations (2) beginning CESARIO F. FERRER, JR., and ending RAYMOND Y. HOWELL, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 30, 2001.

ARMY

PN1165 Army nominations (4) beginning ROBERT A. JOHNSON, and ending JOHN T. WASHINGTON III, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 25, 2001.

PN1176 Army nominations (12) beginning SAMUEL CALDERON, and ending FRANK E. WISMER, III, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 30, 2001.

PN1203 Army nomination of Carol E. Pilat, which was received by the Senate and appeared in the CONGRESSIONAL RECORD of November 8, 2001.

PN1204 Army nomination of Iuminada S. Calicdan, which was received by the Senate and appeared in the CONGRESSIONAL RECORD of November 8, 2001.

PN1205 Army nomination of *James W. Ware, which was received by the Senate and

appeared in the CONGRESSIONAL RECORD of November 8, 2001.

PN1206 Army nomination of Mee S. Paek, which was received by the Senate and appeared in the CONGRESSIONAL RECORD of November 8, 2001.

PN1224 Army nominations (8) beginning MARION S. CORNWELL, and ending GARY L. WHITE, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of November 15, 2001.

PN1225 Army nominations (30) beginning CHERYL A. ADAMS, and ending DEBBIE T. WINTERS, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of November 15, 2001.

PN1226 Army nominations (40) beginning WILLIE J. ATKINSON, and ending WILLEM P. VANDEMERWE, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of November 15, 2001.

PN1227 Army nominations (50) beginning DAVID S. ALLEMAN, and ending WILLIAM P. YEOMANS, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of November 15, 2001.

PN1228 Army nominations (112) beginning LYNN F. ABRAMS, and ending BURKHARDT H. ZORN, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of November 15, 2001.

PN1229 Army nominations (4) beginning CHARLES B. COLISON, and ending ARLENE SPIRER, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of November 15, 2001.

NAVY

PN1177 Navy nominations (39) beginning BRADFORD W. BAKER, and ending DAVID J. WICKERSHAM, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 30, 2001.

LEGISLATIVE SESSION

The PRESIDING OFFICER. Under the previous order, the Senate will now return to legislative session.

MEASURES INDEFINITELY POST-
PONED—S. 1191, S. 1215, AND S.
1216

Mr. REID. Mr. President, I ask unanimous consent that the following calendar items be indefinitely postponed: Calendar No. 91, S. 1191; Calendar No. 95, S. 1215; and Calendar No. 97, S. 1216.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. For the information of the Senate, these items are Senate-numbered appropriations bills. The conference reports on the House-numbered bills are now public laws.

NATIONAL COMMUNITY ANTIDRUG
COALITION INSTITUTE

Mr. REID. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 159, H.R. 2291.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (H.R. 2291) to extend the authorization of the Drug-Free Communities Support

Program for an additional 5 years, to authorize a National Community Antidrug Coalition Institute, and for other purposes.

There being no objection, the Senate proceeded to consider the bill.

Mr. REID. Mr. President, I ask unanimous consent that the bill be considered, read a third time, passed, the motion to reconsider be laid on the table, and that any statements relating to this bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 2291) was read the third time and passed.

APPOINTMENT OF PATRICIA Q.
STONESIFER

Mr. REID. Mr. President, I ask unanimous consent that the Rules Committee be discharged from further consideration of S.J. Res. 26 and the Senate then proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report the resolution by title.

The legislative clerk read as follows:

A joint resolution (S.J. Res. 26) providing for the appointment of Patricia Q. Stonesifer as a citizen regent of the Board of Regents of the Smithsonian Institution.

There being no objection, the Senate proceeded to consider the joint resolution.

Mr. REID. Mr. President, I ask unanimous consent that the joint resolution be read three times, passed, the motion to reconsider be laid on the table, and that any statements relating thereto be printed in the RECORD, with no intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S.J. Res. 26) was read the third time and passed, as follows:

S.J. RES. 26

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That, in accordance with section 5581 of the Revised Statutes of the United States (20 U.S.C. 43), the vacancy on the Board of Regents of the Smithsonian Institution, in the class other than Members of Congress, occurring by reason of the expiration of the term of Dr. Homer Neal of Michigan on December 7, 2001, is filled by the appointment of Patricia Q. Stonesifer of Washington. The appointment is for a term of 6 years and shall take effect on December 8, 2001.

MEASURE READ THE FIRST
TIME—H.R. 2722

Mr. REID. Mr. President, it is my understanding that H.R. 2722, which was just received from the House, is at the desk. I now ask for its first reading.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A bill (H.R. 2722) to implement effective measures to stop trade in conflict diamonds, and for other purposes.

Mr. REID. Mr. President, I now ask for its second reading and object to my own request on behalf of a number of my colleagues.

The PRESIDING OFFICER. Objection having been heard, the bill will be read the second time on the next legislative day.

MEASURE READ THE FIRST TIME—H.R. 3189

Mr. REID. Mr. President, I understand that H.R. 3189, received from the House, is at the desk. I ask for its first reading.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A bill (H.R. 3189) to extend the Export Administration Act until April 20, 2002.

Mr. REID. I now ask for its second reading but object to my own request.

The PRESIDING OFFICER. Objection having been heard, the bill will receive its second reading on the next legislative day.

ORDERS FOR FRIDAY, NOVEMBER 30, 2001

Mr. REID. Mr. President, I ask unanimous consent that when the Senate completes its business today, it adjourn until the hour of 9:30 a.m., Friday, November 30; that immediately following the prayer and the pledge, the Journal of proceedings be approved to date, the morning hour be deemed to have expired, the time for the two leaders be reserved for their use later in the day, and there be a period for morning business, with Senators permitted to speak therein for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, I remind the Senate that there have been three cloture motions filed with respect to H.R. 10. All first-degree amendments must be filed prior to 1 p.m. tomorrow, Friday.

ADJOURNMENT UNTIL 9:30 A.M. TOMORROW

Mr. REID. Mr. President, if there is no further business to come before the Senate, I ask the Senate stand in adjournment under the previous order.

There being no objection, the Senate, at 8:17 p.m., adjourned until Friday, November 30, 2001, at 9:30 a.m.

NOMINATIONS

Executive nominations received by the Senate November 29, 2001:

EXPORT-IMPORT BANK OF THE UNITED STATES

J. JOSEPH GRANDMAISON, OF NEW HAMPSHIRE, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE EXPORT-IMPORT BANK OF THE UNITED STATES FOR A TERM EXPIRING JANUARY 20, 2005, VICE RITA M. RODRIGUEZ.

THE JUDICIARY

JEANETTE J. CLARK, OF THE DISTRICT OF COLUMBIA, TO BE AN ASSOCIATE JUDGE OF THE SUPERIOR COURT OF THE DISTRICT OF COLUMBIA FOR THE TERM OF FIFTEEN YEARS, VICE GEORGE W. MITCHELL, DECEASED.

CONFIRMATIONS

Executive nominations confirmed by the Senate November 29, 2001:

FEDERAL HOUSING FINANCE BOARD

JOHN THOMAS KORSMO, OF NORTH DAKOTA, TO BE A DIRECTOR OF THE FEDERAL HOUSING FINANCE BOARD FOR A TERM EXPIRING FEBRUARY 27, 2002.

JOHN THOMAS KORSMO, OF NORTH DAKOTA, TO BE A DIRECTOR OF THE FEDERAL HOUSING FINANCE BOARD FOR A TERM EXPIRING FEBRUARY 27, 2009.

FRANZ S. LEICHTER, OF NEW YORK, TO BE A DIRECTOR OF THE FEDERAL HOUSING FINANCE BOARD FOR A TERM EXPIRING FEBRUARY 27, 2006.

ALLAN I. MENDELOWITZ, OF CONNECTICUT, TO BE A DIRECTOR OF THE FEDERAL HOUSING FINANCE BOARD FOR A TERM EXPIRING FEBRUARY 27, 2007.

THE ABOVE NOMINATIONS WERE APPROVED SUBJECT TO THE NOMINEES' COMMITMENT TO RESPOND TO REQUESTS TO APPEAR AND TESTIFY BEFORE ANY DULY CONSTITUTED COMMITTEE OF THE SENATE.

IN THE AIR FORCE

THE FOLLOWING NAMED OFFICER FOR APPOINTMENT IN THE UNITED STATES AIR FORCE TO THE GRADE INDICATED WHILE ASSIGNED TO A POSITION OF IMPORTANCE AND RESPONSIBILITY UNDER TITLE 10, U.S.C., SECTION 601:

NAVY NOMINATIONS BEGINNING BRADFORD W. BAKER AND ENDING DAVID J. WICKERSHAM, WHICH NOMINATIONS WERE RECEIVED BY THE SENATE AND APPEARED IN THE CONGRESSIONAL RECORD ON OCTOBER 30, 2001.

EXTENSIONS OF REMARKS

PRAYER FOR AMERICA

HON. PATRICK J. TOOMEY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. TOOMEY. Mr. Speaker, I rise today to share a poem entitled "Prayer For America" written by Miss Ruth Werner, a constituent of mine who lives in Bangor, Pennsylvania. Miss Werner was inspired to pen this poem following the September 11th attacks. I was touched when she gave me this poem and thought that my colleagues in the House of Representatives, the Senate and President Bush would enjoy it as well.

PRAYER FOR AMERICA

Dear Heavenly Father,
We pray for peace on earth.
Let it begin with us.
With you as our Father we are all made one.
We are all brothers and sisters.
Let us walk in each other in all 50 states and
throughout the world with President
Bush, Vice President Cheney and all the
Leaders.
With children and adults, male and female,
with families and people who are lonely,
with rich and poor, with people who have
homes and the homeless;
With all kinds of people with different ca-
reers and with the unemployed;
You love all your children of the world
whether red, yellow, black or white.
We are all precious in your sight because you
love everyone with an unconditional
love; always ready to forgive.
Today God let this be our prayer because we
know that United We Stand Divided We
Fall.
Let us stand for peace for America, a most
beautiful land.
And let us keep this as one nation under you
with liberty and justice for all.
It makes us proud to be an American to be
among the red, white and blue as we are
just passing through, but most impor-
tantly we are honored to be Christians
who believe in you and will live with you
and our loved ones in our heavenly home
forever.
God we know you will bless the USA today
and always.
In your name we pray, AMEN

I commend Miss Werner for her heartfelt
words and for her dedication to God and
country.

COMMEMORATING WORLD AIDS
DAY 2001

HON. CARRIE P. MEEK

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mrs. MEEK of Florida. Mr. Speaker, this
Saturday, the nation and the World will ob-
serve World AIDS Day 2001.

World AIDS Day provides an opportunity to
focus the world's attention on this global pan-
demic. It is a day to remember those living
with AIDS and those who have died from the
disease.

Like our recent tragedy, the HIV/AIDS pan-
demic has challenged many to have courage
and hope in spite of grief, anger, and despair.
More than 60 million people worldwide have
been infected with HIV since the start of the
epidemic 20 years ago, and current statistics
point to an even greater spread of the disease
than anticipated.

HIV/AIDS is now the leading cause of death
in sub-Saharan Africa. Worldwide, it is the
fourth biggest killer. According to a United Na-
tions report, by the end of this year there will
be an estimated 40 million people living with
HIV worldwide.

In the United States, research has shown
that the number of AIDS cases among some
populations has decreased. Unfortunately, we
have not seen similar declines in new HIV
cases among people of color or our Nation's
youth. Today, at least half of all new HIV in-
fections in our country are among people
under age 25. Young Americans between the
ages of 13 and 25 are contracting HIV at the
rate of two per hour.

World AIDS Day has special significance in
my community of South Florida, which has
more HIV/AIDS cases than 44 states.

As we observe World AIDS Day 2001, we
must reaffirm our commitment to work to-
gether to protect all our citizens from the
threat of HIV. By promoting, education, re-
search and care, we can reach millions of in-
dividuals who face life-changing decisions that
can affect their health and the future of our
Nation and the world, and help those who are
already affected by this disease.

INTRODUCTION OF A SIMPLE RES-
OLUTION TO ENCOURAGE THE
PRESIDENT TO USE HIS POWER
TO RELEASE LIHEAP EMER-
GENCY FUNDS TO THOSE WHO
LOST THEIR JOBS AS A RESULT
OF 9/11/01

HON. HILDA L. SOLIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Ms. SOLIS. Mr. Speaker, hundreds of thou-
sands of people who recently have been laid
off from work are reliving the terrorist attacks
in the economic aftermath of September 11th.

As of today, 638,000 layoffs have already
been announced in our country.

Fewer than 2 out of 5 employers who have
handed out pink slips in the third quarter of
this year indicate that they anticipate calling
their laid off employees back to work.

The nation's unemployment rate soared
from 4.9 percent in September to 5.4 percent
in October.

In Los Angeles County the unemployment
rate is 6 percent.

In my congressional district, the City of El
Monte has an unemployment rate of 7.6 per-
cent and South El Monte has an unemploy-
ment rate of 9.3 percent.

All of this in time for Christmas—and the
cold winter to follow.

It is our duty—and responsibility—to help
those who are suffering the ripple effects of
the worst domestic attack in our country's his-
tory.

We need to act immediately, because the
federal government's assistance is needed
now.

The resolution that I bring before the House
today would encourage the President to an-
swer this immediate need by expanding the
Low Income Energy Assistance Program—
LIHEAP.

The LIHEAP program is a federally funded
block grant program that helps ease the en-
ergy cost burden of low-income households.

The need for this program has been great.

Residential heating oil prices were 48 per-
cent higher in 2000 than in 1999.

Residential natural gas prices were 44 per-
cent higher in 2000 than in 1999.

Higher prices mean an added burden to
those who are already struggling to make
ends meet.

As you can imagine, Mr. Speaker, there are
many more people who will need this energy
assistance because of our country's recent
tragedies.

Unfortunately, the more people there are—
the less there is to go around.

LIHEAP has two pots of money—one which
goes to States in the form of a block grant and
another that is distributed by the President for
emergency use.

This resolution will encourage the President
to use this emergency fund in our current time
of uncertainty to help those who have lost
their jobs as a result of the attack on our na-
tion.

We must act now to get our country's work-
ing families through this horrible time.

The other body has already passed a simi-
lar resolution.

I encourage my colleagues to adopt this
resolution and ask the President to use his
powers to release LIHEAP funds to those who
have lost their jobs in the wake of the Sep-
tember 11th terrorist attacks and to those that
have suffered prolonged unemployment since
early this year.

This bill is a step in the right direction and
could mean the difference between a family's
financial ruin and their foundation for the fu-
ture.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

RECOGNIZING THE SERVICE OF
EDWARD JESSER

HON. MARGE ROUKEMA

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mrs. ROUKEMA. Mr. Speaker, I rise today in recognition of Mr. Edward "Ned" Jesser, resident of Mahwah, New Jersey, and proud and enthusiastic supporter of the Boy Scouts of America. Mr. Jesser will be honored today at the "Evening with the Governors" 2001 Good Scout Awards of the Northern New Jersey Council Boy Scouts of America. With more than forty years of dedicated service to the Boy Scouts of America, he will be the recipient of the Distinguished Scouter Award. The Boy Scouts of America pride themselves on producing fine citizens, strong family members, and community leaders. In this respect, Ned Jesser truly leads by example.

Today, Mr. Jesser sits on the Executive Board of the Northern New Jersey Council of Boy Scouts. However his involvement with the scouts began some forty years ago as the President of Bergen County Council of Scouts. It is his firm belief that scouting truly creates good lives and good citizens. Mr. Jesser has said that "scouting is the only national organization that is making a major effort to bring a better and healthier life for our boys." Clearly, this man is recognized as a leader for scouts—and a committed one at that!

As I am sure Mr. Jesser's wife Ruth can attest, Mr. Jesser is a very active member of the Bergen County community. Mr. Jesser served as Chairman of the Board and Chief Executive Officer of Summit Bank for twenty years. In addition, he has sat on many boards in our county. To list just a few of his involvements: President of the New Jersey Chamber of Commerce, President of the New Jersey Bankers Association, and Trustee of Lafayette College. As a man who is generous with his time and his talents, Mr. Jesser has truly contributed to making northern New Jersey a better place to live.

A fine citizen, a family man, and an involved community leader, Mr. Jesser is not only an outstanding role model for Scouts, but also an outstanding example of the fine residents of Bergen County. He contributes much to both the development of young men in our region, and to our community itself. Ned Jesser, we are lucky to have you with us.

IN HONOR OF P.O. NIURCA
QUINONES AND P.O. DARRELL
CLARK

HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. TOWNS. Mr. Speaker, I rise in honor of Police Officers Niurca Quinones and Darrell Clark in recognition of their outstanding work to rid the streets of Bedford-Stuyvesant from the scourge of drugs.

Officer Quinones joined the New York City Police Department on April 30, 1991. Officer

Clark joined the New York City Police Department on October 15, 1990. Both officers were assigned to the 79th Precinct, where they worked together as partners. As a unit, they have done an outstanding job in serving the community of Bedford-Stuyvesant.

In a short period of time, these officers have successfully reduced the presence of drugs and the number of drug-related crimes. In the past two years alone, these officers executed 48 search warrants leading to 97 arrests. Officers Quinones and Clark also recovered 14 guns, 300 rounds of ammunition, 436 decks of heroin, 1 large bag of heroin, 167 vials of crack, 412 glass vials of crack, 10 oz. of crack, three pounds of marijuana, 51 bottles of hydro, 284 bags of marijuana, and over \$9,000 in illegal funds.

Mr. Speaker, Officers Quinones and Clark are two outstanding examples of New York's finest. They have gone above and beyond the call of duty to help clear the Bedford-Stuyvesant community of dangerous drugs and criminals. As such they are more than worthy of our praise. I urge my colleagues to join me in honoring these two dedicated public servants.

A TRIBUTE TO EDWARD AND
DOLLY MASON

HON. ROBERT L. EHRlich, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. EHRlich. Mr. Speaker, I rise today to pay special tribute to Edward and Dolly Mason, and to honor the memory of their son, Eddie. On March 10, 1999 Eddie Mason died of a sudden and unexpected heart attack. The death of their son, less than three weeks before his nineteenth birthday, was a bitter and heart wrenching tragedy for the Masons. I know the Mason family; it has been personally painful for me to witness their struggle to cope with such an inconsolable loss.

Eddie Mason was a vibrant young man who embraced life; one who sought the opportunities presented each day. At the age of fifteen, he was diagnosed with Friedreich's Ataxia, a degenerative neurological disease that impairs muscular function throughout the body. His condition, however, was not life-threatening. Indeed, Eddie's passion for athletic endeavors was unquenchable. From an early age, Eddie was an avid participant in soccer, baseball, football, and wrestling; he also pursued karate, achieving the rank of Green Belt after eight years of training. Yet, Eddie's excellent physical conditioning offered no protection against the deadly symptoms of his disease.

The Masons' grief for their son will never be completely assuaged. Ed and Dolly, however, hoped to preserve Eddie's memory at the community church their family has attended for many years. Accordingly, twelve months ago, the Mason family resolved to construct the tower that now stands between the sanctuary and rectory of St. Luke's Church in Edgemere, Maryland. I was honored to be present at the ground breaking ceremony held on March 27, 2001, the twenty-first anniversary of Eddie's birth. Seeing such familial de-

votion and community support is something I will not soon forget.

On Sunday, October 14, at St. Luke's Church, a thirty-five-foot bell tower, the home of "Eddie's Bell," was officially blessed. In the presence of over 350 neighbors, friends, and fellow citizens, the Masons' tribute to their son was consecrated, and "Eddie's Bell" rung for the first time.

Friends, family, neighbors, and even strangers have helped sustain the Masons since the terrible event of March 10, 1999. Yet, the newly created monument was not a community effort. The money and time required for the bell tower were invested solely by Ed and Dolly Mason. "Eddie's Bell" was a gift from "Mom and Dad" to the son they love so much.

The bell tower has become a centerpiece of St. Luke's Church. Each day the bell is rung at noon and six p.m.—its bold notes call members to worship before each weekend mass. The bell's toll can be heard up to two miles away, a range which includes the Mason home. I sincerely hope that Ed and Dolly will take comfort in the notes of "Eddie's Bell," knowing that all the love and devotion they feel for their son has been given musical form.

Mr. Speaker, I am proud to represent the Mason family in Maryland's Second Congressional District, and I ask that my colleagues join me in offering them our deepest condolences for their loss, congratulations on their dedication to family and community, and our very best wishes for the future.

EXPRESSING SENSE OF CONGRESS
REGARDING EFFORTS OF PEOPLE OF UNITED STATES OF KOREAN ANCESTRY TO REUNITE WITH FAMILY MEMBERS IN NORTH KOREA

SPEECH OF

HON. BETTY McCOLLUM

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 27, 2001

Ms. McCOLLUM. Mr. Speaker, I rise today in support of H. Con. Res. 77, a resolution expressing the sense of Congress to reunite United States citizens with their family members in North Korea.

North and South Korea have made significant progress in their relationship, as has the United States made very important steps in its relationship with both North and South Korea in the past two decades. H. Con. Res. 77 is the next step.

This very important resolution recognizes the need to reunite Americans of Korean ancestry with their family members in North Korea.

Over 500,000 Americans of Korean ancestry were separated from family members with the division of North and South Korea. This simple measure will bring about a long awaited family reunion, over 50 years later.

I believe it is very important for the United States to be involved in reunification and peace efforts in Korea, and this resolution brings us one step closer. This is a significant effort in mending relations with North and South Korea, and their relationship with the United States.

TRIBUTE TO CHRISTMAS

HON. BOB SCHAFFER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. SCHAFFER. Mr. Speaker, Christmas during wartime is an unsettling conflict in vision and emotion for Americans. A peace-loving nation, the United States has always been resolved in the face of tyranny to crush the purveyors of terror and to vanquish the enemies of freedom; and with firm reliance upon the protection of Divine Providence. Celebrating the birth of the Prince of Peace is a testimony to authentic liberty, and invigorates the spirit of a nation whose motto boldly stands "in God we trust."

America will prevail, because it always has, because it must, and because it is right.

President Franklin Roosevelt asked, "how can we pause, even for a day, even for Christmas Day, in our urgent labor of arming a decent humanity against the enemies which beset it?" Today, Americans confront the same question. The answer is, of course, the same, and so the outcome will be.

The nation's first Christmas occurred amidst the Revolutionary War. With the Continental Army poised to turn the momentum of the war, General George Washington conceived a daring tactic which would unfold on the Eve of Christmas 1776. Under cover of darkness and well after the Hessian mercenaries had consumed their Holiday feast (and drink), Washington led his troops across the Delaware River to defeat the heavy, surprised, and more numerous Hessian mercenaries who held Trenton, NJ.

A few months prior to the famous attack, Washington wrote, "the time is now near at hand which must probably determine whether Americans are to be freemen or slaves; whether they are to have any property they can call their own; whether their houses and farms are to be pillaged and destroyed, and themselves consigned to a state of wretchedness from which no human efforts will deliver them. The fate of unborn millions will now depend, under God, on the courage of this army. Our cruel and unrelenting enemy leaves us only the choice of brave resistance, or the most abject submission. We have, therefore, to resolve to conquer or die."

In 1862, entering the second year of the Civil War, President Abraham Lincoln inspired his countrymen through the Christmas season. Before Congress, he delivered a stirring speech: "the dogmas of the quiet past are inadequate to the stormy present," Lincoln said. "The occasion is piled high with difficulty, and we must rise to the occasion. As our case is new, so we must think anew, and act anew. We must disenthrall ourselves, and then we shall save our country."

Roosevelt's address following the Japanese attack upon Pearl Harbor urged Americans to take inspiration from the sacred Holiday. "Our strongest weapon in this war is that conviction of the dignity and brotherhood of man which Christmas Day signifies—more than any other day or any other symbol. Against enemies who preach the principles of hate and practice them, we set our faith in human love and in

God's care for us and all men everywhere," he said. "It is in that spirit, and with particular thoughtfulness of those our sons and brothers, who serve in our armed forces on land and sea, near and far—those who serve for us and endure for us—that we light our Christmas candles now across the continent from one coast to the other on this Christmas Eve."

From the Christmas Eve crossing of the Delaware, to the Christmases observed in Civil War camps, the trenches of World War I, and the forests of Belgium during WWII, Americans have always been willing to fight to secure their nation and restore peace.

American men and women presently deployed in Afghanistan, the Middle East, Bosnia, Korea, throughout the world and here at home, are emblematic of the sacrifice and dedication of the proud American soldiers who preceded them. The cause of freedom, liberty and valor serves to summon the courage of those who stand in harm's way, but even more does the spirit of Christmas confirm the hope and blessing that is God's gift to America. The way to victory was shown to the world by a child whose birthday is revered around the world. America's trust in God will lead us to victory again.

**WILLIAM WINKENWERDER, AS-
SISTANT SECRETARY OF DE-
FENSE FOR HEALTH CARE**

HON. CHARLES H. TAYLOR

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. TAYLOR of North Carolina. Mr. Speaker, America's armed service members, their families and military retirees can rest easier today knowing that Dr. William Winkenwerder has been sworn in as Assistant Secretary of Defense for Health Care. A western North Carolina native, Dr. Winkenwerder brings fittingly broad experience and an impressive record of achievement to this important position. All Americans can be proud that Dr. Winkenwerder has agreed to serve his nation yet once again. The Asheville Citizen-Times' Tim Reid recently penned a profile of Dr. Winkenwerder, which I am glad to share with my colleagues.

WINKENWERDER TOP HEALTHCARE OFFICIAL
FOR DEFENSE DEPARTMENT
(By Tim Reid)

ASHEVILLE.—Growing up in Asheville in a family well known for its successful hotels, William Winkenwerder seemed destined to enter the hospitality industry like his brother, John. But he liked science and helping people and figured medicine was a good way to combine those interests. Some time during his years of medical school, residency and private practice, Dr. Winkenwerder also discovered he was drawn to the public policy side of medicine, designing and administering systems to deliver quality health care as efficiently as possible.

"Even though I very much enjoyed taking care of patients, I developed an interest in how the system of health care worked, or didn't work in some cases," he said.

After years of high-level jobs related to providing health services, Winkenwerder is using all his experience and expertise to help

protect the health of America's armed services, their families and military retirees. He was sworn in recently as assistant secretary of defense for health care—the Defense Department's top health-care official. It is a big job, and the numbers are staggering. Winkenwerder manages the nation's \$25 billion defense health program, whose 110,000 staffers see to the health needs of more than 8 million people around the world.

"It's an incredible responsibility. I am honored to have the opportunity to serve in this kind of position," he said. "We have wonderful people in the military. They are extremely dedicated, hard working and bright."

Winkenwerder assumed the job at a critical time as the military prepares for a sustained effort against terrorism.

"We have to look at the whole range of biological agents that could pose a threat and develop a strategy for all of them," he said. "That could include not just anthrax but also smallpox, the plague and all the things we believe could be used."

Winkenwerder faces the same challenges posed to any health care executive—assuring quality care while keeping costs at an acceptable level. He is not responsible for the nation's VA hospitals but does oversee the Tricare program that functions like an insurance program, paying for care through the public or private sector.

THE EARLY YEARS

Winkenwerder said he has a soft spot in his heart for Asheville and visits family members here three or four times a year. They include his father, William Winkenwerder Sr. of Asheville, and his mother Martha Baker Loew, also of Asheville. His brother John Winkenwerder is managing partner of the Asheville area Hampton Inns.

"It was a great experience growing up there and working for my father," he said. "He gave me a real appreciation for work and for serving people."

But it was Winkenwerder's family physician, Dr. Roger James, who sparked his early interest in medicine.

"He was a wonderful man who died recently," Winkenwerder recalled. "He was my doctor and a leader in my church. I was just impressed with what he did for people."

He said another role model was orthopedic surgeon Dr. Wayne Montgomery. "He was mayor of Asheville at the time, and I liked that idea of combining medicine and public service."

Winkenwerder also worked summers as an orderly at St. Joseph's Hospital, where he got to know many physicians such as Dr. David Cappiello, another orthopedic surgeon. After graduation from Asheville High School, Winkenwerder went to Davidson College on a football scholarship, enrolling in its pre-med program. After Davidson came eight years of medical school and residency in internal medicine at the University of North Carolina at Chapel Hill, during which Winkenwerder's career interests began to change.

"I decided I really did want to delve into this whole area of health care policy and health care economics and public health," he said. "I decided business school was a good way to do that."

Winkenwerder attended the University of Pennsylvania's Wharton School and at the same time completed a fellowship in public health and research at the university's hospital. During the summer of 1986 he worked at the Department of Health and Human Resources and got a taste for government that has never really left him. The following year

Winkenwerder was asked to come back and work in the Health Care Financing Administration, which operates the Medicare and Medicaid programs.

"I worked there about two years, until the end of the Reagan administration," he said. "I got into that whole world of how the health care system should be structured."

Yearning to use his skills as a doctor, Winkenwerder joined a group practice in Atlanta. He worked there for five years, seeing firsthand how managed care was changing the practice of medicine. Winkenwerder then began a series of high-level jobs in diverse aspects of the health care system. They included stints as: regional vice president and chief medical officer for Prudential Health Care; regional quality assurance and associate medical director for Kaiser Permanente; and vice president for Emory Health Care at Emory University.

Then Winkenwerder moved to Boston to take the number two post as vice chairman of Blue Cross Blue Shield of Massachusetts. When his desire to advance to the top post did not materialize, he decided to return to government service. Winkenwerder talked to friends and colleagues in Washington and spent several months being interviewed and scrutinized for the job at the Department of Defense. He was nominated by President Bush after an extensive FBI background check. The Armed Services Committee approved Winkenwerder's nomination Oct. 16, and he was sworn into office Oct. 30.

"My goals are pretty simple," he said. "I want to protect the health of the people who are in the service, making sure especially that we are ready for chemical or biological attacks."

"I want to improve Tricare, managing costs and improving service and quality," he said. "And I want to improve our relationships with other entities like Congress, the VA system and the Department of Health and Human Services." Winkenwerder's wife, Pride and 10-year-old son, Will are staying in Boston until the end of the school year, when they will join him in Washington. In the meantime, he is working 12-hour days in his office at the Pentagon. Winkenwerder is excited to be in a job where he can use his years of experience and preparation to, perhaps, make a difference.

"I would just hope that in some way, by being an effective leader, I can help improve health care for an important group of people who serve our nation," he said.

RECOGNIZING THE SERVICE OF THOMAS KEAN

HON. MARGE ROUKEMA

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mrs. ROUKEMA. Mr. Speaker, I rise today in recognition of an exceptional leader and role model for all New Jersey, our former governor, the Honorable Thomas H. Kean. Today, Governor Kean will be honored at the "Evening with the Governors" 2001 Good Scout Awards of the Northern New Jersey Council of Boy Scouts of America. Governor Kean has turned his ability to both serve and lead into a career of tremendous public service. As Governor of New Jersey, he worked hard for New Jersey, and New Jersey thanked him, re-electing him to a second term as he

won by more than 700,000 votes. This evening, we will honor the Governor for his dedicated work.

Governor Kean is remembered for policy, not politics. Known for his immense knowledge of education issues and ability to connect with so many residents of New Jersey, Governor Kean was one of our most popular governors in state history. During his two-terms in office in the 1980s, Governor Kean was responsible for more than 30 education reforms, landmark environmental policies, and tax cuts that created 750,000 jobs in New Jersey. Governor Kean's work truly helped New Jersey residents and even today he is one of our most recognized leaders in New Jersey government.

His recognition extends well outside of our state. In 1988, Governor Kean delivered the keynote address at the Republican National Convention and has been recognized by three presidents as "The Education Governor." He holds numerous awards from environmental and educational organizations including more than 30 honorary degrees. Governor Kean serves on the Board of Trustees of his two alma maters—Princeton University and Columbia University Teachers College. He is also chairman of the Carnegie Corporation of New York and the National Campaign to Prevent Teen Pregnancy.

However it is education that continues to be of great importance to Governor Kean. Since leaving New Jersey political life in 1990, Governor Kean has served as President of Drew University in Madison, New Jersey, where he has led Drew to become one of the nation's premiere small universities with a focus on teaching, technology in the classroom, and international educational experience. Since beginning his tenure, undergraduate applications have increased astronomically, endowment has tripled in size, and the University has launched its first comprehensive fund-raising campaign. Yet Governor Kean's passion seems to still reside in the classroom, and he is often found there. As one who shares his education background, I understand his desire to not only work with education policies, but most importantly with the students. I commend him for this dedication.

I thank Governor Tom Kean for all that he has done for our state of New Jersey. He has accomplished great things and continues to do so. His heart truly focuses on policies and people, not politics and partisanship. In this way, he is a role model for all in this chamber.

TRIBUTE TO PHYLLIS SMOCK

HON. ROBERT L. EHRLICH, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. EHRLICH. Mr. Speaker, I would like to take this opportunity to congratulate Ms. Phyllis Smock on her retirement from the University System of Maryland after more than 32 years of dedicated service.

A friend of the State of Maryland, Phyllis Smock, University of Maryland University College's director of alumni relations, will retire on December 1, 2001. Ms. Smock has played a

significant role in the growth of University of Maryland University College.

University of Maryland University College, or UMUC, is one of 11 accredited degree-granting institutions in the University System. For 50 years, the University has fulfilled its principal mission: to serve adult, part-time students through high-quality educational opportunities. In 1949, of the U.S. colleges and universities invited to provide courses to the men and women in the military stationed overseas, only UMUC accepted.

Today, UMUC classroom sites can be found throughout Maryland, the Washington, DC metropolitan area, and over 100 overseas locations. Last year, over 71,000 students were enrolled in UMUC classes. About 47,000 were service members on active duty with the U.S. military, stationed stateside and abroad in over 29 countries. UMUC is proud of its long history of service to the military and is honored to count over 50 admirals and generals among its alumni. Moreover, UMUC is a pioneer in distance learning; students now can "attend class" from anywhere in the world via the Internet.

Ms. Smock has actively contributed to the growth and success of UMUC. She began working for the University System in 1966 and has served in the UMUC Overseas Programs Office where she worked as logistical coordinator for new faculty recruited to the European and Asian divisions. Further, she has been instrumental in the growth of the Alumni Association from its inception more than a decade ago. Today, the Association boasts of more than 35,000 alumni in Maryland and over 100,000 UMUC alumni worldwide.

During the past seven years, Ms. Smock has coordinated with many UMUC alumni-volunteers and helped establish a stronger relationship with the Maryland General Assembly. She has been a tireless advocate for UMUC, its alumni, and their support of their alma mater—a global University that will provide to any student, anywhere, the opportunity for life-long learning.

Ms. Smock deserves the thanks and praise of Marylanders and this grateful nation which she has faithfully served for so long. I ask the Members of the House to join me in wishing her and her husband, Ray, all the best in the years ahead.

IN HONOR OF P.O. JEANETTE MORALES

HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. TOWNS. Mr. Speaker, I rise in honor of P.O. Jeanette Morales and her record of service to Brooklyn as a member of the New York City Police Department.

Jeanette Morales was born and raised in East New York. She graduated in 1982 and started working as a bank teller. She moved to various positions within the bank and ultimately became Senior Customer Service Representative. She enjoyed working with and helping people so a friend recommended that she become an Auxiliary Police Officer.

Jeanette served as an Auxiliary Police Officer in the 75th Precinct for a year and then applied to become a full-fledged New York City Police Officer. She passed the exam and was sworn in on July 11, 1988. After she graduated from the Police Academy she was assigned to field training within the 88th, 84th, 77th and the 79th precincts. In September 1989, Jeanette was assigned to the 79th Precinct. She was assigned to rotating tours for the first few years and was assigned to various units within the 79th Precinct. She worked in the S.N.E.U. (Street narcotics enforcement unit) and the Anti-Crime unit. In October 1993, she was assigned to Community Affairs. She worked in this unit for 8 years along side her partner, Detective David Allen. They worked extremely well together until the day he passed away. After 13 years in the 79th Precinct, Jeanette was transferred to Brooklyn North Community Affairs.

Mr. Speaker, P.O. Jeanette Morales has served the people of Brooklyn and New York City as a dedicated member of the New York City Police Department. As such she is more than worthy of our praise. I urge my colleagues to join me in honoring this truly committed public servant.

WORLD AIDS DAY

HON. EDDIE BERNICE JOHNSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Speaker, World AIDS Day on December 1 provides an opportunity to refocus our attention on the HIV/AIDS crisis that has not gone away and will not go away until a concerted effort is made to address the pandemic and develop workable solutions.

In the wake of the tragic events of September 11, attention has been focused elsewhere in the world. While we must do everything we can to combat terrorism, we cannot ignore other crises. Forty million people worldwide are still living with HIV/AIDS; 28 million are in sub-Saharan Africa. There are still 12 million orphans in sub-Saharan Africa, and there are still 15,000 new HIV infections each day.

The statistics regarding HIV/AIDS are staggering, but we must not let these numbers deter our resolve to work together to bring this epidemic under control. The United States cannot ignore the fact that HIV/AIDS poses a serious risk to international stability and creates fertile breeding ground for social unrest. Our survival dictates that we cannot afford to lose this battle.

ACCESS AND OPENNESS TO SMALL BUSINESS LENDING ACT

HON. LOUISE McINTOSH SLAUGHTER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Ms. SLAUGHTER. Mr. Speaker, I am pleased to join Representative MCGOVERN in

supporting the Access and Openness to Small Business Lending Act. This legislation would permit the collection of demographic information on small business loans.

Specifically, it would amend the Equal Credit Opportunity Act to require lending institutions to ask the gender and race of small business loan applicants. The applicant's response would be voluntary. I support the Access and Openness to Small Business Lending Act, since it would provide a powerful vehicle to monitor the lending market for discriminatory practices.

Today, there are more than 9 million women-owned businesses, up from 400,000 in 1972. Unfortunately, the main impediment to women entrepreneurs achieving success is obtaining the necessary financing to get their businesses off the ground.

According to Business and Professional Women/TJSA, companies owned by women account for 38 percent of businesses in the United States and are also the fastest growing segment of the business sector. However, women-owned businesses receive less than four percent of the \$36 billion in venture capital invested each year.

A survey by the National Foundation of Women Business Owners and Wells Fargo & Co. indicates that most female entrepreneurs rely on loans and their personal savings to finance their firm's growth. One reason women are not securing funding from venture capital firms, like many others, is that women traditionally start retail stores. The retail industry is the one business sector in which venture capitalists rarely invest.

To ensure a transparent loan process and confirm that banks are being even-handed when making loan decisions for women and minorities, we need a bill like the Access and Openness to Small Business Lending Act. I urge my colleagues to also support this legislation.

RECOGNIZING THE SERVICE OF BRENDAN BYRNE

HON. MARGE ROUKEMA

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mrs. ROUKEMA. Mr. Speaker, I rise today to recognize a dedicated public servant—an exemplary leader and a friend to the people of my State of New Jersey. Governor Brendan T. Byrne will be honored later today at the "Evening with the Governors" 2001 Good Scout Awards of the Northern New Jersey Council of the Boy Scouts of America.

This is a most special occasion for me since Governor Byrne and I both call West Orange home. But we share more than a common hometown. We share a love of New Jersey and a devotion to its people. Governor Byrne has turned this dedication to New Jersey into a career of tremendous public service. On Thursday, we will honor the Governor for his work.

His outstanding career first began with service to our great country in the United States Army Air Corps as the youngest squadron navigator in his bomb group. After returning to

civilian life, Governor Byrne combined law and public service as Deputy Attorney General and Special Prosecutor in Passaic County. Later, he was appointed as Assistant Counsel to Governor Robert B. Meyner and subsequently named the Governor's Executive Secretary.

At the age of 34, Byrne was appointed by Governor Meyner as Essex County Prosecutor, becoming the youngest prosecutor in New Jersey's largest county. He was reappointed to a second term by Governor Richard J. Hughes. After serving as President of the New Jersey State Board of Utility Commissioners as well as serving on the Superior Court, Governor Byrne quickly rose to Assignment Judge for Morris, Warren and Sussex County.

With nearly 20 years of work for the state of New Jersey, Byrne took his service to the next level and was elected Governor of New Jersey in 1973 by the largest plurality in New Jersey history. To their discredit, his critics "One-term Byrne" was reelected to a second term in 1977.

Mr. Speaker, Governor Byrne worked hard to do what was best for our great state. His pride in his state and understanding of its residents were visible in all that he did. He has always understood that principle of public service—that what matters most is helping real people solve the real problems of real life.

Clearly, this is evidenced in Governor Byrne's career in New Jersey and his heartfelt commitment to its residents. I commend Governor Byrne for his service, which is sometimes difficult, but as we can all attest, always rewarding.

While some may disagree with Governor Byrne on his policies, no one can disagree that he has truly served the people of New Jersey.

I am honored to call this good man a friend.

RECOGNIZING THE UKRAINIAN FAMINE REMEMBRANCE DAY

HON. CURT WELDON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. WELDON of Pennsylvania. Mr. Speaker, sixty-eight years ago a horrific crime was inflicted, killing an estimated 3–5 million people and yet this genocide is seldom heard of. I am referring to the Great Famine of 1932–1933 in Ukraine conducted by Stalin's Soviet Union. We should not, we can not allow the elimination of a people go unnoticed or become forgotten. While some events in history are documented and memorialized to ensure that future generations will never have to be victim to them again, we have a duty to learn of and reveal those that have not yet been exposed.

The Ukrainian Government has designated the last Saturday in the month of November as Ukrainian Famine Remembrance Day. Today I join those in mourning and assist their cause in expanding the world's acknowledgment of what had happened.

The 1930's marked a time of "Collectivization" for the new Soviet Empire. Any symbolism or feelings of Ukrainian national consciousness or identity was hoped to be erased

but to do so required an ethnic cleansing of the most brutal nature. The task took the form of a man-made famine whereas the quota for grain procurement from Ukraine was increased by 44 percent. The extraordinarily high quota resulted in a severe grain shortage, effectively starving the Ukrainian people.

After collection, grain elevators were guarded by military troops and secret police denying access to even those who had harvested the grain in the immediate area. Those hiding grain were killed and an internal passport system was implemented to restrict people from moving to where there was food. The result was a demoralized and depleted Ukrainian ethnic population. Stalin covered up this genocide so effectively that little is known to outsiders even today. Perhaps that will end now.

Today, there is a Ukrainian state, proud but mindful of its past. They will forever suffer the memory of being intentionally starved to death to end their struggle for freedom. Let us, a nation that symbolizes the very definition of freedom, learn of and remember the struggle the Ukrainians endured to obtain it. Mr. Speaker, in the spirit of standing up to all who threaten democracy and freedom, last Saturday, November 24, 2001, was the Ukrainian Famine Remembrance Day.

RECOGNITION OF NATIONAL
AMERICAN INDIAN HERITAGE
MONTH

HON. DENNIS J. KUCINICH

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. KUCINICH. Mr. Speaker, I rise today in recognition of the designation of November 2001 as National American Indian Heritage Month. It is critical that we recognize the history of Native Americans and to learn more about their culture.

I thank President Bush for his promise to protect and honor tribal society and help to stimulate economic development in reservation communities. I join him in acknowledging the contributions made by Native Americans in both World Wars and the conflicts in Korea, Vietnam, and the Persian Gulf. Almost half of all Native American tribal leaders have served in the United States Armed Forces.

Only in recent decades have we made progress in dismantling the shameful stereotypes that were invented by white Americans in the early centuries of European immigration to this land. We owe it to the Native American people to learn about their actual history and culture, and to teach our children.

My fellow colleagues, it is of the utmost importance that we all take the time to remember American Indian heritage. We must do what we can to keep this beautiful culture alive, this culture of a people wronged by the greed and ignorance of our forefathers. I ask you to join me in making the following promise: Never again will our country attempt to decimate an entire culture.

TRIBUTE TO THE 100TH BIRTHDAY
OF JOSE ANTONIO JARVIS

HON. DONNA M. CHRISTENSEN

OF THE VIRGIN ISLANDS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mrs. CHRISTENSEN. Mr. Speaker, I rise today on behalf of all the people of my district to pay tribute to the 100th Birthday of the late Jose Antonio Jarvis—educator, historian, author, philosopher, journalist, poet, playwright, editor, artist, musician and public servant. He was an intellectual giant whose life and work greatly influenced the educational process in the U.S. Virgin Islands. His classroom was the entire Virgin Islands and for more than forty years, he devoted his life to discovering new and innovative approaches to education.

Born in St. Thomas, U.S. Virgin Islands on November 22, 1901, to the Reverend Joseph W. and Mercedes Jarvis, J. Antonio Jarvis grew up under the guidance of his Godmother, Miss Mary Hughstein. He began his formal education at St. Anne's Roman Catholic School in St. Thomas, which he attended from age five to thirteen (1906–1914). Even during these early years, his teachers discerned in him an unusually high mental capacity, great ambition, and a keen interest in a wide range of activities. A life-long scholar, he continued his education by private tutors and through correspondence courses, and most importantly, by extensive reading on his own initiative. In 1936, the Bachelor of Arts degree was conferred upon him by McKinley-Roosevelt University. He did additional work at the University of Puerto Rico, Columbia University, New York University, and the University of Chicago.

Jarvis' career as an educator began in 1923, when he became a tutor at the St. Thomas Academy. During the period 1924–1932, he taught at Abraham Lincoln Elementary School and was an instructor at the Charlotte Amalie High School from 1932 to 1942. At Charlotte Amalie High, in addition to his regular academic assignments, he served as advisor to many student organizations and initiated a number of them including a student council and the school newspaper, *The Reflector*. In 1942, he returned as principal to the former Abraham Lincoln School, where he remained until his retirement from public life on May 31, 1963.

Between 1930 and 1960, Jarvis published a number of works. These included "Virgin Islands Sketches", "Jubilee Hall", and other poems (1930), "Fruits in Passing" (1932), "Bamboula Dance" (1935), "Brief History of the Virgin Islands" (1938), "The Virgin Islands and their people" (1944), "Virgin Islands Picture Book" with co-author Rufus Martin (1948), "Bluebeard's Last Wife" (1951), and "The King's Mandate" (1960). In 1930, with Ariel Melchior, Sr., he co-founded "The Daily News of the Virgin Islands", a daily news publication still in circulation today.

In addition to his work in the fields of education, scholarship and the fine arts, Jarvis was active in numerous civic activities such as the American Red Cross, Public Utilities Com-

mission, Selective Service Board, St. Thomas Teachers Association and the Virgin Islands Cadets Corps, among others.

Many honors came to Jarvis over the years for his myriad of achievements. In 1927, 1929 and 1930 he won the Opportunity Award in Fine Arts. In 1939 and 1940, he earned the International Business Machines Corporation Award in Fine Arts. President Harry S. Truman personally presented him the United States Selective Service Medal in 1946. For services rendered he was given citations from the Library of Congress, the American Red Cross and the Professional League of Virgin Islands in New York City. In 1970, the Abraham Lincoln School was renamed the J. Antonio Jarvis Elementary School. Additionally, in 1978 the J. Antonio Jarvis Memorial Park was created in the heart of Charlotte Amalie. On May 18, 1980, the park was formally dedicated, and in it a statue of Mr. Jarvis, financed by Ariel Melchior, Sr. Foundation, the St. Thomas Historical Trust, and donations from school children were unveiled. In 1983, Jarvis was inducted into the "Virgin Islands Education Review" Hall of Fame.

The first biography of Jarvis, "Man of Vision: A Biography of Jose Antonio Jarvis" was written in 1975 by Addelita Cancryn, herself an imminent Virgin Islands educator.

When an individual is gifted with so many talents and has served humanity as well as Jarvis did, it is most difficult to select the one area in which his contributions could be said to be greatest. Perhaps his most persuasive contribution was in the area of education in the broadest sense. Jarvis educated and enlightened, not only his classroom and school-house performance but also through his books, poems, plays, editorials, and other writings, as well as his paintings. In the classroom and outside of it, Jarvis inspired many Virgin Islanders to attain high standards of achievement. He aided many financially and in other ways. The high success that many of these individuals achieved attests to his influence.

Jarvis' motto was "I try to make my sojourn here a useful interlude." That extremely useful sojourn ended on July 23, 1963 when the great man passed away deeply mourned.

Had Jarvis chosen to live in and make his contribution in a major metropolitan country he undoubtedly would gain international attention and renown. However, it was his choice to live in and make his contributions to the Virgin Islands, which he loved.

The Governor of the U.S. Virgin Islands, the Honorable Charles Wesley Turnbull, has proclaimed the week of November 18–24, 2001 as "Jose Antonio Jarvis Week" and Thursday, November 22, 2001, as "Jose Antonio Jarvis Day" in the Virgin Islands of the United States of America. I join Governor Charles Turnbull in calling upon everyone in my district, as well as those Virgin Islanders residing in the United States of America, to reflect upon the life and contributions of this great Virgin Islander—a true renaissance man.

EXPRESSING SENSE OF CONGRESS
THAT AMERICANS SHOULD TAKE
TIME DURING NATIVE AMERICAN
HERITAGE MONTH TO RECOGNIZE
THE ACCOMPLISHMENTS
AND CONTRIBUTIONS MADE BY
NATIVE PEOPLES

SPEECH OF

HON. BETTY McCOLLUM

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 27, 2001

Ms. McCOLLUM. Mr. Speaker, I join my colleagues today in supporting House Concurrent Resolution 270. This simple, yet important, statement supports the goals and ideals of Native American Heritage Month to highlight the important contributions Native Americans have made to our history and culture. This resolution also encourages the American people to honor and recognize the accomplishments and heritage of Native Americans, including their contributions in the areas of agriculture, medicine, art and language.

Long before the first Europeans arrived in the upper Midwest, the Dakota and Ojibwe nations called Minnesota home. You can still visit many of the areas where Native Americans created their communities and see examples of this rich history. Pipestone National Monument, a sacred quarry in Southwest Minnesota, is still being used to mine the soft red pipestone that was at one time used to create the ceremonial pipes that were used in dealings between tribes and to honor the spiritual world. The story of this stone and the pipes made from it spans four centuries of Plains Indian life and is inseparable from the traditions that structured their daily routine. Today, carvings are appreciated as much as art as well as for ceremonial use.

The heritage and customs of my state, Minnesota, have been greatly influenced by Native Americans. The name of Minnesota itself comes from a Dakota word meaning "waters that reflect the sky" and many more of Minnesota's cities and counties hold names that represent the Native American heritage that surrounds them.

I commend the authors of this resolution for helping raise awareness of Native American culture and heritage. As a member of the Native American Caucus, I look forward to working with them to make sure the noble goal of encouraging the American people to honor and recognize Native American accomplishments happens not only during Native American Heritage Month but also throughout the year.

ST. VERONICA'S SCHOOL TO CELEBRATE ITS 75TH ANNIVERSARY

HON. GERALD D. KLECZKA

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. KLECZKA. Mr. Speaker, this week one of my district's many fine parochial schools will reach an important milestone. St. Veronica Catholic School, first opened its doors on De-

cember 6, 1906. Two small rooms accommodated the 106 students who attended class on that day.

As the community once known as the Town of Lake expanded, so did St. Veronica's. After surviving the lean years of the Great Depression and World War II, a new 17-room school was dedicated by Rev. Gordon Johnson in 1952. Today, as the school prepares to celebrate its 75th anniversary, it boasts an enrollment of nearly 450.

The Sisters of St. Francis of Assisi, who taught at St. Veronica's from its inception until the late 1980s, instilled in their students the importance of education, God, family and community in their daily lives. Sister Marie Estelle Kuczynski and her faculty and staff the school's dedication to those ideals as they prepare the children of today to become the leaders of tomorrow.

St. Veronica's strives to afford its students the opportunity to acquire the skills necessary to excel in our changing world. New additions are planned for the library, learning center, and computer lab. However, the dedication to academic, spiritual, social and moral development remains unchanged.

And so, it is with great pleasure that I join with the faculty, staff, students, and alumni of St. Veronica School in celebrating 75 years of quality education, and wish them godspeed in all that lies ahead.

TRIBUTE TO DR. LELAND
HARTWELL

HON. JIM McDERMOTT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. McDERMOTT. Mr. Speaker, It is an honor for all of us in Seattle to have Dr. Leland Hartwell among us. We are very fortunate to have him as the president of the renowned Fred Hutchinson Cancer Research Center. Additionally, Dr. Hartwell is a professor of genetics and medicine at the University of Washington.

I am very proud to extend my warmest congratulations to Dr. Hartwell on winning the Nobel Prize for Medicine. This prize is reflective of many years of hard work and achievement, and a lifetime commitment to saving lives. He won the most prestigious prize in medicine through pioneering research in the genetics of yeast cells, which are much easier to study than human cells.

When Dr. Hartwell first began studying baker's yeast cells over 30 years ago, he and other scientists were not all that confident that the research would apply to human cells. According to Hartwell, the most sophisticated technology they used was often a toothpick. But hard work and determination prevailed.

Dr. Hartwell used genetics to study how cells function, to determine which genes cause cells to divide. That understanding, in turn, is helping researchers understand how cells mutate and perhaps how to prevent or reverse cancerous cell changes. He discovered more than 100 genes involved in cell-cycle control, and documented the existence of cell-cycle "checkpoints." These points ensure that steps

in the process have been completed properly before it proceeds. Interestingly, he discovered that cancer cells bypass the checkpoints.

Indeed, Dr. Hartwell's investigation into complex cellular mechanics paved the way for others to better understand how mistakes in the process result in cancerous cell growth. Advances in clinical therapies build upon the knowledge gained from his research.

Without the fundamental research, advances in science and medicine could never be achieved. I wish to thank Dr. Hartwell for his dedication to curing disease and improving human life.

IN RECOGNITION OF THE LITTLE
WHITE CHAPEL

HON. ADAM B. SCHIFF

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. SCHIFF. Mr. Speaker, I rise today to honor the Little White Chapel in Burbank, CA. The congregation will celebrate the 60th anniversary of the Little White Chapel on December 2, 2001.

Founded on Sunday, December 28, 1941, the Little White Chapel has been serving its congregation for 60 years now. In 1941, the Little White Chapel was built even before it had a single member and well before the congregation had been organized. The Greater Los Angeles Church Federation to the Christian Church, guided by the philosophy of, "Build it and they will come," held Little White Chapel Day in 1941 and with the proceeds, erected the current day church.

The first church services were held on Sunday, December 28, 1941, where Dr. Clifford A. Cole presented the church to the people of Burbank and opened its doors to all who would come. As the years went by, the church was able to add Sunday school rooms, a social hall, a kitchen, an annex for overflow crowds, and a Sanctuary.

Throughout the years, the congregation has taken an active role in volunteering and working in the surrounding community of Burbank. The church's congregation has initiated the Good Samaritan Fund to help members of the community in times of distress and need. The fund has given over 36 percent of its funds to causes beyond the local church, especially those dealing with interfaith approaches to alleviating the causes of racism, poverty, hunger, and homelessness.

So today, I ask all Members of Congress to join me in congratulating the Little White Chapel and its congregation on the celebration of their 60th anniversary and thank them for their outstanding participation and service to our community.

DICK VAN NOSTRAND: AN ARTIST
WITH A CAMERA

HON. JAMES A. BARCIA

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. BARCIA. Mr. Speaker, I rise today to honor Dick Van Nostrand upon his retirement

after nearly 35 years as a newspaper photographer with the Bay City Times in our shared hometown of Bay City, Michigan. I have known Dick for many years and I, along with it seems nearly everyone in the region, have been privileged at one time or another to be the subject of his photographic artistry.

Dick's interest in photography began when he first picked up his dad's 35-millimeter camera as a teen. He learned quickly. By his senior year at the former T.L. Handy High School, Dick was a published photographer and had won several awards for his work. After working for a newspaper in Indiana, Dick returned to his hometown in 1967 to join the Bay City Times as a full-time photographer. A month later, he married Jan and they embarked on a life together in Bay City.

Over the years, Dick's photographs have graced the pages of the Bay City Times and many other publications throughout the world. He has won the admiration of readers and colleagues alike, garnering many awards from his peers in journalism and in the arts. The images he shot of the tragic Wenona Hotel fire earned him a Pulitzer Prize for Spot News nomination in 1978 and his photos of the fire and his slides are still used today as a training tool for firefighters.

His wife, Jan, and children, David and Amy, also deserve credit for providing the love and support so necessary to his professional success and in fostering the talent that manifested itself in his work.

Finally, Mr. Speaker, I ask my colleagues to join me in commending Dick Van Nostrand for his years of journalistic excellence and his unparalleled passion for story-telling through the click of his camera. His vision and talent have served his profession and his community well, and he will be sorely missed by us all.

JOHN P. PERDUYN

HON. TOM SAWYER

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. SAWYER. Mr. Speaker, John P. Perduyn has served the Goodyear Tire & Rubber Company for 36 years, and the Akron community nearly as long. He began his career in 1965 as associate editor of "Go" and "Triangle," internal publications serving the company's marketing efforts.

Since then, John Perduyn has served the Research and Development, Shoe Products, and the Chemical Division of Goodyear. For a time, he worked in Goodyear's Midwest Region office in Chicago. Fortunately for us in Akron, he returned as director of public information.

Years of dedication and commitment to the principles of sound business and honest communication with employees and consumers won him the position of Senior Vice President of Global Communications in 1999.

John Perduyn's career with Goodyear has coincided with an era of unprecedented change, reorganization, and acquisitions in the

tire and rubber industry—not just in the United States, but around the world. The globalization of markets in transnational industries has tested many companies—but none more than those in the worldwide tire industry. Few companies or executives in any field have met those challenges, in all their various forms, as well as Goodyear and John Perduyn.

Throughout his career, John Perduyn has served as a mentor for many associates within Goodyear and beyond. He is a member of the National Association of Manufacturers' Communication Council, the Public Relations Society of America, the Vice Presidents Forum, and the Arthur W. Page Society. John embodies the Page Society's credo to tell the truth and prove it with action.

Beyond the corporate world, John Perduyn has continued contributing his time and talents to our community. He is on the board of trustees of the Akron Roundtable and Ohio Ballet, offering sound communications advice and policy counsel to those non-profit organizations for many years.

John Perduyn's wise guidance and strong leadership will be missed at Goodyear. We in Akron can only hope that he will find even more time to devote his energies to the community he has served so long and so well.

PERSONAL EXPLANATION

HON. TERRY EVERETT

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. EVERETT. Mr. Speaker, I was reviewing tornado damaged areas in my district on Tuesday and thus was unable to vote during the following rollcall votes. Had I been present, I would have voted as indicated below.

Rollcall No. 449, H.R. 1259, Computer Security Enhancement Act—"yes," and rollcall No. 450, S. Con. Res. 44, resolution expressing the sense of the Congress regarding National Pearl Harbor Remembrance Day—"yes."

Additionally, due to flight delays on Wednesday, I missed the following morning rollcall votes. Had I been present, I would have voted as indicated below.

Rollcall No. 451, on Approving the Journal—"yes," rollcall No. 452, H. Con. Res. 77, Expressing the sense of the Congress regarding the efforts of people of the United States of Korean ancestry to reunite with their family members in North Korea—"yes," and rollcall No. 453, H.R. 2722, Clean Diamond Trade Act—"yes."

RAYMOND M. DOWNEY POST
OFFICE BUILDING

HON. STEVE ISRAEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. ISRAEL. Mr. Speaker, I rise today to introduce a bill to designate the Deer Park Post

Office as the "Raymond M. Downey Post Office Building." New York lost many heroes on September 11th, but the loss of Chief Downey is an especially difficult one.

During the thirty-nine years he was a New York City firefighter, Chief Downey rescued countless people from what befell so many at the World Trade Center. The most decorated member of the City's fire department, he led a FDNY rescue team to Oklahoma City and directed the recovery effort at the World Trade Center bombing in 1993. He will be sorely missed.

I ask my colleagues to support this bill and to join me in remembering Ray Downey.

HONORING THE CENTRAL TEXAS
LABOR COUNCIL ON ITS 100TH
ANNIVERSARY

HON. CHET EDWARDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. EDWARDS. Mr. Speaker, it is fitting that we extend our congratulations to the Central Texas Labor Council on the occasion of its One-Hundredth Anniversary, celebrated in Waco, Texas on October 20, 2001.

Originally chartered as the McLennan County Labor Council on October 31, 1901, the member-unions included the Leather Workers and Horse Goods, Local 45, the Stationary Fireman's Union, the Tailors Union, Local 96 and the Federal Labor Union 8892. Another member, the Typographical Union, Local 188, was first chartered in 1881. In later years, the Musicians Union local represented organists who accompanied silent films in local movie houses.

In the 1920s, local unions held a forty-hour workweek strike, and helped establish that as a basis for all contracts of labor. Other early job actions were for air conditioning, worker respect and safer workplaces.

In 1901, only unions in McLennan County were affiliated with the Council. Over time, it expanded to include eight counties, and in 1992, the name was changed to the Central Texas Labor Council. The organization now includes forty unions representing 14,000 workers.

Mr. Speaker, the nature of collective bargaining and labor-management relations have changed dramatically since the Council was born a century ago. Today, in Central Texas and across the nation, the vital role of labor unions and labor councils have been widely recognized for their contribution to safer and more productive workplaces with highly-skilled workforces, leading to more competitive enterprises, and ultimately, to a stronger and more stable U.S. economy.

Much has changed in one hundred years. However, the Central Texas Labor Council continues to speak, and fight when necessary, for the rights, the interests and the dignity of working men and women.

November 29, 2001

THANK YOU, DR. STEVEN E.
HYMAN

HON. MARGE ROUKEMA

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mrs. ROUKEMA. Mr. Speaker, I rise today to thank Dr. Steven E. Hyman for his outstanding and dedicated work in the field of mental health through research, advocacy, and education. Dr. Hyman, director of the National Institute of Mental Health (NIMH) of the National Institutes of Health (NIH), will be leaving to assume his new responsibilities as provost of Harvard University on December 10. A leading scholar at the intersection of molecular neurobiology and psychiatry, Dr. Hyman will be gravely missed.

I personally regret Dr. Hyman's departure, because he has been very helpful to me in my role as co-chair of the House Mental Health Working Group. He has shown strong and decisive leadership that has gone far to reduce the terrible stigma and discrimination that haunts those with mental disorders. As a leading scientist, Dr. Hyman very publicly and very often made the case that science has shown us that these disorders of the brain are real and they are treatable. As one who has focused on this issue for so long, I can tell you how necessary his strong and credible voice has been.

In 1996, Harold Varmus, then-director of the National Institutes of Health (NIH), named Dr. Hyman as director of the NIMH, the federal agency charged with generating the knowledge needed to understand, treat, and prevent mental illness. His tenure has been marked by intensified efforts to bring molecular biology, genetics, neuroscience, and behavioral science all to bear, in integrated ways, on the understanding of mental illness and mental health. Most recently, Dr. Hyman has been a prominent voice for the NIH on the psychological effects both of the September 11th attacks and bioterrorism.

Dr. Hyman has been a great help to us here in the House of Representatives as we sought to understand mental illnesses and their effect on society. However the impact of his service has reached our constituents well. I am gratified by every person who tells me that they are no longer ashamed or guilty because they or a family member suffers from a mental disorder. I have had a long-time interest in the issues surrounding mental illnesses and I have valued Dr. Hyman's leadership and commitment to encouraging and supporting the basic research that will enable us to develop effective new treatments—based on an understanding of the disease process itself.

Dr. Hyman has accomplished much during his tenure at the NIMH and for this I am grateful. His success in bringing research on mental disorders to the forefront of public consciousness has left an important and lasting legacy.

Mr. Speaker, I ask my colleagues to join me in gratitude for Dr. Steven Hyman's dedication. We wish him all the best for the future. Our nation looks forward to his continuing contributions to our health and well being as he honors the halls of Harvard University.

EXTENSIONS OF REMARKS

RECOGNIZING ACCOMPLISHMENT
OF KNOX COUNTY COMMISSION
CHAIRMAN, LEO COOPER

HON. JOHN J. DUNCAN, JR.

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. DUNCAN. Mr. Speaker, I am pleased to have the opportunity to officially recognize the recent accomplishment of my constituent and friend, Knox County Commission Chairman, Leo Cooper. Commissioner Cooper was recently reappointed as chairman of the Knox County Commission by a unanimous vote and is beginning his third term in this important role. Mr. Cooper's leadership and genuine desire to serve the public are reflected in the fact that he is now the longest-serving Chairman in the history of the Knox County Commission.

In Washington, we often overlook the critical role local governments play in the lives of the American people. By focusing on broad legislative initiatives, we can easily lose sight of the tremendous work that must be done at the county and city levels.

Commissioner Cooper's reappointment as chairman will not be covered by national news, but I believe it serves as an opportunity to highlight, not only his efforts, but also the efforts of all Americans who have committed themselves to serving in local elected office.

Since 1986, Commissioner Leo Cooper has served the men, women and families of the Seventh District of Knox County as a tireless advocate and friend. Prior to being elected to local government, Chairman Cooper's career was dedicated to education and improving the lives of Knox County's young adults. Whether as an elected official or a schoolteacher and principle, Mr. Cooper has continually committed himself to public service. The people of the seventh district recognize this, and I am pleased that the other dedicated members of the Knox County Commission do as well.

I add these remarks to the RECORD today so that every member of the House of Representatives can join me in thanking Mr. Leo Cooper and every elected official in our respective districts who play such vital roles in the well-being of our communities.

**PAYING TRIBUTE TO SUSAN
MENCER**

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. McINNIS. Mr. Speaker, I would like to take this opportunity to congratulate Susan Mencer on her new appointment as Director of the Office of Preparedness and Security for the State of Colorado. Susan will now play a key role in the defense of the State of Colorado and this nation from the threat of terrorism. This will be a challenging role for Susan, but I am confident she will prove herself most capable of leading Colorado in this time of national tragedy.

Protecting our country from terrorism is not a new role for Susan. She began her service

23603

in 1978 as an agent for the Federal Bureau of Investigation. Her initial duties at the agency led her to the Office of Counterintelligence in New York. Serving as an agent, she was responsible for ensuring that foreign diplomats were not involved in spying or obtaining classified information concerning national security while posted in the United States. Susan's success propelled her to the FBI Headquarters in 1985, where she served in several high level roles as head of the budget unit for the Intelligence Division and Supervisor of Counterintelligence Operations.

In 1990, Susan came to the FBI Denver office and directed programs involving international and domestic terrorism, foreign counterintelligence. As a result of her dedication, Susan was named Director of the Joint Terrorism Task Force in Denver created in response to the Oklahoma City bombing in 1995. Enjoying retirement since 1998, Susan was again called to duty following the Columbine shooting incident and served on the investigation panel. Her commitment to the safety for schools and our children led to an appointment from Governor Bill Owens to head the Department of Public Safety.

Mr. Speaker, the State of Colorado is fortunate to have Susan Mercer lead our efforts to counter terrorism in the State of Colorado. Her impressive resume speaks volumes for Susan's dedication and commitment to keep this nation safe and free from terrorism. I am honored to have Susan in this position and extend my thanks for her service to Colorado and her commitment to this nation.

**NEW YORK CITY CONGRESSIONAL
SESSION GAINS MOMENTUM**

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. RANGEL. Mr. Speaker, I rise today to share with you an article that appeared in the Hill newspaper on Wednesday, November 28, 2001. This news story is concerning H. Con. Res. 249, a resolution that I recently introduced, which provides for a joint session of Congress to be held in New York City early next year. I am pleased to have this opportunity to share this story with my colleagues.

[From the Hill, Nov. 28, 2001]

NYC CONGRESSIONAL SESSION GAINS
MOMENTUM

(By Kerry Kantin)

Despite the logistic hurdles that confront the notion of convening a session of Congress outside of Washington, D.C., momentum is building behind the movement to conduct a symbolic, one-day joint session in New York City.

A resolution introduced last month has already captured the bipartisan support of 165 House members. The House effort is spearheaded by New York State delegation Democratic chairman Rep. Charlie Rangel, who is from Manhattan.

Rangel, working with New York State GOP delegation dean, Rep. Ben Gilman, has been actively corraling support from both his Democratic and Republican colleagues.

"It would be historic. It would be a way of symbolizing the strike we took for the nation and their appreciation for it," said the

15-term Rangel in a phone interview last week. "Any city or any town or village know the Congress is with them, like they're with New York City."

Rangel acknowledged that there are several logistical obstacles, including where the session would be held and security issues, to iron out, but said that should not get in the way of members' support.

"No one's turning us down," Rangel added. "I know I can get my signatures next week."

Rangel and Gilman have written Dear Colleague letters, asking their support for the measure.

"We are equally impressed by our colleagues' support of a symbolic—but powerful—gesture to convene the Congress in New York for one day," write Rangel and Gilman in a Nov. 14 letter. "We believe that such a session in the city where Congress first convened would be a powerful and meaningful expression of support to New York."

The session would also provide an opportunity for all lawmakers to meet with New Yorkers, the letter adds.

The movement to bring Congress to the Big Apple was catalyzed on the editorial page of the Sept. 25 New York Daily News. The New York tabloid wrote an editorial urging a joint session of Congress in New York City, even if it is only for one day.

Rangel quickly picked up the cause and introduced a resolution on Oct. 12; New York Sens. Hillary Rodham Clinton (D) and Charles Schumer (D), followed suit, introducing a companion resolution Nov. 15.

"We're working actively to see that it happens," said Schumer, of his and Clinton's efforts. "It would be a shot in the arm for New York."

In the House, the resolution has captured the support of 53 Republicans and 112 Democrats, ranging from Empire State liberals like Rep. Jerrold Nadler to Midwestern conservatives like Paul Ryan (R-Wis.) and Don Manzullo (R-Ill.). The entire 31-member New York State delegation has signed on, as well as several other members from the Northeast.

With the exception of retiring House Minority Whip David Bonior (Mich), the entire Democratic leadership has pledged its support for the resolution, but no one from the House GOP leadership. It has, however, received the support of other influential Republicans, including Appropriations Committee Chairman Bill Young (Fla.) and Energy and Commerce Committee Chairman Billy Tauzin (La.).

"Everyone has been extremely receptive," Rangel said. "But when we get to the logistics, I hope they'll love me as much in the springtime as they do in the fall."

Other members are wary to sign on until finding out more details.

"I saw the note from Charlie [Rangel], but Gosh, it's an interesting concept, but I don't know if I'm for it or against it," said House Republican Conference Chairman Rep. J.C. Watts (R-Okla.).

"I do find it quite intriguing we would consider something like that," he added. "I'm sure we would look at the pros and cons and give it a fair hearing. It seems to be a massive undertaking to move the mechanics of Congress to another location."

While his primary focus is gaining as many signatures as he can, Rangel said he is looking into about six sites. He added that he is working with New York City Mayor-elect Michael Bloomberg (R) and other city leaders, like Bill Ruden, the chairman of the Association for a Better New York.

Ed Skyler, a spokesman for the Bloomberg Transition Team, said the mayor-elect

EXTENSIONS OF REMARKS

"strongly supports" the resolution. He added that Bloomberg discussed the issue during his trip to Washington earlier this month.

Those in support of the resolution say the logistics can be hammered out at a later time.

"A lot of those things would need to be worked out," acknowledged Schumer, adding that lawmakers could not work out many of the fine details themselves and would need to leave issues, like security, up to other agencies, including the sergeants at arms.

"This is an act of showing congressional support for New York," said Kori Bernards, a spokeswoman for House Minority Leader Richard Gephardt (D-Mo.), who supports the resolution.

DEPARTMENT OF DEFENSE APPROPRIATIONS ACT, 2002

SPEECH OF

HON. JEFF MILLER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 28, 2001

The House in Committee of the Whole House on the State of the Union had under consideration the bill (H.R. 3338) making appropriations for the Department of Defense for the fiscal year ending September 30, 2002, and for other purposes:

Mr. JEFF MILLER of Florida. Mr. Chairman, I rise today in strong support of H.R. 3338, the Department of Defense Appropriations Act for Fiscal Year 2002. I wish to commend Chairman LEWIS, Ranking Member MURTHA, and their staff for again crafting a bill that is appropriate for those who risk their lives to protect our country, our freedoms, and our way of life.

We have learned in recent months that we live in an uncertain time and an unstable world. We in Congress must always remember that the first priority of the Federal Government is to provide for the national defense.

This bill delivers on that priority and demonstrates our commitment to our Nation's defense by providing \$317.5 billion in discretionary spending, \$19 billion over last year's bill. The bill ensures that our military remains the strongest, most prepared force in the world, and strengthens our efforts to deal with the new threats that our Nation faces by providing \$11.7 billion under the Counter-Terrorism and Weapons of Mass Destruction Title. The bill also fulfills our obligation to house, clothe, feed, and provide for the health care of the members of our armed services and their families by providing a 4.6 percent pay raise and funding an increase in housing allowances.

Mr. Chairman, it is for these and many other reasons that I gladly support H.R. 3338 today and encourage my colleagues to do the same. At this very moment, men and women of our Armed Forces are overseas fighting a war on terrorism and evil. While we have all stood in this Chamber and commended them for their service, now is the time to support this vital legislation that will ensure our troops remain safe and successful, now and for years to come.

November 29, 2001

DEPARTMENT OF DEFENSE APPROPRIATIONS ACT, 2002

SPEECH OF

HON. CAROLYN MCCARTHY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 28, 2001

The House in Committee of the Whole House on the State of the Union had under consideration the bill (H.R. 3338) making appropriations for the Department of Defense for the fiscal year ending September 30, 2002, and for other purposes:

Mrs. MCCARTHY of New York. Mr. Chairman, the tragic events of September 11th have left a profound impact on this country. As a representative from New York, I have witnessed firsthand the destruction and grief endured by the survivors. I've watched our brave rescue personnel work tirelessly to recover lost loved ones. Cleanup crews continue to work around the clock in hope of rebuilding what was destroyed. There is no question that New Yorkers are united in their effort to overcome the challenges ahead of them.

As we know, in the aftermath of September 11th, Congress quickly passed the 2001 Emergency Supplemental Appropriations Act for Recovery and Response to Terrorist Attacks on the United States (P.L. 107-38). This supplemental appropriates \$40 billion and allows the Bush Administration to spend the first \$20 billion with minimal reporting requirements. The remaining \$20 billion can be spent only after the Administration has specifically requested it and Congress has passed a bill reported by the Appropriations Committee. New Yorkers were promised \$20 billion of these funds to help with relief efforts.

I supported this legislation because it stipulates that "not less than one-half of the \$40,000,000,000 shall be for disaster recovery activities and assistance related to the terrorist attacks in New York, Virginia, and Pennsylvania . . ." However, only \$3.2 billion has been released and the Administration has only requested an additional \$6.3 billion for a total of \$9.5 billion. That's less than half of what was promised.

I am extremely concerned that New York is not receiving the full \$20 billion in emergency funds promised by the President in this bill. New York can not afford to wait for future legislation allocating the remainder of the \$20 billion in emergency funds it was promised. Overtime pay for cleanup workers must be paid. Unemployment Insurance funds are rapidly depleting. Continuation of COBRA must continue. These are real concerns that will require, at a minimum, the immediate allocation of the \$20 billion in emergency funds.

Equally important, however, is the urgent need to equip our military personnel with the resources and tools they need to prevent future acts of terrorism. We are at war with an enemy that is not restricted to country borders or even continents. The 7-percent increase in funding addresses many of our military's needs and prepares this country for the long road of eradicating all terrorists.

I have little doubt that New York will eventually receive the full \$20 billion promised by the President, but I would have preferred to receive these funds today. The President must

November 29, 2001

not forget about New York, just as we have not forgotten about our brave men and women fighting overseas to prevent another attack similar to September 11th.

PAYING TRIBUTE TO DAVID
KLAGER

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. McINNIS. Mr. Speaker, I would like to take this opportunity to pay tribute to the life and memory of David Denison Klager who recently passed away in Creede, Colorado on November 1, 2001. David, known to others as Dave, will always be remembered as a dedicated contributor to the community. His passing is a great loss for a town that relied on Dave for his kind heart, knowledge, and friendship.

As a member of the Creede community, Dave was constantly volunteering his time and energy for beneficial projects in the area. He served on the Board of Directors and as Treasurer for the Homeowner's Association, President and Board of Directors for the Creede Repertory Theater, President of the Creede Historical Society, volunteer for the Creede Historical Museum, and member of the Arts Council. He also served as Senior Warden to St. Augustine's Episcopal Church.

Dave was a lover of the outdoors and enjoyed the many activities that Colorado can offer. He was an avid hiker, snowmobiler, cross-country skier and canoeer. His hobby was woodworking and his work can be seen throughout the City of Creede in places such as St. Augustine's Church, the "Art Park", and Creede Repertory Theater.

Mr. Speaker, Dave will be missed by the many whose lives he has touched in the community. It has always been known that his greatest passion was his love and dedication to his family. His wife Courtney, daughters Kim, Karol, and Karen, as well as several grandchildren survive Dave. It is with a solemn heart that we say goodbye and pay our respects to a patriarch of the Creede community. David Denison Klager dedicated his final years to his neighbors in the City of Creede, Colorado, and he will be greatly missed.

DEPARTMENT OF DEFENSE
APPROPRIATIONS ACT, 2002

SPEECH OF

HON. BETTY McCOLLUM

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 28, 2001

The House in Committee of the Whole House on the State of the Union had under consideration the bill (H.R. 3338) making appropriations for the Department of Defense for the fiscal year ending September 30, 2002, and for other purposes.

EXTENSIONS OF REMARKS

Ms. McCOLLUM. Mr. Chairman, I rise today in support of H.R. 3338, the Defense Appropriations bill for fiscal year 2002.

In this time of national awareness of the very real threat of terrorism, I believe it is our responsibility as lawmakers to ensure the readiness and quality of life of our military by providing these forces with the necessary resources, equipment and training to defend our nation's interests and to keep the American people secure. With our country at war, it is more important than ever to continue to support our armed forces and provide them with the necessary resources needed to wage this war and protect our nation and our world from terrorism.

Despite my support for this bill, I have strong reservations about the way this bill has placed an added emphasis on programs and provisions that do not address the most pressing needs of our nation.

For example, this measure provides \$7.9 billion for an untested and unproven missile defense program, while providing only \$613 million to improve federal, state, and local bioterrorism preparedness. By moving forward with a costly national missile defense system, we are investing billions of scarce federal dollars in an unproven and dangerous scheme while placing at risk the well-being of our nation in a time of national crisis.

In addition, this Defense Appropriations bill will cut critically needed funding from the Department of Labor's employment and training administration to provide additional funding relief to assist New York's efforts to recover from the September 11th terrorist attack. While there should be no doubting my commitment to the people of New York and their efforts to recover and rebuild after the terrorist attacks, I am concerned that the funding they need may come at the expense of other programs and initiatives deserved of funding.

Specifically, funding in this bill in the employment and training administration was to be used for the New National Emergency Grant program, which would allocate emergency funding to the states to provide health insurance, income support, and job search assistance and training for displaced workers following the September 11th attack. This includes a \$24 million grant for the State of Minnesota to provide assistance to displaced airline employees who have lost their jobs when the government suspended domestic and international air travel. These layoffs have had a devastating impact on these individuals and their families and to Minnesota's economy as a whole. With the huge influx of current layoffs, the state cannot meet the needs of these laid off workers without this emergency grant.

While this is not a perfect bill, with our nation at war, it is a necessary bill. It is imperative that our nation continues to maintain a strong national defense, especially during this time of domestic and international crisis. However, in the weeks and months ahead we must also pledge our commitment to work as a unified Congress to provide increases in additional security, bioterrorism preparedness, and employee assistance measures. Furthermore, we must work to help New York recover

23605

and rebuild from the devastating attack of September 11th, as well as stimulating our economy and strengthening our nation's infrastructure and safety measures.

CONGRATULATING CLEARFIELD,
PENNSYLVANIA EMS

HON. BILL SHUSTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. SHUSTER. Mr. Speaker, I rise today to honor the outstanding achievements of the Clearfield, Pennsylvania Emergency Medical Service (EMS) Company. On August 10, 2001, the Pennsylvania Emergency Health Services Council chose Clearfield EMS from among 1,000 ambulance service companies statewide to receive the Rural Ambulance Service of the Year Award.

Clearfield EMS garnered such an award not only through exemplary ambulance service, but also through their involvement in the community. Free flu shots and participation at county fairs and festivals are just a couple of the many ways that Clearfield EMS has taken the lead in community education and involvement.

In light of the tragic events of September 11, 2001, the role of the EMS workers, firefighters, and police officers of Central Pennsylvania is greater than ever. Clearfield EMS and their EMS counterparts throughout the area are among the first to respond to emergencies, and for this important service to our communities, I am grateful. These individuals deserve all of our thanks for dedicating their lives to helping others.

Finally, I would like to recognize the following employees of Clearfield EMS by name:

Paramedics: Scott Briggs, Timothy Lumadue, Christopher Miller, Scott Minich, Robert Mitchell, Michael Mowrey, Lewis Huff, Patrick Cooley

Emergency Medical Technicians (EMT): Vicky DeHaven, George DeHaven, Traci Pentz, Melissa Miller, Lorie Bell, Stacy Huff, Frank Warholic, David McAllister, Brian Kellogg, Frank DeHaven, Carol DeSantis, Erin DeSantis

Administrative Staff: Terry Wigfield, Manager; Chad Abrams, Assistant Manager; Pamela Charles, Office Manager; Dr. James DeSantis, Medical Director

Board of Directors: Gary C. Wigfield, President; Gary L. Shugarts, Treasurer; Pamela Spencer, Secretary; Delford Wigfield, Mathew Franson, Thomas Glace

I congratulate Clearfield EMS on their exceptional accomplishments and their determination to improve their already stellar service. Clearfield EMS should serve as an example in excellence for other ambulance services nationwide.

A BILL TO PROVIDE TAX INCENTIVES TO BUSINESSES LOCATED IN LOWER MANHATTAN, THE LIBERTY ZONE AND HELP REBUILD THE ECONOMY AFTER THE SEPTEMBER 11, 2001 TERRORIST ATTACK

HON. AMO HOUGHTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. HOUGHTON. Mr. Speaker, I am honored to stand with several of my New York colleagues in introducing a bill, which will provide much-needed tax incentives for businesses to rebuild in lower Manhattan—this all after the massive destruction caused by the terrorist attack on September 11, 2001. None of us will forget the terrible losses of that day—loss of life and the most tragic being the heartache to so many families.

The World Trade Center towers were destroyed. Other buildings were damaged or collapsed. The price tag to rebuild is staggering. But rebuilding the infrastructure and economy must start. This package is only part of the solution, but it is an important first step.

As New York Governor George Pataki said today, "The \$6.1 billion package will offer incentives for businesses to generate jobs, spur innovation and investment in the Liberty Zone, helping us renew, restore and rebuild lower Manhattan".

The bill includes five provisions which would: (1) authorize New York State to issue up to \$15 billion in tax-exempt private activity bonds over the next 3 years to help renovate and rebuild commercial property, residential rental property and private utility infrastructure, (2) allow taxpayers to claim an additional 30 percent, first-year depreciation deduction for property located in the Liberty Zone, including buildings and building improvements, (3) provide a 5-year life for depreciating certain leasehold improvements, (4) increase by \$35,000 to \$59,000 the amount that can be expensed by small businesses under section 179, and (5) increase the replacement period from 2 to 5 years for property that was involuntarily converted in lower Manhattan so that taxpayers would not have to recognize gain.

I want to thank Chairman THOMAS and my colleagues for their help in working through this package. I urge your support.

MARKING THE PASSING OF MARY KAY ASH

HON. EDDIE BERNICE JOHNSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Speaker, I rise to salute the life and legacy of Mary Kay Ash. For more than four decades, Ms. Kay has been one of Texas' most outstanding citizens and a business pioneer. Cosmetics sales were just a small part of the legacy she left for America. Her business made women feel better about themselves, regarding both their appearance and the possibility for success in business.

Ms. Kay changed the way women in business were perceived. She pioneered direct marketing in a way that has been emulated for years. She tapped talent that may have otherwise gone unused. All over America, women are more empowered because of the life of Mary Kay Ash.

Mary Kay Ash founded the cosmetic company that bears her name in 1963 with \$5,000 in savings, using a hide tanner's cream as her principle product. Since then, the color pink has been synonymous with quality cosmetic products and aggressive salespersonship. She was a phenomenal entrepreneur and, more importantly, an incredible motivator. One hundred fifty one women, so far, have recorded more than \$1 million in Mary Kay sales.

Last year, Mary Kay, Inc. had revenue of \$1.3 billion. Today, there are about 800,000 women and men who make up the Mary Kay global sales force. It is an extraordinary legacy for a phenomenal lady who grew up in a poor Houston neighborhood.

Mr. Speaker, Mary Kay Ash was one of Dallas-Fort Worth's most dynamic icons. She died on November 22, 2001. I ask that the thoughts and prayers of the Thirtieth Congressional District, and the nation, be with her family and friends.

PAYING TRIBUTE TO DEBBIE TAMLIN

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. McINNIS. Mr. Speaker, I would like to take this opportunity to recognize an outstanding individual from Ft. Collins, Colorado. Over the years Debbie Tamlin has distinguished herself as a business executive, a community leader, and a vital participant in our political process. Debbie's achievements are impressive and it is my honor to recognize several of those accomplishments today.

Debbie was raised in Colorado and received a Bachelors of Arts in Communication Disorders from Colorado State University. In 1978, she received her Colorado Real Estate Sales License followed by her brokers license in 1980. Since then she has immersed herself in an outstanding real estate career and served in numerous capacities of support for her field. She has served as Director for the National Association of Realtors, President of the Women's Council of Realtors, founding member of the Northern Colorado Legislative Alliance, Director of Colorado Association of Realtors, and the Director of Fort Collins Association of Realtors.

To help serve her community and State, Debbie has given her time and energy to the political process by providing guidance and support to aspiring political candidates. She has been a driving force in the Colorado Republican Party and worked on campaigns in various capacities for county commissioners, Congressmen, Senators, and even President George W. Bush. Debbie has also given her time to noble efforts in the community such as founding the Convention and Visitor's Bureau and serving as a leader in groups such as

Citizens for the Protection of Personal Property Rights, the Women's Development Council, and the Colorado Women's Leadership Coalition.

Mr. Speaker, Debbie Tamlin's list of achievements has not been overlooked during her career and her efforts have been repeatedly awarded over the years. It is now my honor to congratulate Debbie on her most recent and well-deserved award from her own community, the Realtor of the Year award. Debbie has been a model citizen for the community and I extend my thanks to her for her efforts. Keep up the good work Debbie and good luck in your future endeavors.

TRIBUTE TO ROGER F. HONBERGER

HON. BOB FILNER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. FILNER. Mr. Speaker, December 31, 2001, will mark the passing of an era, an era of accomplishment in the field of intergovernmental relations. On that day, a pioneer in Washington representation for California public policy and project development will retire from service.

Roger F. Honberger comes from a humble upbringing of enterprising parents from the 1930s. His mother is a Native American, born into the Pechanga Band of California Mission Indians at the turn of the century, and is presently the oldest living Tribal member. Roger was the first member of his family to graduate from college, the result of extensive sacrifice by his parents. After beginning his career in the field of Urban Planning, he returned to graduate school, where he distinguished himself and received degrees from both the University of London, England and Harvard University.

In his early career, he served as a professional planner with the County of Riverside, City of San Diego, National Capital Planning Commission, and the U.S. Department of Housing and Urban Development. His federal experience in writing legislation, budget preparation, and program management led him to the establishment of his own government relations consulting firm in 1970, Roger Honberger Associates, Inc. He pioneered a new industry of dedicated people working with the Congress and Federal Administrations on behalf of the intergovernmental needs of state and local governments. Today, this industry serves countless public agencies from all corners of the nation.

Thirty years ago, Roger was selected from a field of 200 applicants by the County of San Diego to be their first Washington representative. At that time, the San Diego County Congressional Delegation consisted of Lionel Van Deertin, Bob Wilson, and Jimmy Utt. The only other state or local governments that had full time Washington offices when Roger began his work for San Diego County were the State of California, the County of Los Angeles, and the Cities of Los Angeles and San Diego. These were the only general-purpose governments from any other part of our great nation

in those days that maintained a full time presence in Washington, D.C.

In his thirty years of representing San Diego County, Roger directly served 27 different elected members of the County's five person Board of Supervisors, and 8 different Chief Administrative Officers. The number of Congressional Districts in the County grew from 3 to 5 during the same period, and he worked closely with all 16 different Members of Congress elected from these districts since 1970. Five different Presidents recognized Roger for his work on public issues. He has also been recognized as Alumnus of the Year by the California State Polytechnic University, as well as by his High School Alumni Association from Perris, California. He is the only career County representative that the National Association of Counties has officially honored for professional accomplishments. He has had a truly remarkable career of public service.

A broad array of regional accomplishments in the County have benefited from Roger's efforts in Washington, D.C. These include: the establishment of the region's first alcohol detoxification center; development of the first solid waste recycling program; a countywide gasoline vapor recovery program; harbor cleanup; welfare reform; a multitude of flood control and highway projects; San Diego Trolley project construction; Sheriff's Department funding; lagoon preservation; drug addiction treatment; children's disease inoculation services; foster care program support; air quality program certification; and the prevention of off-shore oil drilling, just to name a few. The list is long and impressive.

Five years ago, Roger invited his long-standing associate, Thomas Walters, to become his partner, and the firm's name was changed to Honberger and Walters, Inc. For the past three years, Tom has been the firm's chief executive officer and owner. The firm continues to manage San Diego County's Washington office. Their other clients include the San Diego Metropolitan Transit Development Board, North County Transit, San Diego Unified Port District, the Sweetwater Authority, the Counties of Riverside and Ventura, the Monterey-Salinas Transit District, the Calleguas Municipal Water District, and the Pechanga Band of Luiseno Indians.

Roger has long been recognized as one of the leaders in his field and has lectured on intergovernmental relations and lobbying practice at San Diego State University, U.S. International University, University of Maryland, and the University of Arizona. He continues to be involved in a variety of American Indian issues and was one of the founders of the Harvard University Native American Alumni Association.

Many of us in the Congress have worked with Roger Honberger during his distinguished career. We will miss his friendly disposition and his dedicated hard work on behalf of his public clients. Above all, we will miss his candor and honesty. His word has always been his bond, something we have all appreciated and have grown to expect, regardless of the circumstances. We are happy to see that his high professional standards and style are being continued by Tom Walters without missing a beat. For this we are grateful, and we are grateful for Roger's sustained friendship

and support over the years. We wish him the very best as he moves on to other endeavors.

THE ACCESS AND OPENNESS IN SMALL BUSINESS LENDING ACT

HON. CONSTANCE A. MORELLA

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mrs. MORELLA. Mr. Speaker, I am proud to join my good friend and colleague JIM MCGOVERN in introducing this legislation that will help minority and women entrepreneurs in securing small business loans from private lending institutions. The Access and Openness in Small Business Lending Act will ensure that lending institutions are providing minorities and women opportunities to obtain small business loans.

This legislation is similar to the 1990 amendment to the Home Mortgage Disclosure Act (HMDA) that holds financial institutions publicly accountable for their lending practices to applicants. Like HMDA, the Access and Openness in Small Business Lending Act will allow applicants, for small business and non-mortgage loans, to voluntarily and anonymously provide their race and gender information to banks and other institutions. Lending institutions under this legislation will be required to disclose the collected data to the public. These institutions already maintain databases on the geographic and loan size of applicant requests. The additional information collected on lending practices will help identify small business owners that remain underserved and expose additional profitable lending opportunities for lending institutions.

Minorities and women contribute greatly to our nation's economy and communities. Over the past decade they have expanded their ownership of small businesses. However, minorities and women continue to have difficulty gaining access to the resources they need to succeed in business. If granted greater access to private funds more minority and women small business owners could help revitalize their neighborhoods and expand their commercial base.

Mr. Speaker, the Access and Openness in Small Business Lending Act would greatly increase access to private credit for minority and women-owned businesses. This legislation is a much needed step in the right direction that allows minorities and women an opportunity to succeed as small business entrepreneurs and contribute to their communities and the nation. Thank you.

RECOGNITION FOR ERNEST AND JULIO GALLO

HON. GARY A. CONDIT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. CONDIT. Mr. Speaker, it is a distinct privilege to rise today to honor two giants in the world of business and agriculture—Ernest and Julio Gallo.

Ernest, and his late brother Julio, are being inducted into the Stanislaus County Agricultural Hall of Fame. That alone speaks volumes about these two men in a region of the country known as the agricultural leader of the world.

The sum of their contributions is nearly impossible to evaluate. They easily take their place in history with great men of vision such as Henry Ford and Sam Walton who through hard work and determination transformed their dreams into reality.

Starting with a small family vineyard and winery, they strove for perfection and set a path others would struggle to find. They are part of a disappearing breed of hands-on discoverers and entrepreneurs who blazed a trail, proving the value of hard work, dedication and ambition.

Rarely in history does a name or a single word draw such a connotation as Gallo. The name alone is synonymous with wine and wine making in the same way Ford is synonymous with quality automobiles.

Mr. Speaker, volumes could be written about the contribution these men have made and will continue to make to the Central Valley of California from research to industry operation, production and viticulture. All of these things are intertwined in the history of the Gallo family enterprise.

Ernest and Julio Gallo have greatly impacted agriculture through their decades of leadership in the wine industry. Starting with a small family vineyard and winery, they strove for perfection, inventing the tools they needed when none existed, setting the path for others to follow. They built their business into the largest winery in the world. Their shared ambition to produce and market quality wines at affordable prices motivated them to continuously improve their operations, extending the family business to include grape growing, wine making, production of the bottles, warehousing, distributing, transporting and marketing wines throughout the country, and now throughout the world.

Ernest and Julio Gallo were instrumental in transforming the economy of grape growing, offering long-term contracts to independent farmers by encouraging growers to upgrade the varieties of grape planted to meet future consumer demand for quality. California grape growers were able to then transform the California wine industry into the international phenomenon it is today. Ernest and Julio invested heavily in agricultural research and shared their learning with local farmers.

Through this investment and sharing, the Gallos helped improve the quality of grapes available in the region through better farming practices such as plant nutrition, irrigation and harvesting regimes. The Gallos helped educate generations of vineyard managers and wine makers by their support of curricula throughout the University of California and California State University systems. They undertook extensive research in wine making techniques to help build and sustain the market by introducing new types of wines and methods of wine production. Today this global enterprise employs thousands of people worldwide, nearly 3,500 in and around Stanislaus County.

On a shoestring budget, Ernest and Julio created the "flagship" winery in the United

States and put California on the map for wine. Their dream has translated into a global force for wine and wine making.

Mr. Speaker, Ernest and Julio always gave "All their best." It is with great pride that I ask my colleagues to rise and join me in honoring two great men—Ernest and Julio Gallo—on the occasion of their being inducted into the Stanislaus County Agricultural Hall of Fame.

PAYING TRIBUTE TO WALTER
WAYNE THOMPSON, JR.

HON. SCOTT MCINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. MCINNIS. Mr. Speaker, I would like to take this opportunity to recognize Walter Wayne Thompson Jr. and thank him for his service to this country. Walter began his service as a sailor in 1941, joining the Navy at the age of eighteen. By the end of his service, Walter had served on two ships involved in several famous and infamous battles in the Pacific theater.

Walter served on the U.S.S. *Hornet* as a stenographer to the ship's Captain. While serving on the ship, Wayne was present for the launching of the famous Doolittle Raid, America's first strike at the Japanese after Pearl Harbor. Following the raid, the *Hornet* engaged in the Battle of Midway, a battle considered a turning point in the war that stopped the Japanese fleet from controlling Hawaii.

Following Midway, the Japanese focused on the island of Guadalcanal. Here the *Hornet's* crew found itself tasked with the role of defending the island alone after Allied naval forces sustained heavy losses. After Guadalcanal, the crew fought in the Battle of Santa Cruz in an attempt to weaken Japanese defensive forces for an invasion of the island.

The Battle of Santa Cruz was to be the final engagement for the *Hornet*. The carrier was attacked and sunk by enemy forces and her crew rescued by the U.S.S. *Anderson*. After living through the travesty, Wayne finished his service aboard the U.S.S. *Lexington*, where he served until the end of the war. Following his discharge, he returned to his native state of Missouri and became a Baptist Minister. He served the ministry for over forty years before retiring in Montrose, Colorado.

Mr. Speaker, it is a great privilege to recognize Walter Wayne Thompson Jr. and thank him for his service during World War II. If not for dedicated citizens like Wayne, we would not enjoy the many freedoms we have today. Wayne Thompson served selflessly in a time of great need, bringing credit to himself and to this great nation. —

WE MUST RELEASE AID TO HAITI

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. CONYERS. Mr. Speaker, the U.S. must change its current policy towards Haiti. We, as

the standard bearers cannot allow Haiti to further sink into a financial and social mire. It has always been America's role to feed those who are hungry and clothe those who cannot clothe themselves.

As we loosen our belts from our Thanksgiving feast, compare the fate of millions of Haitians to ourselves: According to the United Nations, sixty percent of Haiti's 8.2 million people are undernourished. The average number of calories available to Haitians per day is 1977, nearly half of the 3754 calories a U.S. resident gets, according to the World Health Organization.

The Associated press recently published the following account of life in Haiti:

"I'll eat anything I can get," said Jean, 25, as he pulls an empty crab trap out of the polluted Port-Au-Prince Bay. On a good day, Jean can earn about \$12 but often goes home empty handed. Pigs are raised on garbage and human waste, but their meat is too precious to be eaten by the impoverished residents. The pork is sold at the market for cheaper staples like cornmeal and rice that provides more days of nourishment.

The current policy of the U.S. is contributing to the continued attrition of the quality of life of Haiti's people, which if left unchanged, could lead to horrendous outcomes for the western hemisphere's poorest people. We must address the current state of economic devastation. We must remove our blockade of essentially all aid to Haiti.

The U.S. must stop using its veto power at the Inter-American Development Bank. This veto-prerogative is blocking development and humanitarian loans which covers a broad spectrum of critical social and economic priorities, such as health sector improvement, education reform, potable water enhancement and road rehabilitation.

Presently, the U.S. is precluding the issuance of the following loans from being dispersed by the Inter-American Development Bank: 21.5 million—Education, 22.5 million—Health, 55 million—Roads, and 60.9 million—Water.

The hold up of these loans is exasperating Haiti's current negative cash flow status with the Inter-American Development Bank. Although the Inter-American Development Bank is precluded from moving ahead with critical social and humanitarian loans, Haiti is still required to pay arrears payments and credit commissions on loans that it has not received. By the end of 2001, if nothing changes, Haiti will be in a negative cash flow position with the Inter-American Bank—paying more into the Bank than Haiti is receiving by approximately \$10 million.

Humanitarian and social indicators continue to drop dramatically. As well as, quality of life indicators, such as health and infant mortality, which continues to erode, devastating the humanitarian crisis creating a potentially devastating humanitarian crisis.

The national rate of persons infected with HIV/AIDS is now 4 percent or 300,000 persons, creating 163,000 orphans; and 30,000 new cases per year. The infant mortality rate is 74 deaths out of every 1000 births; the doctor to patient ratio is 1.2 persons to 10,000 physicians; only 40 percent of the population has access to potable water; and 85 percent of adults are illiterate.

On November 8, 2001 the Congressional Black Caucus, in its entirety, sent a letter to the President requesting to speak with him regarding this vital issue. We have not yet heard any response. Mr. President, we need to hear from you. We need to end the suffering of millions of innocent individuals, we need to continue to be the standard bearer in foreign policy. We must not waiver in our ability to look beyond our political differences and move forthrightly to help those in need.

Mr. President, we must ask, "Is the U.S. comfortable withholding these much needed Inter-American Bank loans from the millions of suffering Haitians in order to punish the Government of Haiti, especially at a time when the U.S. continues to aid other countries who have shown themselves to be much more villainous than Haiti?"

I think not, at least, I hope not.

IN REMEMBRANCE OF CARMELITA
ZAMORA

HON. JOE BACA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. BACA. Mr. Speaker, I rise in the memory of my beloved Aunt, Carmelita Zamora and in commemoration of the close of an important history.

Hers was a quiet life, and yet she played the central role in the life of her family. Her story began in Punt de Agua, New Mexico, on June 23, 1916. Carmelita Zamora left a legacy of nine children, 24 grandchildren and 34 great-grandchildren when she died on November 26, 2001. A loving and joyful memory survives her.

They say a person is measured by the lives she touches. Through the grace of God, Carmelita touched the hearts and lives of many. She touched the lives of her loving children Jake, Abram, Philip, Eugene, Lawrence, Wilferd, Edwina, Alice and Maryanne Peggy. She touched the lives of 24 grandchildren Diana, Mary, Mario, Laura, Donna, Carol, JD, JJ, Mark, Sophia, Dominic, Adonis, Valerie, Ricky, Jennifer, Anthony, Christopher, Jessica, Candace, Angel, Eloisa, Penny, Ermogenes, Lisa Marie and of 34 great-grandchildren.

Carmelita touched their lives in her very special way. Born the oldest of five siblings, Carmelita had two brothers and two sisters. When she was not yet a teenager, Carmelita developed the instincts of protector, caregiver and mother. Her own mother became ill, so Carmelita was forced to discontinue her elementary school education to care for her young siblings.

Carmelita began a new chapter in her life on March 11, 1935, at 20 years old, when she met and married Ernesto Zamora. In 1951, Carmelita and Ernesto would move the family to Wyoming before moving back to the Southwest. In July of 1957, Carmelita and her family arrived in Barstow, California where she would live for the remainder of her life. Those remaining years would be spent filling the pages with memories.

Carmelita was talented and creative. Her children proudly remember her ability to sew

clothes and never use patterns. They swear that had she been born at another time and under easier conditions she would have been a famous fashion designer. Many memories stem from this talent of hers. Carmelita's son Abram fondly remembers a pair of new overalls she made him for school. They were so fine that when Abram arrived at school, all the other children begged for a pair of their own. Her granddaughter Penny treasures memories of spending time with her grandmother, talking while they washed clothes or while Carmelita sewed blankets. Carmelita even spoke of life lessons in terms of clothing. "It doesn't make any difference if you are poor," they remember her saying. "It doesn't matter if your clothes have patches as long as your shoes were shined and your clothes clean. That's all that matters."

Her son Gene fondly recalls receiving such advice from his mother every Monday night during their weekly conversation. Those calls got him through his week. Whether they discussed her love for the sport of wrestling or she was providing advice for his day-to-day trials. She was the source of his strength all his life.

All Carmelita's legacies remember her as a very strong woman. Her daughter Edwina said, "She was there for me when my husband passed away at a very young age leaving me here with four young children. I couldn't have made it through without her love and strength."

She was there for all of her children in times of need. Forever a mother, she was responsible for getting many of them through very difficult times. She was a mentor and an unyielding resource. She never asked for anything but always wanted to give. She generously offered her advice and left it up to her children whether or not to take it.

Her grandchildren remember her not only as a source of strength but also a source of nourishment. Nourishment of the heart as well as the body. Granddaughter Lisa cherishes the time she spent with Carmelita watching soap operas or wrestling while eating cookies and drinking sodas. Eloisa similarly remembers her grandmother always wanting to feed them even if they were not hungry. "She liked to feed everyone."

This was because, as granddaughter Angel remembers, Grandma was the backbone of the family, she guided everything. She was a firm believer in God and always prayed to God to help the family in times of need. She also prayed to God for his blessings and in thanks for times of happiness.

Aunt Carmelita is irreplaceable and we will not live one day without remembering this kind and gentle woman. This tribute to her life, to her legacy and to her story will allow her memory to survive all of us.

And so Mr. Speaker, I submit this loving memorial to be included in the archives of the history of this great nation. For women like Carmelita are what make this nation great. Women like Carmelita leave a legacy of lives filled with love to all who knew her. She is the fabric from which our nation was created.

PAYING TRIBUTE TO KENNETH BAYLEY

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. McINNIS. Mr. Speaker, I would like to take this opportunity to recognize Kenneth Bayley of Eckert, Colorado and thank him for his contributions to this nation. Kenneth began his service in the military in 1939 as a member of the Army Air Corps, and in 1942, Kenneth was assigned duty to the 14th Bomb Squadron on the island of Mindanao in the Philippines.

It was on this island that Kenneth learned of the surrender of Corregidor by Allied forces, thus ending the Allied resistance to the Japanese invasion of the Philippines. Believing surrender was not an option, Kenneth, along with members of his squadron, escaped to the mountains and joined the resistance movement. For the next year the airmen and local resistance fighters of Filipino and Moro tribesman origin used guerilla warfare tactics to ambush and control Japanese troop movements throughout the island. Their resistance effectively contained 150,000 Japanese soldiers tasked with the defense of the island's airfield.

Kenneth then moved on to the island of Langan and joined a resistance group commanded by Wendall Fertig, another American who refused to surrender to the Japanese. As a member of the group, Kenneth was tasked with the operation of one of Fertig's many radio stations throughout the area. These stations' function was to send encoded messages concerning enemy strength and troop movements to Allied forces. Kenneth left the Philippine islands in late 1943, escaping aboard an American submarine bound for Australia. He returned to the United States and served in the Air Force until 1962, eventually retiring with the rank of Captain.

Mr. Speaker, it is a great privilege to honor Kenneth Bayley for his service to this country. He served this country selflessly in a time of great need. By refusing to surrender and continuing the fight in the face of enormous opposition, Kenneth Bayley has brought great credit to himself and his nation, and deserves this body's recognition.

DEPARTMENT OF DEFENSE APPROPRIATIONS ACT, 2002

SPEECH OF

HON. TED STRICKLAND

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 28, 2001

The House in Committee of the Whole House on the State of the Union had under consideration the bill (H.R. 3338) making appropriations for the Department of Defense for the fiscal year ending September 30, 2002, and for other purposes:

Mr. STRICKLAND. Mr. Chairman, as our Nation feels the effects of our current recession, and Congress discusses economic stim-

ulus package, we must insure we do all we can for the motor which drives our economy, the American Worker.

For much of the twentieth century, our great steel companies churned and poured out the material used to build our nation creating the skeletons of our battleships and skyscrapers. But since the 1990s, many of these once great companies have fallen victim to foreign competitors who dump cheap steel on the American market. This year domestic steel producers have been further affected by rising energy prices and a rising dollar exchange rate which favors foreign-based companies. More than two dozen U.S. steel producers have gone into bankruptcy, these include once giant companies such as Bethlehem, LTV, Republic and Wheeling Pittsburgh. Some mills have been forced to shut down entirely.

The Strickland, Stupak, LaTourette Amendment to the Defense Appropriations bill will help an American industry ailing from the effects of globalization. Steel is a vital part of the economy of my State of Ohio and our nation as a whole. It ensures that none of the funds made available in the Defense Appropriations bill can purchase equipment, products or systems which contain steel not manufactured in the United States. As a Congress we must make sure the dollars we spend to protect the security of America protect the job security and livelihood of the American Steel worker.

FIGHTING THE SCOURGE OF TRAFFICKING IN WOMEN AND CHILDREN

HON. CHRISTOPHER H. SMITH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. SMITH of New Jersey. Mr. Speaker, tonight I want to highlight our nation's efforts to fight, and hopefully end, the scourge of trafficking in women and children. Earlier today, International Relations Committee held an important hearing on the implementation of anti-trafficking legislation I authored, and which was signed into law last Congress.

As the Prime Sponsor of the Trafficking Victims Protection Act, H.R. 3244, I was pleased that our legislation attracted unanimous bipartisan support in both Houses of Congress, and was signed into law just over one year ago. We succeeded not only because this legislation is pro-woman, pro-child, pro-human rights, pro-family values, and anti-crime, but also because it addresses a horrendous problem that cries out for a comprehensive solution.

Each year as many as two million innocent victims—of whom the overwhelming majority are women and children—are brought by force and/or fraud into the international commercial sex industry and other forms of modern-day slavery. The Act was necessary because previous efforts by the United States government, international organizations, and others to stop this brutal practice had proved unsuccessful. Indeed, all the evidence suggests that the most severe forms of trafficking in persons are far more widespread than they were just a few years ago.

My legislation was designed to give our government the tools we believed it needed to eliminate slavery, and particularly sex slavery. The central principle behind the Trafficking Victims Protection Act is that criminals who knowingly operate enterprises that profit from sex acts involving persons who have been brought across international boundaries for such purposes by force or fraud, or who force human beings into slavery, should receive punishment commensurate with the penalties for kidnapping and forcible rape. This would be not only a just punishment, but also a powerful deterrent. And the logical corollary of this principle is that we need to treat victims of these terrible crimes as victims, who desperately need our help, compassion, and protection.

As the implementation of this important legislation moves forward, success will depend, in large part, on the development of a large coalition of citizen organizations that are out there on the streets helping these victims day in and day out. The problem is simply too big for any one, or even several, governments to tackle alone.

That is why I am so pleased to learn that outside advocacy and relief organizations are continuing to join the fight against human trafficking. Father Stan DeBoe, with the Conference of Major Superiors of Men, CMSM, is one such civic leader who deserves special recognition of his efforts, and the efforts of the CMSM. The CMSM, for those who are unfamiliar with their work, serves as the leadership of the Catholic orders and congregation of the 20,000 vowed religious priests and brothers of the United States. The CMSM is the voice of these Catholic priests and brothers in the U.S., and also collaborates with the U.S. bishops and other Catholic organizations which serve the Church, and our society.

I have included, as part of the RECORD, a recent resolution jointly adopted by the CMSM and the Leadership Conference of Women Religious, LCWR, on August 26 during a conference in Baltimore, Maryland.

Like all laws, however, this law is only as good as its implementation. And, frankly, I have been deeply concerned at the slow pace of implementation of the Trafficking Victims Protection Act. A year after enactment of this legislation, the State Department office—which is designed to be the nerve center of our diplomatic efforts to engage foreign governments in the war against trafficking—has only recently begun to get up and running. No regulations have yet been issued which will allow victims to apply for the visas provided by the Act. And many other important tasks remain undone.

I do not say this to complain or criticize—I know that many things move too slowly in the first year of a new Administration, and that since September 11 our attention and resources have been diverted elsewhere—but to emphasize that from now on, we do not have a minute to spare.

I should also say that I am profoundly encouraged by the fact that the Administration has been able to recruit Dr. Laura Lederer to bring her expertise and commitment to the State Department's anti-trafficking effort. Dr. Lederer is generally regarded as the world's leading expert on the pathology of human trafficking, and the Protection Project which she

headed has provided the factual and analytical basis for most of the work that has been done so far to combat human trafficking. Throughout the long process of consideration and enactment of the Trafficking Victims Protection Act, Laura was our mentor and our comrade-in-arms. I commend Under Secretary Dobriansky, for this important choice.

Finally, I want to emphasize the principles behind the Trafficking Victims Protection Act. I take second place to none in my commitment to workers' rights, but this is not a labor law and it is not an immigration law—it is a comprehensive attack on human slavery, and especially sex slavery. It emphatically rejects the principle that commercial sex should be regarded as legitimate form of "work."

I know that a number of officials in the previous Administration disagreed with the approach we took in this bill—and that many of these officials are career employees who still work in the government—but the Trafficking Victims Protection Act is the law of the land, and we now have a President who has made clear that he agrees with us on this fundamental question. So I hope and trust that in implementing the law—in making grants, in staffing offices and working groups, in seeking partners and advisors in this important effort—this Administration will rely on people who fully support the law they are implementing, rather than on those who never liked it and who may seek to evade or ignore some of its most important provisions.

What we need to make this law work are "true believers" who will spare no effort to mobilize the resources and the prestige of the United States government to implement this important Act and shut down this terrible industry, which routinely and grossly violates the most fundamental human rights of the world's most vulnerable people.

RESOLUTION OPPOSING TRAFFICKING IN WOMEN AND CHILDREN

STATEMENT OF RESOLUTION

LCWR and CMSM stand in support of human rights by opposing trafficking of women and children for purposes of sexual exploitation and forced labor, and will educate others regarding the magnitude, causes, and consequences of this abuse.

RATIONALE

1. At their May 2001 plenary session in Rome, the International Union of Superiors General, leaders of more than 780 congregations of women religious having a total membership of one million, endorsed a resolution opposing the abuse of women and children, with particular sensitivity to the trafficking and sexual exploitation of women. UISG resolved that this issue be addressed from a contemplative stance as an expression of a fully incarnated feminine spirituality in solidarity with women all over the world.

2. An LCWR goal is to work for a just world order by using our corporate voice and influence in solidarity with people who experience poverty, racism, powerlessness or any other form of violence or oppression. A CMSM goal is to provide a corporate influence in church and society.

3. The Platform for Action of the UN Fourth World Conference on Women held in Beijing, 1995, included the strategic objective to eliminate trafficking in women and assist victims of violence due to prostitution and trafficking.

4. Each year between 700,000 and 2 million women and children are trafficked across international borders, with more than 50,000 women trafficked into the U.S. (UISG papers)

CALL FOR SPECIFIC ACTION

1. Deepen our understanding of the realities of trafficking and its integral relationship with poverty, male dominance, and the globalization of trade.

2. Join with UISG as they call for specific days of international prayer, contemplation, and fasting to unite religious in prayer throughout the world.

3. Encourage education about trafficking, prostitution, and workplace slavery in sponsored schools, colleges, and universities and in adult educational ministries.

4. If feasible, collaborate in applying for federal funds from the Department of Health and Human Services in implementation of HR 3244 to provide services to victims of trafficking.

The Conference of Major Superiors of Men (CMSM) serves the leadership of the Catholic orders and congregations of the 20,000 vowed religious priests and brothers of the United States, ten percent of whom are foreign missionaries. CMSM provides a voice for these communities in the U.S. church and society. CMSM also collaborates with the U.S. bishops and other key groups and organizations that serve church and society.

The Leadership Conference of Women Religious (LCWR) has approximately 1,000 members who are the elected leaders of their religious orders, representing 81,000 Catholic sisters in the United States. The Conference develops leadership, promotes collaboration within church and society, and serves as a voice for systemic change.

PAYING TRIBUTE TO JOHN HENDERSON

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. McINNIS. Mr. Speaker, I would like to take this opportunity to pay tribute to the life and memory of John Henderson who recently passed away in Grand Junction, Colorado on November 17, 2001. John will always be remembered as a dedicated volunteer to the community. His passing is a great loss for a town that has relied on John for his strength and good nature in times of hardship and prosperity.

John was a dedicated member of the Platteau Valley High School family. He began his service as Assistant Head Coach for the football team. He then served as Athletic Director for the school, coordinating sports programs, games and events. This year John was promoted to Head Coach and just completed his first season. John loved football, not just for the sport, but because of the individuals he coached and inspired. He pushed the players to excel, but always ensured the enjoyment of the game was paramount.

John will always be remembered as a kind, compassionate man who was willing to give people a chance in life. This resonated on the

November 29, 2001

football field where John was always willing to give his players the opportunity to shine. He was a successful leader on the gridiron, and in the face of insurmountable odds encouraged his players to their best.

Mr. Speaker, John will be missed by many in this community. It has always been known that his greatest passion was his love and dedication to his family. It is with a solemn heart that we pay our respects to his family and friends, and to all those who were touched by John during his life. John Henderson dedicated many years to this community, and he will be greatly missed.

HAITI STATEMENT BY REP.
MAXINE WATERS

HON. MAXINE WATERS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Ms. WATERS. Mr. Speaker, Haiti is the poorest country in the Western Hemisphere. Yet the U.S. government is blocking aid to Haiti in order to expand the influence of a single Haitian political party. This party, known as the Democratic Convergence, is supported by less than four percent of the Haitian electorate.

Meanwhile, Haiti's population is facing a serious humanitarian crisis. Haiti's per capita income is only \$460 per year. Four percent of the population is infected with the AIDS virus, and 163,000 children have been orphaned by AIDS. Every year, there are 30,000 new AIDS cases. The infant mortality rate is over seven percent. For every 1000 infants born in Haiti, five women die in childbirth. Furthermore, there are only 1.2 doctors for every 10,000 people in this desperately poor country.

Not only has the United States suspended development assistance to Haiti, the United States is also blocking loans from international financial institutions such as the World Bank, the International Monetary Fund (IMF) and the Inter-American Development Bank. U.S. policy has effectively prevented Haiti from receiving \$146 million in loans from the Inter-American Development Bank that were already approved by that institution's Board of Directors. These loans are desperately needed by the people of Haiti.

It is time for the United States to end this political impasse and restore bilateral and multilateral assistance to this impoverished democracy.

EXTENSIONS OF REMARKS

**WTO NEGOTIATIONS AND TRADE
PROMOTION AUTHORITY**

HON. GARY A. CONDIT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. CONDIT. Mr. Speaker, as Congress continues to debate the Farm Bill, U.S. trade negotiations at the WTO Ministerial in Doha agreed that future trade talks would seek to limit domestic farm programs, including phasing out of forms of export subsidies and substantial reductions in trade-distorting domestic support. The decisions in Doha line up U.S. trade negotiators to eliminate U.S. farm programs as a chit in exchange for better overseas market access for U.S. banks and other service providers.

The negotiating goal of significantly reducing "trade-distorting" farm programs presents a real problem for Congressionally mandated farm programs. While U.S. negotiators have agreed to work towards phasing out all forms of export subsidies and substantially reducing trade-distorting domestic support, the House of Representatives recently passed H.R. 2646, the Farm Security Act. H.R. 2646 provides \$409.7 billion in market price support programs, loan deficiency programs and marketing loan assistance to struggling farmers for the next 10 year-farmers who are struggling in large part due to cheap, subsidized foreign imports and restrictive trade laws abroad.

If this hit on U.S. agriculture policy were not damaging enough, U.S. trade negotiators reopened our country's longstanding position against putting U.S. anti-dumping laws on the WTO negotiating table. These trade laws are farmers' last defense when countries dump below-cost commodities on the U.S. market. Yet, USTR agreed to immediate negotiations in this area, even though a long list of WTO countries including Brazil, Japan and Australia have stated clearly that their only purpose for seeking such talks is to weaken existing U.S. trade law.

While the Administration has opened the door for reducing domestic assistance to U.S. farmers and weakening anti-dumping laws, it is also pushing for Trade Promotion Authority from Congress. If TPA is granted, Congress loses its ability to influence the substance of agriculture negotiations. Under TPA, Congress cannot remove or amend offensive agricultural provisions, it can only reject the entire WTO negotiated pact. Under these conditions, American agriculture is at risk when negotiators are willing to compromise U.S. producers' interests in exchange for new market access for U.S. telecommunications firms, banks and other service providers in other nations.

While I fully appreciate the opportunities of a global marketplace for our farmers, it is irresponsible to oversell the benefits of free trade

23611

that is not fair. Agriculture remains in a precarious position for further WTO discussions. Congress must not relax its vigilance over trade deals that compromise American agriculture.

PAYING TRIBUTE TO GORDON
HARBERT

HON. SCOTT MCINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 29, 2001

Mr. MCINNIS. Mr. Speaker, I would like to take this opportunity to recognize an outstanding individual from Grand Junction, Colorado. Over the years, Gordon Harbert has distinguished himself as a business, community, and industry leader for Grand Junction. Gordon's dedication is impressive and it is my honor to recognize several of his accomplishments and good deeds.

Gordon is a third generation owner of Harbert Lumber Company located in Grand Junction. The company has served the community since 1937 and continues to provide quality products and service to the entire Western Slope of Colorado, Utah, and Wyoming. As an industry leader, Gordon serves on the Board of Directors of the Western Colorado Business Development Corp, and has created a new philanthropy role for Harbert Lumber business. In this role, the company has donated building materials and equipment to organizations such as Camp Kiwanis and the Salvation Army for much needed improvements and renovations.

Gordon has also distinguished himself as a leader in the community by volunteering his time and efforts to several organizations in the area. He created and served as Chairman of the Western Slope Golf Tournament for over a decade, only recently stepping down to take on new responsibilities. He is a great supporter of the Young Life's Christian Outreach program, and served as Chairman of the local Kiwanis Club. Gordon has also been actively involved with Mesa Developmental Services by providing woodworking equipment to create products for the organization to promote and sell in his store and to the community.

Mr. Speaker, Gordon Harbert's dedication led to his recognition in 1996 as Citizen of the Year by the Chamber of Commerce acknowledging his dedication to his employees, his community, and friends. It is now my honor to congratulate Gordon on his most recent and well-deserved award from the industry community, Lumberman of the Year, presented by the Mountain States Lumber and Building Material Dealers Association. Gordon has been a model citizen to the community and I extend my thanks to him for his efforts. Keep up the hard work Gordon and good luck in your future endeavors.

SENATE—Friday, November 30, 2001

The Senate met at 9:30 a.m. and was called to order by the Honorable HERB KOHL, a Senator from the State of Wisconsin.

PRAYER

The Chaplain, Dr. Lloyd John Ogilvie, offered the following prayer:

Dear God, in these challenging days, we remember Abraham Lincoln's words: "I have been driven many times upon my knees by the overwhelming conviction that I had nowhere else to go. My own wisdom, and that of all about me, seemed insufficient for the day."

Holy, righteous God, we sense that same longing to be in profound communion with You because we need vision, wisdom, and courage no one else can provide. We long for our prayers to be a consistent commitment to be on Your side rather than an appeal for You to join our partisan causes. Forgive us when we act like we have a corner on the truth and always are right. Then our prayers reach no further than the ceiling. In humility, we spread out our concerns before You and ask for Your inspiration. You have taught us to pray: *Your will be done on earth as it is in heaven.* Amen.

PLEDGE OF ALLEGIANCE

The Honorable HERB KOHL led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. BYRD).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, November 30, 2001.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable HERB KOHL, a Senator from the State of Wisconsin, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. KOHL thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE ACTING MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The Senator from Nevada.

SCHEDULE

Mr. REID. Mr. President, this morning the Senate will be in a period for morning business, with Senators permitted to speak for up to 10 minutes each. There will be no rollcall votes today. The next rollcall vote, the majority leader has asked me to announce, will be at approximately 5 p.m. on Monday. We could have a series of three votes on Monday beginning at 5 p.m. Everyone is reminded that there have been three cloture motions filed with respect to H.R. 10. All first-degree amendments must be filed prior to 1 p.m. today.

I stress that because the majority leader has asked me to announce we are going to go out of session at 1:15 p.m., the reason being the remediation that is taking place in the Hart Building today. The Dirksen Building will be closed this afternoon, and we want to make sure we are out of session before the closure of the Dirksen Building begins. Everyone should cooperate. We are not going to make a unanimous consent request to recess at 1:15 p.m. Everyone should understand that it would be tremendously inconvenient for the staff and everyone else if we went past 1:15 p.m. today. Everyone has hours to speak this morning if they wish. They should rearrange their schedule to speak. We would recess earlier, but because of the previous order entered, we want to make sure that is maintained and people can file their amendments prior to 1 p.m. At 1:15 p.m., we are going to have to recess the Senate.

MEASURES PLACED ON CALENDAR—H.R. 2722 and H.R. 3189

Mr. REID. Mr. President, I understand there are some bills at the desk that have been read the first time. They are H.R. 2722 and H.R. 3189.

The ACTING PRESIDENT pro tempore. The Senator is correct.

Mr. REID. Mr. President, I ask unanimous consent that it be in order en bloc for these two bills to receive a second reading, and I would then object to any further consideration of this legislation at this time.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. The clerk will read the title of the bills for the second time.

The legislative clerk read as follows:

A bill (H.R. 2722) to implement effective measures to stop trade in conflict diamonds, and for other purposes.

A bill (H.R. 3189) to extend the Export Administration Act until April 20, 2002.

The ACTING PRESIDENT pro tempore. Objection having been heard, the bills will be placed on the calendar.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, leadership time is reserved.

MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of morning business, with Senators permitted to speak therein for up to 10 minutes each.

The Chair recognizes the Senator from Rhode Island.

Mr. REED. Mr. President, I anticipate speaking a bit longer than 10 minutes. I ask unanimous consent to speak for so much time as I may consume.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

GUN SHOW BACKGROUND CHECK ACT OF 2001, S. 767

Mr. REED. Mr. President, I rise today to inform Senators of my intention to bring before the Senate at the earliest possible time an important piece of legislation that I introduced last April along with 21 of my colleagues.

Our bipartisan bill, S. 767, the Gun Show Background Check Act of 2001, would apply the Brady law to all firearms sales at gun shows, thereby closing the loophole that allows criminals to buy firearms from private sellers at gun shows without a background check. This legislation is identical to the Lautenberg amendment passed by the Senate on a bipartisan vote in the 106th Congress.

As long as gun violence continues to take the lives of 10 of our young people every day, and about 30,000 Americans every year, we must do everything we can to prevent convicted felons, domestic abusers, and other prohibited purchasers from gaining access to firearms.

It has been my intention to bring this legislation to a vote since its introduction last spring. We were asked not to offer the bill as an amendment to the education bill because it was one of the President's top priorities. We were asked not to offer it to the bipartisan campaign finance reform bill because it was non-germane. We were asked not to offer it to the bipartisan Patients' Bill of Rights because it was

a fragile compromise. We were asked not to offer it to the Defense authorization bill because of the critical importance of moving that legislation. Finally, we are barred by Senate rules from offering the amendment to the fiscal year 2002 appropriations bills moving through the Senate.

By not enacting this legislation, we have, unfortunately, overlooked one of the most effective tools we can give to law enforcement to prevent violent acts against our people, and that is the ability to conduct background checks every time a gun is sold at more than 4,000 gun shows held in this country each and every year. The time has come for the Senate to consider this legislation. It was important before September 11, and it is even more important today.

Here are the facts: The Bureau of Alcohol, Tobacco and Firearms reported to Congress last year that gun shows are a major gun trafficking channel, responsible for more than 26,000 illegal firearms sales during a single 18-month period. Gun shows are the second leading source of illegal guns recovered in gun trafficking investigations. The FBI and ATF tell us again and again that convicted felons, fugitives from justice, and other prohibited purchasers are taking advantage of the gun show loophole to acquire firearms.

Now, more and more evidence is emerging that terrorists also know the weaknesses in our gun laws. The Chicago Tribune reported on November 18 that among the ruins of radical Islamic safehouses in Kabul were computer printouts of Jihad training manuals that emphasized how easy it is to obtain firearms, and firearms training, in the United States.

Under the heading "How Can I Train Myself for Jihad," the manual says, "in other countries, for example, some states of the United States or South Africa, it is perfectly legal for members of the public to own certain types of firearms. If you live in such a country, obtain an assault rifle legally, preferably AK-47 or variations, learn how to use it properly and go and practice in the areas allowed for such training." The manual goes on to advise those training for holy war to join American gun clubs to sharpen their shooting skills, saying,

There are many firearms courses available to the public in the USA, ranging from 1 day to 2 weeks or more. These courses are good but expensive. Some of them are only meant for security personnel but generally they will teach anyone. It is also better to attend these courses in pairs or by yourself, no more. Do not make public announcements when going on such a course. Find one, book your place, go there, learn, come back home and keep it yourself. . . . Useful courses to learn are sniping, general shooting and other rifle courses. Handgun courses are useful but only after you have mastered rifles.

We also have new evidence of suspected terrorists using gun shows to

obtain weapons. On September 10, a jury in Detroit convicted Ali Boumelhem, a member of the terrorist group Hezbollah, on charges of conspiring to smuggle guns and ammunition to Lebanon. Mixed in with auto parts in a container bound for Lebanon, law enforcement authorities found a variety of weapons and accessories purchased at gun shows, including two shotguns, 750 rounds of ammunition, flash suppressors for AK-47s, and upper receiver for an AR-15 (the civilian version of the M-16), and speed loaders for 5.56mm ammunition.

Ali Boumelhem and his brother, Mohamad, knew the law well, and they exploited it over the years. Because Ali is a convicted felon and therefore prohibited from purchasing firearms under the Brady law, the confiscated weapons were purchased from licensed dealers at gun shows by Mohamad, who is not a felon. Mohamad was later acquitted of charges related to this illegal "straw purchase." According to the court record, he also threatened a confidential informant during the investigation, saying "If we cannot get you here we will take care of you in Lebanon."

The investigation also revealed that prior to November 1998, when the National Instant Criminal Background Check System was implemented under the Brady law, Ali Boumelhem did purchase several shotguns from licensed dealers at gun shows by lying on the required form about his felony conviction. He knew that prior to the establishment of the NICS, background checks were not required on long guns in many States. We may never know what became of those guns, and, more importantly in terms of the legislation I am discussing today, we will never know whether Boumelhem or his brother purchased guns from private sellers at these gun shows because there is no record of sale or background check required for sales by unlicensed sellers at gun shows, then and now. What we do know is that this Hezbollah member found a large selection of weapons there and worked the system to his benefit over time before finally getting caught. We need to close the gun show loophole so that we prevent illegal weapons purchases by terrorists.

In another case, the New York Times reported on November 13 that Conor Claxton, a man accused of being a member of the Irish Republican Army, testified in Federal court in Fort Lauderdale that he and his associates had gone to south Florida gun shows to buy thousands of dollars worth of handguns, rifles, and high-powered ammunition to smuggle to Northern Ireland.

The Times also reported that on October 30 in Texas, Muhammad Navid Asrar, a Pakistani man, pleaded guilty to immigration violations and illegal possession of ammunition. Authorities said that in the last 7 years Mr. Asrar

had bought several weapons at gun shows, including handguns and rifles. According to police in Alice, Texas, a Federal grand jury is investigating whether he may be linked to al Qaeda terrorists. The Times reported that he aroused the authorities' suspicion when he asked employees at his convenience store to take pictures of tall buildings and mail letters for him from Pennsylvania back to Texas.

I wrote to Attorney General John Ashcroft earlier this month to ask what steps the Department of Justice is taking to prevent terrorist attacks involving firearms, including firearms acquired at gun shows. I look forward to his reply. I also met with officials of the Department of Justice and ATF to discuss the role of firearms in their counterterrorism efforts. Let me say that although the Attorney General and I may not agree on many issues when it comes to the regulation of firearms, I believe we have a unique opportunity to work together to prevent violent acts by terrorists and others, without infringing upon the constitutional rights of law-abiding Americans. Not one single, solitary person who is not already prohibited from possessing firearms would be denied the right to purchase firearms by our gun show bill.

I know there are those who oppose any new gun laws. They have a right to that opinion, but what is their proposed alternative? Should we ignore the Jihad manuals and the cases of Ali Boumelhem, Conor Claxton, and Mohammad Asrar? Do any of us really know what the next terrorist attack will look like? I believe we have a clear responsibility to do everything we can to prevent terrorists from gaining access to firearms.

But even if we set aside the issue of terrorists' access to guns, this legislation is important to bring some sense to our gun laws and save American lives. The chilling reports this week of an alleged plot by students at New Bedford High School to kill large numbers of their fellow students and teachers reminded us that the threat of gun violence is still very real for our children and families.

Two years ago, after Eric Harris and Dylan Klebold killed 13 people and themselves at Columbine High School with weapons purchased from a private seller at a gun show, Democrats and Republican in the Senate joined together to pass the Lautenberg amendment to close the gun show loophole. The legislation I have introduced is identical to that Senate-passed amendment. Unlike other gun show bills, it would apply the successful Brady law to every gun sold at gun shows, without exception. As under current law, law enforcement would have up to three business days to conduct background checks on firearms sales. Our opponents will say that we're trying to shut down gun shows by imposing a

"waiting period" on gun sales that usually take place on weekends. But that is not the case. There is no "waiting period." The Brady law gives law enforcement up to 3 business days to complete a background check on a prospective gun buyer. In fact, most gun purchases are processed very quickly by the NICS system. The FBI clears 72 percent of gun buyers within 30 seconds. Another 23 percent are cleared within 2 hours. That means background checks are completed within 2 hours for 95 percent of prospective gun buyers. Nineteen out of twenty have a decision rendered in just 2 hours.

But what about that last 5 percent that takes longer than 2 hours? According to a recent GAO report, those gun buyers are more than 20 times more likely to be prohibited from possessing a weapon under Federal law.

For gun buyers in that last 5 percent, potentially disqualifying information often requires the FBI to access court records—which are typically not available on a weekend; indeed, typically not available until at least Monday morning—to ensure that the person is not a convict felon or fugitive from justice; those records have to be checked.

Yet other gun show bills would make exceptions to the Brady law, reducing background checks for many gun show sales to 24 hours, to avoid inconveniencing the people in that 5-percent category. I believe that would be a serious mistake. We must reject the notion that it is better to allow a criminal to get gun than to ask a small group of potentially high-risk gun buyers to experience a minor inconvenience. If anything, law enforcement needs more time, not less, to conduct background checks. The FBI reported last year that over an 18-month period, more than 6,000 firearms were sold to convicted felons and other prohibited buyers because the three business days allowed under the Brady law expired before law enforcement could provide a definitive response. These illegal firearms must then be retrieved by State and Federal officer, as dangerous scenario which no one wants to see repeated or multiplied. We are not proposing to lengthen the time for background checks, but clearly it would be a mistake to shorten it even further. Instead, we should do the right thing for both law enforcement and gun buyers and simply apply current law to all gun show sales. No law-abiding citizen will be denied the right to purchase a firearm under my legislation. As under current law, if the 3 business days expire before law enforcement identifies a violation that would prohibit the gun sale, the sale can go forward.

We are not trying to end gun shows, and we are not trying to deny any law-abiding American the right to purchase a gun. What we are trying to end is the free pass we're now giving to convicted felons when they can walk into a guns

how, find a private dealer, buy whatever weapons they want, and walk out without a background check.

In overwhelming numbers, the American people believe that background checks should be required for all gun show sales. The people of Colorado and Oregon confirmed this last fall when they approved ballot initiatives to close the guns show loophole. I want my colleagues to know that I will take every opportunity early next year to bring the Gun Show Background Check Act before the Senate for a vote. I urge my colleagues to support this legislation so that we can finally close the gun show loophole and make sure that convicted felons, domestic abusers, terrorists, and other prohibited persons do not use gun shows to purchase firearms without a Brady background check.

I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. AKAKA). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent the order for the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Alaska is recognized.

OPEN THE HART BUILDING

Mr. MURKOWSKI. Mr. President, I rise this morning on behalf of the residents of the Hart Building who have been dispossessed as a consequence of the anthrax incident. I am going to refer to a memorandum of November 27 to all Senators relating to the cleanup of the Senate buildings. The statement goes into some detail relative to procedure. It is from the Senate Sergeant at Arms and it outlines the activity that the various agencies—the Centers for Disease Control, Environmental Protection Agency, Federal Emergency Management Agency, National Institute of Occupational Safety and Health, and the FBI—are involved in in this process. It indicates the Environmental Protection Agency is the lead agency on the remediation—the cleanup—of the building.

It further states that in addition to the extensive environmental sampling, the team has—

... finished remediation of common areas in the Hart Building, including the atrium, walkways and the elevator in the Southwest quadrant.

That is the good news.

Post-remediation sampling results for those common areas are expected later this week.

That would have already passed.

Remediation of areas in the Hart Building which tested positive for trace amounts of anthrax is underway. EPA is in the process of detailing planning for the remediation of affected offices, including those of Senators Feingold, Baucus, Boxer, Corzine, Craig,

Feinstein, Graham, Lieberman, Lugar, Mikulski and Specter. EPA, the Sergeant at Arms, and the Secretary of the Senate staff will be discussing these plans with senior staff for the affected offices this week.

My understanding is those offices are in one core and Senator DASCHLE's office is the office where most of the spores were found.

They indicate that:

Senator Daschle's suite is being prepared for the application of chlorine dioxide gas.

I gather that may be going on sometime this weekend. But:

According to the EPA's plan, the cleanup of the Daschle suite would take place this weekend. The Dirksen Building and the Hart-Dirksen garage will be closed. . . .

That is evidently underway today.

I also note in here that:

Following the discovery of an anthrax letter addressed to Senator Leahy, environmental sampling of mail handling areas in both the Russell and Dirksen Senate Office Buildings was conducted on November 17th and 18th. The results of those tests were negative except for trace positive results in the mail handling areas of the offices of Senators Dodd and Kennedy. Those areas were cleaned up on November 24th and November 25th. . . .

So clearly they have satisfied themselves as to the adequacy of the cleanup of at least two offices, those of Senator DODD and Senator KENNEDY. They have indicated they will reopen for business November 26, which is the case.

The Dirksen mailroom has been remediated, but is not yet open for business. . . . Sampling of the off-site mail facility is . . . complete—

And so forth.

There is Medical information.

Mail: It suggested mail deliveries will start this week and we will have 5 to 6 weeks of back mail.

The interesting thing is it doesn't say a thing about when we are likely to get back in the Hart Building. It is my understanding the stacks within the Hart Building are separated and the area of greatest concern is still Senator DASCHLE's office. In discussing this with some people involved at a level that clearly they have access, a suggestion has been made that, since Senator DASCHLE's office is the area of concern now, they simply seal that off.

Then the conversation went into, how do you seal it off if you have the air ducts and air vents? Those can be blocked as well.

It is very inconvenient for those of us who are in the far stack, furthest away from the area of the incident. We have been advised that our offices are clean, but we can't go in. Yet they say the common areas now are clean.

In a meeting with EPA, I asked them if this was really something under consideration for a Superfund site. They looked at me rather startled, as if they hadn't thought about that, but it may be.

We have to have someone speak with authority. Frankly, the leadership here

is not as inconvenienced as those of us who are not in the leadership because they have offices here in the Capitol. But speaking for those of us who have been dispossessed for 5, going on 6 weeks, and every indication is another week or another 2 weeks, we do not seem to be able to get a conclusive decision on when we can get in, when they are going to be satisfied it is through—and somebody is going to have to sign off on this.

It seems to me they could simply seal off the office now that is demanding their attention, seal off that air-conditioning or cut that off mechanically—you can do it—and let us get into our offices so we can function. It is extraordinarily inconvenient. You can imagine walking out of your office and just having to leave everything there.

But the worst part of it is we had been in that building 3 full days, operating, after the envelope was opened in Senator DASCHLE's office.

So I urge those responsible to get together and, for Heavens' sakes, find a way to get us back into the rest of the building. If you have to seal Senator TOM DASCHLE's office, then go ahead and do it and get it completed.

I yield the floor to my good friend from Kansas. He and I are going to be with you for a while.

The PRESIDING OFFICER. Senator BROWNBACK from Kansas is recognized.

DAY OF RECONCILIATION

Mr. BROWNBACK. Mr. President, I appreciate the time to be able to address the body on a key issue we will be taking up for a vote on Monday. Before I do that, I would like to make an announcement of an activity in which the Presiding Officer and I have been directly involved. On December 4, Tuesday this next week, from 5 to 7, it is going to be a day of reconciliation, a time period in the Rotunda for Members of both the House and Senate sides. This is going to be a time for the leaders of the country to get together and pray for the Nation. It is going to be December 4, 5 to 7 p.m., just the leaders of the House, Senate, and administration. It will not be open to the public. I do hope Members can attend and be a part of that process and that ceremony. It is something the country used to do frequently and hasn't for a number of years. That will be December 4, 5 to 7 p.m., in the Rotunda.

ISSUES IN THE LOTT AMENDMENT

Mr. BROWNBACK. Mr. President, I would like to take a few minutes to speak in morning business on the issue of human cloning. On Monday, there will be a vote on the issue of the Lott amendment that contains the energy package that has been put forward by Senator MURKOWSKI, and the moratorium on human cloning, the 6-month

moratorium on human cloning that I put forward. Several colleagues have sponsored both of these amendments. It has been put together. There will be a cloture vote on this on Monday.

I am asking our colleagues to support us being able to get this issue before the body for a final vote, to vote for cloture on the Lott amendment so we can get this issue in front of the body and get it decided.

These are two critical issues. The issue of energy and our dependence on foreign oil sources is becoming more and more obvious to people around the country and around the world. We are just too dependent on other places, places that are not reliable suppliers to the United States.

Oil from Iraq, as Senator MURKOWSKI has talked about frequently, is certainly not a reliable supply to the United States. Yet we are dependent on it. There are growing questions about Saudi Arabia, about the reliability of Saudi Arabia and the oil resources from there. Clearly, we should be having an energy policy and an energy strategy to remove ourselves from some of the dependency, particularly in the Persian Gulf region, for our oil and natural gas supplies. We need to do this energy policy, and do it now.

HUMAN CLONING

Mr. BROWNBACK. Mr. President, I wish to particularly address the issue of human cloning and the part of the bill that puts forth a 6-month moratorium on human cloning. I brought up before this body several times this week a U.S. News & World Report cover story of this week about the first human clone. Advanced Cell Technology out of Massachusetts is now saying they have cloned the first human being.

We have to address this issue now or we are going to have to expect more stories such as this about the further development of human cloning before this body has spoken. The House has spoken and said they don't want to have human clones. They put forth a complete ban, and passed it by a large bipartisan majority, a 100-vote margin. The President said: Let's ban human cloning. We don't want to create humans for destructive purposes or for reproductive purposes in this fashion. He has asked for banning that. This body has failed to act.

That is why we are putting forward at this time this request for a 6-month moratorium: Time out; hold up, so we don't have moratoriums such as this while this body takes time to deliberate, hold the committee hearings, and do the things it needs to do to consider this issue. We are asking for a timeout moratorium for 6 months.

I want to make several points and cite various groups that are supporting the moratorium or even the entire ban-

ning of human cloning. I want to read some important articles which they have put forward. I will make several points over the following days, weeks, and months.

One point is that research cloning being sponsored by Advanced Cell Technology requires eggs to be harvested from a woman. Harvesting eggs is an invasive and dangerous procedure. Harvesting eggs from women means the use of super-ovulatory drugs, the use of which has been linked to higher risks of ovarian cancer. The risk is one, a woman can take for a variety of reasons; one of them being to help have children. However, women are being asked to incur this risk to "donate" their eggs solely for money. Women who sell their eggs to firms like Advanced Cell Technology will likely disproportionately be of women who are already somewhat disenfranchised, or of lower income. In fact, it is now known that Advanced Cell Technology paid \$4,000 to each woman who "donated" her eggs.

I would say that is probably more than a donation if you pay \$4,000 for the egg. I suggest if this doesn't qualify as exploitation of the disenfranchised for profiteering motives, I am not sure what does.

This is not just a pro-life or pro-choice debate. It is not that at all.

In fact, pro-choice feminist Judy Norsigian and biologist Stuart Newman recently commented in a Boston Globe column,

Because embryo cloning will compromise women's health, turn their eggs and wombs into commodities, compromise their reproductive autonomy and, with virtual certainty, lead to the production of "experimental" human beings, we are convinced that the line must be drawn here.

That is strong language. Experimental human beings, eggs and wombs turned into commodities, and compromising women's health.

Perhaps that is why this debate is not a debate, as someone suggested, on the issue of abortion. And perhaps that is why we have an interesting coalition forming of groups that are strongly opposed to abortion, groups that strongly support abortion, environmentalists, and others. The reason for the broad range of interest is that there is truly something about this issue which should concern all of us.

I would like to read a few of the articles appearing in recent months for the benefit of some of my colleagues. The first article is by Sophia Kolehmainen of the Council for Responsible Genetics, a pro-choice group chaired by Claire Nader. Claire is the sister of Ralph Nader, the Presidential candidate. She was actively involved in the Presidential campaign. This is what their group had to say about human cloning. This is the article they put forward. It is entitled "Human Cloning: Brave New Mistake."

It would be a mistake to develop and use cloning as a technique to replicate human beings. It is questionable whether and what benefits would be gained from the successful creation of a cloned human being, and whether they would justify the radical impact cloning would have on our society. Cloning is not just another reproductive technology that should be made available to those who choose to use it, but is an unnecessary and dangerous departure from evolutionary processes and social practices that have developed over millions of years. As with many other developments in biotechnology, some scientists and commentators are asking us to accept cloning of humans just because it is technically possible, but there are few good reasons to develop the technology, and many reasons not to develop it.

1. SAFETY CONCERNS

The most frequently stated argument against cloning is based on safety concerns. At this point in the process of experimenting with cloning, such concerns are important. The production of Dolly required at least 276 failed attempts. No one knows why most of these attempts failed and only one succeeded. From a technical viewpoint, cloning presents different obstacles in every species, since embryo implantation, development, and gestation differ among different species. Human cloning therefore could not become a reality without extensive human experimentation. Though 276 "failed" lambs may be acceptable losses, the ethical implications of any failed or only partially successful human experiments are unacceptable.

Some of their article I don't necessarily agree with, but I am reading through their arguments.

2. COMMODIFICATION

Cloning would encourage the commodification of humans. Though industrialized societies commodify human labor and human lives, the biological commodification involved in human cloning would be of a vastly different order. Cloning would turn procreation into a manufacturing process, where human characteristics become added options and children become objects of deliberate design. Such a process of commodification needs to be actively opposed. It produces no benefits and undermines the very basis of our established notions of human individuality and dignity.

3. DIVERSITY

Cloning would also disrespect human diversity in ethnicity and ability. Though it is, in fact, not possible to produce exact copies of animals or people, inherent in cloning is the desire to do so. The process of cloning would necessarily contribute to genetic uniformity by decreasing genetic variety. A society that supported cloning as an acceptable procreative technique would imply that human diversity is not important. Especially in a multicultural nation like the United States, where diversity and difference are at the root of our cultural existence, any procedure that would reduce our acceptance of differences would be dangerous. It is clear from the tensions that exist in our society that we should encourage processes that increase our appreciation for diversity among individuals, not working to remove differences.

Dr. Brent Blackwelder, president of Friends of the Earth, put forward a strong statement in opposition to human cloning. This is a pro-choice group which put forward a strong

statement in opposition to cloning for many of the same reasons that I have put forward.

There are other groups that are putting forward clear and convincing reasons why we should not do cloning. For those reasons and many others, I ask this body to take up the bill numbered 2505 on Monday, and vote for cloture on the moratorium prohibiting human cloning for 6 months. There is ample reason for us to have a moratorium for 6 months.

With that, Mr. President, I yield the floor.

THE PRESIDING OFFICER. The Senator from Georgia, Mr. CLELAND, is recognized.

THE RAILROAD RETIREMENT REFORM BILL, ENERGY LEGISLATION, AND ANWR

Mr. CLELAND. Mr. President, I rise today to address three issues on which we will be voting in the Senate on Monday: The railroad retirement reform bill, the comprehensive energy legislation, and the Arctic National Wildlife Refuge legislation.

First of all, I would like to express my support for the railroad retirement reform bill. As thousands of Georgians who have contacted my office in support of this legislation will state, action by the Senate on this legislation is long overdue. I was pleased to support the cloture vote that occurred yesterday to move to this legislation.

The House of Representatives passed this legislation more than once by overwhelming, bipartisan majorities, and the Senate version has 74 cosponsors, including my sponsorship. I think this bill should receive the same opportunity for a vote. Not only would current and former employees benefit from this legislation but also the widows and widowers of former employees.

This legislation is the result of a long effort by both industry and labor to reform the railroad retirement system. Not often does Congress have the opportunity to vote on a cooperative effort supported by virtually everybody affected in the industry. We have that opportunity now. We should take advantage of it. We would be remiss to ignore it and not support it.

We have heard from the small numbers of Senators who threaten this bill's ability to make it to the President's desk. These same colleagues joined me in support of a tax break package earlier this year which cost more than \$1 trillion. At that time, we supported the tax legislation because of the potential economic stimulus it could provide. I say reforming the railroad retirement system will also provide such stimulus by freeing up funds that could be reinvested in the economy by the over 1 million active and retired rail workers and their families and the rail companies.

This country exploded as the railroads moved west. It was the physical incarnation of manifest destiny. Since the time these initial courageous workers linked this country, hundreds of thousands of workers have followed in their footsteps to maintain and expand their work. These workers and their families would benefit from this legislation.

I urge my colleagues to join me in support of this legislation and provide long overdue reform to the railroad retirement system.

However, this railroad retirement bill is not the appropriate vehicle to address comprehensive energy legislation. It is essential that we pass a comprehensive energy bill that, No. 1, provides consumers with affordable and reliable energy; No. 2, increases domestic energy supplies in a responsible manner; No. 3, invests in energy efficiency and renewable energy sources; and, No. 4, protects the environment and public health.

The inclusion of renewable energy sources is vital because I believe energy sources, such as wind, geothermal, solar, hydropower, and biomass, along with energy-efficient technologies, will help offset fuel imports, create numerous employment opportunities, and actually enhance export markets.

Finally, I would like to address my particular concerns about opening up the Arctic National Wildlife Refuge to oil drilling.

Earlier this year, my colleagues who supported ANWR drilling argued that U.S. gas prices were out of control and therefore ANWR needed to be drilled immediately. Since then, gas prices have fallen dramatically, despite the war in Afghanistan. In fact, over the Thanksgiving holiday, I returned to Georgia and I routinely saw gas prices in Georgia substantially below \$1 a gallon. As a matter of fact, I did see some prices at 76 cents a gallon. Those prices have not been seen at the pumps in more than a year.

Since September 11, the price per barrel of oil has dropped \$12 to the current price of \$18 per barrel. ANWR does not need to be drilled but rather protected so generations from now can see its beauty as we see it today.

I will support efforts to protect ANWR from drilling, and I urge my colleagues to do the same.

Mr. President, I yield the floor.

THE PRESIDING OFFICER. The Senator from Connecticut, Mr. LIEBERMAN, is recognized.

DRILLING IN ANWR

Mr. LIEBERMAN. Mr. President, I come to this Chamber—and I am pleased to do so after the excellent statement by my friend and colleague from Georgia—to speak about the addition of the House energy bill to the railroad retirement bill before us. This

amendment is the wrong amendment offered at the wrong time.

The House energy bill, with all due respect, is, in my opinion, an unwise proposal that was written really for a different time, as Senator CLELAND's remarks not only suggest but illustrate quite specifically. The bill proposes to open the Arctic Refuge for drilling, which is bad environmental policy and bad energy policy.

We will soon have the opportunity to give our Nation's long-term energy strategy the thoughtful consideration that it deserves and that the American people deserve. I look forward to the introduction by the majority leader, soon, of his balanced, comprehensive energy bill, and I look forward to debating it when we return after the first of the year.

We should not be attempting to pass such significant legislation dealing with so fundamental and complicated a problem as America's energy needs and systems in such a summary fashion as an amendment to a bill of this kind. We should, and I am confident will, give it the thorough, thoughtful, balanced debate after the first of the year.

We owe it to the American people to determine whether the measure before us is a responsible and responsive solution to our energy needs or simply a distraction. To determine that, we do not need to hold up pictures of baby caribou or mother polar bears, although I find those pictures not only attractive but moving. We only need to ask a very businesslike question: What do we gain and what do we lose from drilling for oil in ANWR?

I think, when we work that question back dispassionately to an answer, we see the error of the proposal to drill in the Arctic Refuge that is before the Senate today and will be voted on on Monday, procedurally at least.

I can tell you what we gain in probably less than a minute. It would take days to catalog what we lose. I am prepared, if necessary, if the occasion arises, to take days to talk about and catalog what we will lose as a nation if we drill in the Arctic Refuge.

So let me start with what I believe, in fairness, we would gain.

Even if oil companies started drilling tomorrow in the refuge—which, of course, is never going to happen that quickly—even if we mistakenly adopted this legislation, it would take at least 10 years for any crude to be delivered to refineries. The U.S. Geological Survey estimates there is, at best, a 6-month supply of economically recoverable oil—a yield that would be spread over 50 years.

What are the costs?

The visible damage, of course, would be substantial: An environmental treasure permanently lost, hundreds of species threatened, international agreements jeopardized, oil spills further endangering the Alaskan land-

scape, and an increase in air pollution and greenhouse gas emissions, among other costs.

The unseen damage of drilling would be just as real: A nation lulled into believing it has taken a step toward energy independence—arguably, by its supporters, a large step—when, in fact, it has done no such thing; a nation believing it is extracting oil in an environmentally sensitive way, when, in fact, no methods have been discovered that can avoid damage to this beautiful, untouched wilderness area of America; all in all, the American people misled on a host of critical issues. Finally, this plan would threaten something even more precious than what I have mentioned; that is, some of our most treasured American values, including the fundamental American value of conserving, conservation, conserving what the Good Lord has given us in natural treasures in the 50 American States.

The first claim that my colleagues make is that drilling in the Arctic is a necessary part of a balanced, long-term energy strategy. But, respectfully, calling this part of a strategic energy plan is as if to call crude oil a beverage; it is literally and figuratively hard to swallow. This ill-considered plan will do nothing to wean us from our dependence on foreign oil.

Drilling in the Alaskan national wildlife refuge is, in fact, a pipeline dream, a decision that will produce just a slight uptick in our oil production 10 years down the road and at considerable cost to our environment, our values, and our policies. It will create far fewer jobs than dozens of smarter alternatives which depend on American technology and American innovation and American industry.

The much quoted study indicating that Arctic drilling would result in 750,000 jobs has since been widely discredited. Even its authors have acknowledged that its methodology was flawed. Now the agreed-upon job creation figure is much closer to 43,000, and all of those jobs are short term, as opposed to the permanent jobs that would be created through the development of other alternative, innovative forms of energy, including conservation.

This plan also does not move us one step closer to the very valuable, critical goal of energy independence. First, it will take at least a decade to bring to market any oil that might be discovered in the refuge, making it useless in the context of the current international crisis. Incidentally, there is a conservative estimate from the Department of the Interior during the administration of former President Bush that has since been reiterated by many people, including oil industry executives, and that is the 10-year lead-in time.

Secondly, we should realize that Alaskan crude oil is not shipped east of

the Rocky Mountains, meaning that none of this oil is refined into home heating oil that is used in the entire Northeast and other parts of Middle America. Further, oil supplies are not needed for the production of electricity. Nationwide, only 2 percent of electricity is generated by oil.

Finally, let's realize that increasing our dependence on oil as a source of energy is no way to wean ourselves off foreign oil in the long run. The statistics repeated frequently make it clear that we cannot drill our way into energy independence. The United States uses about 25 percent of the world's oil but possesses only 2 percent of its reserves. So the way to energy independence is clearly through conservation, through using less than 25 percent of the world's oil and for the development of new technologies that will provide genuine energy independence.

The most important step, of course, we can take is reducing oil use in the transportation sector, which is responsible for over two-thirds of the oil consumed in the United States, and it is climbing. We can do that with technological methods that are in reach. Many of them are in our grasp already in our vehicles.

Arctic Refuge oil is simply not the most secure source of energy for the Nation. Of course, I am not suggesting that those who support drilling in the refuge are in any way neglecting our Nation's energy security. None of my colleagues would say that of those of us who oppose drilling in the Arctic Refuge. We all agree that we want to achieve energy independence and greater energy security. Our difference is about the methods and means for doing so.

At the same time, we have to realize the irony of the present situation. Just as we enter an age of heightened awareness regarding potential security risks at our nuclear plants and our other energy production centers, many Members of Congress are set on pursuing an alternative that, on top of its other liabilities, happens to be less secure than many other options. They are more difficult to secure than many other options. The fact is that the 25-year-old Trans-Alaskan Pipeline itself is vulnerable to disruption. More than half of it is elevated and indefensible. It has already been bombed twice years ago and shot at more recently. And the pipeline today is beset with accelerated corrosion, erosion, and stress.

There is, of course, one other critical reason we oppose this plan, and that is the damage it will do to the Arctic Refuge itself. We should not countenance such a blatant broadside on one of the jewels of America's environment. This threat, to me, is made even more frustrating by the claim that supporters of drilling have made that the refuge can be opened up to oil exploration in an environmentally sensitive manner. The

Coastal Plain of the Arctic Refuge is known as the American Serengeti. It is inhabited by 135 species of birds, 45 species of land mammals. The plain crosses all five different eco-regions of the Arctic.

It is a very beautiful picture—until you add oil exploration. I urge my colleagues to look very carefully at the suggestion that the result of oil drilling in the refuge would just be a small blemish on the grand landscape of the refuge—a little worm hole on a nice red apple. First, there will be a series of blemishes—dozens of holes that will be connected together by roads, pipelines, and other infrastructure; spidering out from these blemishes would be an elaborate additional infrastructure of roads, pipelines, air strips, and processing plants.

The web would almost certainly include permanent facilities, such as roads, airstrips, docks, staging areas, central processing facilities, gathering centers, compressor plants, seawater injection plants, gas processing plants, power stations, guard stations, housing and maintenance facilities, utility lines, garbage disposal sites, gravel pits, and more. In the end, it would make a terrible change in this refuge.

Mr. President, the House bill, as you know, limited development in the refuge to 2,000 acres. But it is critically important for my colleagues to understand that that figure expressly excludes roads and pipelines and fails to define the acreage as contiguous. So the illusion of minimal impact is just that; it is an imaginary landscape painted in oil.

Quite simply, we are forced to make a choice between this magnificent piece of America and its preservation for all the generations that will follow us as Americans and the development of this refuge for oil. I have made mine, and I believe the American people support it. Why? Because conserving our great open spaces is fundamentally an affirmation of our core values.

Conservation is not a Democratic or Republican value; it is a quintessential American value. The ethic of conservation tells us that it is not only sentimentally difficult to part with beautiful wilderness, it is practically unwise because in doing so we deny future generations a precious piece of our common culture.

Let's remember, in the aftermath of September 11, that most Americans have been stepping back and asking themselves what is important, what do we value. I believe that millions of our fellow Americans have, among other things, come to the conclusion, alongside family and faith, that they value America's great natural resources.

Let me recall, finally, the words of the great President Teddy Roosevelt, who, back in 1916, seemed to understand this issue very clearly. He wrote:

The "greatest good for the greatest number" applies to the number within womb of

time, compared to which those now alive form but an insignificant fraction. Our duty to the whole, including the unborn generations, bids us to restrain an unprincipled present-day minority from wasting the heritage of these unborn generations. The movement for the conservation of wildlife and the larger movement for the conservation of all our natural resources are essentially democratic in spirit, purpose, and method.

I could not say it more eloquently or more directly than the great TR.

I thank my colleagues. I hope they will vote this amendment down and we will return to a full and wholesome debate of our energy policies after the first of the year.

I thank the President and yield the floor.

Mr. MURKOWSKI. Mr. President, I wonder if I could enter into a colloquy with my friend from Connecticut.

The Senator from Alaska would inquire whether the Senator from Connecticut has ever been invited up to the area by the Native people of Alaska and the residents of Kaktovik who are in a position where they have 95,000 acres of their own land. They have the village of Kaktovik, and they don't even have the authority to drill for natural gas to heat their homes.

I noted in the presentation from the Senator there was no reference to the interest of the people who live in the area. And for his edification, we have pictures of those communities and those children and the hopes and aspirations of those individual Alaskans who are looking for a better way of life, looking for alternative jobs, better health standards, and better education, and it seems to me that we ought to have some concern for their livelihood.

They support opening this area. Yet all the emphasis seems to be on the environmental issues associated with ANWR. It appears in almost every presentation we have heard on the other side of this issue that the needs of the people are overlooked.

This is a picture of the town hall in Kaktovik. We have children on a snow machine and a bicycle. The point of these pictures is that there are real people living there. There is very little consideration given to their wishes or views.

These are the kids going to school. You notice that they are Eskimo children. They, too, have hopes and aspirations.

Now, if I can show you the next chart, perhaps my friend who has never been there can understand this area over here. This undeformed and deformed area consists of 1.5 million acres of ANWR. Now I know the Senator knows there are 19 million acres in ANWR. So this is the only area at risk. But as you see over here, this is the 95,000 acres that are owned by the Natives of Kaktovik, but they are precluded; they have no access.

Now, I would ask the Senator if that is a fair and equitable solution to keep

any American citizen bound, if you will, by Federal restrictions that don't allow them to develop their own land.

Mr. LIEBERMAN. Mr. President, in responding to my friend and colleague from Alaska, it is my conclusion that the Native peoples of Alaska are of mixed opinion on this question of drilling for oil in the Arctic refuge. We have certainly heard testimony here in the Senate from differing points of view. I hear what the Senator said about this group of Native people. Obviously, we have heard very eloquent testimony from representatives of the Gwich'in people in the area who have made a different choice and want to preserve what they have described as part of not only the beauty of the environment but part of their spiritual heritage as a source of life in that area.

So I would say my judgment is that opinion is mixed, and my opinion is that, having made this choice, it would be a shame to have to do the damage that oil exploration would do to the refuge to find adequate and uplifting employment for the people to which the Senator from Alaska refers. There ought to be a better way.

Mr. MURKOWSKI. I would certainly agree there ought to be a better way. Perhaps the Senator is not aware of the public opinion on this issue and how it has changed rather dramatically.

This is a poll that was done by IPSOS-Reid firm, well-known, and the highlights of the poll indicate 95 percent of Americans say Federal action on energy is important, and 72 percent say passing an energy bill is a higher priority than any other action Congress might take. Seventy-three percent of Americans say Congress should make the energy bill part of President Bush's stimulus plan, and 67 percent of Americans say exploration of new energy sources in the United States, including Alaska's Arctic National Wildlife Refuge, is convincing reason to support passing an energy policy bill.

I would be happy to provide this to the Senator from Connecticut because I think it provides some reality of the interests of our State in reference to development possibilities. Connecticut is a developed State, in population and land patterns, and so forth. But if you had had an opportunity to visit Alaska you would get some idea that we are a pretty big hunk of real estate. We have 365 million acres in our State.

When you use the phrase "this huge area at risk," I think you are being a little incomplete in your reference to what Congress has already restricted in this area. The ANWR area is 19 million acres. That is the size of the State of South Carolina. If you look at the map, you will see where it is as far as its makeup in comparison with the entire State. But what we have done, what Congress has done I think is a pretty good job of conservation. Out of the 19

million acres, they have made 8½ million acres into a wilderness in perpetuity, and they left this other area untouched by Congress when they set aside the coastal plain specifically for determination back in 1980 because of the prospects for major oil and gas discoveries. Now the footprint here, as you indicate in your statement, under the current bill, H.R. 4, is 2,000 acres. That is not very much. But when you indicate "all this development", this is written obviously by some of the environmental groups, and they are very much opposed to this because we have an infrastructure already built, 800 miles of pipeline.

If the Senator from Connecticut had been here and debated the issue of whether or not to open up Prudhoe Bay, we would be dealing with exactly the same issues, only some that are more complex, because the concern was: What happens when you build an 800-mile pipeline across the breadth of Alaska? Are the animals going to cross under it, over it, or will there be a fence? Will it be a hot pipeline? In permafrost? Will it melt, and so forth?

This pipeline is owned by the three major oil companies in the country: Exxon, British Petroleum, and Phillips Petroleum. It is in their best interest to keep it up. So these allegations that somehow this is unsafe—they continually maintain it. As you know, in any industrial activity, there is a certain amount of wear and tear, and so forth. But it is one of the construction wonders of the world. It is already in. So this infrastructure you are generalizing is not going to occur.

You have the airport here in Kaktovik. You have the residents there, but the technology is different currently because we use ice roads. We don't use permanent roads. That is the technology that is developed. This picture shows the kind of ice road that we do in Alaska. We do it all in the wintertime. As consequence, there is no gravel. Most of the pipeline construction that will take place will be on the surface. But if you look at the compatibility of what happens with the pipeline, it is very friendly to some of the wildlife.

I think the Senator from Connecticut perhaps has seen this. This is a picture of Prudhoe Bay, and these are not stuffed animals. They are real. Here is another one relative to what the bears are doing to the pipeline. It beats walking in the snow.

So a lot of these generalizations are exaggerated. What is not exaggerated is there is no sensitivity to the residents of the area. To suggest somehow the Gwich'ins, who are a population based mostly in Canada, are opposed entirely to oil and gas exploration is a bit extreme. Three-quarters of the Gwich'ins live in Canada, and the Gwich'ins in Canada have developed a corporation and are now drilling on

Gwich'in land in Canada, and the Gwich'ins in Alaska for the most part are funded by the Sierra Club in their efforts to terminate this. I have copies of the leases they signed. The Native village of Ekwok—which is adjacent to the route of the Porcupine caribou—they have sold their own leases for oil and gas exploration in Alaska. They are looking for jobs as well. There is more to this than meets the eye.

I wonder if the Senator is aware that the Gwich'ins have leased their land previously in Alaska, and they leased it specifically for oil development back in, I think it was 1984?

Mr. LIEBERMAN. Mr. President, I had not heard that, of course, but I am glad to pursue the question. What I have heard is the very fervent and, I found, compelling testimony of the Gwich'in people who have come to Congress to speak to us against drilling in the refuge.

I will say a few words in response, if I may, to what the Senator from Alaska said. Alaska is a big piece of real estate. I believe those were the words used. Connecticut is a small piece of real estate. It is more developed, although the last time I looked, more than two-thirds of our State of Connecticut and the great popular sentiment in the State was to limit development, to preserve those natural spaces. For the same reasons, there is a national movement of support for preserving the great, very unusual, natural spaces in Alaska.

I say also, from the experts I have talked to, the area involved is really unique. The coastal plain is the biological heart of the whole refuge. So it has to be given a special status.

I quote from the U.S. Fish and Wildlife Service, that the effects of disturbance and displacement of the Porcupine caribou herd are likely to occur more rapidly and at a much greater scale if oil development is allowed in the refuge. The accumulative effects of reduced access to the coastal plain habitat caused by industrial development would be a major adverse impact on the herd. Notwithstanding the pictures we have seen, that is the expert judgment given in a letter to our colleague from Illinois, Senator DURBIN.

Finally, most every poll I have seen still shows American public opinion opposed to drilling in the refuge, even at a time when concern about energy has risen. I suppose this gets to a point that sounds like the old line about economists, that if you lay them end to end across the world, they would not reach a conclusion.

I will present other polls. The most recent I have seen taken by the Mellman Group, based on a national survey of 1,000 U.S. voters that was conducted in early October, found that 57 percent of Americans did not believe drilling in the refuge would reduce our dependence on foreign oil. An inde-

pendent poll taken by Gallup from October 8 to 11 showed a majority of Americans, 51 percent, opposed oil exploration in the Arctic National Wildlife Refuge.

Beyond the polling, as I said earlier, to me this is a matter of national principles, national values, national policies, what makes common sense in terms of achieving energy security and energy independence, energy efficiency, which my friend from Alaska and I, and I presume all Members of the Senate, have as common goals.

While public opinion is significant—and I am glad, according to the polls I cited, it is on our side in the debate—about whether to drill in the Arctic Refuge, ultimately I think we all have to make our judgment about what is best for our country. My judgment is that drilling in the Arctic Refuge for oil would not be best for our country.

I apologize to my friend from Alaska that I have a previous commitment and I have to leave. I have a feeling we will return to this debate again after the first of the year and probably at length. I have great respect for the Senator from Alaska, so I look forward to that debate. Hopefully the result will be more knowledge and perhaps even a bit of wisdom.

Mr. MURKOWSKI. I appreciate the comments. I can assure the Senator from Connecticut that the Senator from Alaska intends to bring this matter up to a vote, as does my Senate colleague, Senator STEVENS.

The frustrating thing is we are always put in a position of having to identify with detail and rationale the reasons we believe the 1002 Area could be opened safely. Of course, we come from the State and we know something about the State and the factual information. What we have attempted to do over the years is to encourage Members to come and see for themselves so they can make a fair evaluation, because the action taken by the mass will determine what happens in our State.

It seems to put us in a position where what is best for Alaska and what is best for our constituents based on what they tell us they want is somewhat overridden by the dictate of those outside the state. We happen to be the only State still under development. We came in with Hawaii, but obviously we are a State with huge resources. We have 56 million acres of wilderness in our State. I think somebody figured out how much oil there is in ANWR and the comparison of whether it is a viable supply. They did a calculation, and based on 10 billion barrels, it would amount to a supply for Connecticut for 126½ years.

I see my colleague has had to leave to take a phone call, but I am going to be answering throughout the day some of his generalizations because, frankly, they do not hold water, and they certainly do not hold oil. He indicated a

willingness to proceed on a very studied and timely process he hopes will be reflected in the bill we understand is coming down, not from the chairman of the Energy and Natural Resources Committee but, rather, from the majority leader.

We have been working on this legislation in committee for several years. We have held extensive hearings. So it is not something that has not had a great deal of forethought, has not had a great deal of consideration. It was removed, through the dictates of the majority leader, from the committee of jurisdiction. It has been taken away from the committee, and whatever bill we will be seeing will not be representative of a bipartisan effort but strictly the result of Senator DASCHLE and I assume others on their side of the aisle. So we will be right back in the same position we were on the Finance Committee relative to the manner in which the stimulus package was submitted. It was submitted on one side, and the Republicans had no input into it.

The point is this Nation needs a policy, regardless of what poll we see, on the issue of national energy security.

There is virtually total support we should have an energy bill.

Now the merits of ANWR obviously get us into a discussion, but we believe that dramatically there has been a turnaround in public opinion. One of the reasons that turnaround has occurred is the realization of what happened off Iraq a few weeks ago where we were boarding a tanker. We had the U.S. Navy inspecting the tanker for the specific purpose of determining whether Saddam Hussein was exporting oil above and beyond that of the guidelines of the U.N. They boarded this ship. The ship sank. Two American sailors died. That might not have been necessary had our previous President not vetoed a bill in 1995 that would have allowed the opening of ANWR because that did pass this body in 1995.

These are what ifs, I know, but nevertheless, to suggest somehow we cannot do this safely is basically incorrect. That we would not get oil for 10 years is totally incorrect. We will have oil within 18 months to 2 years because we only have about 60 miles of pipeline. To say it is a 6-month supply is not accurate because that would presume no other domestic production anywhere in the U.S., and no imports of oil. Under what realistic circumstance would all other oil production be terminated in the United States as well as imports coming in? ANWR is estimated to hold between 5.6 and 16 billion barrels. If it is half that, it will be as large as Prudhoe Bay, which has supplied this Nation with 25 percent of its oil for the last 27 years. Many of the opponents who are going to speak against this have not been up there. They have not met with the Native people who are affected. Our people in Alaska, as Amer-

ican citizens, deserve that consideration.

I yield the floor.

The PRESIDING OFFICER. The Senator from Florida is recognized.

THE ECONOMIC STIMULUS PACKAGE

Mr. NELSON of Florida. I thank the Senator from Alaska and I thank the Presiding Officer, the Senator from Hawaii, who is kind enough to stay a couple of moments extra before I take the chair so that I might make a couple of remarks.

I compliment and encourage the bipartisan efforts among the leadership in meeting with the President to discuss how to best proceed on an economic stimulus package.

The efforts of those negotiators, in the framework set out last night whereby the top elected leadership of both parties in this Chamber will approach their efforts with the leadership in the House of Representatives and come to an agreement with regard to a stimulus package and taxes, is clearly a step in the right direction. We do need a stimulus package. We need it as soon as possible. We need it operative by the end of this year.

A few days ago, the National Bureau of Economic Research declared the U.S. economy has been in a recession since March. Some have responded to that announcement by saying since 6 months have already transpired, and since our average recession is typically less than 11 months, there was not a need to pass an economic stimulus package. They would say our economy at this point would likely recover on its own.

I disagree with those conclusions. That is why I think we ought to move ahead with a stimulus package. That has all the more been brought to light by virtue of the announcement made by the administration yesterday that indeed the surpluses we were counting on projecting over the next several years are not going to be there. In fact, the sad news was that we were going to be in deficit financing; that is, spending more in any one year than we have had coming in tax revenue.

How quickly things have changed. Just a few months ago we were still talking about the beneficence of projected surpluses over the course of the next 10 years and how we were going to be able to take care of a lot of the spending needs, including—this was prior to September 11—the increased defense costs that clearly were a priority, and still be able to have substantial tax cuts and preserve the integrity of the Social Security trust fund surplus so it was untouched. Therefore, that surplus was going to pay off the national debt over the course of the next decade.

Now all of that has been knocked in a cocked hat because of the slowed

economy, the lessened surplus projected over the next decade, and then because we enacted a huge tax cut, a tax cut that over 10 years was in excess of \$2 trillion. The effect of that has led to the present economic malaise and economic projections so that now the administration is saying we will have deficit spending over the next 3 years.

It is with a heavy heart suddenly we have to face these new conditions. It is all the more important to have a stimulus package. Clearly, in my State, the State of Florida, we are feeling the effects big time. We are feeling the effects big time also because of September 11, the fear factor out there of people not wanting to get on an airplane. I have said many times from this desk—and I fly every weekend at least twice—I think it is safe to fly. However, there are still a lot of people who do not think it is safe to fly. As a result, they will fly for business reasons, but they will not fly for leisure and vacations.

There are parts of this country that are highly economically devastated. One such place is the capital city of the State of the Presiding Officer, Honolulu. Another is the largest tourist destination in the world, Orlando, FL.

Another is Miami, with its robust cruise tourism business. Another is Las Vegas. We can look at the list of cities that as part of their economy are inextricably entwined with travel and tourism. We can see the economic devastation. When the leisure travelers are not flying, they are not getting into the hotels; when they are not getting into the hotels, they are not going into the restaurants, they are not going into the gift shops, and they are not going to the tourist attractions. As a result, we see the economic devastation.

As wartime conditions continue, we should expect to see a continued loss of tax revenue due to the precipitous drop in travel and tourism and the overall economic activity. While every State has been affected to some degree, and travel and tourism is one of the top 3 industries in 30 of our 50 States, clearly States such as the State of the Presiding Officer and my State of Florida have been uniquely impacted due to the significant presence of the tourism and aviation industries in those States.

For example, since the end of September, the average daily unemployment claims for Florida have risen by 55 percent, translating into approximately 50,000 more Floridians applying for unemployment benefits. That is mind-boggling. That is staggering.

The unemployment rate in Florida is expected to peak at 6.1 percent next summer. The latest State forecast anticipates 120,000 lost jobs by the end of June, with an additional 115,000 jobs lost in the following fiscal year. And that is only in one State, my State of Florida.

So these statistics show that we still need help, a tremendous amount of it.

As we speak today, Florida's State Legislature is meeting in the capital city of Tallahassee once again, trying to rewrite the State budget to make up for more than \$1.3 billion in lost revenue, while also trying to fund rising unemployment claims and skyrocketing assistance needs of those, the least fortunate among us.

So while it is entirely possible that we have already seen the worst of our economic drops—I certainly hope that is the case—the ramifications of these losses will be felt by Florida and many other States for many months and possibly for years to come.

There is no time to waste. We must pass a stimulus package as soon as possible. The substance of that package is clearly the very sticking point where we have substantive disagreement among lawmakers, not only in the Senate but at the other end of the hall in the House of Representatives. There is significant disagreement between that body and this body. Yet there are still many areas on which we can agree: increasing unemployment benefits, helping the unemployed maintain their health insurance, helping our States ride out a recession with fewer Federal spending cuts. At the same time, we must provide assistance to our smaller and medium-sized businesses, and to those sectors that have been hardest hit in these difficult times. Those are the things we can agree on, and we ought to come together in the stimulus package and make that happen.

Once again, I applaud the continued efforts of the majority leader and the minority leader, the chairman and ranking member of the Finance Committee, Senators BAUCUS and GRASSLEY, for sitting down again today to try to come up with an agreement. Once they come up with that agreement, then we can pass it. We can pass it before we adjourn. We can get it into law—the President has said he will sign it—and we can start to take care of our weakening economy.

MAJOR LEAGUE BASEBALL CONTRACTION

Mr. NELSON of Florida. Mr. President, we have another potential economic devastation in the State of Florida. Lo and behold, major league baseball has voted to eliminate two teams. The media reports suggest that four teams are on the short list of those that might be dissolved. Lo and behold, two of the four are from Florida—the Florida Marlins and the Tampa Bay Devil Rays—and the other two that are on the list of four are the Montreal Expos and the Minnesota Twins. If any of the four teams currently under consideration for elimination are dissolved—any of those four—the impact to Florida would be significant. Doing so, especially without input from the communities and the regions where the teams are based, would be a mistake.

Baseball made promises to communities in my State that were relied upon by individuals who then built businesses and other assets around the teams. Both Miami and Tampa Bay have invested millions of dollars and years of sweat equity in their teams. Hotels, restaurants, concession vendors, and other hospitality companies, already reeling from the September 11 tragedy, stand to take staggering losses if baseball fails to honor its obligations. Yet the league has completely shut them out of the process, keeping everyone in the dark. The owners got together and made these decisions. They didn't reach out to the communities and get their input.

Take, for example, eliminating the Minnesota Twins, which I suspect would have a great deal of interest to our Senators from the State of Minnesota, and the Montreal Expos, that would have considerable interest to the Senators who border that area. Let me tell you, that would be very troubling for Florida as well because both these teams have a significant minor league presence, and they have wonderful spring training facilities in the State of Florida. Their dissolution would have a direct negative impact on Lee County, which is Fort Myers and Palm Beach County, the city of West Palm Beach where the teams train and play. Many individuals and small businesses in these areas depend on the teams for their livelihood and would be irreparably harmed if the teams folded.

Florida's attorney general, my good friend, Bob Butterworth, explained the problem best when he said "the people of Florida are entitled to some straight answers about the future of major league baseball in this State." That is why I strongly support Attorney General Butterworth's decision to send investigative subpoenas to major league baseball. The people of Florida deserve to know what was said behind closed doors. I applaud the attorney general for taking action so we can get to the bottom of this problem and take whatever additional steps are necessary, including legal action to keep baseball in Florida for many years to come.

It is my understanding we are soon going to have a hearing in the Commerce Committee, on which I have the great privilege to sit as a member, on this particular subject. To be forewarned is to be forearmed. We want some answers in that committee hearing. The league has an obligation to live up to its promises to the people of Florida, and I intend to work ceaselessly to ensure they do.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. MURKOWSKI. Mr. President, Senator CRAIG is here seeking recognition on the pending package that is before us. I yield whatever time he might need for that purpose.

The PRESIDING OFFICER. The Senator from Idaho.

ENERGY POLICY

Mr. CRAIG. Mr. President, I thank the ranking member of the Energy Committee, the Senator from Alaska, Mr. MURKOWSKI, for allowing me this time on the floor.

First, I do want to say for all of us, and for the record, a special thanks to Senator FRANK MURKOWSKI for the phenomenal leadership effort he has put into the issue of energy and the development of a national energy policy for our country. He truly has been relentless over the last good number of years, not just starting when the lights went out in California but long before that when he and I and others who serve on that important committee in the Senate began to recognize that if we did not start reinvesting in the energy infrastructure of our country, that our Nation would at some point be in trouble.

We have watched, over the last decade, our ramping up of a dependency on foreign oil sources. We began to see a rapid use of the surplus of electrical energy that was out there a decade ago, as our country, through the decade of the 1990s, continued to grow 3 and 4 and 5 percent. No one was really reinvesting in building new generating capacity on the electrical side.

As many know, starting in the mid-1990s we began to encourage the Clinton administration to come forward with a national energy policy, one that dealt with this broad range of issues. We called it the market basket of energy: the oil side, the hydrocarbon side, the coal side, the electrical-generation side, the new technology side. We began to invest in new technologies, in wind and in solar. We put money into fuel cells.

Clearly, over the last good number of years we have advanced many of those technologies, but they are not yet mainstream. They do not yet fill up the market basket of energy, and we are still dominantly reliant on electricity generated by coal, by nuclear, and by hydro. We are still dominantly dependent on hydrocarbons, gases, and, of course, the crude that comes from around the world. We know it is well over 50 percent. We are sometimes 60-percent dependent on someone somewhere else in the world being willing to put their product into the market for us to buy.

The lights began to go out in California about a year and a half ago. It was a major wake-up call to this country. California being our largest State and being the largest piece of the American economy, we knew that if California faltered and failed it could drag the rest of the economy down with it. I am from Idaho. Our State is part of a regional electrical grid that is

dominated by the impact of California action. The State of Oregon, the State of Washington, the State of Montana, parts of Nevada, parts of New Mexico, and parts of Arizona were caught up in the California episode. I use the word "episode" as it relates to California.

As we watched California restructure its electrical system, there was not an economist out there nor a few reasonable observers who knew electricity who said California was doing the right thing. In fact, most said California was doing the wrong thing, and that at some time in the future California would find itself in trouble. That is exactly what happened.

My State of Idaho, being in that grid, began to get in trouble, too. We had the least cost power. We were hydro based. All of a sudden, our rates started going up.

As a little side note to the rates going up, because we are a hydro-based State and because over the last 2 years the Pacific Northwest has been in a drought, we were in even worse trouble. The energy issue in Idaho became a very strong issue as it grew across this country.

A new President was elected last November. While he talked about education and he talked about compassionate conservatism, in one of the first meetings I had with President George W. Bush, he stood aside those issues and said: The most important issue for our country at this moment in time is the development of a national energy policy and a reduction of the dependency of our country and its consumers and our economy on foreign sources of energy, and I am going to assemble a task force headed by Vice President CHENEY. We are going to make our proposals, and we are going to lead on this issue. We want you to work with us so we can develop a truly national, comprehensive policy.

That was the beginning of a strong effort on the part of the House, the Senate, and the administration to work on the issue of energy.

There are a lot of side stories and a good many side notes to this whole effort. But there is one thing that is very clear in the minds of the American people: That we are not masters of our own destiny when it comes to energy; that we are a phenomenally dependent economy when it comes to an adequate, abundant supply of energy at a reasonably low base price in that economy; when that fails or when those prices go radically up because the market price drives it, our economy is in trouble.

About a year ago, Alan Greenspan said the recession was beginning to appear as a slowing of the economy, and it was clearly evident that the spike in energy costs would take a full percentage point off the economy and would cost millions of jobs in the economy as business and industry offset their prof-

itability or their costs based on an unbudgeted, rapid increase in the price of energy.

All of those scenarios played themselves out. All of them are extremely important to this country.

The Senate began to work its will. The House began to work its will. Lots of hearings were held. We were beginning to shape and write a bill in the Senate. FRANK MURKOWSKI, LARRY CRAIG, and a good many others had already introduced a bill earlier in the year. Chairman BINGAMAN introduced a bill earlier in the year. There were opposing points of view on energy—not dramatically different but different. That is OK. That is fair. That is the way the process works. But all of them were intended to come back to the Energy Committee in the Senate.

Out of the effort of the Murkowski-Craig bill and the Bingaman bill, we were going to produce a national energy policy bill for the Senate which we planned to do through the months of September and early October after coming back from the August recess. The House had already worked its will with H.R. 4.

The amendment we are offering today is the House product. But it was done before September, during the August recess. The House moved a little more quickly than we did and built a reasonably comprehensive bill to solve the problem I have just in a general way laid out for all of us.

We came back from the August recess. The Senate began its work in the Energy Committee. Of course, the House had already worked its will and sent a very loud message to us, to the President, and to the American people that we could produce a comprehensive bill which included some very controversial but extremely important issues in it, such as exploration in northern Alaska as it dealt with broadening and developing our oil reserves.

All of this is at hand when September 11 occurs—a dramatic and horrible time for our country. That incident and all of the preceding events have clearly reshaped the thinking of the American people about a lot of things. But very clearly it has reshaped the thinking of the American people in their attitude towards energy and energy supply.

Let me give you an example. If you polled on the issue of oil exploration in northern Alaska before the September recess, a slight majority of the American people would have said: I don't think so. I don't think we ought to do that. After September 11, a substantial majority—from 40-plus to 60-plus—said: Yes, do it. Do it environmentally safe, but do it because all of a sudden the American people were focused as never before on our weaknesses, our dependency, and our inability to stand alone and stand firm. We had been struck. We had been hit. Thousands of Americans had been killed.

Guess what. They came out of the Middle East. Guess where the largest supply of oil comes from on which we are dependent. It comes from the Middle East.

Americans said: Why should that be so? Can't we be more independent? Can't we stand alone more strongly? We shouldn't be at risk. We are at risk. We were just struck on our soil, and thousands of Americans died.

That was the thinking, and it was very clear.

Here is an example. This is a poll taken on November 14. Ninety-five percent of Americans say Federal action on energy is important; 72 percent of Americans say passing a bill is a higher priority compared to other actions Congress might take these days.

The American people have elevated the energy policy issue as high as they have elevated airport security, as high as they have elevated antiterrorism, as high as they have elevated anti-biological warfare and anti-chemical warfare. It has become a national priority.

Seventy-three percent of Americans say Congress should make energy a part of President Bush's stimulus package, and 67 percent of Americans say exploration for energy in the United States, including Alaska, should be part of a national energy policy.

Post-September 11, some pollsters said, was the most significant shift in the minds of the American people in the history of modern-day polling. I believe that is true because Americans not only were fearful of what had happened but they began to reassess their own personal security, their families' security, their communities' security, and their States' security, and said: We are not secure.

When I go to the gas pump and I fill my car, I am buying oil from Saddam Hussein. It is true—700,000 barrels of oil a day come out of Iraq, 12 million a day of your consumer dollars. Americans are paying \$4 billion a year to an enemy so that he can further his weapons of mass destruction, so that he can fight a war against us and our friends in the Middle East. Yes, that is the reality of what we are doing. We did not do it consciously. We fell into it. We fell into it because this country has rapidly fallen into greater dependency on energy sources because we refuse to develop our own in a comprehensive, balanced, and environmentally sound way.

Somehow there was this prohibition attitude that said, no, do not go there, even if there is energy there. We will buy it somewhere else. The environment is so valuable you cannot go there, whether it is offshore or onshore across America. What it did for us was open our soft underbelly of dependency to foreign interests, and shame on us for doing so. The American people are now saying that, and they are saying: Congress, change your attitude.

Change your mind. We want to be stronger. We want to stand on our own two feet. We want to be able to supply a reasonable amount of energy for us, for our needs.

New technologies? Absolutely. Alternative sources? Absolutely. But we also know for the next 25 or 30 years we are going to be dominantly dependent on hydrocarbons—gas and oil—we are going to be increasingly dependent on nuclear—and we should be; it is clean, and we ought to be building more nuclear facilities; we can meet our clean air standards if we build nuclear—and we ought to be looking at clean coal technology, and we have lots of coal. All of those things need to get done. There need not be a rush to judgment. There simply needs to be a systematic, methodical approach for dealing with this crisis.

The speech I am giving today is in the backdrop of declining gas prices across America. I am sure there are a few of our critics out there saying: Oh, well, now look. They are rushing to judgment once again. There go those doomsdayers.

What they ought to be saying is, because our economy has fallen almost on its face, there is a lessening demand for energy. We are not using as much in the airlines. We are operating at 60 percent there. Americans are doing less. Industry is doing less. We all know those figures.

This week, for the first time, our agencies declared we were in recession. That is a large part of why we have seen declining usage. So if we have this moment of opportunity to bring more energy on line and lower the costs, it is, and it can be, one of the greatest stimuli to the economy of this country, if we do it and do it right.

That is the scenario. That is where we are at this moment. And throughout all of this, something strange has happened. About a month ago, the majority leader of the Senate, TOM DASCHLE, picked up the phone and called Chairman BINGAMAN and said: Shut your Energy Committee down. I don't want you to mark up a comprehensive energy bill in committee.

Why did he do that? I believe I know, but he has not told me personally. It was an unprecedented action.

In the backdrop of all of this new national attention on the need for a greater sense of strength and energy, the leader of the Senate reaches out to his committee and shuts it down—the very committee that would craft the energy bill. I will tell you why he did it. Times have changed. He was behind the curve. America said explore in Alaska as a part of a comprehensive policy, and he had an environmental political debt to pay, and he is going to pay it. The way to do that is not to allow that vote on the floor, not to allow that vote, when the American fervor of self-reliance is high and when

the American fear of foreign dependency is higher. We hope that will settle out, I think he thought. And next year—next year—sometime we will do a national energy policy and maybe then we can win the vote on ANWR.

What he failed to recognize was that before the crisis in September, the House had already passed a bill with Alaska exploration in it. It has only increased, since September 11, the attitude toward that kind of exploration.

So because the majority leader of the Senate shut his committee down in an unprecedented act and denied them the right to mark up a bill in the appropriate bipartisan way, we are on the floor today, using a tactic that is procedural and appropriate but somewhat unprecedented when it comes to offering up a major national energy policy.

The bill we would have produced, the bill that Chairman BINGAMAN would have produced had he been allowed to, had he not been forced to shut down his committee, would have been a much stronger bill and a broader bill than the H.R. 4 bill that we have on the floor today, the amendment that we are going to try to attach to railroad retirement because we have been given no other alternative on this critically important issue.

I support railroad retirement. Railroad retirement will be strong if railroads can buy reasonably inexpensive diesel to fuel those big trains out there. But if diesel were to go to \$3 or \$4 a gallon, railroad retirement and the financial stability of the railroads would not be worth much. That is why it is appropriate to put an energy bill that will keep costs to the rails down and costs to the consumer down as it relates to their need for energy and attach it to this legislation.

But the reason we are doing it is because the majority leader of the Senate has denied us no other approach. In fact, he has denied the right of the Senate to work its will, to do what the American people want, what 95 percent of the American people say is now necessary, what 72 percent of the American people now say is a critical priority that ought to be included in President Bush's stimulus package to improve the state of the economy.

And where is our majority leader headed? In the other direction, away from what the American people are asking for, and what our President is pleading with us to get done before we leave town for Christmas.

The Senator from Texas has come to the Chamber and wants to speak. Let me mention just a few other things about a national energy policy.

One item in a comprehensive bill deals with exploration in Alaska—one item—and yet if you listen to the debate or you listen to the critics, you only hear one item: Alaska.

Let me talk about a few other things. H.R. 4, the amendment that we want to

put on here, that we are going to be voting on on Monday, reauthorizes Federal energy conservation programs and directs the Federal Government to take leadership in energy conservation with new energy savings goals—produce more but use less. It means you can have a growth economy and an abundance of energy. It isn't all conservation, and we know it. It expands Federal Energy Savings Performance Contracting authority. It increases Low Income Home Energy Assistance Program—what we call LIHEAP—and Weatherization and State Energy Program authorization levels to meet needs of low-income families. Most of us want that and think it is appropriate. That is a part of it.

It expands the EPA/DOE Energy Star Program and directs the EPA and DOE to determine whether Energy Star labels should be extended to additional products. That is called causing and promoting industries out there to produce instruments and equipment and usages for consumers that consume less energy. That is called conservation.

It directs DOE to set standards for appliances that are on "standby mode" energy use. A lot of energy is being used today by the new high-tech economy. We are asking—and causing by promotion and credit in the marketplace—that industry, as it grows, that it should produce products that consume less energy.

That sounds like a pretty good idea. It reduces light truck fuel consumption by 5 billion gallons over the next 6 years, improves Federal fleet fuel economy, and expands use of hybrid vehicles. That is new technology. Those of our friends who are critics about exploration on the public and private grounds of Americans say: You can lead out of this with just the new technology. We are saying: Let's do both. Let's put the new technologies on line. While the old technologies are being replaced, let the marketplace work and the infrastructure that supplies these new technologies build over time. And it will, as they become viable.

About a year ago I went to Dearborn, MI. I drove a new Ford fuel cell electric car. It was a beautiful car. I had it out on the racetrack, roaring around the track with an engineer. He said: Feel the thrust. He didn't say: Step on the gas, he said: Step on the pedal. There was no gas in that car. It was a hydrogen fuel cell car. I kind of slipped on one corner because it was raining. He said: You better be careful; this car costs \$6 million. I had never driven a \$6 million car. His point was it was a prototype. It is very expensive. As it comes on line in the market and the market expands, the price will go down dramatically.

In order to build an assembly line to produce a hydrogen fuel cell car, it would compete in the market with

other cars, but then where would you fuel it? You have to build fueling stations around the country. The gas station that we drive into today is a product of 70 years of building up an industry to supply an American need. Not overnight do we replace that with a new industry that could fuel a hydrogen fuel cell car.

That is my point about working to bring new technologies on line while building the resource of the current technology and the current energy.

I could go on through the long list of items that are in H.R. 4. The point is simple. While the public's attention will be directed toward a single item in a major comprehensive bill, called exploration in northern Alaska, what the rest of the world needs to hear is that there is a lot more to talk about and a lot more to get done.

Let me close by saying: TOM DASCHLE, 95 percent of the American people are asking you to help us produce a national energy policy. The President and the Republican Senate and 73 percent of the American people are saying: Mr. DASCHLE, allow it to be a part of the economic stimulus package. It is that important. Senator DASCHLE: Why don't you lead us and help us get there instead of blocking us and trying to stop us from getting there?

I yield the floor.

The PRESIDING OFFICER (Mr. NELSON of Florida). The Senator from Texas is recognized.

Mr. GRAMM. Mr. President, let me identify myself with the excellent remarks of our colleague who just spoke. We are going to have an opportunity on Monday to determine whether or not we want to debate energy policy in America and whether we want to deal with the problem of human cloning. That will come on the cloture vote. If cloture is invoked on the railroad retirement bill, those two issues will be sheared off and we won't get an opportunity to vote on them. If cloture is not invoked, we would get an opportunity to vote yes or no on them, and then they would go forward as part of the railroad retirement bill, if they were adopted. I identify myself with the excellent remarks that were given.

I must be getting 300 or 400 calls a day about railroad retirement. I am getting lots of letters—I am not getting the letters; they are coming, and I am going to get them some day when we get through with this anthrax business and I will be able to answer them. It frustrates me.

I would like to try, as briefly as I can today, to explain this issue on railroad retirement at least as I see it. I will try to present the facts. We are all entitled to our own opinion, but we are not all entitled to our own facts.

The first way, the best way to start this discussion is to explain how I became involved in the debate. About a

year ago, I had representatives of the rail labor unions and the railroads come to see me to talk to me about a proposal they had to "reform railroad retirement."

I guess other things being the same, I am for reform. But when it became clear that they were talking about taking the sterile assets that are now sitting in a meaningless IOU in the Federal treasury and investing it in stocks and bonds and real wealth, out of which they were going to be able to pay benefits to railroad retirees, I think it is fair to say that even for an old jaded politician, I was excited about this bill. Into my office came all of these people, representing these major interests, very knowledgeable, very intelligent people who were there to lobby me on behalf of it.

I guess it took me about 5 minutes to figure out that something didn't add up. Let me offer a little information to set the predicate for that.

As everybody who has not been hiding under a rock somewhere for the last 25 years knows, Social Security is in trouble. We have gone from 42 workers per retiree, when we started paying Social Security benefits, to 3.3 workers today per retiree. We are in sheer panic—I am—about what we are going to do as baby boomers start to retire, and we move from 3.3 workers per retiree to 2 workers per retiree.

While I may be the strongest proponent on the planet of taking the Social Security surpluses we have and investing them in real wealth to bring in what Einstein called the most powerful force in the universe, the power of compound interest, I have never claimed, nor has anyone ever claimed, that for the next 25 years that even the best investment program imaginable by the mind of man could enable us to raise Social Security benefits now, to lower the retirement age for Social Security benefits now, or to cut Social Security taxes now.

I have not been here forever, but I didn't just come in on a turnip truck yesterday. I started with this knowledge that in Social Security, with 3.3 workers per retiree, we are looking at dramatic increases in taxes or dramatic reductions in benefits, and maybe both, and that an investment component could mean less in the way of reductions in benefits and less in the way of increases in taxes. But not by any imagination that I have could I have believed that we could with any kind of investment program in Social Security raise benefits today and cut taxes today knowing that in Social Security there is only 3.3 workers per retiree. And yet these people come to my office and tell me that we can have a railroad retirement investment program and that we can immediately slash taxes that are going to fund railroad retirement. We can immediately increase benefits. We can immediately change the retirement age.

We are in the process now of raising the retirement age for Social Security from 65 to 67. And in walk these people saying to me: Look, with this little investment program, we can today change the retirement age in railroad retirement from 62 to 60.

While I wouldn't have believed that for Social Security, let me give one more set of facts. Today in Social Security we have 3.3 workers per retiree. In the railroads, we have one worker per three retirees. The railroad retirement program is in nine times worse shape than the Social Security program. We have three workers per retiree in Social Security, they have one worker for three retirees in railroad retirement. And yet these people, highly paid, highly intelligent people came in to my office. They were lobbyists. I don't begin to act as if something is wrong with lobbying. The Constitution guaranteed them the right to come make this pitch to me. But with a straight face, they came in my office and said: If you will let us take \$15 billion, we will invest it, we will raise benefits, we will lower the retirement age—and I am not talking about way off in the sweet by and by, I am talking about today—we will raise benefits, we will lower the retirement age to 60, we will cut taxes on the railroads that fund railroad retirement, and it will just be great.

Now, I am sorry to say, I don't know what their pitch was to the 74 Members of the Senate who signed on as cosponsors, but that was their pitch to me. I didn't believe it. And I was right. I will explain to you why I was right. I didn't believe it because it didn't make any sense. And now that we have the railroad retirement board to work out all the numbers, let me tell you what the plan is and then show it in terms of the numbers and talk about the danger it creates.

What must have happened is—and this is just theoretical, but it seems to me this is what happened—our railroads have had problems really since their formation because they got lots of assistance from the Government. They negotiated labor agreements that didn't make sense. They had massive featherbedding. When they started competing against trucks in the 1930s, they were forced to reduce their labor force. So they had this huge number of people, they have huge severance pay packages, and they have very high retirement benefits. So they got in financial troubles.

I am sure that sometime last year, or the year before, somebody with the railroad said: Look, we have over \$15 billion of real assets in the railroad retirement program. You need to realize that railroad retirement has never been self-sufficient; the Federal taxpayer heavily subsidizes it, and there is no private retirement program that could run with the benefits it is paying

out, with a trust fund as small as their trust fund. So it has never been self-sustaining; the Government has always been a very heavy contributor to it.

But what must have happened last year, or the year before, is somebody with the railroad said: Wouldn't it be great if we could get some of that money out of that trust fund? We would like to have it.

But they could not figure out, to save their lives, how they could raid the railroad retirement trust fund without the unions going absolutely crazy. So it looks to me as if some really smart lawyer, lobbyist, economist—somebody—came up with the idea that the railroads should go to the unions and say: Look, if you will let us take \$7.5 billion out of this retirement fund, we will let you take \$7.5 billion out of it, and we will leave the Federal Government on the hook for paying this benefit.

Now that is literally what happened. Today it is typical of the news coverage—and this is an article in the *Roanoke Times*. I don't know why my clipping service got it. They are talking about my opposition and Senator DOMENICI's and Senator NICKLES', and they say we argue that taxpayers would be left holding the bag because the railroads and the unions want to take the money out of Government funds and invest it.

It is not investing that I am against. It is pilferage that I am against. If they were investing the money, I would be saying hallelujah choruses right here before Christmas. I am for investing it. It is stealing it that I am against.

How can I say such a thing? Let me tell you how. It is true. It is just that simple. What I have done here is taken the data from the railroad retirement board—and I am not a member; this is not my data; these are the facts. According to this line right here on the chart, over the next 25 years the trust fund balance of railroad retirement would look like this under the current system. They are closing in on \$25 billion now, and that would rise over the next 25 years from about \$20 billion to about \$35 billion—still a very modest trust fund for a retirement program the size of railroad retirement. But we rejoice in it.

Now if you listen to the proponents of this bill, they say: Look, all we want to do is take this money and invest it. They assume—and I grant them the assumption because I believe it is true that over the long term they can get 8-percent return on investment. Currently, they are not getting it on government bonds; it is an IOU from the Government itself. It is not really an investment. Investing it would be a good thing. I am for it. Wouldn't you believe that if you were getting no return now, and you had 8 percent after inflation, the value of the trust fund would go up? I mean, what investment

can you imagine that—if you were getting an effective zero rate of return today and you started getting 8 percent, don't you think the investment would grow in value? Yes, it should be getting bigger. But what happens, if we adopt this bill, is the trust fund will start falling and will fall dramatically until the emergency provisions of the bill kick in and taxes are automatically raised on the railroads.

What literally happens—and I want people to listen to these figures—under this bill is that the \$15 billion is not invested, it is pilfered. What happens under this bill is that over the next 17 years, despite the fact that we are getting a higher rate of return on the money, the balance actually falls by \$15 billion.

How do you get a higher rate of return and end up with less money? You end up with less money because, before anything is invested, before one penny is invested, we are going to slash taxes on the railroads from 16.1 to 14.75 to 14.20 to 13.1 percent and we are going to lower the retirement age for beneficiaries, we are going to cut the time for vesting in pensions in half, and we are going to raise the value of many pensions.

So what we are literally doing is this, if you work out the numbers. If it doesn't smell like a political deal to you thus far, it will when I give you the numbers. How much of the \$15 billion do you think goes to the railroads? How much do you think goes to the employees? You would think, if it were just accidentally distributed by some program, one might get a penny more than the other and it might be a little bit different. Incredibly, over the 17 years, \$7.5 billion of this pension fund goes to the railroads and \$7.5 billion goes to the union members.

Now what happens when suddenly you have a program where, despite the fact that you are getting interest, which you didn't before, over the next 17 years you have \$15 billion less, because before you have invested a penny, you have cut taxes and you have raised benefits—what happens? The program starts having big-time problems. In fact, under their own numbers, what happens is, while the tax rate on the railroads gets down to 13.1 percent by 2004, by 2025, just to cover the portion for which they are liable under this bill, their tax rate would have to be up to 22.1 percent.

The reason this trust fund does not go right through the floor is there is a provision in the bill that says if the trust fund is, for some reason, used up, and the reason is pilferage, that while taxes are being cut on the railroads now and raising benefits now, in the future taxes on the railroads are going to have to be raised to make up the difference, and that tax is capped at 22.1 percent.

Imagine when we have been cutting taxes and increasing benefits and all of

a sudden the railroad retirement program is in dire straits and the railroads have to raise the percentage of wages they put into the retirement program from 13.1 to 22.1 percent in 3 years, what is going to happen? They are going to run to Congress and say, we are going to go bankrupt. We are going to have to shut down every railroad in America. There is no way we can go from 13.1 percent of our wage bill going into this retirement program in 2019 to 22.1 percent going into it in 2025.

We have let the railroads come in and take \$7.5 billion. We have given the employees \$7.5 billion. The Federal Government is guaranteeing this retirement program now. We get out to 2022, the bottom is falling out of the program, and so the trust fund, which would have been up here, would have been almost \$40 billion under the current system, but now it is down below \$10 billion.

Remember, they invested the money. They are getting 8 percent, and the trust fund has gone from almost 40 to below 10? How could that happen? Because they are taking money out of the trust fund and giving it to the railroads and giving it to the retirees.

To fill up this gap, let me give a figure. The year is 2026, 25 years from now. Now we have passed a railroad retirement bill that is loved. The railroads are for it. The retirees are for it. The unions are for it. It is wonderful. It has this cloak that says we are going to let them invest this money, but when we look at the numbers they are not investing the money. They are spending the money.

So 2026 comes. We have a crisis in railroad retirement. The taxpayers are guaranteeing it. What kind of payroll tax would there have to be on January 1, 2026, to put the system back where it would have been had we never passed this bill that has 74 cosponsors? Listen to this. Hold your hat. We would have to have a payroll tax of 153 percent of wages on January 1, 2026, to put back the money that has been pilfered out of railroad retirement.

In other words, if a person is paid \$1,500 a month—or say they are being paid \$1,000 a month. I guess they do not hire anybody at \$1,000 a month, but it makes the arithmetic simple. If somebody is being paid \$1,000 a month, \$1,530 would have to be put into railroad retirement from the first paycheck in January of 2026 to get the trust fund balance back to where it would have been before the \$15 billion was stolen.

Does anybody believe that on January 1, 2026, the railroads are going to be able to pay a payroll tax of 153 percent? Nobody believes that. Nobody believes they are going to be able to pay the payroll tax of 22.1 percent, which the bill would require them to pay. Given the figures of the Railroad Retirement Board, if we pass this bill, the amount of money going into the pension fund

from the railroads would go down from 16.1 to 14.75, 14.2, 13.1, and it would be at 13.1 in 2019. So we are right here. The bottom is falling out of the program.

The law starts requiring money to be put back. So within a 6-year period, this payroll tax to fund this program has jumped from 13 percent to 22 percent, and we still are nowhere near where we would be if we had never passed this bill. In fact, as I noted, we would have to have a 153-percent payroll tax to get us back to where we were if we had never done this.

That is not going to happen. Neither one of those payroll taxes are going to happen. What is going to happen is we are going to pass this bill and, boy, it is going to be loved. This is consensus. The railroads are for it. The retirees are for it. The workers are for it. It is true, if one looks at the numbers they are taking \$15 billion right out of the trust fund. But it is a victimless crime, right?

In fact, as one of the railroad executives says in the paper today, "It is our money." It is their money. Well, what if we were taking money out of the Social Security trust fund and giving it away? After all, probably the guy who gets it, it would be their money.

The point is, however, the Federal Government is on the hook to pay these benefits. There is nowhere near enough in the trust fund today to pay the benefits. When we give this \$15 billion away, we are putting the taxpayer on the hook and come 2019, when the bottom falls out, the railroads—I am not going to be here. I do not know how many people are going to be here when it happens, but it is going to happen if we pass this bill. When the bottom falls out, the railroads are going to run in and say, we cannot operate and pay these kinds of taxes.

Nobody is going to say, well, you should have thought about that when you participated in stealing \$15 billion out of this trust fund. They do not say that.

They are going to say, well, look, we cannot let the railroads go broke. So what we are going to do is we are going to have the Federal Government pay an even larger share of the cost of this retirement program.

That is basically where we are. We have a proposal before us that claims it is reforming the program. It claims it is earning interest on the assets of the railroad retirement program. But if it is earning interest, why are the assets going down instead of going up? Because before one penny is invested, before one penny is earned, it slashes the amount of revenue going into the pension fund. It vastly increased the benefits being paid out.

The railroads are for it because they get \$7.5 billion. Railway labor is for it because they get \$7.5 billion. Who pays the \$7.5 billion? The taxpayer.

Let me sum up by noting what we ought to do. I want to state a paradox. America loves consensus. I have to say when I go to my State, the people are sweeter to me now than they have been in a very long time. I think they are because they sense we are pulling together. We had this terrible thing happen on September 11, and I think for about 6 weeks we did have a pretty good consensus, and I was proud of it.

Bipartisanship and consensus are not always good things. Let me repeat it because it is a pretty startling statement. Bipartisanship and consensus are not always good things. In fact, the Founders understood checks and balances. When labor and business get together, it is not always in the public interest.

What we have in railroad retirement is literally a proposal to pillage \$15 billion out of the railroad retirement trust fund over the next 17 years, give half of it to the railroads, half to the union, and the taxpayer ends up in a very deep hole in supporting railroad retirement.

They will claim when you hear the debate: But when it goes to hell, the taxes on the railroads are automatically raised. They are, but only up 22.1 percent. To get back in the year 2026 where we would be if we never let the money be taken out, there must be a payroll tax of 153 percent. Obviously, this is not going to happen.

What should we do? First of all, nobody wants to hear this stuff. When all the people came in to our offices, this sounded as if Christmas had come early, so 74 Members of the Senate signed onto it and gave it a big fat kiss. Now nobody wants to know the problem. Nobody wants to fix it. Here is how we can fix it and still dramatically improve the well-being of the railroad and the retirees. Take the \$15 billion and invest it; don't pilfer it, invest it. Then out of the interest that we earn on the investment, once the money is earned, look at strengthening the trust fund, look at these very high taxes railroads have to pay, and look at benefits. But don't go out and spend the money first. Invest the money first, earn on the investment, and then look at using that to make the system safe and sound, first; and then to improve it, second.

I would change the program by requiring, before any taxes are cut, before any benefits are increased, we make the investment and we actually have the money in hand. I do believe there is a very real problem of what we are doing—even if you have the money, and it is clear you don't.

Here is another figure: To just fund the new benefits promised, even with the interest rate you could earn by investing the money, you would have to raise payroll taxes by 6.5 percent more. It would have to be 6.5 percent higher each year, for the next 25 years, just to

pay for the lower retirement age, the quicker vesting and the more generous pensions. We are not raising payroll taxes when we increase the benefit; we are lowering them.

We need to fix this bill. We are going to have cloture on it. I hope we have a chance to debate energy, which is a crisis issue, and too human cloning, because I believe the Senate would vote overwhelmingly to at least have a 6-month pause to look at it. That would also give an opportunity to come up with a rational way to improve railroad retirement. This is almost too good to be true, because it is too good to be true. There is no investment scheme that has ever been derived that would let you do what is being done here. If you look at the trust fund, it is clear it is too good to be true because it is not true. I hope, even at this late date, even though people are signed on to this bill, that people will look at it and give us a chance to fix it.

I am going to offer a series of amendments. One of them will say don't cut taxes, don't raise benefits until you have made the investment and earned money to pay it from. Don't just draw down the trust fund, because right now we have a trust fund. Don't use it up now so we don't have it when retirees need it.

Another amendment I will offer would be to not let the money be taken out of the Social Security trust fund to pay for these new benefits. These are things that need to be addressed.

I have come today to basically explain how it is possible to be against this bill. It appears that everybody is for it, but it is a bad bill. It is a dangerous bill. It is a bill that puts the taxpayer in mortal danger. It is a bill that doesn't make any sense on its face. I don't know how anybody could have ever sold it. I am sure whoever came up with this whole deal of giving half of it to labor, half to management, and selling it to Congress as a reform based on investment—even though the trust fund goes down like a rock—I am sure whoever devised this stuff made millions. And they should have.

The problem is, this isn't some kind of game. This is real public policy. The idea that we would have a bill that will literally pillage the trust fund of railroad retirement funds is a startling thing. This may pass. It probably will pass. I would rather it not pass on my watch. I am going to vigorously oppose it. I hope my colleagues, even at this late date, will look at these things. If somebody wants to debate this, if somebody wants to come over and present their figures, if they will let me know, I will come over and debate them on this subject. However, I haven't seen anybody present the argument for the other side. I believe there is no argument for the other side.

What we are seeing is basically misinformation. The idea that we have

railroads saying, "All we want to do is invest the trust fund," when billions of dollars are being taken out of the trust fund despite interest that is supposedly being earned, obviously something is very wrong.

I urge my colleagues, I urge people that follow these issues, to look at these facts, verify what I am saying and raise these issues.

People writing about this in the media, don't be confused. I am not concerned about investing \$15 billion. That is God's work. I am for investing \$15 billion. What is happening, when the trust fund is projected to look like this line, and it is turning out to look like this, that is not investment. That is pillaging. That is taking money out of the trust fund.

We need people to start asking: Why are we doing this when the taxpayer is liable: If they start asking, maybe we can fix it.

I appreciate the indulgence of the Chair. I yield the floor.

The PRESIDING OFFICER (Mr. WYDEN). The Senator from Alaska.

ENERGY POLICY

Mr. MURKOWSKI. Mr. President, let me make sure we know where we are on the legislation before the Senate. The underlying bill is the railroad retirement bill. We have two amendments combined as one, one is the adoption of H.R. 4, the House energy bill; the other issue concerns a moratorium on cloning for 6 months. That is Senator BROWNBACK's legislation.

I will speak today on the energy issue because I think it is paramount. If we look at the polling information we have, it is obvious what American public opinion consists of. This survey was done in November by the IPSOS-Reid Corporation: 95 percent of Americans say any Federal action on energy is important; 72 percent of Americans say passing an energy bill is a higher priority than any other action Congress could take. Mr. President, 73 percent of Americans say Congress should make the energy bill part of President Bush's stimulus plan. Mr. President, 67 percent of Americans say expiration of new energy sources in the United States, specifically ANWR, is convincing reason to support passing an energy policy bill. That is 67 percent.

I am not particularly happy with the way the energy bill, H.R. 4, which we introduced, is here. It is the House bill, which did pass the House by a substantial margin. I am fearful the vote on Monday at 5 o'clock will be somewhat convoluted because you will be looking at several issues at the same time and Members can justify their positions on perhaps previously having voiced their support for the railroad retirement bill, or voiced their opposition against cloning, or been a proponent or opponent of the House bill.

In any event, the good news is we finally have a energy bill up for discussion because that has not been the case before, because of the majority leader's refusal to allow us time but, more significantly, the refusal to allow the committee process to work.

As we have seen ordinarily around here, the committees do their work and report out a bill and the bill comes before an entire Senate. In this particular case, the energy bill was taken away from the committee chairman and taken over basically by Senator TOM DASCHLE. In so doing, he really stripped, if you will, the responsibility of the committee of jurisdiction. But as the ranking member, all I can do is express my frustration. As a consequence, we still do not have the Democratic bill that we anticipate is coming.

I think it is fair to say there has been a deliberate attempt to discourage the taking up of the House bill before the Senate body, in the manner in which the majority leader has simply exerted his influence. So the members of the committee of jurisdiction will not have had any input in the development, at least from the Republican side, of whatever we are likely to see next week.

Some have said, what is the importance of this? Is there some reason we are rushing into this? I remind my colleagues, we are not rushing into it. This has been before us for a couple of years. We introduced the bill, Senator BREAU and I, earlier this year. We have had hearings on it. On the other hand, we were precluded from reporting it out of committee for the simple reason that we didn't have the votes to report it out of committee.

This morning we had some discussion with the Senator from Connecticut, Mr. LIEBERMAN. He made several arguments against one portion of the bill and that is the opening of ANWR. I am going to be rebutting these over a period of time because that seems to be the only way we can focus in on the points and try to counter those points with facts rather than fiction.

What he failed to mention earlier today was the rights and interests of the Native people of Alaska who live in the 1002 area, the area of Kaktovik, and their rights to develop their own land in this area. As the chart behind me shows, you can see the ownership of the 95,000 acres of land that is private Native land. This is the 95,000 acres of Native land that is within the 1002 area. That is the area that would be leased.

In the manner in which this land was transferred over to them, while they have the land in fee simple, they have no authority to drill for gas for heating their own homes. These are American citizens entitled to the same rights as any other American citizen. They do live in the area. As a consequence, their rights are certainly thwarted

opening up this area where they would have not only access to develop those lands; they would also have access for a route out if they should wish to initiate some exploration.

It is important to recognize there is a human element here. The human element is the residents, the kid who lives in Kaktovik. You have seen the picture before. Some people are under the impression that this is the Serengeti of the Arctic. We have views of the Serengeti, but that is Kaktovik, and it is a village of less than 400 people. The point is, people live there. The point is, it is a very harsh environment.

All through the debate there is no mention of the rights of these people. It is always the environmental community that says we should not support opening ANWR. They come up with no evidence, no suggestion we cannot do it safely. It is just generalities.

Throughout this debate what I am going to be doing is countering the comments that have already been made because they are the same tired arguments you have heard previously. One of the comments is it is only a 6-month supply. That is a ridiculous argument. How anybody could even repeat it here is beyond me because we all know that could only happen if there was no oil production in the United States, it all stopped, there would be no further importation coming into the United States in ships, and we would only depend on one source. That is a bogus argument. I am amazed that intelligent Members of this body would even stoop to suggesting that anyone would buy that kind of argument, a 6-month supply.

Clearly, what we are talking about is a significant discovery, somewhere between 5.6 and 16 billion barrels a day. What does that mean? That means more oil, more proven oil than in Texas. Texas is always considered to be one of the major oil producing States and it is. But from the Energy Information Administration Reports, Texas' proven reserves total 5.3 billion barrels. In 1998, the USGS estimated there was a 95-percent chance that more than 5.7 billion barrels would be found in ANWR. That is a 95-percent chance. That is more than the proven reserves in Texas today.

There is a 50-percent chance of more than 10 billion barrels, and a 5-percent chance of more than 16 billion barrels.

I am going to go into this a little bit more because it is something that constantly comes up, because it is something that was coined by the extreme environmental community that is opposed to this: a 6-month supply. Let's look at this on an average. The average would be Prudhoe Bay.

We have some pictures of Prudhoe Bay here. You can see the oilfield over there; it is the largest oilfield ever found in North America. It was supposed to produce 10 billion barrels and

it is almost to its 13 billionth barrel now. That has been supplying the Nation with about 20 percent of its total crude oil for the last 27 years. So it is very significant.

Here is ANWR over here. There is Kaktovik, the village you have seen the pictures of. Then there is the makeup of just what is ANWR. I have told people time and time again, it is a big hunk of real estate. It is 19 million acres in its entirety. The entire State of Alaska is about 365 million acres.

What we have done is, we have done a little comparison for you to show you that ANWR and South Carolina are about the same size. The only difference in the ANWR 19 million acres, we set aside 8.5 million acres as a wilderness in perpetuity. Those are not going to be touched. Nor is the balance of the refuge in the darker yellow. Only the green area is proposed for lease sale. In the House bill before us, the footprint is limited to 2,000 acres. That is the little square you see up in red.

That is the proportion. You have the pipeline already in, the 800-mile pipeline. The same arguments that were used in the 1970s against the pipeline and the late 1960s are prevailing today. We built that pipeline. It is one of the construction wonders of the world. It has moved 20, 25 percent of the total crude oil produced in this country.

I know there are some who have, simply, a closed mind to this issue because they made a commitment to America's environmental community. It is our job to make a commitment to do what is right for America, and what is right for America is to reduce our dependence on imported oil. You do it one way. You do it by producing more domestically.

You can talk all you want about energy savings, the world moves on oil. You don't drive out of here on hot air. You don't fly out of here on hot air. Your ships and your trains don't move out on hot air. They move on oil. I wish we had another alternative, but we do not.

We can talk about coal. We can talk about natural gas. We can talk about nuclear and we can make our points, but the world moves on oil and we are going to continue moving on oil for some time in the future. That is why it is so important that we develop, here in the United States, an additional supply of significance.

Don't tell me about a 6-month supply because, if you do, you are doing a disservice, not only to your other colleagues but to yourself because you are kidding yourself.

If there is no oil there, believe me, it is not going to be developed. There is no consideration for the Native people's rights. I talked about that earlier this morning. That distresses me because they are my constituents. They have every right as American citizens to control their land and develop their

land, and they can't even drill for gas to heat their homes.

Some say we are rushing through this too fast. We have had hearings. Here is the history. Between the 100th and 107th Congresses—this has been around for a long time—there have been over 50 bills regarding this topic, there have been 60 hearings, there have been 5 markups.

Legislation authorizing the opening of ANWR passed the Senate once already—in 1995. Legislation authorizing the opening of ANWR passed the House twice already. The conference report authorizing the opening of ANWR passed the Congress back in 1995. It passed the Senate. But, unfortunately, President Clinton vetoed it. If we had passed it in 1995, it could very well be producing oil.

Something that should lie in the minds of all Americans is that we are starting to lose lives over oil. We lost two U.S. Navy sailors because a ship sank while being inspected by the Navy. It was sailing out of Iraq filled with illegal oil that had gotten beyond the oversight of the U.N. inspectors. The sailors were on that vessel inspecting it, and the ship sank.

The point is this: Had this particular legislation not been vetoed by the President in 1995, I am sure we would have had a different situation relative to the situation we see currently in Iraq. I will talk about that a little later.

In any event, to suggest this thing be given further study, that is a cop-out. We have been at this. We have had hearings. I know the occupant of the chair has been on the committee. This has been under discussion. The obvious road block here is the refusal of the Democratic leadership to allow us to vote it out of committee and to have an up-or-down vote in the committee. They took away the authority of Chairman BINGAMAN and rested it with the majority leader. They do not have a bill yet. Maybe they will have a bill in a day or two, with little or no Republican input. This has become a very partisan issue.

It is similar to what happened on the Finance Committee with the stimulus bill. We had no input, and suddenly we went to markup and to voting the bill out and found it was so partisan that we had to start the process again.

I don't know what the majority leader's objective is in delaying. But we finally have this up before this body. Again, I am distressed with the manner in which we are forced to tie ourselves in on railroad retirement. That should be a separate bill. Nevertheless, we have to take what we can get around here. When you are a small State with a small population, you don't have a large House membership. As you know, we only have one House Member.

Some of the comments from my friend, Senator LIEBERMAN, this morn-

ing, about this being an insignificant amount of oil—let me tell you that the estimated 10 billion barrels of oil coming out of ANWR would support his State of Connecticut for 126½ years based on the current petroleum needs of about 216,000 barrels a day. From the standpoint of South Dakota, it would provide oil for South Dakota for 460 years.

We can all throw statistics around. Nevertheless, it is frustrating when there are suggestions that this is a meaningless, insignificant potential and not worth disturbing what they call the Serengeti of the Arctic.

Let me comment a little bit on some of the claims by the Senator from Connecticut that we are rushing through the ANWR process. As I indicated, nothing could be further from the truth.

A conference report authorizing the opening of ANWR passed the Congress in 1995. Reviewing the history shows that ANWR has not only been addressed by this body but it has also been addressed by various agencies of the Department of the Interior, the House of Representatives. The proposal has been before Congress for 14 years.

The time to act is long overdue. The issue has been dragged out long enough over the years. I think both sides know what is happening to us with the vulnerability associated with our increased dependence.

I have some charts that show the actual increase in consumption.

Here is the reality of U.S. petroleum consumption from January 1990 to September 1999. You can see that we are currently at a little over 20 million barrels a day in consumption. We can conserve more. If you want a high-mileage car, you can buy it. Any American can choose, through their own free will, cars that are more comfortable or cars that can handle more people.

We have some other charts I want to bring up.

This is where our imports come from—from the OPEC nations: Saudi Arabia, Iraq, Venezuela, and Nigeria. We are importing currently about 56 percent of our total crude oil. I think we have another chart that shows just where we have been. In 1997, we were importing 37 percent. We were importing 56 percent in 2001. The Department of Energy estimates that we will import 66 percent by the year 2010.

What does that do to our national security? I will get into that a little later. Clearly, it is an issue that should be addressed.

Another issue is that of jobs. I have always believed that if anybody in this body could identify a singular more important stimulus than opening up ANWR, I would certainly like to hear from them. That offer is still out there because I haven't heard from them.

To give us some idea specifically of what would be initiated by opening

this Coastal Plain, the development scenario can only take place on 2,000 acres. That is what is in the bill. That is what is in H.R. 4.

Let's talk a little bit about the realization that we are likely to get somewhere between 5.6 and 16 billion barrels a day and what it is going to do for jobs. This is a jobs issue.

First of all, the area has to be leased. It is Federal land. There would be a lease proposal. The estimate of the bids that would come in by the major oil companies, such as Exxon, Mobil, Texaco, or Phillips Petroleum, and others would be somewhere in the area of \$3 billion. The taxpayers would obviously see a generation of funds coming from the private sales and going into the general fund.

Let's talk about jobs.

There was a generalization made by Senator LIEBERMAN that the jobs issue is insignificant because more jobs could be created, if you will, by energy conservation. I wish that were true. I wish we could justify that with some statistical information to prove it, because we are talking about continued dependence on imported oil and how we can relieve that. We are not talking about energy as a whole.

There are various studies we have seen over the years. According to the Wharton Econometrics Forecasting Association, ANWR development should produce 735,000 jobs in all 50 States. Why? Because we do not make valves; we don't make insulation. These things are made in various States in the United States.

In a different study, the U.S. Department of Energy estimated ANWR will produce 250,000 full-time jobs in America. Interestingly enough, this study was contracted out to a Massachusetts firm. This is something of which the junior Senator from Massachusetts should take note. Let me repeat—he was here earlier; unfortunately, he is not in the Chamber now—a firm in his own State has estimated at least 250,000 jobs will be produced. I am not sure he is aware of that. And this contract was given to a Massachusetts firm.

Opponents of drilling in ANWR try to downplay these arguments and try to argue the lower numbers. But regardless of whether it is 250,000 or 735,000, either way, it would still be a step in the right direction as far as stimulus to the economy because where else can you find another issue that will employ somewhere between 250,000 and 735,000 jobs and does not cost the taxpayers one red cent. And it keeps the jobs here at home rather than sending our dollars overseas and importing the oil. Every single new job in this country is important, particularly at a time when we have a recession and a downturn.

As a consequence, I think it is important to note that those who know a lot about job creation wholeheartedly sup-

port drilling in ANWR. I am talking about the unions, such as the maritime unions, the Teamsters, the seafarers, and various others.

The North Slope oil fields have already significantly contributed more than \$300 billion to the U.S. economy.

If we go through some recent announcements, let me tell you the significance of a couple hundred thousand jobs.

On November 29, it was announced 1,409 jobs may be lost. IBM announced 1,000 layoffs.

On November 28, it was announced 850 jobs may be lost. Ames Department Stores announced they will close a distribution center in Ohio, which jeopardized 450 jobs.

I could give you a list of the various announced job cuts.

Alcoa plans to lay off 6,500 employees and close plants.

Chevron announced 550 more job cuts.

Every day we have seen news clips to this effect. So we should be very concerned about stimulating the American economy and generating jobs in the private sector. And this is one of the best ways to do it.

My friend, the Senator from Oregon, is the Presiding Officer. I know the activity associated with Alaska's oil fields has traditionally been important to Oregon, particularly to the shipyards there.

It is estimated by the American Petroleum Institute that 19 new double-hull tankers will be needed if ANWR is opened. All U.S. ships will have to be built at U.S. shipyards and carry the American flag. The analysis predicts that the construction of these tankers will boost the economy of America by producing more jobs in the shipyards. They indicate that the new tankers will be needed solely because the old North Slope tankers are being phased out by 2015 because of the double-hull tanker requirements.

So more American jobs will be created because the Jones Act requires that the oil that is transported within the United States—namely, my State of Alaska down to either Washington or California; but in Portland there is a large shipyard that has accommodated these ships before—must be transported by tankers by U.S.-flagged vessels built in the United States. The analysis correctly assumes that if ANWR passes, it will include an oil export ban. So there will be a provision that this oil cannot be exported. It also assumes that the ANWR oil will be transported by tankers to refineries in Washington, California, and Hawaii. The Oregon area ordinarily does not have the refining capacity.

The American Petroleum Institute estimates this would pump \$4 billion almost directly into the U.S. economy and would create 2,000 construction jobs in the U.S. shipbuilding industry and approximately 3,000 other jobs.

The API predicts this would compute to more than "90,000 job-years," by estimating that it will take almost 5,000 employees approximately 17 years to build the ships necessary to transport this oil.

They predict one ship must be built each year for 17 years in order to coincide with the schedule for retiring the existing tankers.

To me, this sounds like stimulus. It sounds like a stimulus for creating jobs in shipyards, many of which have been hurting for some time.

Another issue is the alleged opposition by Gwich'ins. Most of the Gwich'ins, we know, live in Canada. I am aware some of them live in the Arctic village areas, with a population of roughly 117 people. They fear that the caribou that they depend on for subsistence will be decimated. They fear the caribou might take a different migration drive, perhaps further from their village; that it would be harder for them to hunt the 300 to 350 they kill each year.

But, first, there is no evidence that the oil development—with the strict controls proposed to prevent disruption during the June–July calving season of the Arctic Porcupine herd, to reduce noise, and to control surface effects—will harm the herd.

I have a picture in the Chamber that shows some caribou activity in Prudhoe Bay. I will give you a comparison. Experience over the past 26 years in Prudhoe Bay, where the herd has more than tripled in size and where the caribou calves—

THE PRESIDING OFFICER. The time of the Senator from Alaska in morning business has expired.

Mr. MURKOWSKI. I request as much time as I need.

THE PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. Reserving the right to object, as I announced earlier today, we need to complete our business by 1:15 today because of the problem at the Dirksen Building. The majority leader wishes to give a presentation prior to that time. So if the Senator would maybe take another 10 minutes, would that be appropriate?

Mr. MURKOWSKI. We are in morning business, and the limitation of time in morning business is what?

THE PRESIDING OFFICER. The limitation is 10 minutes for each Senator in morning business.

Mr. REID. I know you just barely exceeded that.

Mr. MURKOWSKI. We were talking about 15 minutes.

Mr. REID. Yes, we did 15, that is right.

I see Senator BAUCUS, who wishes to give a statement, is in the Chamber.

Mr. MURKOWSKI. I was under the impression we would have plenty of opportunity to discuss this today. Might I inquire when we are coming in Monday?

Mr. REID. We can come in as early as you would like. Two o'clock.

Mr. MURKOWSKI. How about 1 o'clock?

Mr. REID. Would you need more time on Monday than that?

Mr. MURKOWSKI. One o'clock would be agreeable because what you are telling me now is basically that I am out of time for today.

Mr. REID. Yes. Right. I would be happy to talk to the majority leader. I am sure we could work that out.

Mr. MURKOWSKI. I am a little disappointed because I think we are being kind of squeezed on time on this issue.

Mr. REID. I say to my friend from Alaska, if you want to come in earlier than 1 o'clock, I would be happy to talk to him. We are not trying to squeeze out anybody. They are closing the Dirksen Building.

Mr. MURKOWSKI. The Dirksen Building will be closed at 4 o'clock?

Mr. REID. Yes.

Mr. MURKOWSKI. Why don't we come in at noon?

Mr. REID. I will do my best. We will do our best. We have presidors, and all that. We will come in earlier than 2 o'clock, for sure.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that I be allowed to speak for another 10 minutes.

Mr. BAUCUS. Reserving the right to object.

Mr. REID. I think that will be fine. I say to my friend from Alaska, we certainly are not trying to cut off anybody's right. I don't know how much time the Senator has had, but quite a bit. I understand how fervently he feels and how important this is to the State of Alaska, so we want to make sure that you have all the time you need prior to our voting at 5 o'clock on Monday.

The PRESIDING OFFICER. Is there objection to the request?

Mr. MURKOWSKI. My understanding is, they will do their best to try to see that we come in at noon. I thank the Chair and thank the majority whip.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MURKOWSKI. We have talked a little bit this morning about the "Serengeti." Let me tell you where the "Serengeti" of Alaska is. It is another area where all the lakes are, and it is hardly a "Serengeti" because the Coastal Plain is all the same.

But if you look over at the naval petroleum reserve, that is the area with all the lakes with the concentration of birds. It is not within the 1002 area. That is another misleading argument that is continually thrown out.

The other one is that it will take as long as 10 years before ANWR oil is flowing. What they forget is the realization that we already have a good deal of the infrastructure. We have the pipeline. We only need a 70-mile line from the coastal area into the pipeline.

And it is suggested once the leases are put up for sale, they will have construction activity in about 18 months.

But more important is the national situation. I am going to close with a reference to that because I think it deserves more of a recognition because of the sensitivity of where we are internationally.

We are importing a little over a million barrels a day from Saddam Hussein. There is no question that there is a great deal of concern as a consequence of the relationship we have had with Saddam Hussein. We fought a war not so long ago. It is kind of interesting to reflect on some of the particulars associated with what happens when we become so dependent. We have heard Saddam Hussein in every speech saying "death to America." He also says "death to Israel," one of our greatest allies over there. Recognizing that he can generate a substantial cash flow by our continued dependence, one wonders why it is in the national interest of our country to allow ourselves to become so dependent on that source.

I also wish to highlight an article excerpted from the Wall Street Journal of November 28, which kind of sets, unfortunately, the partisan setting this matter is in. I will read from it. It is entitled "President Daschle."

One of the more amusing Washington themes of late has been the alleged revival of the Imperial Presidency, with George W. Bush said to be wielding vast, unprecedented powers. Too bad no one seems to have let Senate Majority Leader Tom Daschle in on this secret.

Because from where we sit Mr. Daschle is the politician wielding by far the most Beltway clout, and in spectacularly partisan fashion. The South Dakotan's political strategy is obvious if cynical: He's wrapping his arms tight around a popular President on the war and foreign policy, but on the domestic front he's conducting his own guerrilla war against Mr. Bush, blocking the President's agenda at every turn. And so far he's getting away with it.

Mr. Bush has asked Congress to pass three main items before it adjourns for the year: Trade promotion authority, and energy and economic stimulus bills. Mr. Daschle has so far refused to negotiate on any of them, and on two he won't even allow votes. Instead he is moving ahead with a farm bill the White House opposes, and a railroad retirement bill that is vital to no one but the AFL-CIO.

Just yesterday Mr. Daschle announced that "I don't know that we'll have the opportunity" to call up an energy bill until next year. One might think that after September 11 U.S. energy production would be a war priority. In September alone the U.S. imported 1.2 million barrels of oil a day.

This is at a time when we were being terrorized in New York and at the Pentagon.

Furthermore, on the 1.2 million barrels of oil a day we are getting from Iraq, whom we soon may be fighting—imagine that, fighting Iraq and we are talking about not passing an energy bill—the 1.2 million barrels per month is the highest rate of imports since before Saddam Hussein invaded Kuwait.

Continuing from the article:

But Mr. Daschle is blocking a vote precisely because he knows Alaskan oil drilling has the votes to pass; earlier this autumn he pulled the bill from Senator Jeff Bingaman's Energy Committee when he saw it had the votes. So much for the new spirit of Beltway cooperation.

We're not so naive as to think that war will, or should, end partisan disagreement. But what's striking now is that Mr. Daschle is letting his liberal Old Bulls break even the agreements they've already made with the White House. Mr. Bush shook hands weeks ago on an Oval Office education deal with Teddy Kennedy, but now we hear that Mr. Kennedy wants even more spending before he'll sign on. Mr. Daschle is letting Ted have his way.

The same goes for the \$686 billion annual spending limit that Democrats struck with Mr. Bush after September 11.

I will not refer to the rest of the article, but it simply says that what we are seeing here is a conscious effort by the majority not to allow us to have a clean up-or-down vote on the issue.

As we wind up today's debate, I encourage my colleagues to think a little bit about their obligation on these votes. Is it their obligation to respond to the extreme environmental community that has lobbied this so hard, that regards this as an issue to milk with all the authorities, somewhat like a cash cow, and are going to continue to use it? This bill covers reducing the demand, increasing the supply, and it enhances infrastructure and energy security.

I ask unanimous consent that the article in the Wall Street Journal of November 28 be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

PRESIDENT DASCHLE

One of the more amusing Washington themes of late has been the alleged revival of the Imperial Presidency, with George W. Bush said to be wielding vast, unprecedented powers. Too bad no one seems to have let Senate Majority Leader Tom Daschle in on this secret.

Because from where we sit Mr. Daschle is the politician wielding by far the most Beltway clout, and in spectacularly partisan fashion. The South Dakotan's political strategy is obvious if cynical: He's wrapping his arms tight around a popular President on the war and foreign policy, but on the domestic front he's conducting his own guerrilla war against Mr. Bush, blocking the President's agenda at every turn. And so far he's getting away with it.

Mr. Bush has asked Congress to pass three main items before it adjourns for the year: Trade promotion authority, and energy and economic stimulus bills. Mr. Daschle has so far refused to negotiate on any of them, and on two he won't even allow votes. Instead he is moving ahead with a farm bill (see below) the White House opposes, and a railroad retirement bill that is vital to no one but the AFL-CIO.

Just yesterday Mr. Daschle announced that "I don't know that we'll have the opportunity" to call up an energy bill until next year. One might think that after September 11 U.S. energy production would be a war priority. In September alone the U.S. imported

1.2 million barrels of oil a day from Iraq, which we soon may be fighting, the highest rate since just before Saddam Hussein invaded Kuwait in 1990.

But Mr. Daschle is blocking a vote precisely because he knows Alaskan oil drilling has the votes to pass; earlier this autumn he pulled the bill from Senator Jeff Bingaman's Energy Committee when he saw it had the votes. So much for the new spirit of Beltway cooperation.

We're not so naive as to think that war will, or should, end partisan disagreement. But what's striking now is that Mr. Daschle is letting his liberal Old Bulls break even the agreements they've already made with the White House. Mr. Bush shook hands weeks ago on an Oval Office education deal with Teddy Kennedy, but now we hear that Mr. Kennedy wants even more spending before he'll sign on. Mr. Daschle is letting Ted have his way.

The same goes for the \$686 billion annual spending limit that Democrats struck with Mr. Bush after September 11. That's a 7% increase from a year earlier (since padded by a \$40 billion bipartisan addition), and Democrats made a public fanfare that Mr. Bush had endorsed this for fear some Republicans might use it against them in next year's elections. But now Mr. Daschle is using the issue against Mr. Bush, refusing to even discuss an economic stimulus bill unless West Virginia Democrat Bob Byrd gets his demand for another \$15 billion in domestic spending.

Mr. Byrd, a former majority leader who thinks of Mr. Daschle as his junior partner, may even attach his wish list to the Defense spending bill. That would force Mr. Bush to either veto and forfeit much needed money for defense, or sign it and swallow Mr. Byrd's megapork for Amtrak and Alaskan airport subsidies.

All of this adds to the suspicion that Mr. Daschle is only too happy to see no stimulus bill at all. He knows the party holding the White House usually gets most of the blame for a bad economy, so his Democrats can pad their Senate majority next year by blaming Republicans. This is the same strategy that former Democratic leader George Mitchell pursued in blocking a tax cut during the early 1990s and then blaming George H.W. Bush for the recession. Mr. Mitchell's consigliere at the time? Tom Daschle.

It is certainly true that Republicans have often helped Mr. Daschle's guerrilla campaign. Alaska's Ted Stevens is Bob Byrd's bosom spending buddy; he's pounded White House budget director Mitch Daniels for daring to speak the truth about his pork. And GOP leader Trent Lott contributed to the airline-security rout by letting his Members run for cover.

The issue now is whether Mr. Bush will continue to let himself get pushed around. Mr. Daschle is behaving badly because he's assumed the President won't challenge him for fear of losing bipartisan support on the war. But this makes no political sense: As long as Mr. Bush's war management is popular, Mr. Daschle isn't about to challenge him on foreign affairs.

The greater risk to Mr. Bush's popularity and success isn't from clashing with the Daschle Democrats over tax cuts or oil drilling. It's from giving the impression that on everything but the war, Tom Daschle might as well be President.

Mr. MURKOWSKI. I ask unanimous consent that a summary of the bill, which is H.R. 4, be printed in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SUMMARY—H.R. 4, THE SECURING AMERICA'S FUTURE ENERGY ACT OF 2001

H.R. 4 is the legislative portion of the president's comprehensive energy policy. It aims to secure America's energy future with a new national energy strategy that reduces energy demand, increases energy supply, and enhances our energy infrastructure and energy security.

REDUCED DEMAND

Reauthorizes federal energy conservation programs and directs the federal government to take leadership in energy conservation with new energy savings goals.

Expands Federal Energy Savings Performance Contracting authority.

Increases Low Income Home Energy Assistance Program (LIHEAP), Weatherization and State Energy Program authorization levels to meet needs of low-income Americans.

Expands the EPA/DOE Energy Star program and directs the EPA and DOE to determine whether Energy Star label should extend to additional products.

Directs DOE to set standards for appliance "standby mode" energy use.

Reduces light truck fuel consumption by 5 billion gallons over six years.

Improves Federal fleet fuel economy, expands use of hybrid vehicles.

Increases funding for DOE's energy conservation and energy efficiency R&D programs.

Expands HUD programs to promote energy efficient single and multi-family housing.

INCREASED SUPPLY

Provides for environmentally-sensitive oil and gas exploration on Arctic Coastal Plain.

Authorizes new oil and gas R&D for unconventional and ultra-deepwater production.

Royalty relief incentives for deepwater leases in the central and western gulf of Mexico.

Streamlines administration of oil and gas leases on Federal lands.

Authorizes DOE to develop accelerated Clean Coal Power Initiative.

Establishes alternative fuel vehicle and Green School Bus demonstration programs.

Reduces royalty rate for development of geothermal energy and expedites leasing.

Provides for regular assessment of renewable energy resources and impediments to use.

Streamlines licensing process for hydroelectric dams and encourages increased output.

Provides new authorization for fossil, nuclear, hydrogen, biomass, and renewable R&D.

ENHANCED INFRASTRUCTURE ENERGY SECURITY

Sets goals for reduction of U.S. dependence on foreign oil and Iraqi oil imports.

Initiates review of existing rights-of-ways and federal lands for energy potential.

Directs DOE to implement R&D and demonstrate use of distributed energy resources.

Invests in new transmission infrastructure R&D program to ensure reliable electricity.

Requires study of boutique fuel issues to minimize refinery bottlenecks, supply shortages.

Initiates study of potential for renewable transportation fuels to displace oil imports.

Offers scholarships to train the next generation of energy workers.

Prohibits pipelines from being placed on national register of historic places.

Mr. MURKOWSKI. Finally, I hope as Members reflect on their responsibility, they recognize that we are at war. This war may expand and extend itself. The continued exposure based on our dependence on imported oil and the likelihood that the flow of oil imports might be disrupted mandates that we have an energy policy and that we have it done in a timely manner. Let's recognize the obligation that we have in voting on this. Is it a vote to respond to the demands of America's environmental community, or is it a vote to do what is right for America?

We have already lost two sailors as a consequence of our dependence on oil from Iraq. I don't want to stand before this body and say I told you so, but if we don't pass an energy bill that will reduce our dependence on Iraqi oil, we are doing our country a grave injustice. It is contrary to the majority of public opinion in this country. Seventy-six percent of public say we should be taking up and passing an energy bill over any other bill. That includes the farm bill and the Railroad Retirement Act. If we ever get to the stimulus, I hope somebody would search their minds and memories to see if they can come up with a better stimulus than the proposal associated with holding up ANWR.

I am somewhat disappointed we were not able to have more time today. Hopefully, the leadership can work out coming in at noon on Monday.

I thank the Chair for its courtesy. I yield the floor.

The PRESIDING OFFICER. The Senator from Montana.

GUN SHOW BACKGROUND CHECK ACT

Mr. BAUCUS. Mr. President, I rise to comment on the words spoken earlier this morning by my very good friend and colleague from Rhode Island, Senator REED. Earlier this morning, Senator REED announced his intention to bring S. 767, the Gun Show Background Check Act, to the Senate floor this year.

At the outset, I deeply respect the Senator from Rhode Island. I think he is a very fine public servant, one of the brightest and most dedicated with whom I have had the privilege to serve. I respect his concerns about guns generally and guns in America. I do not believe, as he stated, that instituting background checks at gun shows will correct the concerns he raised. The events of September 11 and the ensuing concerns about terrorist threats have led to a resurgence by some for stricter gun laws. But with all due respect, responding to terrorism by calling for background checks at gun shows is not an effective tool for making this country safer.

The hijackers of September 11 were not armed with guns. The tragic deaths

of thousands in New York didn't involve a single bullet. The anthrax that arrived in the office of my next door neighbor, Majority Leader DASCHLE, had nothing to do with background checks. The acts of the terrorism on America to date have not been related to guns in any form.

I am not trying to deny the risks and dangers that we face from weapons in the hands of terrorists. But I do not believe that terrorist organizations are buying their weapons one pistol at a time from American gun shows, nor do I believe that closing the so-called gun show loophole will result in fewer guns in criminal hands.

I strongly support the actions our law officials have taken to make our country a more secure place since September 11. And I thank them for their dedication and hard work. They have worked so hard and in many cases overtime, extra hours, no vacation. It is amazing and inspiring. But while we tighten our borders and patrol our country, we must remember the balance between protecting our safety and protecting our civil rights.

Restricting our citizen's access to firearms chips away rights protected by the Constitution. Cloaked in the mantle of eliminating terrorism, bills such as "The Gun Show Background Check" restrict the second amendment and make it more difficult for law abiding citizens to purchase guns.

My State of Montana has a heritage based on hunting and enjoying the great outdoors. Gun shows are events typically held in town meeting halls on weekends. They are very well attended. They are big events. You would be astounded at all the people there going to and fro and talking and exchanging information. People come together and meet neighbors and possibly purchase a rifle to be used on a hunting trip. In addition, gun shows simply are not set up with the technology to make background checks feasible. They are temporary events, and they are not able to be connected to the NICS system for background checks. It is technically impossible.

I appreciate deeply my colleague's concerns, but I do not believe that gun show checks begin to address terrorism or gun violence. We have safeguards in place to keep guns from falling into the wrong hands and focusing on guns when talking about terrorism is missing the bigger picture.

Let's move on to getting an economic recovery bill passed to boost our economy and prove to the terrorists that their actions cannot stop America's progress. Let's get our aviation security bill implemented so our citizens can get back up in the air with complete confidence. Right now, it is the big picture on which we must focus. Gun shows aren't part of the problem, and background checks at the gun shows are not part of the solution.

I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DASCHLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. CORZINE). Without objection, it is so ordered.

WORLD AIDS DAY

Mr. DASCHLE. Mr. President, every December first since 1988, World AIDS Day has been a day dedicated to sending messages of compassion, hope, solidarity, and understanding.

Commemorating this day is a small but important gesture, and it is the least we can do in the face of the worst pandemic mankind has ever known. Yesterday, UNAIDS and the World Health Organization released a joint report that illustrates the enormity of the AIDS pandemic. The numbers are so staggering that they are almost incomprehensible. There are now 40 million people living with AIDS. Two point seven million of them are children. In the past year, there have been 5 million new HIV infections and 3 million AIDS deaths.

Many countries are seeing their future—embodied in their young people—ravaged by this disease. People under the age of 25 represent half of all new HIV infection cases, and there are now 10 million people between the ages of 15 and 24 living with HIV/AIDS. Every minute, five more young people are infected with HIV. As I have argued before, this is not just a humanitarian issue, it is also an economic and national security issue.

The International Labor Organization reports that by 2020, AIDS will reduce national workforces so much that countries with the highest rates of prevalence will see their GDPs drop by as much as 20 percent in the next 20 years. How can companies in these nations afford the increased costs for insurance, benefits, training, and illness in his environment?

The Food and Agriculture Organization reports that 7 million farm workers have died from AIDS-related causes since 1985, and 16 million more are expected to die in the next 20 years. How can these countries maintain—let alone increase—agricultural output under these circumstances?

The United Nations reports that in 1999, 860,000 students in sub-Saharan Africa lost their teachers to AIDS. How can countries educate their children with these losses? These numbers are a disturbing snapshot of the epidemic today. Tragically, they may only be the tip of the iceberg.

Experts tell us that the epidemic in many parts of the world is still in its

early stages. Globally, most people infected are unaware they carry the virus. Many millions more know nothing about HIV and how to protect themselves against it. If we are ever to staunch the AIDS epidemic, we must continue—and increase—our efforts at prevention.

Since the 1980s, the United States has found prevention efforts such as school-based education, perinatal prevention programs, and screening the blood supply, to prove effective. As a member of the family of nations, we have to do a better job of promoting and supporting international prevention and education programs. We were able to take a positive step in the foreign operations appropriations bill, where the Senate added significant funds to invest in prevention programs around the globe.

I am hopeful the final bill will include those funds, but prevention and treatment must go hand in hand, because without treatment options, at-risk individuals have no incentive to submit to testing or to practice prevention. We have taken some positive steps in treating HIV/AIDS, but much more needs to be done. We have worked hard to invest \$300 million for the U.N. Global Trust Fund on AIDS, TB, and Malaria. While it is not nearly enough for this challenge, it is a significant first step.

As that fund is developed, we have to make sure that its resources are dedicated to fighting this disease on all fronts—including treatment. While there is pressure to limit the focus of the fund to prevention alone, that would be a mistake—and it would limit our ability to develop a comprehensive agenda to confront this pandemic.

The theme designated for this year's World AIDS Day is simply: "I care. Do you?" While our words today are important, it is our action every day—on all fronts, in all nations—that are the true measure of our caring. On this day, let us recommit ourselves to fighting, and ultimately defeating, this scourge.

The PRESIDING OFFICER. The Senator from New Mexico.

ORDER OF PROCEDURE

Mr. DOMENICI. Mr. President, I ask unanimous consent that I be permitted to speak for 4 minutes as in morning business.

The PRESIDING OFFICER. Is there objection?

Mr. REID. Mr. President, I say to my two friends I have certainly no problem with the Senator from New Mexico speaking for 4 minutes, and I understand my friend from Oklahoma wants to speak for 10. When we came in this morning, we made an announcement we would try to wrap up by 1:15 p.m. today. We would have tried to do it sooner, but with the cloture petitions

pending Senators had until 1 p.m. today to file their amendments. We wanted to really wrap this up. The Dirksen Building is going to be closed off. In fact, the process is beginning now. By 4 p.m., it will be wrapped up.

I have a few things to do when the two Senators complete their statements, and then we will close the Senate. We did not ask for a unanimous consent this morning, thinking something such as this might happen, but we appreciate the cooperation and look forward to the statements of the two Senators.

I ask unanimous consent that the Senator from New Mexico be recognized for 5 minutes, the Senator from Oklahoma for 12 minutes, and that I be recognized to close the Senate following those statements.

The PRESIDING OFFICER. Without objection, it is so ordered.

STIMULATING THE ECONOMY

Mr. DOMENICI. Mr. President, first I say to the occupant of the chair, the junior Senator from New Jersey, when he came to the Senate he brought with him a rather distinguished career in investment banking, as I understand it, with a specialization in bonds. Whatever the case may be, he brought with him a tremendous expertise with reference to the American economy. Therefore, it makes me doubly proud that the idea many people suggested to me, that ends up being called a Social Security withholding tax holiday for 1 month, is supported by the occupant of the chair, because I give a lot of credit to somebody who comes to the Senate from the business world, talks with the business world, talks with labor union people and comes up with an analysis of what will, indeed, be the best economic stimulus of those that have been presented that could be adopted before Christmas and be effective, regardless of the arguments, during the next 4 to 5 months. It clearly could be in full effect.

First, those who have supported me from the standpoint of business are in pretty good company. So whatever we hear from some, that this cannot be implemented and that maybe it is not a good idea, let me introduce a letter which I received on November 30. It is a very current letter. It is from the Business Roundtable. Now, the Business Roundtable has a lot of American business members. This letter comes from the president, John Castellani—good Italian American name. We had not spoken in advance of my amendment, but this letter, so everybody will know, is an unequivocal enforcement of the holiday as being the best economic stimulus and the best news to provide confidence in the American people and that will move the economy ahead in terms of what it needs to give it a jump start in these very difficult times.

We all know we ought to do two big things. One, we ought to pay for all the military needs of our country in a very good appropriations bill. The President has told us what he needs. We need to do that. I understand it will be done next week. That is good.

The other thing we have to do is pass a stimulus package. We do not have to pass a package that has a "stimulus" label on it. We have to pass one that could be sent out to the business community, to the others who know what is happening in the American marketplace, and ask them, will this actually stimulate the economy? Then we could say "stimulus," and those who know say it will stimulate. It is not a bill to meet a commitment.

This letter ends up saying, because there are some who say it will take too long, I say to the occupant of the chair, to implement, that some express concern about the ability of companies as a practical matter to implement this on short notice. We have surveyed our companies to see how quickly the payroll reduction could be implemented. These companies, some of the Nation's largest employers, have said it would be implemented in a range of a couple of days to a maximum of 3 weeks if it is kept simple. We have some leeway as to how to implement that holiday.

I ask unanimous consent that the letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE BUSINESS ROUNDTABLE,
Washington, DC, November 30, 2001.

HON. PETE V. DOMENICI,
Ranking Member, Senate Budget Committee,
U.S. Senate, Washington, DC.

DEAR SENATOR DOMENICI: The Business Roundtable believes that an economic stimulus is needed, and needed now. Moreover, we believe the stimulus should focus on enhancing consumer confidence and spending; that broad-based and significant incentives are needed to spur business demand; and both should be of a size and duration to change spending behavior in the near term.

To that end, the members of The Business Roundtable believe two measures would work quickly and effectively to improve cash flow and stimulate demand and productivity. First, we recommend an immediate reduction in the payroll tax. This action, more than any other proposal, will put money into the hands of those who need it and will spend it. A payroll tax reduction diversifies the stimulus on both the demand and supply sides. It also focuses assistance on lower-income individuals. Reducing both the employee and employer portions will reduce pressure on labor costs, and give both employers and employees more cash as soon as the next payday, thus relieving financial pressures on both. Your proposal for a withholding tax "holiday" certainly meets these criteria.

We continue to believe that enhancing business demand is essential for achieving a quick recovery. Again, the business incentives should be broad-based and of such a magnitude that they change business behavior by accelerating spending that is now being deferred. We also believe that any

business stimulus must deal with existing tax provisions, such as Alternative Minimum Tax, which would act to negate the impact of the stimulus.

We also understand there has been some concern expressed about the ability of companies, as a practical matter, to implement a payroll tax reduction on short notice. We have surveyed our companies to see how quickly a payroll tax reduction can be implemented. These companies, some of the nation's largest employers, have said it could be implemented in a range of a couple of days to a maximum of three weeks if it is kept simple, and we have some leeway how to implement the tax holiday.

If we can provide further information, please do not hesitate to contact me.

Sincerely,

JOHN J. CASTELLANI.

Mr. DOMENICI. I hope those talking will at least put this letter among the things they consider in terms of the reality of the impact on the American consumer, the American buyer and seller, the American worker, and the American employer. This says an awful lot about many employed people. I don't know how many million American employees are represented by this group, but it is an awful lot.

Having said that, I understand there is some concern about the Social Security recipients of our country. Nobody will disagree the best thing for the Social Security trust fund and the best thing for you, Social Security recipients of the future, is for this economy to get going sooner rather than later. If we had a little time, we could debate and show graphs about what will happen to Social Security if this American economy stays in the tank for another year or for 2 years and what will happen if it comes out in 6 months. If we can get it out quick and get it growing, every Social Security recipient of today and those planning on it in the future will know the best thing we can do is pass the stimulus package. That will start the economy. There is no harm to the Social Security trust fund.

We are already using it because we are in the red. All we are saying is, as soon as we take it out, we replenish it, day by day, hour by hour, and nothing can happen to the fund. If you want to talk about protecting it, that is all well and good, but the reality is the best way to protect it is to do it and pass this stimulus. That will help the Social Security recipients the most.

I yield the floor.

The PRESIDING OFFICER. The Senator from Oklahoma.

RAILROAD RETIREMENT

Mr. NICKLES. Mr. President, I congratulate and compliment my friend and colleague, Senator DOMENICI, for his statement and also for his leadership and his innovation. He has come up with an idea to help stimulate the economy that is far superior than some of the proposals being discussed, one of which is to give \$300 per individual or

\$600 per family if they did not get a check last year.

Last year, we gave checks to people who paid taxes. Some people were saying, "Give money to people that did not pay taxes," notwithstanding the fact they were eligible for the earned-income tax credit, which, in many cases, was worth 3 or 4 times whatever payroll taxes they might have paid. The position of the Senator from New Mexico is far superior.

I happen to be one concerned about deficits and I am concerned about runaway spending. I contacted some individuals and said, we have agreed to 13.3 percent spending growth for next year, but many others say that is not near enough; we need to do more. So I will state a few facts.

Last year's spending—the spending we completed in September 2001, total discretionary spending, the spending we control by appropriations, that fluctuates, whatever we appropriate—was \$640 billion, 9.6 percent more than the previous year, which was at \$584 billion.

The President's budget for 2002, which we have just started for the fiscal year, was to grow at 6.1 percent. He agreed in a bipartisan agreement to throw in a few billion more for education, and there was an agreement with the appropriators to increase that figure to \$686 billion. That calls for a growth rate of 7.1 percent. That was agreed to in October. Some of our colleagues almost insulted the President, saying they wanted it in writing. The President gave it in writing, in a letter in October, that all the appropriated accounts would be at \$686 billion, a growth rate of 7.1 percent.

With the tragedy of September 11, the President agreed we had a bipartisan agreement to increase that level. Originally, it was \$20 billion, and at the last day that was doubled, from \$20 to \$40 billion, due to requests in New York, New Jersey, and other places. There is, again, bipartisan agreement that was adopted unanimously in the Senate.

Adding the \$40 billion on top of the \$686 billion, it is \$726 billion, an increase of 13.3 percent. That is where we are now. That is a lot. It is several times the rate of growth of inflation. But the \$40 billion is extraordinary, so maybe we should not count that, but we have a lot of other things happening. We still need budgets. Senator DOMENICI, former chairman of the Budget Committee, used to hammer on fiscal discipline, and we are acting as if fiscal discipline does not matter.

A few other things have happened. We have passed an airline assistance or the airline bailout bill. The cost of that, most people believe, is \$15 billion. It is not really. There was a \$5 billion cash outlay and \$10 billion in loan guarantees. Hopefully, the \$10 billion in loan guarantees will not cost that much; it will be significant cost.

We have also passed a victim's compensation fund. I know the occupant of the care has to be familiar with this because he has constituents involved. There is a lot of liability dealing with the victim's compensation funds. We passed that as part of the airline bill. I opposed it because I didn't think we had enough time to consider how to compensate victims from the September 11 disaster. A lot of people were killed and a lot of people injured. How do we compensate them? We created a special master. The President appointed a special master. I compliment him. The special master has one of the toughest jobs anywhere. I compliment him. He is doing it pro bono. It is a big challenge. He will try to meet deadlines, in months, to come up with a fair and equitable compensation system for victims. It could cost the Government billions of dollars. No one has a clue how much that will cost. That is already the law of the land.

We don't know how much the insurance companies are going to pay. Hopefully, most of the money comes from insurance proceeds. Again, that is out there. It is a liability. And there are other items. Many that we are considering will be resolved in the next couple of weeks. One is the railroad retirement bill, with an outlay of \$15 billion. We will write a check.

I am embarrassed for the House, saying this doesn't count, this check we will write does not count; we will not score it. I can't remember ever doing that, certainly not to the tune of billions of dollars. It is shameful and disgraceful, and it should not happen. I will work to see it does not happen. I predict I will be successful.

If it passes, we might as well throw away the budget. If we are going to put in language, "this doesn't count toward the budget; ignore it; don't count it or score it," then why have a budget? There is no sense whatever. The cost of that bill is \$15 billion.

Also, when Senator DOMENICI was speaking, he came up with an idea for a payroll tax holiday. His idea was not written by lobbyists. The railroad retirement bill was not written by Congressmen or Senators. I cannot remember in my 21 years in the Senate ever having a bill totally written by special interest groups that cost billions of dollars that nobody even touched. Nobody had a hearing. There was no hearing in the House or in the Senate.

I have been working on pensions for a long time in my own company, and when I was in the State senate, I was on the retirement committee. My first trip to Washington, DC, was on ERISA, Employee Retirement and Income Security Act. I know a bit about pensions. Nobody is looking at it. I will look at it a lot more since we will be on that next week.

My point today is some are willing to commit another \$15 billion. All of this

adds to the deficit, all of this adds to the publicly held debt. Some people have suggested there is no cost involved. We are moving from government to government debt, or government IOU in a fund that does not cost us an outlay, real outlay. Now we are moving it to publicly held debt where the Federal Government will have to write a check, where taxpayers have to pay \$1 billion in interest expense for the \$10 billion.

That is not the only spending program we have going. We would have the stimulus package. Senator BAUCUS had a bill from the Finance Committee. There was over \$2 in spending for every \$1 of tax cuts. I will have this printed in the RECORD so people can see it.

There were tax cuts of \$19.4 billion, but the rest of it is spending—maybe using, in some cases, the Tax Code, like supplemental rebate checks. We would give people checks even if they did not pay taxes. How can you call that a tax cut? That is a check. We are writing checks. It doesn't have anything to do with cutting taxes.

There is expansion of unemployment benefits, which I am sure we will probably agree to a significant expansion of unemployment benefits, probably a 50-percent expansion in time eligibility, going from 26 weeks to an additional 13 weeks. I expect that will be agreed upon.

Most of this is \$66.8 billion, with the compensation of \$19 billion; the rest of it is spending. There is over \$2 in spending for every dollar in tax decrease. So I am adding that spending under the spending we have already had. If that were included, and hopefully most will not be, we have a lot of spending in that capacity.

We have the farm bill. If our colleagues have not looked at the farm bill—and I heard there may be a motion to move to the farm bill before too long—I hope they will look at it. I am from a farm State. I am embarrassed for the farm bill that came out of the Agriculture Committee. I am embarrassed for it. I was embarrassed when we had the stimulus package and I noticed there were several billion dollars for agriculture for subsidies for bison and cranberries and items that we never had in an agricultural program, and now we are looking at the farm bill and talking about subsidies in the billions of dollars. We are talking about raising the price of milk 26 cents a gallon for everybody in America.

This farm bill goes the wrong way and it spends a whole lot of money. I don't know if people are trying to harvest the Government or what, but the net result of that farm bill is people are going to make more money from the Government than they will ever make from agriculture. The sad point is 10 percent of the farmers are going to get over half the benefit. We are

going to have to discuss that for a while. We are going to have to change it. The Senate is the place to change it. I don't care if we do it this year or do it next year—that is the majority leader's call—but we are going to spend a little time on that bill. It needs to be improved. It costs a lot of money and that is the essence of my comments today.

Who writes the budget? Where is the Budget Committee chairman? Where is the fiscal discipline? We are now in the red. Granted, we had bipartisan agreement to go to increases of spending to 7.1 percent. Then we all agreed, let's have another \$40 billion to deal with the disaster. But there are lots of other proposals. I didn't mention Senator BYRD had another proposal for another \$15 billion for homeland security. I think a lot of that can be financed out of the \$20 billion. We have not even finished spending the second \$20 billion of the \$40 billion that is now added to the Department of Defense bill. We have not finished that. Yet some say we have to add \$15 billion on top of it.

If I look at the spending package submitted by Senator BAUCUS, I am looking at spending that is close to \$50 billion. Since they add Senator BYRD's package to it—or at one time it was over, it was \$60 billion in spending and \$19 billion in tax cuts.

Then we have the farm bill, and I see the farm bill will cost billions and billions of dollars. I think that is grossly irresponsible. I am looking at the farmers in my State. How much are they making? I have farmers in my State making millions of dollars a year from taxpayers. These are millionaires in the first place. I love them, but I don't think we should have to be writing them a check—just as I don't think we have to write major investment companies a \$4,800 tax credit for every employee they employ in New York City. I want to help New York City, but what are we doing giving them almost a \$5,000 tax credit? If they have 100 employees, we are going to give them a \$500,000 tax credit? For what? Let's help people who need help.

I think it is running away. I think spending has gotten out of hand. I think we are going to have to draw the line. I think we are going to have to show some fiscal discipline. We have not been showing it lately.

President Bush has actually drawn the line and said: I am going to stay with this amount. He said: I will come back to Congress and work with Governor Ridge and make additional submissions when we really know exactly what we need and we will do that next year. He has the votes to support him in the Senate. I hope we do not say we will try to run over him and come up with a higher amount and defy him to veto it. He said he will veto it. We have the votes to sustain the veto so let's not waste our time. Let's act together,

start acting as if we have a budget and not pass bills that say this \$15 billion doesn't count. That would be the height of fiscal irresponsibility.

I urge my colleagues, let's start showing a little fiscal discipline. Let's start totaling up what we have done so far on the spending side and make sure we do not build ourselves into such a fiscal posture that the new base of spending is such we will never be able to climb back into a surplus.

I notice my friend and colleague from Nevada is here. Let me conclude with a couple of requests.

CONFIRMATIONS

I have had the pleasure of working with the Senator from Nevada for 20-some years. I think the world of him. He and I are both engaged in trying to help people get confirmed. I urge my colleague, in every way I possibly can, to help us confirm Gene Scalia. Gene Scalia, who happens to be the son of Justice Scalia, was nominated by President Bush in April to be Solicitor for the Department of Labor—Secretary Chao's Department of Labor. Secretary Chao talked to me. She needs Gene Scalia. She needs a Solicitor. That is one of the most important positions in any agency and certainly in the Department of Labor. She needs Gene Scalia. She asked me numerous times: Please, will you confirm Gene Scalia. I told her I would do everything I could.

There are two other nominees I urge my colleague to assist us with, two nominees for the court of appeals. One is Miguel Estrada, a Honduran native, Hispanic. When he came to the United States he couldn't even speak English and graduated in the top of his class at Harvard. He is an outstanding individual. We have letters of support on Miguel Estrada from everybody, prominent Democrats and others who say he will be an outstanding jurist.

One other individual is John Roberts, Jr., who is also nominated to the Circuit Court of the District of Columbia. He argued, I think, 30-some-odd cases before the Supreme Court. He is an outstanding individual. Both of these individuals were nominated by President Bush in May and they have not even had a hearing.

We have a lot of vacancies in the circuit court. The circuit courts are extremely important. These two individuals are extremely qualified. I do not know that you could find two more qualified individuals anywhere in the country than Miguel Estrada and John Roberts, Jr. So I urge my friend from Nevada and the majority leader, and Senator LEAHY, give us hearings on these two individuals. I can assure you if they have hearings they will have overwhelming votes in both the committee and the Senate. They will be confirmed overwhelmingly. I feel more than confident that will be the case.

I also urge my colleague to give us a vote. Gene Scalia is on the calendar.

Give us a vote on Gene Scalia as Solicitor for the Department of Labor.

I yield the floor.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. Mr. President, my feelings are just as strong. My affection for the Senator from Oklahoma is just as strong as he has expressed regarding me. I have not heard of John Roberts. I have heard of Miguel Estrada. From all I know about both of them, they are fine individuals. I see no reason they should not be sitting on the DC Court of Appeals. But that is the extent of my knowledge. I will do what I can to make sure there are hearings scheduled.

As I said to my friend on a number of occasions, people deserve hearings. We are going to do everything we can to live up to what Senator DASCHLE and I have said. Senator LEAHY reported nine out yesterday, including one circuit court judge. We expect to have votes on those shortly. He is going to have hearings again next week. It is my understanding—I do not know if there is going to be hearings but he said he would report out at least four or five more. So that is 13 or 14 judges we would have.

I was talked to yesterday about Sansonetti; the Judiciary Committee did report him out yesterday. There has been some controversy over that. I see no reason, now that he has been reported out, that we cannot move forward.

I don't know Mr. Scalia. I never met him. I am only speaking for myself, and certainly not Senator DASCHLE, nor the rest of the Senators. I think the situation with Mr. Scalia may be a little more difficult. A number of Members have spoken to me. No one questions his integrity or his credentials, that I know of, or that he is a competent lawyer. I think the question is whether this is the right place for him. If he were chosen to be the solicitor of any department other than the Department of Labor, I think his nomination would fly through. But because of very strong anti-labor comments he made, a number of Members on my side have come to me to express some real concerns.

Being as candid as I can with my friend, I think that may be a little more difficult but something on which we can work.

Mr. NICKLES. If the Senator will yield further, Gene Scalia was reported out of the Labor Committee on October 17. He has been on the calendar. I urge that we have a vote. There is not an anti-labor bone in his body. If anybody questions that, I urge them to talk to him. Some people are trying to hold up his nomination because he had some questions about ergonomics. The Senator from Nevada, I know, had serious questions about ergonomics. In their proposed regulations, the Clinton administration tried to almost legislate a

Federal workers compensation system without going through Congress.

Again, I think Gene Scalia is an outstanding nominee. I think the Secretary of Labor is entitled to a solicitor, and he is certainly entitled to a vote to find out where the votes are. I urge my colleagues to help us make that happen, to give him a vote and a day in the Senate, and not keep him in limbo indefinitely.

Mr. REID. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

LOCAL LAW ENFORCEMENT ACT OF 2001

Mr. SMITH of Oregon. Mr. President, I rise today to speak about hate crimes legislation I introduced with Senator KENNEDY in March of this year. The Local Law Enforcement Act of 2001 would add new categories to current hate crimes legislation sending a signal that violence of any kind is unacceptable in our society.

I would like to describe a terrible crime that occurred in May 1996 in Philadelphia, PA. Stephen Leo Jr., 19, and Kevin Zawojski, 17, yelled anti-gay slurs and beat a man they believed to be gay. Mr. Leo was sentenced to 18 to 36 months in jail and Mr. Zawojski was sentenced to 29 to 58 months in jail in connection with the incident.

I believe that government's first duty is to defend its citizens, to defend them against the harms that come out of hate. The Local Law Enforcement Enhancement Act of 2001 is now a symbol that can become substance. I believe that by passing this legislation, we can change hearts and minds as well.

ADDITIONAL STATEMENTS

RECOGNITION OF THE OUTSTANDING ACCOMPLISHMENT OF CUBA, MISSOURI

• Mr. BOND. Mr. President, I wish to make a few comments on the outstanding accomplishment of Cuba, Missouri on becoming the official Route 66 Mural City as declared by the Missouri State House of Representatives.

Cuba, Missouri is located along Interstate 44 and highway 19 near the Meramec River State Park and the Huzzah river in Crawford County. Also, located near by is the beautiful Mark Twain National Forrest offering a great deal of hunting, fishing and water recreation. Cuba is a beautiful city and has much to offer its citizens and those who visit.

Located along the historic Route 66 and established in 1857, Cuba has witnessed and been a part of many historical events. Through local artisans, Cuba, MO has taken the incitive to remind its citizens and those who visit of its storied past through three murals on local buildings. The three murals currently displayed on the buildings depict the early history of the town, and present us with a reminder of its beautiful apple orchards, the six residents who lost their lives defending this great nation during World War Two, and the original Peoples Bank building. These murals also are a reminder of the history that not only shaped Cuba, but our great state as well. Although the population of Cuba is only about 3,200 people, the city continues to grow and prosper. I commend them on taking the incitive to remember our history and educate those who visit this great city by this beautiful display of art work.

There are plans to finish ten murals along historic Route 66 by the year 2007. Cuba was the first community to take the initiative to paint these murals and now serves as the center for development for these murals, including obtaining a trademark on Route 66 Murals. Again, I congratulate them on such a wonderful project.●

GOD BLESS AMERICA

• Mr. FEINGOLD. Mr. President, the Wisconsin State Council of Vietnam Veterans of America, part of the congressionally chartered Vietnam Veterans of America, have been steadfast advocates for Wisconsin's veterans and their families. They have asked me to have printed in the RECORD the following editorial from The Badger Veteran, the newsmagazine that they produce.

The editorial follows.

MAY GOD BLESS AMERICA

The men and women of the Wisconsin State Council of Vietnam Veterans of America understand all too well the horrors of war. Until September 11th, our nation was blessed to have 136 years without a life being lost on America's mainland to war. Our sense—our collective illusion—of invulnerability was shattered forever by acts of terror in New York, Washington and Pennsylvania on the 11th of September.

Our national security must never again be treated as an afterthought. It must not be placed on hold in the name of inconvenience not compromised because it might have some limited impact on the bottom line of our country's economy.

A generation ago, we sent millions of Americans to fight a protracted war in Southeast Asia. The vast majority of Americans had the luxury of turning out that war simply by tuning off their TVs whenever they grew tired of it or found it too depressing. It is a luxury no American will ever have in our war against terrorism.

Today, America has once again been drawn into a war—one not of our making. It will be protracted. It will be very costly—in dollars and, tragically, as in any war, in more lives,

including more American lives. As veterans, we understand there is nothing fair or good about any war. And we know Americans will no doubt find themselves debating the conduct of this war in the halls of Congress and in homes and byways throughout our nation. There is nothing wrong with free and open debate. It is the American way. But Americans are also an impatient people who like quick resolution of events that disrupt their lives. This war promises no quick fixes. It will take more time than we will have patience. But patience is something for which Americans must collectively and continually search our very beings as the frustrations of a protracted war begin to take their toll on our resolve. And patience will have to be found time and again if we are to prevail.

We urge the people of Wisconsin and the United States to stay the course until we cripple the world's terrorist networks. We urge President Bush and our national leaders to be mindful of the lessons of the Vietnam War, the Soviet-Afghanistan War and the Powell Doctrine with respect to committing U.S. ground troops to foreign battlefields. And we ask and expect that criticisms of this war and its policies will be directed at our government and our leadership who are responsible for the policies and never again at the men and women our government sends into harm's way on behalf of our nation.

This is also a time for remembering, for coming together. A time to heal while being vigilant. A time to remind our foes that when threatened or attacked, we will respond with a ferocity that they shall regret unleashing. As President Bush stated, we are a good, peace loving nation. Our enemies proceed at their peril whenever they infer from our nature that we will turn the other cheek when attacked.

This will also be a time for the vast majority of Americans—especially young Americans—to learn about the importance of some "old fashioned" values that have lost relevance to too many for too long. Values like duty, honor and country, with an increased appreciation for a simple, compelling fact: Despite all of America's flaws and shortcomings, we have the privilege of living in the greatest nation on earth.

On behalf of the members of Vietnam Veterans of America in Wisconsin and ourselves, we rededicate the Wisconsin State Council's commitment to our Founding Principle, "Never again will one generation of veterans abandon another." And we promise to continue our efforts to make VVA's motto, "In Service to America," an ongoing reality.

May God bless the United States of America. And may peace return to our shores and the world with dispatch.

PAYING TRIBUTE TO DR. STEVEN HYMAN

• Mr. DOMENICI. Mr. President, it is with genuine regret that I learned about the planned departure of Dr. Steven Hyman as Director of the National Institute of Mental Health at the NIH. Steve is a Harvard-trained psychiatrist and neuroscientist who has impressed me with his deep understanding that mental illnesses are very real disturbances occurring in the brain, the most

complex structure in the known universe. Steve used his expertise as a scientist, along with his remarkable ability to make science readily understandable to lay persons, to convey a simple but profound message to us and to the American public, that there is no scientific or medical justification for treating mental illnesses differently than any other illness.

Dr. Hyman has been at the helm of NIMH with a commitment to encouraging and supporting the basic research that will enable us to develop exciting new treatments, based on an understanding of the disease process itself. Although our current treatments get increasingly better, they are not perfect, they need to be more targeted and rational because as good as these treatments are, those with mental illness desperately need treatments that are more effective. We need to know how these medications are going to work in patients living in the real world, with real work problems because people suffering from severe mental illness often have very complex complicating factors that contribute to the mental illness.

I want to express my sincere appreciation for Steve Hyman's forceful voice of reason, explaining patiently and constantly that, while we don't understand mental illness completely, thanks to magnificent new technology and scientific knowledge, the brain is unlocking its secrets, and the future is bright. This, in turn, I believe has helped convince our colleagues, and the American public—that there must be parity for mental health now.

Steve will be missed, but he has accomplished much during his tenure at the National Institute of Mental Health; his success in bringing research on mental disorders to the forefront of public consciousness will be a strong foundation that his successor must build upon. Nancy and I wish Steve and his family great success and happiness as he begins his new duties as Provost at Harvard University.●

A TRANSITION FOR ONE OF OUR NATION'S
FOREMOST MENTAL HEALTH LEADERS

● Mr. WELLSTONE. Mr. President, I rise today to recognize the extraordinary achievements of Dr. Steve Hyman as Director of the National Institute of Mental Health at the National Institutes of Health, and to acknowledge his departure as he moves forward to become Provost of his alma mater, Harvard University. As we strive to maintain the recent Senate victory passing mental health parity legislation, I am reminded again about how fortunate it was to have Steve's leadership during these critical years. His expertise and remarkable ability to convey complex scientific information to the public and to Congress have brought us so much further in the struggle to reduce stigma and to recognize as a society that mental illnesses

are real and treatable. The basic scientific facts of mental illness are straightforward, but the difficulties encountered by those who want to eliminate the cruel and unjust stigma that surrounds diseases like schizophrenia, depression, bipolar disorder and others have been monumental. Mental illnesses represent a major portion of the disease burden in the United States and worldwide; depression is the leading cause of disability in the U.S. and throughout the developed world. And yet, our efforts to reduce stigma and provide fair treatment for people with mental illness are still needed. Parity for mental health treatment is a civil rights issue, and the fight for the rights of those with mental illness will not be stopped.

When Steve first came to NIMH, he immediately stated unequivocally that there is no scientific basis for treating mental disorders any differently than other illnesses with respect to insurance coverage. That was his objective and straightforward view as a distinguished neuroscientist. I have watched Steve for these last 5½ years at the helm of NIMH, and he has clearly taken the scientific study of mental illness very far. His leadership and his extraordinary talents as a scientist, communicator, and teacher have made him a major force in advancing the public's awareness of the brain and its dysfunctions. Although stigma still exists, these are very few who dare to challenge the scientific record that mental illnesses are very real disorders of the brain, often disrupting that which makes us most human, our behavior.

I am particularly pleased that Steve has been at the forefront of the efforts to include the voices of patients and families in the overall planning process at the NIMH. He has sponsored public, participatory meetings in various areas of the country, not only to bring information about the latest scientific breakthroughs, but also to seek input from people who live in diverse cultures. To his credit, Steve understood that this process was necessary so that we ensure that the NIMH addressed questions that are relevant and important to all Americans, and to include this information in planning the future of NIMH's research agenda. Steve also enthusiastically supported the effort to include public members as part of the scientific peer review panels that review grant applications. Steve believes, as I do, that the views of patients and family members are crucial because they offer a unique view of research. They ask, Steve often said, the "so what" questions that are critical to the real lives of people: Will this research help those who are suffering? Will it make a difference?

As he departs, I know that many of my colleagues join me in wishing him well and thanking him for all he has

done to further scientific research and treatment of mental illness. I am confident that Steve has placed the NIMH on a course that promises to build on the remarkable achievements already achieved, one that will take full advantage of scientific opportunities and the extraordinarily challenging public health needs that we as a country are now facing. Dr. Steve Hyman will be sorely missed, but I know he will continue to be a major force for the improvement of mental health care worldwide.●

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. McCathran, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 10:40 a.m., a message from the House of Representatives, delivered by Ms. Niland, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 3210. An act to ensure the continued financial capacity of insurers to provide coverage for risks from terrorism.

The message also announced that the House agrees to the amendment of the Senate to the bill (H.R. 717) to amend the Public Health Service Act to provide for research with respect to various forms of muscular dystrophy, including Duchenne, Becker, limb girdle, congenital, facioscapulohumeral, myotonic, oculopharyngeal, distal, and Emery-Dreifuss muscular dystrophies.

The message further announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 2299) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 2002, and for other purposes.

ENROLLED BILLS SIGNED

At 10:53 a.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the Speaker has signed the following enrolled bills:

S. 1459. An act to designate the Federal building and United States courthouse located at 550 West Fort Street in Boise, Idaho,

as the "James A. McClure Federal Building and United States Courthouse."

S. 1573. An act to authorize the provision of educational and health care assistance to the women and children of Afghanistan.

The enrolled bills were signed subsequently by the President pro tempore (Mr. BYRD).

MEASURES PLACED ON THE CALENDAR

The following bills were read the second time, and placed on the calendar:

H.R. 2722. An act to implement effective measures to stop trade in conflict diamonds, and for other purposes.

H.R. 3189. An act to extend the Export Administration Act until April 20, 2002.

MEASURES READ THE FIRST TIME

The following bills were read the first time:

H.R. 3210. An act to ensure the continued financial capacity of insurers to provide coverage for risks from terrorism.

S. 1748. A bill to promote the stabilization of the economy by encouraging financial institutions to continue to support economic development including development in urban areas, through the provision of affordable insurance coverage against acts of terrorism, and for other purposes.

ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that on today, November 30, 2001, she had presented to the President of the United States the following enrolled bills:

S. 1459. An act to designate the Federal building and United States courthouse located at 550 West Ford Street in Boise, Idaho, as the "James A. McClure Federal Building and United States Courthouse."

S. 1573. An act to authorize the provision of educational and health care assistance to the women and children of Afghanistan.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as follows:

EC-4592. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, a report entitled "Nutrient Criteria Technical Guidance Manual; Estuarine and Coastal Marine Waters"; to the Committee on Environment and Public Works.

EC-4718. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives: Estrom Helicopter Corp Model F28, F28A, and F28C, F28F, 280, 280F, and 280FX Helicopters" ((RIN2120-AA64)(2001-0552)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4719. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation,

transmitting, pursuant to law, the report of a rule entitled "Amendment to Time of Designation for Restricted Area R4403 Gainesville, MS" ((RIN2120-AA66)(2001-0172)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4720. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Amendment of Class D Airspace; Titusville, FL" ((RIN2120-AA66)(2001-0173)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4721. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives: Boeing Model 737 600, 700, and 800 Series Airplanes" ((RIN2120-AA64)(2001-0555)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4722. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives: Gulfstream Model G V Series Airplanes" ((RIN2120-AA64)(2001-0554)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4723. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Temporary Extension of Time Allowed for Certain Training and Testing; FAA-2001-10797" ((RIN2120-AH51)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4724. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Aircraft Security Under General Operating and Flight Rules; FAA-2001-10738; SFAR 91" ((RIN2120-AH49)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4725. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives: Empresa Brasileira de Aeronautica SA Model EMB 135 and EMB 145 Series Airplanes" ((RIN2120-AA64)(2001-0524)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4726. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives: Rolls-Royce Corporation Model AE 3007A and AE 3007C Turbofan Engines" ((RIN2120-AA64)(2001-0525)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4727. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives: Rolls Royce Corporation AE2100 Turboprop and AE 30017 Turbofan Engines" ((RIN2120-AA64)(2001-0526)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4728. A communication from the Program Analyst of the Federal Aviation Ad-

ministration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Amendment of Class D Airspace; White Plains, NY—docket No. 01-AEA-05FR" ((RIN2120-AA66)(2001-0159)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4729. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives: Augusta Model AB412 Helicopters" ((RIN2120-AA64)(2001-0528)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4730. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives: Pratt and Whitney JT9D Turbofan Engines" ((RIN2120-AA64)(2001-0527)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4731. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives: Pratt and Whitney Canada PT6A Series Turboprop Engines" ((RIN2120-AA64)(2001-0532)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4732. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives: Eurocopter France Model AS350B, B1, B2, B3, BA, D, D1, and AS355E, F, F1, F2, and N Helicopters" ((RIN2120-AA64)(2001-0531)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4733. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives: General Electric Company T58 and CT 58 Series Turbofan Engines" ((RIN2120-AA64)(2001-0530)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4734. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives: Rolls-Royce plc Dart 525, 525F, 528, 528D, 529, 529D, 530, 532, 535, 542, and 552 Series Turboprop Engines" ((RIN2120-AA64)(2001-0529)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4735. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Revision of Class Airspace; Farmington, NM" ((RIN2120-AA66)(2001-0160)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4736. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives: Boeing Model 777-200 Series Airplanes" ((RIN2120-AA64)(2001-0523)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4737. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Establishment of Class E Airspace; Coudersport, PA" ((RIN2120-AA66)(2001-0157)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4738. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives: Airbus Model A300 B2 and B4 Series Airplanes and Model A300 B4-600R, and F4-600R Series Airplanes" ((RIN2120-AA64)(2001-0533)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4739. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives: Fokker Model F28 Mark 1000, 2000, 3000, and 4000 Series Airplanes" ((RIN2120-AA64)(2001-0519)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4740. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives: Boeing Model 767-300 Series Airplanes Modified by Supplemental Type Certificate SA7019NM-D" ((RIN2120-AA64)(2001-0521)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4741. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives: Fokker Model F27 Mark 100, 200, 300, 400, 500, 600, and 700 Series Airplanes" ((RIN2120-AA64)(2001-0520)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4742. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Change of Using Agency for Restricted Areas R 3008A, R-6B, R-3008C, and R-3008D; Grand Bay Weapons Range, GA" ((RIN2120-AA66)(2001-0158)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4743. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Revocation of Class D Airspace, Fort Worth Carswell AFB, TX; confirmation of effective date" ((RIN2120-AA66)(2001-0162)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4744. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Establishment and Revision of Restricted Areas, ID; correction" ((RIN2120-AA66)(2001-0161)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4745. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of

a rule entitled "Airworthiness Directives: Airbus Model A340-211 Series Airplanes Modified by Supplemental Type Certificate ST09092AC" ((RIN2120-AA64)(2001-0522)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4746. A communication from the Program Analyst of the Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Transport Airplane Fleet Fuel Tank Ignition Source Review; Flammability Reduction, and Maintenance and Inspection Requirements" ((RIN2120-AG62)) received on November 16, 2001; to the Committee on Commerce, Science, and Transportation.

EC-4747. A communication from the Acting Director, Fish and Wildlife Service, Department of the Interior, transmitting, pursuant to law, the report of a rule entitled "Endangered and Threatened Wildlife and Plants; Final Rule to List the MS Gopher Frog as Endangered" (RIN1018-AF90) received on November 27, 2001; to the Committee on Environment and Public Works.

EC-4748. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality Implementation Plans; Pennsylvania; Post 1996 Rate-of-Progress Plan and One-Hour Ozone Attainment Demonstration for the Philadelphia-Wilmington-Trenton Ozone Nonattainment Area" (FRL7089-2) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4749. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality Implementation Plans; Delaware; Post-1996 Rate-of-Progress Plans and One-Hour Ozone Attainment Demonstration for the Philadelphia-Wilmington-Trenton Ozone Nonattainment Area" (FRL7089-3) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4750. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality Implementation Plans; Maryland; One-Hour Ozone Attainment Demonstration for the Baltimore Ozone Nonattainment Area" (FRL7088-9) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4751. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality Implementation Plans; Pennsylvania; Reasonably Available Control Technology Requirement for Volatile Organic Compounds and Nitrogen Oxides in the Philadelphia-Wilmington-Trenton Area" (FRL7089-4) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4752. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality Implementation Plans; Maryland; One-Hour Ozone Attainment Demonstration for the Philadelphia-Wilmington-Trenton Ozone Nonattainment Area" (FRL7089-1) re-

ceived on November 16, 2001; to the Committee on Environment and Public Works.

EC-4753. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Incorporation by Reference of Approval State Hazardous Waste Management Program" (FRL7014-9) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4754. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Outer Continental Shelf Air Regulations Consistency Update for Alaska" (FRL7082-4) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4755. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality State Implementation Plans; (STP); Texas: Low Emission Diesel Fuel" (FRL7091-5) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4756. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality Implementation Plan; Oregon" (FRL7035-6) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4757. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of State Plans for Designated Facilities; Puerto Rico" (FRL7093-9) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4758. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Clean Air Act Determination of Attainment for PM10 Nonattainment Areas; Montana and Colorado" (FRL7093-7) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4759. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Clean Air Act Full Approval of Partial Operating Permit Program; Allegheny County, Pennsylvania" (FRL7093-3) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4760. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Clean Air Act Reclassification, San Joaquin Valley Nonattainment Area; Designation of East Kern County Nonattainment Area and Extension of Attainment Date; California; Ozone" (FRL7093-4) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4761. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality Implementation Plans; Montana; State Implementation Plans; Correction" (FRL7093-6) received on November 16, 2001; to

the Committee on Environment and Public Works.

EC-4762. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality Implementation Plans; District of Columbia; Nitrogen Oxides Budget Trading Program" (FRL7094-7) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4763. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Clean Air Final Full Approval of Operating Permit Program; Kentucky" (FRL7095-1) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4764. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Ethylene Oxide Emissions Standards for Sterilization Facilities" (FRL7096-1) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4765. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "National Emission Standards for Hazardous Air Pollutants for Source Categories: Generic Maximum Achievable Control Technology Standards" (FRL7095-6) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4766. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Prohibition on Gasoline Containing Lead or Lead Additives for Highway Use: Fuel Inlet Restrictor Exemption for Motorcycles" (FRL7095-8) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4767. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "State and Federal Operating Permits Programs: Amendments to the Compliance Certification Requirements" (FRL7096-4) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4768. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Revisions to the Requirement on Variability in the Composition of Additives Certified Under the Gasoline Deposit Control Program" (FRL7096-5) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4769. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality Plans: Wisconsin: Ozone" (FRL7094-3) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4770. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Final Authorization of State Hazardous Waste Management Program" (FRL7097-1) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4771. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality Plans: Indiana; Ozone" (FRL7088-5) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4772. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Implementation Plans; Illinois; Ozone" (FRL7088-8) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4773. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Standards of Performance for Large Municipal Waste Combustors for Which Construction is Commenced After September 20, 1994 or for Which Modification or Reconstruction is Commenced After June 19, 1996 and Emission Guidelines and Compliance Times for Large Municipal Waste Combustors That are Constructed on or before September 20, 1994" (FRL7100-8) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4774. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Hazardous Waste Management System; Identification and Listing of Hazardous Waste; Inorganic Chemical Manufacturing Wastes; Land Disposal Restriction for Newly Identified Wastes; and CERCLA Hazardous Substances Designation and Reportable Quantities" (FRL7099-2) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4775. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality Implementation Plans; Illinois; Oxides of Nitrogen Regulations" (FRL7077-8) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4776. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality Implementation Plans; Indiana; Oxides of Nitrogen Regulations" (FRL7077-7) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4777. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality Implementation Plans; Maryland; RACT for the Control of VOC Emissions from Iron and Steel Production Installations" (FRL7083-7) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4778. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality State Implementation Plans; (SIP); Alabama: Control of Gasoline Sulfur and Volatility" (FRL7098-6) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4779. A communication from the Principal Deputy Associate Administrator of the

Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality Implementation Plans; Maryland; Control of Volatile Organic Compound Emissions from Distilled Spirits Facilities, Aerospace Coating Operations and Kraft Pulp Mills" (FRL7085-1) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4780. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Implementation Plans: Alabama: Attainment Demonstration of the Birmingham One-Hour Ozone Nonattainment Area" (FRL7098-7) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4781. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Implementation Plans; Illinois NOx Regulations" (FRL7077-9) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4782. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Implementation Plans; Wisconsin" (FRL7064-4) received on November 16, 2001; to the Committee on Environment and Public Works.

EC-4783. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Protection of Stratospheric Ozone: Reconsideration of the 610 Nonessential Products Ban" (FRL7101-1) received on November 16, 2001; to the Committee on Environment and Public Works.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. JEFFORDS, from the Committee on Environment and Public Works, without amendment:

H.R. 643: A bill to reauthorize the African Elephant Conservation Act. (Rept. No. 107-104).

H.R. 645: A bill to reauthorize the Rhinoceros and Tiger Conservation Act of 1994. (Rept. No. 107-105).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mr. GRAMM (for himself, Mr. ENZI, Mr. BENNETT, Mr. BUNNING, and Mr. ALLARD):

S. 1748. A bill to promote the stabilization of the economy by encouraging financial institutions to continue to support economic development including development in urban areas, through the provision of affordable insurance coverage against acts of terrorism, and for other purposes; read the first time.

By Mr. KENNEDY (for himself, Mr. BROWNBACK, Mrs. FEINSTEIN, Mr. KYL, Mr. LEAHY, Mr. HATCH, Mr. EDWARDS, Mr. HELMS, Mr. DURBIN, Mr. THURMOND, Mr. CONRAD, Mr. BOND, Mrs.

CLINTON, Mr. SESSIONS, Mr. DEWINE, and Mrs. HUTCHISON):

S. 1749. A bill to enhance the border security of the United States, and for other purposes; to the Committee on the Judiciary.

By Mr. HOLLINGS (for himself, Mr. MCCAIN, Mr. BREAUX, and Mr. SMITH of Oregon):

S. 1750. A bill to make technical corrections to the HAZMAT provisions of the USA PATRIOT Act; to the Committee on Commerce, Science, and Transportation.

By Mr. GRAMM (for himself, Mr. ENZI, Mr. BENNETT, Mr. BUNNING, and Mr. ALLARD):

S. 1751. A bill to promote the stabilization of the economy by encouraging financial institutions to continue to support economic development, including development in urban areas, through the provision of affordable insurance coverage against acts of terrorism, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. CORZINE (for himself, Ms. SNOWE, Ms. CANTWELL, Mr. DODD, Mr. LEAHY, and Mrs. MURRAY):

S. 1752. A bill to amend the Public Health Service Act with respect to facilitating the development of microbicides for preventing transmission of HIV and other sexually transmitted diseases; to the Committee on Health, Education, Labor, and Pensions.

By Mr. BINGAMAN (for himself, Mr. CAMPBELL, and Ms. CANTWELL):

S. 1753. A bill to amend title XIX of the Social Security Act to include medical assistance furnished through an urban Indian health program operated by an urban Indian organization pursuant to a grant or contract with the Indian Health Service under title V of the Indian Health Care Improvement Act in the 100 percent Federal medical assistance percentage applicable to the Indian Health Service; to the Committee on Finance.

By Mr. LEAHY (for himself, Mr. HATCH, Mr. REID, and Mr. BENNETT):

S. 1754. A bill to authorize appropriations for the United States Patent and Trademark Office for fiscal years 2002 through 2007, and for other purposes; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. ALLEN (for himself, Mr. HELMS, Mr. CAMPBELL, Mr. WARNER, Mr. ALLARD, Mr. INOUE, Mrs. FEINSTEIN, Mr. BIDEN, Mr. SMITH of Oregon, Mr. GRASSLEY, Mr. SESSIONS, Mr. FITZGERALD, and Mr. GRAMM):

S. Res. 185. A resolution recognizing the historical significance of the 100th anniversary of Korean immigration to the United States; to the Committee on the Judiciary.

By Mr. SCHUMER (for himself and Mrs. CLINTON):

S. Con. Res. 87. A concurrent resolution expressing the sense of Congress regarding the crash of American Airlines Flight 587; to the Committee on the Judiciary.

ADDITIONAL COSPONSORS

S. 1552

At the request of Mr. HARKIN, the name of the Senator from New Jersey (Mr. TORRICELLI) was added as a co-

sponsor of S. 1552, a bill to provide for grants through the Small Business Administration for losses suffered by general aviation small business concerns as a result of the terrorist attacks of September 11, 2001.

S. 1566

At the request of Mr. REID, the name of the Senator from Iowa (Mr. HARKIN) was added as a cosponsor of S. 1566, a bill to amend the Internal Revenue code of 1986 to modify and expand the credit for electricity produced from renewable resources and waste products, and for other purposes.

S. 1707

At the request of Mr. JEFFORDS, the names of the Senator from Arkansas (Mrs. LINCOLN), the Senator from Minnesota (Mr. WELLSTONE), and the Senator from Michigan (Ms. STABENOW) were added as cosponsors of S. 1707, a bill to amend title XVIII of the Social Security Act to specify the update for payments under the medicare physician fee schedule for 2002 and to direct the Medicare Payment Advisory Commission to conduct a study on replacing the use of the sustainable growth rate as a factor in determining such update in subsequent years.

S. 1745

At the request of Mrs. LINCOLN, the names of the Senator from Massachusetts (Mr. KERRY) and the Senator from Florida (Mr. GRAHAM) were added as cosponsors of S. 1745, a bill to delay until at least January 1, 2003, any changes in medicaid regulations that modify the medicaid upper payment limit for non-State Government-owned or operated hospitals.

S.J. RES. 13

At the request of Mr. WARNER, the name of the Senator from Nevada (Mr. REID) was added as a cosponsor of S.J. Res. 13, a joint resolution conferring honorary citizenship of the United States on Paul Yves Roch Gilbert du Motier, also known as the Marquis de Lafayette.

S. RES. 109

At the request of Mr. REID, the names of the Senator from Tennessee (Mr. FRIST), the Senator from Nebraska (Mr. NELSON), and the Senator from Hawaii (Mr. AKAKA) were added as cosponsors of S. Res. 109, a resolution designating the second Sunday in the month of December as "National Children's Memorial Day" and the last Friday in the month of April as "Children's Memorial Flag Day."

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. KENNEDY (for himself, Mr. BROWNBACK, Mrs. FEINSTEIN, Mr. KYL, Mr. LEAHY, Mr. HATCH, Mr. EDWARDS, Mr. HELMS, Mr. DURBIN, Mr. THURMOND, Mr. CONRAD, Mr. BOND, Mrs. CLINTON, Mr. SESSIONS,

Mr. DEWINE, and Mrs. HUTCHISON):

S. 1749. A bill to enhance the border security of the United States, and for other purposes; to the Committee on the Judiciary.

Mr. KENNEDY. Mr. President, I am honored to join Senators BROWNBACK, FEINSTEIN, KYL, LEAHY, HATCH, and other colleagues in introducing legislation to strengthen the security of our borders, improve our ability to screen foreign nationals, and enhance our ability to deter potential terrorists. Senator BROWNBACK and I have worked closely with Senator FEINSTEIN and Senator KYL over the last month to develop a broad and effective response to the national security challenges we face. The need is urgent to improve our intelligence and technology capabilities, strengthen training programs for border officials and foreign service officers, and improve the monitoring of foreign nationals already in the United States.

In strengthening security at our borders, we must also safeguard the unobstructed entry of the more than 31 million persons who enter the U.S. legally each year as visitors, students, and temporary workers. Many others cross our borders from Canada and Mexico to conduct daily business or visit close family members.

We also must live up to our history and heritage as a nation of immigrants. Continued immigration is part of our national well-being, our identity as a Nation, and our strength in today's world. In defending America, we are also defending the fundamental constitutional principles that have made America strong in the past and will make us even stronger in the future.

Our action must strike a careful balance between protecting civil liberties and providing the means for law enforcement to identify, apprehend and detain potential terrorists. It makes no sense to enact reforms that severely limit immigration into the United States. "Fortress America," even if it could be achieved, is an inadequate and ineffective response to the terrorist threat.

Enforcement personnel at our ports of entry are a key part of the battle against terrorism, and we must provide them with greater resources, training, and technology. These men and women have a significant role in the battle against terrorism. This legislation will ensure that they receive adequate pay, can hire necessary personnel, are well-trained to identify individuals who pose a security threat, have access to important intelligence information, and have the technologies they need to enhance border security and facilitate cross-border commerce.

The Immigration and Naturalization Service must be able to retain highly skilled immigration inspectors. Our

legislation provides incentives to immigration inspectors by providing them with the same benefits as other law enforcement personnel.

Expanding the use of biometric technology is critical to securing our borders. This legislation authorizes the funding needed to bring our ports of entry into the biometric age and equip them with biometric data readers and scanners.

We must expand the use of biometric border crossing cards. The time frame previously allowed for individuals to obtain these cards was not sufficient. This legislation extends the deadline for individuals crossing the border to acquire the biometric cards.

The USA Patriot Act addressed the need for machine-readable passports, but it did not focus on the need for machine-readable visas issued by the United States. This legislation enables the Department of State to raise fees through the use of machine-readable visas and use the funds collected from these fees to improve technology at our ports of entry.

Our efforts to improve border security must also include enhanced coordination and information-sharing by the Department of State, the Immigration and Naturalization Service, and law enforcement and intelligence agencies. This legislation will require the President to submit and implement a plan to improve access to critical security information. It will create an electronic data system to give those responsible for screening visa applicants and persons entering the U.S. the tools they need to make informed decisions. It also provides for a temporary system until the President's plan is fully implemented.

We must also strengthen our ability to monitor foreign nationals in the United States. In 1996, Congress enacted legislation mandating the development of an automated entry/exit control system to record the entry of every non-citizen arriving in the U.S., and to match it with the record of departure. Although the technology is currently available for such a system, it has not been put in place because of the high costs involved. Our legislation builds on the anti-terrorism bill and provides greater direction to the INS for implementing the entry/exit system.

We must improve the ability of foreign service officers to detect and intercept potential terrorists before they arrive in the U.S. Most foreign nationals who travel here must apply for visas at American consulates overseas. Traditionally, consular officers have concentrated on interviewing applicants to determine whether they are likely to violate their visa status. Although this review is important, consular officers must also be trained specifically to screen for security threats.

Terrorist lookout committees will be established in every U.S. consular mis-

sion abroad in order to focus the attention of our consular officers on specific threats and provide essential critical national security information to those responsible for issuing visas and updating the lookout database.

This legislation will help restrict visas to foreign nationals from countries that the Department of State has determined are sponsors of terrorism. It prohibits issuing visas to individuals from countries that sponsor terrorism, unless the Secretary of State has determined that the person is not a security threat.

The current Visa Waiver Program, which allows individuals from participating countries to enter the U.S. for a limited period without visas, strengthens relations between the United States and those countries, and encourages economic growth around the world. Given its importance, we must safeguard its continued use, while also ensuring that a country's designation as a participant in the program does not undermine U.S. law enforcement and security. This legislation will only allow a country to be designated as a visa waiver participant, or continue to be designated, if the Attorney General and Secretary of State determine that the country reports instances of passport theft to the U.S. government in a timely manner.

We must do more to improve our ability to screen individuals along our entire North American perimeter. This legislation directs the Department of State, the Department of Transportation, the Department of Justice and the INS to work with the Office of Homeland Security to screen individuals at the perimeter before they reach our continent, and to work with Canada and Mexico to coordinate these efforts.

We must require all airlines to electronically transmit passenger lists to destination airports in the United States, so that once planes have landed, law enforcement authorities can intercept passengers who are on federal lookout lists. United States airlines already do this, but some foreign airlines do not. Our legislation requires all airlines and all other vessels to transmit passenger manifest information prior to their arrival in the United States.

When planes land at our airports, inspectors are under significant time constraints to clear the planes and ensure the safety of all departing passengers. Our legislation removes the existing 45 minute deadline, and provides inspectors with adequate time to clear and secure aircraft.

In 1996, Congress established a program to collect information on non-immigrant foreign students and participants in exchange programs. Although a pilot phase of this program ended in 1999, a permanent system has not yet been implemented. Congress enacted provisions in the recent anti-terrorism

bill for the quick and effective implementation of this system by 2003, but gaps still exist. This legislation will increase the data collected by the monitoring program to include the date of entry, the port of entry, the date of school enrollment, and the date the student leaves the school. It requires the Department of State and INS to monitor students who have been given visas, and to notify schools of their entry. It also requires a school to notify the INS if a student does not actually report to the school.

INS regulations provide for regular reviews of over 26,000 educational institutions authorized to enroll foreign students. However, inspections have been sporadic in recent years. This legislation will require INS to monitor institutions on a regular basis. If institutions fail to comply with these and other requirements, they can lose their ability to admit foreign students. In addition, this legislation provides for an interim system until the program established by the 1996 law is implemented.

As we work to achieve stronger tracking systems, we must also remember that the vast majority of foreign visitors, students, and workers who overstay their visas are not criminals or terrorists. It would be wrong and unfair, without additional information, to stigmatize them.

The USA Patriot Act was an important part of the effort to improve immigration security, but further action is needed. This legislation is a needed bipartisan effort to strengthen the security of our borders and enhance our ability to prevent future terrorist attacks, while also reaffirming our tradition as a Nation of immigrants. I urge my colleagues to support it.

Mr. BROWNBACK. Mr. President, the terrorist attacks of September 11 have unsettled the public's confidence in our Nation's security and have raised concerns about whether our institutions are up to the task of intercepting and thwarting would-be terrorists. Given that the persons responsible for the attacks on the World Trade Center and the Pentagon came from abroad, our citizens understandably ask how these people entered the United States and what can be done to prevent their kind from doing so again. Clearly, our immigration laws and policies are instrumental to the war on terrorism. While the battle may be waged on several fronts, for the man or woman on the street, immigration is in many ways the front line of our defense.

The immigration provisions in the anti-terrorist bill passed earlier this month, the USA PATRIOT Act of 2001, represent an excellent first step toward improving our border security, but we must not stop there. Our Nation receives millions of foreign nationals each year, persons who come to the United States to visit family, to do

business, to tour our sites, to study and learn. Most of these people enter lawfully and mean us well. They are our relatives, our friends, and our business partners. They are good for our economy and, as witnesses to our democracy and our way of life, become our ambassadors of good will to their home countries.

However, the unfortunate reality is that a fraction of these people mean us harm, and we must take intelligent measures to keep these people out. For that reason, I am pleased to introduce today, along with my colleagues Senator KENNEDY, Senator KYL, Senator FEINSTEIN, Senator HATCH, Senator LEAHY, and others, legislation that looks specifically toward strengthening our borders and better equipping the agencies that protect them. The Enhanced Border Security and Visa Entry Reform Act of 2001 represents an earnest, thoughtful, and bipartisan effort to refine our immigration laws and institutions to better combat the evil that threatens our Nation.

This legislation recognizes that the war on terrorism is, in large part, a war of information. To be successful, we must improve our ability to collect, compile, and utilize information critical to our safety and national security. This bill requires that the agencies tasked with screening visa applicants and applicants for admission, namely the Department of State and the Immigration and Naturalization Service, be provided with the necessary law enforcement and intelligence information that will enable these agencies to identify alien terrorists. By directing better coordination and access, this legislation will bring together the agencies that have the information and those that need it. With input from the Office of Homeland Security, this bill will make prompt and effective information-sharing between these agencies a reality.

In complement to the USA PATRIOT Act, this legislation provides for necessary improvements in the technologies used by the State Department and the Service. It provides funding for the State Department to better interface with foreign intelligence information and to better staff its infrastructure. It also provides the Service with guidance on the implementation of the Integrated Entry and Exit Data System, pointing the Service to such tools as biometric identifiers in immigration documents, machine readable visas and passports, and arrival-departure and security databases.

To the degree that we can realistically do so, we should attempt to intercept terrorists before they reach our borders. Accordingly, we must consider security measures not only at domestic ports of entry but also at foreign ports of departure. To that end, this legislation directs the State Department and the Service, in consultation with Office

of Homeland Security, to examine, expand, and enhance screening procedures to take place outside the United States, such as preinspection and preclearance. It also requires international air carriers to transmit passenger manifests for pre-arrival review by the Service. Further, it eliminates the 45-minute statutory limit on airport inspections, which many feel compromises the Service's ability to screen arriving flights properly. Finally, since we should ultimately look to expand our security perimeter to include Canada and Mexico, this bill requires these agencies to work with our neighbors to create a collaborative North American Security Perimeter.

While this legislation mandates certain technological improvements, it does not ignore the human element in the security equation. This bill requires that "terrorist lookout committees" be instituted at each consular post and that consular officers be given special training for identifying would-be terrorists. It also provides special training to border patrol agents, inspectors, and foreign service officers to better identify terrorists and security threats to the United States. Moreover, to help the Service retain its most experienced people on the borders, this bill provides the Service with increased flexibility in pay, certain benefit incentives, and the ability to hire necessary support staff.

Finally, this legislation considers certain classes of aliens that raise security concerns for our country: nationals from states that sponsor terrorism and foreign students. With respect to the former, this bill expressly prohibits the State Department from issuing a nonimmigrant visa to any alien from a country that sponsors terrorism until it has been determined that the alien does not pose a threat to the safety or national security of the United States. With respect to the latter, this legislation would fill data and reporting gaps in our foreign student programs by requiring the Service to electronically monitor every stage in the student visa process. It would also require the school to report a foreign student's failure to enroll and the Service to monitor schools' compliance with this reporting requirement.

While we must be careful not to compromise our values or our economy, we must take intelligent, immediate steps to enhance the security of our borders. This legislation would implement many changes that are vital to our war on terrorism. I therefore urge my colleagues to support it.

Mrs. FEINSTEIN. Mr. President, I am pleased to join Senators KENNEDY, BROWNBACK, and KYL in introducing the Enhanced Border Security and Visa Entry Reform Act of 2001. We submit this legislation with 16 sponsors.

This legislation represents a consensus, drawing upon the strengths of

both the Visa entry Reform Act of 2001, which I introduced with my colleague from Arizona, Senator KYL, and the Enhanced border Security Act of 2001, which Senators KENNEDY and BROWNBACK introduced.

I believe the legislation we are introducing today will garner widespread support from our colleagues on both sides of the aisle.

September 11 clearly pointed out the shortcomings of the immigration and visa system. For example: All 19 terrorist hijackers entered the U.S. legally with valid visas. Three of the hijackers had remained in the U.S. after their visas had expired. One entered on a foreign student visa. Another, Mohammed Atta had filed an application to change status to M-1, which was granted in July. However, Mr. Atta sought admission and was admitted to the United States based on his then current B-1 visitor visa.

Most people don't realize how many people come into our country; how little we know about them; and whether they leave when required.

Consider the following: The Visa Waiver Program: 23 million people from 29 different countries; no visas; little scrutiny; no knowledge where they go in the U.S. or whether they leave once their visas expire. The INS estimates that over 100,000 blank passports have been stolen from government offices in participating countries in recent years.

Abuse of the VISA Waiver Program poses threats to U.S. national security and increases illegal immigration. For example, one of the co-conspirators in the World Trade Center bombing of 1993 deliberately chose to use a fraudulent Swedish passport to attempt entry into the U.S. because of Sweden's participation in the Visa Waiver Program.

Foreign Student Visa Program: more than 500,000 foreign nationals entering each year; within the last 10 years, 16,000 came from such terrorist supporting states as Iran, Iraq, Sudan, Libya, and Syria.

The foreign student visa system is one of the most under-regulated systems we have today. We've seen bribes, bureaucracy, and other problems with this system that leave it wide open to abuse by terrorists and other criminals.

For example, in the early 1990s, five officials at four California colleges, were convicted of taking bribes, providing counterfeit education documents, and fraudulently applying for more than 100 foreign student visas.

It is unclear what steps the INS took to find and deport the foreign nationals involved in this scheme.

Each year, we have 300 million border crossings. For the most part, these individuals are legitimate visitors to our country. We currently have no way of tracking all of these visitors.

Mohamed Atta, the suspected ring-leader of the attack, was admitted as a

non-immigrant visitor in July 2001. He traveled freely to and from the U.S. during the past 2 years and was, according to the INS, in "legal status" the day of the attack. Other hijackers also traveled with ease throughout the country.

It has become all too clear that without an adequate tracking system, our country becomes a sieve, creating ample opportunities for terrorists to enter and establish their operations without detection.

I sit as the Chair of the Judiciary Committee's Subcommittee on Technology, Terrorism and Government Information. Last month, we held a hearing on the need for new technologies to assist our government agencies in keeping terrorists out of the United States.

The testimony at that hearing was very illuminating. We were given a picture of an immigration system in chaos, and a border control system rife with vulnerabilities. Agency officials don't communicate with each other. Computers are incompatible. And even in instances here technological leaps have been made, like the issuance of more than 4.5 million "smart" border crossing cards with biometric data, the technology is not even used.

Personally, I am astonished that a person can apply for a visa and granted a visa by the State Department, and that there is no mechanism by which the FBI or CIA can raise a red flag with regard to the individual if he or she is known to have links to terrorist groups or otherwise pose a threat to national security.

In the wake of September 11, it is unconscionable that a terrorist might be permitted to enter the U.S. simply because our government agencies don't share information.

Indeed, what we have discovered in the aftermath of the September 11 terrorist attacks was that the perpetrators of these attacks had a certain confidence that our immigration laws could be circumvented where necessary.

The terrorists did not have to steal into the country as stowaways on sea vessels, or a border-jumpers evading federal authorities. Most, if not all, appeared to have come in with temporary visas, which are routinely granted to tourists, students, and other short-term visitors to the U.S.

Let me talk about the legislation that I cosponsored with Senators KENNEDY, BROWNBACK, and KYL.

First, a key component of this solution is the creation of an interoperable data system that allows the Department of State, the INS, and other relevant Federal agencies to obtain critical information about foreign nationals who seek entry into or who have entered the United States.

Right now, our government agencies use different systems, with different in-

formation, in different formats. And they often refuse to share that information with other agencies within our own government. This is not acceptable.

When a terrorist presents himself at a consular office asking for a visa, or at a border crossing with a passport, we need to make sure that his name and identifying information is checked against an accurate, up-to-date, and comprehensive database. Period.

The Enhanced Border Security and Visa Entry Reform Act would require the creation of this interoperable data system, and will require the cooperation of all U.S. government agencies in providing accurate and compatible information to that system.

In addition, the interoperable data system would include sophisticated, linguistically-based, name-matching algorithms so that the computers can recognize that "Muhamad Usam Abdel Raqeeb" and "Haj Mohd Othman Abdul Rajeeb," are transliterations of the same name. In other words, this provision would require agencies to ensure that names can be matched even when they are stored in different sets of fields in different databases.

Incidentally, this legislation also contains strict privacy provisions, limiting access to this database to authorized Federal officials. And the bill contains severe penalties for wrongful access or misuse of information contained in the database.

Second, this legislation includes concrete steps to restore integrity to the immigration and visa process, including the following: The legislation would require all foreign nationals to be fingerprinted and, when appropriate, submit other biometric data, to the State Department when applying for visa. This provision should help eliminate fraud, as well as identify potential threats to the country before they gain access.

We include reforms of the visa waiver program, so that any country wishing to participate in that program must begin to provide its citizens with tamper-proof, machine-readable passports. The passports must contain biometric data by October 26, 2003, to help verify identity at U.S. ports of entry.

Prior to admitting a foreign visitor from a visa waiver country, the INS inspector must first determine that the individual does not appear in any "lookout" databases.

In addition, the INS would be required to enter stolen passport numbers in the interoperable data system within 72 hours after receiving notification of the loss or theft of a passport.

We would establish a robust biometric visa program. By October 26, 2003, newly issued visas must contain biometric data and other identifying information, like more than 4 million already do on the Southwest border, and, just as importantly, our own officials

at the border and other ports of entry must have the equipment necessary to read the new biometric cards.

We worked closely with the university community in crafting new, strict requirements for the student visa program to crack down on fraud, make sure that students really are attending classes, and give the government the ability to track any foreign national who arrives on a student visa but fails to enroll in school.

The legislation prohibits the issuance of a student visa to any citizen of a country identified by the State Department as a terrorist-supporting nation. There is a waiver provision to this prohibition, however, allowing the State Department to allow students even from these countries in special cases.

We require that airlines and cruiseliners provide passenger and crew manifests to immigration officials before arrival, so that any potential terrorists or other wrongdoers can be singled out before they arrive in this country and disappear among the general populace.

The bill contains a number of other related provisions as well, but the gist of the legislation is this: Where we can provide law enforcement more information about potentially dangerous foreign nationals, we do so. Where we can reform our border-crossing system to weed out or deter terrorists or others who would do us harm, we do so. And where we can update technology to meet the demands of the modern war against terror, we do that as well.

As we prepare to modify our immigration system, we must be sure to enact changes that are realistic and feasible. We must also provide the necessary tools to implement them.

Our Nation will be no more secure tomorrow if we create new top-of-the-line databases and do not see to it that government agencies use them to share and receive critical information.

We will be no safer tomorrow if we do not create a workable entry-exit tracking system to ensure that terrorists do not enter the U.S. and blend into our communities without detection.

And we will be no safer if we simply authorize new programs and information sharing, but do not provide the resources necessary to put the new technology at the border, train agents appropriately, and require our various government agencies to cooperate in this effort.

We have a lot to do but I am confident that we will move swiftly to address these important issues. The legislation Senators KENNEDY, BROWNBACK, KYL, and I introduce today is an important, and strong, first step. But this is only the beginning of a long, difficult process.

In closing, I would like to respond to concerns that this bill is "anti-immigrant." We are a nation of immigrants. Indeed, the overwhelming percentage

of the people who come to live in this country do so to enjoy the blessings of liberty, equality, and opportunity. The overwhelming percentage of the people who visa this country mean us no harm.

But there are several thousand innocent people, including foreign nationals, who were killed on September 11 in part because a network of fanatics determined to wreak death, destruction, and terror exploited weaknesses in our immigration system to come here, to stay here, to study here, and to kill here.

We learned at Oklahoma City that not all terrorists are foreign nationals. But the world is a dangerous place, and there are peopled and regimes that would destroy us if they had the chance.

We are all casualties of September 11. Our society has necessarily changed as our perception of the threats we face has changed. The scales have fallen from our eyes.

It is unfortunate that we need to address the vulnerabilities in our immigration system that September 11 painfully revealed. The changes we need to make in that system will inconvenience people. We can "thank" the terrorists for that.

Once implemented, however, those changes will make it easier for law-abiding foreign to visit or study here, and for law-abiding immigrants who want to live here. More important, once they are here, their safety, and ours, will be greatly enhanced.

We must do everything we can to deter the terrorists, here and abroad, who would do us harm from Oklahoma City to downtown Manhattan, we have learned just how high the stakes are. It would dishonor the innocent victims of September 11 and the brave men and women of our armed forces who are defending our liberty at this very instant, if we flag or fail in this effort.

I urge my colleagues to support us on this legislation.

Mr. KYL. Mr. President, today, Senators KENNEDY, BROWNBACK, FEINSTEIN and I join together to introduce the Enhanced Border Security and Visa Entry Reform Act of 2001. This bill represents the merging of counter-terrorism legislation recently introduced by Senator FEINSTEIN and I and separately by Senators KENNEDY and BROWNBACK. This bipartisan, streamlined product, cosponsored by both the chairman and ranking Republican of the Senate Judiciary Committee, will significantly enhance our ability to keep terrorists out of the United States and find terrorists who are here. I also want to reiterate my appreciation to Senators KENNEDY, FEINSTEIN, and BROWNBACK, and especially to their staffmembers, for their hard work and cooperation in developing this bill. I am hopeful that we can work together toward the bill's passage, and signature

into law, before the 107th Congress adjourns for the year.

Last month the President signed into law anti-terrorism legislation that will provide many of the tools necessary to keep terrorists out of the United States, and to detain those terrorists who have entered our country. These tools, while all important, will be significantly enhanced by the bill we introduce today.

Under the Border Security and Visa Entry Reform Act of 2001, the Homeland Defense director will be responsible for the coordination of Federal law enforcement and intelligence communities, the Departments of Transportation, State, Treasury, and all other relevant agencies to develop and implement a comprehensive, interoperable electronic data system for these governmental agencies to find and keep out terrorists. That system will be up and running by October 26, 2003, 2 years after the signing into law of the USA Patriot Act.

Under our bill, terrorists will be deprived of the ability to present fake or altered international documents in order to gain entrance, or stay here. Foreign nationals will be provided with new travel documents, using new technology that will include a person's fingerprint(s) or other form of "biometric" identification. These cards will be used by visitors upon exit and entry into the United States, and will alert authorities immediately if a visa has expired or a red flag is raised by a federal agency. Under our bill, any foreign passport or other travel document issued after October 26, 2003 will have to contain a biometric component. The deadline for providing for a way to compare biometric information presented at the border is also October 26, 2003.

Another provision of the bill will further strengthen the ability of the U.S. Government to prevent terrorists from using our "Visa Waiver Program" to enter the country. Under our bill, the 29 participating Visa Waiver nations will, in addition to the USA Patriot Act Visa Waiver reforms, be required to report stolen passport numbers to the State Department; otherwise, a nation is prohibited from participating in the program. In addition, our bill clarifies that the Attorney General must enter stolen passport numbers into the interoperable data system within 72 hours of notification of loss or theft. Until that system is established, the Attorney General must enter that information into any existing data system.

Another section of our bill will make a significant difference in our efforts to stop terrorists from ever entering our country. Passenger manifests on all flights scheduled to come to the United States must be forwarded in real-time, and then cleared, by the Immigration and Naturalization Service prior to the

flight's arrival. All cruise and cargo lines and cross-border bus lines will also have to submit such lists to the INS. Our bill also removes a current U.S. requirement that all passengers on flights to the United States be cleared by the INS within 45 minutes of arrival. Clearly, in some circumstances, the INS will need more time to clear all prospective entrants to the United States. These simple steps will give appropriate officials advance notice of foreigners coming into the country, particularly visitors or immigrants who pose security threats to the United States.

The Border Security and Visa Entry Reform Act will also provide much needed reforms and requirements in our U.S. foreign student visa program, which has allowed numerous foreigners to enter the country without ever attending classes and, for those who do attend class, with lax or no oversight of such students by the Federal Government. Our bill will change that, and will require that the State Department within 4 months, with the concurrence of the Department, maintain a computer database with all relevant information about foreign students.

In the past decade, more than 16,000 people have entered the United States on student visas from states included on the Government's list of terrorist sponsors. Notwithstanding that Syria is one of the countries on the list, the State Department recently issued visas to 14 Syrian nationals so that they could attend flight schools in Fort Worth, TX. United States educational institutions will be required to immediately notify the INS when a foreign student violates the term of the visa by failing to show up for class or leaving school early. Our legislation will prevent most persons from obtaining student visas if they come from terrorist-supporting states such as Iran, Iraq, Sudan, Libya, and Syria, unless the Secretary of State and Attorney General determine that such applicants do not pose a threat to the safety or national security of the United States.

For the first time since the War of 1812, the United States has faced a massive attack from foreigners on our own soil. Every one of the terrorists who committed the September 11 atrocities were foreign nationals who had entered the United States legally through our visa system. None of them should have been allowed entry due to their ties to terrorist organizations, and yet even those whose visas had expired were not expelled.

Mohamed Atta, for example, the suspected ringleader of the attacks, was allowed into the United States on a tourist visa, even though he made clear his intentions to go to flight school while in the United States. Clearly, at the very least, he should have been queried about why he was using his tourist visa to attend flight school.

Another hijacker, Hani Hanjour, was here on a student visa that had expired as of September 11. Hani Hanjour never attended class. In addition, at least two other visitor visa-holders overstayed their visa. In testimony before the Terrorism subcommittee of which I am the ranking member, U.S. officials have told us that they possess little information about foreigners who come into this country, how many there are, and even whether they leave when required by their visas.

America is a nation that welcomes international visitors, and should remain so. But terrorists have taken advantage of our system and its openness. Now that we face new threats to our homeland, it is time we restore some balance to our consular and immigration policies.

As former chairman and now ranking Republican of the Judiciary Committee's Terrorism Subcommittee, I have long suggested, and strongly supported, many of the anti-terrorism and immigration initiatives now being advocated by Republicans and Democrats alike. In my sadness about the overwhelming and tragic events that took thousands of precious lives, I am resolved to push forward on all fronts to fight against terrorism. That means delivering justice to those who are responsible for the lives lost on September 11, and reorganizing the institutions of government so that the law-abiding can continue to live their lives in freedom. It is extremely important that we pass the Border Security and Visa Entry Reform Act before we adjourn for the year. To all of the Senators who worked on this bill, including Senators KENNEDY, FEINSTEIN, BROWNBACK, and HATCH, SNOWE, CANTWELL, BOND, SESSIONS, THURMOND and others I again want to express my appreciation. This bill will make a difference.

By Mr. HOLLINGS (for himself,
Mr. MCCAIN, Mr. BREAUX, and
Mr. SMITH of Oregon):

S. 1750. A bill to make technical corrections to the hazmat provisions of the USA PATRIOT Act; to the Committee on Commerce, Science, and Transportation.

Mr. HOLLING. Mr. President, today I join with my colleagues Senators MCCAIN, BREAUX, and SMITH in introducing the Hazmat Endorsements Requirement Act. We introduce this legislation today to improve the implementation and effectiveness of Section 1012 of H.R. 3162, The Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism, (USA PATRIOT), Act of 2001, [Public Law 107-56], enacted on October 26, 2001.

The legislation we are introducing today primarily addresses technical corrections to Section 1012 of the USA PATRIOT Act. Due to procedural

agreements, the Senate consideration of H.R. 3162 did not provide for any amendments. I did however, engage in a colloquy with Chairman LEAHY to state my concerns with section 1012 and my desire to address my concerns over substance, scope and procedure in subsequent legislation. The changes in legislation assume continuation of the basic framework of section 1012 requiring that one, States request security checks from the Attorney General for driver license applicants who would transport certain hazardous materials; second, the Attorney General conduct checks of relevant information systems and then provide the results to the Department of Transportation; and third, the Department of Transportation notify requesting States whether applicants pose a security threat.

Our bill does the following: clarifies the definition of hazardous materials and gives the Secretary the ability to expand the list as national security issues require; defines disqualifying offenses that would result in the denial of a hazardous materials endorsement; provides for an appeals process in the event an individual is denied a hazardous materials endorsement based on the results of a background check; extends the requirement for background checks to Canadian and Mexican drivers who drive commercial vehicles carrying hazardous materials in the United States; establishes penalties for fraudulently issued or obtained licenses; and requires the Department of transportation to report back to the Congress on security improvements that can be made in the transport of hazardous materials.

Approximately 10 million drivers have commercial drivers licenses and almost 2.5 million of those drivers have hazardous materials endorsements. The law has not required criminal background checks for applicants seeking CDLs. However, section 1012 of the USA PATRIOT Act now requires any driver of a commercial motor vehicle who transports hazardous materials to have a criminal background check prior to being issued a commercial drivers license (CDL). That requirement became effective upon the enactment of that law in October.

Since the passage of the USA PATRIOT Act, we have worked to address the concerns raised by all interested parties involved in this issue, including the administration, the States, public safety officials, commercial motor vehicle drivers, and motor carriers. While everyone has supported the concept of performing background checks, it has not yet been implemented because the infrastructure for conducting background checks does not exist. We believe the provisions contained in this legislation will aid the administration, the State licensing agencies, and all interested parties by providing a clear understanding of the requirements as-

sociated with granting a license permitting a driver to transport hazardous cargo.

Senator BREAUX chaired a hearing on October 10, 2001, on bus and truck security and hazardous materials licensing for commercial drivers. Of particular concern were reports that terrorists may have been seeking licenses to drive trucks with hazardous materials. On October 4, 2001, a Federal grand jury in Pittsburgh indicted 16 people on charges of fraudulently obtaining commercial driver's licenses, including licenses to haul hazardous materials. Other incidents include a report that in September the Federal Bureau of Investigation, FBI, arrested a man, Nabil Al-Marabh, linked to an associate of Osama bin Laden, who had a hazardous materials drivers license. Al-Marabh had a commercial driver's license issued by the State of Michigan.. That license, issued on September 11, 2000, allowed Al-Marabh to operate vehicles weighing 100,000 pounds or more. Additionally, Al-Marabh obtained what is called an "endorsement" the same day that allowed him to transport hazardous materials. He took a test and paid the fee to obtain that endorsement.

During that hearing, many options for increasing the security of hazardous materials shipments were discussed, including requiring background checks for drivers of commercial vehicles carrying hazardous materials. As chairman, I am committed to working with Senators MCCAIN, BREAUX, and SMITH to introduce a more comprehensive legislative proposal next year which will reauthorize the Hazardous Materials Transportation Act, HMTA. Reauthorization of the HMTA addresses training, emergency response, safety and security concerns for all movements of hazardous materials.

Annually, more than four billion tons of hazardous materials, an estimated 800,000 hazardous materials shipments daily, are transported by land, sea, and air in the United States. While hazardous materials transportation invoices all transportation modes, truck transport typically accounts for the majority of all hazardous materials shipments, although the tonnage transported is more equally divided between truck and rail.

There are 3.12 million tractor-trailer drivers in the United States. The entire trucking industry employs more than 9 million people. Trucks annually transport 6 billion tons of freight, representing 63 percent of the total domestic tonnage shipped. There are 540,000 trucking companies in the U.S., and 80 percent of those have 20 or fewer trucks. The types of vehicles carrying hazardous materials on the Nation's highways range from cargo tank trucks to conventional tractor-trailers and flatbeds that carry large portable tank containers.

In 2000, there were 17,347 hazardous materials incidents related to transportation in the United States, 14,861 via highway transportation. These incidents are mostly minor releases of chemicals; only 244 incidents caused injuries, and there were 13 deaths.

Since the events of September 11, 2001, a number of legislative proposals have been introduced to address terrorism and the prevention of terrorist acts within the United States. I am pleased to report that the Commerce Committee has addressed security concerns in a bipartisan manner in all modes of transportation. On November 19, 2001, the President signed into law S. 1447, the Aviation Security Act, Public Law 107-71. On August 2, 2001, the Commerce Committee favorably reported S. 1214, the Port and Maritime Security Act, and on October 17, 2001, the Commerce Committee unanimously approved S. 1550, the Rail Security Act. Both of these measures are awaiting consideration by the Senate.

This legislation which addresses the important issue of the safety of hazardous materials transportation on our Nation's highways. This legislation should be considered as soon as possible. We must ensure the hazardous materials transported over our Nation's roads are carried by qualified drivers. Our legislation accomplishes this in a manner that provides clear and consistent requirements for licensing with minimum bureaucratic red tape and delay in the issuance of licenses to eligible drivers.

I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1750

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Hazmat Endorsement Requirements Act".

SEC. 2. LIMITATION ON ISSUANCE OF HAZMAT LICENSES.

(a) IN GENERAL.—Chapter 313 of title 49, United States Code, is amended by adding at the end the following:

"§ 31318. Issuance, renewal, upgrade, transfer, and periodic check of hazmat licenses

"(a) IN GENERAL.—A State may not issue, renew, upgrade, or transfer a hazardous materials endorsement for a commercial driver's license to any individual authorizing that individual to operate a commercial motor vehicle transporting a hazardous material in commerce unless the Secretary of Transportation has determined that the individual does not pose a security risk warranting denial of the endorsement or license. Each State shall implement a program under which a background records check is requested—

"(1) whenever a commercial driver's license with a hazardous materials endorsement is to be issued, renewed, upgraded, or transferred; and

"(2) periodically (as prescribed by the Secretary by regulations) for all other individuals holding a commercial driver's license with a hazardous materials endorsement.

"(b) DETERMINATION OF SECURITY RISK.—

"(1) IN GENERAL.—An individual may not be denied a hazardous materials endorsement for a commercial driver's license under subsection (a) unless the Secretary determines that individual—

"(A) in the 10-year period ending on the date of the background investigation, was convicted (or found not guilty by reason of insanity) of an offense described in section 44936(b)(1)(B) of this title (disregarding the matter in clause (xiv)(IX) after '1 year.');

"(B) is described in section 175b(b)(2) of title 18, United States Code; or

"(C) may be denied admission to the United States or removed from the United States under subclause (IV), (VI), or (VII) of section 212(a)(3)(B)(i) of the Immigration and Nationality Act (8 U.S.C. 1182(a)(3)).

"(2) MITIGATING CIRCUMSTANCES.—In making a determination under paragraph (1), the Secretary shall give consideration to the circumstances of any disqualifying act or offense, restitution made by the individual, Federal and State mitigation remedies, and other factors from which it may be concluded that the individual does not pose a security risk warranting denial of the license or endorsement.

"(3) APPEALS PROCESS.—The Secretary shall establish an appeals process under this section for individuals found to be ineligible for a hazardous materials endorsement for a commercial driver's license that includes notice and an opportunity for a hearing.

"(c) BACKGROUND RECORDS CHECK.—

"(1) IN GENERAL.—Upon the request of a State regarding issuance of a hazardous materials endorsement for a commercial driver's license to an individual, the Attorney General shall—

"(A) conduct a background records check regarding the individual;

"(B) take appropriate criminal enforcement action required by information developed or obtained in the course of the background check; and

"(C) upon completing the background records check, notify the Secretary of Transportation of the completion and results of the background records check.

"(2) SCOPE.—A background records check regarding an individual under this subsection shall consist of the following:

"(A) A check of the relevant criminal history data bases.

"(B) In the case of an alien, a check of the relevant data bases to determine the status of the alien under the immigration laws of the United States.

"(C) As appropriate, a check of the relevant international data bases through Interpol-U.S. National Central Bureau or other appropriate means.

"(D) Review of any other national security-related information or data base identified by the Attorney General for purposes of such a background records check.

"(3) SECRETARY TO NOTIFY STATE.—After making the determination required by subsection (b)(1), the Secretary of Transportation shall promptly notify the State of the determination.

"(d) REPORTING REQUIREMENT.—Each State shall submit to the Secretary of Transportation, at such time and in such manner as the Secretary may prescribe, such information as the Secretary may require, concerning each individual to whom the State issues a hazardous materials endorsement for a commercial driver's license.

"(e) RESTRICTIONS ON USE AND MAINTENANCE OF INFORMATION.—

"(1) FOIA NOT TO APPLY.—Information obtained by the Attorney General or the Secretary of Transportation under this section may not be made available to the public under section 552 of title 5, United States Code.

"(2) CONFIDENTIALITY.—Any information other than criminal acts or offenses constituting grounds for disqualification under subsection (b)(1) shall be maintained confidentially by the Secretary and may be used only for making determinations under this section.

"(f) RENEWAL WAIVER FOR BACKGROUND CHECK DELAYS.—The Secretary shall provide a waiver for State compliance with the requirements of subsection (a) for renewals to the extent necessary to avoid the interruption of service by a license holder while a background check is being completed.

"(g) DEFINITIONS.—In this section:

"(1) HAZARDOUS MATERIALS.—The term 'hazardous material' means—

"(A) a substance or material designated by the Secretary under section 5103(a) of this title for which the Secretary requires placarding of a commercial motor vehicle transporting it in commerce; and

"(B) a substance or material, including a substance or material on the Centers for Disease Control's list of select agents, designated as a hazardous material by the Secretary under procedures to be established by the Secretary.

"(2) ALIEN.—The term 'alien' has the meaning given the term in section 101(a)(3) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(3))."

(b) ENFORCEMENT.—Section 31311(a) of title 49, United States Code, is amended by adding at the end the following:

"(21) The State shall comply with the requirements of section 31318."

(c) CONFORMING AMENDMENTS.—

(1) Section 31305(a)(5)(C) of title 49, United States Code, is amended by striking "section 5103a" and inserting "section 31318".

(2) The chapter analysis for chapter 313 is amended by adding at the end the following: "31318. Limitation on issuance of hazmat licenses".

(3) Chapter 51 of title 49, United States Code, is amended—

(A) by striking section 5103a; and

(B) by striking the item in the chapter analysis relating to section 5103a.

(4) Section 1012(c) of the USA PATRIOT Act of 2001 is amended by striking "section 5103a" and inserting "section 31318".

(d) EFFECTIVE DATE.—

(1) IN GENERAL.—The amendments made by this section shall take effect on October 26, 2001.

(2) LIMIT ON RETROACTIVITY.—Notwithstanding paragraph (1), no enforcement action shall be taken against a State under section 31311(a)(21) of title 49, United States Code, for any act committed, or failure to act that occurred, in violation of that section before the effective date of the interim final rule prescribed by the Secretary of Transportation under section 31318 of title 49, United States Code.

(3) INTERIM FINAL RULE AUTHORITY.—The Secretary of Transportation shall issue an interim final rule as a temporary regulation under section 31318 of title 49, United States Code, as soon as practicable after the date of enactment of this Act without regard to the provisions of chapter 5 of title 5, United States Code. The Secretary shall initiate a rulemaking in accordance with such provisions as soon as practicable after the date of

enactment of this Act. The final rule issued pursuant to that rulemaking shall supersede the interim final rule promulgated under this paragraph.

SEC. 3. PROHIBITION ON OPERATING WITHOUT PROPER HAZMAT ENDORSEMENT OR LICENSE.

(a) IN GENERAL.—Chapter 313 of title 49, United States Code, is further amended by adding at the end the following:

“§31319. Prohibition on unauthorized transportation of hazardous materials

“(a) IN GENERAL.—Notwithstanding any provision of law, treaty, or international agreement to the contrary, after the effective date of the interim final rule promulgated by the Secretary of Transportation under section 2(d)(3) of the Hazmat Endorsement Requirements Act, no individual may operate a commercial motor vehicle transporting a hazardous material in commerce in the United States without a hazardous materials endorsement or a license authorizing that individual to operate a commercial motor vehicle transporting a hazardous material in commerce—

“(1) issued by a State in accordance with the requirements of section 31318 of this title; or

“(2) issued by the government of Canada or Mexico, or a political subdivision thereof, after a background check that is the same as, of substantially similar to, the background check required by section 31318.

“(b) PENALTY.—The Secretary shall by regulation prescribe the penalty for violation of subsection (a).”

(b) CONFORMING AMENDMENT.—The chapter analysis for chapter 313 is amended by adding at the end the following:

“31319. Prohibition on unauthorized transportation of hazardous materials”.

SEC. 4. PENALTY FOR FRAUDULENT ISSUANCE OR RENEWAL OF COMMERCIAL DRIVER'S LICENSE.

(a) IN GENERAL.—Chapter 313 of title 49, United States Code, is further amended by adding at the end the following:

“§31320. Penalty for fraudulent issuance, renewal, upgrade, or transfer of commercial driver's license.

“Any person who knowingly issues, obtains, or knowingly facilitates the issuance, renewal, upgrade, transfer, or obtaining of, a commercial driver's license or an endorsement for a commercial driver's license knowing the license or endorsement to have been wrongfully issued or obtained, or issued, renewed, upgraded, transferred, or obtained through the submission of false information or the intentional withholding of required information is guilty of a Class E felony punishable by a fine, imprisonment, or both as provided in title 18, United States Code.”

(b) CONFORMING AMENDMENT.—The chapter analysis for chapter 313 is amended by adding at the end the following:

“31320. Penalty for fraudulent issuance or renewal of commercial driver's license”.

SEC. 5. MOTOR CARRIER SECURITY REPORT.

(a) IN GENERAL.—

(1) IN GENERAL.—The Secretary of Transportation shall assess the security risks associated with motor carrier transportation and develop prioritized recommendations for—

(A) improving the security of hazardous materials shipments by motor carriers, including shipper responsibilities;

(B) using biometrics or other identification systems to improve the security of motor carrier transportation;

(C) technological advancements in the area of information access and transfer for the purpose of identifying the location of hazmat shipments and facilitating the availability of safety and security information; and

(D) reducing other significant security related risks to public safety and interstate commerce, taking into account the impact that any proposed security measure might have on the provision of motor carrier transportation.

(2) EXISTING PRIVATE AND PUBLIC SECTOR EFFORTS.—The assessment shall include a review of any actions already taken to address identified security issues by both public and private entities.

(b) CONSULTATION; USE OF EXISTING RESOURCES.—In carrying out the assessment required by subsection (a), the Secretary shall—

(1) consult with operators, drivers, safety advocates, and public safety officials (including officials responsible for responding to emergencies); and

(2) utilize, to the maximum extent feasible, the resources and assistance of the Transportation Research Board of the National Academy of Sciences.

(c) REPORT.—

(1) CONTENTS.—Within 180 days after the date of enactment of this Act, the Secretary shall transmit to the Senate Committee on Commerce, Science, and Transportation and the House of Representatives Committee on Transportation and Infrastructure a report, without compromising national security, containing—

(A) the assessment and prioritized recommendations required by subsection (a);

(B) any proposals the Secretary deems appropriate for providing Federal financial, technological, or research and development to assist carriers and shippers in reducing the likelihood, severity, and consequences of deliberate acts of crime or terrorism toward motor carrier employees, shipments, or property; and

(C) data on the number of shipments and type of hazardous materials for which placarding is required for transport by motor carriers in the United States, including the transport of hazardous materials shipments by Canadian or Mexican motor carriers with authority to enter into the United States.

(2) FORMAT.—The Secretary may submit the report in both classified and redacted formats if the Secretary determines that such action is appropriate or necessary.

SEC. 6. STUDY.

The Secretary of Transportation shall conduct research and operational testing to determine the feasibility, costs, and benefits of requiring motor carriers transporting certain high-risk hazardous materials, as determined by the Secretary, to install ignition or engine locking devices, silent alarms, satellite technology, or other mechanisms to increase the security associated with the transportation of such shipments by motor carriers. The Secretary may conduct a pilot program to assess such devices.

Mr. MCCAIN. Mr. President, I am pleased to join with Senators HOLLINGS, BREAUX, and SMITH in introducing the Hazmat Endorsements Requirement Act. The legislation we are introducing today is in large part a technical correction proposal to address Section 1012 of the USA PATRIOT Act, enacted October 26, 2001. Today's bill is designed to fill in a few of the gaps of the new law with respect to commercial drivers licenses and haz-

ardous materials endorsements and to provide guidance to the Department of Transportation and the States on how to implement the new requirements.

The safe transport of hazardous materials is of critical importance to both our nation's economy and public safety. The events of September 11 have led to an even greater awareness of the necessity of ensuring hazardous cargo is transported in a manner that provides the highest level of safety and security possible. This bill would help improve the safety and security of hazardous materials transported on our roads and highways by ensuring the driver of such loads is not a risk to national security.

Annually, more than four billion tons of hazardous materials, an estimated 800,000 hazardous materials shipments daily, are transported by land, sea, and air in the United States. While hazardous materials transportation involves all transportation modes, truck transport typically accounts for the majority of all hazardous materials shipments, although the tonnage transported is more equally divided between truck and rail. The types of vehicles carrying hazardous materials on the nation's highways range from cargo tank trucks to conventional tractor-trailers and flatbeds that carry large portable tank containers. The shipped materials are used in thousands of commercial manufactured products and they include: chlorine for water treatment; ammonia for fertilizers; plastics; home siding materials; battery casings; leather finishes; fireproofing agents for textiles; and, motor vehicle gasoline.

The hazardous materials industry has a notable safety record, in large part due to the safety efforts of the individuals and companies involved in transporting hazardous materials. On average, only 10 to 15 fatalities are attributed annually to releases of hazardous materials in transportation.

The Commercial Motor Vehicle Safety Act of 1986 was enacted in an effort to ensure that drivers of large trucks and buses are qualified to operate such vehicles and to remove unsafe and unqualified drivers from the highways. The 1986 Act, which created the Commercial Driver's License Program, retained the state's right to issue a driver's license, but established minimum national standards which states must meet when licensing commercial motor vehicle, CMV, drivers.

The CDL program places requirements on the CMV driver, the employing motor carrier and the States. Drivers who operate special types of vehicles or who transport passengers or hazardous materials need to pass additional tests to obtain specific endorsements to permit such transport on their CDL.

Since 1986, over 10.5 million drivers have obtained a CDL, and almost 2.5

million of those drivers have received hazardous materials endorsements. The law has not required criminal background checks for applicants seeking CDLs. However, section 1012 of the USA PATRIOT Act now requires any driver of a commercial motor vehicle who transports hazardous materials to have a criminal background check prior to being issued a commercial drivers license, CDL. That requirement became effective upon the enactment of that law in October.

Both Senator HOLLINGS and I strongly support the intent of the background check requirement. Unfortunately, the Senate Commerce, Science, and Transportation Committee, with jurisdiction over the CDL program and hazardous materials transportation, did not have an opportunity to offer our recommendations to the provision in the USA PATRIOT Act due to procedural agreements at the time that legislation was approved by the Senate. Therefore, the measure we are introducing today provides technical modifications to section 1012 and would ensure the Department of Transportation, the States, and the drivers of commercial motor vehicles have a very clear direction with respect to the requirements associated with a hazardous materials endorsement.

Through Senator HOLLINGS leadership, we have sought input on this issue from all interested parties, including the administration, the states, public safety officials, commercial motor vehicle drivers, and motor carriers. We believe the provisions contained in this legislation will aid the administration and all interested parties by providing a clear understanding of the requirements associated with granting a license permitting a driver to transport hazardous cargo.

I urge my colleagues' timely consideration of this important legislation. We should take expeditious action to ensure the hazardous materials transported over our nation's roads is provided by qualified drivers. This must be accomplished in a manner that provides clear and consistent requirements for licensing with minimum bureaucratic red tape and delay in the issuance of licenses to eligible drivers.

By Mr. GRAMM (for himself, Mr. ENZI, Mr. BENNETT, Mr. BUNNING, and Mr. ALLARD):

S. 1751. A bill to promote the stabilization of the economy by encouraging financial institutions to continue to support economic development, including development in urban areas, through the provision of affordable insurance coverage against acts of terrorism, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

Mr. GRAMM. Mr. President, today I am joined by Senators ENZI, BENNETT, BUNNING, and ALLARD, in introducing

the Terrorism Risk Insurance Act of 2001. This legislation will effectively, and in a straightforward way, address a crisis before us.

The crisis of which I speak is, like a tidal wave, currently away from the shore. Its movement is little noticed until it reaches the shore, when its consequences will be disastrous. That is, the consequences will be disastrous unless we prepare for them now. This legislation will do that.

Tidal waves are started by major seismic, earth shaking events. The earth shaking event that set this tidal wave in motion took place on September 11. Our Nation has responded admirably to the very visible problems caused by that day. We need to act just as admirably and effectively to address this hidden wave.

This hidden wave nearing our shores is the unavailability to terrorism risk insurance, an unavailability that will strike a little more than one month from now. Already we are receiving signs from all across the country that terrorism risk insurance is becoming increasingly hard to get, in many cases it is not available at all even today. That is because insurance companies have to be able to estimate and measure risk in order to be able to provide for it, in order to be able to spread the risk, and to do that so that the insurance is affordable. Right now, in the short term, they cannot do that. If they cannot do that, they cannot offer the coverage without jeopardizing the solvency of their companies and the value of all their other insurance policies.

I want to make it clear that the problem before us is not one of the weakness of our insurance industry. It is a strong and vibrant industry. The industry needs no help, no bail out, no government assistance. And our bill would not give them any assistance, not one penny. Our bill addresses the needs of the insurance customers, the customers who, without this short term program, will not be able to find affordable insurance coverage against terrorism risks.

What does that mean for the economy? It means that without insurance, banks will not make loans where there is an uncovered risk, a risk that what they are lending the money for might be destroyed or harmed by a terrorist. It means that simple, ordinary, everyday business transactions that rely upon the security of underlying insurance coverage will not take place. That means that, without this legislation, come January 1 and the weeks leading up to it a brand new weight will be placed upon our economic recovery just as it starts to get going.

Will the insurance industry be able to figure out how to price this coverage? Yes. But history tells us that they will not figure it out right away. It will take a few months, maybe a couple of years.

The legislation we are introducing today is a program that will work to solve this problem in the mean time. It has been put together in close consultation with industry, with the consumers of insurance products and with the insurance companies. It has been put together in close consultation with the White House and the Treasury Department, and it enjoys their support.

This bill will not create any new, forever government program. It is short term in structure and intent. It is limited in its extent. It is designed to force the insurance industry to develop its own capacity to handle this new risk in a shortened period of time. From our discussions with the industry, with the state regulators, with insurance consumers, we believe that the industry will be up to the task.

Central to our proposal is that this legislation would not provide one penny of federal assistance to the insurance industry. No insurance company will get a penny out of this program. All of the benefits of this program would go to victims of terrorist activities.

The structure of our program is, for a two-year period that may be extended by the Secretary of the Treasury for only one additional year, to divide the terrorism risk with industry. We say to industry, here, you take the first risk. It is all yours. But we will define what that initial risk is so that you can price it. We will put limits on it. We will, for the period of this program, take over the currently unknown risk, the cataclysmic risk, while you develop the means for dealing with that new risk as well, as the industry always has.

Under our program, in the first two years, the industry has sole responsibility for the first \$10 billion of risk from terrorist events. The industry then has ten percent of the risk above that to encourage them to manage and become familiar with managing the catastrophic risk, while the Federal Government will carry ninety percent of that catastrophic risk. If a third year is added, then the industry will have the sole responsibility for the first \$20 billion of risk.

I believe that this is the most effective way not only to deal with this tidal wave approaching our shores but in fact to ward it off. The program is simple and understandable. The program does not have the victims of terrorism paying any extra premiums to the government for the coverage provided by the government. We don't make the suffering pay yet again. But we also do not expose the taxpayer to liability for frivolous lawsuits that might follow a terrorist event.

With the Federal Government providing this insurance benefit, we do not also want to open the Treasury doors to frivolous or predatory litigation. But these limitations are narrow, and

they are limited to the life of the program. They end when the Federal program ends. The limitations are similar to the limitations in place today against lawsuits brought against the Federal Government. We cannot expose the taxpayer to punitive damages at the same time that he is providing generous assistance to the victims of terrorism.

There are a few things that we need to do before adjournment of the Congress this year. I believe that this legislation, that addresses this very serious problem, should be on that sort list of things that we need to do.

I ask unanimous consent the text of the bill and a summary of its highlights be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1751

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION. 1. SHORT TITLE.

This Act may be cited as the "Terrorism Risk Insurance Act of 2001".

SEC. 2. CONGRESSIONAL FINDINGS AND PURPOSE.

(a) FINDINGS.—The Congress finds that—

(1) property and casualty insurance firms are important financial institutions, the products of which allow mutualization of risk and the efficient use of financial resources and enhance the ability of the economy to maintain stability, while responding to a variety of economic, political, environmental, and other risks with a minimum of disruption;

(2) the ability of businesses and individuals to obtain property and casualty insurance at reasonable and predictable prices, in order to spread the risk of both routine and catastrophic loss, is critical to economic growth, urban development, and the construction and maintenance of public and private housing, as well as to the promotion of United States exports and foreign trade in an increasingly interconnected world;

(3) the ability of the insurance industry to cover the unprecedented financial risks presented by potential acts of terrorism in the United States can be a major factor in the recovery from terrorist attacks, while maintaining the stability of the economy;

(4) widespread financial market uncertainties have arisen following the terrorist attacks of September 11, 2001, including the absence of information from which financial institutions can make statistically valid estimates of the probability and cost of future terrorist events, and therefore the size, funding, and allocation of the risk of loss caused by such acts of terrorism;

(5) a decision by property and casualty insurers to deal with such uncertainties, either by terminating property and casualty coverage for losses arising from terrorist events, or by radically escalating premium coverage to compensate for risks of loss that are not readily predictable, could seriously hamper ongoing and planned construction, property acquisition, and other business projects, generate a dramatic increase in rents, and otherwise suppress economic activity; and

(6) the United States Government should provide temporary financial compensation to insured parties, contributing to the stabilization of the United States economy in a

time of national crisis, while the financial services industry develops the systems, mechanisms, products, and programs necessary to create a viable financial services market for private terrorism risk insurance.

(b) PURPOSE.—The purpose of this Act is to establish a temporary Federal program that provides for a transparent system of shared public and private compensation for insured losses resulting from acts of terrorism in order to—

(1) protect consumers by addressing market disruptions and ensure the continued widespread availability and affordability of property and casualty insurance for terrorism risk; and

(2) allow for a transitional period for the private markets to stabilize, resume pricing of such insurance, and build capacity to absorb any future losses, while preserving State insurance regulation and consumer protections.

SEC. 3. DEFINITIONS.

In this Act, the following definitions shall apply:

(1) ACT OF TERRORISM.—

(A) CERTIFICATION.—The term "act of terrorism" means any act that is certified by the Secretary, in concurrence with the Secretary of State, and the Attorney General of the United States—

(i) to be a violent act or an act that is dangerous to—

(I) human life;

(II) property; or

(III) infrastructure;

(ii) to have resulted in damage within the United States, or outside of the United States in the case of an air carrier described in paragraph (3)(A)(ii); and

(iii) to have been committed by an individual or individuals acting on behalf of any foreign person or foreign interest, as part of an effort to coerce the civilian population of the United States or to influence the policy or affect the conduct of the United States Government by coercion.

(B) LIMITATION.—No act or event shall be certified by the Secretary as an act of terrorism if—

(i) the act or event is committed in the course of a war declared by the Congress; or

(ii) losses resulting from the act or event, in the aggregate, do not exceed \$5,000,000.

(C) DETERMINATIONS FINAL.—Any certification, or determination not to certify, an act or event as an act of terrorism under this paragraph shall be final, and shall not be subject to judicial review.

(2) BUSINESS INTERRUPTION COVERAGE.—The term "business interruption coverage"—

(A) means coverage of losses for temporary relocation expenses and ongoing expenses, including ordinary wages, where—

(i) there is physical damage to the business premises of such magnitude that the business cannot open for business;

(ii) there is physical damage to other property that totally prevents customers or employees from gaining access to the business premises; or

(iii) the Federal, State, or local government shuts down an area due to physical or environmental damage, thereby preventing customers or employees from gaining access to the business premises; and

(B) does not include lost profits, other than in the case of a small business concern (as defined in section 3 of the Small Business Act (15 U.S.C. 632) and applicable regulations hereunder) in any case described in clause (i), (ii), or (iii) of subparagraph (A).

(3) INSURED LOSS.—The term "insured loss"—

(A) means any loss resulting from an act of terrorism that is covered by any type of commercial or personal property and casualty insurance policy or endorsement, including business interruption coverage, issued by a participating insurance company if such loss—

(i) occurs within the United States; or

(ii) occurs to an air carrier (as defined in section 40102 of title 49, United States Code), regardless of where the loss occurs; and

(B) does not include any loss covered by any type of life or health insurance policy.

(4) PARTICIPATING INSURANCE COMPANY.—The term "participating insurance company" means any insurance company, including any subsidiary or affiliate thereof (A) that—

(i) is licensed or admitted to engage in the business of providing primary insurance in any State; or

(ii) is not so licensed or admitted, if it is an eligible surplus line carrier listed on the Quarterly Listing of Alien Insurers of the National Association of Insurance Commissioners, or any successor thereto;

(B) that offers in all of its property and casualty insurance policies, coverage for insured losses;

(C) that offers property and casualty insurance coverage for insured losses that does not differ materially from the terms, amounts, and other coverage limitations applicable to losses arising from events other than acts of terrorism; and

(D) that meets any other criteria that the Secretary may reasonably prescribe.

(5) PERSON.—The term "person" means any individual, business or nonprofit entity (including those organized in the form of a partnership, limited liability company, corporation, or association), trust or estate, or a State or political subdivision of a State or other governmental unit.

(6) PROGRAM.—The term "Program" means the Terrorism Insured Loss Shared Compensation Program established by this Act.

(7) SECRETARY.—The term "Secretary" means the Secretary of the Treasury.

(8) STATE.—The term "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, American Samoa, Guam, and each of the United States Virgin Islands.

(9) UNITED STATES.—The term "United States" means all States of the United States.

SEC. 4. TERRORISM INSURED LOSS SHARED COMPENSATION PROGRAM.

(a) ESTABLISHMENT OF PROGRAM.—

(1) IN GENERAL.—There is established in the Department of the Treasury the Terrorism Insured Loss Shared Compensation Program.

(2) AUTHORITY OF THE SECRETARY.—Notwithstanding any other provision of State or Federal law, the Secretary shall administer the Program, and shall pay the Federal share of compensation for insured losses in accordance with subsection (c).

(b) CONDITIONS FOR FEDERAL PAYMENTS.—No payment may be made by the Secretary under subsection (c), unless—

(1) a policyholder that suffers an insured loss, or a person acting on behalf of that policyholder, files a claim with a participating insurance company;

(2) at the time of offer, purchase, and renewal of each policy covering an insured loss, the participating insurance company provides, as soon as practicable following the date of enactment of this Act, clear and conspicuous disclosure in the policy to the policyholder of the premium charged for insured

losses covered by the Program and the Federal share of compensation for insured losses under the Program;

(3) the participating insurance company processes the claim for the insured loss in accordance with its standard business practices, and any reasonable procedures that the Secretary may prescribe; and

(4) the participating insurance company submits to the Secretary, in accordance with such reasonable procedures as the Secretary may establish—

(A) a claim for payment of the Federal share of compensation for insured losses under the Program;

(B) written verification and certification—

(i) of the underlying claim; and

(ii) of all payments made to policyholders for insured losses; and

(C) certification of its compliance with the provisions of this subsection.

(c) **SHARED INSURANCE LOSS COVERAGE.**—

(1) **FEDERAL SHARE.**—Subject to the limitations in paragraph (2), the Federal share of compensation under the Program, to be paid by the Secretary, shall be—

(A) for insured losses resulting from an act of terrorism occurring during the period beginning on the date of enactment of this Act and ending on December 31, 2002, 90 percent of the aggregate amount of all such losses in excess of \$10,000,000,000;

(B) for insured losses resulting from an act of terrorism occurring during the period beginning on January 1, 2003 and ending on December 31, 2003, 90 percent of the aggregate amount of all such losses in excess of \$10,000,000,000; and

(C) if the Program is extended in accordance with section 6, for insured losses resulting from an act of terrorism occurring during the period beginning on January 1, 2004 and ending on December 31, 2004, 90 percent of the aggregate amount of all such losses in excess of \$20,000,000,000.

(2) **CAP ON ANNUAL LIABILITY.**—Notwithstanding paragraph (1), or any other provision of Federal or State law, if the aggregate insured losses exceed \$100,000,000,000 during any period referred to in subparagraphs (A) and (B) of paragraph (1) (or the period referred to in subparagraph (C) of paragraph (1) if the Program is extended in accordance with section 6)—

(A) the Secretary shall not make any payment under this Act for any portion of the amount of such losses that exceeds \$100,000,000,000; and

(B) participating insurance companies shall not be liable for the payment of any portion of the amount that exceeds \$100,000,000,000.

(3) **NOTICE TO CONGRESS.**—The Secretary shall notify the Congress if estimated or actual aggregate insured losses exceed \$100,000,000,000 in any period described in paragraph (1), and the Congress shall determine the procedures for and the source of any such excess payments.

(4) **FINAL NETTING.**—The Secretary shall have sole discretion to determine the time at which claims relating to any insured loss or act of terrorism shall become final.

(5) **DETERMINATIONS FINAL.**—Any determination of the Secretary under this subsection shall be final, and shall not be subject to judicial review.

(d) **FUNDING.**—

(1) **PAYMENT AUTHORITY.**—This Act constitutes payment authority in advance of appropriation Acts and represents the obligation of the Federal Government to provide for the Federal share of compensation for insured losses under the Program.

(2) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated to the Secretary such sums as may be necessary to pay the administrative expenses of the Program.

SEC. 5. GENERAL AUTHORITY AND ADMINISTRATION OF CLAIMS.

(a) **GENERAL AUTHORITY.**—The Secretary shall have the powers and authorities necessary to carry out the Program, including authority—

(1) to investigate and audit all claims under the Program; and

(2) to prescribe regulations and procedures to implement the Program.

(b) **INTERIM RULES AND PROCEDURES.**—The Secretary shall issue interim final rules or procedures specifying the manner in which—

(1) participating insurance companies may file, verify, and certify claims under the Program;

(2) the Secretary shall publish or otherwise publicly announce the applicable percentage of insured losses to be paid by participating insurance companies and the Federal share of compensation for insured losses under the Program;

(3) the Federal share of compensation for insured losses will be paid under the Program, including payments based on estimates of or actual aggregate insured losses;

(4) the Secretary may, at any time, seek repayment from or reimburse any participating insurance company, based on estimates of insured losses under the Program, to effectuate the insured loss sharing schedule and limitations contained in section 4;

(5) participating insurance companies that incur insured losses shall pay their pro rata share of insured losses in accordance with the schedule and limitations contained in section 4; and

(6) the Secretary will determine any final netting of payments for actual insured losses under the Program, including payments owed to the Federal Government from any participating insurance company and any Federal share of compensation for insured losses owed to any participating insurance company, to effectuate the insured loss sharing schedule and limitations contained in section 4.

(c) **SUBROGATION RIGHTS.**—The United States shall have the right of subrogation with respect to any payment made by the United States under the Program.

(d) **CONTRACTS FOR SERVICES.**—The Secretary may employ persons or contract for services as may be necessary to implement the Program.

(e) **CIVIL PENALTIES.**—The Secretary may assess civil money penalties for violations of this Act or any rule, regulation, or order issued by the Secretary under this Act relating to the submission of false or misleading information for purposes of the Program, or any failure to repay any amount required to be reimbursed under regulations or procedures described in section 5(b). The authority granted under this subsection shall continue during any period in which the Secretary's authority under section 6(d) is in effect.

SEC. 6. TERMINATION OF PROGRAM; DISCRETIONARY EXTENSION.

(a) **TERMINATION OF PROGRAM.**—

(1) **IN GENERAL.**—The Program shall terminate, on December 31, 2003, unless the Secretary—

(A) determines, after considering the report and finding required by this section, that the Program should be extended for one additional year, until December 31, 2004; and

(B) promptly notifies the Congress of such determination and the reasons therefore.

(2) **DETERMINATION FINAL.**—The determination of the Secretary under paragraph (1) shall be final, and shall not be subject to judicial review.

(3) **TERMINATION AFTER EXTENSION.**—If the Program is extended under paragraph (1), this Act is repealed, and the Program shall terminate, on December 31, 2004.

(b) **REPORT TO CONGRESS.**—Not later than 18 months after the date of enactment of this Act, the Secretary shall submit a report to Congress—

(1) regarding—

(A) the availability of insurance coverage for acts of terrorism;

(B) the affordability of such coverage, including the effect of such coverage on premiums; and

(C) the capacity of the insurance industry to absorb future losses resulting from acts of terrorism, taking into account the profitability of the insurance industry; and

(2) that considers—

(A) the impact of the Program on each of the factors described in paragraph (1); and

(B) the probable impact on such factors and on the United States economy if the Program terminates on December 31, 2003.

(c) **FINDING REQUIRED.**—A determination under subsection (a) to extend the Program shall be based on a finding by the Secretary that—

(1) widespread market uncertainties continue to disrupt the ability of insurance companies to price insurance coverage for losses resulting from acts of terrorism, thereby resulting in the continuing unavailability of affordable insurance for consumers; and

(2) extending the Program for an additional year would likely encourage economic stabilization and facilitate a transition to a viable market for private terrorism risk insurance.

(d) **CONTINUING AUTHORITY TO PAY OR ADJUST COMPENSATION.**—Following the termination of the Program under subsection (a), the Secretary may take such actions as may be necessary to ensure payment, reimbursement, or adjustment of compensation for insured losses arising out of any act of terrorism occurring during the period in which the Program was in effect under this Act and as to which a determination has been made in accordance with the provisions of section 4 and regulations promulgated thereunder.

(e) **STUDY AND REPORT ON SCOPE OF THE PROGRAM.**—

(1) **STUDY.**—The Secretary, after consultation with the National Association of Insurance Commissioners, representatives of the insurance industry, and other experts in the insurance field, shall conduct a study of the potential effects of acts of terrorism on the availability of life insurance and other lines of insurance coverage.

(2) **REPORT.**—Not later than 1 year after the date of enactment of this Act, the Secretary shall submit a report to the Congress on the results of the study conducted under paragraph (1).

SEC. 7. PRESERVATION OF STATE LAW.

Nothing in this Act shall affect the jurisdiction or regulatory authority of the insurance commissioner (or any agency or office performing like functions) of any State over any participating insurance company or other person—

(1) except as specifically provided in this Act; and

(2) except that—

(A) the definition of the term “act of terrorism” in section 3 shall be the exclusive definition for purposes of compensation for

insured losses under this Act, and shall preempt any provision of State law that is inconsistent with that definition, to the extent that such provision of law would otherwise apply to any insurance policy relating to terrorism risk in the United States;

(B) during the period beginning on the date of enactment of this Act and ending on December 31, 2002, rates for terrorism risk insurance covered by this Act and filed with any State shall not be subject to prior approval or a waiting period, under any law of a State that would otherwise be applicable, except that nothing in this Act affects the ability of any State to invalidate a rate as excessive, inadequate, or unfairly discriminatory; and

(C) during the period beginning on the date of enactment of this Act and for so long as the Program is in effect as provided in Section 6 (including any period during which the Secretary's authority under Section 6(d) is in effect), books and records of any participating insurance company shall be provided, or caused to be provided, to the Secretary or his designee upon request by the Secretary or his designee notwithstanding any provision of the laws of any State prohibiting or limiting such access.

SEC. 8. SENSE OF THE CONGRESS.

It is the sense of the Congress that the insurance industry should build capacity and aggregate risk to provide affordable property and casualty coverage for terrorism risk.

SEC. 9. PROCEDURES FOR CIVIL ACTIONS.

(a) **FEDERAL CAUSE OF ACTION.**—There shall exist a Federal cause of action for property damage, personal injury, or death arising out of or resulting from an act of terrorism, which shall be the exclusive cause of action and remedy for claims for property damage, personal injury, or death arising out of or resulting from an act of terrorism. All State causes of action of any kind for property damage, personal injury, or death otherwise available arising out of or resulting from an act of terrorism, are hereby preempted, except as provided in subsection (f).

(b) **GOVERNING LAW.**—The substantive law for decision in an action for property damage, personal injury, or death arising out of or resulting from an act of terrorism under this section shall be derived from the law, including applicable choice of law principles, of the State, or States determined to be required by the district court assigned under subsection (c), unless such law is inconsistent with or otherwise preempted by Federal law.

(c) **FEDERAL JURISDICTION.**—

(1) **IN GENERAL.**—Notwithstanding any other provision of law, not later than 90 days after the occurrence of an act of terrorism, the Judicial Panel on Multidistrict Litigation shall assign a single Federal district court to conduct pretrial and trial proceedings in all pending and future civil actions for property damage, personal injury, or death arising out of or resulting from that act of terrorism.

(2) **SELECTION CRITERIA.**—The Judicial Panel on Multidistrict Litigation shall select and assign the district court under paragraph (1) based on the convenience of the parties and the just and efficient conduct of the proceedings.

(3) **JURISDICTION.**—The district court assigned by the Judicial Panel on Multidistrict Litigation shall have original and exclusive jurisdiction over all actions under paragraph (1). For purposes of personal jurisdiction, the district court assigned by the Judicial Panel on Multidistrict Litigation shall be deemed to sit in all judicial districts in the United States.

(4) **TRANSFER OF CASES FILED IN OTHER FEDERAL COURTS.**—Any civil action for property damage, personal injury, or death arising out of or resulting from an act of terrorism that is filed in a Federal district court other than the Federal district court assigned by the Judicial Panel on Multidistrict Litigation under paragraph (1) shall be transferred to the Federal district court so assigned.

(5) **REMOVAL OF CASES FILED IN STATE COURTS.**—Any civil action for property damage, personal injury, or death arising out of or resulting from an act of terrorism that is filed in a State court shall be removable to the Federal district court assigned by the Judicial Panel on Multidistrict Litigation under paragraph (1).

(d) **APPROVAL OF SETTLEMENTS.**—Any settlement between the parties of a civil action described in this section for property damage, personal injury, or death arising out of or resulting from an act of terrorism shall be subject to prior approval by the Secretary after consultation with the Attorney General.

(e) **LIMITATION ON DAMAGES.**—Punitive or exemplary damages shall not be available in any civil action subject to this section.

(f) **CLAIMS AGAINST TERRORISTS.**—Nothing in this section shall in any way limit the ability of any plaintiff to seek any form of recovery from any person, government or other entity that was a participant in, or aider and abettor of, any act of terrorism.

(g) **OFFSET.**—In determining the amount of money damages available under this section, the court shall offset any compensation or benefits received or entitled to be received by the plaintiff or plaintiffs from any collateral source, including the United States or any Federal agency thereof, in response to or as a result of the act of terrorism.

(h) **EFFECTIVE PERIOD.**—This section shall apply only to actions for property damage, personal injury, or death arising out of or resulting from acts of terrorism that occur during the effective period of the Program, including, if applicable, any extension period under section 6.

SEC. 10. REPEAL OF THE ACT.

This Act shall be repealed at the close of business on the termination date of the Program under section 6(a), but the provisions of this section shall not be construed as preventing the Secretary from taking, or causing to be taken, such actions under sections 4(c)(4), (5), sections 5(a)(1), (c), (e), section 6(d), and section 9(d) of this Act and applicable regulations promulgated thereunder. Further, the provisions of this section shall not be construed as preventing the availability of funding under section 4(d) during any period in which the Secretary's authority under section 6(d) is in effect.

KEY PROVISIONS OF THE TERRORISM RISK INSURANCE ACT OF 2001

All property and casualty policyholders are covered, including those insured under workers compensation policies and those with business interruption coverage.

Federal tax dollars will be paid as compensation to insured victims of terrorist attacks, not to insurance companies.

The insurance industry would fully cover losses arising from certified acts of terrorism, up to \$10 billion in each year. The government will provide compensation for 90 percent of losses exceeding \$10 billion, with the insurance industry continuing to pay for 10 percent of the losses.

The program is temporary, expiring after two years. The Treasury Secretary has the option to extend the program for one additional year.

The Secretary of the Treasury, in concurrence with the Secretary of State and the Attorney General, will determine whether an event qualifies as a terrorist attack.

In order for property and casualty insurers to participate in the program, insurers are required to offer terrorism coverage to all of their policyholders under terms that are consistent with their other property and casualty policies.

Insurance companies are required to disclose to customers which portion of their premiums they are paying for terrorism risk coverage, apart from other property and casualty coverages.

Careful, narrow restrictions on lawsuit liability are included to protect taxpayer funds from being exposed to opportunistic, predatory assaults on the U.S. Treasury.

The State system of insurance regulation is preserved with very few exceptions. First, the definition of an "act of terrorism" under the bill will become the definition in every state. Also, the small number of states that require pre-approval of rate will be restrained from doing so far terrorism risk coverage during the first year. This does not, however, preempt a state insurance regulatory's ability to review and revise the rates once they are in effect. Finally, the Secretary of the Treasury would have access to the books and records of participating insurers in all States.

Mr. ENZI. Mr. President, today I join with Senators GRAMM, BUNNING, and BENNETT in introducing legislation that provides a temporary public-private partnership for terrorism insurance in the wake of the September 11 attacks. This bill provides a joint partnership between insurance companies and the Federal Government for the next 3 years in cases of terrorist attacks.

September 11 has proven to be the most expensive disaster to ever take place on American soil. With cost estimates ranging from \$40 to \$60 billion, the attacks have drained the capital reserves of some of the largest insurance companies in the world. In addition, as we know all too well, the risk for future attacks is very high. In the absence of this legislation, the insurance industry would be unable to pay the potentially extraordinary costs, and the Federal Government would likely be responsible for the entire costs. This is preemptive legislation.

I believe this legislation strikes the right balance between what the responsibilities should be between the insurance industry and the Federal Government. In each of the first 2 years, the insurance industry is responsible for the first \$10 billion of any attack. By placing a \$10 billion initial retention for the insurance industry, we ensure that the Federal Government does not get involved unless it is absolutely necessary.

After that, we agree the Federal Government should pay 90 percent of the remaining costs up to a \$100 billion threshold. After the first 2 years, the Secretary of the Treasury will decide whether the industry is prepared to once again begin offering this type of coverage. If he believes they are not

prepared, he may extend the program for 1 additional year.

This legislation also includes special provisions for small businesses which might be affected by terrorist attacks. A small business that is located in a building that is destroyed requires different treatment than a global corporation. Whereas a large, multinational corporation has offices all over the world with different lines of revenue, a small business could be eliminated by a single incident that would likely destroy all their equipment, possibly kill personnel, and virtually make it impossible for the business to continue. This bill allows for small businesses to recover lost profits and receive funding for business interruptions due to an attack.

I am sure that many of my colleagues have heard from their State insurance regulators the same as I have. My State insurance commissioner informs me that few, if any, of the new policies being submitted for next year's coverage offer terrorism insurance. With insurance being primarily regulated by the States, this has caused a backlog of filings from being approved and paperwork is quickly accumulating at the State level. We must act quickly to alleviate this backlog that will lead to uncertainty in the marketplace.

The legislation also includes very targeted liability provisions. These provisions are extremely narrow and directed only at this specific program. Without these limitations, we would open the Federal Government's checkbook to every trial lawyer in America, and the American taxpayers would have unlimited liability. The trial lawyers were committed to not pursuing frivolous claims that resulted from September 11, and I certainly hope that they would continue their commitment if America is attacked again.

In closing, I would only like to add that I believe the insurance industry should be commended for the way in which they've handled the September 11 crisis. Despite losing many employees in the bombing, they were one of the first groups at the front of the line offering their assistance and support for the victims. To my knowledge, not a single company has attempted to withhold payment from this disaster. They have been most cooperative in working through the myriad proposals that have been circulated and their support has expedited this process.

I look forward to working with my colleagues to move this legislation before we adjourn.

By Mr. CORZINE (for himself,
Ms. SNOWE, Ms. CANTWELL, Mr.
DODD, Mr. LEAHY, and Mrs.
MURRAY):

S. 1752. A bill to amend the Public Health Service Act with respect to facilitating the development of microbicides for preventing trans-

mission of HIV and other sexually transmitted diseases; to the Committee on Health, Education, Labor, and Pensions.

Mr. CORZINE. Mr. President, I rise today to introduce legislation, the Microbicides Development Act of 2001. I am very pleased to be introducing this bipartisan bill along with my colleagues, Senators SNOWE, CANTWELL, DODD, LEAHY, and MURRAY. I extend my gratitude to Senator CANTWELL, in particular, for her support and assistance in the development of this legislation. Additionally, I applaud the efforts of my colleague in the House of Representatives, Republican Congresswoman CONNIE MORELLA of Maryland, for her leadership on this important issue. We all believe this initiative is vital to the pursuit of combating the global HIV/AIDS crisis.

As you know, tomorrow, December 1, is World AIDS Day. Twenty years ago, the Centers for Disease Control became aware of a virus that was claiming the lives of thousands of gay men in the United States. Throughout most of the 1980s, we thought of AIDS purely as a gay men's disease. Twenty years later, we find that we couldn't have been more wrong, as we have seen this disease spread globally to women, children, and heterosexual men, infecting and killing millions.

Today, women and children are being impacted by this epidemic at alarming rates. Every day, 6,300 women worldwide become infected with HIV. In fact, women now represent the fastest growing group of new HIV infections in the United States. AIDS is the fourth leading cause of death among women aged 25 to 44 in this country. Unfortunately, I have seen the devastation that this disease is having on women, as New Jersey has the Nation's fourth highest HIV/AIDS infection rate among women, and the second highest infection rate among all adults.

Despite this growing trend, however, there exists absolutely no HIV or STD prevention method that is within a woman's personal control. Condom use must be negotiated with a partner. We are all aware that for too many women, particularly low-income women in the developing world who rely upon a male partner for economic support, there is no power of negotiation. We know these women are at risk, yet, we expect them to protect themselves without any tools.

Today we have the opportunity to invest in groundbreaking research that can produce these tools, and ultimately, empower women. Microbicides are self-administered products that women could use to prevent transmission of STDs, including HIV/AIDS. I say "could," because due to insufficient research investments, no microbicides have been brought to market. This legislation would encourage federal investments for microbicide

research through the establishment of programs at the National Institutes for Health, NIH, and the Centers for Disease Control and Prevention, CDC.

In addition to investing new resources in microbicide research, the Microbicides Development Act will expedite the implementation of the NIH's 5-year strategic plan for microbicide research, as well as expand coordination among Federal agencies already involved in this research, including NIH, CDC, and the United States Agency on International Development, USAID. The bill also establishes Microbicide Research and Development Teams at the NIH. These teams will bring together public and private scientists and resources to research and development microbicides for the prevention of HIV and STD infection.

The Microbicides Development Act of 2001 has the potential not only to save millions of lives, but also to save billions in health care costs. Every year, 15 million new HIV and other STD infections occur among Americans aged 15 and older. The direct cost to the U.S. economy of STDs and HIV infection is approximately \$8.4 billion. When the indirect costs, such as lost productivity, are included, that figure rises to an estimated \$20 billion.

While new therapies are being developed to prolong the lives of individuals infected with HIV/AIDS—and we must continue developing new therapies—only prevention can truly ensure the safety and health of those vulnerable to infection. If we do not pay a small price now to invest in new prevention methods, we will pay a much higher price later.

Federal support for microbicide research is crucial. Numerous small biotechnology companies and university researchers are actively engaged in microbicide research, but they are almost totally dependent on public-sector grants to continue their work and to test their products. Existing public sector grants for microbicides, however, are too small and too short-term to move product leads forward. According to the Alliance for Microbicide Development and other health advocates, in order to bring a microbicide to market within the next 5 years, current Federal investments in microbicide research should be increased to \$75 million this year. The NIH currently invests only \$25 million a year, or 1 percent of its total HIV/AIDS budget, in such important research.

This legislation will make microbicide research the priority it should be, a priority the Federal Government must have if it expects to save the lives of women and their children worldwide, who, 20 years after the first AIDS death, will otherwise become victims of a preventable disease.

In closing, I would like to request that an opinion piece written by United Nations' Secretary General Kofi

Annan that appeared in the Washington Post yesterday be included in the RECORD. In his comments recognizing World AIDS Day, Secretary Annan reiterates the importance of investing in new prevention methods as we continue to fight against AIDS.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NO LETTING UP ON AIDS

(By Kofi Annan)

Every day more than 8,000 people die of AIDS. Every hour almost 600 people become infected. Every minute a child dies of the virus. Just as life—and death—goes on after Sept. 11, so must we continue our fight against the HIV/AIDS epidemic. Before the terrorist attacks two months ago, tremendous momentum had been achieved in the fight. To lose it now would be to compound one tragedy with another.

New figures, released in advance of World AIDS Day, Dec. 1, show that more than 40 million people are now living with the virus. The vast majority of them are in sub-Saharan Africa, where the devastation is so acute that it has become one of the main obstacles to development. But parts of the Caribbean and Asia are not far behind, and the pandemic is spreading at an alarming rate in Eastern Europe.

For too long, global progress in facing up to AIDS was painfully slow, and nowhere near commensurate with the challenge. But in the past year, for much of the international community the magnitude of the crisis has finally begun to sink in. Never, in the two long decades that the world has faced this growing catastrophe, has there been such a sense of common resolve and collective possibility.

Public opinion has been mobilized by the media, nongovernmental organizations and activists, by doctors and economists and by people living with the disease. Pharmaceutical companies have made their AIDS drugs more affordable in poor countries, and a growing number of corporations have created programs to provide both prevention and treatment for employees and the wider community. Foundations are making increasingly imaginative and generous contributions, both financial and intellectual—in prevention, in reducing mother-to-child transmission, in the search for a vaccine.

In a growing number of countries, effective prevention campaigns have been launched. There has been an increasing recognition, among both donors and the most affected countries, of the link between prevention and treatment. There has also been a new understanding of the particular toll AIDS is taking on women—and of the key role they have in fighting the disease.

The entire United Nations family is fully engaged in this fight, working to a common strategic plan and supporting country, regional and global efforts through our joint program, UNAIDS. Perhaps most important, a new awareness and commitment have taken hold among governments—most notably in Africa.

Last June the membership of the United Nations met in a special session of the General Assembly to devise a comprehensive and coordinated global response to the AIDS crisis.

They adopted a powerful declaration of commitments, calling for a fundamental shift in our response to HIV/AIDS as a global economic, social and development challenge

of the highest priority. They reaffirmed the pledge, made by world leaders in their Millennium Declaration, to halt and begin to reverse the spread of AIDS by 2015. And they set out a number of further ambitious but realistic time-bound targets and goals. Among them were commitments to reach, by 2005, an overall target of annual expenditure on AIDS of \$7 billion to \$10 billion per year in low- and middle-income countries; to ensure, by 2005, that a wide range of prevention programs are available in all countries; and to support the establishment of a fund to help finance an urgent and expanded response to the epidemic.

Only seven months after I proposed this new international facility to support the global fight against AIDS and other infectious diseases, pledges to the fund stand at more than \$1.5 billion. The fund cannot be the only channel of resources for a full-scale global response to AIDS. But what is most heartening is the range of pledges that have been made: from the world's wealthiest nations—starting with the founding contribution from the United States last May—but also from some of its poorest, as well as from foundations, corporations and private individuals.

It is clear that we have the road map, the tools and the knowledge to fight AIDS. What we must sustain now is the political will. Life after Sept. 11 has made us all think more deeply about the kind of world we want for our children. It is the same world we wanted on Sept. 10—a world in which a child does not die of AIDS every minute.

Ms. CANTWELL. Mr. President, I rise today with my colleagues Senators CORZINE and SNOWE to introduce the Microbicides Development Act of 2001, and to recognize tomorrow, December 1, as World AIDS Day. As we reflect on the last 20 years of battling this disease, we need to remember the thousands of people here in the United States and the millions worldwide afflicted by HIV and AIDS.

It is hard to believe that it has been 20 years since we first learned of the disease that would come to be known as Acquired Immune Deficiency Syndrome or AIDS. In those 20 years medical and pharmaceutical advancements have made HIV/AIDS more manageable for some, but a cure is yet to be found. And in those 20 years since we first learned of AIDS we have begun to see a changing face of AIDS across the country, as well as in my home State of Washington.

Consider these facts.

Twenty years ago, HIV infections attributed to sex between gay men accounted for nearly all HIV/AIDS cases in the country. Today, more than half—54 percent—of HIV infections are in different population groups: straight or bisexual women, or straight men. In fact, between the beginning of the AIDS epidemic and today, the proportion of women newly infected with HIV more than tripled—from 7 percent to 23 percent.

Twenty years ago, HIV infections were primarily appearing in Caucasians. Today, HIV/AIDS is disproportionately affecting communities of color. Approximately two-thirds of all

women and over 40 percent of all men reported with AIDS were black. Although Hispanics represent 13 percent of the population, they accounted for 19 percent of new HIV infections in 1999.

And one in four Washingtonians infected with HIV is under aged 22. Half are under 25. These are people that have grown up with the disease—they should be educated on prevention and they should know how to take care of themselves. But somehow complacency—whether from the new drugs and medical treatment—or from disease ennui—has replaced the message we want to be sending.

We have long known that the only way to stop the advance of this terrible disease is through a coordinated and comprehensive approach to education, prevention and treatment. As a community we need to refocus our efforts and not allow complacency—especially among populations not traditionally associated with HIV/AIDS—to dictate the future. There must be a continued commitment to the eradication of this terrible disease.

Before the end of today, several hundred people will become infected with AIDS. In these days of fear of Anthrax and discussions of bioterrorism we should not lose sight of the worst natural pandemic in human history. Twenty years after the U.S. Centers for Disease Control and Prevention first identified AIDS, I am afraid that this vast tragedy has become a little too familiar, and we may have become a little too complacent.

The HIV/AIDS epidemic rages on, from Asia and Eastern Europe to the Caribbean and most tragically Africa. As AIDS has become an international crisis, its face has become that of humanity itself. I fear that AIDS may become the single greatest obstacle to global development humanity has ever faced.

And while it is easy to become discouraged in the face of such a huge, heartbreaking calamity—the truth is we know how to stop the spread of AIDS. Through a coordinated and comprehensive program of education, prevention and treatment, we know that the epidemic can be greatly reduced in scope.

To that end, I'm proud to join Senator CORZINE in sponsoring the Microbicides Development Act of 2001. This bill increases authorization of funding for microbicide research at the National Institutes of Health and the CDC.

Microbicides represent a novel and virtually unexplored area in STD/HIV research. Microbicides can kill or inactivate the bacteria and viruses that cause STDs and AIDS. Despite their huge potential, microbicide research is underrepresented in the federal HIV research portfolio. Currently, Microbicide development represents

only one percent of federal research in HIV/AIDS.

Microbicides are unique in that they are under development as topical products—a cream or gel. This gives them a high degree of versatility and user control. This is especially important for women who are unable to or cannot ask their partner to use a condom to prevent spreading HIV. Development of a dependable, affordable and easy to use microbicide would represent a major breakthrough in AIDS prevention—allowing populations like commercial sex workers to have more control over their own bodies. It is extremely important to prevent HIV transmission and serve women, a population increasingly at risk for HIV infection.

Microbicide development is a fertile but unexplored anti-HIV research area. Pharmaceutical companies have generally concentrated on high return disease treatments and government-sponsored vaccine programs. While there are potential microbicides in the research and development pipeline, this bill encourages the pursuit of these promising compounds by increasing authorization for the current federal investment in microbial research in the next fiscal year.

Through this bill, we will emphasize the work at the National Institutes of Health and the Centers for Disease Control and Prevention to develop products to prevent the transmission of AIDS for women. I can think of no new direction in AIDS prevention that has a larger potential—we know that the best preventatives must be easy to use and controlled by the user. I expect that microbicides will fill a new role in preventing the spread of HIV and AIDS. I thank Senator CORZINE for his leadership on this issue and I urge my colleagues to support this bill.

By Mr. BINGAMAN (for himself, Mr. CAMPBELL, and Ms. CANTWELL):

S. 1753. A bill to amend title XIX of the Social Security Act to include medical assistance furnished through an urban Indian health program operated by an urban Indian organization pursuant to a grant or contract with the Indian Health Service under title V of the Indian Health Care Improvement Act in the 100 percent Federal medical assistance percentage applicable to the Indian Health Service; to the Committee on Finance.

Mr. BINGAMAN. Mr. President, the legislation I am introducing today with Senators CAMPBELL and CANTWELL entitled the “Urban Indian Health Medicaid Amendments Act of 2001” would raise the Medicaid matching rate to 100 percent for Medicaid-covered services provided to Medicaid-eligible American Indians and Alaska Natives at urban Indian health programs.

The legislation eliminates the discrepancy in current law that provides

for a higher matching rate to states for care delivered in a non-urban outpatient facility operated by the Indian Health Service, or IHS, or by a tribe or a tribal organization under contract with IHS compared to the lower matching rate to an urban Indian program funded by the IHS to deliver services to Medicaid-eligible Native Americans residing in urban areas.

The bill would not alter current policy toward facilities operated by the IHS or by tribes or tribal organizations. As under current law, the Federal Government would continue to pay 100 percent of the cost of treating Medicaid-eligible American Indian or Alaska Natives at an IHS hospital or tribal clinic. Similarly, the bill would not alter the amounts paid to IHS hospitals or tribal clinics for treating Medicaid patients.

Instead, the bill simply extends the 100 percent federal matching rate to the costs of treatment of Medicaid-eligible Native Americans in urban Indian health programs and corrects the inconsistency in treatment under current Medicaid law.

The urban Indian health program was first authorized in 1976 in Title V of the “Indian Health Care Improvement Act.” According to a report entitled “Urban Indian Health” by the Kaiser Family Foundation that was released this month, “The purpose of the Title V program is to make outpatient health services accessible to urban Indians, either directly or by referral. These services are provided through non-profit organizations, controlled by urban Indians, that receive funds under contract with the IHS.”

In fact, the Federal Government, through the IHS, currently funds 36 urban Indian health programs in 20 states: Arizona, 3; California, 8; Colorado, 1; Illinois, 1; Kansas, 1; Massachusetts, 1; Michigan, 1; Minnesota, 1; Montana, 5; Nebraska, 1; Nevada, 1; New Mexico, 1; New York, 1; Oklahoma, 2; Oregon, 1; South Dakota, 1; Texas, 1; Utah, 1; Washington, 2; and Wisconsin, 2.

These programs are nonprofit organizations that provide outpatient primary care services, and in some cases, just referral services, to urban Indians, many of whom are eligible for Medicaid. In FY 2001, Congress appropriated \$29.9 million, or just 1 percent of the Indian Health Service budget, in discretionary funding to these programs. These programs are expected to supplement this direct funding with revenues from third party payers, such as private insurance and Medicaid.

Urban Indian health programs may participate as providers in their state's Medicaid program and receive payment for services covered by Medicaid that are furnished to Medicaid-eligible urban Indians. Whatever amount the state pays the urban Indian program for a Medicaid patient visit, the Fed-

eral Government will match the State's expenditure at the State's regular Federal Medicaid matching rate, or FMAP.

In contrast, if an American Indian or Alaska Native who is eligible for Medicaid receives primary care services covered by Medicaid at an outpatient facility operated by the IHS or by a tribe or a tribal organization under contract with the IHS, the Federal Government will pay 100 percent of the cost of the service.

The policy rationale for this enhanced matching rate is that because Indian health is a Federal responsibility, states should not have to share in the costs of providing Medicaid services to Native American beneficiaries receiving care through facilities operated directly by the Federal Government's IHS or by tribes or tribal organizations on behalf of the IHS. This same rationale applies to Medicaid-covered services provided by urban Indian programs funded by the IHS to deliver services to Medicaid-eligible Native Americans residing in urban areas. Unfortunately, the Medicaid statute does not reflect this policy. This legislation would address this inequity.

Moreover, as a report by the Kaiser Family Foundation entitled “Urban Indian Health” released this month adds, “Extension of this 100 percent matching rate to services provided by Title V providers to Medicaid-eligible urban Indians may give State Medicaid programs an incentive to treat these ‘safety net’ clinics more favorably in both a fee-for-service and managed care context.”

The proposal would simply amend the third sentence in section 1905(b) of the Social Security Act to read as follows (new language in *italics*):

Notwithstanding the first sentence of this section, the Federal medical assistance percentage shall be 100 per centum with respect to amounts expended as medical assistance for services which are received through an Indian Health Service facility or program whether operated by the Indian Health Service or by an Indian tribe or tribal organization or by an urban Indian health program (as defined in section 4 of the Indian Health Care Improvement Act).

The amendment would be effective for Medicaid services furnished on or after October 1, 2001. Under this language, the enhanced 100 percent matching rate would apply only to services furnished directly “through” an urban Indian health program, not by referral. Note that the amendment would not determine the particular amount the state Medicaid program pays an urban Indian health program for a particular service, such as a patient visit. The language only affects the Federal Government's share of that payment amount.

Despite the fact that recent Census figures indicate that 57 percent of the 2.5 million people that identify themselves solely as American Indian and

Alaska Native live in metropolitan areas, including 17,444 in Albuquerque, New Mexico, the IHS budget only provides 1 percent of its funding to urban Indian health programs. We should and must begin to take steps to eliminate such dramatic discrepancies.

As a result, within the Medicaid program, just as the Federal Government reimburses States 100 percent for the costs of services delivered to Native American beneficiaries receiving care through facilities operated directly by the Federal Government's IHS or by tribes or tribal organizations on behalf of the IHS, the same should apply to urban Indian health programs. This simple, yet important bill will eliminate the disparity and I urge its swift passage.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1753

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Urban Indian Health Medicaid Amendments Act of 2001".

SEC. 2. INCLUSION OF MEDICAL ASSISTANCE FURNISHED THROUGH AN URBAN INDIAN HEALTH PROGRAM IN 100 PERCENT FMAP.

(a) IN GENERAL.—The third sentence of section 1905(b) of the Social Security Act (42 U.S.C. 1396d(b)) is amended—

(1) by inserting "or program" after "facility";

(2) by striking "or by" and inserting ", by"; and

(3) by inserting ", or by an urban Indian organization pursuant to a grant or contract with the Indian Health Service under title V of the Indian Health Care Improvement Act" before the period.

(b) EFFECTIVE DATE.—The amendments made by subsection (a) take effect on October 1, 2002.

By Mr. LEAHY (for himself, Mr. HATCH, Mr. REID, and Mr. BENNETT):

S. 1754. A bill to authorize appropriations for the United States Patent and Trademark Office for fiscal years 2002 through 2007, and for other purposes; to the Committee on the Judiciary.

Mr. LEAHY. Mr. President, I am pleased to join with Senators HATCH, REID, and BENNETT in the introduction of the Patent and Trademark Office Authorization Act of 2002. Senator HATCH and I, as leaders of the Judiciary Committee, have had great success in working together to protect America's innovators and to protect our patent and trademark system.

This bill is another example of our bipartisan effort to strengthen America's future. By joining with Senators REID and BENNETT, this bill will send a strong message to America's innovators and inventors that the Con-

gress intends to protect and enhance our patent system. The PTO serves a critical role in the promotion and development of commercial activity in the United States by granting patents and trademark registrations to our nation's innovators and businesses.

The costs of running the PTO are entirely paid for by fees collected by the PTO from users, individuals and companies that seek to benefit from patent and trademark protections. However, since 1992 Congress has diverted over \$800 million of those fees for other government programs unrelated to the PTO.

This bill sends a strong message that Congress should appropriate to the PTO a funding level equal to these fees. The reason for this is simple: the creation of intellectual property by Americans, individuals and businesses, is a massive positive driving force for our economy and is a huge plus for our trade balance with the rest of the world. In recent years, the number of patent applications has risen dramatically, and that trend is expected to continue. Our patent examiners are very overworked, and emerging areas such as biotechnology and business method patents may overwhelm the system.

If fully implemented as intended, this bill can greatly assist the PTO in issuing quality patents more quickly which means more investment, more jobs and greater productivity for American businesses. Similarly, early federal registration of the name, logo, or symbol of a company or product is necessary to protect rights and avoid expensive litigation. Section 2 of the bill thus authorizes Congress to appropriate to the PTO, in fiscal years 2002 through 2007, an amount equal to the fees estimated by the Secretary of Commerce to be collected in each of the next five fiscal years. The Secretary shall make this report to the Congress by February 15 of each such fiscal year.

Section 3 of the bill directs the PTO to develop, in the next three years, an electronic system for the filing and processing of all patent and trademark applications that is user friendly and that will allow the Office to process and maintain electronically the contents and history of all applications. Of the amount appropriated under section 2, section 3 authorizes Congress to appropriate not more than \$50 million in fiscal years 2002 and 2003 for the electronic filing system.

Third, the bill requires the PTO to develop a strategic plan to set forth for the methods by which the PTO will enhance patent and trademark quality, reduce pendency, and develop an effective electronic system for the benefit of filers, examiners, and the general public regarding patents and trademarks.

I am pleased that my colleagues in the other body, Congressmen COBLE

and BERMAN, have introduced similar legislation. I am very concerned that the Bush Administration budget for FY 2002 planned to divert \$207 million in PTO fees to programs outside the PTO. This diversion takes fees paid by inventors and businesses to secure patents or trademarks and uses them to promote unrelated programs. It does this at a time when the number of patent and trademark applications has increased by 50 percent since 1996, and while the "waiting period," or pendency period, has increased 20 percent 1996. Even worse, the PTO estimates that the patent pendency period could increase to 38 months by 2006.

The bill also contains two sections which will clarify two provisions of current law and thus provide certainty and guidance to the PTO and for inventors and businesses.

Section 5 expands the scope of matters that may be raised during the reexamination process to a level which had been the case for many years. Let me explain the background. Congress established the patent reexamination system in 1980 for three purposes: to attempt to settle patent validity questions quickly and less expensively than litigation; to allow courts to rely on PTO expertise; and, third, to reinforce investor confidence in the certainty of patent rights by affording an opportunity to review patents of doubtful validity.

This system of encouraging third parties to pursue reexamination as an efficient method of settling patent disputes is still a good idea. However, by clarifying current law this bill increases the discretion of the PTO and enhances the effectiveness of the reexamination process. It does this by permitting the use of relevant evidence that was considered by the PTO, but not necessarily cited. Thus, adding this sentence to current law, which only allows for reexaminations when "substantial new questions of patentability exist", will help prevent the misuse of defective patents, especially those concerning business method patents.

It permits a reexamination based on prior art cited by an applicant that the examiner failed to adequately consider. Thus, this change allows the PTO to correct some examiner errors that it would not otherwise be able to correct.

Section 6 of the bill modestly improves the usefulness of inter partes reexamination procedures by enhancing the ability of third-party requesters to participate in that process by allowing such a third party to appeal an adverse reexamine decision in Federal court or to participate in the appeal brought by the patentee. This may make inter partes reexamination a somewhat more attractive option for challenging a patent in that a third party should feel more comfortable that the courts can be accessed to rectify a mistaken reexamination decision. This section

should increase the use of the reexamine system and thus decrease the number of patent matters adjudicated in federal court.

I again want to express my appreciation to the co-sponsors of this bill, Senators HATCH, REID, and BENNETT and look forward to working with other Senators on these matters.

Mr. HATCH. Mr. President, I am pleased to join with Senators LEAHY, REID, and BENNETT in the introduction of the Patent and Trademark Office Authorization Act of 2002. As Senator LEAHY mentioned, he and I, as leaders of the Judiciary Committee, have enjoyed a productive relationship working together to protect America's innovators, and to strengthen our intellectual property laws as well as the agencies that administer and enforce them.

One of the issues we have long worked on is strengthening the ability of the United States Patent Office, "USPTO", to do its important work in reviewing and granting intellectual property rights to inventors seeking the patents that drive our high-tech economy or those businesses that seek to protect the trademarks that consumers rely on to find the goods and services they want. For those inventors and businesses to succeed in using those patent or trademark rights, the USPTO needs to do a quality and timely job in reviewing and granting those rights.

However, over the past few years, the USPTO has been under mounting pressure on three fronts, increased filings, increased complexity in the filings, and increased difficulty retaining valuable and experienced examiners in the face of more lucrative offers in the private sector. These pressures, if unaddressed, can lead to delays for applicants of months or years, or to reduced quality and reliability of the determinations that issue from the USPTO. Indeed, the USPTO estimates that the patent pendency period could rise to 38 months by 2006. I hate to think that innovative products could sit on the shelf for more than three years awaiting government review. This is especially troubling when we realize that in many high-tech sectors the shelf life of a product is often less than half that time. Such increased waiting periods and lower quality decision-making means slower innovation, less competitiveness, higher costs, and greater risk for those seeking patents or trademarks. And, consequently, the rest of us and our economy could see slower recovery and weaker growth. Addressing these challenges will require leadership, of course, which I believe can be provided by the President's nominee to head the USPTO, former Congressman Jim Rogan. But, to be realistic, we must admit that surely it will also require resources.

As many in this body know, the costs of running the USPTO are entirely paid

for by fees collected from applicants, individuals and companies that seek to benefit from patent and trademark protection. However, since 1992 Congress has diverted an amount estimated at over \$800 million from those fees for other government programs unrelated to the USPTO.

At a time when our economy needs support, it seems doubly wrong to levy what amounts to a tax on innovation, a tax imposed by taking a portion of the fees America's innovators and businesses pay to secure protection for their economy-generating products and services and spending it on unrelated government programs. I believe that fees paid to secure patent and trademark rights should be used to process those applications faster with better reliability precisely because getting the products of American ingenuity to market faster helps grow our economy faster.

That is why I am glad to join my colleagues in introducing this bill which takes the position that Congress should appropriate to the USPTO a funding level equal to the fees applicants pay. I agree with my colleagues that if fully implemented as intended, this bill can greatly assist the USPTO in issuing quality patents more quickly, which in turn can lead to more investment, job creation, and productivity for American businesses.

In addition to establishing the principle that user fees collected by the USPTO should be used to serve those who pay them, the bill makes additional improvements to the way the USPTO does business, further enhancing its ability to serve American companies and inventors. Among these improvements are the requirement that the USPTO develop a user-friendly electronic system for the filing and processing of all patent and trademark applications, and that the PTO to develop a strategic plan to enhance patent and trademark quality, reduce pendency, and otherwise improve their systems and services for the benefit of applicants, examiners, and the general public. The bill also contains two sections which will clarify two provisions of current law regarding reexamination of patents to provide greater guidance to the USPTO and its customers about the scope and availability of the reexamination process. Both of these changes should help streamline and reduce the costs of post-grant patent decisions.

I again want to express my appreciation to Senator LEAHY, the chairman of the Judiciary Committee, for this leadership, and to the other co-sponsors of this bill, Senators REID and BENNETT. I look forward to working with them and my other colleagues on this important legislation.

STATEMENTS ON SUBMITTED RESOLUTIONS

SENATE RESOLUTION 185—RECOGNIZING THE HISTORICAL SIGNIFICANCE OF THE 100TH ANNIVERSARY OF KOREAN IMMIGRATION TO THE UNITED STATES

Mr. ALLEN (for himself, Mr. HELMS, Mr. CAMPBELL, Mr. WARNER, Mr. ALLARD, Mr. INOUE, Mrs. FEINSTEIN, Mr. BIDEN, Mr. SMITH of Oregon, Mr. GRASSLEY, Mr. SESSIONS, Mr. FITZGERALD, and Mr. GRAMM) submitted the following resolution; which was referred to the Committee on the Judiciary.

S. RES. 185

Whereas missionaries from the United States played a central role in nurturing the political and religious evolution of modern Korea, and directly influenced the early Korean immigration to the United States;

Whereas in December 1902, 56 men, 21 women, and 25 children left Korea and traveled across the Pacific Ocean on the S.S. Gaelic and landed in Honolulu, Hawaii on January 13, 1903;

Whereas the early Korean-American community was united around the common goal of attaining freedom and independence for their colonized mother country;

Whereas members of the early Korean-American community served with distinction in the Armed Forces of the United States during World War I, World War II, and the Korean Conflict;

Whereas on June 25, 1950, Communist North Korea invaded South Korea with approximately 135,000 troops, thereby initiating the involvement of approximately 5,720,000 personnel of the United States Armed Forces who served during the Korean Conflict to defeat the spread of communism in Korea and throughout the world;

Whereas casualties in the United States Armed Forces during the Korean Conflict included 54,260 dead (of whom 33,665 were battle deaths), 92,134 wounded, and 8,176 listed as missing in action or prisoners of war;

Whereas in the early 1950s, thousands of Koreans, fleeing from war, poverty, and desolation, came to the United States seeking opportunities;

Whereas Korean-Americans, like waves of immigrants to the United States before them, have taken root and thrived in the United States through strong family ties, robust community support, and countless hours of hard work;

Whereas Korean immigration to the United States has invigorated business, church, and academic communities in the United States;

Whereas according to the 2000 United States Census, Korean-Americans own and operate 135,571 businesses across the United States that have gross sales and receipts of \$46,000,000,000 and employ 333,649 individuals with an annual payroll of \$5,800,000,000;

Whereas the contributions of Korean-Americans to the United States include, the invention of the first beating heart operation for coronary artery heart disease, the development of the nectarine, a 4-time Olympic gold medalist, and achievements in engineering, architecture, medicine, acting, singing, sculpture, and writing;

Whereas Korean-Americans play a crucial role in maintaining the strength and vitality of the United States-Korean partnership;

Whereas the United States-Korean partnership helps undergird peace and stability in the Asia-Pacific region and provides economic benefits to the people of the United States and Korea and to the rest of the world; and

Whereas beginning in 2003, more than 100 communities throughout the United States will celebrate the 100th anniversary of Korean immigration to the United States: Now, therefore, be it

Resolved, That the Senate—

(1) recognizes the achievements and contributions of Korean-Americans to the United States over the past 100 years; and

(2) requests that the President issue a proclamation calling on the people of the United States and interested organizations to observe the anniversary with appropriate programs, ceremonies, and activities.

Mr. ALLEN. Mr. President, I am pleased to submit today, along with the Chairman of the Foreign Relations Committee, Senator BIDEN, the Vice Chairman of the Armed Services Committee, Mr. WARNER, and the Vice Chairman of the Indian Affairs Committee, Mr. CAMPBELL, and many of our colleagues, a Senate resolution recognizing the historical significance of the 100th anniversary of Korean-American immigration to the United States in 2003.

In December of 1902, 56 men, 21 women and 25 children traveled from Korea across the Pacific Ocean on the *S.S. Gaelic* and landed in Honolulu, HI, on January 13, 1903, marking the first entry of Korean immigrants to the U.S. territories. The year 2003 will be the 100th Anniversary of that immigration. With that anniversary looming, interest in this historic centennial celebration is growing in Korean communities in the United States and worldwide, including events within the vibrant Korean-American communities in the Commonwealth of Virginia.

A century is more than a convenient marker for Korean-Americans: It celebrates Koreans' prominent place in the broad narrative of America. Judging by their achievements over these past 100 years, theirs is an American story that confirms the opportunity for individual initiative, creativity, hard work and success in these free United States.

Both individually and as a community, Korean-Americans have much to celebrate in 2003. In such diverse areas as commerce and finance, technology, medicine, education, and the arts, Korean-American contributions are being widely acknowledged and recognized. Even the Korean culture, uniquely shaped, inspired, and nurtured by life in America, is becoming part of the vernacular. From Hawaii to California to New York, and in Annandale in Fairfax County, VA, Korean-American communities are vibrant and vital leaders throughout the United States.

It is worth noting that apart from the many achievements by Korean-Americans, unique among all immigrant communities in the United States, the early Korean-American

community was united around the common goal of attaining freedom and independence for their colonized mother country. Like many immigrant groups, Korean-Americans embraced the basic principles of democracy in our Constitution. It is a goal that continues to this day, when one considers that one out of four Korean-Americans still has relatives and other loved ones trapped in North Korea.

Starting in the early 1950s, thousands of immigrants, fleeing from war, poverty and desolation came to the United States seeking opportunities. Without knowing the language and without great wealth, but with strong family ties, caring community support and many hours of hard work, Korean-Americans, like waves of immigrants before them, have taken root and thrived in our free American soil.

Crucial to Korean-Americans' success was their ability to organize themselves for mutual support and assistance through associations, churches and other organizations. This success has translated itself, according to the 2000 U.S. Census, into 135,571 businesses owned and operated by Korean-Americans across the country with gross sales and receipts of \$46 billion. These businesses employ 333,649 men and women with an annual payroll of \$5.8 billion.

The contributions to this country by early Korean-Americans include the invention of the first beating heart operation for coronary heart disease, the development of the nectarine and a four-time Olympic gold medallist. In the modern era, there have been notable achievements by engineers, architects, doctors, actors, singers, sculptors and novelists, among others. With more than 100 communities throughout the United States preparing to celebrate the 100th anniversary of Korean-American immigration to the United States, it is appropriate and deserving to recognize the historical significance of this milestone.

It is my hope that this resolution will encourage appreciation, pride, and self-awareness among Korean Americans, and I encourage schools, organizations, and Federal, State, and local governments to plan activities and programs together with the many Korean-American organizations that are currently preparing for this wonderful anniversary of the living American Dream.

I respectfully ask for the support of my colleagues on both sides of the aisle for this resolution, and urge the Senate to pass this historic resolution.

SENATE CONCURRENT RESOLUTION 87—EXPRESSING THE SENSE OF CONGRESS REGARDING THE CRASH OF AMERICAN AIRLINES FLIGHT 587

Mr. SCHUMER (for himself and Mrs. CLINTON) submitted the following con-

current resolution; which was referred to the Committee on the Judiciary:

S. CON. RES. 87

Whereas American Airlines Flight 587 en route from John F. Kennedy Airport in Queens County, New York to Santo Domingo, Dominican Republic crashed on the Rockaway Peninsula in Queens County, New York on November 12, 2001;

Whereas the crash resulted in the tragic loss of life by an estimated at 266 persons, including passengers, crew members, and people on the ground;

Whereas New York City has strong cultural, familial, and historic ties to the Dominican Republic;

Whereas many of the passengers were of Dominican origin residing in the Washington Heights community, a vibrant neighborhood that is an integral part of our national cultural mosaic;

Whereas the Rockaway community has already suffered greatly as a result of the terrorist attacks on the World Trade Center in New York City on September 11, 2001, as the Rockaway community has long been home to one of the highest concentrations of the firefighters of New York City, many of whom lost their lives responding to those attacks on the World Trade Center;

Whereas many Rockaway residents, ignoring the risks of being harmed by fire or other hazards at the site of the plane crash, rushed to the site in an effort to help;

Whereas the people of Rockaway have served as an inspiration through their resilience in the face of adversity and their faith in and practice of community; and

Whereas the professional emergency personnel of New York on the ground at the crash site performed emergency services valiantly, thereby limiting the devastation of this tragedy: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring),

SECTION 1. SENSE OF CONGRESS.

The Congress—

(1) sends its heartfelt condolences to the families, friends, and loved ones of the victims of the crash of American Airlines Flight 587 on November 12, 2001;

(2) sends its sympathies to the people of the Dominican Republic and to the Dominican community in the City of New York who have been so tragically affected by the loss of loved ones aboard that flight;

(3) sends its sympathies to the people of the Rockaway community who have suffered immense personal loss as a combined result of the crash on November 12, 2001, and the terrorist attacks on the World Trade Center on September 11, 2001; and

(4) commends the heroic actions of the rescue workers, volunteers, and State and local officials of New York who responded to these tragic events with courage, determination, and skill.

SEC. 2. TRANSMISSION OF THE ENROLLED RESOLUTION.

The Clerk of the Senate shall transmit an enrolled copy of this resolution to the President of the Dominican Republic and to the Mayor of New York City.

AMENDMENTS SUBMITTED AND PROPOSED

SA 2175. Mr. NICKLES submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform,

and for other purposes; which was ordered to lie on the table.

SA 2176. Mr. NICKLES submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2177. Mr. NICKLES submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2178. Mr. NICKLES submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2179. Mr. NICKLES submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2180. Mr. NICKLES submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2181. Mr. NICKLES submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2182. Mr. NICKLES submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2183. Mr. NICKLES submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2184. Mr. NICKLES submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2185. Mr. NICKLES submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2186. Mr. BOND submitted an amendment intended to be proposed by him to the bill H.R. 10, supra; which was ordered to lie on the table.

SA 2187. Mr. BOND submitted an amendment intended to be proposed to amendment SA 2171 submitted by Mr. LOTT and intended to be proposed to the amendment SA 2170 proposed by Mr. DASCHLE to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2188. Mr. BOND submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2189. Mr. GRAMM submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2190. Mr. NICKLES submitted an amendment intended to be proposed to

amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2191. Mr. GRAMM submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2192. Mr. GRAMM submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2193. Mr. GRAMM submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2194. Mr. GRAMM submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2195. Mr. GRAMM submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2196. Mr. GRAMM submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2197. Mr. GRAMM submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2198. Mr. GRAMM submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2199. Mr. GRAMM submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2200. Mr. GRAMM submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2201. Mr. GRAMM submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2202. Mr. DOMENICI submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2203. Mr. DOMENICI submitted an amendment intended to be proposed by him to the bill H.R. 10, supra; which was ordered to lie on the table.

SA 2204. Mr. DOMENICI submitted an amendment intended to be proposed by him to the bill H.R. 10, supra; which was ordered to lie on the table.

SA 2205. Mr. DOMENICI submitted an amendment intended to be proposed by him to the bill H.R. 10, supra; which was ordered to lie on the table.

SA 2206. Mr. DOMENICI submitted an amendment intended to be proposed by him to the bill H.R. 10, supra; which was ordered to lie on the table.

SA 2207. Mr. ALLEN submitted an amendment intended to be proposed by him to the bill H.R. 10, supra; which was ordered to lie on the table.

SA 2208. Mr. ALLEN submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2209. Mr. ALLEN submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2210. Mr. ALLEN submitted an amendment intended to be proposed by him to the bill H.R. 10, supra; which was ordered to lie on the table.

SA 2211. Mr. ALLEN submitted an amendment intended to be proposed by him to the bill H.R. 10, supra; which was ordered to lie on the table.

SA 2212. Mr. ALLEN submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2213. Mrs. FEINSTEIN submitted an amendment intended to be proposed by her to the bill H.R. 10, supra; which was ordered to lie on the table.

TEXT OF AMENDMENTS

SA 2175. Mr. NICKLES submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

On page 40, line 1, strike "10 most" and insert "5 most".

SA 2176. Mr. NICKLES submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

On page 41, after line 16, insert the following:

SEC. 205. REPEAL OF 4.3-CENT MOTOR FUEL EXCISE TAXES ON RAILROADS WHICH REMAIN IN GENERAL FUND.

(a) TAXES ON TRAINS.—

(1) IN GENERAL.—Subparagraph (A) of section 4041(a)(1) (relating to tax on diesel fuel in certain cases) is amended—

(A) by striking "or a diesel-powered train" in clauses (i) and (ii), and

(B) by striking "or train" in clause (i).

(2) CONFORMING AMENDMENTS.—

(A) Subparagraph (C) of section 4041(a)(1) is amended by striking clause (ii) and by redesignating clause (iii) as clause (ii).

(B) Subparagraph (C) of section 4041(b)(1) is amended by striking all that follows "section 6421(e)(2)" and inserting a period.

(C) Subsection (d) of section 4041 is amended by redesignating paragraph (3) as paragraph (4) and by inserting after paragraph (2) the following new paragraph:

"(3) DIESEL FUEL USED IN TRAINS.—There is hereby imposed a tax of 0.1 cent per gallon on any liquid other than gasoline (as defined in section 4083)—

"(A) sold by any person to an owner, lessee, or other operator of a diesel-powered train for use as a fuel in such train, or

"(B) used by any person as a fuel in a diesel-powered train unless there was a taxable sale of such fuel under subparagraph (A).

No tax shall be imposed by this paragraph on the sale or use of any liquid if tax was imposed on such liquid under section 4081.”.

(D) Subsection (f) of section 4082 is amended by striking “section 4041(a)(1)” and inserting “subsections (d)(3) and (a)(1) of section 4041, respectively”.

(E) Paragraph (3) of section 4083(a) is amended by striking “or a diesel-powered train”.

(F) Paragraph (3) of section 6421(f) is amended to read as follows:

“(3) GASOLINE USED IN TRAINS.—In the case of gasoline used as a fuel in a train, this section shall not apply with respect to the Leaking Underground Storage Tank Trust Fund financing rate under section 4081.”.

(G) Paragraph (3) of section 6427(f) is amended to read as follows:

“(3) REFUND OF CERTAIN TAXES ON FUEL USED IN DIESEL-POWERED TRAINS.—For purposes of this subsection, the term ‘nontaxable use’ includes fuel used in a diesel-powered train. The preceding sentence shall not apply to the tax imposed by section 4041(d) and the Leaking Underground Storage Tank Trust Fund financing rate under section 4081 except with respect to fuel sold for exclusive use by a State or any political subdivision thereof.”.

(b) EFFECTIVE DATE.—The amendments made by this section shall take effect on January 1, 2002.

SA 2177. Mr. NICKLES submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

Strike section 105(c).

SA 2178. Mr. NICKLES submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

Strike section 107(c)(1).

SA 2179. Mr. NICKLES submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

On page 28, line 8, strike “transfer” and insert “transfer, but only if there was an on-budget surplus in the most recent fiscal year ending prior to such transfer”.

SA 2180. Mr. NICKLES submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the end of section 107, add the following:

(h) NO GENERAL REVENUE SPENDING TO PAY BENEFITS.—Beginning on the date that amounts are transferred to the National

Railroad Retirement Investment Trust pursuant to the amendments made by this section—

(1) no transfers from the general fund in the treasury may be used to pay benefits under the Railroad Retirement Act of 1974; and

(2) such benefits shall only be payable to the extent that sufficient funds exist in the appropriate accounts under such Act or the National Railroad Retirement Investment Trust to make such payments.

SA 2181. Mr. NICKLES submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the end, add the following:

TITLE III—REPLACEMENT PENSION PLAN

SEC. 301. REPLACEMENT PENSION PLAN.

(a) IN GENERAL.—Notwithstanding any other provision of law, any employer (as defined in section 1(a)(1) of the Railroad Retirement Act of 1974), including the National Railroad Passenger Corporation, may enter into negotiations with employee representatives with respect to a new pension plan for its employees for the purpose of terminating coverage under such Act.

(b) CERTIFICATION OF PLAN.—If the plan described in subsection (a) is certified by the Secretary of Labor and the Secretary of the Treasury as a bona fide plan that meets the criteria of the Employee Retirement Income Security Act of 1974 for pension funds, then, notwithstanding any other provision of law, the individuals described in subsection (a) shall not longer be entitled to benefits under the Railroad Retirement Act of 1974.

(c) TECHNICAL AND CONFORMING CHANGES.—The Commissioner of Social Security, the Railroad Retirement Board, and the Secretary of the Treasury, as soon as practicable but in any event not later than 180 days after the date of enactment of this Act, submit to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate a draft of any technical and conforming changes in the Social Security Act, the Railroad Retirement Act of 1974, and the Internal Revenue Code of 1986 which are necessary to reflect throughout such Acts and Code the purposes of this section.

SA 2182. Mr. NICKLES submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

On page 13, between lines 24 and 25, insert the following:

“(3) TREATMENT AS A MULTIEMPLOYER PENSION FUND.—For purposes of the Employee Retirement Income Security Act of 1974, the Trust shall be treated as a multiemployer plan (as defined in section 3(37) of such Act).

SA 2183. Mr. NICKLES submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pen-

sion reform, and for other purposes; which was ordered to lie on the table; as follows:

Strike section 102.

SA 2184. Mr. NICKLES submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the end, add the following:

TITLE III—REPEAL OF GENERAL FUND SUBSIDY TO RAILROAD RETIREMENT ACCOUNT

SEC. 301. REPEAL OF GENERAL FUND SUBSIDY TO RAILROAD RETIREMENT ACCOUNT.

(a) REPEAL.—Subsection (c)(1)(A) of section 224 of the Railroad Retirement Solvency Act of 1983 (45 U.S.C. 231n note) is repealed.

(b) EFFECTIVE DATE.—The repeal made by subsection (a) shall take effect on the date that amounts are transferred to the National Railroad Retirement Investment Trust pursuant to the amendments made by section 107.

SA 2185. Mr. NICKLES submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

Strike all after the enacting clause and insert the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the “Railroad Retirement and Survivors’ Improvement Act of 2001”.

SEC. 2. EXPANSION OF WIDOW’S AND WIDOWER’S BENEFITS.

(a) IN GENERAL.—Section 4(g) of the Railroad Retirement Act of 1974 (45 U.S.C. 231c(g)) is amended by adding at the end the following new subdivision:

“(10)(i) If for any month the unreduced annuity provided under this section for a widow or widower is less than the widow’s or widower’s initial minimum amount computed pursuant to paragraph (ii) of this subdivision, the unreduced annuity shall be increased to that initial minimum amount. For the purposes of this subdivision, the unreduced annuity is the annuity without regard to any deduction on account of work, without regard to any reduction for entitlement to an annuity under section 2(a)(1) of this Act, without regard to any reduction for entitlement to a benefit under title II of the Social Security Act, and without regard to any reduction for entitlement to a public service pension pursuant to section 202(e)(7), 202(f)(2), or 202(g)(4) of the Social Security Act.

“(ii) For the purposes of this subdivision, the widow or widower’s initial minimum amount is the amount of the unreduced annuity computed at the time an annuity is awarded to that widow or widower, except that—

“(A) in subsection (g)(1)(i) ‘100 per centum’ shall be substituted for ‘50 per centum’; and

“(B) in subsection (g)(2)(ii) ‘130 per centum’ shall be substituted for ‘80 per centum’ both places it appears.

“(iii) If a widow or widower who was previously entitled to a widow’s or widower’s

annuity under section 2(d)(1)(ii) of this Act becomes entitled to a widow's or widower's annuity under section 2(d)(1)(i) of this Act, a new initial minimum amount shall be computed at the time of award of the widow's or widower's annuity under section 2(d)(1)(i) of this Act."

(b) **EFFECTIVE DATE.**—

(1) **IN GENERAL.**—The amendment made by this section shall take effect on the first day of the first month that begins more than 30 days after enactment, and shall apply to annuity amounts accruing for months after the effective date in the case of annuities awarded—

(A) on or after that date; and

(B) before that date, but only if the annuity amount under section 4(g) of the Railroad Retirement Act of 1974 (45 U.S.C. 231c(g)) was computed under such section, as amended by the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35; 95 Stat. 357).

(2) **SPECIAL RULE FOR ANNUITIES AWARDED BEFORE THE EFFECTIVE DATE.**—In applying the amendment made by this section to annuities awarded before the effective date, the calculation of the initial minimum amount under new section 4(g)(10)(ii) of the Railroad Retirement Act of 1974 (45 U.S.C. 231c(g)(10)(ii)), as added by subsection (a), shall be made as of the date of the award of the widow's or widower's annuity.

SEC. 3. REPEAL OF 4.3-CENT MOTOR FUEL EXCISE TAXES ON RAILROADS WHICH REMAIN IN GENERAL FUND.

(a) **TAXES ON TRAINS.**—

(1) **IN GENERAL.**—Subparagraph (A) of section 4041(a)(1) of the Internal Revenue Code of 1986 (relating to tax on diesel fuel in certain cases) is amended—

(A) by striking "or a diesel-powered train" in clauses (i) and (ii), and

(B) by striking "or train" in clause (i).

(2) **CONFORMING AMENDMENTS.**—

(A) Subparagraph (C) of section 4041(a)(1) of such Code is amended by striking clause (ii) and by redesignating clause (iii) as clause (ii).

(B) Subparagraph (C) of section 4041(b)(1) of such Code is amended by striking all that follows "section 6421(e)(2)" and inserting a period.

(C) Subsection (d) of section 4041 of such Code is amended by redesignating paragraph (3) as paragraph (4) and by inserting after paragraph (2) the following new paragraph:

"(3) **DIESEL FUEL USED IN TRAINS.**—There is hereby imposed a tax of 0.1 cent per gallon on any liquid other than gasoline (as defined in section 4083)—

"(A) sold by any person to an owner, lessee, or other operator of a diesel-powered train for use as a fuel in such train, or

"(B) used by any person as a fuel in a diesel-powered train unless there was a taxable sale of such fuel under subparagraph (A). No tax shall be imposed by this paragraph on the sale or use of any liquid if tax was imposed on such liquid under section 4081."

(D) Subsection (f) of section 4082 of such Code is amended by striking "section 4041(a)(1)" and inserting "subsections (d)(3) and (a)(1) of section 4041, respectively".

(E) Paragraph (3) of section 4083(a) of such Code is amended by striking "or a diesel-powered train".

(F) Paragraph (3) of section 6421(f) of such Code is amended to read as follows:

"(3) **GASOLINE USED IN TRAINS.**—In the case of gasoline used as a fuel in a train, this section shall not apply with respect to the Leaking Underground Storage Tank Trust Fund financing rate under section 4081."

(G) Paragraph (3) of section 6427(f) of such Code is amended to read as follows:

"(3) **REFUND OF CERTAIN TAXES ON FUEL USED IN DIESEL-POWERED TRAINS.**—For purposes of this subsection, the term 'non-taxable use' includes fuel used in a diesel-powered train. The preceding sentence shall not apply to the tax imposed by section 4041(d) and the Leaking Underground Storage Tank Trust Fund financing rate under section 4081 except with respect to fuel sold for exclusive use by a State or any political subdivision thereof."

(b) **EFFECTIVE DATE.**—The amendments made by this section shall take effect on January 1, 2002.

SA 2186. Mr. BOND submitted an amendment intended to be proposed by him to the bill H.R. 10, to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. ____ FAIR AND EQUITABLE RESOLUTION OF LABOR INTEGRATION ISSUES.

(a) **PURPOSE.**—The purpose of this section is to require procedures that ensure the fair and equitable resolution of labor integration issues, in order to prevent further disruption to transactions for the combination of air carriers, which would potentially aggravate the disruption caused by the attack on the United States on September 11, 2001.

(b) **DEFINITIONS.**—In this Act:

(1) **AIR CARRIER.**—The term "air carrier" means an air carrier that holds a certificate issued under chapter 411 of title 49, United States Code.

(2) **COVERED AIR CARRIER.**—The term "covered air carrier" means an air carrier that is involved in a covered transaction.

(3) **COVERED EMPLOYEE.**—The term "covered employee" means an employee who—

(A) is not a temporary employee; and

(B) is a member of a craft or class that is subject to the Railway Labor Act (45 U.S.C. 151 et seq.).

(4) **COVERED TRANSACTION.**—The term "covered transaction" means a transaction that—

(A) is a transaction for the combination of multiple air carriers into a single air carrier;

(B) involves the transfer of ownership or control of—

(i) 50 percent or more of the equity securities (as defined in section 101 of title 11, United States Code) of an air carrier; or

(ii) 50 percent or more (by value) of the assets of the air carrier;

(C) became a pending transaction, or was completed, not earlier than January 1, 2001; and

(D) did not result in the creation of a single air carrier by September 11, 2001.

(c) **SENIORITY INTEGRATION.**—In any covered transaction involving a covered air carrier that leads to the combination of crafts or classes that are subject to the Railway Labor Act—

(1) sections 3 and 13 of the labor protective provisions imposed by the Civil Aeronautics Board in the Allegheny-Mohawk merger (as published at 59 CAB 45) shall apply to the covered employees of the covered air carrier; and

(2) subject to paragraph (1), in a case in which a collective bargaining agreement provides for the application of sections 3 and 13 of the labor protective provisions in the process of seniority integration for the covered employees, the terms of the collective bargaining agreement shall apply to the covered employees and shall not be abrogated.

(d) **ENFORCEMENT.**—Any aggrieved person (including any labor organization that represents the person) may bring an action to enforce this section, or the terms of any award or agreement resulting from arbitration or a settlement relating to the requirements of this section. The person may bring the action in an appropriate Federal district court, determined in accordance with section 1391 of title 28, United States Code, without regard to the amount in controversy.

SA 2187. Mr. BOND submitted an amendment intended to be proposed to amendment SA 2171 submitted by Mr. LOTT and intended to be proposed to the amendment SA 2170 proposed by Mr. DASCHLE to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. ____ FAIR AND EQUITABLE RESOLUTION OF LABOR INTEGRATION ISSUES.

(a) **PURPOSE.**—The purpose of this section is to require procedures that ensure the fair and equitable resolution of labor integration issues, in order to prevent further disruption to transactions for the combination of air carriers, which would potentially aggravate the disruption caused by the attack on the United States on September 11, 2001.

(b) **DEFINITIONS.**—In this Act:

(1) **AIR CARRIER.**—The term "air carrier" means an air carrier that holds a certificate issued under chapter 411 of title 49, United States Code.

(2) **COVERED AIR CARRIER.**—The term "covered air carrier" means an air carrier that is involved in a covered transaction.

(3) **COVERED EMPLOYEE.**—The term "covered employee" means an employee who—

(A) is not a temporary employee; and

(B) is a member of a craft or class that is subject to the Railway Labor Act (45 U.S.C. 151 et seq.).

(4) **COVERED TRANSACTION.**—The term "covered transaction" means a transaction that—

(A) is a transaction for the combination of multiple air carriers into a single air carrier;

(B) involves the transfer of ownership or control of—

(i) 50 percent or more of the equity securities (as defined in section 101 of title 11, United States Code) of an air carrier; or

(ii) 50 percent or more (by value) of the assets of the air carrier;

(C) became a pending transaction, or was completed, not earlier than January 1, 2001; and

(D) did not result in the creation of a single air carrier by September 11, 2001.

(c) **SENIORITY INTEGRATION.**—In any covered transaction involving a covered air carrier that leads to the combination of crafts or classes that are subject to the Railway Labor Act—

(1) sections 3 and 13 of the labor protective provisions imposed by the Civil Aeronautics Board in the Allegheny-Mohawk merger (as published at 59 CAB 45) shall apply to the covered employees of the covered air carrier; and

(2) subject to paragraph (1), in a case in which a collective bargaining agreement provides for the application of sections 3 and 13 of the labor protective provisions in the process of seniority integration for the covered employees, the terms of the collective bargaining agreement shall apply to the covered employees and shall not be abrogated.

(d) **ENFORCEMENT.**—Any aggrieved person (including any labor organization that represents the person) may bring an action to enforce this section, or the terms of any award or agreement resulting from arbitration or a settlement relating to the requirements of this section. The person may bring the action in an appropriate Federal district court, determined in accordance with section 1391 of title 28, United States Code, without regard to the amount in controversy.

SA. 2188. Mr. BOND submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. ____ FAIR AND EQUITABLE RESOLUTION OF LABOR INTEGRATION ISSUES.

(a) **PURPOSE.**—The purpose of this section is to require procedures that ensure the fair and equitable resolution of labor integration issues, in order to prevent further disruption to transactions for the combination of air carriers, which would potentially aggravate the disruption caused by the attack on the United States on September 11, 2001.

(b) **DEFINITIONS.**—In this Act:

(1) **AIR CARRIER.**—The term “air carrier” means an air carrier that holds a certificate issued under chapter 411 of title 49, United States Code.

(2) **COVERED AIR CARRIER.**—The term “covered air carrier” means an air carrier that is involved in a covered transaction.

(3) **COVERED EMPLOYEE.**—The term “covered employee” means an employee who—

(A) is not a temporary employee; and

(B) is a member of a craft or class that is subject to the Railway Labor Act (45 U.S.C. 151 et seq.).

(4) **COVERED TRANSACTION.**—The term “covered transaction” means a transaction that—

(A) is a transaction for the combination of multiple air carriers into a single air carrier; (B) involves the transfer of ownership or control of—

(i) 50 percent or more of the equity securities (as defined in section 101 of title 11, United States Code) of an air carrier; or

(ii) 50 percent or more (by value) of the assets of the air carrier;

(C) became a pending transaction, or was completed, not earlier than January 1, 2001; and

(D) did not result in the creation of a single air carrier by September 11, 2001.

(c) **SENIORITY INTEGRATION.**—In any covered transaction involving a covered air carrier that leads to the combination of crafts or classes that are subject to the Railway Labor Act—

(1) sections 3 and 13 of the labor protective provisions imposed by the Civil Aeronautics Board in the Allegheny-Mohawk merger (as published at 59 CAB 45) shall apply to the covered employees of the covered air carrier; and

(2) subject to paragraph (1), in a case in which a collective bargaining agreement provides for the application of sections 3 and 13 of the labor protective provisions in the process of seniority integration for the covered employees, the terms of the collective bargaining agreement shall apply to the covered employees and shall not be abrogated.

(d) **ENFORCEMENT.**—Any aggrieved person (including any labor organization that rep-

resents the person) may bring an action to enforce this section, or the terms of any award or agreement resulting from arbitration or a settlement relating to the requirements of this section. The person may bring the action in an appropriate Federal district court, determined in accordance with section 1391 of title 28, United States Code, without regard to the amount in controversy.

SA 2189. Mr. GRAMM submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

On page 2 of the amendment, insert before line 1 the following:

“SEC. 2. Notwithstanding any other provision of this Act, the \$15,000,000,000 transfer authorized under section 107(a) shall not take effect unless the Secretary of the Treasury finds that no portion of the transferred funds are attributable to the surplus in Social Security.”.

SA 2190. Mr. NICKLES submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

Strike section 204(d) and insert the following:

(d) **DETERMINATION OF RATE.**—Chapter 22 is amended by adding at the end the following new subchapter:

“Subchapter E—Tier 2 Tax Rate Determination

“Sec. 3241. Determination of tier 2 tax rate based on account benefits ratio.

“SEC. 3241. DETERMINATION OF TIER 2 TAX RATE BASED ON ACCOUNT BENEFITS RATIO.

“(a) **IN GENERAL.**—For purposes of sections 3201(b), 3211(b), and 3221(b), the applicable percentage for any calendar year is the percentage determined in accordance with the table in subsection (b).

“(b) **TAX RATE SCHEDULE.**—

“Account benefits ratio		Applicable percentage for sections 3211(b) and 3221(b)	Applicable percentage for section 3201(b)
At least	But less than		
2.5	2.5	22.1	4.9
2.5	3.0	18.1	4.9
3.0	3.5	15.1	4.9
3.5	4.0	14.1	4.9
4.0	6.1	13.1	4.9
6.1	6.5	12.6	4.4
6.5	7.0	12.1	3.9
7.0	7.5	11.6	3.4
7.5	8.0	11.1	2.9
8.0	8.5	10.1	1.9
8.5	9.0	9.1	0.9
9.0		8.2	0

“(c) **ACCOUNT BENEFITS RATIO.**—For purposes of this section, the term ‘account benefits ratio’ means, with respect to any calendar year, the amount determined by the Railroad Retirement Board by dividing the fair market value of the assets in the Railroad Retirement Account and of the National Railroad Retirement Investment Trust (and for years before 2002, the Social Security Equivalent Benefits Account) as of

the close of the most recent fiscal year ending before such calendar year by the total benefits and administrative expenses paid from the Railroad Retirement Account and the National Railroad Retirement Investment Trust during such fiscal year.

“(d) **NOTICE.**—No later than December 1 of each calendar year, the Secretary shall publish a notice in the Federal Register of the rates of tax determined under this section which are applicable for the following calendar year.”.

SA 2191. Mr. GRAMM submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

On page 2 of the amendment, insert before line 1 the following:

“SEC. 2. Notwithstanding any other provision of Act, the reduction in the retirement age authorized by section 102 shall not take effect until the Secretary of the Treasury finds that there has been a comparable reduction in the Social Security retirement age.”.

SA 2192. Mr. GRAMM submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

On page 2 of the amendment, insert before line 1 the following:

“SEC. 2. Notwithstanding any other provision of this Act, the \$15,000,000,000 transfer authorized under section 107(a) shall not take effect unless the Secretary of the Treasury finds that no portion of the transferred funds are attributable to the surplus in Social Security or in Medicare.”.

SA 2193. Mr. GRAMM submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

On page 2 of the amendment, insert before line 1 the following:

“SEC. 2. Notwithstanding any other provision of Act, the Board of Trustees created under section 105 shall invest the funds of the Trust only in a manner that maximizes return on investment, consistent with prudent risk management. Any railroad employee, retiree, survivor, or company may bring a civil action to enforce this section.”.

SA 2194. Mr. GRAMM submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

In the table on page 39, line 9, strike 22.1 and insert “such percentage as the Secretary determines is necessary to restore the average account benefit ratio to 2.5.”.

SA 2195. Mr. GRAMM submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

Strike Sec. 107(c).

SA 2196. Mr. GRAMM submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

On page 2 of the amendment, insert before line 1 the following:

"SEC. 2. Notwithstanding any other provision of this Act, any reduction in tax or increase in benefits shall take effect only to the degree that the Secretary of the Treasury finds that the actual earnings of the Railroad Retirement Investment Trust Fund are sufficient to fund them."

SA 2197. Mr. GRAMM submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

Strike Section 105(c).

SA 2198. Mr. GRAMM submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

On page 2 of the amendment, insert before line 1 the following:

"SEC. 2. Notwithstanding any other provision of Act, any reduction in tax under section 204 shall be null and void in any year that the combined balances of the Railroad Retirement trust funds have been depleted by more than 10 percent as compared to the combined balances of the Railroad Retirement trust funds projected by the Railroad Retirement Board under employment assumption II as of the day before the date of enactment of this Act."

SA 2199. Mr. GRAMM submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

On page 2 of the amendment, insert before line 1 the following:

"SEC. 2. Notwithstanding any other provision of Act, any reduction in tax under section 204 shall be null and void in any year that the combined balances of the Railroad Retirement trust funds have been depleted by more than 20 percent as compared to the combined balances of the Railroad Retirement trust funds projected by the Railroad Retirement Board under employment as-

sumption II as of the day before the date of enactment of this Act."

SA 2200. Mr. GRAMM submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

On page 2 of the amendment, insert before line 1 the following:

"SEC. 2. Notwithstanding any other provision of Act, any reduction in tax under section 204 shall be null and void in any year that the combined balances of the Railroad Retirement trust funds have been depleted by more than 40 percent as compared to the combined balances of the Railroad Retirement trust funds projected by the Railroad Retirement Board under employment assumption II as of the day before the date of enactment of this Act."

SA 2201. Mr. GRAMM submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

On page 2 of the amendment, insert before line 1 the following:

"SEC. 2. Notwithstanding any other provision of Act, any reduction in tax under section 204 shall be null and void in any year that the combined balances of the Railroad Retirement trust funds have been depleted by more than 75 percent as compared to the combined balance of the Railroad Retirement trust funds projected by the Railroad Retirement Board under employment assumption II as of the day before the date of enacting of this Act."

SA 2202. Mr. DOMENICI submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

Strike section 105(c).

SA 2203. Mr. DOMENICI submitted an amendment intended to be proposed by him to the bill H.R. 10, to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. . EFFECTIVE DATE REQUIRES BALANCED BUDGET.

Notwithstanding any other provision of this Act, this Act and the amendments made by this Act shall take effect on the first day of the first fiscal year with respect to a budget that follows the year when an actual on-budget surplus that exceeds amounts in the Medicare trust funds has been achieved..

SA 2204. Mr. DOMENICI submitted an amendment intended to be proposed by him to the bill H.R. 10, to provide for pension reform, and for other purposes;

which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. . EFFECTIVE DATE REQUIRES BALANCED BUDGET.

Notwithstanding any other provision of this Act, this Act and the amendments made by this Act shall take effect on the first day of the first fiscal year with respect to which the President submits a budget pursuant to section 1105 of title 31, United States Code, that provides an on-budget surplus that exceeds amounts in the Medicare trust funds.

SA 2205. Mr. DOMENICI submitted an amendment intended to be proposed by him to the bill H.R. 10, to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. . EFFECTIVE DATE REQUIRES BALANCED BUDGET.

Notwithstanding any other provision of this Act, this Act and the amendments made by this Act shall take effect on the first day of the first fiscal year with respect to which the President submits a budget pursuant to section 1105 of title 31, United States Code, that provides an on-budget surplus.

SA 2206. Mr. DOMENICI submitted an amendment intended to be proposed by him to the bill H.R. 10, to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. . EFFECTIVE DATE REQUIRES BALANCED BUDGET.

Notwithstanding any other provision of this Act, this Act and the amendments made by this Act shall take effect on the first day of the first fiscal year with respect to which the President submits a budget pursuant to section 1105 of title 31, United States Code, that provide a unified budget surplus.

SA 2207. Mr. ALLEN submitted an amendment intended to be proposed by him to the bill H.R. 10, to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place insert the following.

SEC. . SENSE OF THE SENATE REGARDING ACCELERATION OF RAIL TO WASHINGTON DULLES INTERNATIONAL AIRPORT.

(a.) SENSE OF THE SENATE.—It is the sense of the Senate that Congress should—

(1) Act expeditiously to facilitate the extension of rail service to Washington Dulles International Airport.

(2) Encourage the Administrator of the Federal Transit Administration to work with the Commonwealth of Virginia, Northern Virginia municipalities, and the Metropolitan Washington Area Transit Authority to develop and implement a financing plan for the Dulles Corridor rapid transit project.

SA 2208. Mr. ALLEN submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes;

which was ordered to lie on the table; as follows:

At the appropriate place insert the following.

SECTION 1. SHORT TITLE.

This Act may be cited as the "Terrorist Response Tax Exemption Act".

SEC. 2 EXCLUSION OF CERTAIN TERRORIST ATTACK ZONE COMPENSATION OF CIVILIAN UNIFORMED PERSONNEL.

(a) IN GENERAL.—Part III of subchapter B of chapter 1 of the Internal Revenue Code of 1986 (relating to * * *

"(A) were dangerous to human life and a violation of the criminal laws of the United States or of any State, and

"(B) would appear to be intended to intimidate or coerce a civilian population, influence the policy of a government by intimidation, or affect the conduct of a government by assassination or kidnapping.

"(3) COMPENSATION.—The term 'compensation' does not include pensions and retirement pay."

(b) CONFORMING AMENDMENTS.—

(1) Section 3401(a)(1) of the Internal Revenue Code of 1986 is amended by inserting "or section 112A (relating to certain terrorist attack zone compensation of civilian uniformed personnel)" after "United States)".

(2) The table of sections for part III of subchapter B of chapter 1 of such Code is amended by inserting after the item relating to section 112 the following new item:

"Sec. 112A. Certain terrorist attack zone compensation of civilian uniformed personnel."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending on or after September 11, 2001.

SA 2209. Mr. ALLEN submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place insert the following.

SEC. . SENSE OF THE SENATE REGARDING ACCELERATION OF RAIL TO WASHINGTON DULLES INTERNATIONAL AIRPORT.

(a.) SENSE OF THE SENATE.—It is the sense of the Senate that Congress should—

(1) Act expeditiously to facilitate the extension of rail service to Washington Dulles International Airport.

(2) Encourage the Administrator of the Federal Transit Administration to work with the Commonwealth of Virginia, Northern Virginia municipalities, and the Metropolitan Washington Area Transit Authority to develop and implement a financing plan for the Dulles Corridor rapid transit project.

SA 2210. Mr. ALLEN submitted an amendment intended to be proposed by him to the bill H.R. 10, to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. NATIONAL EMERGENCY GRANTS.

In section 173(a) of the Workforce Investment Act of 1998 (29 U.S.C. 2918(a)(4)), add after (3):

(4) to provide assistance to the Governor to provide personal income compensation to a unemployed worker, if—

(A) the worker is unable to work due to direct Federal Government intervention, as a result of a direct response to the terrorist attacks which occurred on September 11th, 2001, leading to—

(i) closure of the facility at which the worker was employed, prior to the intervention; or

(ii) a restriction on how business may be conducted at the facility; and

(B) the facility is located within an area, which not later than October 1, 2001, was declared a major disaster area or an emergency by the President, pursuant to section 401 or 501, respectively, of the Robert T. Stafford Disaster Relief and Emergency Relief Act (42 U.S.C. 5170 and 5191), due to a terrorist attack on the United States on September 11, 2001.

(5) to provide assistance to the Governor to provide business income compensation to an independently owned business or proprietorship if—

(A) the business or proprietorship is unable to earn revenue due to direct Federal intervention, as a result of a direct response to the terrorist attacks which occurred on September 11th, 2001, leading to—

(i) closure of the facility at which the business or proprietorship was located, prior to the intervention; or

(ii) a restriction on how customers may access the facility; and

(B) the facility is located within an area, which not later than October 1, 2001, was declared a major disaster area or an emergency by the President, pursuant to section 401 or 501, respectively, of the Robert T. Stafford Disaster Relief and Emergency Relief Act (42 U.S.C. 5170 and 5191), due to a terrorist attack on the United States on September 11, 2001.

SA 2211. Mr. ALLEN submitted an amendment intended to be proposed by him to the bill H.R. 10, to provide for pension, reform, and for other purposes; which was ordered to lie on the table; as follows:

Insert the following.

SECTION . SHORT TITLE.

This Act may be cited as the "Terrorist Response Tax Exemption Act".

SEC. . EXCLUSION OF CERTAIN TERRORIST ATTACK ZONE COMPENSATION OF CIVILIAN UNIFORMED PERSONNEL.

(a) IN GENERAL.—Part III of subchapter B of chapter 1 of the Internal Revenue Code of 1986 (relating to items specifically excluded from gross income) is amended by inserting after section 112 the following new section:

"SEC. 112A. CERTAIN TERRORIST ATTACK ZONE COMPENSATION OF CIVILIAN UNIFORMED PERSONNEL.

"(a) IN GENERAL.—Gross income does not include compensation received by a civilian uniformed employee for any month during any part of which such employee provides security, safety, fire management, or medical services in a terrorist attack zone.

"(b) DEFINITIONS.—For purposes of this section—

"(1) CIVILIAN UNIFORMED EMPLOYEE.—The term 'civilian uniformed employee' means any nonmilitary individual employed by a Federal, State, or local government (or any agency or instrumentality thereof) for the purpose of maintaining public order, establishing and maintaining public safety, or responding to medical emergencies.

"(2) TERRORIST ATTACK ZONE.—The term 'terrorist attack zone' means any area designated by the President or any applicable

State or local authority (as determined by the Secretary) to be an area in which occurred a violent act or acts which—

"(A) were dangerous to human life and a violation of the criminal laws of the United States or of any State, and

"(B) would appear to be intended to intimidate or coerce a civilian population, influence the policy of a government by intimidation, or affect the conduct of a government by assassination or kidnapping.

"(3) COMPENSATION.—The term 'compensation' does not include pensions and retirement pay."

(b) CONFORMING AMENDMENTS.—

(1) Section 3401(a)(1) of the Internal Revenue Code of 1986 is amended by inserting "or section 112A (relating to certain terrorist attack zone compensation of civilian uniformed personnel)" after "United States)".

(2) The table of sections for part III of subchapter B of chapter 1 of such Code is amended by inserting after the item relating to section 112 the following new item:

"Sec. 112A. Certain terrorist attack zone compensation of civilian uniformed personnel."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending on or after September 11, 2001.

SA 2212. Mr. ALLEN submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. . NATIONAL EMERGENCY GRANTS

In section 173(a) of the Workforce Investment Act of 1998 (29 U.S.C. 2918(a)(4)), add after (3):

(4) to provide assistance to the Governor to provide personal income compensation to a unemployed worker, if—

(A) the worker is unable to work due to direct Federal Government intervention, as a result of a direct response to the terrorist attacks which occurred on September 11, 2001, leading to—

(i) closure of the facility at which the worker was employed, prior to the intervention; or

(ii) a restriction on how business may be conducted at the facility; and

(B) the facility is located within an area, which not later than October 1, 2001, was declared a major disaster area or an emergency by the President, pursuant to section 401 or 501, respectively, of the Robert T. Stafford Disaster Relief and Emergency Relief Act (42 U.S.C. 5170 and 5191), due to a terrorist attack on the United States on September 11, 2001.

(5) to provide assistance to the Governor to provide business income compensation to an independently owned business or proprietorship if—

(A) the business or proprietorship is unable to earn revenue due to direct Federal intervention, as a result of a direct response to the terrorist attacks which occurred on September 11, 2001, leading to—

(i) closure of the facility at which the business or proprietorship was located, prior to the intervention; or

(ii) a restriction on how customers may access the facility; and

(B) the facility is located within an area, which not later than October 1, 2001, was declared a major disaster area or an emergency by the President, pursuant to section 401 or 501, respectively, of the Robert T. Stafford Disaster Relief and Emergency Relief Act (42 U.S.C. 5170 and 5191), due to a terrorist attack on the United States on September 11, 2001.

SA 2213. Mrs. FEINSTEIN submitted an amendment intended to be proposed by her to the bill H.R. 10, to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

TITLE —HUMAN CLONING PROHIBITION

SEC. 01. SHORT TITLE.

This title may be cited as the "Human Cloning Prohibition Act of 2001".

SEC. 02. FINDINGS.

Congress finds that—

(1) the National Bioethics Advisory Commission (referred to in this title as the "NBAC") has reviewed the scientific and ethical implications of human cloning and has determined that the cloning of human beings is morally unacceptable;

(2) the NBAC recommended that Federal legislation be enacted to prohibit anyone from conducting or attempting human cloning, whether using Federal or non-Federal funds;

(3) the NBAC also recommended that the United States cooperate with other countries to enforce mutually supported prohibitions on human cloning;

(4) the NBAC found that somatic cell nuclear transfer (also known as nuclear transplantation) may have many important applications in medical research;

(5) the Institute of Medicine has found that nuclear transplantation may enable stem cells to be developed in a manner that will permit such cells to be transplanted into a patient without being rejected;

(6) the NBAC concluded that any regulatory or legislative actions undertaken to prohibit human cloning should be carefully written so as not to interfere with other important areas of research, such as stem cell research; and

(7)(A) biomedical research and clinical facilities engage in and affect interstate commerce;

(B) the services provided by clinical facilities move in interstate commerce;

(C) patients travel regularly across State lines in order to access clinical facilities; and

(D) biomedical research and clinical facilities engage scientists, doctors, and other staff in an interstate market, and contract for research and purchase medical and other supplies in an interstate market.

SEC. 03. PURPOSES.

It is the purpose of this title to prohibit any attempt to clone a human being while protecting important areas of medical research, including stem cell research.

SEC. 04. PROHIBITION ON HUMAN CLONING.

(a) IN GENERAL.—Title 18, United States Code, is amended by inserting after chapter 15, the following:

"CHAPTER 16—PROHIBITION ON HUMAN CLONING

"Sec.

"301. Prohibition on human cloning.

"§ 301. Prohibition on human cloning

"(a) DEFINITIONS.—In this section:

"(1) HUMAN CLONING.—The term 'human cloning' means asexual reproduction by implanting or attempting to implant the product of nuclear transplantation into a uterus.

"(2) HUMAN SOMATIC CELL.—The term 'human somatic cell' means a mature, diploid cell that is obtained or derived from a living or deceased human being at any stage of development.

"(3) NUCLEAR TRANSPLANTATION.—The term 'nuclear transplantation' means transferring the nucleus of a human somatic cell into an oocyte from which the nucleus or all chromosomes have been or will be removed or rendered inert.

"(4) NUCLEUS.—The term 'nucleus' means the cell structure that houses the chromosomes, and thus the genes.

"(5) OOCYTE.—The term 'oocyte' means the female germ cell, the egg.

"(b) PROHIBITIONS ON HUMAN CLONING.—It shall be unlawful for any person or other legal entity, public or private—

"(1) to conduct or attempt to conduct human cloning;

"(2) to ship the product of nuclear transplantation in interstate or foreign commerce for the purpose of human cloning in the United States or elsewhere; or

"(3) to use funds made available under any provision of Federal law for an activity prohibited under paragraph (1) or (2).

"(c) PROTECTION OF MEDICAL RESEARCH.—Nothing in this section shall be construed to restrict areas of biomedical and agricultural research or practices not expressly prohibited in this section, including research or practices that involve the use of—

"(1) nuclear transplantation to produce human stem cells;

"(2) techniques to create exact duplicates of molecules, DNA, cells, and tissues;

"(3) mitochondrial, cytoplasmic or gene therapy; or

"(4) nuclear transplantation techniques to create nonhuman animals.

"(d) PENALTIES.—

"(1) IN GENERAL.—Whoever intentionally violates any provision of subsection (b) shall be fined under this title and imprisoned not more than 10 years.

"(2) CIVIL PENALTIES.—Whoever intentionally violates paragraph (1), (2), or (3) of subsection (b) shall be subject to a civil penalty of \$1,000,000 or three times the gross pecuniary gain resulting from the violation, whichever is greater.

"(3) CIVIL ACTIONS.—If a person is violating or about to violate the provisions of subsection (b), the Attorney General may commence a civil action in an appropriate Federal district court to enjoin such violation.

"(4) FORFEITURE.—Any property, real or personal, derived from or used to commit a violation or attempted violation of the provisions of subsection (b), or any property traceable to such property, shall be subject to forfeiture to the United States in accordance with the procedures set forth in chapter 46 of title 18, United States Code.

"(5) ADVISORY OPINIONS.—The Attorney General shall, upon request, render binding advisory opinions regarding the scope, applicability, interpretation, and enforcement of this section with regard to specific research projects or practices.

"(e) COOPERATION WITH FOREIGN COUNTRIES.—It is the sense of Congress that the President should cooperate with foreign countries to enforce mutually supported restrictions on the activities prohibited under subsection (b).

"(f) RIGHT OF ACTION.—Nothing in this section shall be construed to give any individual or person a private right of action.

"(g) PREEMPTION OF STATE LAW.—The provisions of this section shall preempt any State or local law that prohibits or restricts research regarding, or practices constituting, nuclear transplantation, mitochondrial or cytoplasmic therapy, or the cloning of molecules, DNA, cells, tissues, organs, plants, animals, or humans."

(b) ETHICAL REQUIREMENTS FOR NUCLEAR TRANSPLANTATION RESEARCH.—Part H of title IV of the Public Health Service Act (42 U.S.C. 289 et seq.) is amended by adding at the end the following:

"SEC. 498C. ETHICAL REQUIREMENTS FOR NUCLEAR TRANSPLANTATION RESEARCH.

"(a) DEFINITIONS.—In this section:

"(1) HUMAN SOMATIC CELL.—The term 'human somatic cell' means a mature, diploid cell that is obtained or derived from a living or deceased human being at any stage of development.

"(2) NUCLEAR TRANSPLANTATION.—The term 'nuclear transplantation' means transferring the nucleus of a human somatic cell into an oocyte from which the nucleus or all chromosomes have been or will be removed or rendered inert.

"(3) NUCLEUS.—The term 'nucleus' means the cell structure that houses the chromosomes, and thus the genes.

"(4) OOCYTE.—The term 'oocyte' means the female germ cell, the egg.

"(b) APPLICABILITY OF FEDERAL ETHICAL STANDARDS TO NUCLEAR TRANSPLANTATION RESEARCH.—Research involving nuclear transplantation shall be conducted in accordance with the applicable provisions of part 46 of title 45, Code of Federal Regulations (as in effect on the date of enactment of the Human Cloning Prohibition Act of 2001).

"(c) CIVIL PENALTIES.—Whoever intentionally violates subsection (b) shall be subject to a civil penalty of not more than \$250,000.

"(d) ENFORCEMENT.—The Secretary of Health and Human Services shall have the exclusive authority to enforce this section."

AGRICULTURAL, CONSERVATION, AND RURAL ENHANCEMENT ACT OF 2001—Motion To Proceed

Mr. REID. Mr. President, I ask unanimous consent the Senate now proceed to the consideration of Calendar No. 237, S. 1731, the farm bill.

The PRESIDING OFFICER. Is there objection?

Mr. NICKLES. I object.

The PRESIDING OFFICER. Objection is heard.

CLOTURE MOTION

Mr. REID. Mr. President, I move to proceed to Calendar No. 237, S. 1731, and I send a cloture motion to the desk.

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close the debate on the motion to proceed to Calendar No. 237, S. 1731, the farm bill:

Tom Harkin, Tim Johnson, Bill Nelson, Harry Reid, Byron Dorgan, Fritz Hollings, Richard J. Durbin, Paul Wellstone, Kent Conrad, Tom Daschle, Debbie Stabenow, Tom Carper, Barbara Mikulski, Evan Bayh, Ron Wyden, Ben Nelson, Jean Carnahan, Patty Murray.

EXECUTIVE SESSION

EXECUTIVE CALENDAR

Mr. REID. Mr. President, I ask unanimous consent that the Senate proceed to executive session to consider the following nominations: Nos. 593 through 605; the nominations on the Secretary's Desk; that the nominations be confirmed, the motion to reconsider be laid upon the table, that any statements be printed in the RECORD, the President be immediately notified of the Senate's action, and the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations considered and confirmed are as follows:

DEPARTMENT OF JUSTICE

Edward Hachiro Kubo, Jr., of Hawaii, to be United States Attorney for the District of Hawaii for the term of four years.

Sheldon J. Sperling, of Oklahoma, to be United States Attorney for the Eastern District of Oklahoma for the term of four years.

David R. Dugas, of Louisiana, to be United States Attorney for the Middle District of Louisiana for the term of four years.

David E. O'Meilia, of Oklahoma, to be United States Attorney for the Northern District of Oklahoma for the term of four years.

James A. McDevitt, of Washington, to be United States Attorney for the Eastern District of Washington, for the term of four years.

Johnny Keane Sutton, of Texas, to be United States Attorney for the Western District of Texas, for the term of four years.

Richard S. Thompson, of Georgia, to be United States Attorney for the Southern District of Georgia, for the term of four years.

Thomas L. Sansonetti, of Wyoming, to be an Assistant Attorney General.

DEPARTMENT OF COMMERCE

James Edward Rogan, of California, to be Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office.

Arden Bement, Jr., of Indiana, to be Director of the National Institute of Standards and Technology.

Conrad Lautenbacher, Jr., of Virginia, to be Under Secretary of Commerce for Oceans and Atmosphere.

DEPARTMENT OF TRANSPORTATION

William Schubert, of Texas, to be Administrator of the Maritime Administration.

FEDERAL EMERGENCY MANAGEMENT AGENCY

R. David Paulison, of Florida, to be Administrator of the United States Fire Administration, Federal Emergency Management Agency.

NOMINATIONS PLACED ON THE SECRETARY'S DESK

COAST GUARD

PN1171 Coast Guard nominations (119) beginning Anita K. Abbott, and ending Steven

G. Wood, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 30, 2001.

PN1172 Coast Guard nominations (203) beginning Albert R. Agnich, and ending Jose M. Zuniga, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of October 30, 2001.

LEGISLATIVE SESSION

The PRESIDING OFFICER. Under the previous order, the Senate will return to legislative session.

UNANIMOUS CONSENT AGREEMENT—EXECUTIVE CALENDAR

Mr. REID. Mr. President, as if in executive session, I ask unanimous consent that when the Senate considers the nomination of John Walters to be Director of National Drug Control Policy, it be considered under the following time limitation: 30 minutes for Senator LEAHY; 30 minutes for Senator HATCH; 10 minutes for Senator KENNEDY; and 10 minutes for Senator LOTT, or his designee; that when the debate time has been used or yielded, the Senate vote on the confirmation of the nomination, the motion to reconsider be laid on the table, the President be immediately notified of the Senate's action, and the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE CALENDAR

Mr. REID. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the following calendar items en bloc: Calendar No. 231, H.R. 1766; Calendar No. 232, H.R. 2261; and Calendar No. 233, H.R. 2454.

The PRESIDING OFFICER. The clerk will read the bills by title.

The legislative clerk read as follows:

A bill (H.R. 1766) to designate the facility of the United States Postal Service located at 4270 John Marr Drive in Annandale, VA, as the "Stan Parris Post Office Building."

A bill (H.R. 2261) to designate the facility of the United States Postal Service located at 2853 Candler Road in Decatur, GA as the "Earl T. Shinhoster Post Office."

A bill (H.R. 2454) to redesignate the facility of the United States Postal Service located at 5472 Crenshaw Boulevard in Los Angeles, CA as the "Congressman Julian C. Dixon Post Office."

There being no objection, the Senate proceeded to consider the bills.

Mr. REID. Mr. President, I ask unanimous consent that the bills be read three times and passed, the motions to reconsider be laid upon the table en bloc, the consideration of these items appear separately in the RECORD, and that any statements be printed in the RECORD, with no intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bills (H.R. 1766, H.R. 2261, and H.R. 2454) were read the third time and passed.

MEASURES INDEFINITELY POSTPONED—S. 1184 and S. 1381

Mr. REID. Mr. President, I ask unanimous consent that Calendar Nos. 229 and 230 be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS CONSENT AGREEMENT—CONFERENCE REPORT TO ACCOMPANY H.R. 2299

Mr. REID. Mr. President, I ask unanimous consent that the majority leader, following consultation with the Republican leader, may turn to the conference report to accompany H.R. 2299, the Transportation Appropriations Act, and that it be considered under the following limitations: there be a time limitation of 95 minutes for debate with the time controlled as follows: 30 minutes equally divided between the chair and ranking member of the subcommittee; 20 minutes equally divided between the chairman and ranking member of the full committee; and 15 minutes each under the control of Senators DORGAN, MCCAIN, and GRAMM of Texas; that upon the use or yielding back of time, with no further intervening action or debate, the Senate proceed to vote on adoption of the conference report.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

EXPRESSING THE SENSE OF CONGRESS REGARDING THE CRASH OF AMERICAN AIRLINES FLIGHT 587

Mr. REID. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H. Con. Res. 272, which is at the desk.

The PRESIDING OFFICER. The clerk will report the concurrent resolution by title.

The legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 272) expressing the sense of Congress regarding the crash of American Airlines Flight 587.

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. REID. Mr. President, I ask unanimous consent that the concurrent resolution be agreed to, the preamble be agreed to, the motion to reconsider be laid upon the table, and any statements relating thereto be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The concurrent resolution (H. Con. Res. 272) was agreed to.

The preamble was agreed to.

EXPRESSING THE SENSE OF THE SENATE IN AWARDING THE PRESIDENTIAL MEDAL OF FREEDOM

Mr. REID. Mr. President, I ask unanimous consent the Senate proceed to the immediate consideration of Calendar No. 217, S. Res. 23.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A resolution (S. Res. 23) expressing the sense of the Senate that the President should award the Presidential Medal of Freedom posthumously to Dr. Benjamin Elijah Mays in honor of his distinguished career as an educator, civil and human rights leader, and public theologian.

There being no objection, the Senate proceeded to consider the resolution.

Mr. REID. Mr. President, I ask unanimous consent the resolution and preamble be agreed to en bloc, the motion to reconsider be laid upon the table, and any statements relating thereto be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 23) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 23

Whereas Dr. Benjamin Elijah Mays, throughout his distinguished career of more than half a century as an educator, civil and human rights leader, and public theologian, has inspired people of all races throughout the world by his persistent commitment to excellence;

Whereas Benjamin Mays persevered, despite the frustrations inherent in segregation, to begin an illustrious career in education;

Whereas as dean of the School of Religion of Howard University and later as President of Morehouse College in Atlanta, Georgia, for 27 years, Benjamin Mays overcame seemingly insurmountable obstacles to offer quality education to all Americans, especially African Americans;

Whereas at the commencement of World War II, when most colleges suffered from a lack of available students and the demise of Morehouse College appeared imminent, Benjamin Mays prevented the college from permanently closing its doors by vigorously recruiting potential students and thereby aiding in the development of future generations of African American leaders;

Whereas Benjamin Mays was instrumental in the elimination of segregated public facilities in Atlanta, Georgia, and promoted the cause of nonviolence through peaceful student protests during a time in this Nation that was often marred by racial violence;

Whereas Benjamin Mays received numerous accolades throughout his career, including 56 honorary degrees from universities across the United States and abroad and the naming of 7 schools and academic buildings and a street in his honor; and

Whereas the Presidential Medal of Freedom, the highest civilian honor in the Nation, was established in 1945 to appropriately recognize Americans who have made an especially meritorious contribution to the security or national interests of the United States, world peace, or cultural or other sig-

nificant public or private endeavors: Now, therefore, be it

Resolved, That it is the sense of the Senate that the President should award the Presidential Medal of Freedom posthumously to Dr. Benjamin Elijah Mays in honor of his distinguished career as an educator, civil and human rights leader, and public theologian and his many contributions to the improvement of American society and the world.

ACTION VITIATED—H. CON. RES.

272

Mr. REID. Mr. President, I ask unanimous consent that the action previously taken by the Senate regarding H. Con. Res. 272 be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

PATRIOT DAY

Mr. REID. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of H.J. Res. 71 and the Senate then proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report the joint resolution by title.

The legislative clerk read as follows:

A joint resolution (H.J. Res. 71) amending title 36, United States Code, designating September 11 as Patriot Day.

There being no objection, the Senate proceeded to consider the joint resolution.

Mr. HATCH. Mr. President, I rise today to urge adoption of H.J. Res. 71, which designates September 11 as "Patriot Day." This resolution also calls on all Americans to observe a moment of silence to remember all those who lost their lives in the terrorist attack of September 11, 2001. I am the Senate sponsor of this bill along with Senators SCHUMER and SPECTER.

The events of September 11 have forever changed the lives of all Americans. We have all experienced a renewed sense of community and a sense of patriotic vigor that are the best of America. So many lives were touched by the terrorist attack—not only the thousands of heroes who lost their lives but also those they left behind. I am certain that few Americans will remain untouched by the devastation of our citizens that we saw in downtown New York, in the Pennsylvania countryside, and at our Pentagon.

These terrorists killed innocent Americans from every part of the country. We were so saddened to learn that Mary Alice Wahlstrom and her daughter, Carolyn Beug, of Kaysville, Utah, were struck down by this senseless violence. Mary Alice's husband of 52 years, Norman, described Mary Alice as the "happiest lady you'll meet." As one of the "kids," she joined with her only daughter to help her twin 18-year old granddaughters settle in at art school on the East Coast. In this time of grief,

we join Norman, her four sons, and 18 grandchildren in hoping that our love and faith will continue to sustain each of us during this tragedy.

The grief all Americans feel today is barely speakable. I, for one, cannot express in words the sorrow I feel for the thousands of families profoundly shattered by the acts of war perpetrated against us on September 11th. I commend my colleagues who have spoken so eloquently at such a great moment of national tragedy.

As many of my colleagues have noted, our grief is leavened by the countless stories of sacrifice and heroism. Heroes such as the policemen, firemen and emergency personnel who rushed to the buildings and entered them in a race against collapse, a race that they unfortunately lost. I hope that every American who sees a fireman or a policeman today thinks of the sacrifices that these everyday individuals are prepared to make for the good of our society, for the good of ourselves, every day.

There is no calamity America will withstand that will not be met with and overwhelmed by the decency, courage and selflessness of Americans coming to the aid of their own. It will be years before we can collect all of these stories and it will be impossible to measure the courage and bravery of these countless everyday heroes. As John says in the Bible, "Greater love hath no man than this; that a man lay down his life for his friends."

I also commend my colleagues for their unanimous support for the Administration of President George W. Bush. Americans are not partisan when we are to face a common foe, nor are their representatives.

We will face this foe together, and together we will prevail.

We must never forget the attack on America and the mighty resolve of the American spirit that has never shown brighter than after September 11. This resolution before us today will ensure that we will never forget the events of September 11, 2001.

I commend my colleagues in the House for adopting this resolution and urge my Senate colleagues to adopt this important measure tonight. Elaine and I offer our prayers for the victims and their families, as well as the thousands of brave rescue workers, including Utah's Urban Search and Rescue team. The team consists of fire department personnel from Salt Lake City and County. Our prayers go to the member of our armed forces, the greatest defenders of freedom a nation has ever known. And our prayers go to President Bush and his Administration, who are dedicated to peace and must now respond to war.

May God Bless America.

Mr. REID. Mr. President, I ask unanimous consent that the resolution and preamble be agreed to and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The joint resolution (H.J. Res. 71) was agreed to.

The preamble was agreed to.

MEASURES READ THE FIRST TIME—H.R. 3210 AND S. 1748

Mr. REID. Mr. President, I understand that H.R. 3210, which was just received from the House, is at the desk. I now ask for its first reading.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (H.R. 3210) to ensure the continued financial capacity of insurers to provide coverage for risks from terrorism.

Mr. REID. Mr. President, I ask for the second reading of this legislation and object to my own request on behalf of a number of my colleagues.

The PRESIDING OFFICER. Objection having been heard, the bill will be read a second time on the next legislative day.

Mr. REID. Mr. President, it is my understanding that S. 1748, introduced by Senator GRAMM of Texas earlier today, is at the desk. I ask for its first reading.

The PRESIDING OFFICER. The clerk will read the bill by title.

The legislative clerk read as follows:

A bill (S. 1748) to promote the stabilization of the economy by encouraging financial institutions to continue to support economic development, including development in urban areas through the provision of affordable insurance coverage against acts of terrorism, and for other purposes.

Mr. REID. Mr. President, I ask for its second reading and object to my own request.

The PRESIDING OFFICER. Objection having been heard, the bill will be read a second time on the next legislative day.

ORDERS FOR MONDAY, DECEMBER 3, 2001

Mr. REID. Mr. President, I ask unanimous consent that when the Senate completes its business today, it adjourn until the hour of 1 p.m. on Monday, December 3; that immediately following the prayer and the pledge, the Journal of proceedings be approved to

date, the morning hour be deemed to have expired, and the time for the two leaders be reserved for their use later in the day, and there be a period for morning business until 4:45 p.m., with Senators permitted to speak therein for up to 10 minutes each, with the time equally divided between the two leaders, or their designees; further, at 4:45 p.m., the Senate resume consideration of H.R. 10, with 30 minutes for debate only, equally divided between the two leaders, or their designees, prior to a 5:15 p.m. cloture vote on the Lott amendment to H.R. 10, with the time from 5:05 to 5:10 p.m. under the control of Senator LOTT, or his designee, and the time from 5:10 to 5:15 p.m. under the control of Senator DASCHLE, or his designee; further, that the mandatory quorum be waived.

Mr. President, before entering this order, I have spoken to Senator MURKOWSKI and explained to him the difficulty of presiders. He indicated that 1 o'clock would be satisfactory with him. We appreciate his cooperation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, as I indicated this morning, there were three cloture motions filed in relation to H.R. 10. Therefore, all second-degree amendments must be filed prior to 4:15 p.m. on Monday.

ADJOURNMENT UNTIL 1 P.M. MONDAY, DECEMBER 3, 2001

Mr. REID. Mr. President, if there is no further business to come before the Senate, I ask unanimous consent that the Senate stand in adjournment under the previous order.

There being no objection, the Senate, at 1:54 p.m., adjourned until Monday, December 3, 2001, at 1 p.m.

NOMINATIONS

Executive nominations received by the Senate November 30, 2001:

OVERSEAS PRIVATE INVESTMENT CORPORATION

DIANE M. RUEBLING, OF CALIFORNIA, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE OVERSEAS PRIVATE INVESTMENT CORPORATION FOR A TERM EXPIRING DECEMBER 17, 2001, VICE MELVIN E. CLARK, JR., TERM EXPIRED.

C. WILLIAM SWANK, OF OHIO, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE OVERSEAS PRIVATE INVESTMENT CORPORATION FOR A TERM EXPIRING DECEMBER 17, 2002, VICE ROBERT MAYS LYFORD.

DEPARTMENT OF JUSTICE

SCOTT A. ABDALLAH, OF SOUTH DAKOTA, TO BE UNITED STATES ATTORNEY FOR THE DISTRICT OF SOUTH DAKOTA FOR THE TERM OF FOUR YEARS, VICE KAREN ELIZABETH SCHREIER, RESIGNED.

THOMAS P. COLANTUONO, OF NEW HAMPSHIRE, TO BE UNITED STATES ATTORNEY FOR THE DISTRICT OF NEW HAMPSHIRE FOR THE TERM OF FOUR YEARS, VICE PAUL MICHAEL GAGNON, RESIGNED.

HARRY E. CUMMINS, III, OF ARKANSAS, TO BE UNITED STATES ATTORNEY FOR THE EASTERN DISTRICT OF ARKANSAS FOR THE TERM OF FOUR YEARS, VICE PAULA JEAN CASEY, RESIGNED.

MICHAEL TAYLOR SHELBY, OF TEXAS, TO BE UNITED STATES ATTORNEY FOR THE SOUTHERN DISTRICT OF TEXAS FOR THE TERM OF FOUR YEARS, VICE MERVYN M. MOSBACKER, JR., RESIGNED.

CONFIRMATIONS

Executive nominations confirmed by the Senate November 30, 2001:

DEPARTMENT OF COMMERCE

ARDEN BEMENT, JR., OF INDIANA, TO BE DIRECTOR OF THE NATIONAL INSTITUTE OF STANDARDS AND TECHNOLOGY.

CONRAD LAUTENBACHER, JR., OF VIRGINIA, TO BE UNDER SECRETARY OF COMMERCE FOR OCEANS AND ATMOSPHERE.

DEPARTMENT OF TRANSPORTATION

WILLIAM SCHUBERT, OF TEXAS, TO BE ADMINISTRATOR OF THE MARITIME ADMINISTRATION.

FEDERAL EMERGENCY MANAGEMENT AGENCY

R. DAVID PAULISON, OF FLORIDA, TO BE ADMINISTRATOR OF THE UNITED STATES FIRE ADMINISTRATION, FEDERAL EMERGENCY MANAGEMENT AGENCY.

THE ABOVE NOMINATIONS WERE APPROVED SUBJECT TO THE NOMINEES' COMMITMENT TO RESPOND TO REQUESTS TO APPEAR AND TESTIFY BEFORE ANY DULY CONSTITUTED COMMITTEE OF THE SENATE.

DEPARTMENT OF JUSTICE

EDWARD HACHIRO KUBO, JR., OF HAWAII, TO BE UNITED STATES ATTORNEY FOR THE DISTRICT OF HAWAII FOR THE TERM OF FOUR YEARS.

SHELDON J. SPERLING, OF OKLAHOMA, TO BE UNITED STATES ATTORNEY FOR THE EASTERN DISTRICT OF OKLAHOMA FOR THE TERM OF FOUR YEARS.

DAVID R. DUGAS, OF LOUISIANA, TO BE UNITED STATES ATTORNEY FOR THE MIDDLE DISTRICT OF LOUISIANA FOR THE TERM OF FOUR YEARS.

DAVID E. O'MELIA, OF OKLAHOMA, TO BE UNITED STATES ATTORNEY FOR THE NORTHERN DISTRICT OF OKLAHOMA FOR THE TERM OF FOUR YEARS.

JAMES A. MCDEVITT, OF WASHINGTON, TO BE UNITED STATES ATTORNEY FOR THE EASTERN DISTRICT OF WASHINGTON, FOR THE TERM OF FOUR YEARS.

JOHNNY KEANE SUTTON, OF TEXAS, TO BE UNITED STATES ATTORNEY FOR THE WESTERN DISTRICT OF TEXAS, FOR THE TERM OF FOUR YEARS.

RICHARD S. THOMPSON, OF GEORGIA, TO BE UNITED STATES ATTORNEY FOR THE SOUTHERN DISTRICT OF GEORGIA, FOR THE TERM OF FOUR YEARS.

THOMAS L. SANSONETTI, OF WYOMING, TO BE AN ASSISTANT ATTORNEY GENERAL.

DEPARTMENT OF COMMERCE

JAMES EDWARD ROGAN, OF CALIFORNIA, TO BE UNDER SECRETARY OF COMMERCE FOR INTELLECTUAL PROPERTY AND DIRECTOR OF THE UNITED STATES PATENT AND TRADEMARK OFFICE.

COAST GUARD NOMINATIONS BEGINNING ANITA K ABBOTT AND ENDING STEVEN G WOOD, WHICH NOMINATIONS WERE RECEIVED BY THE SENATE AND APPEARED IN THE CONGRESSIONAL RECORD ON OCTOBER 30, 2001.

COAST GUARD NOMINATIONS BEGINNING ALBERT R AGNICH AND ENDING JOSE M ZUNIGA, WHICH NOMINATIONS WERE RECEIVED BY THE SENATE AND APPEARED IN THE CONGRESSIONAL RECORD ON OCTOBER 30, 2001.

HOUSE OF REPRESENTATIVES—Friday, November 30, 2001

The House met at 9 a.m. and was called to order by the Speaker pro tempore (Mr. THORNBERRY).

DESIGNATION OF THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

THE SPEAKER'S ROOMS,
HOUSE OF REPRESENTATIVES,
Washington, DC, November 30, 2001.

I hereby appoint the Honorable MAC THORNBERRY to act as Speaker pro tempore on this day.

J. DENNIS HASTERT,
Speaker of the House of Representatives.

PRAYER

The Chaplain, the Reverend Daniel P. Coughlin, offered the following prayer:

Eternal God, always the refuge for the homeless, the refugee and immigrant, be with us as we pray today.

The sound of Abraham's call to leave his home and live by faith echoes through the halls of this Nation's history. Since the founding of these United States of America, people have come to this land as if out of the desert into a place of promise and hope. The experience of immigrants has built up this Nation as a response to Your invitation, Lord. "Go . . . I will show you a place."

We bless You and praise You for all those of this Nation who continue to build upon the past, and by their prayers and their noble deeds still grace this Nation and its future.

Even in this time, sometimes called "the age of worldwide refugees," You still call people to faith and freedom.

Bless the Members of Congress and grant them wisdom as they secure homeland borders and enact lawful immigration. The world will be shown a land where Your promise will be realized, faith can be expressed, and all will be free.

We still answer Your call, Lord, now and forever. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER pro tempore. Will the gentleman from New York (Mr.

MCNULTY) come forward and lead the House in the Pledge of Allegiance.

Mr. MCNULTY led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair will entertain 1-minute requests at the end of the day.

WAIVING POINTS OF ORDER AGAINST CONFERENCE REPORT ON H.R. 2299, DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATIONS ACT, 2002

Mr. REYNOLDS. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 299 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 299

Resolved, That upon adoption of this resolution it shall be in order to consider the conference report to accompany the bill (H.R. 2299) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 2002, and for other purposes. All points of order against the conference report and against its consideration are waived. The conference report shall be considered as read.

The SPEAKER pro tempore. The gentleman from New York (Mr. REYNOLDS) is recognized for 1 hour.

Mr. REYNOLDS. Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the gentleman from Ohio (Mr. HALL), pending which I yield myself such time as I may consume. During consideration of the resolution, all time is yielded for the purpose of debate only.

Mr. Speaker, House Resolution 299 is a standard rule providing for consideration of the conference report to accompany H.R. 2299, the Department of Transportation and Related Agencies Appropriations Act, 2002.

The rule waives all points of order against the conference report and against its consideration.

Additionally, the rule provides that the conference report shall be considered as read.

Mr. Speaker, the Committee on Appropriations has once again produced bipartisan legislation that meets the

Nation's transportation priorities. Ensuring the safety and efficiency of our transportation networks is one of the Federal Government's highest responsibilities.

This conference report represents a sound commitment to our Nation's transportation infrastructure by devoting funds to critical programs such as air traffic control modernization, airport improvement grants, motor carrier safety, and increasing the investments in highway safety research.

The bill enhances the safety and capacity of the aviation system and the highway and rail networks.

The bill provides a total of nearly \$59.6 billion, a 2.5 percent increase, in total budgetary resources for our Nation's infrastructure and transportation safety, including the Federal Aviation Administration, transit program spending, the United States Coast Guard, and the National Highway Traffic Safety Administration.

The Federal Aviation Administration will receive a 4.5 percent increase in funds, \$292 million of which is for aviation security, including bomb detection systems and compliance test activities. It makes available \$3.3 billion for the airport improvement program, an increase of \$100 million over the current fiscal year. This money includes \$20 million to support the expansion of service at smaller airports.

This bill, much like last year's, continues to improve and enhance motor carrier safety and operations by providing \$335 million. Of this total, about \$140 million is devoted to facilities and operations necessary to open the U.S.-Mexican border for commercial motor vehicle traffic. Not only will this allow for the free flow of trade between the United States and Mexico, but it instills a modest system of safety checks to maintain the integrity of our American borders.

Another significant piece of the transportation appropriations funding is for the drug interdiction activities carried out by the United States Coast Guard. The bill includes \$636 million for the Coast Guard's capital needs and \$320 million that is available to initiate the Deepwater program, which will fight the scourge of illicit drugs, provide support for offshore research and rescue, and work to protect Americans and American shores.

Moreover, the bill meets the funding obligation limitations in the transportation legislation known as TEA-21, the Transportation Equity Act for the

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

21st century. These programs are critical to improvements and modernization of our roadways and our airways, providing desperately-needed funds across the Nation.

In addition, the bill provides \$521 million for Amtrak's capital needs. This funding will cover capital expenses and preventative maintenance. The bill sustains the Federal commitment to continue its partnership with Amtrak to help it reach its goal of self-sufficiency by December of 2002.

Mr. Speaker, this is a responsible conference report that tackles our Nation's most pressing transportation needs. In the midst of the holiday travel season and in light of the recent attacks on our Nation, this Congress can take pride in the fact that the underlying legislation represents an increase in the safety measures and resources in every area of our transportation system.

With airline security stabilization legislation already signed into law, this conference report expands on the new measures and provides the necessary resources to carry out much-needed safety initiatives.

Now more than ever, safety should remain the Federal Government's highest responsibility in the transportation area. Clearly, whether by land, by sea or by air, this bill addresses those needs and concerns, while maintaining the fiscal discipline that has been the hallmark of this Congress.

Mr. Speaker, as I conclude I would like to commend the chairman of the Committee on Appropriations, the gentleman from Florida (Mr. YOUNG), and the ranking member, the gentleman from Wisconsin (Mr. OBEY), for their tenacious work on this measure.

I would also like to extend praise to the gentleman from Kentucky (Mr. ROGERS), the chairman of the Subcommittee on Transportation of the Committee on Appropriations, and the ranking member, the gentleman from Minnesota (Mr. SABO).

I also urge my colleagues to support this straightforward, noncontroversial rule, as well as the underlying legislation.

Mr. Speaker, I reserve the balance of my time.

Mr. HALL of Ohio. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this rule allows for the consideration of the conference report on H.R. 2299. This is a bill that funds the Department of Transportation, the National Transportation Safety Board, and related agencies. The rule waives all points of order against the conference report.

Since the terrorist attacks against the United States on September 11, our Nation's transportation systems have been under great scrutiny. In particular, Federal oversight of aviation has been in the spotlight. However, the

transportation agencies which monitor our railroads, highways, and waterways have also been challenged to find solutions to the terrorist threat.

The bill funds the newly created Transportation Security Administration, which will be responsible for security operations involving all modes of transportation. This is the Federal agency that will oversee the hiring and training and supervising of the airport passenger and baggage screeners.

The bill also funds aviation security in the Federal Aviation Administration, which includes bomb detection systems. The conference report contains compromise language intended to ensure the safety of Mexican trucks traveling on U.S. highways.

I am also pleased that the conference report provides \$1 million towards the construction of the Interstate 70-75 interchange in Montgomery County, Ohio. This will help cover unforeseen increased costs of the project, which is an important priority for the community and the State.

This will be the ninth of the regular appropriation bills to complete the conference process. We are now 2 months into the fiscal year and we still have 4 more to go.

I would urge my colleagues to approve the rule and the underlying bill and let us get this bill to the President to sign.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. REYNOLDS. Mr. Speaker, I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ROGERS of Kentucky. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the conference report accompanying H.R. 2299 and that I may include tabular and extraneous material.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

CONFERENCE REPORT ON H.R. 2299, DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATIONS ACT, 2002

Mr. ROGERS of Kentucky. Pursuant to House Resolution 299, Mr. Speaker, I call up the conference report on the bill (H.R. 2299) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 2002, and for

other purposes, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Pursuant to House Resolution 299, the conference report is considered as read.

(For conference report and statement, see proceedings of the House of Thursday, November 29, 2001.)

The SPEAKER pro tempore. The gentleman from Kentucky (Mr. ROGERS) and the gentleman from Minnesota (Mr. SABO) each will control 30 minutes.

The Chair recognizes the gentleman from Kentucky (Mr. ROGERS).

Mr. ROGERS of Kentucky. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, we are very pleased to present to the body an excellent conference agreement on H.R. 2299, the Department of Transportation and related agencies appropriations bill for fiscal year 2002.

First, let me say that we worked long, hard hours to hammer out the agreements contained in the bill.

□ 0915

I want to especially thank this morning the staff of the subcommittee, both on the majority and minority side, for staying up now two consecutive nights all night long, last night reading out the bill, and the previous night trying to put the bill together for consideration by this body. And they are not in a stupor, Mr. Speaker, but they are very tired. And I think we owe them an especially big debt of gratitude, Rich Efford and the other on the staff of the subcommittee. On both sides of the aisle, we want to say a special thank you to the staff for a tremendous job under extreme conditions because of the hurry up of this process.

We had some daunting challenges, Mr. Speaker. We started the process on this bill with veto threats hanging over both the House bill and the other body's bill because of a controversy over the best way to ensure the safety of trucking, the trucking industry, that we enjoy today without violating the NAFTA treaty.

Also, because of a Type 302-B conference allocation, we had to cut many of the funding items in the conference far below the Senate level. However, with the continued fine cooperation of my colleague and friends from across the aisle, the gentleman from Minnesota (Mr. SABO), the help especially of Senators MURRAY and SHELBY, and the willingness of senior administration officials to meet us half way on the trucking issue, we have, I believe, solved these problems in a fair manner that we can all be proud of.

This bill forges a consensus that, frankly, some thought was impossible a few months ago. And I had to be one of those who thought we could not find a middle ground on the Mexican trucking issue. But through a long process

we have. This bill puts in place a much stronger truck safety and enforcement regime at the Mexican border, requiring on-site inspections and compliance reviews of Mexican trucking firms, weigh-in-motion scales at some of the busier border crossings, and a comprehensive Inspector General audit of the whole system.

After the I.G. audit is completed, the Secretary then will have to certify that opening the border can be accomplished without causing unacceptable safety problems on our Nation's highways. Only then will Mexican trucks be able to drive beyond the border zone further into the U.S.

I should also point out that we owe the gentleman from Minnesota (Mr. SABO) a big debt of gratitude for his hard work in making sure that the bill includes tough new provisions regulating hazardous materials coming over the border. Specifically, due to his work, the bill requires that a new agreement be placed between the U.S. and the Mexican Governments tightening up hazardous materials transportation and ensuring the safety of our roads before Mexican trucking firms are permitted to bring hazardous materials beyond the border zones. That is a great addition to this bill, and I think we all owe the gentleman from Minnesota (Mr. SABO) a big debt for that particular provision.

At the same time, in all of this we were responsive to the President's firm commitment to honor the NAFTA treaty and open the border in 2002. The provisions of this bill will, I believe, allow the President to open the border sometime in fiscal year 2002 and will not violate the NAFTA treaty. The administration also believes that. It is critical that we honor our international commitments, and this bill does that. The administration has indicated their full support for the compromise worked out on the Mexican trucking issue.

In its funding aspects, let me first point out that the bill is within our allocation for budget authority and outlays. Although our allocation was extremely tight, we were able to fund all of the major DOT operating agencies at or near the President's budget request, while honoring the funding guarantees in TEA-21 and AIR-21. This was not easy to accomplish because it required us to cut out many worthy items, especially in the transit area.

In general, the bill before you provides increases for major infrastructure programs around the country. Let me provide just a couple of examples. The bill includes \$320 million to kick off the Coast Guard's new deepwater program, the largest acquisition ever attempted by the Department of Transportation. That is about \$280 million above last year's level. It includes funding for Federal-aid highways, \$100 million above the level guaranteed in

the authorization bill. And it fully funds the authorization for much-needed airport funding. These resources will go a long way to help jump-start the transportation construction sector of our economy.

Finally, Mr. Speaker, the Members should know that this bill responds to the September 11 terrorist attacks. The bill includes an appropriation of \$1.25 billion for screening activities at the Nation's airports. I know some have questioned the aggressive timetable for aviation security improvements we just recently established in this body. Well, we are saying in this bill that funding will not be a problem. This bill provides the necessary funds to take whatever steps are necessary in the near term to accelerate this transition as much as possible. The bill also provides \$100 million for the procurement and installation of additional bomb detection systems at the Nation's airports, so that installation of these vital systems at our Nation's airports can be accelerated, Mr. Speaker.

So without further elaboration, I believe that this is a great bill. It deserves Members' support. I recommend it to every single Member.

I want to say again the appreciation we have for the hard work of our colleagues on the subcommittee from both sides of the aisle. We have a wonderful group of Members of this body accumulated in this subcommittee. All of them participate. All of them have contributed to this bill and all have contributed their dedication to the success of the transportation bills of the country. And I want to thank each member of the subcommittee for the great contributions they have made, and especially, again, the staff who have devoted themselves beyond the call of duty to this particular bill.

Mr. Speaker, I reserve the balance of my time.

Mr. SABO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, first let me compliment and congratulate the distinguished gentleman from Kentucky (Chairman ROGERS) for his outstanding work for bringing to the House a conference report on the fiscal year 2002 transportation appropriations bill that we should all be proud of and that we should pass. But I would like in particular to compliment the gentleman from Kentucky (Chairman ROGERS) for the role he played in making sure that we reached an agreement on the Mexican truck issue that I think satisfied the concerns of all of us who raised the issue and still found a solution that the President would sign.

He played an absolutely key and essential role in making that happen. It has been a long journey, and we wondered how it would end at times.

When the House acted because of procedural limitations, we adopted an amendment that we knew would have

to later be modified. I thought the Senate did some outstanding work in making modifications and expanding on what should be done as it relates to motor carrier safety as we begin to have Mexican trucks come beyond the 20 mile commercial zone. The discussions that went on for an extended period of time finally resulted in a solution that will be signed by the President. At the same time it represents a giant leap forward in assuring the American public that those trucks and those drivers will be safely on our roads. We know we can have no absolute guarantee for any of us when it comes to our highways, but there is a process in place that, properly administered, should assure that the quality of vehicles and the quality of drivers on our highways are the same for those trucks and those drivers as those that exist in our country.

So I think that was a major step forward, and the gentleman from Kentucky (Chairman ROGERS) played an essential role in making that happen.

The bill itself makes necessary investments in our Nation's infrastructure and the safety of all of our modes of transportation. It is a good bill, and let me join the chairman in thanking the staff that has worked so hard and all the Members of the committee that worked so hard to bring this bill to us. But let me in particular thank Bev Feeto of our majority staff, Marge Duske of my personal staff, Rich Efford, Stephanie Gupta, Cheryl Tucker, Linda Muir, and Theresa Kohler of the majority staff. All of them do excellent work. This is a good bill and it deserves a big vote.

Mr. Speaker, I reserve the balance of my time.

Mr. ROGERS of Kentucky. Mr. Speaker, I yield such time as he may consume to the gentleman from Florida (Mr. YOUNG), the chairman of the full committee who has been such a big help in the construction of this bill and helping to shepherd us through the maze we have had to go through. I want to thank the chairman as I yield him time.

Mr. YOUNG of Florida. Mr. Speaker, I thank the chairman for yielding me time, and I am not going to take a lot of time on the bill because it has been very well explained and the subcommittee has done such a good job.

The bill does not really need a lot of speeches in its behalf. But I rise to thank the gentleman from Kentucky (Chairman ROGERS) and the ranking member, the gentleman from Minnesota (Mr. SABO) for having done a really good job in an extremely difficult situation. They have done yeoman's service. The gentleman from Minnesota (Mr. ROGERS) mentioned the staff, and I want to adjust a little bit more time to his comments about the staff.

The conferees finished, we finished our work on this conference last

evening considerably later than after the House had left for the day. We finally got the paperwork done by midnight and then the staff, after having completed the paperwork, and we are very meticulous in making sure that our bills are exactly the way we intend them to be; we seldom ever have to come in and ask for a correction because of good staff work. But they were finally able to start reading the bill, that is a term we use, read the bill, at about 12:40 a.m. this morning. And by 5:00 this morning they had completed reading the bill. And we went to the Committee on Rules and the gentleman from Kentucky (Mr. ROGERS) came in and filed the bill then, and we went to the Committee on Rules and got the rule which has already passed.

They have done a really good job, and I wanted to take another minute and explain why this has been such a difficult task for them and what a good product they have produced.

The House of Representatives passed this bill on June 26. That seems like it was almost last year. The Senate passed it on August 1, considerably later. But we did not get the paperwork and a request to go to conferences for 85 days after the Senate passed the bill. For 85 days this stayed out there, and it festered a little bit here and there. The issues were brought up that had to be settled. But this subcommittee worked through all of those issues. And so finally on October 29 we received the papers and we went to conference on the 31. And so today we have produced a bill that I think would enjoy tremendous support in the House. But I took this time to not only compliment the leadership of the subcommittee, but to say that as chairman of the full committee, it makes my job a lot easier, and the gentleman from Wisconsin (Mr. OBEY) and I, as the chairman and ranking member, it makes our jobs easier when we have a subcommittee that produces as good a product as this. It makes our job a lot easier so we appreciate that.

Let me take a few more seconds to say that next week we intend to have the District of Columbia appropriations conference ready for the House to consider and, additionally, we are planning to do the foreign operations appropriations subcommittee also for next week. There are several issues that are a little bit above our pay grid that still have to be resolved, but we think we can do that and have those two on the floor.

□ 0930

The only two appropriations bills remaining are the Labor, Health and Human Services and the Defense. The slowdown on the Defense, I will not take the time to explain that, but September 11 was part of the slowdown because we were in this building ready to mark up the Defense bill on September

11 when everybody was evacuated after the terrorist attacks.

The subcommittee has done a good job. And I compliment them as strongly as I can and the staff and hope that we will get a very nice vote for this good conference report today.

Mr. SABO. Mr. Speaker, I yield 2 minutes to the gentleman from Arizona (Mr. PASTOR), a distinguished member of our subcommittee.

Mr. PASTOR. Mr. Speaker, I thank the gentleman from Minnesota (Mr. SABO) for yielding me the time.

I rise in support of this conference bill and ask my colleagues to support it. I also rise to congratulate the gentleman from Kentucky (Mr. ROGERS) and the gentleman from Minnesota (Mr. SABO) for the excellent job they have done on this conference bill.

I represent the border communities of Arizona, and we tried to balance the safety issues as well as the commerce issues, and this compromise that has been achieved in this bill allows us to protect the safety of our American citizens, especially those that live on the border. At the same time, we allow the implementation of the NAFTA agreement and will allow that commerce to continue and probably increase.

I also want to thank both gentlemen for recognizing the needs of Arizona in terms of transportation infrastructure and public transportation needs. I have to tell you that they recognized and they funded important projects, and I want to thank them both for doing that.

In Phoenix, which is the United States fifth largest community, they are assisting us in continuing the development of a light transit system, as well as a public transportation system. They funded the infrastructure for our growing and enlarging airports and helped other community transportation systems.

Commerce is very important to Arizona, and one of the issues is the bridge over Hoover Dam, and that would allow the CANAMEX transportation corridor to be developed, and they recognize that, and they also fund it.

I also want to thank the staff for working on this bill and bringing forth to us an excellent bill, and I ask for its support.

Mr. SABO. Mr. Speaker, I yield 3 minutes to the gentlewoman from Michigan (Ms. KILPATRICK), another distinguished member of our subcommittee.

Ms. KILPATRICK. Mr. Speaker, I, too, was a member of the subcommittee and want to thank our chairman, the gentleman from Kentucky (Mr. ROGERS), for his excellent leadership, coming in as a new subcommittee chair for this bill, being fair, thorough. I also want to thank the gentleman from Minnesota (Mr. SABO), our ranking member, who has always been effective in his quiet intelligence

for allowing all of us to participate and to represent the constituents who send us here.

I represent Michigan, the border city of Detroit, one of the busiest border crossings in our country in northern America, and it is very important that we do what we need to do to secure those borders, and I want to thank both the gentleman from Kentucky (Mr. ROGERS) and the gentleman from Minnesota (Mr. SABO) for the work that they have put in this bill to begin that process.

Since September 11 I have had an opportunity to meet on two occasions with our Coast Guard, our INS, our Customs and our Border Patrol to talk about the needs that they must have over the next several months and years to actually secure those borders, and I know that I have the support of the gentleman from Florida (Mr. YOUNG), as well as our chairman of our subcommittee and our ranking member to see that that is done.

Quite a bit of commerce comes across that Canadian border, as well as other things, both negative and positive. This bill begins to address much of it, and I want to thank the leadership of this committee for allowing that.

We still have work to do on those borders. The Coast Guard, INS, Customs and Border Patrol are still short of people. The supplemental that is going through will help some of that, too. The world has changed since September 11, and this transportation bill begins to address that.

I thank the committee very much for all that it has done for the State of Michigan and for this country to address those needs in this bill, and, as we move forward in our next appropriation and beyond, consider those agencies who risks their lives every day to secure our borders and bring more attention to our northern borders here in our country.

I would urge all my colleagues to support this bill. It is wonderful, it is fair, it is good transportation policy.

I rise in support of the conference report, and I appreciate the efforts of our Chairman, the gentleman from Kentucky, Mr. ROGERS, and the gentleman from Minnesota, Mr. SABO for putting together a bill that we can pretty much all agree on.

This bill makes some significant funding advances for providing additional inspectors at airports and for improving airport security. I think this must be viewed as a first step toward ensuring the safety and security of our commercial transportation infrastructure, and I am very pleased with our efforts in this area.

Another area of concern to all of us is funding for a key agency in the protection of our homeland security, the Coast Guard. The Coast Guard personnel resources assigned to protecting our nation's ports were stretched before September 11th and are stretched even thinner now. This bill will give the resources necessary to bring some relief to the demands being made of our Coast Guard personnel.

I am also pleased that we have reached a compromise on the NAFTA trucking issue. The compromise reached will go along way to ensuring highway safety and still comply with the NAFTA accord this Congress supported almost a decade ago. Let me say to my colleagues that this year's bill focused much attention on the southern border. Next year, I look forward to working with my colleagues in strengthening the security of our transportation infrastructure along the northern border.

I urge my colleagues to support this bill. It is one that we can be proud of and I thank the Speaker for granting me this time.

Mr. SABO. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania (Mr. BORSKI), one of the distinguished members of the authorizing committee and a good friend.

Mr. BORSKI. Mr. Speaker, let me first commend the gentleman from Kentucky (Mr. ROGERS) and the gentleman from Minnesota (Mr. SABO) for the exceptional job they did on this bill. I also want to commend Senators Murray and Shelby and particularly on the issue of Mexican trucks. This was an extremely contentious issue and one that has been worked out to my personal great satisfaction. It was a job well done.

Mr. Speaker, earlier this year the gentleman from Wisconsin (Mr. PETRI) and myself and the gentleman from California (Mr. FILNER) and the gentleman from Pennsylvania (Mr. HOLDEN) traveled to the Mexican border to see what was happening firsthand with the Mexican truck issue.

At Otay Mesa, California, we saw a system that I think worked very well. We saw a system where trucks were given inspection stickers that were good for 90 days. Any vehicle that tried to get through without that inspection was not allowed and was inspected. We then went to Texas where we saw a much lesser successful situation, if you will.

At Otay Mesa, the experience was similar to ours in the United States of America where about 24 percent of the trucks were taken out of service that were inspected, a rate both much too high here and there, at least consistent with our experience in the United States.

In Texas, we were met by Coy Clanton, who was the director of public safety in Texas, and he told us that a truck that is not inspected will be neglected, and what we saw in Texas were trucks that were not inspected and were neglected, where the cars or trucks were taken out of service, were somewhere in the neighborhood of 60 percent totally unacceptable.

This is a good agreement in the conference report. Every truck that wants to enter the United States of America must be inspected. If it does not have a valid inspection sticker it will be pulled off, have a complete level one inspection. If it does not pass, it will not get into this country. This is a

great victory for public safety, and, again, I commend all the conferees.

Mr. ROGERS of Kentucky. Mr. Speaker, I yield such time as he may consume to the gentleman from Virginia (Mr. WOLF), immediate past chairman of this subcommittee and now the chairman of the Subcommittee on Commerce, Justice, State and Judiciary, my old subcommittee. I have gained even more respect for this gentleman after having seen what he had to go through on this bill for the last 6 years.

Mr. WOLF. Mr. Speaker, I want to congratulate the gentleman from Kentucky (Mr. ROGERS) and the gentleman from Minnesota (Mr. SABO) and the staff for a really, really great job. This is a very difficult bill, a lot of contentious issues, that really tie a lot of people up. They really have done an amazing job. I have been watching and I just want to congratulate the gentleman for it.

On the issue of truck safety, speaking of the Mexican trucks, I appreciate that they literally by their actions here have saved a lot of lives. There will be a lot of people that will never get the telephone call saying that a loved one was killed because of a truck coming out of Mexico because of the actions that they have done. They will not know that they did not get that telephone call because of the gentleman from Kentucky (Mr. ROGERS) and the gentleman from Minnesota (Mr. SABO), but I want to kind of put it in the record that, because of their efforts, they will not get that call.

I think it is now incumbent upon the administration to take the good work that they have done and enforce it appropriately, and I know they will hold their feet to the fire.

Again, to the gentleman from Kentucky (Mr. ROGERS), congratulations and to the gentleman from Minnesota (Mr. SABO), congratulations. Also, they have an outstanding staff, having worked with them for a number of years. So I want to also congratulate the staff, and there really ought not be any negative votes against this bill. I cannot see why a Member of Congress would vote against the bill and hope everyone votes for it.

Mr. SABO. Mr. Speaker, I yield 3 minutes to the gentleman from Minnesota (Mr. OBERSTAR), my distinguished colleague.

Mr. OBERSTAR. Mr. Speaker, I thank the gentleman from Minnesota (Mr. SABO) for yielding me the time and compliment my colleague and dear friend for his leadership on all of the issues in this appropriation bill on transportation and to the gentleman from Kentucky (Mr. ROGERS) for whom I have worked with for many years on Appalachia and economic development matters and the chairman of the full committee, the gentleman from Florida (Mr. YOUNG), for the excellent prod-

uct that they have brought back to the House.

I do want to observe, though, that the manager's report contains a listing of over 100 airport projects that managers want to see funded out of FAA discretionary funds. In the past, there have been listings of projects for specific airports but without specific dollar amounts and with less prescriptive language than is included in this manager's report.

The law governing aviation discretionary funds requires the FAA to establish a priority system under which decisions are made about those projects that will receive these very limited dollars. Highest priority goes to projects that will bring airports into compliance with safety and with security standards, and next are projects that are subject to letters of intent. Others are for phased projects and for preservation of existing infrastructure.

Many of the projects listed here may be of fine quality in and of themselves to qualify for funding under FAA established standards. But the aviation system is not like highways. An improvement to a highway project in Boston does not necessarily or in any direct way benefit highway travel in California, but improvement to an airport in Boston makes a great difference to the entire U.S. aviation system.

I want to make it clear that the language in a conference report cannot override a priority system established under existing governing law. A decision of the Comptroller General found that Congress cannot require the Navy to select a particular aircraft the language in the committee report wanted the Navy to require.

When I chaired the Subcommittee on Aviation over numerous years there were innumerable requests for Members to include designation of their particular airport projects, and I steadfastly refused to do that in our authorization. We should not impose the will of the Congress in specific ways in the aviation system, and as ranking member of the full committee, I continued to resist such designation in the last two FAA authorization bills.

Again, I regret that this language has been included.

Mr. SABO. Mr. Speaker, I yield 2½ minutes to the gentleman from Massachusetts (Mr. OLVER), a distinguished member of our subcommittee.

Mr. OLVER. Mr. Speaker, I thank the gentleman from Minnesota (Mr. SABO) for yielding me the time.

I rise today in support of the bill and to congratulate our chairman, the gentleman from Kentucky (Mr. ROGERS), and our ranking member, the gentleman from Minnesota (Mr. SABO), for the leadership they have shown in addressing the Nation's critical transportation needs.

I particularly want to express thanks to the staff for this subcommittee

which has worked so very hard and put in so many long hours over the last couple of weeks but culminating in a fierce collection of hours over the last 48, and that would be the majority staff: Richard Efford, Stephanie Gupta and Cheryl Tucker and, also, of course, our clearly overworked and undoubtedly underpaid staff member on the minority side, Bey Pheto. They have put an enormous amount of effort into this, and I appreciate it very much, as I know all the members of the subcommittee do.

Despite our constrained allocation, the bill successfully makes critical investments in highway transit, aviation and the Coast Guard.

□ 0945

And I want to commend the chairman and the ranking member for the excellent provisions related to Mexican trucks. This will ensure the safety of our highways, or help to ensure the safety at least of our highways, as was so very important.

I am also pleased we were able to delete an anti-environmental rider on global warming that was included in the original House bill. There is now overwhelming, peer-reviewed, sound, scientific evidence that global warming is occurring and substantially due to human influence. The National Academy of Science has very recently reaffirmed that fact. But one does not have to look at anecdotal evidence, just look at the exceedingly unusual weather here in November.

I would like to thank the chairman and the ranking member for their work in removing this rider. It is a good bill, Mr. Speaker, and I urge all Members to support it.

Mr. Petri. Mr. Speaker, a major hallmark of the Transportation Equity Act for the 21st Century (TEA 21), which was passed by the Congress in 1998 by overwhelming margins, was that for the first time receipts into the Highway Trust Fund were guaranteed to be spent for transportation purposes. This is accomplished through the annual calculation of Revenue Aligned Budget Authority (RABA), which makes adjustments in obligations to com-

pensate for actual receipts into the Trust Fund versus the estimated authorization included in TEA 21 for the fiscal year.

While I am pleased that the Appropriations Committee has for the most part upheld the firewalls in this Conference Report, I find the redistribution of RABA funds to be outrageous. Under TEA 21, RABA funds are to be distributed proportionately to the states through formula apportionments and also to allocated programs. This Conference Report is a radical departure from that and is a cause for great concern. It is something I cannot support.

The Conference Report was available for only a couple hours before the House voted on it. However, a quick review indicates that nearly \$1 billion of the \$4.5 billion of 2002 RABA funds has been redistributed contrary to TEA 21. Specific TEA 21 programs, which normally are discretionary programs, have been increased well beyond what their proportionate share of RABA funds would have been if TEA 21 had been followed in this conference report. Of course, all these funds have been earmarked by the appropriators.

According to the Federal Highway Administration, to pay for these earmarks, about \$500 million will be lost for allocated programs and \$500 million will be lost from state apportionments. That means states lose more than 11 percent of RABA funds from the regular formula program.

Every Member who worked to get a high priority project in TEA 21 should take note. Under TEA 21, high priority projects under section 1602 should be included in RABA distributions. But, the appropriators have chosen to zero out RABA funding for TEA 21 high priority projects. This means that every Member with a TEA 21 project will experience a 13% cut in funds. If RABA funds had been distributed according to TEA 21, Members' high priority projects would have been increased by \$236.7 million in FY 2002. Instead, they will receive no RABA funds.

A look at what the committee has done to particular programs illustrates dramatically what has happened. The Transportation and Community and System Preservation Pilot Program, which is authorized at \$25 million for FY 2002 in TEA 21, should have received \$3.3 million in RABA Funds. But, incredibly, the appropriators have given it an amazing \$250.8 million in RABA funds. Could it be because this program does not require a State

or local match and can be used for practically anything? A perfect pot of money to earmark. Again, a \$25 million program has been increased to \$275.8 million for FY2002.

Under TEA 21, the Borders and Corridors program is authorized at \$140 million for the fiscal year. It should have received \$18.6 million in RABA funds, but instead it will receive more than \$352 million in RABA funds.

Under TEA 21, the Interstate Maintenance Discretionary program is authorized at \$100 million for FY2002 and should have received \$13.3 million in RABA. But under the conference report, the program will receive \$76 million in RABA funds. The Bridge Discretionary program, authorized at \$100 million per year, should receive \$13.3 million in RABA funds. But, it will receive more than \$62 million in RABA funds. Of course, at this point the term "discretionary program" is a complete misnomer as the Secretary has absolutely no discretion since all the funds (both the base amount and RABA) are earmarked.

Again, all of these funds, which should be distributed to the states and allocated programs, have been earmarked for winners and losers.

I have included two charts prepared by the Federal Highway Administration at the U.S. Department of Transportation which illustrate the impact of this misuse of RABA funds. One chart indicates the amount of RABA funds each allocated program would have received in FY 2002 under TEA 21 and what they will actually receive under this conference report. The other indicates what the impact will be on individual states and the amount of formula funds lost.

Mr. Speaker, this is just wrong. RABA was not created to be a slush fund for the appropriators. For the committee to take nearly \$1 billion of these funds to earmark for projects they deem desirable—on top of the fact that they had already earmarked all pre-RABA discretionary funds—should not happen. This should not be a precedent for future years. And we will continue to review the Conference Report for other offensive provisions.

With conference reports, our options admittedly are limited. However, I cannot stand by and let these egregious acts go by without at least commenting and acknowledging just what has gone on in this report.

¹ Represent — 11.38 percent.

Mr. OBERSTAR. Mr. Speaker, I greatly appreciate the work of the Appropriations Committee in ensuring the safety of our highways, particularly the Conference Report's provisions to ensure that we have adequate safety standards with regard to Mexican carriers operating in the United States beyond the border commercial zones.

The requirements are quite simple—we require that Mexican carriers operating in the United States, including both their drivers and trucks, meet U.S. safety standards before they

are given authority to operate throughout the country.

All carriers and vehicles are inspected and, until a carrier has been operating in the U.S. for three consecutive years, we require the California system of mandated CVSA inspections every 90 days. We ensure that the Mexican carrier has proof of insurance. We confirm that the drivers have valid Commercial Driver's Licenses.

We ensure that Federal and State inspectors are actually in place at the border crossings to inspect trucks. We ensure that the border facilities have the capacity to actually inspect trucks and have scales to actually weigh vehicles and enforce U.S. truck size and weight laws.

We require the Department of Transportation Inspector General to do a comprehensive review of each of these requirements and that the Secretary of Transportation certify, in a manner addressing the IG's findings, that the opening of the border does not pose an unacceptable safety risk to the American public.

Although all of this would seem common sense, it has been extremely difficult to achieve. The Administration proposed asking the Mexican carriers to fill out a paper application, letting the trucks in, and possibly inspecting them later. Congress, with the leadership of members of both the Transportation and Infrastructure Committee and the Appropriations Committees, particularly Ranking Member SABO and Chairman ROGERS, and Senators MURRAY and SHELBY, have stood firm in the face of constant assaults from the highest levels in this Administration that these common sense requirements were "anti-Hispanic" and "discriminatory".

Today, the Administration embraces and welcomes the Conference Report with its very strong provisions requiring substantially improved safety for Mexican trucks operating in the United States. In what I would modestly call an abrupt reversal of the Administration's ad hominem attacks of our colleagues, the Administration has abandoned its unfounded and misguided position on this important truck safety issue. The Conference Report adopts the necessary public policy to ensure that safety is the highest priority for Mexican trucks operating on American roadways.

Given that highway fatalities are the leading cause of death for persons in the United States of every age from 6 to 33 years old, the American people thank the Gentleman

from Minnesota, Mr. SABO, the Gentleman from Kentucky, Mr. ROGERS, and other House and Senate colleagues who stood firm in conference to save more of the Nation's children from unneeded deaths on our highways.

Mr. KOLBE. Mr. Speaker, I rise in support of this conference report and would like to congratulate the Chairman on resolving some difficult issues. One issue in particular is extremely important to me and the nation—the matter of allowing Mexican trucks into the United States as required by law.

Again, this year, there was an attempt to prohibit Mexican trucks from operating beyond the border commercial zone. I have said all along that this is really an issue about certain protectionist interests trying to block Mexican trucks from the United States highways under the guise of truck safety.

We all want to ensure that trucks traveling within the United States are safe. I believe, however, the most important aspect of truck safety is the observation of the driver and the inspection of the truck at the border and along the highway. This can be done while ensuring the security of our border and without establishing unattainable requirements with the sole purpose of denying the entry of Mexican trucks.

Mexican trucks that can operate in the United States, in compliance with U.S. laws and safety regulations, should be allowed in—just like Canadian trucks. We must treat our neighbors to the south, Mexico, the same as we treat our neighbors to the north, Canada.

Whether you agree with NAFTA or not, it is the law of the land and it is an international agreement that we must uphold. For too long the protectionist interests have thwarted efforts to implement the law of the land and to comply with our international agreements. How can we be a global leader by reneging on our agreements? We can't and we won't.

The intent of the opponents of Mexican trucks entering the U.S. has been very clear all along. Let's face it, there are interest groups in the United States that do not want those trucks here. They are joined by interest groups in Mexico.

It is time to build bridges to Mexico—bridges that allow trucks from the U.S. and Mexico to pass each other, not barriers that block the movement of ideas and goods.

Although I do not think that this final compromise is perfect, I am a realist and am pleased that this conference report will allow Mexican trucks to enter all areas in the United

States. We have made a step forward today toward treating our Mexican friends with the respect they deserve.

Mr. SABO. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. ROGERS of Kentucky. Mr. Speaker, I have no further requests for time, I yield back the balance of my time, and I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore (Mr. THORNBERRY). The question is on the conference report.

Pursuant to clause 10 of rule XX, the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 371, nays 11, not voting 51, as follows:

[Roll No. 465]

□ 1016

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Stated for:

Mr. McDERMOTT. Mr. Speaker, on rollcall No. 460, had I been present, I would have voted "yea."

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Monahan, one of its clerks, announced that the Senate has passed without amendment a bill of the House of the following title:

H.R. 2291. An act to extend the authorization of the Drug-Free Communities Support Program for an additional 5 years, to authorize a National Community Anti-drug Coalition Institute, and for other purposes.

The message also announced that the Senate has passed a joint resolution of the following title in which the concurrence of the House is requested:

S.J. Res. 26. Joint resolution providing for the appointment of Patricia Q. Stonesifer as a citizen regent of the Board of Regents of the Smithsonian Institution.

LEGISLATIVE PROGRAM

(Ms. PELOSI asked and was given permission to address the House for 1 minute.)

Ms. PELOSI. Mr. Speaker, I yield to the gentleman from Texas to inquire about next week's schedule.

Mr. ARMEY. I thank the gentlewoman for yielding.

If I might observe, Mr. Speaker, what a pleasant surprise and congratulations to the gentlewoman from California.

Ms. PELOSI. I thank the distinguished gentleman.

Mr. ARMEY. Mr. Speaker, I am pleased to announce that the House has completed its legislative business for the week.

The House will next meet for legislative business on Tuesday, December 4, at 12:30 p.m. for morning hour and at 2 p.m. for legislative business. The House will consider a number of measures under suspension of the rules, a list of which will be distributed to Members' offices later today. On Tuesday, no recorded votes are expected before 7 p.m. due to the National Day of Reconciliation ceremony that will be held between 5 and 7 p.m. in the Rotunda. Mr. Speaker, if I may repeat that: on Tuesday, there will be no recorded votes before 7 p.m.

On Wednesday, Mr. Speaker, I expect to be able to schedule appropriations conference reports that are available. Chairman YOUNG reports that the District of Columbia and Foreign Operations conference reports will hopefully be ready to be considered by Wednesday.

As previously announced, on Thursday, December 6, I have scheduled H.R. 3005, the Bipartisan Trade Promotion Authority Act of 2001.

Throughout the balance of the week, the House will consider any additional conference reports as they become available.

Ms. PELOSI. I thank the gentleman.

Mr. Speaker, are we to understand from what the gentleman has said that Fast Track legislation is definitely going to be on the schedule on Thursday?

Mr. ARMEY. Yes. Again, I want to be very clear on that. We will vote on Thursday, the 6th, on the trade promotion legislation. That is it. It will be there.

Ms. PELOSI. If I may question the distinguished leader further. What are the chances of having votes on next Friday?

Mr. ARMEY. Mr. Speaker, obviously we want to hold the floor available for votes, but that would be pending conference reports that would be made available. At this time we have to be prepared for votes on Friday. But, if I may just give my sort of candid personal advice, I would also entertain other Friday options as well.

Ms. PELOSI. Is it possible we could work Friday through the weekend and end for the year next weekend?

Mr. ARMEY. I would have to say, Mr. Speaker, that I would not anticipate working through the weekend. I would not anticipate us completing our year's work by the end of next week.

Ms. PELOSI. If the distinguished leader would answer one more question, can we expect election reform legislation on the floor next week?

Mr. ARMEY. If the gentlewoman will yield further, Mr. Speaker, we have no plans at this moment to put that on the floor for next week. This is, of course, a subject with respect to which a great many Members feel a good sense of urgency. Should things develop in the process of working this through the committee process, I will obviously inform the minority as immediately as possible. But I have no plans at this time.

Ms. PELOSI. I thank the distinguished leader.

ADJOURNMENT TO TUESDAY, DECEMBER 4, 2001

Mr. ARMEY. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet at 12:30 p.m. on Tuesday, December 4, 2001, for morning hour debates.

The SPEAKER pro tempore (Mr. THORNBERRY). Is there objection to the request of the gentleman from Texas?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. ARMEY. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

HUMAN CLONING

(Mrs. JO ANN DAVIS of Virginia asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. JO ANN DAVIS of Virginia. Mr. Speaker, I rise today to join my colleagues in calling upon the other body to take up and pass the Weldon-Stupak Human Cloning Prohibition Act which was approved by this House with 265 votes. This is a necessary and important bill to protect in law the uniqueness of human life and to acknowledge that everything that science and scientists are capable of accomplishing cannot necessarily be labeled as "progress." Human life should be nurtured in families by a father and mother, not created in a laboratory to ensure certain predetermined genetic traits.

From experiments with animals, we know that 95 to 99 percent of cloned embryos die. Those that survive are often stillborn or die shortly after birth. Those that survive beyond birth face unpredictable and terrible health problems. The prospect of similar results in the cloning of human beings is chilling, and the other body needs to move quickly and decisively to prevent scientists from proceeding with such unethical and shameless experiments.

Now is the time to act. We urge the other body to take a stand on this issue.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Members are reminded not to urge action or inaction by the other body in their comments.

INTRODUCTION OF LEGISLATION CONVEYING PROPERTY TO GAITHERSBURG TO CREATE A CITY PARK

(Mrs. MORELLA asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. MORELLA. Mr. Speaker, I rise to explain legislation that I introduced, H.R. 3355. It is going to transfer Federal property to the city of Gaithersburg. This property is controlled by the National Institute of Standards and Technology. The transfer will help strengthen their existing partnership and enable the city of Gaithersburg to use the property as a city park and provide the community a safe area for children to play and enjoy nature.

It would allow the Department of Commerce to transfer 13.71 acres of Federal property to the city of Gai-

thersburg to make this planned park a reality. Officials at NIST, such as the acting director, Dr. Karen Brown, and director of administration and CFO, Jorge Urrutia, have expressed their support of the property transfer as have the Mayor of Gaithersburg, Sidney Katz, and the city council of Gaithersburg.

The plans for creating the city park are already under way. The goal of city officials is to build a park that will complement the neighborhood that is adjacent to the land. It is my hope that we can grant this transfer and enable the city of Gaithersburg to provide a safe location for people of all ages.

Mr. Speaker, this is an example of the Federal Government reaching out to a community that is home to many of its employees.

THE QUIET BEATLE IS GONE

(Mr. INSLEE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. INSLEE. Mr. Speaker, I rise to honor the humanitarian workers in Afghanistan like the Mercy Corps group who when the Afghani people said, "I need you," they did not respond, "Don't bother me."

I want to tell you, it is a long, long, long and hard road that they are walking.

And their efforts are their own, not paid for by the taxman.

Their work is really something.

And because of their work, someday the Afghani people will be able to say, "Here comes the sun," and I say, "It's all right."

BRINGING TECHNOLOGY TO THE CLASSROOM

(Mr. FERGUSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FERGUSON. Mr. Speaker, preparing and educating our students for the global economy of the 21st century must be one of America's top priorities.

As a father and a former teacher, I am increasingly concerned about the shortage of technology in our Nation's schools. While there are some 8.2 million instructional computers in our elementary and secondary schools, the additional resources that are needed are startling. At least 5 million new computers are needed at this time, and the number will be higher tomorrow and next month and next year.

There is widespread concern about the academic performance of students in the United States relative to their counterparts in other nations. It is time that we have a clear and focused vision to bring educational technology to the classroom for the sake of our most precious resource, our children.

This week I introduced legislation, House Resolution 295, calling for a commission on technology and education that is comprised of educators, parents and tech industry leaders to help bring technology into the classroom. If we can do this effectively, students will learn the skills they need to prepare for a successful future in our high-tech world.

Let us pass this resolution and give our kids another chance for a brighter future tomorrow in our increasingly competitive world.

URGING ACTION ON ECONOMIC STIMULUS PACKAGE

(Mr. FOLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FOLEY. Mr. Speaker, another Friday has passed, another week is finished in Congress, and we still have no economic stimulus package. We need to urge the other Chamber to work with us to try and get something that will stimulate this economy.

Unemployment numbers are rising. GDP numbers released this morning were weak. We continue to see problems in the economy. Shopping and holiday shopping has dropped dramatically. Tourism in Florida is off 16 percent.

How much more information do you need in the other Chamber? I urge all parties, Democrats, Republicans and independents, on both sides of this Capitol to work together over this weekend and have an economic stimulus bill that will actually cause the economy to move forward. We hope on our side that at least includes tax relief for hardworking families so they will have more money in their pockets to spend in their community. But there is no excuse for failing to act. I urge this body to move the legislation to the President's desk so we can get the next quarter of the economy moving in a positive direction.

□ 1030

SPECIAL ORDERS

The SPEAKER pro tempore (Mr. THORNBERRY). Under the Speaker's announced policy of January 3, 2001, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

AMERICA'S RECESSION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. PENCE) is recognized for 5 minutes.

Mr. PENCE. Mr. Speaker, on September 11 our Nation was mercilessly attacked in New York and in the Pentagon, and we may well have been

made subject to biological attacks through the mail since, even some of which arrived at my own congressional office.

The impact of these attacks on our country is incalculable. It has been emotional. It has resulted in spiritual renewal in our country. It has resulted in military activity overseas and activity by the Justice Department in criminal investigations of a historic scope here in America. And, yes, the consequences of September 11 have been economic as well.

The reality is that what we found out this week, Mr. Speaker, is that beginning in March of this year and manifested in newspapers around America on Tuesday, we are in fact in a recession. All people around America know is recession is defined as when there are two consecutive quarters of net negative growth in the GDP, and that sad news arrived on the door steps of Americans this week.

Well, the reality is that the events of September 11, Mr. Speaker, contributed to a weak economy spiraling even further into recession, the recession in which we find ourselves today. Now, these facts may seem obvious. They may not even seem worthy of taking the time of this august Chamber today; but they are not apparently obvious to our colleagues on the other side of the aisle, who we are told in newspapers around America today including the front page of USA Today that political attack ads will be launched beginning this weekend in markets all across America deriding the George Bush recession.

Let me say again, labeling the economic downturn as the George Bush recession, a key Democrat announced plans Thursday for her party's first political ad campaign since the attacks on America on September 11.

So I rise today to simply ask the question, Mr. Speaker, whose recession is this? Is it in fact the George Bush recession? Well, let us begin with the facts. As I mentioned earlier a recession is two consecutive quarters of net negative growth in the GDP. That means that the recession in which we find ourselves began on March 1.

I seem to remember that the Presidential campaign was quite divisive. That in fact George W. Bush was not able to form his government until into January and, therefore, he had been President of the United States for approximately 5 weeks, Mr. Speaker, when this recession arrived. Now that to me is an extraordinary judo throw for any human being or any administration. In 5 weeks we are to believe that George W. Bush was such a repellent on the American economy that he drove us into a recession. That is obviously absurd.

But some might be quick on my side of the aisle to say this is not a George Bush recession we are in. It is a Bill

Clinton recession we are in and there is certainly evidence to suggest that.

Manufacturers in the automotive industry and the diesel industry in the east central Indiana district that I serve have said that their orders were off beginning in the fourth quarter of the year 2000. The National Association of Manufacturers estimated that without an energy policy in America, fuel prices soared in 1999 and 2000, costing the economy more than \$115 billion, dragging down manufacturers and sending us into a recession.

But I am not here today, Mr. Speaker, to exploit national tragedy for political gain. So I do not stand in this Chamber even to say this is a Bill Clinton recession.

So whose recession is it, Mr. Speaker? Is it George W. Bush's? Is it Bill Clinton's? Is it the terrorists' who attacked our country on September 11? The truth of the matter is, Mr. Speaker, it is none of the above. It is simply America's recession.

The people of the United States of America learned a powerful lesson on September 11, and that is we are all in this together, that united we stand. The American people have rightly had much less patience for small-minded partisan bickering and finger pointing since September 11, and I suspect that my colleagues on the other side of the aisle who would seize this moment for political advantage, to lay this multi-year recession driven even farther down by the terrorist attacks may well pay a penalty at the ballot box for their exploitation.

Let us work together to pass an economic stimulus package in a bipartisan way. Let us get this economy moving together.

WORLD AIDS DAY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. FOLEY) is recognized for 5 minutes.

Mr. FOLEY. Mr. Speaker, since 1988 December 1 has been known as World AIDS Day. World AIDS Day emerged from the call by the World Summit of the Ministers of Health on Programmes for AIDS prevention in January of 1988 to open channels of communication, strengthen the exchange of information and experience, and forge a spirit of social tolerance. Since then World AIDS Day has received the support of the World Health Assembly, the United Nations system and governments, communities and individuals around the world. Each year, it is the only international day of coordinated action against AIDS.

Today in the Washington Post I have read Kofi Annan, who is the Secretary General of the United Nations, entered this editorial comment: "Every day more than 8,000 people die of AIDS. Every hour almost 600 people become

infected. Every minute a child dies of the virus. Just as life and death goes on after September 11, so must we continue our fight against the HIV and AIDS epidemic. Before the terrorist attack two months ago, tremendous momentum had been achieved in that fight. To lose it now would be to compound one tragedy with another.

"New figures released in advance of World AIDS Day, December 1, show that more than 40 million people are now living with the virus. The vast majority of them are in sub-Saharan Africa, where the devastation is so acute that it has become one of the major obstacles to development. But parts of the Caribbean and Asia are not far behind and the pandemic is spreading at an alarming rate in Eastern Europe. For too long global progress and facing up to AIDS was painfully slow, and nowhere near commensurate with the challenge. But in the past year for much of the international community, the magnitude of this crisis has finally begun to sink in. Never in the 2 long decades that the world has faced this growing catastrophe have there been such a sense of common resolve and collective possibility.

"Public opinion has been mobilized by the media and nongovernmental organizations and activists, by doctors and economists and by people living with the disease. Pharmaceutical companies have made their AIDS drugs more affordable in poor countries, and a growing number of corporations have created programs to provide both prevention and treatment for employees in the wider community. Foundations are making increasingly imaginative and generous contributions, both financial and intellectual in prevention, in reducing mother-to-child transmission and the search for the vaccine.

"In a growing number of countries, an effective prevention campaign has been launched. There has been an increased recognition about donors in the most affected countries of the link between prevention and treatment."

This is General Kofi Annan's statement today in the Washington Post. Let me underscore how tragic it is: 7,000 people in sub-Saharan Africa die each day. Seven thousand people, almost double those killed in the World Trade Center. Seven thousand a day in sub-Saharan Africa.

It is an international issue that we must grapple with. I am proud to say President Bush has committed \$200 million to the global fund to fight HIV and AIDS. The global fund has right now pledges totalling \$1.5 billion and I am proud to see our President, George Bush, committed to this goal and providing financial response and support.

I am asking Congress for an additional \$1 billion for the fund, and I hope we are able to do that.

Today we should reflect on those lost and use their memories to fuel our ef-

forts to eradicate this pandemic. This is one of the most serious health challenges we have faced and will face in my lifetime. I pledge as a Member of this body to continue to work with our leaders, the Speaker of the House and others, in order to effectuate a solid policy that helps care for those suffering from this dreaded disease. We can find a way to not only, we pray, create a vaccine, but eradicate this scourge among mankind. But we must particularly set our sights on sub-Saharan Africa and other places because of the poverty and because of the lack of knowledge and because a lack of medical care and treatment is ravaging and destroying the humanity that lives there.

I pledge my support and I know Congress joins us today as we salute World AIDS Day tomorrow morning in our global fight against this disease.

FOR THE LONG HAUL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. GUTKNECHT) is recognized for 5 minutes.

Mr. GUTKNECHT. Mr. Speaker, in the pre-dawn hours of April 12, 1861, Confederate General P.G.T. Beauregard gave the order to fire on Fort Sumter. After 34 hours of bombardment, a white flag ended the first battle of the Civil War.

The only casualty was a Confederate horse. Later a Northern Congressman predicted that we could, "wipe up with one handkerchief the blood that would be spilled in putting down the rebellion." He was wrong.

As the Northern Alliance supported by our bombers and Special Forces roll across Afghanistan, I fear the same overconfidence taking root here in Congress.

In the words of the poet, "We have miles to go before we sleep." So it is with the war on terrorism.

Many ask me what will come next. The answer is embedded in the question. We all know that there will be a next. It is important that those who advance terrorism not know when.

It is important that we understand that the coming phase probably will not be as painless in defeating the Taliban. Other countries do not offer ready-made freedom fighters like the Northern Alliance. We must also brace ourselves for potential news blackouts. I pray that any future deployments of our Special Forces into other countries will not be announced on CNBC. SEAL teams do their best work away from the glare of Klieg lights.

Our commander in chief has made it clear from the very beginning, this will be a long war involving many countries that harbor terrorism.

It began at a time of their choosing. It will end at a time and under the terms that we decide. We must not be-

come overconfident. It will take many handkerchiefs. There will be casualties, both American and innocent civilians. But I have no doubt that we will prevail. And in the end, we will leave to future generations a much safer planet. To victory.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. BECERRA (at the request of Mr. GEPHARDT) for today on account of personal business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. UDALL of New Mexico) to revise and extend their remarks and include extraneous material:)

Ms. NORTON, for 5 minutes, today.

Ms. MILLENDER-MCDONALD, for 5 minutes, today.

Ms. JACKSON-LEE of Texas, for 5 minutes, today.

Mr. ENGEL, for 5 minutes, today.

Mrs. CLAYTON, for 5 minutes, today.

(The following Members (at the request of Mr. FOLEY) to revise and extend their remarks and include extraneous material:)

Mr. PENCE, for 5 minutes, today.

Mr. FOLEY, for 5 minutes, today.

Mr. GUTKNECHT, for 5 minutes, today.

SENATE BILL REFERRED

A joint resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 26. Joint resolution providing for the appointment of Patricia Q. Stonesifer as a citizen regent of the Board of Regents of the Smithsonian Institution; to the Committee on House Administration.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 1459. An act to designate the Federal building and United States courthouse located at 550 West Fort Street in Boise, Idaho, as the "James A. McClure Federal Building and United States Courthouse".

S. 1573. An act to authorize the provision of educational and health care assistance to the women and children of Afghanistan.

ADJOURNMENT

Mr. GUTKNECHT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 10 o'clock and 45 minutes a.m.), under its previous order, the House adjourned until Tuesday, December 4, 2001, at 12:30 p.m., for morning hour debates.

OATH OF OFFICE

The oath of office required by the sixth article of the Constitution of the United States, and as provided by section 2 of the act of May 13, 1884 (23 Stat. 22), to be administered to Members, Resident Commissioner, and Delegates of the House of Representatives, the text of which is carried in 5 U.S.C. 3331:

I, AB, do solemnly swear (or affirm) that I will support and defend the Constitution of the United States against all enemies, foreign and domestic; that I will bear true faith and allegiance to the same; that I take this obligation freely, without any mental reservation or purpose of evasion; and that I will well and faithfully discharge the duties of the office on which I am about to enter. So help me God.

has been subscribed to in person and filed in duplicate with the Clerk of the House of Representatives by the following Member of the 107th Congress, pursuant to the provisions of 2 U.S.C. 25:

Honorable JOHN BOOZMAN 3rd Arkansas.

OATH FOR ACCESS TO CLASSIFIED INFORMATION

Under clause 13 of rule XXIII, the following Members executed the oath for access to classified information:

Neil Abercrombie, Anibal Acevedo-Vilá, Gary L. Ackerman, Robert B. Aderholt, W. Todd Akin, Thomas H. Allen, Robert E. Andrews, Richard K. Arme, Joe Baca, Spencer Bachus, Brian Baird, Richard H. Baker, John Elias E. Baldacci, Tammy Baldwin, Cass Ballenger, James A. Barcia, Bob Barr, Thomas M. Barrett, Roscoe G. Bartlett, Joe Barton, Charles F. Bass, Xavier Becerra, Ken Bentsen, Doug Bereuter, Shelley Berkley, Howard L. Berman, Marion Berry, Judy Biggert, Michael Bilirakis, Sanford D. Bishop, Jr., Rod R. Blagojevich, Earl Blumenauer, Roy Blunt, Sherwood L. Boehlert, John A. Boehner, Henry Bonilla, David E. Bonior, Mary Bono, John Boozman, Robert A. Borski, Leonard L. Boswell, Rick Boucher, Allen Boyd, Kevin Brady, Robert A. Brady, Corrine Brown, Sherrod Brown, Henry E. EXECUTIVE COMMUNICATIONS, ETC.

Under clause 8 of rule XII, executive communications were taken from the Speaker's table and referred as follows:

4670. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting certification of a proposed license for the export of defense articles or defense services sold under a contract to France (Transmittal No. DTC 134-01), pursuant to 22 U.S.C. 2776(c); to the Committee on International Relations.

4671. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting certification of a proposed license for the export of defense articles or defense services sold under a contract to the United Kingdom (Transmittal No. DTC 133-01), pursuant to 22 U.S.C. 2776(c); to the Committee on International Relations.

4672. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting certification of a proposed license for the export of defense articles or defense services sold under a contract to India (Transmittal No. DTC 160-01), pursuant to 22 U.S.C. 2776(c); to the Committee on International Relations.

4673. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting certification of a proposed license for the export of defense articles or defense services sold under a contract to Japan (Transmittal No. DTC 131-01), pursuant to 22 U.S.C. 2776(c); to the Committee on International Relations.

4674. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting certification of a proposed Manufacturing License Agreement with Japan [Transmittal No. DTC 130-01], pursuant to 22 U.S.C. 2776(d); to the Committee on International Relations.

4675. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting certification of a proposed Manufacturing License Agreement with the United Kingdom [Transmittal No. DTC 139-01], pursuant to 22 U.S.C. 2776(d); to the Committee on International Relations.

4676. A letter from the Assistant Attorney General, Department of Justice, transmitting a report entitled, "Review of the Restrictions on Persons of Italian Ancestry During World War II," in accordance with Section 3 of the Wartime Violation of Italian American Civil Liberties Act, Public Law 106-451; to the Committee on the Judiciary.

4677. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Transportation, transmitting the Department's final rule—Security Zone; Lake Erie, Monroe, Michigan [CGD09-01-135] (RIN: 2115-AA97) received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4678. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Transportation, transmitting the Department's final rule—Security Zone; Lake Erie, Toledo, Ohio [CGD09-01-136] (RIN: 2115-AA97) received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4679. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Transportation, transmitting the Department's final rule—Security Zone; San Francisco Bay, San Francisco, CA [COTP San Francisco Bay 01-008] (RIN: 2115-AA97) received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4680. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Transportation, transmitting the Department's final rule—Safety and Security Zones; New York Marine Inspection Zone and Captain of the Port Zone [CGD01-01-170] (RIN: 2115-AA97) received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4681. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Transportation, transmitting the Department's final rule—Safety Zone; Lake St. Clair, Grosse Pointe Yacht Club, Grosse Point Shores, MI [CGD09-01-132] (RIN: 2115-AA97) November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4682. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Transportation, transmitting the Department's final rule—Safety and Security Zones; Newport Naval Station, Newport, RI [CGD01-01-148] (RIN: 2115-AA97) November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4683. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Transportation, transmitting the Department's final rule—Safety and Security Zones; Port of New York/New Jersey [CGD01-01-102] (RIN: 2115-AA97) November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4684. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Transportation, transmitting the Department's final rule—Drawbridge Operation Regulations; Dorchester Bay, MA [CGD01-01-142] (RIN: 2115-AE47) received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4685. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Transportation, transmitting the Department's final rule—Drawbridge Operation Regulations; Harlem River, NY [CGD01-01-157] received November 16, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4686. A letter from the Chief, Regulations and Administrative Law, USCG, Department of Transportation, transmitting the Department's final rule—Drawbridge Operation Regulations; Harlem River, Newtown Creek, NY [CGD01-01-180] (RIN: 2115-AE47) received November 19, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

4687. A letter from the Director, Office of Regulations Management, Department of Veterans' Affairs, transmitting the Department's "Major" final rule—Copayments for

Medications (RIN: 2900-AK85) received November 30, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Veterans' Affairs.

4688. A letter from the Regulations Officer, Social Security Administration, transmitting the Administration's "Major" final rule—Revised Medical Criteria for Determination of Disability, Musculoskeletal System and Related Criteria [Regulations Nos. 4 and 16] (RIN: 0960-AB01) received November 30, 2001, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Ways and Means.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. SENSENBRENNER: Committee on the Judiciary. H.R. 3030. A bill to extend the "Basic Pilot" employment verification system, and for other purposes; with amendments (Rept. 107-310 Pt. 1).

Mr. BOEHLERT: Committee on Science. H.R. 64. A bill to provide for the establishment of the position of Deputy Administrator for Science and Technology of the Environmental Protection Agency, and for other purposes; with an amendment (Rept. 107-311). Referred to the Committee of the Whole House on the State of the Union.

DISCHARGE OF COMMITTEE

Pursuant to clause 2 of rule XII the Committee on Education and the Workforce discharged from further consideration. H.R. 3030 referred to the Committee of the Whole House on the State of the Union and ordered to be printed.

DISCHARGE FROM UNION CALENDAR

Under clause 5 of rule X, the following action was taken by the Speaker:

H.R. 2481. The Committee of the Whole House on the State of the Union discharged, and referred to the Committee on Armed Services for a period ending not later than February 15, 2002, for consideration of such provisions of the bill and amendment as fall within the jurisdiction of the Committee on Armed Services pursuant to clause 1(c), rule X.

TIME LIMITATION OF REFERRED BILL

Pursuant to clause 2 of rule XII the following action was taken by the Speaker:

H.R. 3030. Referral to the Committee on Education and the Workforce extended for a period ending not later than November 30, 2001.

PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XII, public bills and resolutions were introduced and severally referred, as follows:

By Mr. TERRY:

H.R. 3387. A bill to amend the Fair Credit Reporting Act to extend the limitation on

actions, and for other purposes; to the Committee on Financial Services, and in addition to the Committee on the Judiciary, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. ENGLISH (for himself and Mr. DEUTSCH):

H.R. 3388. A bill to amend title XVIII of the Social Security Act to adjust the fee for collecting specimens for clinical diagnostic laboratory tests under the Medicare Program; to the Committee on Energy and Commerce, and in addition to the Committee on Ways and Means, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. GILCHREST:

H.R. 3389. A bill to reauthorize the National Sea Grant College Program Act, and for other purposes; to the Committee on Resources.

By Mr. SHOWS (for himself and Mr. THOMPSON of Mississippi):

H.R. 3390. A bill to provide consistent treatment of overtime, night, and holiday inspection and quarantine services performed by employees of the Department of Agriculture; to the Committee on Government Reform, and in addition to the Committee on Agriculture, for a period to be subsequently determined by the Speaker, in each case for

consideration of such provisions as fall within the jurisdiction of the committee concerned.

ADDITIONAL SPONSORS

Under clause 7 of rule XII, sponsors were added to public bills and resolutions as follows:

H.R. 13: Ms. CARSON of Indiana.
H.R. 280: Mr. ISTOOK.
H.R. 303: Mr. TOOMEY.
H.R. 488: Mr. STARK and Mr. GREENWOOD.
H.R. 656: Mr. WATKINS.
H.R. 1220: Mr. RUSH.
H.R. 1331: Mr. FLAKE.
H.R. 1405: Mrs. LOWEY.
H.R. 1543: Mr. FORD.
H.R. 1779: Mr. WAMP.
H.R. 1782: Mr. PLATTS.
H.R. 2623: Mr. UDALL of Colorado.
H.R. 2723: Mr. CLEMENT and Mrs. BONO.
H.R. 2935: Mr. GUTIERREZ and Mr. MCCOLLUM.

H.R. 2949: Mr. THOMPSON of California, Mr. PRICE of North Carolina, Mr. MCGOVERN, Mr. MATSUI, Ms. LEE, Mr. FALEOMAVAEGA, and Mr. FROST.

H.R. 3006 Mr. SOUDER.
H.R. 3046 Mr. HONDA.
H.R. 3054 Mr. HINCHEY and Mr. KINGSTON.
H.R. 3101 Mr. HOYER.
H.R. 3143 Mr. KING, Ms. BROWN of Florida, Mr. CANTOR, Mr. BOEHLERT, Mr. BOUCHER,

Mr. MCGOVERN, Ms. MCKINNEY, and Mr. RANGEL.

H.R. 3185 Mr. KING, Mr. BROWN of Ohio, Mr. SHIMKUS, and Mr. LAHOOD.

H.R. 3223 Mr. CAMP, Mr. MCINNIS, and Mr. EHRLICH.

H.R. 3230 Mr. REYNOLDS.

H.R. 3278 Mr. PAYNE.

H.R. 3352 Mr. MOLLOHAN.

H.J. Res. 6: Mr. TIERNEY.

H. Con. Res. 250: Mr. STUPAK, Mr. KILDEE, Mr. HOYER, and Mr. PLATTS.

H. Con. Res. 279: Mr. ORTIZ, Mr. BARTLETT of Maryland, Mr. WHITFIELD, Mr. CAPUANO, Ms. MCKINNEY, Mr. LANGEVIN, Mr. MORAN of Virginia, Mr. KIRK, Mr. BURTON of Indiana, Mr. ISAKSON, and Mr. BAKER.

H. Res. 298: Mr. PLATTS AND MRS. ROUKEMA.

H. Res. 300: Mr. ALLEN, Mr. GRUCCI, Mr. MASCARA, Mrs. MINK of Hawaii, Mr. TIERNEY, and Mr. MARKEY.

DISCHARGE PETITIONS— ADDITIONS OR DELETIONS

The following Members added their names to the following discharge petitions:

Petition 4, by Mr. CUNNINGHAM on House Resolution 271: Carolyn McCarthy, Charlie Norwood, Gene Green, and Patrick J. Kennedy.

EXTENSIONS OF REMARKS

HONORING THE DEDICATED
SERVICE OF LOUIS FINKEL

HON. BART GORDON

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Friday, November 30, 2001

Mr. GORDON. Mr. Speaker, I rise today to bid farewell to Louis Finkel, my legislative director. Louis has been an invaluable member of my staff for almost six years. Replacing him will be a daunting task.

Louis has mastered every task and legislative priority I have assigned to him over the years. His hard work, loyalty and dedication have been instrumental in my work as a Congressman. I, along with every other member of my staff, will miss his contribution.

Louis' insight and analysis were key ingredients in every major legislative initiative with which I have been involved over the past six years. He has helped my efforts to finance a world class system of greenways and river trails in Middle Tennessee, expand and renovate the Stones River National Battlefield, restore environmentally sensitive wetlands, and begin a critically needed commuter rail system linking Nashville, Tennessee, with the surrounding suburban and rural populations.

Louis, like many bright and talented congressional staff members, is moving on to a career in public affairs. I'm confident his career there will be as successful as his career as a congressional aide. He undoubtedly will serve his clients as well as he has served me and my constituents in Middle Tennessee. I wish him well.

HONORING J&L VINEYARDS AS AG
BUSINESS OF THE YEAR

HON. GEORGE RADANOVICH

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 30, 2001

Mr. RADANOVICH. Mr. Speaker, I rise today to recognize J&L Vineyards as Baker, Peterson & Franklin, Certified Public Accountants' Ag Business of the Year. J&L Vineyards is honored for its contributions to the ag industry and the Central San Joaquin Valley.

J&L Vineyards was selected by a committee of representatives of the AgFresno Advisory Board, National Ag Marketing Association, and the BP&F Ag Department. The family business is owned and operated by Don Laub and his daughter Debbie Jacobsen. Don's wife, Clara; son, David, daughter Diane Tavares; and Debbie's husband, Ray are also involved with the company. What began in the late 1930's as a 20-acre raisin farm has expanded to ten varieties of table, raisin, and wine grapes on 1,050 acres. J&L Vineyards has also grown beyond the Laub family to include ten full-time employees.

It is J&L Vineyards' efficiency and innovation that has earned it this recognition. These commitments can be seen by the business' integrated pest management, trellis design for table grapes, and higher yield with fewer inputs. Beyond agriculture and business, J&L Vineyards has exemplified a commitment to the community in which it has thrived. Family members have served on many boards including the Allied Grape Growers, California Foundation for Ag in the Classroom, California Women in Agriculture, and Greater Fresno Area Chamber of Commerce.

Mr. Speaker, I rise to acknowledge J&L Vineyards as the recipient of the 2001 Ag Business of the Year. I urge my colleagues to join me in honoring this company and wishing it many more years of continued success.

HONORING THE COBB COUNTY,
GEORGIA, CHAPTER OF KEEP
AMERICA BEAUTIFUL

HON. BOB BARR

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 30, 2001

Mr. BARR of Georgia. Mr. Speaker, since 1953 one organization in particular has been striving to bring communities together, by developing proactive projects that encourage responsibility for environment enhancement and encompass the values of community pride. Keep America Beautiful has become an international organization that seeks to empower our citizens, by implementing programs ranging from litter prevention to improving entire cities through training, education, and action.

Keep America Beautiful has almost 500 local, state, and international affiliates in 40 states, and is continuing to grow every day.

I stand today, to recognize Keep America Beautiful's chapter in Cobb County, Georgia, as the winner of this year's affiliate award in the category for population of more than 500,001.

Cobb County has excelled with programs such as on-line litter reporting service, the Litter Line, where residents can report illegal dumps, excessive trash, or graffiti. This initiates a faster clean-up response time, and provides a useful tracking device for area officials. Keep Cobb Beautiful also stood out with its Cobb Trees program in which over 90 trees were planted at five different sites, incorporating over 150 volunteers.

I ask my fellow Members of the House to join me in congratulating, Keep Cobb Beautiful's progress and hard work. May the example they have set for the state of Georgia and the country as a whole continue to spread.

RICK BLANKENSHIP

HON. CORRINE BROWN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 30, 2001

Ms. BROWN of Florida. Mr. Speaker, as a Floridian and a Member of Congress, I am thrilled to see that Mr. Blankenship is going to be the next Ambassador to the Commonwealth of the Bahamas. A community activist and advocate for children and local schools, I am certain he will serve our country honorably.

Mr. Blankenship's qualifications, which include over 20 years of experience in the private sector and years of work with Caribbean nations, make him a perfect fit for this position. His leadership in the area of international trade should benefit both countries, and his experience with air and port security will be a great asset at this critical time.

You know, the Bahamas is only 45 miles from the coast of Florida. My state has a special relationship with the island, as well as the Caribbean in general. And not only does the United States have close economic ties to the island, we also share ethnic and cultural ties, especially in education. And although many people outside the U.S. view us as "the ugly Americans" or "imperialists," I think that Mr. Blankenship could do a lot to improve our already friendly relations with the island. His concern for improving education and for children proves that he is a man that is concerned about people, and kids in particular. I know he will serve well as a link between our two countries.

I would like to close by once again congratulating Mr. Blankenship and wish him the best in his new position!

HONORING SOUTH SALT LAKE
MAYOR RANDY G. FITTS

HON. JIM MATHESON

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Friday, November 30, 2001

Mr. MATHESON. Mr. Speaker, I rise today to honor Mayor Randy G. Fitts for his tireless efforts in representing the City of South Salt Lake.

Mayor Fitts served on the City Council of South Salt Lake from January 1978 to December 1989, and has been Mayor since 1992. He will retire on January 7, 2002, and his leadership and diligent work have been greatly appreciated.

Throughout his tenure as a public servant, Mayor Fitts focused on issues that would increase the quality of life for the residents of South Salt Lake.

Some of the projects he worked on include completion of the Jordan River Parkway, and

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

the renovation of the historic Columbus School, by transforming it into a senior citizens center, community center, recreation center, and library.

Mayor Fitts proved to be a fiscal conservative, as well, with South Salt Lake receiving high bond ratings and awards from the Government Finance Officer's Association. He also succeeded in preventing the implementation of property tax increases.

Always active in regional efforts, he has served on many public boards and councils along the Wasatch Front, dealing with important policy issues such as transportation and public safety.

He is currently Vice-Chair of the Wasatch Front Regional Council, and a member of the Criminal Justice Advisory Committee.

He has also been President of the Salt Lake Valley Conference of Mayors and President of the Salt Lake County Council of Governments.

Mayor Fitts showed great courage and leadership in providing early public support at a critical time for light rail. Fortunately, Mayor Fitts had the vision to realize the importance of bringing mass transit to the Salt Lake Valley.

This vision continued after the North-South line from Salt Lake City to Sandy was completed. Three light-rail stops are located in South Salt Lake, and Mayor Fitts has sought to integrate the light-rail system into the community in a way that is both socially and economically beneficial.

The 3300 South Transit-Oriented Redevelopment Project is a key component of this integration. This project seeks to utilize high-density housing, commercial offices, as well as retail and community services around the light-rail station.

This project will stimulate economic growth while at the same time encourage further use of mass transit, thereby helping to prevent further sprawl in the Salt Lake Valley.

This project received the 2001 Best Achievement in Planning for Transit Oriented Development from the Utah Quality Growth Commission, as part of South Salt Lake's Light Rail Corridor Master Plan.

In addition to his professional accomplishments, Mayor Fitts is well known for his sense of humor and wit. While he took his job seriously, he did not take himself too seriously. Which has always been the mark of an effective leader and public servant.

Therefore, I am proud to join with his many admirers in extending my highest praise and congratulations to Mayor Randy Fitts for his dedicated public service to the City of South Salt Lake. I extend my most heartfelt good wishes for all his future endeavors.

INTRODUCTION OF THE MEDICARE LABORATORY SERVICES ACCESS ACT OF 2001

HON. PHIL ENGLISH

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 30, 2001

Mr. ENGLISH. Mr. Speaker, today I will introduce the Medicare Laboratory Services Access Act of 2001. I am pleased to be joined

in introducing this important legislation by my colleague from Florida, Representative PETER DEUTSCH. Laboratory testing is an essential component of the health services we provide to our seniors. The health care needs of Medicare beneficiaries require them to have assured access to the full range of diagnostic laboratory tests. This measure would help ensure that the community laboratories that serve our nation's seniors have the resources necessary to continue to provide life-saving laboratory services. This legislation also seeks to remedy a financial burden imposed by new regulations requiring safe needles and related practices.

Laboratory tests facilitate early detection and accurate diagnoses which in turn result in more effective and less costly treatment. As a majority of the currently available tests to diagnose and treat diseases in the Medicare population involve taking and analyzing a specimen—or sample—from the beneficiary for laboratory analysis, health care providers rely on the accurate and timely collection of specimens to ensure adequate diagnosis and treatment. In fact, laboratory tests only account for 1.6% of the total Medicare budget but are used in 70% of medical decision-making. Yet, underpayment for specimen collection currently threatens the ability of community laboratories to continue to provide this much-needed service.

In 1984, Congress established a policy to provide for a "nominal fee" that was to cover the costs associated with collecting the sample on which a clinical diagnostic laboratory test was performed and paid for under the Medicare program. That fee was established 17 years ago at a rate of \$3.00 and has not been increased, even for inflationary factors since that time.

Our nation has seen amazing medical breakthroughs in technology while simultaneously the environments in which health care providers work has become more and more regulated. Further exacerbating the pressures on laboratories is that the available population of phlebotomists—the folks trained to draw blood—continues to shrink.

The combination of increasing costs, eroding reimbursement levels, fewer available health care workers with a growing population of Medicare beneficiaries threatens the Medicare program's ongoing ability to provide essential laboratory services, especially in rural areas and remote sites such as nursing homes. In January 2001, the Occupational Safety and Health Administration (OSHA) implemented new blood borne pathogen rules designed to improve worker safety. Yet, no additional funds have been provided to implement these requirements.

While I fully support new requirements for hospitals and other health-care facilities to identify and provide safer sharps systems as these policies help protect public health, we need to assist laboratories with these additional costs. This legislation would provide a modest increase in the specimen collection fee—an increase that would help offset the costs of these important new regulations and recognize inflationary increases over the past 17 years.

The Medicare Laboratory Services Access Act of 2001 increases the Medicare specimen

collection payment for FY 2002 to \$5.25—the amount the payment would be today had it been indexed annually to the CPI-U. For subsequent years, the bill allows for an annual adjustment based on the CPI-U.

I urge my colleagues to join us in the effort to bolster our community-based system of care for Medicare beneficiaries. I am pleased that my bill is supported by a number of national organizations, including the leading providers of clinical laboratory services. Groups endorsing this legislation include: American Association of Bioanalysts, the American Association for Clinical Chemists, the American Association of Occupational Health Nurses, the American Clinical Laboratory Association, the American Medical Technologists, the American Society for Clinical Laboratory Science, the American Society of Clinical Pathologists, the American Society for Microbiology, Becton Dickinson, and Quest Diagnostics. This important measure will help ensure Medicare beneficiaries access to the quality laboratory services they need and deserve.

HONORING THE GOOD DEED OF JUSTIN BRAMEL

HON. BART GORDON

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Friday, November 30, 2001

Mr. GORDON. Mr. Speaker, I rise today to recognize the good deed of Justin Bramel, a Murfreesboro, Tennessee, eighth-grade student who helped his school bus driver in her time of need.

Justin's bus driver, Sally Brown, became sick one recent afternoon after finishing her route. Fortunately for Mrs. Brown, Justin spotted the bus parked on the side of a road. He realized something was wrong and investigated the situation. He found Mrs. Brown to be very ill.

Justin calmly used the bus transceiver to advise school officials about the situation and direct emergency personnel to the location. Thanks to Justin's concern and levelheaded actions, Mrs. Brown is now recovering and should be back to work soon.

I want to salute Justin for his quick actions and his concern for his fellow human being. People like Justin epitomize the spirit of this nation and make it a better place to live.

COMMEMORATING 2001 DINNER OF CHAMPIONS

HON. GEORGE RADANOVICH

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 30, 2001

Mr. RADANOVICH. Mr. Speaker, I rise today to celebrate the 2001 Dinner of Champions being put on by the Central California Branch of the Mountain Valley California Chapter of the National Multiple Sclerosis Society. The first of these annual events will honor racing legends Blackie Gejeian, Joe Boghosian, and the late Fred Gerhardt.

The Dinner of Champions made its national debut in 1972 and honors local public leaders and personalities for their efforts to champion the fight against multiple sclerosis. The National MS Society strives to reach out to those affected by the crippling disease and raise awareness for MS.

Mr. Gejeian's involvement in racing began in 1949 and he won championships all over the Central Valley. Blackie was presented the Most Popular Driver award four years in a row. After his retirement in 1958, Blackie continues contributing to racing by promoting auto races including the Autorama for the past 40 years.

Mr. Boghosian was first exposed to racing in 1949. He earned many honors including the Northern California Championship. In 1965 he moved from California to Indianapolis. Joe actually built the engine that put Mario Andretti in the Indy 500 winner's circle in 1969. He is still building engines and anything else that needs reliable power today.

Mr. Gerhardt was involved in auto racing from the 1930's until his passing. He and his good friend, the late Bill Vukovich, raced hot rods and midget cars in the 1930's and 40's. Fred built his first Indy car in 1956 and continued fielding Indy cars through 1976.

Mr. Speaker, I am privileged to acknowledge and honor the efforts of the National Multiple Sclerosis Society and these honorees. I invite my colleagues to join me in congratulating and thanking this organization and these racing legends.

BUNNY LOVE FOUNDATION

HON. PETE SESSIONS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 30, 2001

Mr. SESSIONS. Mr. Speaker, today I would like to recognize the Bunny Love Foundation. An event will be held on December 5th in Dallas, to raise the level of awareness of efforts to eliminate domestic violence against children. Awareness will be accomplished through fundraising efforts, affiliations with prevention programs, and events designed to educate the public about the extent of the crisis.

The Bunny Love Foundation is a Dallas-based non-profit organization founded in 1997 by Anne Davidson with a mission of helping children in need. The Foundation's model for giving is extremely effective and can be used as a model for other charities because it addresses the needs of those affected not only on a local level, but nationally and globally as well. Ninety percent of the funds raised will go to children in Dallas through the Dallas Children's Advocacy Center, and 10% will be given to UNICEF specifically for the humanitarian effort for children in Afghanistan.

I hope that my colleagues will join me in recognizing the dedication and efforts of the Bunny Love Foundation and their partnership with the Dallas Children's Advocacy Center. The mission of this organization serves as a model for others to follow in the fight to eliminate domestic abuse.

BIOLUMINESCENCE

HON. MARK FOLEY

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 30, 2001

Mr. FOLEY. Mr. Speaker, I would like to express my appreciation to the chairman for his recommendation of funding for bioluminescence measurement and signature detection in the Navy RDT&E account in this bill.

This is an evolving area of knowledge which has very important military applications.

Many of my colleagues know that plankton in the world's oceans give off light flashes when stimulated by movement in the water by objects such as ships, submarines and swimmers. This ever-present phenomenon represents a powerful detection tool for anti-submarine and mine warfare.

We can utilize this phenomenon for detection of opposing forces—but we must also be aware of it to protect our own operations. For example—it is my understanding that—a Navy SEAL team in Operation Desert Storm was forced to alter its landing site because of concern that bioluminescence in the intended landing area would reveal the team's presence.

At present—bioluminescence is detected and measured by a device developed at the Harbor Branch Oceanographic Institution in my district.

Because of the cost and size of this first-generation measuring equipment—only three have been produced. The funding I have requested and the Committee has approved would fund a program involving Harbor Branch scientists which would develop measuring equipment small enough to be launched from a rubber raft and inexpensive enough to be utilized in large numbers. Only such an expendable version offers the hope of accurately measuring bioluminescence in all the militarily-important regions of the world.

This is an important initiative which will take advantage of the expertise at Harbor Branch for the benefit of our military.

I again thank the chairman for recommending this funding and express my hope that this item will be preserved in conference.

THE CONSUMER AND RETAIL SALES STIMULUS ACT OF 2001

HON. STEVE ISRAEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, November 30, 2001

Mr. ISRAEL. Mr. Speaker, New York's economy is in deep trouble. We lead dozens of States in economic decline. Jobs are being lost. Small businesses are going under. Municipal governments are going back into debt. Fire and police budgets are strained.

How do we stimulate an economy that was sputtering before and staggered after the September 11 attacks? Some believe the answer to recession in handing \$25 billion in retroactive Federal corporate tax benefits to 13 Fortune 500 companies. Of course, there is no guarantee that largesse will work its way from

corporate headquarters to working families on Long Island.

Others believe that the answer to recession is spending old fashioned Keynesian economics. But some spending proposals clearly overreach, and there is no guarantee that the spending will be targeted specifically to jumpstart the economy now, when we most need it.

The best way to stimulate the economy is to give immediate, tangible tax relief to American consumers: suspend sales taxes, and use federal resources to reimburse state and local governments. To insure that this tax reduction strategy does not lead to huge new deficits, such revenue loss from the Federal budget should be capped so as not to exceed the \$25 billion, the corporate alternative minimum tax rebate, passed by the House of Representatives earlier this fall.

Rather than enriching only the richest, a sales tax suspension is the quickest and broadest way to boost local economies for everyone, across the board. It will encourage consumer spending in our downtown villages and towns as well as our regional malls. And because it will be temporary, it will create an incentive to buy now. A reduction in the sales tax may not mean much for the CEO of a multi national company. But it would be a huge boost to working families. It might help them with their holiday purchases, or school supplies for their kids or even make the difference in buying a new home appliance.

This House has just approved a \$25 billion retroactive repeal of the alternative minimum tax for the richest corporations of America. If we can find the money for Enron and we can find the money for IBM, we should be able to find the money for people who have lost their jobs and their health insurance and their unemployment insurance and the small businesses who are being forced out of business in New York today.

The working families and small businesses on Long Island are hurting. They can not afford indefinite or problematic relief that might not kick in for years. Their need is immediate "The Consumer and Retail Sales Stimulus Act of 2001" addresses that need, it addresses it now.

DEPARTMENT OF DEFENSE APPROPRIATIONS ACT, 2002

SPEECH OF

HON. JERRY F. COSTELLO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 28, 2001

The House in Committee of the Whole House on the State of the Union had under consideration the bill (H.R. 3338) making appropriations for the Department of Defense for the fiscal year ending September 30, 2002, and for other purposes:

Mr. COSTELLO. Mr. Chairman, I rise today in support of the amendment offered by my good friend Congressman VISCLOSKEY.

Mr. Speaker, our Nation's steel industry is in a crisis situation. Since 1997, 26 companies have filed for bankruptcy. Since January first

of this year, 13 companies have filed for bankruptcy, and 11 have ceased operations, including Laclede Steel, which is located in the congressional district I represent.

Steel is the basic component used in the construction of every military vehicle, ship, weaponry system, and small firearm used by the U.S. military. Steel is used to build our bridges and our railroad tracks. Both the electric power and oil and gas industries are dependent on steel. America needs a strong steel industry.

Earlier this year, I testified before the International Trade Commission and asked them to find that the domestic steel industry has been severely injured by the surge of foreign imports into American markets. Under section 201 of the trade laws, the International Trade Commission found that steel industry had been damaged by foreign imports. The section 201 process will give our steel companies time to restructure and reorganize in response to the effects of the recent import surge.

Currently, there are nearly 2 million Americans who are directly or indirectly employed by the steel industry, or receive pensions and healthcare from current and former steel companies. Because of the current crisis situation in the industry, the \$1 billion that the steel companies spend annually on retiree health care is a significant impediment to the mergers and acquisitions that will need to occur for the steel industry to right itself.

This amendment would create a Steel Industry Legacy Relief Program to provide assistance to steel producers in meeting retiree health care costs. The program would be established in and administered by the Department of Labor.

The establishment of the Steel Industry Legacy Relief Program will go a long way in supporting our domestic steel industry in a time that we need it most. The steel industry is vital to our national defense, and especially now, we cannot afford to become dependent on foreign steel. I strongly support the establishment of this program in order to save the steel industry in this great Nation. I urge my colleagues to join me in supporting this amendment.

DEPARTMENT OF DEFENSE
APPROPRIATIONS ACT, 2002

SPEECH OF

HON. ALBERT RUSSELL WYNN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 28, 2001

The House in Committee of the Whole House on the State of the Union had under consideration the bill (H.R. 3338) making appropriations for the Department of Defense for the fiscal year ending September 30, 2002, and for other purposes:

Mr. WYNN. Mr. Chairman, I rise today in opposition to the rule to H.R. 3338, the Defense Appropriations bill. The rule precludes the House from considering the Obey amendment, which would provide needed increased funding for homeland security. While the underlying bill does increase funding for homeland security, it simply does not go far enough. It is homeland security on the cheap.

The rule precludes the Obey amendment, which, among other things, would provide \$150 million in grants for local firefighting units. In addition, the bill does not provide adequate funding to help local governments meet their increased police and emergency personnel needs since September 11th. This rule does not allow for increased funding for local law enforcement that is critical for the protection of Americans across the country.

Since September 11th, local governments have been carrying most of the burden of responding to the increased security and emergency needs of our citizens that include: periodic lengthened shifts, additional patrols at sensitive facilities and structures, and responding to the growing number of false alarms and hoaxes. This results in a higher rate of overtime for governments in order to pay for security and emergency personnel. These important responsibilities fall on local governments who had tight budgets prior to September 11th. Now they are even tighter. The federal government must provide aid to local governments to insure that our first responders remain one of our strongest links.

Moreover, the bill does not provide any additional funds to increase port security. The Obey amendment would have provided an additional \$200 million in grants for port security upgrades. We must provide security measures at seaports to prevent the shipment of bombs and weapons of mass destruction through our seaports.

The bill does not provide increased funding to secure our vitally important Strategic Petroleum Reserves. The Obey Amendment would have provided \$5 million to secure our petroleum reserves. Several weeks ago, with the Administration's support, Congress passed a resolution urging the Secretary of Energy to fill the Strategic Petroleum Reserve to its full capacity. It defies logic for us to spend the money filling this vital reserve without securing the facilities that store the petroleum.

As we address threats on our homefront, we should also be fully prepared to fight an asymmetric war abroad. We must, therefore, take all steps necessary to reduce U.S. casualties, which requires minimizing incidents of friendly fire. The Automatic Acoustic Target Recognition programs, not fully funded in the bill, involves the identification of aircraft and vehicles by the background acoustic signature obtained from intercepted radio transmissions or proximate ground sensors. The program contributes to the detection of troop and vehicle movements, the proper identification of aircraft and vehicles to prioritize fire control and to prevent friendly fire casualties. When this bill goes to conference, I urge the conferees to do everything they can to save the lives of U.S. military troops and fully fund this program.

I urge my colleagues to reject the rule. We must not fund the war against terrorism on the cheap. We must recognize our needs at home and abroad and that means adequately assisting local first responders, securing our vital resources, securing our ports, and minimizing the loss of U.S. military personnel.

MAKING SURE PAINFUL STORIES
ARE TOLD JUST ONCE

HON. SAM JOHNSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 30, 2001

Mr. SAM JOHNSON of Texas. Mr. Speaker, it is important for me to bring this informative article to the attention of the U.S. Congress.

[From the New York Times, Nov. 12, 2001]

MAKING SURE PAINFUL STORIES ARE TOLD
JUST ONCE

(By Donna Wilkinson)

Name: Collin County Children's Advocacy Center.

Founded: 1992, in Plano, Tex.

Mission: To help children cope with the trauma of abuse through a team approach—an alliance of law enforcement agencies, child protection services, legal and medical professionals—to investigate, treat and prosecute abuse cases.

Constituency: Children under 18. Collin County, including several suburban and rural communities outside Dallas, has a population of about 500,000. Last year, the center received 2,488 referrals of child abuse; since it opened, it has served 8,000 children.

Financing: Most of the \$1.4 million annual budget comes from charities, foundations and corporations: the United Way, Meadows Foundation, Genesis Foundation, B. B. Owen Trust, Texas Instruments and State Farm Insurance. The rest is from the Guardian Angels Society, a local group of individuals and religious and civic organizations who pledge \$1,000 a year for five years.

The center was inspired by the ideas of Representative Bud Cramer, Democrat of Alabama, who, as a district attorney in Huntsville in the 1980's, found that children were being revictimized by a system that was intended to protect them. Often bounced from one agency to another, youngsters had to repeat painful experiences to police, doctors, social workers and others, compromising evidence and traumatizing them again. Representative Cramer had proposed creating one central place where children could tell their stories.

Besides filling that role, the center, which is located in a colorful 32,000-square-foot former supermarket, provides the children with immediate access to child protection services, law enforcement officials, district attorneys, sexual assault nurse examiners, therapists and community resource representatives who all work together under one roof.

Attending to young victims requires special considerations. "Almost 70 percent of the children we see are under the age of 7," said Jane Donovan, the center's community educator. "When you ask a child that age a story over and over, the story changes." To protect the integrity of testimony for evidence, each child is interviewed by a forensic specialist and videotaped.

What distinguishes the center is the partnerships among various services. "Traditionally, there has been some contentiousness between child protective agencies and law enforcement," Ms. Donovan said. "At our center, that just flat out doesn't exist."

The center is not a residential facility, but placement is arranged when a child's safety at home is in question.

"We talk to our kids about 'stranger danger,' but the reality is, 96 percent of the children we see know their abuser," Ms. Donovan said. "Our goal is to help children deal

November 30, 2001

with the trauma of abuse by empowering them to become survivors rather than remain victims."

IN MEMORY OF JANE MAYER

HON. SAM FARR

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 30, 2001

Mr. FARR of California. Mr. Speaker, today I rise with great sorrow to pay tribute to a wonderful woman, a community activist and wife of internationally known writer, journalist and lecturer, the late Milton Mayer. His wife Jane died recently in Carmel, California where I live.

Jane Mayer was like a second mother to me and my sisters Francesca and Nancy. She was born in Joplin, MO, and grew up in Seattle, Washington before moving to Carmel where she lived for the past 50 years.

A dedicated activist she studied at the University of Washington before beginning a 10-year career in fashion where she became a lecturer and consultant. Appearing at Universities and Colleges across the country and numerous radio programs.

She married Robert Scully in 1940 and later in 1947 married Milton Mayer known to local kids as Uncle Milt. Together they produced the Voices of Europe radio broadcasts, which included commentary of the events of the time by people throughout Europe. For many years they co-led Great Books Discussion Seminars in both America and Europe.

Jane and Milton were life long civil libertarians and pacifists, fighting intolerance, bigotry, racism and overzealous nationalism. Jane was an activist for peace and disarmament during the Cold War, representing the American Friends Service Committee to the World Council of Churches and at many international peace conferences.

Jane Mayer adopted Carmel-By-The-Sea as the city to protect from commercial exploitation. She was a tireless advocate for the conservation of Carmel's unique character, becoming founding member of the Carmel Residents Association and member of the Carmel General Plan Committee, the Historic Preservation Committee and board member of the Cherry Foundation.

I grew up with her two sons Rock and Dicken Scully and knew her two step daughters Julie Mayer Vogman of Berkeley and Amanda Mayer Stinchecum of Brooklyn, N.Y.

Her son Rock Scully became the first manager of the Grateful Dead band and son Dicken a popular and respected psychologist. Both sons now live in Carmel, her husband Milton died in 1986.

Jane lived her life as a teacher of good—and in doing so empowered others to fight against the ignorance of intolerance and unjust laws. She taught by example and by introducing American youth to cross-cultural experiences. My one summer in Europe in 1958 along with her sons Rock and Dicken, Frank Wallace, Adrian Benett and Ann McConnel led us all, five years later to apply for the Peace Corps. That experience led me into public service and now a Member of this House. So

EXTENSIONS OF REMARKS

it is with great sadness that I submit this tribute to Jane S. Mayer, truly a woman who made a difference in people's lives.

IN HONOR OF MICHAEL J. DOOLEY

HON. ROBERT A. BORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 30, 2001

Mr. BORSKI. Mr. Speaker, I rise today in honor of Michael J. Dooley, a life-long friend to myself and Philadelphia, upon his retirement.

Mr. Dooley will retire after 22 years as Business Manager of the Local 454 Piledrivers Union. He served on the Metropolitan Regional Council of Carpenters in Philadelphia. Mike born and raised in Philadelphia, Pennsylvania, received his schooling from distinguished Philadelphia establishments and used his education and experience to accomplish remarkable feats for fellow union workers.

Mike attended Saint Joseph's Preparatory School and graduated from Drexel University with a degree in Construction Management. He continued his education receiving a Master's Degree from Temple University in Vocational Education. Immediately after his studies, he began work in his Local Union as an Apprentice, climbing to Journeyman status, then Apprentice Teacher, then finally elected Business Manager of the Piledrivers Union in 1979.

During these past 22 years, Mike has been the Delegate representing his Union in Building Trade Councils. He has also been a Labor Trustee for the Carpenters Health and Welfare Fund and the Carpenters Joint Apprenticeship Committee.

Mike sculpted his fellow union members into a focused, united, and vigorous body. This man negotiated the first ever Seven-Year Agreement for a Building Trades contract in the industry. Mike would be most proud of creating the Scholarship Program awarding \$335,400 to union members' sons and daughters.

With all of his accomplishments, Mike still maintains the greatest modesty. With his natural ability and education, obviously Mike could have gathered a sizeable purse over the years in a different career, but he chose to improve the lives of union members. There are show horses and work horses, and Mike has been the man to always pull more than his weight in work and accomplishes his tasks without asking for a thank you. He has only taken 4 weeks vacation in his 22 years of service.

The number of people he has assisted—myself included—quietly throughout the years may never be known, but is surely massive in number. Mike will head into retirement in the next month, accompanied by Lynn, his wife of 28 years.

Mr. Speaker, I would like to mention that Mike Dooley served his community and neighbors honestly and fully throughout his life. I salute him and thank him for his friendship.

23687

ECO-TERRORISM

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Friday, November 30, 2001

Mr. McINNIS. Mr. Speaker, I would like to read into the RECORD a response I received yesterday to a letter my colleagues and I sent to national environmental groups, asking them to join us in publicly condemning eco-terrorism. A few days ago I read into the Record a letter from the Natural Resources Defense Council stating that "violence has no place in policy debate."

I would like to share with you statements from the Sierra Club. The following is their response:

DEAR CHAIRMAN HANSEN, I am surprised you have not seen the Sierra Club's denunciations of terrorist acts given our frequently and clearly stated position. The Sierra Club condemns all violent acts, including those in the name of the environment. As the enclosure documents, even the Earth Liberation Front that you mention in your letter has chronicled Sierra Club denunciations of their violent acts that appeared in various national and local news publications.

While nonviolent civil disobedience has a distinguished place in American history, the Sierra Club uses only lawful means to protect the environment. We can respect the decision of those who, by undertaking acts of nonviolent civil disobedience, put themselves at risk, but peaceful disobedience and violence are vastly different acts. No matter what the motivation, the Sierra Club does not condone any acts of violence.

Sincerely,

JENNIFER FERENSTEIN,
President.

HONORING NAT GEIER

HON. PETER DEUTSCH

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 30, 2001

Mr. DEUTSCH. Mr. Speaker, I rise today to honor Nat Geier, a distinguished citizen of Sunrise, Florida who has devoted himself to improving the South Florida community over the last three decades. Through numerous citizen campaigns, Mr. Geier was the engine of improvement in strengthening the Broward County community. It brings me great sadness to report that Nat Geier passed away on Saturday, November 24, 2001, at the age of 91.

Born in Poland in 1911, Nat immigrated to America at the age of nine. He left the New York City School system at age 13 to find employment in the garment business cutting material. The young man learned quickly, worked hard and rose up in the ranks. After a successful career in New York, Nat followed his dream to relocate to South Florida.

An early resident of the now well-developed area of South Florida, he always understood that homeownership is the anchor of all communities; it gives residents long-term investment in the quality of their surroundings. For this reason, Nat set out two decades ago to

educate Broward residents of the importance of the "Homestead Exemption" rules, which encourage homeownership and community enhancement while functioning within the Florida tax codes. Nat's efforts brought the benefits of these rules to thousands of Florida homeowners and helped to build the strong and lasting communities thriving in Broward County today.

Upon retirement from the garment industry, Nat reinvented himself as a social and community activist. Understanding the importance of a earning a good, solid education Mr. Geier consistently supported Broward County

Schools in their efforts to provide young residents with a quality education and opportunities for success. A shining example, Nat collected more than \$750,000 in grocery receipts in 1990 to help purchase a local high school's first computer. The same year, Nat was inducted into the Broward Senior Hall of Fame.

Throughout his thirty years in South Florida, Nat remained active in a number of citizen organizations including the Citizens Community Information Council, the Sunrise Consumer Affairs Committee, the Sunrise Code Enforcement Board and the Community Blood Center.

Mr. Speaker, Nat Geier was both well-loved and widely respected by all those blessed to have known him. He is survived by his son and daughter, Joel Geier and Caryle Perlman of Chicago; stepsons Leon Silverstein of New York and Jay Silverstein of Los Angeles; stepdaughter Ilene Silverstein of New York; six grandchildren; and five great-grandchildren. Nat selflessly served his community and his family was a source of admiration and great pride. Today we celebrate Nat's life, which serves as a wonderful example to all who follow in his footsteps.

SENATE—Monday, December 3, 2001

The House was not in session today. Its next meeting will be held on Tuesday, December 4, 2001, at 12:30 p.m.

The Senate met at 1 p.m. and was called to order by the Honorable JEFF BINGAMAN, a Senator from the State of New Mexico.

PRAYER

The Chaplain, Dr. Lloyd John Ogilvie, offered the following prayer:

Almighty God, we do not need to ask to come into Your presence for You have been ever-present through our nights and days. We never need shout across the spaces to You as an absent God. You are nearer than our own souls, closer than our most secret thoughts. We need not inform You of our requests, for You are omniscient. We do not need to brief You on the alternative possibilities for this week's decisions, for You already know what is in keeping with Your best for us and will reveal that if we ask You. What we do need is to linger in Your presence until we are assured of Your love, regain true security, and are refortified by Your strength. Thank You for using this time of prayer with You to show us Your faithfulness and to receive Your guidance.

In Scripture, You call us to pray for the peace of Jerusalem. We do that this afternoon with the vivid pictures of the mall terrorist attack: jarring explosions, heart-breaking deaths and injuries, and the wail of sirens. Grant us Your strength in the battle with the evil of terrorism. Bless the President and Congress as they seek Your power both to complete the war in Afghanistan and to strategize with negotiations in the Middle East as a whole. Help us, dear God; we need You. You are our Lord and Saviour. Amen.

PLEDGE OF ALLEGIANCE

The Honorable JEFF BINGAMAN led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. BYRD).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, December 3, 2001.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable JEFF BINGAMAN, a Senator from the State of New Mexico, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. BINGAMAN thereupon assumed the chair as Acting President pro tempore.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of morning business not to extend beyond the hour of 4:45 p.m., with Senators permitted to speak therein for up to 10 minutes each, with the time equally divided between the two leaders or their designees.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

SCHEDULE

Mr. DASCHLE. Mr. President, the Senate will be in a period for morning business until 4:45 p.m., with the time equally divided between the two leaders or their designees. At 4:45 p.m., the Senate will resume consideration of the Railroad Retirement Act. There will be 30 minutes of debate prior to a 5:15 p.m. cloture vote on the Lott amendment. If cloture is not invoked on the Lott amendment, a second cloture vote will occur on the Daschle substitute amendment. As a reminder, all second-degree amendments must be filed prior to 4:15 p.m.

MEASURES PLACED ON THE CALENDAR—H.R. 3210 AND S. 1748

Mr. DASCHLE. Mr. President, I understand that the following bills are at the desk, having been read the first time: H.R. 3210 and S. 1748.

The ACTING PRESIDENT pro tempore. The majority leader is correct.

Mr. DASCHLE. Mr. President, I ask unanimous consent that it be in order

en bloc for these two bills to receive a second reading. I would then object to any further consideration.

The ACTING PRESIDENT pro tempore. The clerk will read the title of the bills for a second time.

The legislative clerk read as follows:

A bill (H.R. 3210) to ensure the continued financial capacity of insurers to provide coverage for risks from terrorism.

A bill (S. 1748) to promote the stabilization of the economy by encouraging financial institutions to continue to support economic development, including development in urban areas, through the provision of affordable insurance coverage against acts of terrorism, and for other purposes.

The ACTING PRESIDENT pro tempore. Objection having been heard, both bills will be placed on the calendar.

Mr. DASCHLE. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ISSUES BEFORE THE SENATE

Mr. REID. Mr. President, the order before the Senate is that until quarter to 5 today, we are going to spend time talking about matters before the Senate. The two issues about which we are going to vote deal not with the railroad retirement, but rather with a moratorium on cloning and, in addition to that, legislation dealing with energy.

The Presiding Officer, of course, has spent a good part of his life, especially the last several months, coming up with legislation on energy for this country.

I have worked with the Presiding Officer in his capacity as chairman of the Energy Committee on a number of occasions. Of course, I, as most everyone else in the Senate, am impressed with his ability to understand issues.

Rather than moving forward on legislation in the normal fashion, we are now going to deal with this issue in a piecemeal fashion.

The majority leader has said we should have a full and complete debate on this issue. He has stated we could take this matter up before the month of February of next year, but prior to the President's Day recess. We would have a debate, have the legislation before the Senate, have the Republicans' proposal and the Democrats' proposal,

and move forward on this legislation in the normal manner.

It appears they cannot take yes for an answer. They have said they want a definite time. The majority leader said they have that definite time. It is clear this is not an effort to get an energy bill, but rather to slow down what we are trying to do; namely, the railroad retirement bill.

I think everyone in the country acknowledges we should have an energy policy and that is why we should have a time set aside to do an energy bill, but I am sorry to say this appears to be an effort to kill something that is extremely important to lots of people in America today; that is, management and labor on the railroad retirement bill.

In an effort to save face for the 74 people who have cosponsored this, a number of people are saying: We like the railroad retirement bill, but not now; we will do it some other time.

Remember, it has passed the House. I believe the vote in the House was 380 in favor and a few against. In the Senate, we have 74 cosponsors. This should be a lesson on how to move legislation, but it is a lesson on how not to move legislation. So I certainly hope we can move forward on the railroad retirement bill, get rid of this extraneous material at the earliest possible date.

I oppose the Lott amendment for a variety of reasons. I will focus for a moment on the issue of jobs. We have heard some Senators speak about the job implications of drilling for oil in the Arctic National Wildlife Refuge. I understand, without any question, Senator MURKOWSKI and how important he believes this is for his State. It is important for his State because there is no question that drilling in ANWR would create jobs. That is important for Alaska, which really needs jobs. The other oil they have is winding down, and they want not only the ongoing jobs with the oil they have, with any field that has been demonstrated, but also the exploration and development would mean thousands of jobs.

I appreciate Senator MURKOWSKI feeling about this the way he does, but in spite of his strong feelings, it is still wrong. As I have indicated, the railroad employees and the unions and management oppose the Lott amendment. I will list a few examples of those unions. We could have other organizations also who oppose the Lott amendment. For example, we have lots and lots of environmental groups. I do not think there is an environmental group in America that supports what Senator LOTT and Senator MURKOWSKI are trying to do.

My friend from Alaska, the distinguished junior Senator, has given the impression organized labor wants this in the worst way, but these are the unions that oppose the Lott amendment: The Association of American

Railroads opposes the Lott amendment; American Shortline and Regional Railroad Association; Family Railroad Organization; National Association of Retired Veteran Railway Employees; American Train Dispatchers; Boilermakers and Blacksmiths; International Brotherhood of Locomotive Engineers; Brotherhood of Railroad Signalmen; Firemen and Oilers; Service Employees International Union, known as the SEIU; Hotel Employees; Restaurants Employees; International Association of Machinists; International Brotherhood of Electrical Workers; Ironworkers Union; Seafarers International Union; Sheetmetal Workers International; Transportation Communications International Union; Transport Workers Union; United Transportation Union. Each of these unions is urging the Senate to vote against the Lott cloture motion on amendment No. 2171 which adds energy and cloning legislation to the railroad retirement bill. They know if this is attached, the bill is dead.

Some argue opening up ANWR to oil development would be a great economic stimulus. As we know, the job numbers thrown around have been grossly exaggerated. CRS estimates job creation from ANWR might be about 60,000, but could go higher than that. Again, this assumes jobs are not shifted from the Gulf of Mexico or the Rocky Mountain region.

I agree, however, that creating jobs is very important given that our country has been in recession since March. As I noted last week, there are better ways to create jobs than by exploring, and some say exploiting, the National Wildlife Refuge.

For example, construction of an arctic natural gas pipeline would create between 350,000 to 400,000 jobs in steel production, pipe manufacturing, trucking and shipping, and construction jobs for 3 to 4 years assembling the pipe. This pipeline would be a mammoth project, requiring four times as much steel as used for all the cars produced globally in 1999.

The potential natural gas resources could supply the American market for 50 to 60 years as compared to the oil from ANWR which might yield 6 months' worth of America's petroleum supply.

There are other reasons, all of which are good, to oppose the energy provisions in the Lott amendment—and we are going to vote on this matter very shortly—but there is no reason to sacrifice the financial security of these retirees who have an interest in the railroad retirement bill—not only the retirees but the widows who would benefit.

Sadly, those who are pushing the Lott amendment are working against the hard-working Americans who have retired from the railroads around our

country and, of course, the widows of those hard-working railroad workers. So I hope we will defeat soundly the Lott amendment.

Also, I have mentioned the provision dealing with the Arctic National Wildlife Refuge. I was in Las Vegas over the weekend, and somebody I had not seen in several decades, somebody I used to go to high school with, came up to me. We had not seen each other but, I, of course, recognized him in a second: Claude, how are you? He said: I am fine.

I know his family. It is a very conservative family. He said: I want you to know you have to do everything you can to make sure we can go forward with therapeutic cloning. Those were his words. Stem cell research.

Why did he care? Because he has two diabetic children, and it is genetic; he believes there is hope. He is someone who has worked with his hands all his life and does not have a scientific mind. His hope comes from his heart, but hope is coming from the minds of people who are scientists. They believe therapeutic cloning could be the breakthrough for diabetes, Parkinson's, Alzheimer's, and many of these other dread diseases.

If we could find a cure for the three diseases I mentioned, not only would it be the right thing to do for the families and the individuals with these diseases, but it would also be an economic boon to this country that would be unsurpassed. That people are in institutions because of Alzheimer's is really a drag on the economy of this country.

So I hope there will be a resounding vote to make sure we do not go forward on this legislation attached regarding ANWR and cloning. I am in favor of therapeutic cloning.

Maybe the word is wrong, "cloning." We had scientists who came and talked to us last Thursday. Maybe it is the wrong use of words, but that is what has developed in the vernacular we are using. Scientists believe they need to go forward so they can do the stem cell research unfettered. Frankly, if we do not do it, it is going to happen somewhere else anyway. Other countries are going to do it. So we who lead the world in scientific endeavors should make sure we also lead the endeavors regarding therapeutic cloning.

The ACTING PRESIDENT pro tempore. The Senator has used 10 minutes.

Mr. REID. I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ENERGY BILL

Mr. REID. Mr. President, we focused on the energy bill the Republicans put forth and on ANWR, but there are other problems with the bill. Time is short and we cannot spend too much time on it. For example, one of the things that bill does not have included is vehicle fuel efficiency. It failed to provide an increase in fuel efficiency standards for light trucks, sport utility vehicles, and minivans. I think it should provide additional standards for passenger automobiles in general.

Dealing with just light trucks, sport utility vehicles, and minivans, the provisions would reduce overall national gasoline usage by 1 percent. Closing the SUV loophole would substantially reduce air pollution, greenhouse gas emissions, and save consumers billions at the gas pump each year. The current standard established in 1989 is 27.5 miles for passenger automobiles, sports utility vehicles, SUVs, and minivans. A much larger increase in fuel efficiency would be paid for. I have no doubt that is the case in future fuel savings. That is something not addressed in the bill.

Also in the bill they provide \$33.5 billion over 10 years in tax breaks for electric utilities and oil and natural gas exploration. No offset was provided for the additional tax breaks, and only 17 percent is for energy efficiency and 83 percent for fossil fuels and nuclear power. While from a strict policy standpoint this is not good, from the sense that we need not give them any more tax breaks than they have, even if you disagree with that statement, you should be concerned about the fact there is no offset for the tax breaks. Further, over 10 years, this is adding \$33.5 billion in deficit spending for our country.

We have to be very careful. There are many problems with this legislation. It is more than the arctic wilderness. We have focused on that. They are weakening environmental protections and drilling in national forests. There are a number of things we cannot lose sight of that include more than just the national arctic wilderness.

I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. REID. I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. REID. I ask during this quorum call that the time be charged equally against both sides.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BURNS. Mr. President, I ask unanimous consent the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

SENATE WORK

Mr. BURNS. Mr. President, we continue to hear in the Senate a powerful argument put forth by the assistant majority leader. Yet I am struck by the idea the Railroad Retirement Act under consideration now is a given. There are 70 cosponsors on that piece of legislation; I am one of the cosponsors. Yet we are also denied the ability to move an energy policy act that the Nation is demanding, as well as a stimulus package which, again, the Nation favors.

I challenge my colleagues and Americans by asking why just a few can deny a State such as Alaska its ability to develop and market its own natural resources, not only for the good of the economy of Alaska but also at a time when this Nation's economy is struggling and it would contribute to the rebuilding of that economy. I find that disheartening. This is important.

The season of Christmas is fast approaching. We should be finishing up our work. There are two things that have to be done: Finish the appropriations process to run this Government, and also develop an appropriation for our military in a time we are at war. By the way, this is a war that will not be won at Camp Pendleton, Fort Bragg, or any other military installation, but will be won in every community around this country. Yet the military now is carrying the load to destroy the core of terrorism.

Why deny those resources when just across the border, in the tundra—and one must remember, this is not a pristine wilderness when we talk about ANWR, as one might envision wilderness in my State of Montana where we already have 3.5 million acres. This is tundra. It runs for miles and miles and miles. It can be developed to the advantage of this country and to its economy without disturbing hardly anything that far north.

At a time when the national economy is struggling, if you can provide any kind of a job, anything that would contribute to the rebuilding of that economy and the infrastructure of it, that should not be denied.

What do we hear? We hear how much we need an energy policy, but we see no action in the Senate. We hear the speeches about a stimulus package, yet no action is forthcoming. We talk about conservation. It has been a foregone conclusion of the task force that was put together under the chairmanship of the Vice President, when they look at our energy situation and assess it, that they will conclude we should

then take the proper actions so we can rely on our own ability to provide the energy for our country. The conclusion was drawn that we cannot conserve our way out of this one.

This past weekend, I looked at the area with probably the greatest utilization of wind power that we have in this country. Yet it only contributes less than 1 percent to the Nation's need for electricity. That will not work.

I can tell you what spurs conservation faster and more efficiently than any rule, law, or regulation that the Government could impose: High prices. All you have to do is ask those who live in California. That is what spurs conservation. That is what spurs the imagination and the inventiveness of this society. When the cost goes high from the lack of a supply of energy, that spurs us to deal with it.

So I say, yes, maybe the unions oppose the Lott amendment. They would not oppose the Lott amendment if it was a stand-alone, though. It just happens to be on a railroad retirement act. That act has the support of over 70 Senators in this body.

So I challenge my colleagues and I challenge Americans, when Canada develops their energy supply and a way to deliver it to their people, keeping their energy costs so low that they are a very strong competitor in the global market, are we denied that? We have to look at ourselves and say, why? Based on science? I do not think so. Based on technology? I know that is not true. So we have to conclude the reasons lie in other areas.

As we hear this debate about going forward, I want Americans to understand and realize this about the development of our energy resources. Conservation as we defined it and as it has always been defined is the wise use of a natural resource. Why can't this move forward? It would but for a few who are opposed because of other reasons, other than science and technology.

So I hope the Lott amendment can be approved and we can move forward on this issue, finish our work on appropriations, finish our work on the stimulus, and go home for the holidays. I know there are those who want to go home a little bit earlier. I am not one of those who say we should leave with our work undone because the last time I looked, I think I get a check for the month of December. So we might as well work if that be the choice of this body.

I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Utah is recognized.

RAILROAD RETIREMENT REFORM

Mr. HATCH. Mr. President, I rise today in strong support of the Railroad Retirement and Survivors' Improvement Act. This is good, common sense

legislation that will lower the program's costs and provide greatly improved benefits to thousands of Utahns and hundreds of thousands of Americans who are spending or have spent their working careers in the railroad industry.

With an impressive 73 Members joining Senator BAUCUS and me as cosponsors of this bill, and a vote on passage of 384-to-33 in the House earlier this year, this legislation enjoys tremendous support of our colleagues in both Chambers and on both sides of the aisle.

Other supporters of this bill have already spoken at length about the features of the bill, so I would like to focus my remarks today on responding to some of the criticisms made last week by a few of our colleagues who oppose this legislation.

Specifically, during last week's debate on this bill, my colleague and friend, the senior Senator from Texas, spoke at length about what he refers to as the "pilfering" of the Railroad Retirement Account that he alleged would take place under this bill. While I agree wholeheartedly with the Senator on some of his statements, I could not disagree more with his suggestion that this legislation is some kind of underhanded attempt at wrongdoing by the retirees, workers, and employers in this industry.

Let me first make clear that I agree with the Senator in his conviction that vast improvements would be made by changing the rules for the investment of Railroad Retirement assets. Because of the long-standing requirement that those assets can only be invested in Government securities, the railroad industry's retirement plan has been far less efficient than those in other industries.

As a result, the rail industry's contributions to its pension plan are far higher than in other industries. This legislation would eliminate that limitation and allow the investment of assets in the stock market, as well as in Government securities. Senator GRAMM has stated that this would be a good change, and I am of the same mind. I agree with him on that.

I am also in full agreement with the Senator when he said that the assets of the Railroad Retirement system are the pension contributions of rail workers, retirees, and employers, as well as the earnings on those contributions. However, I am perplexed when Senator GRAMM alleges that, under this bill, these contributors would be "pilfering" their own contributions.

I also take exception to the suggestion that the use of the increased investment returns projected under this bill is inappropriate. Because Railroad Retirement account balances will be less under this legislation than they would under current law, even with greater investment returns, Senator

GRAMM concludes that there must be "pilfering" going on. This analysis is highly misleading.

It assumes that the all balances projected under current law are necessary for the fiscal health of the system, and that anything less will subject the system to great peril. The reality is that, while account balances will decrease for a time under the new legislation, the Railroad Retirement Account is projected by the Railroad Retirement actuary to remain solvent for the next 75 years.

Last Friday, Senator GRAMM used a chart that helped tell the story that he wanted to tell. It was a very nice chart, but the chart was somewhat truncated and failed to give the full picture. Let's look at why reducing the long term build up is neither "pilfering" or bad business economics.

As you can see, this is the trust balance that will remain strong under the Railroad Retirement program.

Under current law, the Railroad Retirement Board actuary projects that the fund balance by 2074—this red line on the top—will grow to \$702.8 billion as of 2074 under Employment Assumption II. Benefit obligations for that year would be approximately \$15 billion. This is a ratio of trust fund reserves to benefits of almost 47 years of benefits. No wonder the industry wants to develop a more rational funding approach.

Let me point you to chart No. 2.

Under Employment Assumption I, the more optimistic of the two assumptions most typically used to measure the system, the point gets even more dramatic. In this case, the actuary projects that the fund balance by 2074 will grow to \$1.5 trillion. That is trillion with a "T."

Benefit obligations under this more optimistic employment assumption would increase, of course—more workers equals more retirees. The benefit obligation grows to approximately \$21 billion. Under this employment assumption, the ratio of reserves to benefits expands to more than 71 times. Again, it is no surprise why the industry is working to develop a more rational funding approach.

As you can see by the blue line, if we pass this legislation, this would be the balance under the current legislation—the balance that we would be getting under this compared to current law, which means the retirees would not be getting nearly the benefit, nor will the industry be getting nearly the benefit than they could with a more rational, meaningful approach towards a pension.

Now, why would these balances be adequate but lower than now projected, if we passed this bill? Is it because of "pilfering?" No, it is because the bill provides for modest, judicious tax cuts and overdue improvements in retiree benefits.

Under current law, the rail industry contributes three times more to Railroad Retirement than employers in other industries contribute to retirement programs. Under current law, widows of retirees have their benefits reduced by two-thirds upon the death of their spouses. Under current law, rail employees must wait 10 years to vest rather than the usual 5 or even 3 years common in other industries.

This legislation would simply reduce payroll taxes on rail employers to bring its contributions more in line with other industries—although at more than 13 percent it would still be much higher than the funding levels of other industries—and make improvements in vesting, early retirement and widows' benefits.

Under this bill, unnecessary, enormous surpluses that would occur under current law, indicated by the red line, would be avoided, while maintaining more than adequate reserves in the system, which would be what this bill will do while taking care of widows, among others. The industry has long been recognized as the most capital intensive component of the industrial segment of the U.S. economy, according to studies done by sources ranging from Fortune Magazine to the Department of Commerce. Under this legislation, the industry would be better able to deploy its scarce investment capital.

Senator GRAMM and others have repeatedly asserted that the Railroad Retirement system will run out of money if this bill is adopted and the Government will have to make up the shortfall. As I mentioned a moment ago, the Railroad Retirement actuary has reviewed this bill and found that under it, as under current law, the system is solvent over the next 75 years under both Assumption I and Assumption II. The assumptions behind this projection were accepted by the CBO which used them for its analysis.

Moreover, the bill provides, for the first time, an automatic tax schedule that will raise taxes on rail employers if pension fund reserves drop below 4 years of benefits. This will require no action by Congress.

Senator GRAMM and his staff must have had a lot of fun calculating what tax rates might be at some point in the future to get the fund balances back to current-law levels under the bill. The reality is, however, we should not be trying to build up reserves that are between 47 and 71 times annual benefit obligation outlays. That makes no sense.

But Senator GRAMM declares that the industry will try to avoid higher tax rates that may even be triggered by the formula and, as a result, the Government will have to step in. In this regard, I think past history is instructive. In the past, when financial problems have arisen, Congress has chosen to raise taxes and reduce benefits,

rather than to provide bailouts for this industry.

Thus, even if Senator GRAMM's doomsday scenario comes true, it is the plan participants who are likely to pay, not the Federal Government. The industry knows this as well. This is why the railroads want the opportunity to manage this system, along with taking on more responsibility.

I also want to respond to one other misunderstanding that has arisen in this debate—that by lowering the retirement age for Railroad Retirement to age 60, the bill gives railroad workers a benefit no one else has, and that this benefit conflicts with the increase in the Social Security eligibility age.

First, the earlier retirement age applies only to workers who have 30 years of service in the rail industry. Second, the normal retirement age for Tier 1, the Social Security counterpart of Railroad Retirement, is not affected by this bill. It will rise to age 67 just as the Social Security retirement age will. Third, paying the cost of Social Security for early retirees until they reach normal Social Security retirement age is a feature found in private sector pension plans.

These are known as "bridge" plans. Like these plans, the private portion of Railroad Retirement—Tier 2—pays the entire cost of this early retirement option, just as it currently does for workers with 30 years of service at age 62.

Keep in mind this is a dangerous industry in which to work. It is not uncommon for employees in the railroad industry who are working on the line to never be able to get their full 30 years in because of the dangers and the accidents that occur as a result of this industry. It is a tough industry. I used to represent railroad workers in some of these cases. What happened to some of them was horrendous. Many of them died trying to do their job. Others were mutilated. Legs were cut off, and arms were lost. Families were devastated.

These things do happen. It is not comparable to most other pension-backed industries.

In conclusion, you may call this an opportunity for the rail industry to invest capital in infrastructure rather than excessive account surpluses. You may call it an opportunity to improve benefits for widows and for retirees who work 30 years in work that is often arduous and dangerous. You may call it an opportunity to bring Railroad Retirement investment practices into the modern era. But don't call it "pilfering."

I know a lot about this industry. I know what a difficult industry it is. I know there are things that are wrong with the industry. I know there are things such as feather-bedding in this industry that have existed for a long time. But there are also a lot of loyal, decent, honorable people working in these dangerous jobs to keep America's

goods and services moving across this country.

I can't imagine why we would not want to help these widows who have such a drastic automatic reduction in their benefits once their husbands pass on. I think in most cases the husband is going to predecease the wife.

That is part of what we are trying to do here. Like everything else, nothing is perfect around here. And this bill is not perfect. But it is a rational and reasonable attempt to allow this industry to invest in capital infrastructure so that it can keep going and so that widows and pensioners can be taken care of.

This is an industry that we have to keep going. An awful lot of bulk transfers occur on our railroads in this country. We know there is going to have to be more investment as we upgrade high-speed lines and other effective approaches to transport materials, manufactured products, and other things throughout our country.

This is a great industry. It is an important industry. The people who work in it deserve the best we can give them. I do not see the Government paying for the liability that could arise under the most drastic pessimistic scenarios, as have been painted by some in this Chamber: Not paying for it themselves. And I believe Congress will see that that occurs. It is up to the industry to make sure they never have to do more than what is reasonable and rational under the circumstances by making sure that this pension program is viable, that it works, and that it takes care of these people who need to be taken care of. Mr. President, I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from North Dakota.

Mr. DORGAN. Mr. President, are we in morning business?

The ACTING PRESIDENT pro tempore. We are in morning business.

ECONOMIC STIMULUS, A COMPREHENSIVE ENERGY POLICY, AND FAST TRACT TRADE AUTHORITY

Mr. DORGAN. Mr. President, first of all, I listened to the remarks of my colleague from Utah and thought they were interesting remarks, on point, and I appreciate them.

I have heard some comments from colleagues this morning who are repeating things we have heard previously in this Senate Chamber. I want to comment about a couple of them and then talk about a vote that is occurring in the other body late this week and on which we expect to vote in the Senate at some point. It is a vote on something called fast-track trade authority.

We had some discussion earlier today in the Senate about, the stimulus package referring, of course, to the

package of legislation that would try to provide some lift to this country's economy. The question was asked: Where is the stimulus bill?

The answer is very simple. The piece of legislation designed to try to stimulate this economy was brought to the floor of the Senate, and then the Republicans decided to make a point of order against it, which they did, and they took it from Senate consideration.

A point of order exists against the bill that Senator DASCHLE brought to the floor of the Senate. It would exist against the Republican bill. A point of order would also exist against the bill written by the House of Representatives. A point of order exists against all of the bills designed to try to stimulate this country's economy. But the point of order was made against the bill that was brought to the floor by Senator DASCHLE.

So those who now ask, Where is the stimulus bill? if they voted to sustain the point of order, need not ask that very loudly. The stimulus bill is where they put it. We were debating it on the floor. It was under active consideration. And now it is not. Why? Because a substantial number of Members in the other party decided to take it from the floor of the Senate.

We need a stimulus bill. Our economy is in significant trouble, in my judgment. We ought to pass a piece of legislation providing lift to this economy.

The President, and others, have asked the question, What is the Senate doing? The Senate is trying to pass a bill that provides temporary and immediate help to this economy.

The House of Representatives, on the other side of this building, decided they were going to do something quite different with respect to stimulus. They decided to pull out a bunch of old, leftover tax policies, package them up, and call it a stimulus plan.

For example, one of their proposals to help this country's economy was to give tax rebates, for taxes paid since 1988, for corporations under the alternative minimum corporate tax. What does that mean? It means a rebate check for \$1.4 billion will go to IBM, a rebate check for \$1 billion will go to Ford Motor Company.

The fact is, virtually all economists tell us we have substantial overcapacity in our economy. Providing tax rebates for the biggest companies in the country is going to do nothing to help this economy. It is just one more scheme to provide tax rebates, tax checks to the biggest interests in the country, and it has nothing much to do with improving this country's economy.

We do need a tax plan and a spending plan that stimulates this country's economy. Senator DASCHLE brought one to the floor of the Senate. But it is not here any longer because the minority party in the Senate decided they

wanted to make a point of order and take it from the floor. So I find it interesting that we have people coming to the floor, again and again and again, saying: The stimulus package is important. Where is it?

I recall a story about raccoons once, that raccoons have a fastidious way of washing everything they eat. When they find something to eat, they apparently go find water, and then they use their little hands to fastidiously wash what they intend to eat. It is just a habit raccoons have. But sometimes raccoons cannot find water, so they pretend there is water. They go through the same motions, acting as if they are washing their food, despite the fact there is no water.

We have some of that pantomime activity in the Senate. It is an interesting thing to watch. Saying, Where is the stimulus package? is almost exactly like that. It is sort of a pantomime piece of information: Where is the stimulus package? Those who ask the question know exactly where the stimulus package is. They are the ones who took it from our consideration in the Senate. It is on the calendar but not on the floor because a point of order was made against the stimulus package.

Another point made this afternoon was about the energy policy. We do need to develop a new energy policy in this country. Last week, Senator DASCHLE came to the floor of the Senate and made a commitment. He said in the first work session after we come back next month, we are going to be considering the energy package: a comprehensive energy package, not just one piece, but a comprehensive energy package that deals with supply and conservation, efficiency, renewables, as well as energy security. That bill is going to come from a number of different committees in the Senate. It makes sense, to me, to do it that way.

Energy policy is not just—any longer—about supply and demand. It is also about security. Especially since September 11, we now understand the issue of energy security must be discussed and debated when we construct a new energy policy. The security of nuclear energy production plants, the security of transmission lines, the security of the thousands of miles of pipelines: All of that is important in the context of energy policy as well.

So we will have an energy bill on the floor of the Senate. Senator DASCHLE is committed to that. But he wants to do it the right way. The right way is to consider all of the elements of good energy policy. Part of it is production, part of it is conservation, dealing with supply and demand.

It is important to point out, with respect to that piece of an energy policy, that some in this Senate and some in Congress would counsel that our energy policy for the future should be

yesterday forever, just do what we did yesterday and keep doing it tomorrow—dig and drill—and somehow that will represent a comprehensive energy policy for this country.

I happen to believe we need additional production of energy. There is no question about that. We can, should, and will, in my judgment, produce more oil, natural gas, and coal, and do so in an environmentally acceptable way, to extend our country's energy supply. But if that is all we do, we have miserably failed the American people. It is, as I said, a policy that says yesterday forever.

We need to do much more than just expand our supply through digging and drilling. We need, it seems to me, to pay great attention to conservation. Conserving a barrel of oil is the same as producing a barrel of oil. We can achieve substantial savings through thoughtful conservation, the right kind of conservation. We can and should adopt that as a policy as well.

For example, we should look at the efficiency of appliances. We can also make great progress with respect to the efficiency of those appliances we use in our everyday lives. And then there are renewable and limitless sources of energy: Fuel cells, ethanol, biomass—a whole series of technologies that represent policies for the future that can really promote new and exciting forms of energy, many of them renewable and some of them limitless.

That is what a comprehensive energy policy can and should be. It has to be much more than just a policy that says let's just provide some tax breaks to those who are going to dig for coal and drill for oil.

That doesn't make any sense. That is not a substitute or an excuse for a policy. That is one part of a series of things we ought to consider as we consider a new energy policy.

One of the interesting things to me about energy policy is that we don't have a long-term strategy precisely because of the thinking of some who have expressed on the floor that we have to have something now that opens up ANWR. That is exactly the attitude that has put us in the position of not having a long-term strategy.

If Members come to the Chamber to talk about Social Security, everyone talks about what the expectations are 30 and 50 years from now. Everyone says what is the situation 25, 30, and 50 years from now with respect to the Social Security system. I asked the Energy Department, when they testified, what kind of expectations we have 25 and 50 years from now with respect to energy. What will energy use be? What kind of energy will we use? What are we promoting? What kind of policies do we have with respect to energy usage that would allow us to become more independent? The answer was: We don't have a plan.

There is no one who can say: Our aspiration, as a nation, is to have a certain mix of energy production, of renewables and other forms of energy that will extend our energy supply. There is no such plan. Nobody thinks out 25 or 50 years.

As I indicated the other day with respect to my own circumstances, my first car was one I restored. As a young boy, I bought an old Model T Ford and restored it. Interestingly enough, a 1924 car is gassed up the same way you do a 2001 car. You pull up to the pump, you take the cap off and stick a hose in it, and you pump gas. Nothing has changed in 75 years. Everything else in our life has changed. But you still gas up a Model T Ford the way you gas up the newest car on the road today.

You would think perhaps something could change or would change or will change if we embrace and adopt thoughtful energy policies, and that is what Senator DASCHLE wants to do. He wants to bring to the floor a broad, comprehensive package of energy policies that will really advance this country's long-term energy and economic interests. That is what we will do in the first work session after the first of the year. That makes good sense.

So those who come here day after day asking where is the stimulus package, it is where you put it. You knocked it off the floor of the Senate. We want to bring it back with a package that is really temporary, immediate, and gives real help to the American economy. When they ask the question, where is the energy policy, it is coming to the floor in the first work session after we get back in January, and it is going to be much more than the limited notion of digging and drilling forever. It is going to be a comprehensive energy policy that does advance this country's energy and economic interests.

The subject of fast-track trade authority is one I have spoken about without great effect on the Senate floor for many years.

Apparently, on Thursday of this week, the House of Representatives is determined to bring to the floor of the House something called trade promotion authority, which is a fancy way of saying "fast-track trade authority," by which an administration can go off and negotiate a trade agreement, bring it back to the Congress, and the Congress is prevented from offering any amendments. We are then required then in both the House and the Senate, to vote up or down on these trade agreements.

The House may well have the votes to provide fast-track trade authority to this President. I do not know. I don't know what the votes are in the Senate. I do know that if the House of Representatives passes fast-track trade authority, it will be slowed dramatically when it gets to the Senate.

I did not support giving fast-track trade authority to President Clinton. I do not support giving fast-track trade authority to President Bush.

Why? Let me show with a chart what has happened with this country's international trade. Some say this is going well for America. It is hard for me to see how that is the case when we have a ballooning trade deficit reaching alarming proportions—a \$452 billion merchandise trade deficit last year alone. That is nearly \$1.5 billion a day that we take in more in imports than we are able to export.

It weakens this economy to run up these kinds of trade deficits year after year. We can talk about the different trade rounds. We could talk about the Tokyo round and GATT and this round and that round. Every time we have another trade agreement, we seem to have a larger trade deficit. Some say it is because the dollar is too strong; or we have too big of a Federal budget deficit. It doesn't matter what the excuse is. Economists will give an excuse of the moment. None of them really washes. Every time we have a new trade agreement, we tend to see larger trade deficits.

What is the circumstance of international trade? Fast track says we give an administration the ability to go negotiate an agreement, bring it to Congress, and Congress must vote yes or no without any amendments.

The Constitution says, article I, section 8, Congress shall have the power to regulate commerce with foreign nations and among the several States and with the Indian tribes. So the responsibility is really with the U.S. Congress. Fast track abridges that responsibility.

I could talk for an hour on the subject of international trade and what has happened to us. I understand that we need to expand trade. We want to expand trade. We want to broaden our opportunities in trading with other countries. I agree fully with that. But I insist that part of this country's effort with respect to trade policy ought to be to demand fair trade rules with our trading partners.

In the first 25 years after the Second World War, we could trade with anybody in the world with one hand tied behind our back, and it didn't matter because we were bigger, better, stronger, and more capable of trading than anybody else in the world. We could do that. And most of our trade at that point was foreign policy. It was not economic policy; it was foreign policy. We created trade agreements that represented our foreign policy initiatives with those for whom we wanted to provide some help.

In the second 25 years after the Second World War, when others became smarter, better, tougher, with stronger economies, it wasn't quite as easy for us to compete. So now we have a circumstance where we have a growing

number of trading partners that are very shrewd and very strong. Over many years Japan, European countries, Canada, and others have become, in many cases, formidable trading partners and with whom we have experienced very large trade deficits. China is another example.

What has happened with these countries with whom we have these trade relations? With respect to Japan, we have had an \$50 to \$60 billion trade deficit every year, every year forever. It has recently grown to \$80 billion. Should that be the case? I don't think so. They ship us all of their goods. We say: Good for them; our market is open to all of their goods.

But did you know that 12 years after we reached a beef agreement with Japan, every pound of American beef going to Japan has a 38.5-percent tariff on it? Twelve years after our beef agreement, every pound has a 38.5-percent tariff on it. Send a T-bone steak to Tokyo, it has 38.5 percent tariff. Is that fair, 12 years after our agreement, with a country with whom we have a huge trade deficit? I don't think so.

See how much luck you have sending pork chops to Peking, or how about potato flakes to Korea. Try shipping durum wheat to Canada. You could spend a long time talking about the abysmal trade circumstances we have as a result of improperly negotiated agreements.

Let me give you one more example. This happens to be Korea. Last year, we shipped into this country 570,000 cars from Korea. Korea bought 1,700 from us. Let me say that again. It is important to understand the one-way relationship we have: 570,000 automobiles were shipped into the United States from Korea. Korea purchased 1,700 from us.

A mid-priced car, a pretty decent car, costs twice as much in Korea. They don't want American cars in Korea. They don't buy them. The result is a one-way trade relationship with respect to automobiles in Korea. But I can describe the circumstances with fructose corn syrup with Mexico, potato flakes with Korea, beef in Japan. The list is endless. The question for this country is: When will our trade negotiators begin showing some understanding that they are negotiating on behalf of the United States of America and that they are trying to protect our country's interests? When will we send trade negotiators who will say to the Canadians that they can't ship all their durum wheat to the United States and not allow one little load of ours into Canada? That is not fair to durum producers in the United States.

The point is this: Fast-track trade authority is a moniker for "do you support American business?" The business that wants fast track is international business. They want to buy from themselves and sell to themselves. In fact,

what I want for this country is fair trade—expanded, yes, but fair trade. I want negotiators who will negotiate fair trade agreements with other countries that will begin reducing this ballooning trade deficit that injures our economy. My hope is if the House of Representatives decides to pass the fast-track trade authority this week, the Senate will slow that down. I and others in the Senate—at least a dozen and more—will certainly want to have our way to be sure that we are not going to pass very quickly trade promotion authority for this President.

As I said, I didn't support fast-track authority for President Clinton. I don't support it for President Bush. What I support is for this country to be hard-nosed, to have a backbone, some nerve, some will, and to insist with China, Japan, Europe, Canada, Mexico, and others that we want trade agreements that are fair to American producers and to American workers. If the trade agreements are not fair, then they ought not be made. I know my colleague from New Mexico is waiting. Let me make a final comment to describe the circumstances. If I might ask if my time has expired.

The PRESIDING OFFICER (Mr. KERRY). The Senator's time has expired.

Mr. DORGAN. I ask unanimous consent for 3 additional minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DORGAN. Mr. President, let me describe the last big trade debate before the vote on GATT; it was NAFTA, the North American Free Trade Agreement. Is there anybody left in this Chamber who thinks that made any sense? We were promised 350,000 new jobs in a study that all of the business interests held up to say look at how great this is going to be. We passed the NAFTA trade agreement, and we turned a trade surplus with Mexico into a huge growing deficit very quickly. We turned a deficit with Canada that was not so awfully large into one that was very large.

So NAFTA—the U.S. trade agreement with Canada and Mexico—turned both of these trade relationships into huge deficits. How can that be in this country's interest? We were told, well, the situation with Mexico will be simple. We will be the beneficiaries of the products of low-wage, low-skilled labor from Mexico. Guess what the three largest imports from Mexico are to the United States? Automobiles, automobile parts, and electronics. All are the products of high-skilled labor—all of them.

In fact, those who sold us on NAFTA were dead wrong. I am hoping if we ever have a debate on trade promotion authority—which I hope we can defeat—that we can hear from some of the same folks who extolled the virtues of a trade agreement that was so bad

for this country and American producers and workers. My point is, I don't want a harmful trade agreement to happen again. We have done the United States-Canada free trade agreement, NAFTA, and GATT, all of which led to bigger and bigger trade deficits year by year. The trade deficit has grown to \$452 billion. Every day, over \$1.5 billion more in goods are coming into this country than we are able to export. No country will long remain a strong economic enterprise if it sees its manufacturing base dissipating. That is exactly what is happening as a result of these trade deficits.

My point is that the House can have another celebration at the end of this week if they pass trade promotion authority, but they should not think it is going to happen quickly in this Congress. I and others will steadfastly oppose trade promotion authority in the Senate.

What I want is negotiators who might decide to put on a uniform. We send people to the Olympics with uniforms. They actually wear a jersey that says "USA." It would be nice to have a trade negotiator put on a jersey so they understand who they are representing when they get behind closed doors in a negotiating room, and it would be nice if the next agreement is fair to this country, fair to our producers, and fair to our workers. It has been a long time. I hope we might see that in the future.

The PRESIDING OFFICER. The Senator from New Mexico is recognized.

RAILROAD RETIREMENT

Mr. BINGAMAN. Mr. President, I want to speak for a few minutes on the main legislation that is pending before the Senate, the Railroad Retirement and Survivors Act of 2001. The procedures that we follow in the Senate sometimes obfuscate or make it impossible to determine exactly what it is we are debating. We have so many different issues that we are debating all at the same time. I wanted to bring the focus of the Senate back for a minute to the main issue that we should be debating, and that is the pending railroad retirement legislation.

There is an amendment that has been offered to the railroad retirement legislation by Senator LOTT, and it involves an effort to pass the House-passed energy bill, H.R. 4, and also an effort to have the Senate on record on the issue of so-called therapeutic cloning. Someone might ask, How do therapeutic cloning and an energy bill relate to each other, and how do those two items happen to be related to railroad retirement?

Well, there is no relationship. Essentially, what we are going to decide shortly after 5 o'clock is, Are we in fact going to pursue passage of this railroad retirement bill and keep these

extraneous matters to the side so they can be dealt with under different circumstances, with full debate, later in this Congress, or are we going to get sidetracked and essentially get off track on dealing with railroad retirement?

It is very important, in my view, that we deal with railroad retirement. This is the opportunity, this is the chance we have. There are 74 cosponsors. I know that has been mentioned several times on the floor. I am one of those cosponsors. This legislation did pass the House of Representatives by 384 votes in favor, 33 against. While clearly I respect the rights of colleagues to express the concerns and interests of other Senators in bringing other matters forward, I think it is high time we went ahead and passed this bill and sent it to the President. A great deal has changed since we began providing benefits to railroad employees back in the 1930s. We have tried to update this retirement system to reflect some of the changes in the cost of living and lifespans of former employees and their spouses.

Several years ago, Congress told the railroad companies and the unions to sit down and work out their differences on this legislation so that we could get a set of proposals that Congress could consider.

This bill—the railroad retirement bill before us today—is the product of those negotiations. It deserves our attention and our support. The country owes a great deal of the growth and dominance we have had in the industrial and agricultural sectors to the railroad industry and to the employees of that industry. We need to be sure that these men and women receive retirement and disability benefits to reflect what they have accomplished, what they have done for this country.

This legislation tries to allow those employees with 30 years of employment in the industry to retire at age 60 without a reduction of their benefits. It would also provide the surviving spouse of a railroad worker with a benefit that appreciates the cost of maintaining a household and is not cut in half when the first spouse dies. Under current law, a widow or widower receives half of their tier 2 annuity, which, in most cases, will not be enough to pay for the basic necessities of life.

This legislation also allows current railroad employees to have their retirement benefits vested after 5 years rather than after 10 years, which is the current law.

Finally, the legislation repeals the maximum benefit ceiling that is currently in place and allows the amount of benefit to be based solely on the existing formula of the highest 2 years of income over the past 10 years.

These are reasonable changes, they are fair changes. I believe very strongly we should in these final days of this

first session of the 107th Congress pass this bill. We should send it to the President for his signature, and we should resist the efforts we are seeing in this Chamber today to bog this down by attaching other very controversial legislation by the amendment process.

I hope cloture will be invoked on the amendment that Senator LOTT has offered and that it can be withdrawn. We can then proceed to vote on the railroad retirement bill and pass it and have that one piece of very constructive legislation sent to the President before the week is out.

Mr. President, I yield the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DAYTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXPLORATION FOR OIL AND GAS IN THE ARCTIC NATIONAL WILDLIFE REFUGE

Mr. DAYTON. Mr. President, I rise today to express my strong opposition to exploration and drilling for oil and gas in the Arctic National Wildlife Refuge, or ANWR, region of Alaska. On two occasions, I have visited this remote and rugged wilderness region. In the summer of 1996, my then-16-year-old son Eric and I joined my good friend, Will Steger, an internationally renowned Arctic explorer, and two other men, on a two-week expedition in the Brooks Mountain Range of ANWR.

On the evening of June 30, we pitched our tents on the icy tongue of an enormous glacier. The next morning, we awoke to find ourselves in a snowstorm. We trekked through fresh snow above our knees through near-white out conditions to the top of the Continental Divide. Then we slid down the other side, frequently using our backpacks as toboggans and our boot heels as runners. It was an adventure I will always remember.

The northern slope of this mountain range initially resembled a lunar landscape. Giant boulders and other, smaller rocks covered the surface, which was otherwise devoid of plants and wildlife. As we continued, however, we reached the beginning of the grassy plains, which are the homes of millions of wildlife.

What impressed me most is how vast and untouched the ANWR region is. From the time we were dropped off by one bush pilot until the time we were picked up 2 weeks later by another, we encountered only one other group of human beings. For the rest of our time, our companions were one bear, a few caribou, who had not moved on to the coastal plains, and several quadrillion

mosquitoes. This region is totally untouched by human beings and by their industrial and technological intrusions. It is there for anyone and everyone who wish to encounter it on its terms, rather than on their own.

My second visit to the ANWR region occurred last March, at the invitation of my distinguished colleague, Senator FRANK MURKOWSKI of Alaska, who was then the chairman of the Energy and Natural Resources Committee. Senator JEFF BINGAMAN, then the ranking member and now the chairman of the same committee, and I joined Senator MURKOWSKI, along with Secretary of the Interior Gale Norton; Ms. Mary Matalin, special assistant to the Vice President; and several committee staff.

We flew first to Anchorage, where we were greeted by Alaska's Governor, Tony Knowles, a college classmate of mine, and other Alaskan government and business leaders who outlined to us the enormous economic importance of oil production to Alaska. We then flew to Valdez, the southern end of the trans-Alaskan oil pipeline, where I gazed in awe at magnificent snow-covered mountains, which arose from sea level to encircle us, and viewed enormous oil tankers being carefully escorted into and out of their ports.

From there, we flew up to the Prudhoe Bay region on Alaska's northern coast, where about one and one-half million barrels of oil a day flow into the trans-Alaskan pipeline. After viewing some of the first drilling sites, we traveled to the nearby Alpine field, which is the newest and most technologically advanced of the Alaskan drilling operations. The Alpine field, which was only discovered in 1996, is located to the west of Prudhoe Bay, right on the coast of the Beaufort Sea. At 365 million barrels of recoverable reserves, it is one of the largest discoveries in the United States in recent years. We toured this very modern and technologically advanced facility, and I could not help but be impressed by the extensive efforts made to assure its safety of operation and its ecological compatibility. It was obviously built to be much more compact than the earlier operations, so as to leave a smaller "footprint" on the terrain. In fact, one of the Alaskan government officials, knowing that I come from Minnesota, had thoughtfully taken the time to investigate and discovered that the size of the Alpine complex was almost exactly the same as our famous shopping mall, the Mall of America. Alpine encompassed 97 acres, 1 acre smaller than Minnesota's mega-mall.

Our trip concluded with our final night in Barrow, AK, which is the northernmost town in our United States of America. We awoke Sunday morning, April 1, to an outdoor temperature of -35 degrees, which dropped to a -65 degrees, with the wind chill. I felt like an April Fool, as I walked the

outdoor airport tarmac to our plane for our return flight.

This trip gave me an invaluable opportunity to see firsthand the region about which there has been so much debate in this Senate in recent months. I thank Senator MURKOWSKI for inviting me, while knowing that I was an announced opponent of oil exploration and drilling in ANWR. Yet he and our other Alaskan hosts were most respectful, as well as most persuasive, as they presented their case.

The debate over whether to open ANWR to oil and gas exploration and drilling pits two enormously important national interests against each other. One is our need to find and develop domestic energy resources. Much more is unknown than is known about the full extent of ANWR's oil reserves. The U.S. Geological Survey has produced a range of estimates of the amount of oil which is technically recoverable. Their mean estimate is 7.7 billion barrels.

As we were informed on our trip last March, the oil industry's proposal to drill for and extract these reserves involves the construction of up to 20 drilling complexes, each one approximately the size of Alpine, along the coastal plain of ANWR. Thus, the legislation which passed the House last summer permits 2,000 acres of ANWR's coastal plain to be open for oil drilling. However, as I understand the House version, these 2,000 acres are not limited to one area. Rather, the legislation permits what the oil industry described to us last March: a chain of up to 20 Alpine complexes connected by oil pipelines extending along the coastal plain for as far as discovered and recoverable oil reserves are found.

In my visualization, this enormous and vast industrial project would resemble 20 Mall of America-sized structures being built at various junctures along the coastline of this wilderness area. That, remember, is the size of one of these drilling facilities.

Now, for those who have not yet visited our Mall of America—and I certainly encourage you to do so—it is the largest shopping mall in North America and, perhaps, the world. Tourists fly into Minnesota from all over our country and from cities throughout the world to shop there. Each of its four quadrangular concourses extends for slightly more than a mile, and its four shopping levels rise to the height of a typical seven-to-eight-story building. Like Alpine, it is a relatively compact structure; however, it is by no means a small "footprint" on the landscape.

So, I ask myself, how would the construction of up to 20 of these Mall of America-sized drilling complexes, each one encompassing almost 100 acres, connected to one another by a large oil pipeline, which also must be built and maintained along this corridor—how would this affect a wildlife refuge, with its hundreds of thousands of migrating

caribou, and all the other wildlife that has existed here in ecological balance for thousands of years without the intrusion and interference of all the rest of us?

I must conclude that, however well-designed and constructed, however carefully and safely operated, and however environmentally well-intended, this project could be, it will have an enormous and irrevocable impact upon the essential purpose for which ANWR was designated and for which it must be protected: as a National Wildlife Refuge. In fact, by its very definition, a national wildlife refuge area is antithetical to the 20 large and interconnected industrial complexes, which this oil drilling would entail. As such, a vote to permit oil drilling in ANWR is a vote for the destruction of ANWR.

I returned from my trip last March wondering if there was any way to reconcile these two choices: To develop domestic oil reserves and to protect this valuable national preserve. Upon reviewing the maps provided on our trip, I was surprised to notice for the first time a large region located to the west of Prudhoe Bay and Alpine, called the National Petroleum Reserve-Alaska. This area was scarcely mentioned during our visit to ANWR, and we visited none of it. Upon further research, however, I discovered that this National Petroleum Reserve, encompassing 23 million acres, was established by Congress for oil and gas development. Why, I wondered, given all the controversy over oil drilling in ANWR, haven't the oil reserves in the National Petroleum Reserve been first explored and extracted? Wouldn't it be a far better energy policy to first extract the oil from a 23-million-acre area which has been established for that purpose?

Furthermore, oil production from the National Petroleum Reserve could begin several years before anything from ANWR. Under President Clinton's direction, in 1997, the Bureau of Land Management within the Department of the Interior conducted a study of a 4.6-million-acre section in the northeast portion of the National Petroleum Reserve, which is the area immediately to the west of Alpine and Prudhoe Bay. The Bureau prepared an environmental impact statement leading up to lease sales in May 1999, which drew 174 bids from six different companies on 3.9 million acres. More than 130 bids were accepted, at a total revenue to the Government of \$104.6 million. This spring, Phillips Alaska, Inc., and Anadarko Petroleum Corporation reported discoveries of oil or gas, and Phillips indicated that these discoveries might be commercial. By early October of this year, Anadarko was in the process of securing permits to drill two additional prospect sites. The Interior and Related Appropriations Act for fiscal year 2002 provides \$2 million in funding for

planning and preparation of another EIS, in anticipation of holding a lease sale in 2004 for tracts in the northwestern area of the National Petroleum Reserve.

The U.S. Geological Survey has estimated that the National Petroleum Reserve could hold technically recoverable resources of 820 million to 5.4 billion barrels of oil. However, these are only rough estimates. While these estimates are not as large as the current estimates of ANWR's potential, they are the equivalent of between 2 and 12 of the Alpine field. Thus, the choice which some would force upon us, whether to protect the Arctic National Wildlife Refuge or to continue the act of exploration for and development of our Nation's oil reserve is a false one. We can do both. We can, and we should, continue the environmental assessments and appropriate leasing of those sections of the 23-million-acre National Petroleum Reserve until those discovered and recoverable oil supplies have been mostly extracted. Then, and only then, would we possibly have either the need or the possible justification to turn our attention to possible sites in ANWR. However, it will take many years, probably a couple of decades, before we have completed the oil production out of the National Petroleum Reserve. Until then, we have no reason to permit oil drilling in ANWR.

The PRESIDING OFFICER. The Senator from Connecticut.

SENATE VOTES

Mr. LIEBERMAN. Mr. President, I come to the floor to speak about two important votes we will have in a few hours, one on the Railroad Retirement Act and the other on the amendment introduced by the Senate Republican leader, which is an energy plan that includes authorization to drill in the Arctic National Wildlife Refuge.

I thank and congratulate my friend and colleague from Minnesota for the outstanding statement he made on this issue. I believe the debate thus far on the question of drilling in the Arctic Refuge has revealed a record that is not quite what the proponents of drilling have argued and portrayed. That, at least, shows we should not be pressured to pass such significant legislation in a hurried or cursory fashion. It is not wise for the Senate to rush into a decision that will have a permanent impact and, in fact, do permanent damage to our environment, our national energy strategy, and our national values while at the same time being of little value to the American people.

I will discuss some of the contentions made by proponents of drilling our refuge and offer some comments.

Proponents of drilling have argued that the Inupiat Eskimos in the town of Kaktovik are being deprived of their right to drill on refuge land that they

own in fee simple. I was struck by that argument when it was made Friday when I was in the Chamber.

I have done a little research over the weekend. I find that the Inupiat Eskimos have rights to the surface of lands adjacent to the town of Kaktovik. The Eskimos also were granted subsurface rights by Secretary of the Interior Watt to over 90,000 acres that are adjacent to their town. But those rights were speculative—only granting the right to drill if Congress authorized oil and gas drilling under the surface of the Arctic Refuge.

A 1989 GAO report investigating the transfer of these subsurface rights found that the transfer actually resulted in a profit for Kaktovik even without any oil and gas development.

The point I am making is that no promises have been broken to the Inupiat people. In fact, they were never granted the right to drill in the refuge. That has been clear from the beginning.

I will work with all of my colleagues, as I know the occupant of the chair does, to do everything I can to ensure that the Inupiat people are able to continue to sustain and improve their quality of life. But we have to do so in a manner that is in our national interest and does not sacrifice one of our great national treasures. We must also realize that other Native Americans in Alaska strongly oppose any drilling.

Last Friday I mentioned the plight of the Gwich'in of Arctic Village who depend on the Porcupine caribou herd to sustain their lives and their culture. Today I will read from a letter by the city of Nuiqsut, sitting in the shadow of the Alpine oil field on the North Slope. I ask unanimous consent this letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

CITY OF NUIQSUT,
Nuiqsut, AK, April 11, 2001.

Letter from City Council to Cumulative Effects Committee Members.

Patricia Cochran,
Representative/Member, National Research Council, National Academy of Sciences.

DEAR SIR OR MADAM: Thank you for coming to Nuiqsut and seeking our input on the cumulative effects of oil and gas development on our community and the North Slope. Your tight schedule did not allow us to fully share all of our comments with you, so we write today to summarize our thoughts and supplement our comments. This summary is not meant in any way to be a substitute for the heart felt comments you heard at the meeting or the written testimony that was carefully prepared for you and submitted to you at the meeting. It is only a supplement to those thoughts and comments and a request for further consideration of our views in the report that you prepare.

The impact of oil and gas development on our village has been far reaching. As you now know first hand from your visit, we are literally surrounded by the infrastructure to produce oil and gas. This has affected our

day-to-day lives in several ways. Our ability to hunt and gather traditional foods has been severely impacted by development, as you heard from everyone who spoke at the meeting. You were provided many examples of how various species have been affected, and how we have had to react and adjust to those changes. You were also told how the land that we consider ours and from which we subsist has in some cases been lost because we did not fill out the right paperwork and/or look at the right maps.

Additionally, oil and gas development has brought many more people to our village that is not permanent residents, but instead come and goes for work. Very few of these individuals have integrated well into our community. There are widespread feelings of distrust and frustration amongst villagers and the workers who come from outside the community, despite efforts to develop trust with one another. We do not fully understand each other's cultures and we resent each other still, despite our mutual efforts to get to know one another and to get along.

Development has increased the smog and haze in our air and sky, affecting our health as well as the beauty of our land, sea, and air. Drugs and alcohol traffic have increased as development has grown; the ice road that reduces our freight costs also increases the flow of illegal substances into our community. The stress of integrating a new way of life with generations of traditional teachings has led some to alcohol and drug abuse, a phenomenon unknown before white people came to Alaska and greatly exacerbated by the recent spate of growth associated with North Slope oil and gas development and for us in Nuiqsut, even more exacerbated by growth associated with Alpine.

However, like all Alaskans, we have also benefited from oil and gas development. The State and Borough have more money to spend on community facilities, schools, modern water and sewer system, and similar projects. The City has also received funds to mitigate some of the impacts of development. At the individual level, we each receive a permanent fund dividend every year that is funded by excellent investment of state money, some of which came originally from oil and gas royalties and taxes. We hope to have low cost natural gas heating our homes and running our electric plant in the near future because of a unique arrangement between Phillips, Kuukpik—our local village corporation, the City, and other community interests.

But money and modern amenities are not in and of themselves significant enough trade offs. We urge the Committee to appreciate the reality that, in the eyes of most of us, to date, the negative effects of oil and gas development have equaled or outweighed the positives. We encourage you to include with your findings information that will encourage policy makers to work harder to shift the balance of much more to the positive side. As was stated at the meeting, we do not reject the cash economy and know that the clock of time cannot be turned back. We wish instead to become fuller participants in the cash economy and in the decisions that are made about future development, while maintaining our cultural ties to the past through our subsistence lifestyle. This is the essence of self-determination.

With that in mind, we urge you to include as a finding in your report that one cumulative effect of development has been that subsistence resources of local residents have been displaced and altered, based on the information provided to you at our meeting as

well as testimony you have received from state and federal agencies and other sources.

Another cumulative effect that should be included in your report is that we have not been provided with enough well paying, highly skilled North Slope oil and gas jobs. Although some steps have been taken to increase local hire, a lot more needs to be done. Very few villagers are employed at Al-pine or even on the entire Slope. A long-term commitment needs to be made to train vil-lagers to get the skills to get and—impor-tantly—to keep those jobs. Villagers and in-dustry representatives need to work together to develop a jobs program in which villagers commit to working regular hours on a long-term basis and industry commits to allow villagers to take time off for subsistence ac-tivities without losing their jobs.

Further, we urge you to include as a find-ing in your report that villagers have not been fully integrated into decision making regarding where development has occurred and what facilities will be used to extract the oil and gas from the ground. We need to be consulted more often and more fully on decisions that are made regarding permit-ting, the impacts of development on the land, sea, air and animals, and choices for placement of pads, roads, mines, pits, pipe-lines, and other aspects of infrastructure de-velopment. If we are consulted and listened to, we will work to get future pipelines un-derground and/or well above the antlers of the tallest caribou, to end use of fish bearing lake water for ice roads, to prohibit seismic scaring of the tundra, to prohibit offshore and other outer continental shelf develop-ment, and to take other measures in re-sponse to the cumulative effects that have already occurred to the land, sea, air, and people of the North Slope.

In conclusion, we again thank you for your interest in the issues we face, and look for-ward to your findings. We respectfully rei-terate that we practice subsistence as a life-style, not as a sport. We wish to continue to do so for generations into the future. Only with careful consideration of our input into future oil and gas development will that be possible. We sincerely hope that a longer-term cumulative effect of oil and gas devel-opment on the Slope is not the total destruc-tion of our subsistence way of life.

Sincerely,

City of Nuiqsut Council Members:

ELI NUKAPIGAK,

Mayor.

ROSEMARY AHTUANGARUAK,

Vice Mayor.

RUTH NUKAPIGAK,

FRANK LONG,

Member.

Mr. LIEBERMAN. According to the Native Americans, the impact of oil drilling has been "far reaching." They provide some specific statements:

Our ability to hunt and gather traditional foods has been severely impacted. Develop-ment has increased the smog and haze in our sky, affecting our health as well as the beau-ty of our land sea and air.

Obviously, the people of Nuiqsut do not believe they have benefited from oil exploration, and they hope we will learn a lesson from their experience.

We have also been asked to conclude that the wildlife in the reserve will interact happily with oil pipelines if they are built there. A picture was shown the other day of bears. I was ad-vised that the bears in the pictures were not stuffed animals. Indeed, they were not. Unlike stuffed animals, they need real wilderness habitat to survive.

I received a letter over the weekend from Mr. Ken Whitten, a retired Alaska State fish and game biologist who worked 24 years on the North Slope. Mr. Whitten felt compelled to respond to the proponents of drilling and spe-cifically to the picture of a mother bear and cubs shown last week. I quote from the letter: Most bear cubs that have grown up in the oil fields have eventually been shot as problem bears, either in the oil field support area or at isolated villages and camps outside the oil field.

Thus, the story of the three bears in the photo does not have a fairy tale ending. Three different bear groups, each consisting of a sow and two cubs, have been seen walking pipelines in the oil field recently. All three bears in one group and two cubs in another had to be shot last summer after they became habituated to human food and repeat-edly broke into buildings and parked vehicles.

I ask unanimous consent Mr. Whit-ten's comments be printed in the RECORD in full.

There being no objection, the mate-rial was ordered to be printed in the RECORD, as follows:

COMMENTS OF KENNETH R. WHITTEN ON
REMARKS BY SENATOR MURKOWSKI

As a retired state fish and game biologist who worked 24 years on Alaska's North Slope, I am once again disappointed that Senator Murkowski has misinformed his fel-low senators regarding the effects of oil de-velopment on the wildlife and wilderness en-vironment of the Arctic National Wildlife Refuge. In this regard, I'd like to comment on the Senator's statements about bears and caribou and also on his continued misuse of a photograph I took myself.

On the floor of the Senate last Thursday, Senator Murkowski showed a photo of three grizzly bears walking on top of an elevated pipeline at Prudhoe Bay. What the Senator failed to point out is that most bear cubs that have grown up in the oilfields have eventually been shot as problem bears, ei-ther in the oilfield support area or at iso-lated villages and camps outside the oilfield. Thus the story of the three bears in the Sen-ator's photo doesn't have a fairy tale ending. Three different bear groups, each consisting of a sow and two cubs, have been seen walk-ing pipelines in the oilfield recently. All three bears in one group and two cubs in an-other had to be shot last summer after they became habituated to human food and re-peatedly broke into buildings and parked ve-hicles. The bears in the third family are all currently alive, but unfortunately it is high-ly probable that the remaining cubs, at least, will get into trouble next summer and have to be killed. The major oil companies may do a good job of keeping garbage away from bears and thus avoiding conflicts, but bear problems are rampant in the industrial

support area where workers and visitors are not as well regulated.

Caribou are not attracted to the oilfields, despite Senator Murkowski's assertion that caribou flock to Prudhoe Bay and thrive there because they are protected from hunt-ing. Caribou generally avoid the oilfields during their calving period. Later in the summer, larger groups occasionally enter the fields, but have trouble moving through the maze of pipes, roads, and industrial ac-tivity. Hunting is legally restricted in the Prudhoe Bay oilfield only, and not in other North Slope fields, although oil company policies discourage hunting. Hunting occurs on state and federal lands around the oil-fields, but is conservatively regulated so as not to harm the caribou populations. The caribou herd around Prudhoe Bay has in-creased because of generally favorable envi-ronmental conditions over the past 25 years, as have other caribou herds on the North Slope. During a brief period of bad weather in the late 1980s, caribou near the oilfields had poor calf production compared to car-ibou in areas away from the oilfields. The population declined at that time.

Also on the Senate floor last Thursday, Senator Murkowski showed a photograph over which he said he had previously gotten into an argument with Senator Boxer. I took that photograph. At various times Senator Murkowski has stated that the photo is a fake or that it was not taken on the ANWR coastal plain. In fact, that was the gist of his argument last year with Senator Boxer. The photo was taken from a rooftop at an aban-doned DEWline station at Beaufort Lagoon on the ANWR coastal plain. It looks across the lagoon to the coastal plain filled with caribou and with snowcapped peaks in the distance. After the dispute with Senator Boxer, Murkowski had to admit that the photo was indeed from the coastal plain, but he told reporters that the fact it was taken from an old military site proves that the coastal plain is not pristine wilderness (he was apparently unaware that the site had been removed and no longer existed when he made those remarks). Murkowski now claims he has confirmation from the photog-rapher that the photo was taken from a win-dow in Kaktovik village. The Senator just can't seem to get it right. He now empha-sizes that the mountains are not on the coastal plain. The point he keeps trying to make is that the ANWR coastal plain is a barren hostile place, with no beautiful moun-tains or pretty scenery, and we should there-fore just go ahead and drill it. He can't seem to deal with the fact that the plain is rimmed on the south by the highest peaks of the Brooks Range, that many people find it beautiful, and that during summer the coast-al plain teams with abundant wildlife.

Senator Murkowski seems willing to go to any length to convince us that we can im-prove national security and protect wildlife by drilling the coastal plain, but there is overwhelming evidence to the contrary. We can reduce our dependence on foreign oil and protect wildlife through energy conserva-tion. The evidence for that is irrefutable.

Mr. LIEBERMAN. I also contest a characterization of support for this proposal. Contrary to what has been said, it is clear that the American labor movement is not universally en-thusiastic about this bill. In fact, the well of union support is drying up. Many unions, including the largest union in America, SEIU, and the United Steelworkers of America, see

more jobs in investing in the technologies of the future.

Why are the union members lining up in opposition to the drilling plan? The fact is a broad range of union members and leaders understand that a strategic long-term energy strategy is a much more effective way to help spur the production not only of energy but of permanent jobs in a wide range of economic sectors. Drilling in the Arctic Refuge represents a distraction from the real needs of our economy and the real needs of the working people of America.

The other alternatives I cite: investments in efficiency, conservation, and alternative energy sources, are realistic, strategic, and ready to go. It is disappointing to me that in this era of dramatic technological progress in so many areas of human activity, we readily celebrate the advances, including in the fields of oil exploration, but fail to see the promise of this next age of alternative efficient energy technologies.

According to a recent study by the Tellis Institute, investments in new energy technologies could result in a net annual increase in jobs in America of over 700,000 by 2010, rising to approximately 1.3 million jobs in 2020. Those are the technologies of the future, providing high-paying, permanent jobs to America's workers.

There is also another proposal for the North Slope of Alaska that will bring more jobs and more economic stimulus than drilling for oil in the refuge. That is the building of a natural gas pipeline to bring that energy source to the lower 48 States. According to estimates from the oil industry and from the State of Alaska, this project would bring hundreds of thousands of jobs to American workers and is far preferable to the proposed oil drilling in the refuge. In one sense, this is perhaps the first plan I have seen that is myopic and hyperopic. It may need bifocals. It fails to take the long-term interests of our economy and environment into consideration and simultaneously fails to deliver any immediate benefit to the American people. In fact, it is a short-term distraction in what should be our real energy program strategy and a long-term danger.

Finally, I ask unanimous consent to have printed in the RECORD a letter from the Secretaries of the Interior under Presidents Kennedy, Johnson, Carter, and Clinton.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NOVEMBER 30, 2001.

HON. DANIEL K. AKAKA,
U.S. Senate,
Washington, DC.

[SENATOR AKAKA]: In this time of national crisis, we urge the Senate to focus on the most important issues to the country. Railroad retirement legislation and economic stimulus packages are the wrong forum to be

debating complex energy legislation or deciding the fate of one of our country's greatest wilderness and wildlife treasures—the coastal plain of the Arctic National Wildlife Refuge. Majority Leader Tom Daschle has pledged to bring energy legislation to the floor in the near future.

We hope you will oppose efforts to attach energy provisions to economic or national security legislation, and we strongly urge you to vote against drilling in the Arctic Refuge regardless of the legislative vehicle.

Each of us, as former Secretaries of the Interior, made decisions balancing the goal of developing the energy resources of our public lands with that of conserving and protecting the wildlife and wilderness resources of those same public lands for future generations. In the case of the Arctic National Wildlife Refuge, we continue to believe that the value of its unique wildlife and wilderness resources far outweighs the potential benefits of development.

It is worth noting that protection of this unique resource was first proposed by our colleague Fred Seaton, who headed Interior under President Eisenhower. Secretary Seaton stressed the unique wilderness values of this 'biologically irreplaceable land,' which was ultimately set aside under President Eisenhower's order 'for the purpose of preserving unique wildlife, wilderness, and recreational values.'

In the forty years since the establishment of what was then known as the Arctic Wildlife Range, the case for protecting its wildlife and wilderness resources has only become stronger. We have opened major portions of the Arctic slope to oil development, which now dominates the landscape from the Canning River all the way to the Colville. Most recently, leasing in the National Petroleum Reserve has resulted in a number of successful exploration wells west of the Colville. Although industry practices and oil field technology have both improved over the years, anyone who has been to the Prudhoe Bay complex will tell you that oil development there has permanently changed the character of the land. In this context, protecting the biologically richest and most pristine part of the coastal plain is the right thing to do. Nowhere else on the American continent can be found such a wealth of wildlife in an undisturbed environment. The annual migration of the Porcupine River Caribou Herd, on which the Gwich'in communities of Alaska and Canada depend for subsistence, remains one of the last great wildlife spectacles on earth.

Our park, refuge, and wilderness systems are a living legacy for all Americans, present and future, and are widely envied and emulated around the world. The Arctic National Wildlife Refuge is one of the greatest of these treasures and is clearly the most precious of the crown jewels of Alaska. It must be protected.

Sincerely,

BRUCE BABBITT.
CECIL D. ANDRUS.
STEWART L. UDALL.

Mr. LIEBERMAN. The Secretaries point out the value of the land in question here, the Arctic Refuge. They quote the Secretary of the Interior under President Eisenhower. It was Eisenhower who originally created this refuge.

That letter states that the area was: biologically irreplaceable land that should be put aside for the purpose of preserving the unique wildlife wilderness and recreational values.

As the signatories' letter points out, the 40 years since Secretary Seaton's comments have only strengthened the case that this is a unique wildlife and recreational area of our country and deserves to be preserved. I ask my colleagues to please vote against cloture on the amendment, the Lott amendment to the railroad retirement bill.

In summary, drilling in the refuge pales in comparison to more environmentally sound and strategic energy alternatives. Drilling in the refuge will do nothing to provide energy independence, providing a mere 6-month supply of oil that will not come on line for a decade. Drilling will do almost nothing to stimulate our economy, providing some short-term jobs when we can provide a much greater, longer term stimulus for our economy by undertaking projects such as the natural gas pipeline from Prudhoe Bay and increasing our investment in new and emerging technologies.

Finally, our values teach us that not every available natural resource should be exploited. Our values encourage us to respect the Earth, the treasures that the Good Lord gave us here in America, and to approach them with some humility, not to try to squeeze every last ounce of energy or anything else out of every square foot of Earth, regardless of the cost or the loss that is engendered thereby.

Nature reminds us of our humanity. It inspires us. It helps to comfort us when we are hurt. It gives us opportunities for recreation.

This is a time not to ignore but to recall the great American spirit of conservation which seeks, in every generation, to preserve the great natural places in America so those generations that follow us will enjoy them, have the right and opportunity to enjoy them as much as we have.

I believe this expresses the interests and the values of the American people. I hope my colleagues will stand with those interests and values in voting against cloture on the Lott amendment when it comes up later this afternoon.

I thank the Chair.

Mr. MURKOWSKI. I wonder if my friend will yield for a question.

Mr. LIEBERMAN. I believe my time is up, but I will certainly yield for a question.

Mr. MURKOWSKI. Does the Senator from Connecticut have any idea how long this issue has been before the Senate, how many hearings we held on this matter over the years?

I think it is important because I believe the statement was made we should not be rushing into anything.

The PRESIDING OFFICER. Let me clarify that the time of the Senator from Connecticut has expired. This will be charged to the time of the Senator from Alaska, who is recognized.

Mr. MURKOWSKI. Factually, if the Senator doesn't know, I would like to advise him.

Mr. LIEBERMAN. I can tell the Senator respectfully, I have been here 13 years and I know it has been an issue all that time, and I know it was debated for some time before that. My point was, though, that I think some of the contentions made on the floor in the back and forth of the debate in the last several days at least leave uncertainty. In that spirit of uncertainty, we do better to come back and debate this proposal in full, as I guess we will, after the first of next year.

Mr. MURKOWSKI. For the edification of my friend from Connecticut, there have been 50 bills introduced on this topic. There have been over 60 hearings. We have had 5 markups of committee jurisdiction, in the Committee on Energy and Natural Resources. Legislation authorizing the opening of ANWR has passed the House twice. A conference report authorizing the opening of ANWR passed the Senate in 1995. It was vetoed by President Clinton.

If you review the history, I think it is a little misleading to imply that suddenly we are rushing into this matter without a good deal of debate and thought. It is the same exact argument that was used in the 1970s, prior to the authorization of opening up Prudhoe Bay and building the pipeline. It was fostered by America's extreme environmental community which is again fostering the debate. There has been no sound science to suggest that opening Prudhoe Bay has resulted in an economic disaster or resulted in the decimation of the caribou herd, the central Arctic herd. These are alarmist tactics we have heard time and time again and it is evident Members are soliciting the support based on America's environmental community.

Years ago, we had a full EIS on the opening. Still, at a time when we are looking at calamities in the Mideast—the situation in Israel, the danger associated with our national security—I find it extraordinary that Members would look for excuses rather than sound science in addressing the merits of this legislation.

Had President Clinton not vetoed that legislation in 1995, ANWR would be on line now. When the Senator continues to use the “6-month supply of oil,” he is really misleading the American public. He knows that definition is only applicable if there is no other oil coming into the United States, imported or produced in the United States. I think we should keep the debate on a factual level as opposed to a misleading level.

I thank the Chair.

The PRESIDING OFFICER. The Senator from Minnesota is recognized.

Mr. WELLSTONE. I ask the Chair, it is my understanding we each have 10 minutes, is that correct, in morning business?

The PRESIDING OFFICER. The Senator is correct.

Mr. WELLSTONE. Mr. President, I certainly understand the proponents—

Mr. MURKOWSKI. Excuse me, Mr. President, may I interrupt. I think we have time remaining on either side; is that correct?

The PRESIDING OFFICER. I beg your pardon?

Mr. MURKOWSKI. I believe there is time remaining on either side?

The PRESIDING OFFICER. Yes. The Senate will be in morning business until the hour of 4:45, at which time there will be 30 minutes equally divided on either side to debate the Lott amendment. Until then, Senators may proceed for 10 minutes each, time to be designated between the sides.

Mr. MURKOWSKI. May I ask the Chair how much time is remaining on this side?

The PRESIDING OFFICER. In total? One hour sixteen seconds remain.

Mr. MURKOWSKI. I am sorry?

The PRESIDING OFFICER. I repeat, 1 hour 16 whole seconds—16 minutes, I am advised.

Mr. MURKOWSKI. I am sorry. I did not hear. On the other side?

The PRESIDING OFFICER. There are 30 minutes remaining on the other side.

Mr. MURKOWSKI. I thank the Chair.

The PRESIDING OFFICER. The Senator from Minnesota is recognized.

Mr. WELLSTONE. I will start again. I know the proponents—and certainly the Senator from Alaska stands out in this matter of drilling in the Arctic Wildlife Refuge—feel strongly about their position. But there are those of us who feel just as strongly the National Wildlife Refuge should remain, as it has always been, our Nation's last protected Arctic wilderness.

The Senator from Alaska was asking the Senator from Connecticut about how long this has been going on. I have been here 11 years. I remember the first filibuster I was involved in was against this. We were successful. I think we will be successful again.

In the last 11 years, I have heard a lot of arguments about why we should drill, but none of them hold up to scrutiny.

In 1991, we had the debate on the energy bill, and we were told that the Trans-Alaska pipeline would run dry by the turn of the century without drilling the refuge. Today, even the oil companies acknowledge having enough oil to keep the Trans-Alaska pipeline flowing for at least another 30 years and perhaps another 40 years.

In 1995, we were told drilling the refuge was necessary to balance the Federal budget. But we managed to balance the budget without these speculative revenues, and by the way, it would have stayed that way without the irresponsible tax cut passed earlier this year. Instead, what do my Republican colleagues do? It is not part of this

amendment—on the House side, \$30 billion of tax credits for oil companies that made about \$40 billion last year in profits.

What other arguments have we heard? Earlier this year, we were told that we should drill the refuge to deal with California's electricity crisis. Never mind the fact the State gets less than 1 percent of its electricity from oil.

Then we were told to drill to bring the prices down at the pump. Never mind the fact the prices are set on the global market and that as the Governor of Alaska has even acknowledged, there is a zero sum relationship between Alaskan oil and prices paid by working families for gasoline or home heating oil.

I find it ironic that the same Senators who call for drilling in the Arctic Refuge have nothing at all to say about the wave of oil company mergers. I say to my colleagues, if you were so concerned about consumers and about the prices that working families pay at the pump, where were you when Exxon and Mobil merged? When BP took over Amoco? When BP took over Arco? And now when Phillips and Conoco are seeking Government approval?

So what is today's flavor? What's today's argument? The Senator from Alaska says we need to drill the refuge as part of our campaign to combat terror—as a way to reduce our dependence on imported oil. Let us look at the facts:

According to the oil industry's own testimony before the Senate Energy Committee, it would take at least a decade to tap even a drop of oil from the refuge. Furthermore, the U.S. Geological Survey estimated, with oil prices at \$20 per barrel, there is only 3.2 billion barrels of commercially recoverable oil in the refuge—not in one field, but spread out in potentially dozens of small pockets all across the Delaware-sized Coastal Plain.

I know the Senator from Alaska argues there's a lot more than that. But here is what the USGS said in its report: “We conclude that there are no Prudhoe Bay-sized accumulations in the 1002 area. . . .”

The bottom line is this: Drilling the Arctic Refuge, even under the optimistic estimates, would be unlikely to ever meet more than 1-2 percent of our oil needs, even at peak production. In fact, we could drill every national park and wildlife refuge in America and we'd still be importing the majority of our oil.

The answer, clearly, is to look to the future. What can we do instead? By increasing the fuel efficiency of our cars and trucks by just 3 miles per gallon, we can save more than 1 million barrels of oil a day or five times the amount of oil the refuge might produce. This would do far more to

clean the air, reduce prices for consumers, and make us less dependent on imported oil.

The fact is a focus on renewable energy and saved energy is our future: Households that generate electricity from rooftop solar arrays, farmers who harvest an additional "crop" by the winds that blow over their fields, or the biomass waste that is generated, and city streets inhabited by quiet and pollution-free electric vehicles.

Do we want real energy security? Former CIA Director James Woolsey recently testified that the Trans-Alaska Pipeline is one of the more vulnerable parts of our energy infrastructure; that, even if you had no environmental objection, it would not make a whole lot of sense to become more dependent on the pipeline.

I don't know whether he is right or wrong. But I do think we need to become much less dependent on oil as a resource and that doing so will enhance our security, help consumers, and provide for a healthier environment.

Renewable energy, alternative fuels, and increased efficiency are the keys to the future. They are, as Woolsey testified, less vulnerable to terrorism. They also make America less vulnerable to the wild price swings caused by the OPEC cartel. I certainly look forward to this kind of energy policy for our country.

In conclusion, let me say this: the Arctic National Wildlife Refuge is a national treasure worth far more as a lasting legacy for future generations than plundered for a short-term speculative supply of oil that will not enhance our security or help consumers. I urge my colleagues to vote no on cloture and help us move onto the Railroad Retirement bill and other important matters at hand.

There is a marriage we can make, and it has to do with this nexus between how we produce and consume energy and the environment. We can—no pun intended—barrel, not down the oil path, we can barrel down the path of renewable energy: wind, solar, biomass, electricity, biodiesel—clean alternative fuels, safe energy, efficient energy use, small business, clean technology, keep capital in our community, stop acid rain in lakes, stop polluting the environment: the air, the water, and the land.

This is a marriage made in heaven, and it should be made right here in our own country.

I know the oil companies do not like this. I know that is not their future. But it is the future for consumers in our country. Coming from Minnesota, a cold-weather State at the other end of the pipeline, it is a no-brainer. When we import barrels of oil and natural gas, we export billions of dollars from our State—probably about \$12 billion a year. That is not our future.

We have an answer. A lot of it comes from rural Minnesota, it comes from

farm country. It is a far better path. Put the emphasis on renewable energy policy and safe energy. Put the emphasis on small business, on technology, keeping capital in our community, and on the environment. As the Catholic bishop said 15 years ago, we are all but strangers and guests on this land. That is the direction in which we should be going.

That is why I am strongly opposed to this amendment introduced by the Senator from Alaska.

I yield the floor.

The PRESIDING OFFICER (Mr. NELSON of Nebraska). The Senator from Alaska.

Mr. MURKOWSKI. Mr. President, I am continually amused and continually astounded by the general statements by my colleagues on the other side who have never taken the time, despite the invitations that have been extended, to visit this area themselves and to talk to the Native people and see indeed that they, too, have hopes and aspirations for a lifetime opportunity of jobs, of health care, and education.

The Senator from Connecticut made a comment about the letter he received. What he didn't tell you is that every child in that village has an opportunity to go to college. Believe me, that child would not have that opportunity without the oil activity associated with Alpine.

This whole debate is a smokescreen. It is a smokescreen promulgated by America's environmental community, which uses this as a tool for membership and dollars. These are the same arguments that were used 27 years ago against opening up Prudhoe Bay: You can't build an 800-mile pipeline across the length of Alaska because you are putting a fence across Alaska; the moose and the caribou won't be able to move from side to side; it is a hot pipeline; it is in permafrost; it is going to melt; it is going to break.

Where would we be today without that particular project and Prudhoe Bay that has supplied the Nation with 20 to 25 percent of its total crude oil for these 23 years? We would be importing more oil. We would be importing it to the west coast and to the east coast in foreign ships, not U.S. flag vessels.

I am just amazed at the general condemnation that somehow it is a 6-month supply of oil. That is the falsehood. Everybody in this body knows it. They can figure it out. The estimate by USGS on the oil that is anticipated to be in ANWR is somewhere between 5.6 billion and 16 billion barrels. Why don't they know? They do not know because only Congress can authorize exploration in the area.

If there is no oil, which sometimes does occur, nothing is going to happen. But to say it is a 6-month supply is terribly misleading because it is totally inaccurate.

If you cut off all the oil imports and if you didn't produce a drop in any other State, then it might last 6 months. But remember that Prudhoe Bay was 10 billion barrels of oil. It has produced over 10 billion barrels of oil. ANWR is 5.6 billion to 16 billion. It is one-half the median of 10 billion barrels; it would be as big as Prudhoe Bay.

I am getting kind of tired of hearing these slanted stories relative to facts. They say it is going to be 10 years. That is absolutely ridiculous. We have the pipeline built. We need about 70 miles of pipeline over to ANWR. It is a matter of putting up the leases and doing the updating on the permits.

Incidentally, that whole area has had a full environmental impact statement by the Interior Department.

This is more effort to simply throw cold water on reality.

I am sorry my friend from Minnesota is not here because he and I don't go out of this Chamber or leave Washington, DC, on hot air. Somebody has to put the fuel in that airplane or that train or that car. That is absolutely all there is to it. I wish we had other means of energy to move us around, but coal, gas, nuclear, and wind do not do it. We have to have oil. The whole world operates on oil. This is important, particularly at a time when we are seeing such grave circumstances associated with activities that affect the entire world occurring in Israel and the Mideast.

So what are the arguments? One, I guess, is that it is a 6-month supply. I think we have addressed that adequately for the time being. The 10-years is out of the question. The Porcupine caribou herd is another. Clearly, most of the Gwich'ins who follow the Porcupine caribou herd are in Canada. There are about 800 in Alaska. Canadians are leasing their lands. They are developing their own corporation because they are looking for jobs.

When we talk about caribou, since we are on the subject of these migratory animals, let's look at the experience we have had in Prudhoe Bay. That particular herd was 3,000 to 4,000 animals 15 years ago. It is 26,000 animals today.

Every single issue on the other side can be countered, but that does not stop the opponents. The opponents simply want to kill this for the time being until it can come up again. But eventually it will pass because it is the right thing to do.

I think it is fair to say that some do not want to see our President prevail on a few issues. Trade promotion is one. Energy is another. We are talking about stimulus in this country. You name a better stimulus than ANWR, creating 250,000 jobs, creating, if you will, revenue for the Federal Government of about \$2.5 to \$3 billion from lease sales, not costing the taxpayer one cent.

What about other jobs? Nineteen double-hull tankers will have to be built.

Some will be built on the east coast, the west coast, and the gulf, because under the law the old tankers have to be retired. These are double-bottom tankers. It is estimated it would pump about \$4 billion into the U.S. economy. It would take 17 years to build those ships. That is what we are talking about when we talk about jobs.

What about our national security? The more we become indebted to the Mideast oil-producing nations, the more leverage they have on us. It seems to me it is quite clear that there are a few people on this issue who clearly fail to recognize what is best for America.

Our President has asked, time and time again, for an energy bill. The veterans: The American Legion, the Veterans of Foreign Wars, AMVETS, the Vietnam Vets, the Catholic War Veterans; organized labor: The Seafarers International, the International Brotherhood of Teamsters; the maritime labor unions; the operating engineers, the plumbers and pipefitters, the carpenters and joiners; the Hispanic community: The Latin American Management Association, the Latino Coalition, the United States-Mexico Chamber of Commerce; the 60-plus Seniors Coalition, the United Seniors Association; Jewish organizations, including the Conference of Presidents of Major Jewish Organizations, and the Zionist Organization of America—I think we have a couple more that came in today that represent the opinions of America's Jewish lobby also there is the National Black Chamber of Commerce, the U.S. Chamber of Commerce, the National Association of Manufacturers, the Alliance for Energy and Economic Growth.

There are a few people whose voices ought to be heard who have expressed their opinion that it is in the national interest, the national security interest, to open up this area. I further refer to Americans for a Safe Israel. This is a letter dated November 13:

Americans for a Safe Israel is strongly in support of your amendment which would permit drilling for oil in the ANWR area of Alaska. . . .

We at Americans for a Safe Israel would be pleased if you would include our organization among American Jewish organizations in support of your amendment regarding oil exploration in the ANWR.

Mr. President, I ask unanimous consent that letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

AMERICANS FOR A SAFE ISRAEL,
New York, NY, November 30, 2001.

Hon. FRANK H. MURKOWSKI,
U.S. Senate Hart Building,
Washington, DC.

DEAR SENATOR MURKOWSKI: Americans for a Safe Israel is a national organization with chapters throughout the country and a growing membership including members living in

other countries. AFSI was founded in 1971, dedicated to the premise that a strong Israel is essential to Western interests in the Middle East.

We have many Middle East experts on our committees, who have authored texts on Israel and the Arab states and have appeared in television interviews, forums, and on newspaper op-ed pages. U.S. senators and representatives have been guest speakers at AFSI annual conferences.

Americans for a Safe Israel is strongly in support of your amendment which would permit drilling for oil in the ANWR area of Alaska. Your eloquence in addressing the Senate yesterday and this morning should have convinced the undecided that the arguments offered by senators in the opposition, or by environmental activists, are not based on the facts or realities in the ANWR and of our need for energy independence.

We at Americans for a Safe Israel would be pleased if you would include our organization among American Jewish organizations in support of your amendment regarding oil exploration in the ANWR.

Sincerely,

HERBERT ZWIBON,
Chairman.

Mr. MURKOWSKI. Mr. President, you have the Teamsters. I will read you a press release put out by the Teamsters today.

(Washington, D.C.) The International Brotherhood of Teamsters today renewed their call for a fair vote on a comprehensive energy plan before the U.S. Senate. The action came as the Senate was preparing to consider a series of procedural votes related to petroleum exploration in the Arctic National Wildlife Refuge. Minority Leader Trent Lott has proposed an amendment to railroad retirement legislation that would allow for ANWR exploration while also banning human cloning for six months. . . .

"Teamster members in the railroad industry have worked hard for a secure retirement," said James P. Hoffa, Teamsters General President. "It is unfortunate that Senator Daschle is jeopardizing [Senator DASCHLE is jeopardizing] this important legislation by denying the ANWR exploration a separate floor vote. These two pieces of legislation deserve to be passed on their own merits."

I certainly agree with him.

He further states:

"Exploring in the ANWR is clearly the right thing to do," Hoffa said. "It will reduce our reliance on foreign oil while creating thousands of jobs for working families. A vote on the energy package must not be delayed any longer." . . .

Unfortunately, the Democratic Senate leadership has attempted to thwart the will of the majority by refusing to allow an energy vote to come to the Senate floor.

That is the factual reality. The Democratic leadership has precluded us from having an up-or-down vote on an energy bill. So here we are today on a Monday afternoon arguing the merits of a very complex procedural situation involving railroad retirement as the underlying bill with amendments for cloning and amendments for H.R. 4, the House energy bill.

For reasons unknown to me, the majority leader has indicated he is willing to take up a bill when we come back after the recess, but he will not tell us

that he is willing to conclude it. If he were willing to, say, take it up when we come back, with the assurance that we would have an up-or-down vote, and preclude any situation where they would simply pull the bill down and not bring it up again, I would find that acceptable. If he would give us a time certain, such as when we come back to take up the bill, and then perhaps have a final vote on it prior to the February recess—we have suggested that to him, but so far he has declined.

I encourage, again, the majority leader to consider the merits associated with getting up an energy bill because the more time that goes by the more difficult it is to simply ignore the issue.

We have seen the national farmer support groups—and I just read here: The National Energy Security Act low-income fuel programs and a provision for oil exploration and production of a tiny portion of the Coastal Plain in the Arctic Wildlife—the Senate needs to pass this act this year.

There is more and more heat coming on this issue as the general public recognizes the reality associated with developing this particular area where there is a likelihood of a major oil discovery.

The PRESIDING OFFICER. The Senator has used 10 minutes.

Mr. MURKOWSKI. I see the senior Senator from Alaska is in the Chamber. He may wish to be recognized at this time.

The PRESIDING OFFICER. The senior Senator from Alaska.

Mr. STEVENS. Mr. President, I understand the distinguished Senator from Connecticut was in this Chamber addressing the Senate concerning the days that President Eisenhower and his administration considered lands in Alaska. That is of particular importance to me because I was there. I was the assistant to Secretary of the Interior Fred Seaton. I was in the meetings with President Eisenhower. And I am happy to tell the Senate what the President did and what the Secretary of the Interior did. Unfortunately, Senator LIEBERMAN has been misinformed.

The Eisenhower administration withdrew 9 million acres of the northwest corner of Alaska as the Arctic Wildlife Range. It was the Arctic wildlife range, not a refuge.

At that time the order specifically provided that oil and gas exploration and development would be permitted under stipulations to protect the flora, fauna, fish, and wildlife of that portion of Alaska. Subsequent administrations did not issue such stipulations so no oil and gas exploration took place. However, as time went by and I then became a Member of the Senate, we dealt with the settlement of the Alaska Native land claims. Those claims were settled by an act of Congress in 1971. In that basic law, which we called the

Alaska Native Claims Settlement Act, there was a provision in section 17(d)(2) that required the study of national interest lands in Alaska.

That was one of the requirements that was demanded of us, that we agree to the study of which lands should be set aside in the national interest because the statehood act of Alaska gave the right to the State of Alaska to select 103.5 million acres of public land, vacant, unreserved and unappropriated land. And the 1971 Alaska Native Claims Settlement Act gave the Native people of Alaska the right to take 40 million acres of Alaska land, plus some additional lands that would add up to about 45 million acres.

The Congress, at the time the Native Claims Settlement Act was passed, was worried that such selections might impede the national interest. And there was a review undertaken of what lands should be set aside in the national interest.

We worked for several years to try and get the Alaska National Interest Lands Conservation Act passed. In the Congress ending in 1978, we did achieve the passage in both the House and Senate of a bill to satisfy the requirements for the 1971 Act, that section 17(d)(2), as I mentioned.

Unfortunately, at the last minute of that Congress, just prior to adjournment, my former colleague Senator Gravel objected to the approval of the conference committee on that bill and required the reading of the legislation which was an extremely long bill. We had already agreed to an adjournment resolution and, in effect, that killed the bill for that period of time.

In 1979, when we returned, we started working again on the Alaska National Interest Lands Conservation Act. And by the time we finished it, the bill had been changed substantially from what it was in 1978. One thing did remain the same: The Arctic National Wildlife Range was changed from a range to a national wildlife refuge, and it was more than doubled in size. Of the original 9 million acres, that land was to be part of the Arctic National Wildlife Refuge. But a section authored by Senators Henry Jackson of Washington and Paul Tsongas of Massachusetts provided a compromise to meet the Alaska objection about the denial of the right to continue to explore the Arctic Plain.

That is what we call section 1002 of the 1980 act. It provided for the right to proceed to explore that 1.5 million acres to determine if it had the potential for oil and gas and to have an environmental impact statement presented to the Congress and approved by the President and by the Secretary of Interior.

That has happened. As a matter of fact, there has been more than one environmental impact statement. Presidents Reagan and Bush asked for the

right to proceed for the exploration. That was denied by the Congress at that time.

When President Clinton was in office, the Congress approved proceeding with the leasing of oil and gas on the 1.5 million acres, and President Clinton twice vetoed the bill. So where we are today is we are still trying to fulfill a commitment that was made to Alaska by two Democratic Senators in 1980 that we would have the opportunity to continue to explore for and develop the vast potential of the Arctic Plain. We have been trying since that time, of course, to obtain approval of it.

The area we have now, the 19 million acre Arctic National Wildlife Refuge, originally contained just 9 million up here in the corner. As I said, that was opened to oil and gas leasing. It included the coastal plain. It was part of the original Arctic wildlife range. What we are trying to do now is to once again fulfill the commitment made to us in section 1002 of the 1980 act that the analysis and exploratory activities may proceed.

Unfortunately, this has become the icon of the radical environmental movement in the United States. People insist on coming to the floor and trying to tell the American people that this area was never intended to be explored. The commitment was made to us, and it was made to me personally, specifically, by Senator Paul Tsongas and Senator Henry Jackson that it would remain open. That was one of the reasons we did not object to the passage of the bill in 1980. The two of us who were here in 1978 were still here in 1980 when this bill passed. Senator Gravel and I agreed, because of the representations made to us by the two managers of the bill, that this land would remain open and could be explored. And if oil and gas was discovered, it could be produced from that area.

It is probably the largest source of oil area in the United States. It is a sedimentary basin. It is the largest, probably, that we will ever see in the North American continent. Yet it goes unproduced because of the opposition of radical environmentalists who try to tell the American public something that is not true. This land has not been closed. It has never been closed to oil and gas exploration. But in order to proceed with the development in terms of production activity, it takes approval of an act of Congress signed by the President.

We have been after that now for 21 years—even more if you go back to 1971. It is 30 years we have been telling the American public: This is probably the greatest place on the North American continent to produce oil to meet our needs.

I, for one, hope we will have an opportunity to debate it and vote on the merits of this bill during this Congress.

I congratulate my friend and colleague Senator MURKOWSKI for all he is doing to bring it to the attention of the American people.

When the time comes later on this afternoon, I will talk about some of the opportunities we have to meet our needs. Too many people consider oil solely as gasoline. Less than half of a barrel of oil becomes gasoline. As a matter of fact, the barrel of oil goes into everyday products. Fifty-six percent of a barrel of oil that comes out of the ground becomes other products besides gasoline: home fuel, jet fuel, petrochemicals, asphalt, kerosene, lubricants, maritime fuel, and other products. Everything from Frisbees to panty hose comes from oil. Yet people talk about how to have alternative supplies of energy.

Where do you get the 56 plus percent of the barrel of oil that goes into products other than gasoline? You just can't get it. Look at this, items made from oil: toothpaste, footballs, ink, lifejackets, soft contacts, fertilizer, compact discs. As a matter of fact, there is no question that one of the most versatile products known to man is petroleum. A barrel of oil is a barrel of gold for our economy. We need to talk more about what it means to open up the Arctic wildlife area, the 1002 area, which was guaranteed to be made available to us for oil and gas development.

The PRESIDING OFFICER. The Senator has used 10 minutes.

Mr. STEVENS. I thank the Chair.

The PRESIDING OFFICER. If nobody yields time, time will be charged equally to both sides.

The Senator from Massachusetts is recognized.

Mr. KERRY. Mr. President, how much time is remaining for the opponents of the Lott amendment?

The PRESIDING OFFICER. The majority has 21 minutes.

Mr. KERRY. Mr. President, I ask unanimous consent that I be permitted to proceed for such time as I may use.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KERRY. Mr. President, I will speak to some of the comments we just heard. I must say, I am a little bit disturbed that the quality the debate is already, to some degree, seeming to move into sort of a personal characterization about who is representing whom. I heard one Senator from Alaska suggest that all this is is an effort to smokescreen, that it is a membership drive for environmentalists. My very good friend, the senior Senator from Alaska, suggested that radical environmentalists are driving this issue. Well, I don't know who he is talking about. I haven't talked to any radical environmentalists. In fact, the fundamentals of my decision on this issue are not based on environmental choices; they are based on energy

choices, based on economics, and they are based on the realities of the choices we face in this country about oil.

I completely agree with the Senator from Alaska that some wonderful products that all of us use every day are oil-based. Indeed, we are going to continue to make those products. There is nobody here who is talking about eliminating one of those products—not one of them. Those products don't spit out emissions from the exhaust on the back of a vehicle that is contributing to the problem of global warming. Those products are used and manufactured—many of them—in very different ways. No one that I have heard in this debate is talking about not drilling for oil or not using oil. This country faces—I don't know—a 40- to 50-year transition in order to begin to be able to really shift away from our dependency on oil.

It happens that that 50-year curve also coincides very precisely with the problems we face on global warming. Ask any of the leading scientists in the United States—not Senators, not people who go out and do fundraising and represent interests in the U.S. Senate—what they can tell you about what we face in terms of potential catastrophic—and I underscore that they use the word “catastrophic”—climatic shifts about 50 years from now. That is precisely the amount of time we face with respect to the potential for weaning ourselves from the dependency on oil.

Now, I hope we can stay away from these characterizations. I don't represent any group. I represent the State of Massachusetts. I represent my oath of office as a Senator to uphold the Constitution and look out for the welfare of our country. I believe the welfare of our country is better served when we begin to create a true, independent energy policy—a policy that brings us to independence from reliance on oil. That is going to take a long time. I have no illusions about that.

There is no windmill that is going to substitute for that tomorrow. There is no renewable or biomass that is going to substitute tomorrow. It will take a period of transition and work. It is important that we deal with the realities of this debate. The Senator from Alaska is absolutely correct when he says that a 6-month supply is not the appropriate way to talk about this issue because that represents if the United States were cut off from all fuel. He is absolutely correct. A 6-month supply—if you indeed have the amounts of oil some people suggest might be there—is only a viable number if there were no other suppliers from other places in the rest of the world. None of us are presuming, given our relationship with Great Britain, Venezuela, Mexico, and other countries in the world, including our increasingly renewed relationship

with Russia, and our own production—nobody is really looking at that as the potential.

This is a phony debate. The reason I say that is that I heard my colleagues trying to scare Americans into believing that they ought to somehow start digging in the Arctic because we are at war in Afghanistan, we have a threat in the Middle East, national security is at stake, and the military is at stake.

We have heard veterans groups recited here. I am a cofounder of the Vietnam Veterans of America. I am a proud veteran. I am proud of my service. I know enough about the military and the military needs, the 300,000 or so barrels a day the military might consume under these circumstances, to recognize that the 8 million barrels we produce in the United States is going to satisfy the needs in an emergency of the military.

Moreover, Mr. President, let me suggest to you why this is such an artificial debate. There are more than 7,000 leases for oil and gas development in the Gulf of Mexico open for exploration and for development today. As I stand here on the floor of the Senate tonight, 7,000 leases are open for exploration, more than 80 percent covering 32 million acres, and are not producing oil. They are not drilling for oil. They could be. Anybody who comes to the Senate floor and says that today you have to drill in the Arctic Wildlife Refuge because the United States is threatened is not telling the truth to the American people because the fact is that there are countless millions—32 million, precisely, not countless. It is not just because they don't have oil that they are not drilling. They are not drilling because they are being mapped for future production or they are simply sitting idle by choice because the economics drive that choice.

Individual companies that own leases have decided, for business reasons and most likely because of the oil price or infrastructure limitations, they are not going to develop those leases now. They are waiting for the price of oil to maximize profits. In fact, some companies—Exxon, to be precise—are letting their leases in the United States sit idle while they invest in Saudi Arabia and other countries.

So don't let any Member of the U.S. Senate be cowed or stampeded into believing that this has anything to do with the current national security issue of Afghanistan or the Middle East. We have oil we could be drilling today.

Moreover, 95 percent of the Alaska oil shelf is open for drilling—95 percent of it.

Here is an article from *The Energy Report*, July 30, 2001:

Responding to increased industry interests in North Slope gas, the State of Alaska plans to open up new acreage in the North Slope foothills. . . .

Governor Tony Knowles recently announced that beginning next May the State would include additional acreage in the 7 million acre Foothills region in area-wide oil and gas lease sales in its 2002-2006 leasing schedule. . . .

Moreover:

The Bureau of Land Management expects to hold a second oil and gas lease sale in the northeast corner of the National Petroleum Reserve-Alaska in June 2002. The agency will reoffer approximately 3 million acres made available, but not leased in the prior NPR-A sale in May 1999.

There it is. So there is no rush here. In effect, what we have in the ground in the Alaska Wildlife Refuge, should the United States ever be pushed to a corner and our back is up against the wall, we are at war or there is some circumstance where our allies have forsaken us, and we haven't been smart enough as a government to make the choices that we have today to move to alternatives and renewables and other forms of power, then we will have the most God-given ready natural Petroleum Strategic Reserve. Rather than buying it and putting it in the ground, it is in the ground, and we leave it there for that moment when the United States might need it.

I believe the reason I am here opposing this—not at the behest of any group—is because I have for 30 years been watching the United States procrastinate. I remember as a young law student sitting in line at gas stations studying my torts and contracts while I was waiting an hour and a half to get gas. That was 1973. We were told: We have to be energy independent; we have to work at this.

Then we imported 30 percent of our oil from other countries. Today we are over 50 percent. The fact is, there is one simple reality that our friends from Alaska avoid: 25 percent of the oil reserves of the world are in other countries. We use 25 percent. The United States of America uses 25 percent of the oil reserves, but we only have 3 percent. Any schoolkid can figure out that if you only have 3 percent of something and you are using 25 percent, you either stop using it or you are going to have to get it from those other people. That is exactly what we are stuck in today.

No matter what figure we give the Senator from Alaska—if I take the top figure of the Department of the Interior—and say it is \$16 billion and you amortize that out, 1 million barrels a day, 365 days a year, so it is 1 billion barrels every 3 years or so—

Mr. MURKOWSKI. Will the Senator from Massachusetts yield for a question?

Mr. KERRY. I want to finish what I am saying. We have very little time. We are going to have weeks to debate this when we come back in January, and I look forward to that debate to a great extent because that is when we are going to help America view the possibility of alternatives.

For instance, in Europe, they have diesel engines. Their cars get 60 miles to the gallon with a diesel engine. It is exactly as powerful as many of our cars. The cars can go as fast. If you want to break the speed limit with your 60-miles-per-gallon diesel, you can break the speed limit, but you get 60 miles doing it.

We are going backwards. We used to get 27 miles per gallon. Now we are down to 22. We are doing worse than we were doing in 1973 when we said we would have to be energy independent.

Mr. President, there is a long litany, all the way through the years, that world consumption of oil is about 70 million barrels a day. We produce 8 million barrels. The amount that we produce, even if we included additional oil from Alaska, will never be sufficient to impact the price of oil in the world market. So when my colleagues come to the Chamber and suggest we are going to somehow change the price or increase the supply on a long-term basis, that is not true, and I will document it.

From 1972 to 1975, America produced more than 70 percent of our oil domestically. Oil prices climbed more than 400 percent when we produced it domestically. From 1979 through 1981, America produced more than 50 percent of its oil, and oil prices more than doubled. That spike was set off by a number of events: OPEC, the Iranian revolution, the Iranian hostage crisis, Middle Eastern production cuts, and the onset of the Iran-Iraq war.

Through all of 1991, we produced 50 percent of our oil domestically. Oil prices doubled. In 1999, we produced slightly less than 50 percent of our oil. Oil prices tripled from the historic flows.

The reverse has also been true. We have had low oil prices, and we have had high imports. When oil reached a near record low in the late 1990s, guess what. Imports climbed over 50 percent.

The fact is that U.S. production will not lower and stabilize the global price. Look at Great Britain. Great Britain is surplus in oil. Great Britain produces enough oil to export. They do not affect the global price as a consequence of even being independent. There is no British market for oil. Prices rise and fall in Britain with the world price, and we all know that for reasons of history, allegiance, economics, and national security, they are enmeshed in global affairs as we are.

I will quote Lee Raymond, chairman and chief executive of ExxonMobile:

The idea that this country can ever again be energy independent is outmoded and probably was even in the era of Richard Nixon. The point is that no industry in the world is more globalized than our industry.

The conservative Cato Institute has said:

Even if all the oil we consumed in this country came from Texas and Alaska, every

drop of it, assume we didn't import any oil from the Persian Gulf, prices would be just as high today, and the main reason is that domestic prices will rise to the world prices.

That is the Cato Institute. Do not tell us in this Chamber this is going to affect independence. It is not. We cannot produce enough oil. Do not tell us it is going to affect world price because there is not an economist who suggests it will. Then the question is: So why are we doing this?

There is a better way than this alternative. We need to wean ourselves from oil, and we need to engage in a program—H.R. 4 is an extraordinary giveaway program that does not do any of the things we need to do in energy policy to create a truly independent nation.

I suggest this debate is going to be long, it is going to be interesting, and we are going to provide this country with a set of alternatives. I am all for helping the folks in Alaska. I admire the way both Senators are fighting for the people of their State, but we can find a better way to help the people in Alaska. There is an awful lot of oil. We should be building the natural gas pipeline tomorrow. If we want to help the people of Alaska, that is the best way we can create jobs.

I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, I am glad to have been here when the Senator from Massachusetts was speaking. He is a friend. We have visited one another and have shared the privilege of having wives who are great friends.

I say to my friend from Massachusetts, I hope if I ever stand on the floor of the Senate and make a pledge on behalf of the people of Alaska to do something for Massachusetts that my successors will honor that. I stood here and debated with the predecessor of the Senator from Massachusetts for a long period of time in 1977, 1978, and 1979. We finally ended up in Senator Jackson's hideaway for 3 days around the clock, and I mean around the clock.

We reached a conclusion, and that conclusion was an offer from the Senator from Massachusetts to me. It was: We will set aside 1.5 million acres up there so you can go ahead with that oil and gas development, but let us create this system of withdrawals in this State. Almost 100 million acres in Alaska were set aside at that time.

For 9 years in this Chamber we debated what was a national interest of Alaska's land. Nine years, Mr. President, and the Senator from Massachusetts, God rest his soul, Paul Tsongas, said in Senator Jackson's office: We can work this out. If you are willing to be reasonable, we will be reasonable. We will guarantee you that 1.5 million acres will be explored. Look at his record. In fact, when the time comes to get down to debating whether or not

this bill will pass, I hope it will be considered by the Senate as the Alaska pipeline was, as that 1980 act was: without filibuster. The pipeline was made available to people in the United States by one vote. Vice President Agnew broke the tie and gave us the Alaska pipeline, which has brought 13 billion barrels of oil to the United States.

I hear the estimates that we have nothing more than a 6-month supply in ANWR. That is ridiculous. At the time we were debating the Alaska pipeline, they told us there would be approximately 1 billion barrels of oil, if you are successful. We have already produced 13 billion barrels of oil, and we have a 15- to 20-year supply at the current rate, but that is not keeping the pipeline full.

People say: Why do you want to go ahead with ANWR now? During the Persian Gulf war, there were 2.1 million barrels a day of oil sent to the south 48 from the Alaska pipeline. Today, it is 1.2. The pipeline is no longer full. The cost of Alaskan oil is going up because it is not full. We know there is oil to be produced.

This 6-month supply theory is a very interesting thing. I will stand on the other side of my chart so my friend can see it perhaps. This is a chart that shows what happens with increased production. If we have no new production in Alaska, this is the flow of oil out to 2050. If we produce in the Central part of Alaska, this is the flow of additional oil. If we go through the National Petroleum Reserve of Alaska—which is another area set aside, by the way, by President Harding after the Teapot Dome. It has never really been produced. Again, my friend does not like to be called a radical environmentalist. I think that is better than extreme environmentalist. In any event, this oil is not available to us because we cannot get in there to drill, either.

The important thing is, this is ANWR. If ANWR comes in, this is the increase in oil over this period between now and 2050 to the United States. Look at it. It is more than what is there now. We believe there is more oil in the Arctic National Wildlife Refuge area which is 1.5 million acres that was set aside for oil and gas production than we have in all of Alaska's remaining lands now.

This area is the most important area for our energy sufficiency. I am not talking about energy independence. It may be we could not get to be energy independent, but think about this: This area is basically not available to us. Access to the major pieces of the Outer Continental Shelf is not available to us. The entire NPRA is not available to us, and ANWR is not available to us. Look what would happen in the next 20 years if we did have it available to us. We would get up to the point where we

are producing a great deal more, more than twice as much oil as we have available today from domestic production. Now that is energy sufficiency and it is energy independence in the sense of being able to exist through a period of crisis with our own production.

My friend wants to ask a question. I am glad to answer any question he has.

Mr. KERRY. Mr. President, I ask the Senator, that very large increase of blue is based on the best assumption of what might be findable, am I correct?

Mr. STEVENS. No, that is not correct. That is the medium assumption.

Mr. KERRY. How many billions of barrels does that assume would be present?

Mr. STEVENS. That is 10.3 billion barrels.

Again, I point out to my friend from Massachusetts, the estimate for the existing area of Prudhoe Bay was 1 billion barrels. We have produced 13 billion so far.

The mean estimate is 10.3. We believe it is a lot bigger than that. If oil is there, it is big. It is the biggest sedimentary basin on the North American continent if it contains oil. We do not know yet, but we will not know until we drill.

The real point is, though, we can have a decided improvement in our ability to rely upon our own sources in the event of a crisis if we really go in and open up this area and it is producible. Remember, it takes an act of Congress to open up. It is the only place in the United States where the Mineral Leasing Act was qualified by a provision of Congress, and I agreed to that. That was a Tsongas provision. It will take an act of Congress, passed by both Houses and signed by the President, to do this oil and gas exploration.

The area remains subject to oil and gas exploration until it has been explored. This will not become part of the Arctic National Wildlife Refuge until it is explored. It is reserved for oil and gas exploration, in effect, until we get permission to go in to see if it is there or not.

Mr. INOUE. Will my good friend yield for a question?

Mr. STEVENS. Yes.

Mr. INOUE. When we speak of ANWR, what are we talking about?

Mr. STEVENS. We are talking about the Arctic National Wildlife Refuge.

Mr. INOUE. How large is that acreage?

Mr. STEVENS. It is 19 million acres. It was 9 million acres before 1980 as the Arctic Wildlife Range.

Mr. INOUE. Of that, how much is proposed to be set aside?

Mr. STEVENS. This entire 19 million acre area is the size of South Carolina. Of that, 1.5 million acres was set aside as the Coastal Plain for oil and gas exploration. Of that 1.5 million acres area, we need just 2,000 acres to reach the vast amounts of oil and gas.

Mr. INOUE. It is a small part of it?

Mr. STEVENS. The Senator from Hawaii asked a very good question. At the time that Prudhoe Bay was developed, we did not have today's advanced technologies, such as horizontal drilling. We can access the oil and gas from the entire 1.5 million acre area of this sedimentary basin from just 2,000 acres.

Mr. INOUE. I recall during the pipeline debate many of my colleagues and friends were suggesting the pipeline would decimate the caribou flock. I gather now that it has increased tenfold.

Mr. STEVENS. In parts of the State, it has increased nearly tenfold. In the area of the pipeline, this 800-mile pipeline, without question every one of the herds has increased by at least a magnitude of 4, some as much as 9 times. In fact, two of the herds now stay nearer to production areas because the food and the improvement of their habitat has been so great.

By the way, because of acts of the oil industry, they went to our university and developed new strains of grasses and new approaches to vegetation, and those caribou herds do not migrate at all. The one that comes to the plain of the Arctic area into this 1002 area each year, it comes in from Canada. It migrates up. It spends 6 weeks up in the summertime. The Senator's question is very pertinent.

Mr. INOUE. The pipeline has not decimated the caribou flock?

Mr. STEVENS. It has not, and this will not either because we do not do oil and gas exploration in the summertime when they are there. We have committed to be certain there would be no interference with the caribou migration.

Mr. INOUE. I thank the Senator very much.

Mr. STEVENS. I thank the Senator for his questions.

What I think is important to do is to make sure the people understand that because of the decline in the throughput of that pipeline, the Trans-Alaskan oil pipeline, we now are sending less than half of the amount it was designed to carry on an average day to the Lower 48. It was filled because of the discovery of the great Prudhoe Bay oilfield, and there was a second field discovered at Kuparuk. This area has produced, as I said, 13 billion barrels of oil so far. One of the sadnesses I have, as I have already indicated, is that we had a commitment. That 1980 act would not have become law if the Senators from Alaska had opposed it. The whole Congress knew that. It had almost become law in 1978 and my colleague objected, and we went back through the process. The process came to fruition at the end of 1980. The act passed before the election. President Carter did not sign this bill before the election. After the election but before leaving office, after President Reagan

had been elected in the fall of 1980, President Carter signed it. In fact, he invited me to come to the White House at the time. President Carter signed that bill, and he and others now raise objection to the provisions of the law he signed into law.

It is the feeling that one Congress cannot bind another, but the statement of a Senator representing a State and a party ought to be binding upon the Senate. We had exchange after exchange over the 1980 Alaska National Interest Conservation Lands Act, and I thought those commitments were worth believing. I believed it when the Senator from Massachusetts, Senator Tsongas, said he would stand by this concept of a promise that this area would be explored and developed if it proved to have oil and gas. I trusted my late and dear friend Senator Henry Scoop Jackson of Washington when he called us up to his office and said we have to listen to Senator Tsongas because he is making an offer that is real; it was real.

Twenty years later, I am still in the Senate arguing for the Senate to observe the commitments that were made to our State and to the people of the United States.

While I have this chart, I hope everyone will understand—the Senator from Hawaii asked about it—this is the State of Alaska, obviously. Alaska is one-fifth the land mass of the United States, 20 percent. It extends from one end of the Lower 48 to the other. It is almost as wide as the United States, and from Barrow down to Ketchikan it is like going from Duluth to New Orleans. This is an enormous area.

People ask: Why don't they go out here to NPRA and develop leases? Because there is no transportation system. It takes a monstrous development of oil to support an 800-mile pipeline and run it a full 365 days a year. Currently, we are running half full.

The wilderness area is the area colored in brown, the 1002 area on the Coastal Plain is in green. It was guaranteed to Alaska to be available for oil and gas exploration. With new technology, we propose to use just 2,000 acres. It is impossible to believe there is such a battle over that. I point out, in this we call the Arctic National Wildlife Refuge Coastal Plain, set aside for oil and gas exploration, is a native village, the village of Kaktovik. Adjacent is the Sourdough Oil Field. And 100 miles west are the two largest deposits of oil and gas on the North American Continent today and they are both producing.

Why do we do this? What is the national interest now? If ANWR is open, 735,000 jobs will be created throughout the United States to get parts, people, produce—everything that is necessary to develop an area and support its development that far away from what we call the contiguous 48 States.

This is a forecast made and relied upon by the great labor unions of this country that I am proud to say are supporting our position that this area ought to be opened to oil and gas development. The Senator from Massachusetts said we should build a gas pipeline. Yes, we should. However, a gas pipeline is more affected by price than the oil pipeline. Gas in our country fluctuates in great variation. Just 18 months ago we saw rolling blackouts in California and record high natural gas prices. Now that is not going on because of a different price structure and infrastructure for delivering the resource and varying market conditions.

What we do not have is another enormous areas in the United States to explore and develop with the same potential of the Arctic Plain.

Despite everything I have said, I will oppose the cloture vote for this amendment. I believe the underlying bill, the Railroad Retirement Act, is essential to a great portion of the families of our working people who have retired. I deplore the fact we have to have a cloture vote to get this bill acted upon. Having our own bill up there will mean, because of the passage of time, now we have to the end of this Congress. When we first started this we thought we had time to get H.R. 4 considered and the Railroad Retirement Act passed, too. I don't see that happening now. I intend to vote against cloture, although our provision is in it, even though the ANWR provision is in H.R. 4. We ought to get down to the business that is very meaningful to a great number of families. There are some families in Alaska affected by railroad retirement issues, but only a few.

The families of former railroad workers should be assured we are considerate of their needs and understand their position. I hope that bill will pass, go to conference, and be approved after a conference. I understand there are a couple of provisions to which the administration has objected. I hope they can be resolved. I don't think they affect the basic provision of the retirement system.

I yield the floor.

The PRESIDING OFFICER (Mr. JOHNSON). The Senator from Alaska.

Mr. MURKOWSKI. Mr. President, I comment relative to the statement by the senior Senator from the State of Alaska. Our President has asked specifically that the Democratic leadership pass three bills: Trade promotion, energy, and the economic stimulus bill. It seems to me the leadership has been reluctant to do so. The justification for that is beyond me other than, clearly, it is fair to say the objections, to a large degree, are centered around the energy bill.

I will continue my dialog relative to what we are doing. It is Monday afternoon and we have an underlying railroad retirement bill with two amend-

ments: One is cloning and the other is H.R. 4, the energy bill. To make sure anyone that perhaps has misunderstood the statements on the other side relative to the tax portion, in our bill there is no provision for tax increases. That \$33 billion in the House bill is not in this version of H.R. 4. The inconsistency is because the Democratic leader has refused to negotiate on the requests of our President: Trade promotion, energy, and the economic stimulus. Instead, he is moving ahead, now with the railroad retirement and the farm bill next.

Is it not rather interesting that we cannot at this time get an energy bill up when, clearly, we have a crisis in the Middle East? It is interesting to reflect on the comments associated with the leadership in the Senate. It is clear that the Senator is blocking a vote precisely for one reason. He knows Alaskans have the votes to pass out an energy bill in this body if given an opportunity. Has he given this opportunity to us? Clearly, he has not. He has indicated in several statements: My comment is we will raise the issue, debate it, and have a good opportunity to consider energy legislation prior to the Founders Day break in mid-February.

If the leader would conclude by suggesting we would resolve it by then, in other words, by Founders' Day, or at some specific time, then I think we could have a fair vote. All we are asking is for a fair vote on the issue.

He indicated further: There will be votes on ANWR, but I'm not at this point ready to commit to an up-or-down vote.

He is saying we will have to overcome a cloture vote. We cannot have a simple majority vote. The inconsistency goes further. Senator STEVENS references several items; I go back to a personal item, the attitude of the people living in the North Slope of Alaska. Those who have gone up there and taken advantage of the invitation have come back with the sincere appreciation and understanding that these people are Americans, they have a right to life, they have a right to look towards a future based on reasonable economic development prospects, health benefits, and so forth.

I ask unanimous consent to have printed in the RECORD upon completion of my statement a letter from the president of the Arctic Slope Corporation.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See Exhibit No. 1.)

Mr. MURKOWSKI. He indicates:

DEAR REPRESENTATIVE: The decision to allow oil and gas development in the Coastal Plain of the Arctic National Wildlife has significant impacts on our effort to make a success of the very directive of Congress in ANCSA. Our self determination is at stake. It is fundamentally unfair, dishonest, and potentially unlawful to deny us the right to see our land and the small area of the Coast-

al Plain opened to exploration of development. Congress made a deal with our people and we have tried hard to play by the rules.

Now it is denying us that progress.

Here is a picture of a building in Kaktovik, including the community hall. There are two people, the boy on the bicycle and the older man on the snow machine, which represents the significance of the picture. We have some other pictures here showing some of the kids. I do this so we can get a feel for the real, warm, personal association of what this means to the people of Kaktovik.

The letter further states:

By locking up ANWR, the Inupiat people are asked to become museum pieces, not a dynamic and living culture. We are asked to suffer the burdens of locking up our lands forever as if we were in a zoo or on display for the rich tourists that can afford to travel to our remote part of Alaska. This is not acceptable.

I think that is an appropriate comment.

Further:

The Inupiat of the North Slope have lived and subsisted across the Arctic for thousands of years. Learning not only to survive, but to develop a rich culture, in the harsh environment of the Arctic has instilled a deep respect and appreciation in the Inupiat Eskimo people for that environment and the animals that inhabit our area. We don't need outside "environmentalists" telling what to do with our homelands. Our own development standards and the controls imposed by our locally controlled borough government will ensure that these lands are protected. It is our people that live in ANWR, particularly the Coastal Plain of ANWR. . . .

He concludes this letter by saying:

I beseech you to search in your heart to do what is right for my people. Do not let the misguided intent of a few do harm to the Inupiat Eskimo. Do not defeat the very Act you passed a generation ago. Support the passage of legislation to open the Coastal Plain of ANWR to oil and gas development. I and my people—the real people—thank you for consideration of our request.

That is the reference in the reflection from the people who are affected by this action.

We have little notes here, many of them supporting opening the ANWR development because it gives them opportunities. These are opportunities that your children and my children perhaps take for granted. What are they supposed to do? Are they supposed to be isolated? They have a landmass of about 95,000 acres I can show you on this chart. There it is, right in the middle of the 1002 area, right in the middle of the 1.9 million acres of land we are talking about. But 95,000 is private land, owned by these Native people. Until Congress gives them the right to initiate exploration, they cannot even drill for natural gas on their own lands to heat their own homes. That is an absolute injustice. None of the speakers talks about the people of the area. They ignore the people. They do not want to acknowledge that there is any

existence of a footprint of man up there. That is a rather blatant and I think inappropriate way to simply dismiss this matter.

The assumption is this area has never been touched. It has been touched. There is the village of Kaktovik, the people who live there, their homes, their generators. They have a dependence on a way of life. By putting a fence around them and not allowing the appropriate opening, we clearly are disenfranchising them as some other class of American citizens. I find that terribly offensive.

I think each Member should reflect a little bit on the realities. I have to acknowledge my expertise based on having visited the area, having met with the people, and having an understanding. But my opponents can just generalize and brush it off, that the concerns of the people of the area do not amount to anything.

Furthermore, as we look at some of the statements that have been made about the coastal area—I am going to put up a chart. The statement has been made that 95 percent of the coastal area is open for leasing. That is absolutely wrong. That is absolutely wrong. Mr. President, 14 percent of Alaska's arctic coastal lands are open for oil and gas exploration. There it is. It covers the entire breadth from the Canadian boundary, past Point Barrow, around to Point Wales.

The fact is, only 14 percent of Alaska's arctic coastal lands are open to oil and gas exploration. These are the lands that are owned by the State of Alaska between the Colville and Canning Rivers. If the ANWR Coastal Plain were open to exploration, the total would only rise to 25 percent.

The breakdown on that is that the ANWR Coastal Plain is 11 percent, ANWR is about 5, the National Petroleum Reserve is 52 percent. That area is not open. If you look at the area, you can see numerous lakes. There is legitimate environmental concern associated with activity in those areas, and that is why leases have not been granted by the Department of the Interior.

As we look through the general discussion on this issue, all we want is an up-or-down vote on the issue of an energy bill. That energy bill should contain ANWR.

The position we have been put in is rather extraordinary. As a Senator, I resent it. The authority has been taken away from the committee of jurisdiction, the Energy and Natural Resources Committee. It has been taken over by the Democratic leadership; they say they will introduce a bill very soon, perhaps this week. But that bill has not had a hearing, it has not gone through the Energy Committee.

We have had 14 years or more of ANWR in the Energy and Natural Resources Committee. We have had over 50 witnesses. We have had over 14 hear-

ings. We are ready to go with a bill that has already passed the House of Representatives. That is H.R. 4. That is what is before us now.

As a consequence, what the Democratic leadership has decided to do is simply take away the authorization from the committee process and direct it simply from the office of the majority leader to the floor of the Senate.

I do not know whether that is the kind of debate he is talking about at a later date, but I am not going to sit by and lose opportunities to object to unanimous consent request until we get some kind of agreement from the Democratic leadership that we can have an up-or-down vote on an energy bill in a time sequence that reflects the ability to complete it.

The idea of coming in when we come back in January and starting a debate on the issue, and then pulling it down, is just not good enough.

I think the support associated with this issue has gained a broad enough base that we could simply demand it, and the political downside to it, from those who are in opposition to it, I think is significant. What you are going to have to do is vote on what is right for America. If we do not develop this area in Alaska, we are going to bring in oil to California, Washington, Oregon—the west coast of the United States. Do you know how it is going to come in? It is going to come in foreign vessels, not come down in U.S. flagged vessels, as Alaska oil must come down under the Jones Act. It is not going to result in 19 new double-hulled tankers being built to bring Alaska's oil down to the west coast. It is going to come down in foreign tankers with foreign crews. So we are looking at a stimulus package. We are looking at jobs.

To suggest it is a 6-month supply, Senator KERRY already acknowledged that was not a fair association. To suggest it is a 10-year process is totally unrealistic. We could have oil flowing within 18 to 24 months because we only have to put in a lateral pipeline. To suggest the Porcupine caribou herd is going to be impoverished is absolutely without foundation, based on our experience with the central arctic herd that has grown from 3,000 to 26,000.

Take them down the line. The emotional arguments used are based on environmental groups that use this issue for membership and dollars, and it has been great for them. The American public is starting to wake up now and say: Hey, wait a minute, why can't we open there? Don't we need the jobs? Don't we have a recession in jobs? This is going to create 240,000 jobs. We need to have jobs in this country. We need to build ships in our shipyards.

I grant we are not going to eliminate our dependence on imported oil, but we can reduce it. Isn't that good for America? Isn't that good for the balance of payments? These are positive. That is

why the unions are for it. The environmentalists are saying, no, you can't do it, but they give different reasons, none of which holds water or oil. They simply are a flash in the pan.

When you start looking at the groups that support this, it is a broad group. It is the veterans. It is the unions. It is the senior citizens. It goes right down the line, on and on. These people are saying: Let's wake up to a reality. The reality is we need this action in the United States, and we need it now, and we should have it.

As we look at the general list of those who support it, it is growing all the time. We have all the major Jewish organizations.

Let's reflect on their individual interests. The Jewish organizations look at the future of Israel, as they should. They look at it very meaningfully because of what has happened in that part of the world. They know what funds terrorism. It is oil. The wealth of OPEC and the wealth in areas associated with that part of the world is accumulated primarily by one thing. That is the accumulation of oil. What funds bin Laden? Where did his association with Saudi Arabia and his background with those things come from? Those things came, very frankly, from the association with oil.

As we look at the current situation with Saddam Hussein, how ironic. How inconsistent can we be? I have said this in this Chamber time and time again. I know the Chair recalls it. We are buying a million barrels of oil from Saddam Hussein. We are using his oil to go back and take out his targets. He uses our cash for an obvious purpose: To take care of his Republican Guard, and perhaps develop missile capability and aim it at Israel.

What has happened? This should bear on the conscience of every Member. Within the last 2 weeks, we have lost two American sailors. They were doing their job. They were boarding a ship coming out of one of the ports in Iraq that was smuggling illegal oil. It was apprehended by the U.S. Navy. The ship sank, and two of our sailors drowned.

Talk about connections and inter- actions. I will not make a direct link. But the pathetic part of this is that should never have happened. We should not be buying oil from Saddam Hussein. The U.N. in their oversight of that particular process should not be allowing blatantly illegal exports of oil out of Iraq. It is happening every day. It has cost us two lives.

When we get down to voting on these measures, we have to look at what is right for the environment, right down the line: Can we open it safely? What is the footprint? It is 2,000 acres out of 19 million acres. It was said the other day Robert Redford has an 11,000-acre farm in Utah, as a matter of comparison. Can we protect the caribou? Yes. Do we

need the oil? Yes. Do we need the jobs? Yes. Does it affect the economy of this country? Yes. Does it affect our balance of payments? It is a plus-plus-plus. Almost everybody can figure it out, except some people who are wedded to the dictate of America's environmental community.

The most pathetic part of it is, with one exception, the speakers today have never chosen to visit the area. They have never chosen to talk to the people who live in the area. They have never thought to consider the personal relationship of these people and their own hopes and aspirations.

As we look at the coming situation, I can honestly say I fear for the west coast of the United States because if they don't get their oil from Alaska, California, Oregon, Washington, and Utah are going to get their oil directly from overseas in foreign flagged vessels built in foreign yards with foreign crews. It seems to me the most secure source you can get it from is a little north of the west coast. That happens to be in my State of Alaska.

Mr. President, how much time is remaining on this side?

The PRESIDING OFFICER. Sixteen and one-half minutes.

Mr. MURKOWSKI. I thank the Chair.

I think it is important for Members to recognize just what my position is in this rather awkward situation with railroad retirement and the energy bill.

I regret that the majority leader has placed us in the situation we are now in, but we are here. I want to explain why I will oppose cloture on both the Lott amendment and the substitute amendment the majority leader offered. As a consequence, I will be voting against cloture.

I will oppose cloture on the Lott amendment for two reasons.

First, I have always said our national energy security demands a full, open, and honest debate. We have been precluded from having a full debate on this issue. The time may come when cloture needs to be invoked on the legislature on a particular amendment, but not at the outset. Cloture on the Lott amendment would limit that full, open, and honest debate. I don't believe it should be limited.

Second, the authorization text of H.R. 4 was filed—the House-passed energy measure. This is not the text that I believe the Senate should enact without change.

There are a variety of amendments that I believe the Senate should consider. One is an extension of Price-Anderson. That will be foreclosed as non-germane if cloture is invoked.

As you may know, I am more than a little frustrated that we have been sitting around here when we could have been debating an energy bill from the Energy Committee. But that opportunity was taken away by the Democratic leader.

I am going to vote against cloture on the Daschle substitute because he has offered no other alternative apparently for the remainder of this year. If cloture is invoked, the Lott amendment falls as nongermane.

Once again, the majority leader has frustrated the Senate and the American people in dealing with the energy policy. When I say "frustrated," I mean not allowing it to come up—taking it away from the authority of the Energy Committee, which has jurisdiction.

Until we get this matter resolved, there is the only way that the Senate can debate energy policy—by defeating both cloture motions. If both cloture motions are defeated, where will we be? H.R. 10, the House pension reform bill, will be before the Senate, and the Daschle substitute on railroad retirement will remain intact. Pending will be the Lott amendment that adds energy legislation to the Daschle substitute, and that amendment will be open to a second-degree amendment.

I fully support dealing with railroad retirement. In fact, I am going to vote for it.

If the majority leader would stop this charade with our national security and provide an opportunity for the Senate to work its will on energy and proceed to conference with the House on H.R. 4, I would be happy to take my charts out of the back office. As it is, the closest we seem to get to the consideration of an energy bill is perhaps a lump of coal in the majority leader's stocking.

The only way for the Senate at this time to have a full, open, and honest debate on energy policy is to defeat both cloture motions and begin that debate, which we are ready to do.

I apologize again for the manner in which this has come up, but the majority leader has given us no alternative. Apparently he intends to proceed that way. We will have to use whatever parliamentary precedents are available to get this bill up, or get a commitment from the majority leader that he will allow an energy bill to be taken up at a certain time and conclude it by a certain time. I will not agree to simply take it up and not giving us some kind of inclusive date on it.

I yield the floor.

EXHIBIT No. 1

ARCTIC SLOPE REGIONAL CORP.,
Anchorage, AK, July 30, 2001.

DEAR REPRESENTATIVE: I am writing this letter on behalf of my people—the indigenous residents of the North Slope of Alaska. Thirty years ago the U.S. Congress put us on a path to modern corporate development with the passage of the Alaska Native Claims Settlement Act (ANCSA) and establishment of our regional corporation—the Arctic Slope Regional Corporation. Congress essentially told us (we really had no choice) to take some cash and land, in exchange for our aboriginal land claims, and "have a go at" making those assets into an economic enterprise. Despite the fact that most of the potentially valuable lands for resource development

were off limits to our initial selection of lands, we made the best of it and put together a land portfolio with resource and habitat values. We now find ourselves with our fate once again in the hands of Congress.

The decision to allow oil and gas development in the Coastal Plain of the Arctic National Wildlife has significant impacts on our effort to make a success of the very directive of Congress in ANCSA. Our self-determination is at stake. It is fundamentally unfair, dishonest and potentially unlawful to deny us the right to see our land and the small area of the Coastal Plain opened to exploration and development. Congress made a deal with my people and we have tried to play by the rules—now it is denying us that promise. The corporate model imposed by ANCSA was an intentional decision by Congress to avoid the path pursued with Native American tribes in the lower 48 states and their history of broken treaties. Now, however, we find ourselves in a situation of having the commitments made in the potential benefits of ANCSA for the Inupiat people being "broken".

We have tried to keep our side of the bargain, even if we did not have a choice and gave up many, many times the value of what was received in return. The Inupiat people have taken the values of the western culture and corporate America and the traditional values of our people to blend them into a culture that will survive far into the future. Our subsistence lifestyles and ties to the land and sea continue while we also participate in a cash economy. We have made strides in educating our people and providing basic services that simply did not exist in any form in our communities when ANCSA was passed. ANCSA was a great social experiment that has had many successes. But it now appears that Congress does not want to keep its side of the deal; it wants to defeat the very experiment it mandated must be followed. By locking up ANWR, the Inupiat people are asked to become museum pieces, not a dynamic and living culture. We are asked to suffer the burdens of locking up our lands forever as if we were in a zoo or on display for the rich tourists that can afford to travel to our remote part of Alaska. This is not acceptable. But, maybe we shouldn't be surprised.

The Inupiat people that live in ANWR, the residents of the village of Kaktovik, are no stranger to the heavy hand of the federal government. It was not that many years ago that the U.S. military came to the village of Kaktovik and bulldozed homes of people without the smallest amount of human dignity or respect for the people living there. There was no explanation, no compensation and no apology to the families that were literally thrown out of their homes—and it happened more than once. Anecdotal comments after the fact indicated that the officials involved considered the Eskimo people's homes "just shacks" anyway and the people themselves hardly due treatment as human beings. These are well documented but seldom told stories. This history hardly gives the Inupiat people faith that they can expect fair treatment at the hands of the federal government. To have the purposes of ANCSA so boldly frustrated only makes this worse.

The Inupiat of the North Slope have lived and subsisted across the Arctic for thousands of years. Learning not only to survive, but to develop a rich culture, in the harsh environment of the Arctic has instilled a deep respect and appreciation in the Inupiat Eskimo people for that environment and the animals

that inhabit our area. We don't need outside "environmentalists" telling what to do with our homelands. Our own development standards and the controls imposed by our locally controlled borough government will ensure that these lands are protected. It is our people that live in ANWR, particularly the Coastal Plain of ANWR, because we are traditionally a marine coastal and nomadic people. We are fully capable of balancing development and environmental protection for the long term value of the entire nation. For us it's a matter of life or death; we do not eat without the animals. Our life and our culture are tied to the land, the sea and the animals. Even with the changes brought about by ANCSA and a developing cash economy, our people maintain these ties. But, do not ask us to give up all chances for realizing the promises of ANCSA and bear the burden of supposedly preserving an area for the entire nation. That is patently unfair and misguided because it is not threatened by the small amount of development that would actually occur for oil and gas activities. Furthermore, none of this development would take place in the areas of ANWR that are classified already as wilderness where so many of the scenic vistas are located that have been used to cloud the issue about development on the more northern Coastal Plain.

Much has been said about who are the "real" people of ANWR that are at risk by potential oil and gas development. It is the residents of Kaktovik that live there. While the Gwich'in to the south also use the caribou that migrate through the ANWR area, they are not Inupiat which is literally translated as the "real people." Years ago we might have feared development, but we have learned that development and subsistence can coexist. The Gwich'in chose to opt out of the provisions of ANCSA, that was their choice. Their position, which we still feel is fundamentally flawed, should not be allowed to frustrate the commitments of ANCSA that we did choose to accept.

I beseech you to search in your heart to do what is right for my people. Do not let the misguided intent of a few do harm to the Inupiat Eskimo. Do not defeat the very Act you passed a generation ago. Support the passage of legislation to open the Coastal Plain of ANWR to oil and gas development. I and my people—the real people—thank you for consideration of our request. Quanukpuk.

Sincerely,

JACOB ADAMS,
President,

Arctic Slope Regional Corporation.

The PRESIDING OFFICER. The Senator from California.

Mrs. BOXER. Mr. President, today's vote on the Lott amendment will be the beginning of the debate on two very important issues. One of them has to do with an energy bill, which, as we all know, our majority leader has scheduled for debate in less than 60 days.

This particular version contains drilling in the Arctic National Wildlife Refuge, as my colleague has discussed for many days now.

My view is that if there are other ways to have an energy policy that leaves the wildlife refuge intact, I am for it. I will point out ways to avoid drilling in such a refuge.

The second issue that is combined with it deals with stem cell research.

In our vote, we will answer the question: Should we in this single vote not only say yes to drilling in ANWR but also say yes to derailing stem cell research by stopping it dead in its tracks, really, without looking at it?

I don't see any problem in banning human cloning. I think we would get 100 to 0 on that one. It is a very easy thing that we can do. But why would we want to derail stem cell research?

I am certainly willing to vote no on the Lott amendment that contains both of these issues: Drilling in the Alaska wildlife refuge and stopping stem cell research.

The Senator from Alaska is quite open on the point of drilling and makes the case very well.

He brings up a number of issues. First of all, he criticizes people who are for retaining the wildlife refuge if they have not actually gone to see it. Let me say that many of us have and some of us have tried. I sent one of my top environmental aides there and got a full report on it.

The bottom line is, the Senator from Alaska and others have not seen every single national park, have not been into the Sierras in my State, into every little town. Yet they weigh in on logging debates. So that is a bogus issue.

The issue is, How do we have better energy independence? I think I speak with some authority—a little bit, in any event—because in our State of California, we were hit with a horrific shortage of electricity, and it was even predicted we would have brownouts and blackouts and there would be rioting in the streets. The bottom line is, because the people in my State understood this, they began to be energy efficient, making very small changes in their daily lives that never even impacted on their comfort, really. We have saved about 11 percent in our energy use. We avoided all of these problems.

My friend talks about the creation of jobs. This is an important issue. I know some of the unions are backing drilling because of that. Let me say to my friend, the fact is, if you produce energy-efficient appliances, you create many jobs. If you produce energy-efficient automobiles—hybrid vehicles; so many other ideas; electric cars—you will produce jobs. Alternative energy in itself produces jobs, whether it is solar power, wind power, whether it is biomass—all of these create jobs, and not only good jobs, but the whole green technology is a technology that we can export around the world as the whole world looks for ways not to choke on gasoline fumes. We can do it. We can do it and meet our energy needs and become independent of imported oil.

I find it so interesting when my friends from Alaska talk because they fought me when I wanted to make sure there was a ban on exporting Alaskan oil. We used to have that in place be-

cause I made the point, as many of my colleagues did at the time, that we needed that oil to stay home in America because we wanted energy independence. But both my friends fought to allow us to export Alaskan oil. I find it very interesting.

So we have so many ways we can win this energy battle. One way is to raise the fuel economy standards of automobiles. Just take SUVs. If the SUVs met the same standard as a regular sedan, in 7 years we would save as much oil as there is in ANWR.

Mr. President, I ask unanimous consent for an additional 5 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mrs. BOXER. Thank you, Mr. President.

Let me repeat that. If we simply did one thing, and that is, got the SUVs to have the same fuel economy as a sedan—and, by the way, that is quite doable—we would, in 7 years, have "produced" enough oil to equal that of ANWR by saving it. By the way, that happens exponentially. In the next 7 years, there is another ANWR. Every 7 years you save another ANWR.

So to stand in this Chamber and say the only way to become energy independent is by drilling in a refuge I just do not think stands the light of scrutiny.

I am looking forward so much to having the debate on the energy bill, as Senator DASCHLE has promised. He is very interested in having that debate, as well, but he does not want to have that debate up against the December timeframe when we have so much to do relative to economic stimulus, when we are looking at bioterrorism. We must get the vaccines in place for smallpox. There is so much we need to deal with, including the appropriations conference reports. So I think Senator DASCHLE has done the right thing by setting aside a time, within 60 days, when we can have this debate.

The President, using his Executive powers, overturned a rule that President Clinton put in place that said that air-conditioners should become more efficient. That particular rule was even supported by many of the people in the industry itself. By canceling that, we are again being beholden to Middle East oil. So there are so many things I want to talk about when that energy bill comes before us.

In California, I drive a hybrid vehicle. If people look at you and say that sounds very strange, well, you fill it up with gas, just the same way you do any other car, and the computer within the car knows when it is more efficient to be running on gas or running on electricity. When you step on the brake, it charges the battery. So we are getting about 50 miles to the gallon.

As someone who has been sharply critical of the increase in oil prices, finally they have come down. I am convinced regulatory agencies will not do

a thing about high prices. We had them cold on what I believe was very close to price fixing. We had them cold on harassing independent station owners who wanted to lower prices. We had them cold on that. But we could not move the regulatory agencies.

One way you fight back is you drive a car that gets 50 miles to the gallon. You can do it. You can buy it pretty cheaply. I encourage people to do that. So I do look forward to taking up the energy bill.

On the issue, again, of stem cell research, this is one that is so important. I have seen a list of the groups that oppose Senator BROWNBACK's 6-month moratorium. I think it is very important because sometimes you learn a lot from supporters and opponents.

Let me read to you the list of opponents to the 6-month moratorium on stem cell research: Alliance for Aging Research, Alpha One Foundation, American Academy of Optometry, American Association of Cancer Research, American College of Medical Genetics, American Infertility Association, American Liver Foundation, American Physiological Society, American Society for Reproductive Medicine, American Society for Cell Biology, American Society of Hematology, Association of American Medical Colleges. All of these, and more, oppose, very strongly, a 6-month moratorium on stem cell research.

Here are some others: Association of Professors of Medicine, Biotechnology Industry Organization, Coalition of National Cancer Cooperative Groups, Cure for Lymphoma, Genetic Alliance, Harvard University, Hope for ALS, the International Foundation for Anticancer Drug Discovery—and it goes on—the Juvenile Diabetes Research Foundation International—those folks came to visit many of us in our offices—the Kidney Cancer Foundation, Medical College of Wisconsin, Mount Sinai School of Medicine, National AIDS Treatment Advocacy Project, National Patient Advocate Foundation, Research America, Resolve, Society for Women's Health Research, and it goes on.

So the bottom line is, we have a chance today, by voting against the Lott amendment, to send two very important messages: Yes, we want an energy policy, but we want it to be well thought out. There can be differences on whether the Alaska Wildlife Refuge is pristine, whether it is worth saving. I am willing to get into that debate. That is a fair debate. But wouldn't it be an interesting debate to find out what our other options are and then to decide if it is truly worth the gamble? People I know and respect say it isn't worth the gamble. And on stem cell research, clearly, it is time to continue this research while we ban human cloning. The Brownback amendment does not do that.

The PRESIDING OFFICER. The Senator's time has expired.

Mrs. BOXER. Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from New York.

Mrs. CLINTON. Mr. President, I am aware that the other side has until 4:45. I ask unanimous consent to speak as though we had reached 4:45, which starts the time running for our side.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

REMEMBER NEW YORK

Mrs. CLINTON. Mr. President, I rise today, as I did several times last week and before, to remind all of us, and especially my colleagues, of the destruction and devastation that took place on September 11, and persists today, nearly 12 weeks after.

Tomorrow will be the 12th week since we were attacked on September 11. The New York City Partnership and Comptroller estimate that the economic impact of the attack will near \$100 billion in damage for New York's economy. Today, 83 days after the attacks on our Nation, thousands of the businesses and residents who were physically displaced by the destruction, by the loss of power and telephone access, by the debris removal efforts, by the poor air quality, by the crime scene designation, are still awaiting some help, any help from the Federal Government.

Our Constitution guarantees to protect every State against invasion. The President said in his joint address to Congress just 10 days after the attacks: We will rebuild New York City.

That same day earlier, my colleague, Senator LOTT said, while visiting New York:

We are here to commit to the people of New York City . . . that we will stand with you.

Congressman GEPHARDT, the House minority leader, said in his weekly radio address:

We will work to make the broken places right again. We will rebuild New York.

Eighty-three days since the terrorists chose to attack America by attacking New York and having lost thousands and thousands of innocent lives, we are still taking stock of the damage that we, as a city, a State, and a country have suffered. We know we can't get those innocent lives back, and every day I and my staff work with the families who lost their loved ones trying to make sure that they do get the help they need.

In addition to the lives that were so brutally taken, those attacks also took many livelihoods. We can do something about that. Yes, we did lose 15 to 20 million square feet of office space; nearly one-third of all space in Lower Manhattan, either completely de-

stroyed or seriously damaged. Yes, we did have extensive damage to our transportation system, and it has been devastating for thousands of people trying to get to work not to have those subway lines, not to have that PATH train coming in right under the river, underneath the World Trade Center. We know the kind of damage that our small business owners have been suffering has been devastating.

What has happened is the attacks, because of the loss of transportation and because of the crime scene designation, have displaced over half a million commuters who travel to Lower Manhattan. We have 10 subway stations that usually handle about 40 percent of the downtown commuters that have been closed throughout most of October. That is why we recognize we can't possibly do this without the help of America.

Estimates to rebuild the 1,700 feet of collapsed tunnel on the 1 and 9 subway lines directly beneath the World Trade Center are in the billions of dollars. The same is true of the estimates to rebuild the PATH train station that brings commuters from New Jersey into Lower Manhattan. We also have been told it will take up to \$250 million to repair the damaged streets around the World Trade Center. And still, as we speak, almost one-third of Lower Manhattan permits only restricted vehicular access because of the crime scene designation.

These are cost estimates only of direct impact and damage, not future losses, not lost revenues. These are the costs for hazardous material removal, for site remediation, for capital costs for rebuilding.

New York City, it is estimated, is likely to lose 125,000 jobs in this fourth quarter. We already lost 79,000 jobs in October alone.

These are staggering numbers, but they only tell half the story because I could literally fill this Chamber with people who have seen their businesses devastated, who have lost their jobs. The quotes we see from so many of our leaders have been comforting and very supportive, but we know that we need more than comfort. We need more than rhetoric. We need tangible support. It is imperative that we get as much of that support as possible.

I personally think it is very similar to the other devastating crises that have hit our country. Most of them were natural disasters, but we also can't forget Oklahoma City. We can't forget the New Mexico fires. If you look at past disasters, the Federal Government, through our Congress, responded appropriately and swiftly. The Congress came together in a time of need, whether it was Hurricane Hugo or the Northridge earthquakes or Oklahoma City.

This chart illustrates the level of Federal response after just a few of a

sample of major disasters. In each case, the Federal response was nearly 40 percent of the estimated economic loss. In New York City, a comparable amount would be 40 percent of the approximate \$100 billion of economic damage. Yet we haven't received, in as timely a manner, the percentage share that others have.

The appropriated assistance that came within 3 to 4 months after the Midwest floods was more than 40 percent. After the Northridge earthquake, 26 days after, more than 30 percent of the total loss had already been appropriated; after the Oklahoma City bombing, within 99 days, more than 40 percent.

What do we have? We have a few billion dollars that have been sent to FEMA to help pay for the costs that have been incurred, and that is it. We don't have a special appropriation that has been passed. We don't have an emergency supplemental. We are counting on getting that in the next few days because we want to be sure that New York gets the money appropriated that we need to have to count on to get about the business of rebuilding and restoring. And 79 days later, when this chart was made—now we are at 83 days—we were below 5 percent, far below the pace of what was done for other major disasters in our country.

If you look at the headlines from other major disasters, "One Month After Hurricane Andrew"—which I visited in 1992, the site of that devastation, "Bush," the first President Bush, "approves \$11.1 billion in Hurricane Aid." It didn't take long at all to get that money flowing. Compare where we are with the damage done to New York.

After the 1993 Midwest floods, 7 months after, "Families Pour Out Praise For Flood Agencies." They not only got the money appropriated, they got the money delivered. And people were satisfied their needs were being met.

The Northridge earthquake, 24 days after that devastating earthquake, "\$8.6 billion Quake Aid Ok'd by Senate." We are nowhere near that pace. We are at 83 days, and although we did—and I am grateful for it—appropriate dollars in the immediate aftermath, we haven't gone back to appropriate them to actually get them out and be spent to take care of the problems we have.

The Cerro Grande fire, which was a fire set by the Federal Government, a fire that was meant to stop other fires—of course, we know the results were disastrous—44 days after that fire, "Los Alamos Welcomes Federal Aid."

I was pleased, both as a citizen and as an onlooker with a great deal of interest over 8 years, to see how well our country came together to deal with our emergencies. Compare those headlines with where we are right now in New York: "New York Needs Help Now to

Rise from the Ashes," November 19; "New York Financial Core Wobbles from Attacks' Economic Hit," November 26; since September 11, "Vacant Offices and Lost Vigor," November 21; "Terror Attacks Have Left Chinatown's Economy Battered," November 25; "A Nation Challenged: Small Shops Feel Lost in Aid Effort."

The PRESIDING OFFICER (Mr. CARPER). The time controlled by the majority has expired.

Mrs. CLINTON. Thank you, Mr. President. Again, I hope that we will respond with equal vigor and expeditious treatment to deal with the problems in New York, as our country always has in previous disasters.

The PRESIDING OFFICER. The Senator from Alaska is recognized.

Mr. MURKOWSKI. Mr. President, I inquire as to the time agreement. It is my understanding there are 30 minutes on each side remaining; is that correct?

The PRESIDING OFFICER. At this point in time, until 5:10, it is controlled by the minority.

Mr. MURKOWSKI. Until 5:10?

The PRESIDING OFFICER. Yes. The majority leader, then, has 5 minutes with which to close.

Mr. MURKOWSKI. Let's run through that one more time. At 5:10, the minority time expires. Then the vote is set for 5:45?

The PRESIDING OFFICER. 5:15.

ENERGY POLICY

Mr. MURKOWSKI. Mr. President, let me again reflect on where I think we are. We have chosen to try to get an energy bill before this body all year. We introduced an energy bill late in January in the Energy and Natural Resources Committee. Hearings were held. We had a little change of leadership that resulted in a situation where we could not get the bill brought up in committee. In the meantime, of course, the House of Representatives did its work. It passed H.R. 4, which was an energy bill. It was a good energy bill. It had virtually everything that we felt should be addressed in the body of the bill because it addressed, if you will, not only renewables but alternatives, as well as new sources of energy.

H.R. 4 is the bill that is before us right now, but it is coupled with a cloning bill, and it is on a railroad retirement bill. But I think we should focus on the reality here, which is that the President has asked for an energy bill. The House has done its job. The Senate has yet to do its job.

The ultimate disposition of this vote today is not going to be very meaningful because different Members are going to be able to respond in different ways. Those who are particularly attuned to the cloning issue, obviously—and I share the position of Senator BROWNBACK that we should not be rushing into this. There should be some

evaluation on its ethical and moral aspects. On the other hand, the fact that it is on the railroad retirement bill, which I happen to support, means there is going to be different interpretations—whether the vote is contrary to support for railroad retirement, support for energy, or support for cloning.

I want to focus on the void that will be left after we are through. We are not going to be able to have resolved getting an energy bill up before the Senate. So we are going to have to search for other means, whether it be the Agriculture bill or stimulus bill or holding up a unanimous consent agreement, which I am prepared to do. We have talked about Christmas Eve, about the stockings, and odds and ends; but we have no assurance that the Democratic leadership which controls this body is going to give us a time certain to take up an energy bill and vote up or down on it. That is within the broad support of America's special interest groups—whether it be the labor unions that we have heard from relative to the value of it as a stimulus, or others.

Mr. President, when we look at stimulus bills, where are you going to find a better stimulus? It would create 250,000 jobs, generating \$3 billion in revenues from lease sales, and would not cost the taxpayer a dime. What about the national security interests and America's veterans who fought overseas? I am reminded of my good friend from Oregon who indicated that he would rather vote for an ANWR bill any day than send our men and women overseas to fight a war over oil. That was Senator Mark Hatfield.

So the President has called for an energy bill. We are disregarding our popular President's wish in not addressing it. We have heard from the Secretary of Energy, the Secretary of Veterans Affairs, and the Secretary of Labor, who all recognize the importance of this. The Democratic leadership says, no; we are not going to take it up. We are going to take it up later. When? Will he give us a time certain to conclude it and allow amendments and an up-or-down vote? That is all we want.

What is happening here is they are talking on, if you will, the prevailing attitude of America's veterans, organized labor, Teamsters, senior organizations, Jewish organizations, who all understand what national security is all about in relation to the Mideast. We have a bill—H.R. 4—that reduces demand, increases supply, and enhances infrastructure and energy security. So we are very positive. Yet we are going to go out of here today with another situation where we have not reached a resolve. We have talked about energy, and if there is any plus to this, it is that we got the energy bill up for discussion but in such a convoluted way that it is very difficult to address it on the merits for on an up-or-down, clean vote, which it deserves.

The Democratic leadership has chosen to ignore, if you will, the responsibility that this body has to address a request of the President. We are going to go off now and simply look for another day. Well, I am going to look for another day. I don't want to disrupt the body, but I am telling you that we have to have assurances that we are going to get an energy bill up, under some time agreement of some consequence that would be meaningful to dispose of the issue once and for all. Any Member can justify his vote today, not on the issue of an up-or-down vote on energy but on cloning or his particular position on the issue of railroad retirement.

We need to have the Members stand up and be counted on whether or not it is in our national security interest to have an energy bill and have an up-or-down vote and have amendments and include, if you will, the ANWR issue.

This isn't a vote on an energy bill today. It is not a vote on ANWR. This is a vote to address a procedural process that is very gray in the interpretation because nobody is going to be able to clearly define just what they are for and what they are against.

I see my friend from Kansas who wants to speak on the cloning. We have little time remaining. I will reserve 5 minutes of my remaining time and allow Senator BROWBACK to have the difference.

I inquire of the time remaining on our side?

The PRESIDING OFFICER. The Senator from Alaska has 11½ minutes remaining.

Mr. MURKOWSKI. Mr. President, I yield 6 minutes to the Senator from Kansas.

MORATORIUM ON CLONING

Mr. BROWBACK. Mr. President, I am caught in a position similar to that of the Senator from Alaska. I support what he put forward on the energy bill. It is of utmost urgency. We are so dependent upon unreliable sources of energy that we will look back and say we wish we had done something when we had a chance to do it. We are not doing it.

I have put forward the moratorium on cloning. To clarify, where some have said this is about stem cells, it is not about stem cells. It is about cloning—taking a human individual and creating them by cloning technology, similar to what was used with Dolly the sheep. That is not stem cells. That is about cloning. It is a moratorium on cloning—a 6-month timeout. Let's wait a little bit and think about what we are actually getting into as the world contemplates this matter. Yet technology is diving into it in the United States, as we saw announced a week ago the first human clone ever in the world by a Massachusetts company.

Let's think about this. That is why we brought up this issue on this procedural vehicle, saying let's get a clear vote on a 6-month moratorium. It is not an outright ban on everything for all time. It is 6 months where we hold hearings, do a thoughtful process. The House already has voted on the issue by over a 100-vote margin. They voted to ban cloning altogether. The President is pleading for a bill on banning cloning altogether. We weren't even going that far. We are saying a 6-month moratorium while we think about it, instead of letting private companies basically decide a huge issue for humanity.

Right now we are letting private companies decide if they think it is OK to clone humans or not by their own privately hired ethics board. Do they think it is fine we clone humans or not. They are making the decision when this is something that should be in the public purview and public domain after thoughtful conversation.

We are pleading for the time to do that. That is why I put the amendment together with the energy bill. We are getting toward the end of the session, and we need some discussion and clarity on this issue. Where the House has acted and the President is seeking a bill, we are in difficulty getting the bill done.

We are going to look for other vehicles and other ways and means to get this moratorium so we can have that pause, that thoughtful bit of time when we can contemplate this issue of human cloning. It seems to me far superior to say right now: Let's wait for a little bit, rather than wait until there are more clones out there and then say: OK, I guess it is too late; the decision has already been made for us. That is not the way a responsible, deliberative body should act.

I point out to my colleagues as well that this is a broad-based issue. In the House, the vote was broad based. Republicans and Democrats voted for the bill. We have sponsors from the left and the right of various groups—environmental groups, technology groups—that are questioning where some of the technology is taking us. We have sponsors forming conservative groups. There is a broad-based group supporting a moratorium or even an outright ban on human cloning.

I know a number of my colleagues have questions and difficulties about the issue of genetically modified organisms. I count 12 of my colleagues who are opposed to GMOs, genetically modified organisms. That is where one takes two different species and crosses them to get a hybrid of sorts. They are taking a bit of genetic material from one and inserting it into the other. Some of my colleagues have real questions about where this is going.

If some of my colleagues have questions about genetically modified orga-

nisms in plants and animals, what do they think about a genetically modified human? Is that something we want to let drift out there?

We put a huge number of regulations on agricultural biotech companies that are developing genetically modified organisms. Yet if someone wants to do that to the human species, fine, go ahead, there is no regulation on it. Is that a thoughtful way for a deliberative body to work?

We put limits on what one can do to eggs in other species. One cannot destroy a bald eagle egg. There is a Federal penalty for doing that. In this legislation, we are talking about creating and destroying. We are saying: Fine, go ahead.

Do we give less weight to the human species than we do an eagle? Is that a way for a thoughtful, deliberative body to work? When we have this technology rushing, should we not be saying let's really consider what this technology is doing and what it means to us and what it means to the future of our country and our species?

This 6-month moratorium seems to me to be a very modest step. I pleaded with the Democratic leadership: Let us bring this up on a separate stand-alone vote. They have not been willing to do so. This body now stands in the way of speaking on this as a country, when many other countries, 28 other countries have put forward laws and rules on human cloning.

That is what we are talking about. Others may call it stem cells, but this is about human cloning. The issue of stem cells has been dealt with by the administration and they have put forward rules and regulations. This is about human cloning.

That is why I sought to put this issue of human cloning on this particular amendment because we will not have any other vehicle to bring this forward. I am a sponsor of the railroad retirement bill. I have signed on to that bill. I am a cosponsor of the bill. I have heard from a number of my colleagues and constituents about it. I support the bill, but I also think we are at a unique point in human history where we need to consider what we are doing about cloning. For that reason, I put forward this particular amendment, and I ask my colleagues to consider it. I still want to find the time for us to consider this issue.

I yield the floor and reserve the remainder of the time.

Mr. FRIST. Mr. President, I rise in support of the 6 month moratorium on human cloning which the Senate is now debating.

In recent years, science has progressed rapidly. In 1997, Ian Wilmut and a team of researchers successfully created an adult cloned sheep, Dolly. With the specter of human cloning on the near horizon, the Senate nonetheless rejected legislation to ban this act

based largely on 2 arguments, that anti-cloning legislation would stop stem cell research, and that the science was not advanced enough to clone human beings.

Three years later, history and science have proven these arguments false. Not only are a few scientists moving forward to clone humans, but we also now know conclusively that a human cloning ban will not halt research that could lead to cures for chronic and debilitating illnesses, including promising embryonic stem cell research which I support.

The President has called for a ban on human cloning, and the House of Representatives has passed legislation by an overwhelming bipartisan margin. Now, it is up to the Senate.

The case against human cloning is compelling and comprehensive. But I understand the concerns some of my colleagues have expressed about moving too hastily in this manner, and I therefore believe that the responsible course of action stands before us today: A temporary moratorium on human cloning that will give the Senate the time it needs to diligently consider this issue while ensuring that events do not overtake us.

Let us act now to assure that next year's debate occurs in an environment where science has not moved ahead of the public interest. Let us give ourselves 6 months to deal carefully and responsibly with a matter of profound importance.

The risks of not acting to halt cloning far outweigh any concerns about impeding scientific progress. Cloning—and all its dangers—are upon us. Any possible medical advantage through cloning is far off at best. In fact, such advantages are theoretical only.

Last week, a Massachusetts company claimed to have cloned a human embryo. Moreover, Dr. Severino Antinori has in recent weeks reiterated his plan to produce cloned embryos by the end of the year, with the intent of impregnating up to 200 women.

The problem is simple. Failure to prohibit human cloning now speeds the day that a human being will be cloned. If that idea troubles you, I submit that you must support the moratorium.

Why must we prohibit all human cloning? We need to ban it to prevent the cloning and birth of a human. We need to prohibit it to safeguard the health of the women who will be directly exploited as a side effect of the procedure. And we need to prevent it for the sake of research ethics.

I know these issues can be confusing. Cloning issues intersect with stem cell research issues. It is complicated. One of my colleagues asked me: If I support embryonic stem cell research, can I be opposed to cloning? The short answer is "yes."

Human cloning is the use of somatic cell nuclear transfer to create a human

embryo genetically identical to a living or dead individual. The terms that are often thrown about, "reproductive or therapeutic," refer only to whether this is intended to create a new person or for research. The act of cloning, however, is the same in both cases.

There is near universal abhorrence to human reproductive cloning. Scientifically, consensus exists that it is unsafe. More significantly, the ethical and moral implications of cloning for "replacing" a lost loved one; re-creating persons with special attributes; developing a source of transplantable organs are highly troubling to all of us. Unfortunately, there are scientists working actively to achieve those ends.

Ultimately, if one wishes to prohibit human "reproductive cloning," it is necessary to prohibit all human cloning. Once cloned embryos exist, despite the best intentions to the contrary, there will be no way to prevent a cloned embryo from being implanted in a woman. Once that starts, there is no way to stop it.

We would not know when a cloned embryo is growing in a woman's uterus. Even if we know about such a pregnancy, we would not be able to stop it. We would not know until reproductive cloning experiments lead to spontaneous miscarriages, still births, or severely deformed babies. If this sounds alarmist, consider the fact that Scottish scientists had more than 270 failed pregnancies before they produced the cloned sheep, Dolly.

Some maintain that even placing a short hold on human cloning will halt research necessary to help sick, diseased, and injured persons. These claims are not supported by the facts.

They also say that therapeutic cloning is necessary to develop medical treatments through embryonic stem cell research that will not be rejected by the body's auto-immune response system. But this is by no means certain.

I strongly support embryonic stem cell research. As both a supporter and a scientist, I can tell you that this field remains in its earliest stages of basic research. At a hearing on stem cell research this fall, Secretary Thompson noted that clinical applications are years away. It is simply not the case that a ban on human cloning, particularly the temporary moratorium we are discussing today, would in any way harm the progress of stem cell research.

Perhaps someday a credible case will be made on the need for "cloned" tissue. But that day, if it ever comes, will be far in the future.

The justifications to ban human cloning are strong. I have only touched on one of the reasons today, and we will have ample time in the coming months to further develop and explore these arguments, just as we will have ample time to see the clear difference

between cloning and stem cell research and understand that promising stem cell research can, and will, go forward without human cloning.

But today's vote is even more simple than all of that. It is a vote to say "slow down," and let us as a Senate have time to adequately investigate and debate this issue. It is a vote to ensure that the science does not race ahead without the input of the public interest. I urge my colleagues to support the moratorium on human cloning. The moratorium will give us breathing space to study a complex and profoundly important matter. Additional time gives us the best chance of doing the right thing. In the meantime, we must take all possible steps to do no harm.

Mr. BAUCUS. Mr. President, I rise today to discuss the Lott amendment to the railroad retirement bill. In addition to other provisions, this amendment would enact a moratorium on a scientific process which holds the potential to save millions of human lives. I cannot support such a provision.

The final chapter of the Lott amendment deals with an issue that cuts to the core of our moral and ethical beliefs: human cloning.

I share the deep concerns that my colleagues and millions of Americans have with the prospect of cloning human beings. These concerns were born in 1997, when scientists in Great Britain announced that they had successfully cloned a sheep. They were stoked again last week, when a biotechnology company in Massachusetts announced that it had taken the first steps towards producing human embryos through cloning.

Let me be perfectly clear on this issue. I am adamantly opposed to any scientific project aimed at creating a clone of a human being. The implications of human reproductive cloning are morally repugnant. I do not know of a single respected scientist, ethicist, or religious leader who disagrees with me on this point.

The Lott amendment would impose a 6-month moratorium on this type of reproductive cloning, and I am fully supportive of this effort.

Unfortunately, the Lott amendment would also place a moratorium on a scientific procedure called somatic cell nuclear transfer. This process is closely related to the subject of stem cell research, which we heard so much about this summer. As you know, stem cells have the unique potential to grow into any tissue or organ in the body. Because of this property, stem cells may finally offer scientists the tools they need to cure diseases that have plagued humankind for centuries.

I strongly support scientific research into stem cells. I was heartened this summer, when President Bush and a bipartisan group of senators joined me in this support.

But while stem cell research offers promising possibilities, it faces many obstacles. One of these obstacles is the problem of rejection. If the stem cells used to treat diseases contain genetic material that is different from the genetic material of the patient, they may be rejected by the patient's body—in much the same manner as organs that are transplanted from one human being to another are often rejected.

Somatic cell nuclear transfer is a technique that may allow scientists to bypass this obstacle. In this process, stem cells are created using genetic material from a patient's own body. Because these new stem cells are genetically identical to a patient's own body, they would not be rejected.

This technique promises to speed up research into the treatment of crippling diseases like juvenile diabetes, cancer, Alzheimer's and Parkinson's. I would venture to guess that all Americans have had friends or family who have struggled with these devastating diseases; and millions of Americans would benefit by medical research that might one day eradicate them.

But the Lott amendment would stop this research in its tracks. It would bring a halt to research aimed at promoting life and relieving unspeakable suffering. For this reason, I cannot support this legislation—no matter how well-intentioned it is.

A reasonable alternative to the Lott amendment would be to make the reproductive cloning of a human being a criminal offense, subject to severe penalties. Such a solution would prevent the cloning of human beings without standing in the way of promising research aimed at promoting human life.

ENERGY SECURITY

Mr. FEINGOLD. Mr. President, it is with extreme disappointment that I rise to oppose the amendment offered by the Republican leader on behalf of the junior Senator from Alaska Mr. MURKOWSKI, and the senior Senator from Kansas, Mr. BROWNBACK. I urge my colleagues to oppose this amendment.

I am particularly troubled that this amendment was filed as work continues to have a bill drafted by the majority leader and brought to the floor. Those who have said we need urgency in this matter have succeeded. We are working on a bill. But that is not fast enough for some, apparently, and this amendment seek to shortcut the process even further.

Energy security is an important issue for America, and one which my Wisconsin constituents take very seriously. A national debate is unfolding about the role of domestic production of energy resources versus foreign imports, about the tradeoffs between the need for energy and the need to protect the quality of our environment, and

about the need for additional domestic efforts to support improvements in our energy efficiency and the wisest use of our energy resources. The President joined that debate with the release of his National Energy Strategy earlier this Congress. The questions raised are serious, and differences in policy and approach are legitimate.

I join with the other Senators today that are raising concerns about this amendment. As other Senators have highlighted, the amendment of the Senator from Alaska's, Mr. MURKOWSKI, is not comprehensive energy legislation. It opens the refuge to oil drilling, subsidizes oil companies, and does little to address serious energy issues that have been raised in the last few weeks.

Though the Senator from Alaska will say that his amendment would only open up drilling on 2,000 acres of the refuge. That is simply not the case. The entire 1½ million acres of the coastal plain of the refuge will be open for oil and gas leasing and exploration. Exploration and production wells can be drilled anywhere on the coastal plain under this language.

The first lease sale, and, I stress for my colleagues that this refers only to the first sale, has to be at least 200,000 acres.

I am assuming that when the Senator means that only 2,000 acres will be drilled he is referring to the language in H.R. 4 which states, and I am paraphrasing,

the Secretary shall . . . ensure that the maximum amount of surface acreage covered by production and support facilities, including airstrips and any areas covered by gravel berms or piers for support of pipelines, does not exceed 2,000 acres on the coastal plain.

That limitation is not a clear cap on overall development, Mr. President. It does not cover seismic or other exploration activities, which have had significant impacts on the Arctic environment to the west of the coastal plain. Seismic activities are conducted with convoys of bulldozers and "thumper trucks" over extensive areas of the tundra. Exploratory oil drilling involves large rigs and aircraft.

The language does not cover the many miles of pipelines snaking above the tundra, just the locations where the vertical posts that support the pipelines literally touch the ground. In addition, this "limitation" does not require that the 2,000 acres of production and support facilities be in one contiguous area. As with the oil fields to the west of the Arctic Refuge, development could and would be spread out over a very large area.

Indeed, according to the United States Geological survey, oil under the coastal plain is not concentrated in one large reservoir but is spread in numerous small deposits. To produce oil from this vast area, supporting infrastructure would stretch across the coastal

plain. And even if this cap were a real development cap, Mr. President, what would this mean? Two thousand acres, is a sizable development area. The development would be even more troubling if they were located in areas that are adjacent to the 8 million acres of wilderness that Congress has already designated in the Arctic Refuge which share a boundary with the coastal plain.

This amendment is controversial. Make no mistake, it will generate lengthy debate. I oppose it because it cuts short both the legitimate debate about drilling for oil in the Arctic Refuge that this country needs and the legitimate energy debate this country needs. Should this amendment be adopted, it would force the national energy legislation to be decided in the conference on pension bill—not in debate on an actual energy bill.

I have also heard concerns from the constituents in my State who have paid dearly for large and significant jumps in gasoline prices. Drilling in the refuge does nothing to address the immediate need of the Federal Government to respond to fluctuations in gas prices and help expand refining capacity. My constituents experienced prices of between \$3 to as high as \$8 per gallon between September 11 and 12, 2001. The Department of Energy immediately assured me that energy supplies were adequate following the terrorist attacks. These increases are now being investigated as possible price gouging by the Department of Energy and the State of Wisconsin. With adequate energy resources, constituents need assurances that these unjustified jumped can be monitored and controlled.

And I, along with many other Senators, have constituents who are concerned about the environmental impacts of this amendment, and what it says about our stewardship of lands of wilderness quality.

I also oppose this amendment for what it lacks. In light of the tragic events of September 11, 2001, a key element of any new energy security policy should be to actually seek to secure our existing energy system—from production to distribution—from the threat of future terrorist attack. Americans deserve to know that the Senate has protected the existing North Slope oil rigs and pipelines from attack. Americans deserve to know that the Senate has considered measures to reduce the vulnerability of above ground electric transmission and distribution by providing needed investments in siting of below ground direct current cables, in researching better transmission technologies, and in protecting transformers and switching stations. Americans want us to review thoroughly the security of our Nation's domestic nuclear power plant safety regimes to ensure that they continue to operate well. Finally, Americans living

downstream from hydroelectric dams want to know that they are safe from terrorist initiated dam breaching. Until we can assure them that this existing infrastructure is secure, it seems hasty to add additional structures that we may not be able to protect.

The people of my State, and the people of this country, heard the President's address to Congress and they are willing to help when asked. We also need to have a comprehensive bill to be sure that our national energy conservation plans contemplate such contingencies as a future domestic need to reduce consumption of energy to help support our Armed Forces, if necessary.

These were issues that the House did not address on August 2, 2001, when it passed its bill, because the terrorist attacks of September 11, 2001, were unthinkable at that time. These are issues that the amendment of the Senator from Alaska doesn't address. But we are a changed country in response to these tragedies, and these are very real issues today, issues that must be addressed.

In addition, there have been other significant technological changes in the last few months which energy legislation should consider. On September 19, 2001, a model year 2002 General Motors Yukon which is able to run on either a blend of 85 percent ethanol and 15 percent conventional gasoline or conventional gasoline alone rolled off of the line in Janesville, WI. The 2002 model year Tahoes, Suburbans, and Denalis with 5.3 liter engines will be able to run on either fuel. But while my constituents could buy a vehicle which can run on a higher percentage of ethanol fuel, there isn't a place open today to buy that fuel in Wisconsin. We could go a long way to reducing dependence upon foreign oil by using domestic energy crops and biomass more wisely, and we should develop a bill to reflect our new technological capabilities.

According to the Congressional Research Service, today the only way to isolate the U.S. economy from supply disruptions abroad would be to forbid the exportation of domestic oil to foreign markets and to prohibit domestic oil companies from raising prices. Since net oil imports have accounted for about 50 percent of U.S. consumption in recent years, such a policy, were it to be implemented, would lead to shortages unless domestic oil prices were allowed to rise much higher than at present. This is because oil extraction in the United States on a large enough scale to meet our energy needs is much too costly to compete with foreign producers. For this reason, energy independence in the long run would likely result in a price that may be less volatile, but certainly a price that is even higher than prices at their recent peak.

Even if the United States could implement such a drastic policy, manipulations of oil prices by other oil producing nations could still affect the U.S. economy.

Finally, I oppose this amendment because there is a lingering veil of concern that special corporate interests would benefit over our citizens by this amendment, and I am prepared to speak on that issue at length. I find it particularly troubling that at a time when we face the need to provide financial assistance to workers and to sectors of our economy severely impacted by September 11 events, we would even consider subsidizing the big oil companies. This amendment allows oil companies access to federal resources within a federal wildlife refuge. My constituents paid the high gasoline costs on September 11 and 12, and oil companies profited. Before they get more help from the federal government, I think we should be mindful of the help these industries are already getting.

If the Senate chooses to adopt this amendment behind the veil of tragedy, it will be an act that increases division in the country when we most need unity. The Murkowski amendment should be opposed.

Mr. BIDEN. Mr. President, I rise today in opposition to the pending amendment and pledge my continued support for the protection of the Arctic National Wildlife Refuge from oil drilling. As most of my fellow Senators will attest, preserving the Alaska wilderness was one of the highest priorities of my friend and former colleague from Delaware, Bill Roth, and I was proud to join him in this fight.

Alaska's coastal plain is one of our Nation's last areas of unspoiled wilderness and it must be protected from oil development and all the activity that comes with it. This practically untouched region is home to a wide variety of wildlife, such as polar bears, caribou, and hundreds of species of birds, and there is great concern that development of the area will threaten this fragile habitat. I urge my colleagues to understand the consequences of permanently altering such pristine landscape when at this point in time, the amount of oil that would be economically developed is speculative at best. I do not believe that we should risk potentially irreversible impact on this rich environment for the sake of uncertain oil recovery.

The most recent petroleum assessment report, conducted by the United States Geological Survey in 1998, estimated that there was between 3 billion and 16 billion barrels of oil in the area. But while the numbers alone are promising, the issue is how much oil is economically recoverable. At a market price of \$24 per barrel, the United States Geological Survey estimates a 95-percent chance that 2.0 billion barrels or more would be economically re-

coverable and a 5-percent chance that 9.4 billion barrels or more would be economically recoverable.

In addition, the best estimates are that if we authorized drilling today, oil from ANWR will not be available for at least 7 to 12 years. Leasing agreements, geologic characteristics and transportation constraints will most certainly affect development rates and production levels. Assuming the best case scenario—peak production of oil at an increased development rate—the most promising production rate is 750,000 barrels per day. To put this in perspective, the United States consumes about 19 million barrels of oil and refined petroleum products a day. In the first 9 months of 2001, the United States imported 1.77 million barrels of oil per day from Canada, 1.73 million barrels of oil per day from Saudi Arabia, 1.58 million barrels of oil per day from Venezuela and 1.37 million barrels a day from Mexico.

Despite the fact that I stand here today in opposition to drilling in ANWR, I do recognize the importance of our country moving forward with a thorough review of our energy policy and I look forward to our discussions in the early part of next year. Our energy policy should be comprehensive and balanced. In addition to examining our options for increasing production of fossil fuels and stabilizing our supplies, we need to explore viable conservation initiatives, make important investments into the research and development of renewable and alternative energy sources, and consider adapting our regulatory and tax structures to help achieve these goals. I know that we can modify our energy policies without undermining our longtime environmental objectives.

Ms. CANTWELL. Mr. President, I rise today to join my colleagues in opposition to the Murkowski-Lott-Brownback amendment, which would open up the Arctic National Wildlife Refuge—America's last untouched wildlife refuge—to oil development. It is both untimely to try to include such a controversial issue in an unrelated Railroad Retirement bill, and unwise to exploit this time of economic downturn and national security challenges to open up ANWR for the sake of narrow and divisive interests.

I believe there is no way to justify drilling in ANWR in the name of national security. Oil extracted from the refuge would not reach refineries for seven to ten years and would never satisfy more than two percent of our nation's oil demands at any one time. Therefore, it would have no discernible short- or long-term impact on the price of fuel or our increasing dependence on OPEC imports. Put another way, the amount of economically recoverable oil would increase our domestic reserves by only one third of one percent, which would not even make a significant dent

on our imports, much less influence world prices set by OPEC.

Drilling in the Arctic National Wildlife Refuge would also set a terrible precedent. In the past 35 years, ever since Congress passed the National Wildlife Refuge System Administration Act, the government has not approved a single oil or gas exploration lease on public refuge lands. My concern is that opening up ANWR in the name of a misleading and irresponsible national security argument will not only degrade one of America's national treasures, but will also expose other priceless public lands to new drilling.

Mr. President, rather than drilling in ANWR, we must focus on crafting a deliberative, comprehensive policy that will permanently strengthen our national security. We need a bill that endows America with a strong and independent 21st century energy system by recognizing fuel diversity, energy efficiency, distributed generation, and environmentally sound domestic production as the permanent solutions to our nation's enduring energy needs. The energy provisions included in the Murkowski-Lott amendment fail to meet these goals and would instead prolong our antiquated over-reliance on traditional fossil fuels.

The Energy and Natural Resources Committee on which I serve held a series of hearings earlier this year that highlighted particularly promising ways we can accomplish these crucial goals. For example, these hearings revealed a broad consensus on the need to streamline regulatory approval of a privately funded natural gas pipeline from Alaska's North Slope to the lower 48 states. There are at least 32 trillion cubic feet of natural gas in existing Alaskan fields and building a pipeline to the continental U.S. would create thousands of jobs, provide a huge opportunity for the steel industry, and help prevent our nation from becoming dependent on foreign natural gas, from many of the same Middle Eastern countries from which we import oil.

Adopting energy efficient technologies is another way to significantly advance our national and economic security. For example, are my colleagues aware that automakers commonly use low-friction tires on new cars to help them comply with fuel economy standards? Because there are no standards or efficiency labels for replacement tires, however, most consumers unwittingly purchase less efficient tires when their originals wear out, even though low-friction tires would only cost a few dollars more per tire and would save the average American driver \$100 worth of fuel over the 40,000-mile life of the tires. Fully phased in, better replacement tires would cut gasoline consumption of all U.S. vehicles by about three percent, saving our nation over five billion barrels of oil over the next 50 years. That's

the same amount the United States Geological Survey says could be economically recovered from ANWR.

I believe that the only way to permanently ensure our nation's security is to look beyond policies that continue our country's century-old reliance on the extraction and combustion of fossil fuels. Now is the time to launch the transition to a new, 21st century system of distributed generation based on renewable energy sources and environmentally responsible fuel cells.

Imagine if today a significant portion of American homes and businesses produced their own electricity from solar panels on their roofs, and powered their cars with home-grown biofuels. Our country would no longer be at the mercy of OPEC, energy bills would be dramatically lower, our air would be cleaner, and our energy system could not be devastated by terrorist attacks on centralized power plants or transmission lines.

Mr. President, the American people know this is the direction our country must take. Just last month a Gallup Poll showed that 91 percent of Americans believe we should invest in new sources of energy such as solar, wind, and fuel cells. Ninety-one percent. How often do we see such universal support in our politically diverse country?

Mr. President, only these policies—which will be well represented in the energy bill Senators DASCHLE and BINGAMAN will bring to the floor early next year—will make our energy system truly secure and independent. I recognize, along with probably all of my colleagues, that inexpensive, reliable energy sources are the lifeblood of our economy and higher standard of living. Because our national, economic, and environmental security depend on the United States becoming less dependent on imported fossil fuels, we must act to develop more diverse and environmentally responsible supplies of domestic energy. Neither drilling in ANWR nor the rest of Murkowski-Lott energy provisions go far enough to accomplish these goals, and I encourage my colleagues to vote against invoking cloture on this amendment.

RAILROAD RETIREMENT

Mr. KERRY. Mr. President, I am proud to come to the floor today as a cosponsor of S. 697, the Railroad Retirement and Survivors Improvement Act. Senator BAUCUS and Senator HATCH have worked hard on this bill with railroad management and labor and have created a final product of which they should be proud. This bill will fundamentally improve the economic situation for more than 400,000 American railroad employees and their survivors, while reducing the tax burden on rail employees and railroads. After three long years of hard work, rail labor and management have come

together to create a new system to provide for rail retirees and their survivors. The Senate should ratify this proposal by adopting the amendment today.

Let me recap quickly what this amendment does: Most importantly, we allow survivors of railroaders to receive 100 percent of the benefits earned by their spouse, or, in some cases, parent. In most cases, that means an immediate doubling of income for employees' survivors. We also reduce the time needed for a worker to become vested in the Railroad Retirement system from 10 years to five years. That's consistent with 401(k) plans and similar retirement packages in other industries. Finally, we lower the tax burden on railroads and employees, while increasing the return on funds invested in the system. That's good for workers, and it's good for business. When income tax is factored in, some of these railroad companies have a combined tax burden of 50 percent. That's unforgivably high for any company, especially for smaller railroads, such as short lines, which are already struggling with huge capital needs.

Unfortunately, some will allege that this legislation is only needed because the Railroad Retirement System needed an economic "bailout," but that is a false claim. Tier One benefits are funded by the same mechanism that we use to fund Social Security, employers and employees each pay a 15.3 percent payroll tax into a trust fund which is used to pay current benefits. Since 1950, assets in the Tier One fund and Social Security Trust Fund have been moved to ensure that railroaders were not disadvantaged by changes in Social Security benefits and also to unify benefits for workers eligible for both Social Security and Railroad Retirement benefits. Unfortunately, between 1950 and 1974, more than \$3.5 billion flowed out of the Railroad Retirement Trust fund and into the Social Security Trust Fund. That money was finally repaid last year, and I think it's important that everyone understands that this bill does not in any way change Tier One benefits, which Railroad Retirement's equivalent of Social Security.

When this bill is enacted, more than 400,000 former employees, spouses and children will see an increase in benefits. More than 500 companies will see their overwhelming payroll tax burden decrease. That is a good deal for everyone, and there's no reason not to move forward on this legislation today. I urge my colleagues to support cloture.

The PRESIDING OFFICER. The next 5 minutes is reserved for the Republican leader or his designee.

Mr. BROWNBACK. I suggest the absence of a quorum.

The PRESIDING OFFICER. Without objection, the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LOTT. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LOTT. Mr. President, parliamentary inquiry: I believe there are 5 minutes reserved for the Republican leadership and then there are 5 minutes reserved for Senator DASCHLE and the Democratic leadership, and then we will be ready for a vote; is that correct?

The PRESIDING OFFICER. The Republican leader was to have from 5:05 p.m. to 5:10 p.m. Roughly half of that has been used. Without objection—

Mr. LOTT. I am not asking for additional time. I am trying to clarify how much time I have and the approximate time we will have a vote. I presume we will try to vote by 5:15 p.m.; is that correct?

The PRESIDING OFFICER. That is correct. The Senator has 2 minutes 10 seconds.

Mr. LOTT. I will use a portion of the time I have reserved.

Mr. President, it is unfortunate we are on the underlying bill at this point, the railroad retirement bill. While obviously there can be some arguments made for it and with some amendments it probably could pass by an overwhelming vote because the concept does have a large number of supporters on both sides of the aisle, I wish the Finance Committee had been able to bring this up in regular order, have hearings, have a markup, and report a bill. I believe the problems with the bill could have been addressed. There have been other issues, obviously, that have distracted our attention this year, but I still regret it has come up in this particular way.

ENERGY POLICY

As to the pending issues, I believe there are fewer issues more important facing our Nation today than the fact we do not have a national energy policy. We need to do it now, not later this month, not next month, and not February or March. It needs to be done as soon as possible, and it needs to be broad based.

It needs to provide for additional production. It needs to provide for alternative fuels and conservation. We need incentives for more production. We need to look at the transmission systems. We need to look at nuclear power.

All of it should be done. For that reason, I offered this amendment to the substitute that would allow us to have a full debate and hopefully a direct vote on this issue of a national energy policy.

CLONING

In addition, of course, we have coupled with this amendment the 6-month moratorium on the issue of cloning. We have heard from Senator MURKOWSKI and Senator BROWNBACK about the im-

portance of both of these issues. Whether one thinks we should have some sort of research in this area of cloning, there is no question there is a lot of uncertainty about what this really means and how it would affect this whole question of human cloning. So Senator BROWNBACK—responsibly, I believe, in view of recent developments—has proposed a 6-month moratorium to give us time to sort this out, to talk among ourselves, and to hear from experts, and in the meantime not to have this steady march toward this question of human cloning. That is why these two issues are before us.

I recommend and urge my colleagues to vote against cloture on the energy bill and the cloning issue because we should not cut off debate. We should have full debate. We should have amendments to these issues. I believe with proper debate and with some amendments being offered, we could come up with an energy bill that would pass this Senate overwhelmingly, probably nearly unanimously. Would it be exactly the way I would write it or any Senator on either side of the aisle would write it? Probably not. Would it be a major step forward? Yes, it would. Should we get a direct vote on the cloning issue? We should, in my opinion.

So I urge my colleagues to vote no on cloture, continue this debate, and then vote no on the substitute, because if my colleagues vote yes on the substitute, invoke cloture, then they wipe this issue off the table and they will not have an opportunity to have a full debate and direct votes on the amendments.

Regardless of what happens, at some point we are going to get to the underlying substance. The energy and cloning language does not replace the railroad bill. It is on top of that. We are going to get to the substance, and there are going to be substantial amendments that will be offered to correct some of the concerns or at least address some of the concerns in this legislation. With some participation on both sides, I believe we could reach an agreement to pass this bill, with the energy and cloning parts added, by the middle or the latter part of this week.

The other side of it is, these issues are not going to go away. These are very important issues. In the case of energy, national security is involved. The economy of our country is involved. Supply is involved for the energy needs and for the economy of our country. In the case of the cloning issue, this is certainly a very important, very emotional issue. Both issues need to be addressed, and they will be addressed repeatedly on other bills when the opportunity presents itself if we do not do it. Let us do it on this bill. I believe we could facilitate getting an early completion of these issues and complete our work for the year.

I yield the floor.

The PRESIDING OFFICER. The majority leader.

STATE OF PLAY

Mr. DASCHLE. Mr. President, I have great respect for the Republican leader and appreciate very much his efforts at asserting his ability to bring his caucus's agenda to the Senate. When we were in the minority, we tried to do that on many occasions, and I certainly do not deny him the right to do it.

Let me make sure everybody understands the state of play. The current bill pending is the Railroad Retirement Act. Our Republican colleagues have filed an amendment that actually combines the comprehensive energy bill with the question about whether or not we ought to drill in ANWR with the question on whether or not we ought to allow cloning in this country.

I must say, in all my years, I do not recall a more unusual marriage of issues involving public policy than this one. What the Republicans are saying is not only should they have the right to offer this amendment but they want to extend debate on their own amendment.

They actually are now advocating we not vote for cloture, which is the Democratic position. We had expressed some concern about an amendment of this kind on this bill, and we will have an opportunity to vote on cloture on the bill as soon as we dispose of the cloture motion on this particular amendment. We may have a unanimous vote on this amendment on cloture, which is an extraordinary situation given the complexity of these issues and the unusual juxtaposition of the two issues together.

I am confident there will be those who are going to be confused with our colleagues' strategy, but certainly that is their choice.

Let me simply say three things: First, these are very important questions. Energy policy alone should dictate a debate in the Senate that would require days, if not longer, to ensure we carefully consider all of the ramifications of energy policy, additional production, additional efforts at conservation, additional ways in which to research alternative energy sources, our infrastructure, the environmental questions associated with where we draw our additional production. All of those questions will be addressed. Ought they be addressed as an amendment to the railroad retirement bill? Is this the best forum within which to address something as complex, controversial, and as far-reaching? I think even our Republican colleagues would have to say it is not.

The question of cloning may also fall into that category. As complex, as difficult, as extraordinarily sophisticated

as this whole question of public policy is, is this the right place, an amendment to the Railroad Retirement Act, to take up the issue of cloning? I think not.

It is for that reason I have said this Senate will take up, consider carefully, and dedicate whatever time is required to both issues early next year. We are trying to address railroad retirement now. We have to address the farm bill soon. We have the Defense appropriations bill upcoming. We also have the economic stimulus plan in addition to terrorist insurance—all of those issues in what amounts to a few days remaining in this session of Congress.

Our colleagues have been demanding we take up energy, with all of its complexity, and cloning, with the controversies associated with that issue as well. That is virtually an impossibility unless we are in session between Christmas and New Year's, and I do not think anyone is serious about a schedule of that kind.

So I urge my colleagues to vote against cloture on this amendment, vote for cloture on the bill, so we can bring our debate on railroad retirement to closure. That is the way we can address these issues in a careful, constructive, and meaningful way.

I yield the floor.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. MURKOWSKI. Mr. President, I want to engage the two leaders in a brief colloquy.

I have requested an opportunity to bring the two leaders into a short colloquy relative to the urgency of trying to work out a schedule that is compatible with the business at hand of the Senate, and the interests, of course, of our President relative to some of the items he has decided are priorities, including energy and trade promotion, and recognizing the vote we have before us, which is a convoluted vote because we are basically taking up three issues: Cloning, as well as energy and, of course, railroad retirement.

What we had hoped to be able to negotiate was an up-or-down vote on an energy bill. As the leader knows, we had a good deal of debate within the committee prior to the change of majority. The House of Representatives passed H.R. 4. That is what is before us. The Senator from Alaska is now in the position of wanting to work with the majority leader in ensuring we can expedite the business of the Senate, and I do not initiate undue delays by objecting to unanimous consent agreements.

I ask the majority leader, while on the one hand he assures us he is willing to take up an energy bill as a priority sometime when we get back, to give us an indication that we will finish that bill, that we will not be in a situation where he will pull it down because of objection one way or another and we never get to an energy bill.

The rights I have as a Senator are obviously limited. It is not my intent to delay, but I must do whatever parliamentary opportunities I have to encourage this.

As the majority leader knows, in July we entered into a unanimous consent agreement. That was not granted for a time certain—when I say “time certain,” I mean a day certain—on the issue of Iraq and whether to terminate under the sanctions our sale of oil from Iraq. I understand the majority leader will respond to me soon. In view of the fact we have lost two American lives over there, with illegal smuggling of oil, this is a bit of a priority.

Can the two leaders perhaps get together and give some assurance we could take up an energy bill when we come back after the first of the year, and take it up in such a way to offer an opportunity for amendments, an up-or-down vote, and resolve it and move on to the other matters the majority leader believes are appropriate and necessary? From the view of broad interest, this matter should be resolved once and for all. Obviously, the House has done their job; the Senate has yet to do its job.

As the majority leader knows, the fact the authority has been taken away from the authorizing committee and left in the hands of the majority leader leaves us in a bit of a bind as far as having any input on whatever energy bill might come up. All I ask is the assurance to take up an energy bill and dispose of it in a reasonable timeframe.

Mr. DASCHLE. Mr. President, if I could respond, I know some of our colleagues are trying to catch airplanes. We need to get on with this vote.

I am very sympathetic to the Senator from Alaska. I have been in exactly his position three times now in the last month. I was in his position when we tried to address the unemployment compensation bill on the airline security legislation. I was in it when we tried to address the firefighters legislation as an amendment. I was in it for the last week as we have attempted to bring closure on an up-or-down vote on this bill, the Railroad Retirement Act. In all three cases, of course, the Senate has worked its will and Senators have used their prerogatives under Senate rules to extend debate. We have not had an up-or-down vote on my three priorities.

We all face these circumstances where as much as we would like to bring a particular bill or amendment to closure with an up-or-down vote, as I have attempted in the last month on those three issues, Senators have used their prerogatives as Senators under the rules to continue the debate. We will have to see how the energy debate plays itself out, especially with regard to ANWR.

I have already stated very emphatically my desire to bring up the energy

bill prior to the Founders' Day recess, to have a good debate, to talk about all of the issues, including those which are controversial. It is my expectation we will do just that. We will have a good debate and have many votes on many of the issues that the Senator has so passionately addressed in the Senate Chamber.

I ask for regular order.

COMPREHENSIVE RETIREMENT SECURITY AND PENSION REFORM ACT OF 2001—Resumed

The PRESIDING OFFICER. Under the previous order, the clerk will report the bill by title.

The assistant legislative clerk read as follows:

A bill (H.R. 10) to provide for pension reform, and for other purposes.

Pending:

Daschle (for Hatch/Baucus) amendment No. 2170, in the nature of a substitute.

Lott/Murkowski/Brownback amendment No. 2171 (to amendment No. 2170), to enhance energy conservation, research and development, and to provide for security and diversity in the energy supply for the American people.

CLOTURE MOTION

The PRESIDING OFFICER. Under the previous order, the clerk will report the motion to invoke cloture.

The assistant legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, do hereby move to bring to a close debate on the pending Lott amendment:

Trent Lott, Frank H. Murkowski, R.F. Bennett, Phil Gramm, Sam Brownback, Don Nickles, Pat Roberts, Mike Crapo, Larry E. Craig, Jon Kyl, Chuck Grassley, Pete Domenici, Mitch McConnell, Judd Gregg, Conrad Burns, Craig Thomas.

The PRESIDING OFFICER. By unanimous consent, the mandatory quorum call has been waived.

The PRESIDING OFFICER. The question is, Is it the sense of the Senate that debate on the Lott amendment shall be brought to a close?

The yeas and nays are required under the rule.

The clerk will call the roll.

The legislative clerk called the roll.

Mr. REID. I announce that the Senator from Iowa (Mr. HARKIN), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Vermont (Mr. LEAHY), and the Senator from New Jersey (Mr. TORRICELLI) are necessarily absent.

I further announce that, if present and voting, the Senator from Massachusetts (Mr. KENNEDY), the Senator from Vermont (Mr. LEAHY), and the Senator from New Jersey (Mr. TORRICELLI) would each vote “no.”

Mr. NICKLES. I announce that the Senator from Ohio (Mr. VOINOVICH) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The yeas and nays resulted—yeas 1, nays 94, as follows:

[Rollcall Vote No. 344 Leg.]

YEAS—1

Allen

NOT VOTING—5

Harkin	Leahy	Voinovich
Kennedy	Torricelli	

The PRESIDING OFFICER. On this vote, the yeas are 1, the nays are 94. Three-fifths of the Senators duly chosen and sworn not having voted in the affirmative, the motion is rejected.

CLOTURE MOTION

The PRESIDING OFFICER. Under the previous order, the Chair lays before the Senate the pending cloture motion, which the clerk will report.

The legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close the debate on the Daschle for Hatch and Baucus substitute amendment No. 2170 for Calendar No. 69, H.R. 10, an act to provide for pension reform and for other purposes:

Paul Wellstone, Richard Durbin, Byron Dorgan, Harry Reid, Jon Corzine, Hillary Clinton, Blanche Lincoln, Jack Reed, Jean Carnahan, Mark Dayton, Carl Levin, Tim Johnson, Bill Nelson of Florida, Charles Schumer, Ron Wyden, Debbie Stabenow, Barbara Mikulski, Tom Daschle.

The PRESIDING OFFICER. By unanimous consent, the mandatory quorum call has been waived.

The question is, Is it the sense of the Senate that debate on the Daschle for Hatch and Baucus substitute amendment No. 2170 to Calendar No. 69, H.R. 10, an act to provide for pension reform and for other purposes, shall be brought to a close?

The yeas and nays are required under the rule.

The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. REID. I announce that the Senator from Iowa (Mr. HARKIN), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Vermont (Mr. LEAHY), and the Senator from New Jersey (Mr. TORRICELLI) are necessarily absent.

I further announce that, if present and voting, the Senator from Massachusetts (Mr. KENNEDY), the Senator from Vermont (Mr. LEAHY), and the Senator from New Jersey (Mr. TORRICELLI) would each vote "aye."

The PRESIDING OFFICER (Mr. CORZINE). Are there any other Senators in the Chamber desiring to vote?

The yeas and nays resulted—yeas 81, nays 15, as follows:

[Rollcall Vote No. 345 Leg.]

YEAS—81

NOT VOTING—4

Harkin	Leahy
Kennedy	Torricelli

The PRESIDING OFFICER. On this vote, the yeas are 81, the nays are 15. Three-fifths of the Senators duly chosen and sworn having voted in the affirmative, the motion is agreed to.

Mr. REID. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DASCHLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DASCHLE. Mr. President, in keeping with our understanding of our current parliamentary circumstances, I

make a point of order that amendment No. 2171 is not germane.

The PRESIDING OFFICER. The point of order is sustained. The amendment falls.

Mr. DASCHLE. I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MORNING BUSINESS

Mr. REID. Mr. President, I ask unanimous consent that the Senate now proceed to a period for morning business, with Senators allowed to speak therein for a period not to extend 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, I ask unanimous consent that the time I have just consumed calling off the quorum call and proceeding to morning business be charged against the 30 hours postcloture.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Rhode Island.

Mr. REED. Mr. President, I would like to be recognized to speak in morning business.

The PRESIDING OFFICER. The Senator may proceed for 10 minutes.

ELEMENTARY AND SECONDARY EDUCATION ACT

Mr. REED. Mr. President, I rise to discuss the current conference on the reauthorization of the Elementary and Secondary Education Act, known as the ESEA. In particular, I bring to the attention of my colleagues the fact that last Friday the conference rejected the Senate's unanimous support for full funding of the Individuals with Disabilities Education Act, IDEA. I am deeply disappointed the conference would reject this very important legislation that has received unanimous support in the Senate.

IDEA has been an extraordinarily important legislative vehicle for students with disabilities throughout this country. Only 15 percent of students with disabilities were receiving any serious education prior to the enactment of IDEA in the mid-seventies. Today a free, excellent public education is the rule of law for all children in America, including those with disabilities.

Today, IDEA serves approximately 6 million children, the majority of whom are taught in regular classrooms in their neighborhoods. They are with their classmates, and they are learning. They are making impressive

progress. High school graduation rates for special needs students have also increased dramatically.

In an interesting study between those students who are beneficiaries of IDEA and older adults who did not have this opportunity although they did have disabilities, those younger students with IDEA are in the workforce at a much higher rate. This is not simply a good thing to do in an altruistic sense, it is an important thing to do for our economy, for our workforce.

We have made progress with IDEA. We have increased the number of students who are covered. We have made it a standard that all students, particularly those with disabilities, would have access to classrooms, but we have not lived up to the real promise we made back in the mid-seventies, and that is that we would, in fact, pay 40 percent of the cost of this education for children with disabilities.

Sadly, the Federal share is about 15 percent, leaving it up to the States to make up the difference. As we all know, this has been a constant source of contention between the States and the Federal Government. It is something we have the opportunity to correct in this conference, an opportunity we have not as yet seen, but it is an opportunity I hope in the days ahead we will be able to realize as we return to the conference and, once again, press for full funding of IDEA.

We have been in this body and the other body over the last several years constantly talking about the importance of IDEA, strongly suggesting our unwavering support for IDEA. But those were easy votes because they were simply about the concept.

The hard vote took place last Friday in the conference where we were actually going to put dollars to our words, to match our rhetoric with real resources. Unfortunately, on that real vote, the conference failed.

We have an opportunity to build on what we did in the Senate several months ago. Senator HAGEL and Senator HARKIN offered an amendment that would fully fund IDEA and make it mandatory spending. The amendment would increase in yearly increments of \$2.5 billion until the full 40 percent Federal share is realized by the year 2007.

In the process of making IDEA funding mandatory, it would free up anywhere between \$28 billion and \$52 billion in funds for discretionary educational programs that the Federal Government supports.

This would be a win-win situation, clearly signaling to the States that they can depend upon a robust stream of IDEA funding and at the same time give us the opportunity to support other worthy Federal educational programs such as title I, such as professional development—all those programs that are so important.

The President has rightly made education an important priority in his administration, and he has taken a very aggressive view toward tough accountability standards for testing, but the reality is, without resources, we cannot fully realize the potential of American students. We can test and test and test, but we do not have the resources for professional development, for smaller class size, for better libraries, for a host of programs.

The testing will show us what we know already: There are students who, because of social circumstances, because of income circumstances, because of lack of resources in the schools, are falling behind. We know we can simply divide districts based upon their income, the affluent versus the poorest, and we will see a startling difference in performance of those children. We want to do better. We want to have tough accountability, but without resources we are not going to get the results.

That, again, is why I am so disappointed we did not follow up with the wisdom of the Harkin-Hagel amendment and in the conference adopt the Senate position: full funding of IDEA, mandatory funding of IDEA. That could be the most fundamental education reform we could ever accomplish this year. Again, we missed the opportunity last Friday, but I hope before this conference concludes we will have another chance to revisit this issue and to seize this opportunity and fully fund IDEA.

Just ask every Governor, every legislative leader, superintendents, principals; they will all say the same thing: The biggest thing we can do to help them provide good education for all students is to fully fund IDEA. That is what I hear when I go back to Rhode Island. I do not hear about more testing. I hear something about libraries and professional development, but what I hear consistently and constantly is: Please, fully fund the IDEA program; please. We are rejecting the pleas of those people who are in the front ranks of education, those people who have the most significant responsibility for education.

Again, I think it is a mistake and a missed opportunity. This issue becomes very real in the lives of the children and the families who deal with issues of disability, and the parents who have to deal with this issue. It is not an academic one. It is not a budgetary issue. It is not an issue that is hypothetical we could debate. It is personal because every parent wants the best for their child. Some parents have to fight constantly to get what is owed their child through the special education program.

In Rhode Island, I constantly meet parents and they contact me. One family, the Gulianos from East Greenwich, RI, wrote to me and told me about their struggle, which is typical of fami-

lies across this country. From their letter:

Time and time again, we have heard from very well meaning people that there is just not enough personnel or hours available to provide these kinds of services. We are told that they just don't have the funding. Funding that should have come from the legislation that entitles Jamie to receive appropriate educational services in the first place—IDEA.

This school system, one of the best school systems in my State, is not a school system that would do badly on examinations. This is not a school system that lacks professional development or adequate class size or good facilities, but when it comes to IDEA even this district, this affluent community, lacks the resources to fully serve all the children it needs to serve, and this district is a home to families who are themselves typically college educated and very well off, and they can advocate for their child. But go into a center city where families under more economic stress and sometimes families are with one adult and several children. For these families it is virtually impossible to advocate successfully for the programs as they do in some of the more affluent suburbs. There the crisis is even more severe, the stress of funding more severe. We can alleviate some of those problems and that stress if we go ahead and make IDEA mandatory and free up not only funds for IDEA but also for other educational programs.

I hear the same thing from school principals who say if they get more IDEA funding, they can have additional teachers, enhanced technology, all those things that we say are important to the educational process. Throughout my State, superintendents and principals have consistently and constantly come forward to say, give us more resources for IDEA.

I believe strongly and emphatically this is something we have to do. It is not an option. We cannot put it off until next year or the following year. If we truly want to make an impact on education in the United States today, fund IDEA, provide strict accountability, provide resources for other programs such as professional development and libraries, and we will have educational progress. If we do not do that, then I think all the testing and all the accountability and all the evaluation will simply tell us what we know already: Some students are failing; other students are doing exceptionally well.

The other problem we face is the reality that our brave words about IDEA, and our brave words and authorization about what we want to do with respect to funding education, will shortly collide with reality. Last week, OMB Director Daniels announced we have locked ourselves into several years of deficits, and in those deficits I do not think we are going to see the commitment in dollars to education we are

hearing today in rhetoric. That is another very important reason why today we should make IDEA funding mandatory, and I hope we do.

In my State of Rhode Island, our board of regents for elementary and secondary education has asked for a 4.4-percent increase. Frankly, the Governor is resisting because he has ordered every other department in the State to cut spending 6 percent. That is the reality of the States. If we want educational reform, if we want to assist and support every educational organization in the States, then we have to put real resources into the mix of educational reform.

I argue again that our task in the next several days as we conclude this conference should be to, once again, bring to the conference the issue of IDEA, bring forth the Harkin-Hagel amendment, mandatory funding, a full Federal share by 2007. If we do that, we will have educational reform that works, that is robust, that is well funded, and that will make a huge difference in the lives of every student in America, particularly in the lives of those students with disabilities.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE CONFERENCE REPORT TO H.R. 2299, THE DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATIONS ACT FOR FISCAL YEAR 2002

Mr. CONRAD. Mr. President, I rise to offer for the RECORD the Budget Committee's official scoring for the conference report to H.R. 2299, the Department of Transportation and Related Agencies Appropriations Act for Fiscal Year 2002.

The conference report provides \$15.3 billion in discretionary budget authority, including \$440 million for defense spending. That budget authority, when coupled with the report's new limitations on obligatory authorities, will result in new outlays in 2002 of \$20.076 billion. When outlays from prior-year budget authority and obligation limitations are taken into account, discretionary outlays for the conference report total \$52.744 billion in 2002. Of that

total, \$28.489 billion in outlays counts against the allocation for highway spending and \$5.275 billion counts against the allocation for mass transit spending. The remaining \$18.980 billion in outlays, including those for defense spending, counts against the allocation for general purpose spending.

By comparison, the Senate-passed version of the bill provided \$15.575 billion in discretionary budget authority, which, when combined with the bill's obligation limitations, would have resulted in \$52.925 billion in total outlays, or \$181 million more than the conference report. H.R. 2299 is within the subcommittee's Section 302(b) allocations for budget authority and outlays for general purpose, defense, highways, and mass transit spending. It does not include any emergency designations.

I would like to commend Chairwoman MURRAY and Senator SHELBY for their bipartisan efforts in completing this important legislation. I ask unanimous consent that a table displaying the budget committee scoring of the conference report to H.R. 2299 be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

H.R. 2299, CONFERENCE REPORT TO THE DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATIONS ACT, 2002, SPENDING COMPARISONS—CONFERENCE REPORT

[(In millions of dollars)]

	General purpose	Defense ¹	Highway	Mass Transit ²	Mandatory	Total
Conference report:						
Budget Authority	14,860	440	0	0	-915	14,385
Outlays	18,568	412	28,489	5,275	801	53,545
Senate 302(b) allocation: ³						
Budget Authority	14,884	695	0	0	-915	14,664
Outlays	19,164	0	28,489	5,275	801	53,729
President's request:						
Budget Authority	14,552	340	0	0	-915	13,977
Outlays	18,543	332	28,489	5,275	801	53,440
House passed:						
Budget authority	14,552	340	0	0	-915	13,977
Outlays	18,500	332	28,489	5,275	801	53,397
Senate-passed:						
Budget Authority	14,880	695	0	0	-915	14,660
Outlays	18,545	616	28,489	5,275	801	53,726
CONFERENCE REPORT COMPARED TO:						
Senate 302(b) allocation: ³						
Budget Authority	-24	-255	0	0	0	-279
Outlays	-184	0	0	0	0	-184
President's request:						
Budget Authority	308	100	0	0	0	408
Outlays	25	80	0	0	0	105
House-passed:						
Budget Authority	308	100	0	0	0	408
Outlays	68	80	0	0	0	148
Senate-passed:						
Budget Authority	-20	-255	0	0	0	-275
Outlays	23	-204	0	0	0	-181

¹ The 2002 budget resolution includes a contingent "firewall" in the Senate between defense and nondefense spending. Because the contingent firewall is for budget authority only, the appropriations committee did not provide a separate allocation for defense outlays. This table combines defense and nondefense outlays together as "general purpose" for purposes of comparing the conference report outlays with the Senate subcommittee's allocation.

² Mass transit budget authority is not counted against the appropriations committee's allocation and is therefore excluded from the above numbers.

³ For enforcement purposes, the budget committee compares the conference report to the Senate 302(b) allocation.

Notes.—Details may not add to totals due to rounding. Totals adjusted for consistency with scorekeeping conventions.

NORTH KOREA AND EGYPT

Mr. McCONNELL. Mr. President, let me begin my remarks on North Korea and Egypt with an expression of sympathy and solidarity with the people of Israel following the weekend's brutal violence that killed and injured scores of innocent civilians. My thoughts and prayers are with the victims and their families.

The fanatical suicide bombings by Palestinian extremists must end today. PLO Chairman Yasser Arafat must immediately and unequivocally prove that he embraces peace with Israel, and he can do this by taking concrete action against those responsible for organizing and committing these heinous attacks. Israel has already appropriately responded to the Palestinian

terrorism, and I do not doubt that further retaliation is possible.

North Korea today is a failed state. Its centrally planned economy is in shambles, and the people of North Korea are, at best, oppressed and, at worst, starving and dying. Borrowing a page from Mao Zedong and Pol Pot, North Korean leader Kim Jong-Il recently launched a new revolutionary

movement to build "a people's paradise on this land at an early date." I would remind my colleagues that in the jargon of dictators, "paradise" is synonymous with "purgatory."

While the North Korean leadership poses a clear and present danger to the welfare of its own people, state sponsorship of international terrorism and news reports of North Korean missile sales to Egypt present wider challenges to democracies around the world, from Japan to Israel.

I have stood on the Senate floor several times this year to express my concern with reports of Egyptian insistence on buying North Korean missiles and weapons technology. Last week, this issue surfaced once again at the State Department's daily press briefing. When asked whether the Department has concluded that a missile deal between Pyongyang and Cairo has not occurred, Spokesman Richard Boucher stated "No, I wouldn't go that far."

This should give pause to all of us who follow events in the Middle East closely. According to a November 16 article in the Washington Post, Egyptian President Hosni Mubarak publicly warned of an arms race between Israel and its Arab neighbors. The danger posed by North Korean weapons sales to the region is double-edged: hostile arsenals are bolstered while Pyongyang receives much-needed infusions of cash. Deny both, and stability is strengthened in Asia and the Middle East.

Egypt must immediately and honestly answer whether the purchase of Nodong missiles, that have a range of 1,000 kilometers, is the beginning of that arms race. If this is the case, America has no choice but to review new foreign military sales to Egypt. I know some of my colleagues will disagree with me on this issue, but, to paraphrase that old car repair commercial, we can pay for our inaction now, or we can really pay for it later.

LOCAL LAW ENFORCEMENT ACT OF 2001

Mr. SMITH of Oregon. Mr. President, I rise today to speak about hate crimes legislation I introduced with Senator KENNEDY in March of this year. The Local Law Enforcement Act of 2001 would add new categories to current hate crimes legislation sending a signal that violence of any kind is unacceptable in our society.

I would like to describe a terrible crime that occurred January 9, 1993 in Laguna Beach, CA. A gay Vietnamese man was assaulted behind a string of beachside gay bars. Jeff Michael Raines, 18, and Christopher Michael Cribbins, 22, both of San Clemente, and a 16-year-old from San Juan Capistrano were arrested in connection with the incident.

I believe that government's first duty is to defend its citizens, to defend them

against the harms that come out of hate. The Local Law Enforcement Enhancement Act of 2001 is now a symbol that can become substance. I believe that by passing this legislation, we can change hearts and minds as well.

THE GREATEST GENERATION

Mrs. HUTCHISON. Mr. President, I rise today to honor members of "the greatest generation"—those men and women who were at Pearl Harbor on the infamous day of December 7, 1941. Those who followed coined this nickname we all widely recognize, for the men and women who fought in the Second World War did not think they were committing acts of heroism, they only believed they were doing what was right by serving our Nation.

The generation of men and women, who survived the Second World War, epitomize the characteristics we all, as Americans, hold in such high esteem. As children of the Depression, these men and women grew up knowing the meaning of sacrifice. And during the war, they readily went without luxuries, ready to give up whatever it took to help in the war effort. These men and women are also some of the bravest that our Nation has ever seen. For they gave more than just material goods to the war effort: they offered their husbands, their sons, their brothers, their fathers, and themselves. Without hesitation they enlisted to help our Nation fight the good fight, to rid the world from cruel and aggressive tyrants, and to secure the freedom and liberty on which our Nation was founded.

It was 60 years ago that these men and women unselfishly risked their lives to begin the defense of our country and to fight for freedom in the world. The terrorist attacks of September 11, 2001 gave Americans a glimpse into the tragedy that the men and women of Pearl Harbor survived. Now, more than ever, our entire country appreciates the heroism and leadership embodied by the men and women who served in the Pacific. The courage they displayed is now a more tangible concept for us all, as we can now more fully realize the rarity of their instinct to charge forward and fight in the face of danger. We can only believe that the actions displayed by these members of "the greatest generation" laid the foundation for the heroism and leadership we are seeing in the aftermath of the September 11 attacks.

An important part of honoring the men and women of Pearl Harbor is preserving the stories of their experiences. We must record the experiences of those who survived the attack as well as preserve the stories of those 2,403 men and women who did not live to tell of their encounters on December 7, 1941. I commend the National Museum of the Pacific War in Fredericksburg,

TX, for its continuing devotion to educating current and future generations of Americans on the grim realities of war. It is the only museum in the world dedicated to telling the entire story of the conflict in the Pacific during World War II. Not only does this museum tell the complete story, it also provides a thorough understanding of the causes, sacrifices, and resolutions of World War II in the Pacific. The men and women of this museum continue to keep the story of the attack on Pearl Harbor alive. It is truly a National treasure with an outstanding collection of artifacts from the Pacific War.

While there are many ceremonies and events to commemorate this 60th anniversary of the attack on Pearl Harbor, this one, in Fredericksburg, TX, stands out for several reasons. To begin, this commemoration ceremony is one of only two National events being staged by the Pearl Harbor Survivors Association. And of the two, it is the only one open to the public to join in the observance of this milestone anniversary. This ceremony is particularly special because of the guests in attendance. The museum will host more than 300 survivors of the Pearl Harbor attack, and their families, who have traveled from their homes throughout the United States to be here today. The location of this ceremony is also of important note: Fredericksburg, TX, is the birthplace of Admiral Chester W. Nimitz, who was Commander-in-Chief Pacific during World War II. The location of the National Museum of the Pacific War, previously known as the Admiral Nimitz Museum, was chosen to pay tribute to this great man.

Texas is honored to have as the keynote speaker former President George Bush. As the youngest pilot to fly in the Navy during World War II, Lieutenant Junior Grade George Bush flew TBM Avengers in combat off the aircraft carrier U.S.S. *San Jacinto*.

Sunday, December 7, 1941 will forever live as an infamous day in our Nation's history. But the response of the men and women we will honor on December 7, 2001 to the surprise attack will also forever be ingrained in the memory of America. Their bravery and heroism in the face of mortal danger, and their continuous determination to fight for the existence of freedom in the world shaped our Nation and, indeed, the world. To the men and women of Pearl Harbor we can only say thank you. Thank you for preserving the tenants on which this country was founded, thank you for risking your lives so that those who lived after you could enjoy the same freedom and democracy that you knew, and thank you for being at this commemorative ceremony so that we may show you our appreciation and admiration.

ADDITIONAL STATEMENTS

WHITE KNOLL STUDENTS BUY
NEW YORK CITY A NEW FIRE
TRUCK

• Mr. HOLLINGS. Mr. President, I rise today to recognize White Knoll Middle School in Lexington, South Carolina for their wonderful donation of a fire truck for the New York City Fire Department.

You might ask why, Mr. President, would Lexington, South Carolina be interested in purchasing a fire truck for New York City. In 1867, after fire from the Civil War devastated our state capital of Columbia located just across the county line from Lexington, a group of New York City firefighters raised money to buy Columbia a new fire truck, known then as a hose reel wagon. Because the hose reel wagon was so much more effective in putting out fires than the bucket brigade, Columbia officials pledged to return the favor some day.

With the devastation in New York City and the loss of dozens of rescue vehicles in the September 11th attacks, the students of White Knoll learned of the all but forgotten pledge and decided to take matters into their own hands. They started raising money by selling patriotic buttons, T-shirts, and baked goods. They also solicited help from area businesses. The students' goal of \$354,000 was the minimum needed to purchase a new fire truck without any additional equipment.

Four students were selected to take the two day trip to New York City to award Mayor Rudolph Giuliani with an oversized check with the amount of \$354,411. Thomas Dunn, Maurice Hallman, Staci Smith, and Leigh Tyson also rode in the Macy's Thanksgiving Day Parade with Mayor Giuliani and Yankees manager Joe Torre.

South Carolina and New York have been reunited by generosity in the midst of tragedy. I commend all the students at White Knoll Middle School for their inspiring community service and hard work.●

HONORING WILMINGTON ROTARY
FOR PEACE CENTER INITIATIVE

• Mr. BIDEN. Mr. President, it is with tremendous pride that I rise today to salute the Rotary Club of Wilmington, DE, for its leadership in the worldwide initiative of Rotary International to establish eight Centers for International Studies in Peace and Conflict Resolution.

Recently, the Chairman of the International Rotary Foundation, Luis Giay, visited Delaware and presented an award to the Wilmington Rotary Club for being among the very first Rotary Clubs in the world to raise, sua sponte, \$50,000 for the International Studies in Peace and Conflict Resolu-

tion project. The funds will be used to pay the two-year tuition costs for a graduate student to attend one of the newly-formed Rotary Peace Centers.

In this time of war and strife, my colleagues might find it interesting to learn more about these new Centers. The goals of the Rotary Peace Centers are: Mediation, Conflict Resolution, and Peace where there is war; understanding where there is disharmony; food security where there is hunger; health care where there is disease; education where there is illiteracy; conservation where there is environmental degradation; sustainable Economic Development where there is poverty.

As Rotary's major educational priority in the 21st Century, the Rotary Centers for International Studies will provide opportunities for our next generation of leaders and scholars to focus on dealing effectively with obstacles to international cooperation and peace.

Educating such promising future leaders will help Rotary fulfill its longstanding mission to promote global peace and understanding.

The Rotary Centers have partnered with some of the leading universities in the world. The eight Rotary Peace Centers are located at: Duke University and the University of North Carolina, Chapel Hill in North Carolina; the University of California-Berkeley in California; Sciences Po in Paris, France; the University of Bradford in West Yorkshire, England; the University of Queensland in Brisbane, Queensland, Australia; the International Christian University in Tokyo, Japan; and, Universidad del Salvador in Buenos Aires, Argentina.

Like most big ideas, the fundraising initiative grew from a seed, in this case a seed planted by a small group of Wilmington Rotarians. Past Presidents Joe Melloy and Bruce Beardwood knew that with the Wilmington Rotary Club's 86-year history of service that its members would want to be pioneers in the Rotary Peace Center project. Wilmington Rotarians then set out to meet the \$50,000 goal. They held a very successful silent auction to raise nearly half of the money. Generous, individual contributions put them over the top.

Even more impressive, the Wilmington Rotary Club then challenged the other 43 Clubs and 2,000 Rotarians in the Rotary District that encompasses Delaware and the Eastern Shore of Maryland to raise money for the Rotary Centers for International Studies. I am proud to say, challenge issued, challenge met.

I think it is appropriate and important to publicly recognize the efforts of the Rotary Club of Wilmington to do its part to help make our world a better, safer place to live. Not only is the Wilmington Rotary Delaware's oldest and largest Rotary Club with about 250 members, it continues to be among the

leading Rotary Clubs in the United States. Its leadership as a pioneer Club for the Rotary Centers for Peace and International Studies is a great example of the Rotary tradition of service and of the part each one of us can play in advancing the goal of world peace.

To the members of the Rotary Club of Wilmington, congratulations and thank you.●

MEASURES PLACED ON THE
CALENDAR

The following bills were read the second time, and placed on the calendar.

H.R. 3210. An act to ensure the continued financial capacity of insurers to provide coverage for risks from terrorism.

S. 1748. A bill to promote the stabilization of the economy by encouraging financial institutions to continue to support economic development including development in urban areas, through the provision of affordable insurance coverage against acts of terrorism, and for other purposes.

EXECUTIVE AND OTHER
COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-4784. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Changes to Definition of Major Source" (FRL7107-4) received on November 20, 2001; to the Committee on Environment and Public Works.

EC-4785. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "National Pollutant Discharge Elimination System—Regulations Addressing Cooling Water Intake Structures for New Facilities" (FRL7105-4) received on November 20, 2001; to the Committee on Environment and Public Works.

EC-4786. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "New York: Final Authorization of State Hazardous Waste Management Program Revision" (FRL7101-9) received on November 20, 2001; to the Committee on Environment and Public Works.

EC-4787. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality Implementation Plans; Montana Transportation Conformity; Correction" (FRL7102A-5) received on November 20, 2001; to the Committee on Environment and Public Works.

EC-4788. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Utah: Final Authorization of State-Initiated Changes and Incorporation by Reference of State Hazardous Waste Management Program" (FRL7092-1) received on November 20, 2001; to the Committee on Environment and Public Works.

EC-4789. A communication from the Acting Director of the Fish and Wildlife Service, Department of the Interior, transmitting, pursuant to law, the report of a rule entitled "Final Rule to Designate Critical Habitat for the Oahu Elepaio" (RIN1018-AG99) received on November 27, 2001; to the Committee on Environment and Public Works.

EC-4790. A communication from the Acting Director of the Fish and Wildlife Service, Department of the Interior, transmitting, pursuant to law, the report of a rule entitled "Endangered and Threatened Wildlife and Plants; Final Rule to List the Vermillion Darter as Endangered" (RIN1018-AE51) received on November 26, 2001; to the Committee on Environment and Public Works.

EC-4791. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, a report entitled "Issuance of Revised Model Administrative Order on Consent for Removal Action" received on November 27, 2001; to the Committee on Environment and Public Works.

EC-4792. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, a report entitled "Special Accounts: Guidance on Key Decision Points in Using Special Account Funds" received on November 27, 2001; to the Committee on Environment and Public Works.

EC-4793. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, a report entitled "Clean Air Act Full Approval of Operating Permit Program; District of Columbia; Withdrawal of Direct Final Rule" (FRL7107-2) received on November 27, 2001; to the Committee on Environment and Public Works.

EC-4794. A communication from the Acting Director of the Fish and Wildlife Service, Department of the Interior, transmitting, pursuant to law, the report of a rule entitled "Endangered and Threatened Wildlife and Plants; Emergency Rule to List the Carson Wandering Skipper as Endangered" (RIN1018-AI18) received on November 27, 2001; to the Committee on Environment and Public Works.

EC-4795. A communication from the Acting Director of the Fish and Wildlife Service, Department of the Interior, transmitting, pursuant to law, the report of a rule entitled "Emergency Rule and Proposed Rule to List the Columbia Basin Pygmy Rabbit as Endangered" (RIN1080-AG17) received on November 27, 2001; to the Committee on Environment and Public Works.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mr. GRAHAM (for himself and Mrs. LINCOLN):

S. 1755. A bill to amend the Internal Revenue Code of 1986 to provide a special rule for members of the uniformed services and Foreign Service, and other employees, in determining the exclusion of gain from the sale of a principle residence; to the Committee on Finance.

By Mr. JEFFORDS:

S. 1756. A bill to amend title XVIII to establish a comprehensive centers for medical excellence demonstration program; to the Committee on Finance.

By Mr. CRAIG:

S. 1757. A bill to authorize an additional permanent judgeship in the district of Idaho, and for other purposes; to the Committee on the Judiciary.

By Mrs. FEINSTEIN (for herself, Mr. KENNEDY, Mrs. BOXER, Mr. MILLER, Mr. CORZINE, Mr. DURBIN, and Mrs. CLINTON):

S. 1758. A bill to prohibit human cloning while preserving important areas of medical research, including stem cell research; to the Committee on the Judiciary.

By Mr. KERRY:

S. 1759. A bill to provide a short-term enhanced safety net for Americans losing their jobs and to provide our Nation's economy with a necessary boost; to the Committee on Finance.

ADDITIONAL COSPONSORS

S. 267

At the request of Mr. AKAKA, the name of the Senator from Massachusetts (Mr. KENNEDY) was added as a cosponsor of S. 267, a bill to amend the Packers and Stockyards Act of 1921, to make it unlawful for any stockyard owner, market agency, or dealer to transfer or market nonambulatory livestock, and for other purposes.

S. 612

At the request of Mr. FEINGOLD, the name of the Senator from Arkansas (Mrs. LINCOLN) was added as a cosponsor of S. 612, a bill to amend title 38, United States Code, to require the Secretary of Veterans Affairs to develop and implement an annual plan for outreach regarding veterans benefits, and for other purposes.

S. 673

At the request of Mr. HAGEL, the name of the Senator from Georgia (Mr. CLELAND) was added as a cosponsor of S. 673, a bill to establish within the executive branch of the Government an interagency committee to review and coordinate United States nonproliferation efforts in the independent states of the former Soviet Union.

S. 804

At the request of Mrs. FEINSTEIN, the name of the Senator from Washington (Ms. CANTWELL) was added as a cosponsor of S. 804, a bill to amend title 49, United States Code, to require phased increases in the fuel efficiency standards applicable to light trucks; to require fuel economy standards for automobiles up to 10,000 pounds gross vehicle weight; to raise the fuel economy of the Federal fleet of vehicles, and for other purposes.

S. 839

At the request of Mrs. HUTCHISON, the name of the Senator from Delaware (Mr. CARPER) was added as a cosponsor of S. 839, a bill to amend title XVIII of the Social Security Act to increase the amount of payment for inpatient hospital services under the medicare program and to freeze the reduction in payments to hospitals for indirect costs of medical education.

S. 926

At the request of Mr. HARKIN, the names of the Senator from New Hampshire (Mr. SMITH), the Senator from Virginia (Mr. ALLEN), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Michigan (Mr. LEVIN), and the Senator from Massachusetts (Mr. KERRY) were added as cosponsors of S. 926, a bill to prohibit the importation of any article that is produced, manufactured, or grown in Burma.

S. 1140

At the request of Mr. HATCH, the name of the Senator from Missouri (Mrs. CARNAHAN) was added as a cosponsor of S. 1140, a bill to amend chapter 1 of title 9, United States Code, to provide for greater fairness in the arbitration process relating to motor vehicle franchise contracts.

S. 1209

At the request of Mr. BINGAMAN, the name of the Senator from Maine (Ms. COLLINS) was added as a cosponsor of S. 1209, a bill to amend the Trade Act of 1974 to consolidate and improve the trade adjustment assistance programs, to provide community-based economic development assistance for trade-affected communities, and for other purposes.

S. 1258

At the request of Mr. DEWINE, the name of the Senator from Oregon (Mr. SMITH) was added as a cosponsor of S. 1258, a bill to improve academic and social outcomes for teenage youth.

S. 1482

At the request of Mr. HARKIN, the name of the Senator from North Dakota (Mr. DORGAN) was added as a cosponsor of S. 1482, a bill to consolidate and revise the authority of the Secretary of Agriculture relating to protection of animal health.

S. 1499

At the request of Mr. KERRY, the name of the Senator from Nevada (Mr. REID) was added as a cosponsor of S. 1499, a bill to provide assistance to small business concerns adversely impacted by the terrorist attacks perpetrated against the United States on September 11, 2001, and for other purposes.

S. 1500

At the request of Mr. SMITH of New Hampshire, his name was added as a cosponsor of S. 1500, a bill to amend the Internal Revenue Code of 1986 to provide tax and other incentives to maintain a vibrant travel and tourism industry, to keep working people working, and to stimulate economic growth, and for other purposes.

S. 1572

At the request of Mr. SANTORUM, his name was added as a cosponsor of S. 1572, a bill to endorse the vision of further enlargement of the NATO Alliance articulated by President George W. Bush on June 15, 2001, and by former President William J. Clinton on October 22, 1996, and for other purposes.

S. 1578

At the request of Mr. DORGAN, the names of the Senator from South Dakota (Mr. JOHNSON) and the Senator from Louisiana (Mr. BREAUX) were added as cosponsors of S. 1578, a bill to preserve the continued viability of the United States travel industry.

S. 1617

At the request of Mrs. CLINTON, her name was added as a cosponsor of S. 1617, a bill to amend the Workforce Investment Act of 1998 to increase the hiring of firefighters, and for other purposes.

S. 1655

At the request of Mr. BIDEN, the name of the Senator from California (Mrs. FEINSTEIN) was added as a cosponsor of S. 1655, a bill to amend title 18, United States Code, to prohibit certain interstate conduct relating to exotic animals.

S. 1678

At the request of Mr. MCCAIN, the name of the Senator from Nebraska (Mr. NELSON) was added as a cosponsor of S. 1678, a bill to amend the Internal Revenue Code of 1986 to provide that a member of the uniformed services or the Foreign Service shall be treated as using a principal residence while away from home on qualified official extended duty in determining the exclusion of gain from the sale of such residence.

S. 1680

At the request of Mr. WELLSTONE, the names of the Senator from Vermont (Mr. LEAHY) and the Senator from New Hampshire (Mr. GREGG) were added as cosponsors of S. 1680, a bill to amend the Soldiers' and Sailors' Civil Relief Act of 1940 to provide that duty of the National Guard mobilized by a State in support of Operation Enduring Freedom or otherwise at the request of the President shall qualify as military service under that Act.

S. 1707

At the request of Mr. SMITH of New Hampshire, his name was added as a cosponsor of S. 1707, a bill to amend title XVIII of the Social Security Act to specify the update for payments under the medicare physician fee schedule for 2002 and to direct the Medicare Payment Advisory Commission to conduct a study on replacing the use of the sustainable growth rate as a factor in determining such update in subsequent years.

At the request of Mr. JEFFORDS, the names of the Senator from Maryland (Ms. MIKULSKI), the Senator from Ohio (Mr. VOINOVICH), and the Senator from New Jersey (Mr. CORZINE) were added as cosponsors of S. 1707, *supra*.

S. 1717

At the request of Mr. DOMENICI, the names of the Senator from New Jersey (Mr. CORZINE) and the Senator from Delaware (Mr. CARPER) were added as cosponsors of S. 1717, a bill to provide for a payroll tax holiday.

S. 1745

At the request of Mrs. LINCOLN, the names of the Senator from Minnesota (Mr. WELLSTONE) and the Senator from Georgia (Mr. MILLER) were added as cosponsors of S. 1745, a bill to delay until at least January 1, 2003, any changes in medicaid regulations that modify the medicaid upper payment limit for non-State Government-owned or operated hospitals.

S. RES. 109

At the request of Mr. REID, the names of the Senator from Virginia (Mr. ALLEN), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Oklahoma (Mr. INHOFE), the Senator from South Dakota (Mr. JOHNSON), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Michigan (Mr. LEVIN), the Senator from New Jersey (Mr. TORRICELLI), and the Senator from Ohio (Mr. VOINOVICH) were added as cosponsors of S. Res. 109, a resolution designating the second Sunday in the month of December as "National Children's Memorial Day" and the last Friday in the month of April as "Children's Memorial Flag Day."

S. RES. 185

At the request of Mr. ALLEN, the name of the Senator from New Hampshire (Mr. SMITH) was added as a cosponsor of S. Res. 185, a resolution recognizing the historical significance of the 100th anniversary of Korean immigration to the United States.

AMENDMENT NO. 2157

At the request of Mr. MCCAIN, the names of the Senator from Nebraska (Mr. NELSON) and the Senator from Connecticut (Mr. DODD) were added as cosponsors of amendment No. 2157 intended to be proposed to H.R. 3090, a bill to provide tax incentives for economic recovery.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. GRAHAM (for himself and Mrs. LINCOLN):

S. 1755. A bill to amend the Internal Revenue Code of 1986 to provide a special rule for members of the uniformed services and Foreign Service, and other employees, in determining the exclusion of gain from the sale of a principal residence; to the Committee on Finance.

Mr. GRAHAM. Mr. President, I along with Senator LINCOLN am proud to sponsor this bill to allow members of the military service, Foreign Service, and employees serving on assignment abroad to qualify for the same tax relief on the profit generated when they sell their main residence as other Americans. This bill does not create a new tax benefit, it merely modifies current law to exclude the time living abroad when calculating the number of years the homeowner has lived in their primary residence. This bill will treat

members of the military, foreign service officers and civilians living abroad fairly, by treating them like all other Americans.

The Taxpayer Relief Act of 1997 gives taxpayers who sell their principal residence a much-needed tax break. Prior to the 1997 act, taxpayers received a one-time exclusion on the profit they made when they sold their principal residence, but the taxpayer had to be at least 55 years old and live in the residence for two of the five years preceding the sale. This provision primarily benefited older Americans, while not providing any relief to younger taxpayers and their families.

The 1997 act corrected this flaw. Now, a taxpayer who sells his or her principal residence is not taxed on the first \$250,000 of profit from the sale. Joint files are not taxed on the first \$500,000 of profit they make from selling their principal residence. The taxpayer must meet two requirements to qualify for this tax relief: One, they must own the home for at least two of the five years preceding the sale; and two, they must live in the home as their main home for at least two of the last five years.

Unfortunately, the second part of this eligibility text unintentionally and unfairly prohibits men and women in the Armed Forces, Foreign Service, and U.S. employees working abroad from qualifying for this beneficial tax relief. This was not the intent of the 1997 Taxpayer Relief Act of 1997.

This bill remedies the inequality in the 1997 law. The bill amends the Internal Revenue Code so that military members, Foreign Service members, and U.S. employees working abroad are not penalized by suspending the five-year determination period. The member is still required to own and live in the home for at least two years. This change was previously passed by Congress as part of the 1999 Taxpayer Relief and Refund Act, which was vetoed by President Clinton for unrelated reasons.

The 1997 home sale provision unintentionally discourages home ownership for U.S. members serving abroad which is bad fiscal policy. Home ownership has numerous benefits for communities and individual homeowners. Owning a home provides Americans with a sense of community and adds stability to our nation's neighborhoods. Home ownership also generated valuable property taxes for our nation's communities.

We cannot afford to discourage U.S. citizens from working and living abroad by penalizing them with higher taxes merely because they are doing their job. Enacting this remedy will grant equal and fair tax relief to those U.S. citizens working abroad.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1755

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SPECIAL RULE FOR MEMBERS OF UNIFORMED SERVICES AND FOREIGN SERVICE, AND OTHER EMPLOYEES, IN DETERMINING EXCLUSION OF GAIN FROM SALE OF PRINCIPAL RESIDENCE.

(a) IN GENERAL.—Subsection (d) of section 121 of the Internal Revenue Code of 1986 (relating to exclusion of gain from sale of principal residence) is amended by adding at the end the following new paragraphs:

“(9) MEMBERS OF UNIFORMED SERVICES AND FOREIGN SERVICE.—

“(A) IN GENERAL.—The running of the 5-year period described in subsection (a) shall be suspended with respect to an individual during any time that such individual or such individual's spouse is serving on qualified official extended duty as a member of the uniformed services or of the Foreign Service.

“(B) QUALIFIED OFFICIAL EXTENDED DUTY.—For purposes of this paragraph—

“(i) IN GENERAL.—The term ‘qualified official extended duty’ means any period of extended duty as a member of the uniformed services or a member of the Foreign Service during which the member serves at a duty station which is at least 50 miles from such property or is under Government orders to reside in Government quarters.

“(ii) UNIFORMED SERVICES.—The term ‘uniformed services’ has the meaning given such term by section 101(a)(5) of title 10, United States Code, as in effect on the date of the enactment of this paragraph.

“(iii) FOREIGN SERVICE OF THE UNITED STATES.—The term ‘member of the Foreign Service’ has the meaning given the term ‘member of the Service’ by paragraph (1), (2), (3), (4), or (5) of section 103 of the Foreign Service Act of 1980, as in effect on the date of the enactment of this paragraph.

“(iv) EXTENDED DUTY.—The term ‘extended duty’ means any period of active duty pursuant to a call or order to such duty for a period in excess of 90 days or for an indefinite period.

“(10) OTHER EMPLOYEES.—

“(A) IN GENERAL.—The running of the 5-year period described in subsection (a) shall be suspended with respect to an individual during any time that such individual or such individual's spouse is serving as an employee for a period in excess of 90 days in an assignment by such employee's employer outside the United States.

“(B) LIMITATIONS AND SPECIAL RULES.—

“(i) MAXIMUM PERIOD OF SUSPENSION.—The suspension under subparagraph (A) with respect to a principal residence shall not exceed (in the aggregate) 5 years.

“(ii) MEMBERS OF UNIFORMED SERVICES AND FOREIGN SERVICE.—Subparagraph (A) shall not apply to an individual to whom paragraph (9) applies.

“(iii) SELF-EMPLOYED INDIVIDUAL NOT CONSIDERED AN EMPLOYEE.—For purposes of this paragraph, the term ‘employee’ does not include an individual who is an employee within the meaning of section 401(c)(1) (relating to self-employed individuals).”.

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to sales and exchanges after the date of the enactment of this Act.

By Mr. CRAIG:

S. 1757. A bill to authorize an additional permanent judgeship in the district of Idaho, and for other purposes; to the Committee on the Judiciary.

Mr. CRAIG. Mr. President, I rise to introduce legislation, on behalf of myself and my fellow Idaho Senator, MIKE CRAPO, creating a new Federal judgeship for the State of Idaho. This is a matter of great urgency to the citizens of Idaho, and our bill is aimed at heading off a looming crisis for the Federal bench in our State.

Idaho has two Federal district judgeships, created in 1890 and 1954. It is one of only three States in the Union with two Federal District judgeships. Because of the State's sheer size, its extraordinary increase in population, and tremendous growth in caseload over nearly five decades, the current situation is becoming increasingly unworkable.

For that reason, Senator CRAPO and I are seeking an additional judgeship to ensure that there are adequate resources for the administration if justice in our State. I am gratified to note that we have the strong support of Idaho's sitting Federal judges in this effort.

Let me take a moment to explain my State's problem in greater detail. Idaho has three distinct and widely distant geographical areas: the Southeast, the Southwest, and the North. A district judge must travel up to 450 miles between division offices. This distance is greater than that traveled in other rural district courts, including those Montana, Wyoming, North Dakota, South Dakota, or eastern Washington. In fact, only a district judge in Alaska has a greater distance to travel, when comparing these rural district courts.

The sheer size of Idaho, the geographical barriers, and the distribution of population make it a time-consuming, expensive and physically draining process for two judges to serve the entire State. As our current Chief District Judge B. Lynn Winmill has pointed out, if there is a trial in southwest Idaho and a trial in southeast Idaho, “there is no district judge to serve the needs of northern Idaho.” In addition, as Judge Winmill has stated, the “mountainous terrain and two-land highway system in northern Idaho make [that] area particularly difficult to serve.”

Some Federal districts have the advantage of being able to call upon senior judges to help out by taking half-caseloads. Idaho has no senior judges and therefore does not have the flexibility that other districts have in relation to managing cases. Consequently, for example, when district Judge Edward J. Lodge was involved in a 6-month trial on a complex matter, Idaho was forced to request that the Ninth Circuit Judicial Council authorize the use of judges from the Eastern District of Washington. These judges

assisted our district by handling close to 50 cases in the last year. While this action may have eased Idaho's crisis temporarily, it cannot reasonably be considered an acceptable permanent solution to borrow judges from another state and district.

The population of Idaho has increased 28.5 percent in the past decade, giving Idaho the third fastest-growing population in the country. In the past year alone, Idaho was the fifth fastest-growing State in the Nation. Population growth is traditionally a controlling factor in increasing a district's judgeships, and yet Idaho has not gained a judge in nearly half a century.

The District of Idaho's caseload continues to grow. During the 12-month period ending September 30, 2000, the District of Idaho's civil filings increased 26.9 percent, ranking second in the country in the percentage increase. Our district also ranks 25th in the Nation in the number of trials completed. The gap between the number of new civil filings and the number completed is spreading ever wider, and is already a broad chasm into which too many cases are already dropping.

There are currently 23 assistant U.S. attorneys in Idaho, which is more than Montana, Wyoming, Alaska, North Dakota, South Dakota, and eastern Washington. With filings for the period ending September 30, 2000 weighted at 447 cases per judge, this number exceeds the 430 which the Judicial Conference uses to indicate the need for additional judgeships. Combining this excess number of cases with the travel distances in Idaho makes the caseload even more burdensome for Idaho's two judges.

Additionally, according to Idaho's new U.S. Attorney Tom Moss, there has been an increase in criminal cases initiated, and he is expecting the “caseloads to increase significantly,” especially in Idaho's five Indian reservations.

Although this bill is being introduced late in the year, the effort to secure an additional judgeship has been underway for many months. We have had member-to-member and staff-to-staff discussions with the Senate Judiciary Committee about including an additional judgeship for Idaho in any legislation that the committee considers, creating new judgeships. Indeed, Idaho's chief district judge even traveled to Washington, DC, to visit personally with members of the committee and make the case for a new Idaho district judgeship.

I greatly appreciate the advice that we have received in this effort from Chairman LEAHY, Senator HATCH, and their staff, as well as other Judiciary Committee members, and it is because they suggested it that we are taking the step of filing this very simple bill, to put the issue formally before the Judiciary Committee and the Senate.

There should not be a waiting list for people to obtain justice in our courts,

but there is in Idaho. This will continue to be the case until relief arrives in the form of a third judge. I hope the Senate will support this measure and protect the interests of justice in the State of Idaho.

By Mrs. FEINSTEIN (for herself, Mr. KENNEDY, Mrs. BOXER, Mr. MILLER, Mr. CORZINE, Mr. DURBIN, and Mrs. CLINTON):

S. 1758. A bill to prohibit human cloning while preserving important areas of medical research, including stem cell research; to the Committee on the Judiciary.

Mrs. FEINSTEIN. Mr. President, today Senators KENNEDY, BOXER, MILLER, CORZINE, DURBIN, CLINTON, and I are introducing legislation to make the cloning of a human being a crime. Unlike other bills, our bill would not criminalize cloning that could provide treatments for diseases, known as therapeutic cloning.

On November 25, scientists at Advanced Cell Technology, a Massachusetts biotechnology firm, announced that they had created the first human embryos ever produced by cloning. I believe that this announcement raises serious concerns and we are proposing a bill to address this development.

The bill we introduce today would: 1. permanently ban human reproductive cloning, the cloning of a human being; and 2. allow therapeutic cloning, that is, allow the use of somatic cell nuclear transfer or other cloning technologies to create stem cells for treating diseases.

I support a ban on the cloning of human beings because I believe it is scientifically unsafe, morally unacceptable, and ethically flawed.

Our bill would allow cloning for therapeutic or treatment purposes. It would not allow cloning for reproductive purposes, for creating a human being. Specifically, it prohibits the implantation of the product of nuclear transplantation into a uterus. Nuclear transplantation is also known as somatic cell nuclear transfer.

There is broad agreement in the public, in the Congress, in the scientific community, in the medical community, and in the religious community that the cloning of a human being should be prohibited. This bill does just that.

The view that we should not clone human beings is held by many groups and authorities, including the National Bioethics Advisory Commission, NBAC, which concluded that it is unacceptable for anyone in the public or private sector to create a child using somatic cell nuclear transfer technology. The Commission said,

At this time, it is morally unacceptable for anyone in the public or private sector, whether in a research or clinical setting, to attempt to create a child using somatic cell nuclear transfer cloning.

The difference between our bill and several others including H.R. 2505, the

bill passed by the House of Representatives is whether the bills protect valuable medical research that some day could provide cures for many dreaded diseases, diseases like cancer, diabetes, cystic fibrosis, and heart disease; and conditions like spinal cord injury, liver damage, arthritis, and burns. This research may some day develop replacement cells and tissues to restore bodily function and treat diseases. Therapeutic cloning is particularly promising because the rejection of implanted tissues is less likely since the tissues would exactly match those of the person who donated the somatic cell nucleus.

To criminally prohibit this kind of research would be a big setback for science. Here's what some of the experts say about the promise of therapeutic cloning: The Association of American Medical Colleges:

Therapeutic cloning technology could provide an invaluable approach to studying how cells become specialized, which in turn could provide new understanding of the mechanisms that lead to the development of the abnormal cells responsible for cancers and certain birth defects. Improved understanding of cell specialization may also provide answers to how cells age or are regulated—leading to new insights into the treatment of cure of Alzheimer's and Parkinson's diseases, or other incapacitating degenerative diseases of the brain and spinal cord. The technology might also help us understand how to activate certain genes to permit the creation of customized cells for transplantation or grafting. Such cells would be genetically identical to the cells of the donor and could therefore be transplanted into that donor without fear of immune rejection, the major biological barrier to organ and tissue transplantation at this time.

The Society for Women's Health Research wrote me on November 28:

Barring all therapeutic cloning would more likely drive research underground and guarantee that only the most unscrupulous would advance these technologies.

The National Health Council said:

Making reproductive human cloning unlawful must be done in a way that does not deprive those suffering from debilitating chronic diseases, potential relief and possible cures.

The Alliance for Aging Research wrote on November 28,

Scientists who utilized therapeutic cloning techniques in the conduct of important scientific research would be labeled as criminals. The consequence would be that important research, research intended to save lives and reduce suffering of tens of millions Americans, would be stopped in its tracks.

The American College of Obstetricians and Gynecologists wrote on November 1, 2001:

Therapeutic cloning may hold the key for repairing or creating new tissues or organs that could alleviate myriad medical conditions: diabetes, heart disease, spinal cord injury and Parkinson's, to name just a few. This technology is key to the ability to create "customized tissues" using a patient's own DNA to avoid rejection problems, and at this time, appears promising.

Other bills would make it a crime to clone cells that are used for therapeutic purposes that some day will save lives and suffering. I cannot support that approach, to criminalize legitimate medical research that could some day treat diseases and save human lives. That would be very shortsighted.

In summary, I believe that the cloning of human beings is wrong and should be outlawed. I believe that therapeutic cloning holds great medical promise and should not be prohibited. This bill will make it a crime to create human beings, but protect important scientific research that can save human lives and relieve human suffering.

I urge my colleagues to support this bill.

Mr. President, I ask unanimous consent that a summary of the bill be printed in the RECORD.

There being no objection, the summary was ordered printed in the RECORD.

SUMMARY OF THE HUMAN CLONING PROHIBITION ACT OF 2001

Findings: Cites findings by the National Bioethics Advisory Commission and other respected bodies, which have recommended that Congress enact legislation prohibiting anyone from conducting or attempting human cloning but not unduly interfering with important areas of research, such as somatic cell nuclear transfer or nuclear transplantation.

Prohibitions: Makes it unlawful for any person: To conduct or attempt to conduct human cloning; to ship the product of nuclear transplantation in interstate or foreign commerce for the purpose of human cloning; or to use federal funds for these activities.

Definitions: "Human cloning" is asexual reproduction by implanting or attempting to implant the product of nuclear transplantation into a uterus.

"Nuclear transplantation" is transferring the nucleus of a human somatic (body) cell into an oocyte (egg) from which the nucleus or all chromosomes have been or will be removed or rendered inert.

Penalties: Makes violators liable for a criminal fine and/or up to 10 years in prison as well as a civil penalty of \$1,000,000 or three times the gross profits resulting from the violation, whichever is greater.

Protection of Medical Research: Clarifies that the bill does not restrict therapeutic cloning, stem cell research or other forms of biomedical research such as gene therapy.

Ethics Requirements: Applies to nuclear transplantation research the ethics requirements currently used by the National Institutes of Health. These include informed consent, an ethics board review, and protections for the safety and privacy of research participants. Imposes a \$250,000 civil penalty for violation of the ethics requirements.

AMENDMENTS SUBMITTED AND PROPOSED

SA 2214. Mr. KYL submitted an amendment intended to be proposed to amendment SA 2171 submitted by Mr. LOTT and intended to be proposed to the amendment SA 2170 proposed by Mr. DASCHLE to the bill (H.R. 10) to provide for pension reform, and for other

purposes; which was ordered to lie on the table.

SA 2215. Mr. DOMENICI submitted an amendment intended to be proposed by him to the bill H.R. 10, supra; which was ordered to lie on the table.

SA 2216. Mr. DOMENICI submitted an amendment intended to be proposed by him to the bill H.R. 10, supra; which was ordered to lie on the table.

SA 2217. Mr. DOMENICI submitted an amendment intended to be proposed by him to the bill H.R. 10, supra; which was ordered to lie on the table.

SA 2218. Mr. DOMENICI submitted an amendment intended to be proposed by him to the bill H.R. 10, supra; which was ordered to lie on the table.

SA 2219. Mrs. FEINSTEIN submitted an amendment intended to be proposed by her to the bill H.R. 10, supra; which was ordered to lie on the table.

SA 2220. Mr. GRAMM submitted an amendment intended to be proposed by him to the bill H.R. 10, supra; which was ordered to lie on the table.

SA 2221. Mr. GRAMM submitted an amendment intended to be proposed by him to the bill H.R. 10, supra; which was ordered to lie on the table.

SA 2222. Mr. GRAMM submitted an amendment intended to be proposed by him to the bill H.R. 10, supra; which was ordered to lie on the table.

SA 2223. Mr. GRAMM submitted an amendment intended to be proposed by him to the bill H.R. 10, supra; which was ordered to lie on the table.

SA 2224. Mr. GRAMM submitted an amendment intended to be proposed by him to the bill H.R. 10, supra; which was ordered to lie on the table.

SA 2225. Mr. GRAMM submitted an amendment intended to be proposed by him to the bill H.R. 10, supra; which was ordered to lie on the table.

SA 2226. Mr. GRAMM submitted an amendment intended to be proposed by him to the bill H.R. 10, supra; which was ordered to lie on the table.

SA 2227. Mr. GRAMM submitted an amendment intended to be proposed by him to the bill H.R. 10, supra; which was ordered to lie on the table.

SA 2228. Mr. GRAMM submitted an amendment intended to be proposed by him to the bill H.R. 10, supra; which was ordered to lie on the table.

SA 2229. Mr. GRAMM submitted an amendment intended to be proposed by him to the bill H.R. 10, supra; which was ordered to lie on the table.

SA 2230. Mr. GRAMM submitted an amendment intended to be proposed by him to the bill H.R. 10, supra; which was ordered to lie on the table.

SA 2231. Mr. GRAMM submitted an amendment intended to be proposed by him to the bill H.R. 10, supra; which was ordered to lie on the table.

SA 2232. Mr. SMITH, of New Hampshire submitted an amendment intended to be proposed to amendment SA 2171 submitted by Mr. LOTT and intended to be proposed to the amendment SA 2170 proposed by Mr. DASCHLE to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2233. Mr. VOINOVICH submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2234. Mr. CRAIG submitted an amendment intended to be proposed to amendment

SA 2171 submitted by Mr. LOTT and intended to be proposed to the amendment SA 2170 proposed by Mr. DASCHLE to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2235. Mr. CRAIG submitted an amendment intended to be proposed to amendment SA 2171 submitted by Mr. LOTT and intended to be proposed to the amendment SA 2170 proposed by Mr. DASCHLE to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2236. Mr. DOMENICI submitted an amendment intended to be proposed to amendment SA 2171 submitted by Mr. LOTT and intended to be proposed to the amendment SA 2170 proposed by Mr. DASCHLE to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2237. Mr. DOMENICI submitted an amendment intended to be proposed to amendment SA 2171 submitted by Mr. LOTT and intended to be proposed to the amendment SA 2170 proposed by Mr. DASCHLE to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2238. Mr. DOMENICI submitted an amendment intended to be proposed to amendment SA 2171 submitted by Mr. LOTT and intended to be proposed to the amendment SA 2170 proposed by Mr. DASCHLE to the bill (H.R. 10) supra; which was ordered to lie on the table.

SA 2239. Mr. DOMENICI submitted an amendment intended to be proposed to amendment SA 2171 submitted by Mr. LOTT and intended to be proposed to the amendment SA 2170 proposed by Mr. DASCHLE to the bill (H.R. 10) supra; which was ordered to lie on the table.

TEXT OF AMENDMENTS

SA 2214. Mr. KYL submitted an amendment intended to be proposed to amendment SA 2171 submitted by Mr. LOTT and intended to be proposed to the amendment SA 2170 proposed by Mr. DASCHLE to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

TITLE —ELECTRIC POWER INDUSTRY TAX MODERNIZATION

SEC. 101. TAX-EXEMPT BOND FINANCING OF CERTAIN ELECTRIC FACILITIES.

(a) RULES APPLICABLE TO ELECTRIC OUTPUT FACILITIES.—Subpart A of part IV of subchapter B of chapter 1 of the Internal Revenue Code of 1986 (relating to tax exemption requirements for State and local bonds) is amended by adding after section 141 the following new section:

“SEC. 141A. ELECTRIC OUTPUT FACILITIES.

“(a) ELECTION TO TERMINATE TAX-EXEMPT BOND FINANCING FOR CERTAIN ELECTRIC OUTPUT FACILITIES.—

“(1) IN GENERAL.—A governmental unit may make an irrevocable election under this paragraph to terminate the issuance of certain obligations described in section 103(a) for electric output facilities. If the governmental unit makes such election, then—

“(A) except as provided in paragraph (2), on or after the date of such election the governmental unit may not issue with respect to any electric output facility any bond the interest on which is excluded from gross income under section 103, and

“(B) notwithstanding paragraph (1) or (2) of section 141(a) or paragraph (4) or (5) of section 141(b), no bond—

“(i) which was issued by such unit with respect to an electric output facility before the date of enactment of this subsection, the interest on which was exempt from tax on such date,

“(ii) which is an eligible refunding bond that directly or indirectly refunds a bond issued prior to the date of enactment of this section, or

“(iii) which is described in paragraph (2)(D), (E), or (F),

shall be treated as a private activity bond.

“(2) EXCEPTIONS.—If an election is made under paragraph (1), paragraph (1)(A) does not apply to any of the following bonds:

“(A) Any qualified bond (as defined in section 141(e)).

“(B) Any eligible refunding bond (as defined in subsection (d)(6)).

“(C) Any bond issued to finance a qualifying transmission facility or a qualifying distribution facility owned by the governmental unit.

“(D) Any bond issued to finance equipment or facilities necessary to meet Federal or State environmental requirements applicable to an existing generation facility owned by the governmental unit.

“(E) Any bond issued to finance repair of any existing generation facility owned by the governmental unit. Repairs of facilities may not increase the generation capacity of the facility by more than 3 percent above the greater of its nameplate or rated capacity as of the date of enactment of this section.

“(F) Any bond issued to acquire or construct—

“(i) a qualified facility (as defined in section 45(c)(3)) if such facility is owned by the governmental unit and is placed in service during a period in which a qualified facility may be placed in service under such section, or

“(ii) any energy property (as defined in section 48(a)(3)) that is owned by the governmental unit.

This subparagraph shall not apply to any facility or property that is constructed, acquired or financed for the principal purpose of providing the facility (or the output thereof) to nongovernmental persons.

“(3) FORM AND EFFECT OF ELECTION.—

“(A) IN GENERAL.—An election under paragraph (1) shall be made in such a manner as the Secretary prescribes and shall be binding on any successor in interest to, or any related party with respect to, the electing governmental unit. For purposes of this paragraph, a governmental unit shall be treated as related to another governmental unit if it is a member of the same controlled group.

“(B) TREATMENT OF ELECTING GOVERNMENTAL UNIT.—A governmental unit which makes an election under paragraph (1) shall be treated for purposes of section 141 as a person which is not a governmental unit and which is engaged in a trade or business, with respect to its purchase of electricity generated by an electric output facility placed in service after such election, if such purchase is under a contract executed after such election.

“(4) DEFINITIONS.—For purposes of this subsection:

“(A) EXISTING GENERATION FACILITY.—The term ‘existing generation facility’ means an electric generation facility owned by the governmental unit on the date of enactment of this subsection and either in service on such date or the construction of which commenced prior to June 1, 2000.

“(B) QUALIFYING DISTRIBUTION FACILITY.—The term ‘qualifying distribution facility’ means a distribution facility over which

open access distribution services described in subsection (b)(2)(C) are available.

“(C) QUALIFYING TRANSMISSION FACILITY.—The term ‘qualifying transmission facility’ means a local transmission facility (as described in subsection (c)(3)(A)) over which open access transmission services described in subparagraph (A) or (B) of subsection (b)(2) are available.

“(b) PERMITTED OPEN ACCESS ACTIVITIES AND SALES TRANSACTIONS NOT A PRIVATE BUSINESS USE FOR BONDS THAT REMAIN SUBJECT TO PRIVATE USE RULES.—

“(1) GENERAL RULE.—For purposes of this section and section 141, the term ‘private business use’ shall not include a permitted open access activity or a permitted sales transaction.

“(2) PERMITTED OPEN ACCESS ACTIVITIES.—For purposes of this section, the term ‘permitted open access activity’ means any of the following transactions or activities with respect to an electric output facility owned by a governmental unit:

“(A) Providing nondiscriminatory open access transmission service and ancillary services—

“(i) pursuant to an open access transmission tariff filed with and approved by FERC, including an acceptable reciprocity tariff but, in the case of a voluntarily filed tariff, only if the governmental unit voluntarily files a report with the FERC within 90 days of the date of enactment of this section relating to whether or not the issuer will join a regional transmission organization,

“(ii) under an independent system operator or regional transmission organization agreement approved by FERC, or

“(iii) in the case of an ERCOT utility (as defined in section 212(k)(2)(B) of the Federal Power Act (16 U.S.C. 824k(k)(2)(B))), pursuant to a tariff approved by the Public Utility Commission of Texas.

“(B) Participation in—

“(i) an independent system operator agreement, or

“(ii) a regional transmission organization agreement,

which has been approved by FERC, or by the Public Utility Commission of Texas in the case of an ERCOT utility (as so defined). Such participation may include transfer of control of transmission facilities to an organization described in clause (i) or (ii).

“(C) Delivery on a nondiscriminatory open access basis of electric energy sold to end-users served by distribution facilities owned by such governmental unit.

“(D) Delivery on a nondiscriminatory open access basis of electric energy generated by generation facilities connected to distribution facilities owned by such governmental unit.

“(3) PERMITTED SALES TRANSACTION.—For purposes of this subsection, the term ‘permitted sales transaction’ means any of the following sales of electric energy from existing generation facilities (as defined in subsection (a)(4)(A)):

“(A) The sale of electricity to an on-system purchaser, if the seller makes available open access distribution service under paragraph (2)(C) and, in the case of a seller that owns or operates transmission facilities, if such seller makes available open access transmission under subparagraph (A) or (B) of paragraph (2).

“(B) The sale of electricity to a wholesale native load purchaser or in a wholesale stranded cost mitigation sale—

“(i) if the seller makes available open access transmission service described in subparagraph (A) or (B) of paragraph (2), or

“(ii) if the seller owns or operates no transmission facilities and transmission providers to the seller’s wholesale native load purchasers make available open access transmission service described in subparagraph (A) or (B) of paragraph (2).

“(4) DEFINITIONS AND SPECIAL RULES.—For purposes of this subsection:

“(A) ON-SYSTEM PURCHASER.—The term ‘on-system purchaser’ means a person whose electric facilities or equipment are directly connected with transmission or distribution facilities which are owned by such governmental unit, and such person—

“(i) purchases electric energy from such governmental unit at retail and either was within such unit’s distribution area in the base year or is a person as to whom the governmental unit has a service obligation, or

“(ii) is a wholesale native load purchaser from such governmental unit.

“(B) WHOLESALE NATIVE LOAD PURCHASER.—The term ‘wholesale native load purchaser’ means a wholesale purchaser as to whom the governmental unit had—

“(i) a service obligation at wholesale in the base year, or

“(ii) an obligation in the base year under a requirements contract, or under a firm sales contract that has been in effect for (or has an initial term of) at least 10 years,

but only to the extent that in either case such purchaser resells the electricity (I) directly at retail to persons within the purchaser’s distribution area or (II) indirectly through one or more intermediate wholesale purchasers (each of whom as of June 30, 2000, was a party to a requirements contract or a firm power contract described in clause (ii)) to retail purchasers in the ultimate wholesale purchaser’s distribution area.

“(C) WHOLESALE STRANDED COST MITIGATION SALE.—The term ‘wholesale stranded cost mitigation sale’ means one or more wholesale sales made in accordance with the following requirements:

“(i) A governmental unit’s allowable sales under this subparagraph during the recovery period may not exceed the sum of its annual load losses for each year of the recovery period.

“(ii) The governmental unit’s annual load loss for each year of the recovery period is the amount (if any) by which—

“(I) sales in the base year to wholesale native load purchasers which do not constitute a private business use, exceed

“(II) sales during that year of the recovery period to wholesale native load purchasers which do not constitute a private business use.

“(iii) If actual sales under this subparagraph during the recovery period are less than allowable sales under clause (i), the amount not sold (but not more than 10 percent of the aggregate allowable sales under clause (i)) may be carried over and sold as wholesale stranded cost mitigation sales in the calendar year following the recovery period.

“(D) RECOVERY PERIOD.—The recovery period is the 7-year period beginning with the start-up year.

“(E) START-UP YEAR.—The start-up year is whichever of the following calendar years the governmental unit elects:

“(i) The year the governmental unit first offers open transmission access.

“(ii) The first year in which at least 10 percent of the governmental unit’s wholesale customers’ aggregate retail native load is open to retail competition.

“(iii) The calendar year which includes the date of the enactment of this section, if later than the year described in clause (i) or (ii).

“(F) PERMITTED SALES TRANSACTIONS UNDER EXISTING CONTRACTS.—A sale to a wholesale native load purchaser (other than a person to whom the governmental unit had a service obligation) under a contract which resulted in private business use in the base year shall be treated as a permitted sales transaction only to the extent that sales under the contract exceed the lesser of—

“(i) in any year the private business use that resulted from the contract during the base year, or

“(ii) the maximum amount of private business use which could occur (absent the enactment of this section) without causing the bonds to be private activity bonds.

This subparagraph shall only apply to the extent that the sale is allocable to bonds issued prior to the date of enactment of this section (or bonds issued to refund such bonds).

“(G) TIME OF SALE RULE.—For purposes of paragraphs (C)(ii) and (F), private business use shall be determined under the law in effect in the year of the sale.

“(H) JOINT ACTION AGENCIES.—A joint action agency, or a member of (or a wholesale native load purchaser from) a joint action agency, which is entitled to make a sale described in subparagraph (A) or (B) in a year, may transfer the entitlement to make that sale to the member (or purchaser), or the joint action agency, respectively.

“(c) CERTAIN BONDS FOR TRANSMISSION AND DISTRIBUTION FACILITIES NOT TAX EXEMPT.—

“(1) GENERAL RULE.—For purposes of this title, no bond the interest on which is exempt from taxation under section 103 may be issued on or after the date of enactment of this subsection if any of the proceeds of such issue are used to finance—

“(A) any transmission facility which is not a local transmission facility, or

“(B) a start-up utility distribution facility.

“(2) EXCEPTIONS.—Paragraph (1) shall not apply to—

“(A) any qualified bond (as defined in section 141(e)),

“(B) any eligible refunding bond (as defined in subsection (d)(6)), or

“(C) any bond issued to finance—

“(i) any repair of a transmission facility in service on the date of the enactment of this section, so long as the repair does not increase the voltage level over its level in the base year or increase the thermal load limit of the transmission facility by more than 3 percent over such limit in the base year,

“(ii) any qualifying upgrade of a transmission facility in service on the date of the enactment of this section, or

“(iii) a transmission facility necessary to comply with an obligation under a shared or reciprocal transmission agreement in effect on the date of enactment of this section.

“(3) LOCAL TRANSMISSION FACILITY DEFINITIONS.—For purposes of this subsection—

“(A) LOCAL TRANSMISSION FACILITY.—The term ‘local transmission facility’ means a transmission facility which is located within the governmental unit’s distribution area or which is, or will be, necessary to supply electricity to serve retail native load or wholesale native load of 1 or more governmental units. For purposes of this subparagraph, the distribution area of a public power authority which was created in 1931 by a State statute and which, as of January 1, 1999, owned at least one-third of the transmission circuit miles rated at 230 kV or higher in the State,

shall be determined under regulations of the Secretary.

“(B) RETAIL NATIVE LOAD.—The term ‘retail native load’ with respect to a governmental unit (or an entity other than a governmental unit that operates an electric utility) is the electric load of end-users in the distribution area of the governmental unit or entity.

“(C) WHOLESALE NATIVE LOAD.—The term ‘wholesale native load’ is—

“(i) the retail native load of such unit’s wholesale native load purchasers (or of an ultimate wholesale purchaser described in subsection (b)(4)(B)(ii)), and

“(ii) the electric load of purchasers (not described in clause (i)) under wholesale requirements contracts which—

“(I) do not constitute private business use under the rules in effect absent this subsection, and

“(II) were in effect in the base year.

“(D) NECESSARY TO SERVE LOAD.—For purposes of determining whether a transmission or distribution facility is, or will be, necessary to supply electricity to retail native load or wholesale native load—

“(i) the governmental unit’s available transmission rights shall be taken into account,

“(ii) electric reliability standards or requirements of national or regional reliability organizations, regional transmission organizations and the Electric Reliability Council of Texas shall be taken into account, and

“(iii) transmission, siting and construction decisions of regional transmission organizations or independent system operators and State and Federal regulatory and siting agencies, after a proceeding that provides for public input, shall be presumptive evidence regarding whether transmission facilities are necessary to serve native load.

“(E) QUALIFYING UPGRADE.—The term ‘qualifying upgrade’ means an improvement or addition to transmission facilities of the governmental unit in service on the date of enactment of this section which is ordered or approved by a regional transmission organization, by an independent system operator, or by a State regulatory or siting agency, after a proceeding that provides for public input.

“(4) START-UP UTILITY DISTRIBUTION FACILITY DEFINED.—For purposes of this subsection, the term ‘start-up utility distribution facility’ means any distribution facility to provide electric service to the public that is placed in service—

“(A) by a governmental unit that did not operate an electric utility on the date of the enactment of this section, and

“(B) during the first ten years after the date such governmental unit begins operating an electric utility.

A governmental unit is treated as having operated an electric utility on the date of the enactment of this section if it operates electric output facilities which were operated by another governmental unit to provide electric service to the public on such date.

“(d) DEFINITIONS; SPECIAL RULES.—For purposes of this section—

“(1) BASE YEAR.—The term ‘base year’ means the calendar year which includes the date of the enactment of this section or, at the election of the governmental unit, either of the 2 immediately preceding calendar years.

“(2) DISTRIBUTION AREA.—The term ‘distribution area’ means the area in which a governmental unit (or an entity other than a

governmental unit that operates an electric utility) owns distribution facilities.

“(3) ELECTRIC OUTPUT FACILITY.—The term ‘electric output facility’ means an output facility that is an electric generation, transmission, or distribution facility.

“(4) DISTRIBUTION FACILITY.—The term ‘distribution facility’ means an electric output facility that is not a generation or transmission facility.

“(5) TRANSMISSION FACILITY.—The term ‘transmission facility’ means an electric output facility (other than a generation facility) that operates at an electric voltage of 69 kV or greater, except that the owner of the facility may elect to treat any output facility that the FERC determines is a transmission facility under standards applied by FERC under the Federal Power Act as a transmission facility for purposes of this section.

“(6) ELIGIBLE REFUNDING BOND.—The term ‘eligible refunding bond’ means any State or local bond issued after an election described in subsection (a) that directly or indirectly refunds any bond described in section 103(a) (other than a qualified bond) issued before such election, if the weighted average maturity of the issue of which the refunding bond is a part does not exceed the remaining weighted average maturity of the bonds issued before the election. In applying such term for purposes of subsection (c)(2)(B), the date of election shall be deemed to be the date of the enactment of this section.

“(7) FERC.—The term ‘FERC’ means the Federal Energy Regulatory Commission.

“(8) GOVERNMENT-OWNED FACILITY.—An electric output facility shall be treated as ‘owned by a governmental unit’ if it is an electric output facility that either is—

“(A) owned or leased by such governmental unit, or

“(B) a transmission facility in which the governmental unit acquired before the base year long-term firm capacity for the purposes of serving customers to which the unit had at that time either—

“(i) a service obligation, or

“(ii) an obligation under a requirements contract.

“(9) REPAIR.—The term ‘repair’ shall include replacement of components of an electric output facility, but shall not include replacement of the facility either at one time or incrementally.

“(10) SERVICE OBLIGATION.—The term ‘service obligation’ means an obligation under State or Federal law (exclusive of an obligation arising solely under a contract entered into with a person) to provide electric distribution services or electric sales service, as provided in such law.

“(11) CONTRACT MODIFICATIONS.—A contract is treated as a new contract if it is substantially modified.

“(e) SAVINGS CLAUSE.—Subsection (b) does not affect the applicability of section 141 to (or the Secretary’s authority to prescribe, amend or rescind regulations respecting) (1) any transaction that is not a permitted open access transaction or permitted sales transaction, or (2) any facilities other than electric output facilities.”.

(b) REPEAL OF EXCEPTION FOR CERTAIN NON-GOVERNMENTAL ELECTRIC OUTPUT FACILITIES.—Section 141(d)(5) of the Internal Revenue Code of 1986 is amended by inserting “(except in the case of an electric output facility that is a distribution facility),” after “this subsection”.

(c) CONFORMING AMENDMENT.—The table of sections for subpart A of part IV of subchapter B of chapter 1 of the Internal Rev-

enue Code of 1986 is amended by inserting after the item relating to section 141 the following new item:

“Sec. 141A. Electric output facilities.”

(d) EFFECTIVE DATE; APPLICABILITY.—

(1) EFFECTIVE DATE.—The amendments made by this section take effect on the date of enactment of this Act, except that a governmental unit may elect to apply paragraphs (1) and (2) of section 141A(b), as added by subsection (a), with respect to permitted open access activities entered into on or after April 14, 1996.

(2) CERTAIN EXISTING AGREEMENTS.—The amendment made by subsection (b) (relating to repeal of the exception for certain non-governmental output facilities) does not apply to any acquisition of facilities made pursuant to an agreement that was entered into before the date of the enactment of this Act.

(3) APPLICABILITY.—References in this Act to sections of the Internal Revenue Code of 1986, shall be deemed to include references to comparable sections of the Internal Revenue Code of 1954.

SEC. 02. INDEPENDENT TRANSMISSION COMPANIES.

(a) SALES OR DISPOSITIONS TO IMPLEMENT FEDERAL ENERGY REGULATORY COMMISSION OR STATE ELECTRIC RESTRUCTURING POLICY.—

(1) IN GENERAL.—Section 1033 of the Internal Revenue Code of 1986 (relating to involuntary conversions) is amended by redesignating subsection (k) as subsection (l), and by inserting after subsection (j) the following new subsection:

“(k) SALES OR DISPOSITIONS TO IMPLEMENT FEDERAL ENERGY REGULATORY COMMISSION OR STATE ELECTRIC RESTRUCTURING POLICY.—

“(1) IN GENERAL.—For purposes of this subtitle, if a taxpayer elects the application of this subsection to a qualifying electric transmission transaction and the proceeds received from such transaction are invested in exempt utility property, such transaction shall be treated as an involuntary conversion to which this section applies. The part of the gain, if any, on a sale or exchange to which section 1033 is not applied by reason of section 1245 shall nevertheless not be recognized, if the taxpayer so elects, to the extent that it is applied to reduce the basis for determining gain or loss on sale or exchange of property, of a character subject to the allowance for depreciation under section 167, remaining in the hands of the taxpayer immediately after the sale or exchange, or acquired in the same taxable year. The manner and amount of such reduction shall be determined under regulations prescribed by the Secretary. Any election made by the taxpayer under this section shall be made by a statement to that effect in his return for the taxable year in which the sale or exchange takes place, and such election shall be binding for the taxable year and all subsequent taxable years.

“(2) EXTENSION OF REPLACEMENT PERIOD.—In the case of any involuntary conversion described in paragraph (1), subsection (a)(2)(B) shall be applied by substituting ‘4 years’ for ‘2 years’ in clause (i) thereof.

“(3) QUALIFYING ELECTRIC TRANSMISSION TRANSACTION.—For purposes of this subsection, the term ‘qualifying electric transmission transaction’ means any sale or other disposition of property used in the trade or business of electric transmission, or an ownership interest in a person whose primary trade or business consists of providing electric transmission services, to another person that is an independent transmission company.

“(4) INDEPENDENT TRANSMISSION COMPANY.—For purposes of this subsection, the term ‘independent transmission company’ means—

“(A) a regional transmission organization approved by the Federal Energy Regulatory Commission,

“(B) a person—

“(i) who the Federal Energy Regulatory Commission determines in its authorization of the transaction under section 203 of the Federal Power Act (16 U.S.C. 823b) is not a market participant within the meaning of such Commission’s rules applicable to regional transmission organizations, and

“(ii) whose transmission facilities to which the election under this subsection applies are placed under the operational control of a Federal Energy Regulatory Commission-approved regional transmission organization within the period specified in such order, but not later than the close of the replacement period, or

“(C) in the case of facilities subject to the exclusive jurisdiction of the Public Utility Commission of Texas, a person which is approved by that Commission as consistent with Texas State law regarding an independent transmission organization.

“(5) EXEMPT UTILITY PROPERTY.—For purposes of this subsection, the term ‘exempt utility property’ means—

“(A) property used in the trade or business of generating, transmitting, distributing, or selling electricity or producing, transmitting, distributing, or selling natural gas, or

“(B) stock acquired in the acquisition of control of a corporation whose primary trade or business consists of generating, transmitting, distributing, or selling electricity or producing, transmitting, distributing, or selling natural gas.

“(6) SPECIAL RULES FOR CONSOLIDATED GROUPS.—

“(A) INVESTMENT BY QUALIFYING GROUP MEMBERS.—

“(i) IN GENERAL.—This subsection shall apply to a qualifying electric transmission transaction engaged in by a taxpayer if the proceeds are invested in exempt utility property by a qualifying group member.

“(ii) QUALIFYING GROUP MEMBER.—For purposes of this subparagraph, the term ‘qualifying group member’ means any member of a consolidated group within the meaning of section 1502 and the regulations promulgated thereunder of which the taxpayer is also a member.

“(B) COORDINATION WITH CONSOLIDATED RETURN PROVISIONS.—A sale or other disposition of electric transmission property or an ownership interest in a qualifying electric transmission transaction, where an election is made under this subsection, shall not result in the recognition of income or gain under the consolidated return provisions of subchapter A of chapter 6. The Secretary shall prescribe such regulations as may be necessary to provide for the treatment of any exempt utility property received in a qualifying electric transmission transaction as successor assets subject to the application of such consolidated return provisions.

“(7) ELECTION.—Any election made by a taxpayer under this subsection shall be made by a statement to that effect in the return for the taxable year in which the qualifying electric transmission transaction takes place in such form and manner as the Secretary shall prescribe, and such election shall be binding for that taxable year and all subsequent taxable years.”

(2) SAVINGS CLAUSE.—Nothing in section 1033(k) of the Internal Revenue Code of 1986,

as added by subsection (a), shall affect Federal or State regulatory policy respecting the extent to which any acquisition premium paid in connection with the purchase of an asset in a qualifying electric transmission transaction can be recovered in rates.

(3) EFFECTIVE DATE.—The amendments made by this subsection shall apply to transactions occurring after the date of the enactment of this Act.

(b) DISTRIBUTIONS OF STOCK TO IMPLEMENT FEDERAL ENERGY REGULATORY COMMISSION OR STATE ELECTRIC RESTRUCTURING POLICY.—

(1) IN GENERAL.—Section 355(e)(4) of the Internal Revenue Code of 1986 is amended by redesignating subparagraphs (C), (D), and (E) as subparagraphs (D), (E), and (F), respectively, and by inserting after subparagraph (B) the following new subparagraph:

“(C) DISTRIBUTIONS OF STOCK TO IMPLEMENT FEDERAL ENERGY REGULATORY COMMISSION OR STATE ELECTRIC RESTRUCTURING POLICY.—

“(i) IN GENERAL.—Paragraph (1) shall not apply to any distribution that is a qualifying electric transmission transaction. For purposes of this subparagraph, a ‘qualifying electric transmission transaction’ means any distribution of stock in a corporation whose primary trade or business consists of providing electric transmission services, where such stock is later acquired (or where the assets of such corporation are later acquired) by another person that is an independent transmission company.

“(ii) INDEPENDENT TRANSMISSION COMPANY.—For purposes of this subsection, the term ‘independent transmission company’ means—

“(I) a regional transmission organization approved by the Federal Energy Regulatory Commission,

“(II) a person who the Federal Energy Regulatory Commission determines in its authorization of the transaction under section 203 of the Federal Power Act (16 U.S.C. 824b) is not a market participant within the meaning of such Commission’s rules applicable to regional transmission organizations, and whose transmission facilities transferred as a part of such qualifying electric transmission transaction are placed under the operational control of a Federal Energy Regulatory Commission-approved regional transmission organization within the period specified in such order, but not later than the close of the replacement period (as defined in section 1033(k)(2)), or

“(III) in the case of facilities subject to the exclusive jurisdiction of the Public Utility Commission of Texas, a person that is approved by that Commission as consistent with Texas State law regarding an independent transmission organization.”

(2) EFFECTIVE DATE.—The amendments made by this subsection shall apply to distributions occurring after the date of the enactment of this Act.

SEC. 403. CERTAIN AMOUNTS RECEIVED BY ELECTRIC UTILITIES EXCLUDED FROM GROSS INCOME AS CONTRIBUTIONS TO CAPITAL.

(a) IN GENERAL.—Subsection (c) of section 118 of the Internal Revenue Code of 1986 (relating to contributions to the capital of a corporation) is amended—

(1) by striking “WATER AND SEWAGE DISPOSAL” in the heading, and inserting “CERTAIN”,

(2) by striking “water or,” in the matter preceding subparagraph (A) of paragraph (1) and inserting “electric energy, water, or”,

(3) by striking “water or” in paragraph (1)(B) and inserting “electric energy (but not including assets used in the generation of electricity), water, or”,

(4) by striking “water or” in paragraph (2)(A)(ii) and inserting “electric energy (but not including assets used in the generation of electricity), water, or”,

(5) by inserting “such term shall include amounts paid as customer connection fees (including amounts paid to connect the customer’s line to an electric line or a main water or sewer line) and” after “except that” in paragraph (3)(A), and

(6) by striking “water or” in paragraph (3)(C) and inserting “electric energy, water, or”.

(b) EFFECTIVE DATE.—The amendments made by this section shall apply to amounts received after the date of the enactment of this Act.

SEC. 404. TAX TREATMENT OF NUCLEAR DECOMMISSIONING FUNDS.

(a) INCREASE IN AMOUNT PERMITTED TO BE PAID INTO NUCLEAR DECOMMISSIONING RESERVE FUND.—Subsection (b) of section 468A of the Internal Revenue Code of 1986 (relating to special rules for nuclear decommissioning costs) is amended to read as follows:

“(b) LIMITATION ON AMOUNTS PAID INTO FUND.—

“(1) IN GENERAL.—The amount which a taxpayer may pay into the Fund for any taxable year during the funding period shall not exceed the level funding amount determined pursuant to subsection (d), except—

“(A) where the taxpayer is permitted by Federal or State law or regulation (including authorization by a public service commission) to charge customers a greater amount for nuclear decommissioning costs, in which case the taxpayer may pay into the Fund such greater amount, or

“(B) in connection with the transfer of a nuclear powerplant, where the transferor or transferee (or both) is required pursuant to the terms of the transfer to contribute a greater amount for nuclear decommissioning costs, in which case the transferor or transferee (or both) may pay into the Fund such greater amount.

“(2) CONTRIBUTIONS AFTER FUNDING PERIOD.—Notwithstanding any other provision of this section, a taxpayer may make deductible payments to the Fund in any taxable year between the end of the funding period and the termination of the license issued by the Nuclear Regulatory Commission for the nuclear powerplant to which the Fund relates provided such payments do not cause the assets of the Fund to exceed the nuclear decommissioning costs allocable to the taxpayer’s current or former interest in the nuclear powerplant to which the Fund relates. The foregoing limitation shall be applied by taking into account a reasonable rate of inflation for the nuclear decommissioning costs and a reasonable after-tax rate of return on the assets of the Fund until such assets are anticipated to be expended.”

(b) DEDUCTION FOR NUCLEAR DECOMMISSIONING COSTS WHEN PAID.—Paragraph (2) of section 468A(c) of the Internal Revenue Code of 1986 (relating to income and deductions of the taxpayer) is amended to read as follows:

“(2) DEDUCTION OF NUCLEAR DECOMMISSIONING COSTS.—In addition to any deduction under subsection (a), nuclear decommissioning costs paid or incurred by the taxpayer during any taxable year shall constitute ordinary and necessary expenses in carrying on a trade or business under section 162.”

(c) LEVEL FUNDING AMOUNTS.—Subsection (d) of section 468A of the Internal Revenue Code of 1986 is amended to read as follows:

“(d) LEVEL FUNDING AMOUNTS.—

“(1) ANNUAL AMOUNTS.—For purposes of this section, the level funding amount for

any taxable year shall equal the annual amount required to be contributed to the Fund in each year remaining in the funding period in order for the Fund to accumulate the nuclear decommissioning costs allocable to the taxpayer's current or former interest in the nuclear powerplant to which the Fund relates. The annual amount described in the foregoing sentence shall be calculated by taking into account a reasonable rate of inflation for the nuclear decommissioning costs and a reasonable after-tax rate of return on the assets of the Fund until such assets are anticipated to be expended.

“(2) FUNDING PERIOD.—The funding period for a Fund shall end on the last day of the last taxable year of the expected operating life of the nuclear powerplant.

“(3) NUCLEAR DECOMMISSIONING COSTS.—For purposes of this section—

“(A) IN GENERAL.—The term ‘nuclear decommissioning costs’ means all costs to be incurred in connection with entombing, decontaminating, dismantling, removing, and disposing of a nuclear powerplant, and shall include all associated preparation, security, fuel storage, and radiation monitoring costs. Such term shall include all such costs which, outside of the decommissioning context, might otherwise be capital expenditures.

“(B) IDENTIFICATION OF COSTS.—The taxpayer may identify nuclear decommissioning costs by reference either to a site-specific engineering study or to the financial assurance amount calculated pursuant to section 50.75 of title 10 of the Code of Federal Regulations.”.

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to amounts paid after June 30, 2000, in taxable years ending after such date.

SA 2215. Mr. DOMENICI submitted an amendment intended to be proposed by him to the bill H.R. 10, to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place insert the following:

SEC. .EFFECTIVE DATE.

Notwithstanding any other provision of this Act, this Act and the amendments made by this Act shall take effect on October 1, 2004.

SA 2216. Mr. DOMENICI submitted an amendment intended to be proposed by him to the bill H.R. 10, to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

In lieu of the matter proposed to be inserted, insert the following:

SEC. .EFFECTIVE DATE.

Notwithstanding any other provision of this Act, this Act and the amendments made by this Act shall take effect on October 1, 2004.

SA 2217. Mr. DOMENICI submitted an amendment intended to be proposed by him to the bill H.R. 10, to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. .EFFECTIVE DATE.

Notwithstanding any other provision of this Act, this Act and the amendments made

by this Act shall take effect on October 1, 2003.

SA 2218. Mr. DOMENICI submitted an amendment intended to be proposed by him to the bill H.R. 10, to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

In lieu of the matter proposed to be inserted, insert the following:

SEC. .EFFECTIVE DATE.

Notwithstanding any other provision of this Act, this Act and the amendments made by this Act shall take effect on October 1, 2003.

SA 2219. Mrs. FEINSTEIN submitted an amendment intended to be proposed by her to the bill H.R. 10, to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

Beginning on page ____ of the amendment, strike line ____ and all that follows through line ____ on page ____, and insert the following:

TITLE ____—HUMAN CLONING PROHIBITION

SEC. ____01. SHORT TITLE.

This title may be cited as the “Human Cloning Prohibition Act of 2001”.

SEC. ____02. FINDINGS.

Congress finds that—

(1) the National Bioethics Advisory Commission (referred to in this title as the “NBAC”) has reviewed the scientific and ethical implications of human cloning and has determined that the cloning of human beings is morally unacceptable;

(2) the NBAC recommended that Federal legislation be enacted to prohibit anyone from conducting or attempting human cloning, whether using Federal or non-Federal funds;

(3) the NBAC also recommended that the United States cooperate with other countries to enforce mutually supported prohibitions on human cloning;

(4) the NBAC found that somatic cell nuclear transfer (also known as nuclear transplantation) may have many important applications in medical research;

(5) the Institute of Medicine has found that nuclear transplantation may enable stem cells to be developed in a manner that will permit such cells to be transplanted into a patient without being rejected;

(6) the NBAC concluded that any regulatory or legislative actions undertaken to prohibit human cloning should be carefully written so as not to interfere with other important areas of research, such as stem cell research; and

(7)(A) biomedical research and clinical facilities engage in and affect interstate commerce;

(B) the services provided by clinical facilities move in interstate commerce;

(C) patients travel regularly across State lines in order to access clinical facilities; and

(D) biomedical research and clinical facilities engage scientists, doctors, and other staff in an interstate market, and contract for research and purchase medical and other supplies in an interstate market.

SEC. ____03. PURPOSES.

It is the purpose of this title to prohibit any attempt to clone a human being while protecting important areas of medical research, including stem cell research.

SEC. ____04. PROHIBITION ON HUMAN CLONING.

(a) IN GENERAL.—Title 18, United States Code, is amended by inserting after chapter 15, the following:

“CHAPTER 16—PROHIBITION ON HUMAN CLONING

“Sec.

“301. Prohibition on human cloning.

“§ 301. Prohibition on human cloning

“(a) DEFINITIONS.—In this section:

“(1) HUMAN CLONING.—The term ‘human cloning’ means asexual reproduction by implanting or attempting to implant the product of nuclear transplantation into a uterus.

“(2) HUMAN SOMATIC CELL.—The term ‘human somatic cell’ means a mature, diploid cell that is obtained or derived from a living or deceased human being at any stage of development.

“(3) NUCLEAR TRANSPLANTATION.—The term ‘nuclear transplantation’ means transferring the nucleus of a human somatic cell into an oocyte from which the nucleus or all chromosomes have been or will be removed or rendered inert.

“(4) NUCLEUS.—The term ‘nucleus’ means the cell structure that houses the chromosomes, and thus the genes.

“(5) OOCYTE.—The term ‘oocyte’ means the female germ cell, the egg.

“(b) PROHIBITIONS ON HUMAN CLONING.—It shall be unlawful for any person or other legal entity, public or private—

“(1) to conduct or attempt to conduct human cloning;

“(2) to ship the product of nuclear transplantation in interstate or foreign commerce for the purpose of human cloning in the United States or elsewhere; or

“(3) to use funds made available under any provision of Federal law for an activity prohibited under paragraph (1) or (2).

“(c) PROTECTION OF MEDICAL RESEARCH.—Nothing in this section shall be construed to restrict areas of biomedical and agricultural research or practices not expressly prohibited in this section, including research or practices that involve the use of—

“(1) nuclear transplantation to produce human stem cells;

“(2) techniques to create exact duplicates of molecules, DNA, cells, and tissues;

“(3) mitochondrial, cytoplasmic or gene therapy; or

“(4) nuclear transplantation techniques to create nonhuman animals.

“(d) PENALTIES.—

“(1) IN GENERAL.—Whoever intentionally violates any provision of subsection (b) shall be fined under this title and imprisoned not more than 10 years.

“(2) CIVIL PENALTIES.—Whoever intentionally violates paragraph (1), (2), or (3) of subsection (b) shall be subject to a civil penalty of \$1,000,000 or three times the gross pecuniary gain resulting from the violation, whichever is greater.

“(3) CIVIL ACTIONS.—If a person is violating or about to violate the provisions of subsection (b), the Attorney General may commence a civil action in an appropriate Federal district court to enjoin such violation.

“(4) FORFEITURE.—Any property, real or personal, derived from or used to commit a violation or attempted violation of the provisions of subsection (b), or any property traceable to such property, shall be subject to forfeiture to the United States in accordance with the procedures set forth in chapter 46 of title 18, United States Code.

“(5) ADVISORY OPINIONS.—The Attorney General shall, upon request, render binding advisory opinions regarding the scope, applicability, interpretation, and enforcement of

this section with regard to specific research projects or practices.

“(e) COOPERATION WITH FOREIGN COUNTRIES.—It is the sense of Congress that the President should cooperate with foreign countries to enforce mutually supported restrictions on the activities prohibited under subsection (b).

“(f) RIGHT OF ACTION.—Nothing in this section shall be construed to give any individual or person a private right of action.

“(g) PREEMPTION OF STATE LAW.—The provisions of this section shall preempt any State or local law that prohibits or restricts research regarding, or practices constituting, nuclear transplantation, mitochondrial or cytoplasmic therapy, or the cloning of molecules, DNA, cells, tissues, organs, plants, animals, or humans.”.

(b) ETHICAL REQUIREMENTS FOR NUCLEAR TRANSPLANTATION RESEARCH.—Part H of title IV of the Public Health Service Act (42 U.S.C. 289 et seq.) is amended by adding at the end the following:

“SEC. 498C. ETHICAL REQUIREMENTS FOR NUCLEAR TRANSPLANTATION RESEARCH.

“(a) DEFINITIONS.—In this section:

“(1) HUMAN SOMATIC CELL.—The term ‘human somatic cell’ means a mature, diploid cell that is obtained or derived from a living or deceased human being at any stage of development.

“(2) NUCLEAR TRANSPLANTATION.—The term ‘nuclear transplantation’ means transferring the nucleus of a human somatic cell into an oocyte from which the nucleus or all chromosomes have been or will be removed or rendered inert.

“(3) NUCLEUS.—The term ‘nucleus’ means the cell structure that houses the chromosomes, and thus the genes.

“(4) OOCYTE.—The term ‘oocyte’ means the female germ cell, the egg.

“(b) APPLICABILITY OF FEDERAL ETHICAL STANDARDS TO NUCLEAR TRANSPLANTATION RESEARCH.—Research involving nuclear transplantation shall be conducted in accordance with the applicable provisions of part 46 of title 45, Code of Federal Regulations (as in effect on the date of enactment of the Human Cloning Prohibition Act of 2001).

“(c) CIVIL PENALTIES.—Whoever intentionally violates subsection (b) shall be subject to a civil penalty of not more than \$250,000.

“(d) ENFORCEMENT.—The Secretary of Health and Human Services shall have the exclusive authority to enforce this section.”.

SA 2220. Mr. GRAMM submitted an amendment intended to be proposed by him to the bill H.R. 10, to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the end of the amendment, insert the following:

“SEC. . Notwithstanding any other provision of this Act, the \$15,000,000,000 transfer authorized under section 107(a) shall not take effect unless the Secretary of the Treasury finds that no portion of the transferred funds are attributable to the surplus in Social Security.”.

SA 2221. Mr. GRAMM submitted an amendment intended to be proposed by him to the bill H.R. 10, to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the end of the amendment, insert the following:

“SEC. . Notwithstanding any other provision of this Act, the \$15,000,000,000 transfer authorized under section 107(a) shall not take effect unless the Secretary of the Treasury finds that no portion of the transferred funds are attributable to the surplus in Social Security or in Medicare.”.

SA 2222. Mr. GRAMM submitted an amendment intended to be proposed by him to the bill H.R. 10, to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the end of the amendment, insert the following:

“SEC. . Notwithstanding any other provision of this Act, the reduction in the retirement age authorized by section 102 shall not take effect until the Secretary of the Treasury finds that there has been a comparable reduction in the Social Security retirement age.”.

SA 2223. Mr. GRAMM submitted an amendment intended to be proposed by him to the bill H.R. 10, to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the end of the amendment, insert the following:

“SEC. . Notwithstanding any other provision of Act, the Board of Trustees created under section 105 shall invest the funds of the Trust only in a manner that maximizes return on investment, consistent with prudent risk management. Any railroad employee, retiree, survivor, or company may bring a civil action to enforce this section.”.

SA 2224. Mr. GRAMM submitted an amendment intended to be proposed by him to the bill H.R. 10, to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the end of the amendment, insert the following:

“SEC. . Notwithstanding any other provision of Act, in the table in Section 3241(b) of the Internal Revenue Code of 1986 (as added by this Act) strike 22.1 and insert ‘such percentage as the Secretary determines necessary to restore the average account benefit ratio to 2.5.’.”.

SA 2225. Mr. GRAMM submitted an amendment intended to be proposed by him to the bill H.R. 10, to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the end of the amendment, insert the following:

“SEC. . Notwithstanding any other provision of this Act, the Secretary of the Treasury shall not make the transfers authorized under Sec. 107(c)(1).”.

SA 2226. Mr. GRAMM submitted an amendment intended to be proposed by him to the bill H.R. 10, to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the end of the amendment, insert the following:

“SEC. . Notwithstanding any other provision of this Act, any reduction in tax or increase in benefits shall take effect only to the degree that the Secretary of the Treasury finds that the actual earnings of the Railroad Retirement Investment Trust Fund are sufficient to fund them.”.

SA 2227. Mr. GRAMM submitted an amendment intended to be proposed by him to the bill H.R. 10, to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At end end of the amendment, insert the following:

“SEC. . Notwithstanding any other provision of this Act, section 105(c) shall not apply.”.

SA 2228. Mr. GRAMM submitted an amendment intended to be proposed by him to the bill H.R. 10, to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the of the amendment, insert the following:

“SEC. . Notwithstanding any other provision of this Act, any reduction in tax under section 204 shall be null and void in any year that the combined balances of the Railroad Retirement trust funds have been depleted by more than 10 percent as compared to the combined balances of the Railroad Retirement trust funds projected by the Railroad Retirement Board under employment assumption II as of the day before the date of enactment of this Act, and the Secretary of the Treasury shall apply the rate of tax necessary to restore the depleted funds.”.

SA 2229. Mr. GRAMM submitted an amendment intended to be proposed by him to the bill H.R. 10, to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the end of the amendment, insert the following:

“SEC. . Notwithstanding any other provision of this Act, any reduction in tax under section 204 shall be null and void in any year that the combined balances of the Railroad Retirement trust funds have been depleted by more than 20 percent as compared to the combined balances of the Railroad Retirement trust funds projected by the Railroad Retirement Board under employment assumption II as of the day before the date of enactment of this Act, and the Secretary of the Treasury shall apply the rate of tax necessary to restore the depleted funds.”.

SA 2230. Mr. GRAMM submitted an amendment intended to be proposed by him to the bill H.R. 10, to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the end of the amendment, insert the following:

“SEC. . Notwithstanding any other provision of this Act, any reduction in tax under section 204 shall be null and void in any year that the combined balances of the Railroad Retirement trust funds have been depleted by more than 40 percent as compared to the combined balances of the Railroad Retirement trust funds projected by the Railroad Retirement Board under employment assumption II as of the day before the date of

enactment of this Act, and the Secretary of the Treasury shall apply the rate of tax necessary to restore the depleted funds.”.

SA 2231. Mr. GRAMM submitted an amendment intended to be proposed by him to the bill H.R. 10, to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the end of the amendment, insert the following:

“SEC. . Notwithstanding any other provision of this Act, any reduction in tax under section 204 shall be null and void in any year that the combined balances of the Railroad Retirement trust funds have been depleted by more than 75 percent as compared to the combined balances of the Railroad Retirement trust funds projected by the Railroad Retirement Board under employment assumption II as of the day before the date of enactment of this Act, and the Secretary of the Treasury shall apply the rate of tax necessary to restore the depleted funds.”.

SA 2232. Mr. SMITH of New Hampshire submitted an amendment intended to be proposed to amendment SA 2171 submitted by Mr. LOTT and intended to be proposed to the amendment SA 2170 proposed by Mr. DASCHLE to the bill (H.R. 10), to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the end of the amendment, add the following:

TITLE —METHYL TERTIARY BUTYL ETHER

SEC. 1. SHORT TITLE.

This title may be cited as the “Federal Reformulated Fuels Act of 2001”.

SEC. 2. LEAKING UNDERGROUND STORAGE TANKS.

(a) **USE OF LUST FUNDS FOR REMEDIATION OF MTBE CONTAMINATION.**—Section 9003(h) of the Solid Waste Disposal Act (42 U.S.C. 6991b(h)) is amended—

(1) in paragraph (7)(A)—

(A) by striking “paragraphs (1) and (2) of this subsection” and inserting “paragraphs (1), (2), and (12)”;

(B) by inserting “and section 9010” before “if”;

(2) by adding at the end the following:

“(12) **REMEDICATION OF MTBE CONTAMINATION.**—

“(A) **IN GENERAL.**—The Administrator and the States may use funds made available under section 9011(1) to carry out corrective actions with respect to a release of methyl tertiary butyl ether that presents a threat to human health, welfare, or the environment.

“(B) **APPLICABLE AUTHORITY.**—Subparagraph (A) shall be carried out—

“(i) in accordance with paragraph (2); and

“(ii) in the case of a State, in accordance with a cooperative agreement entered into by the Administrator and the State under paragraph (7).”.

(b) **RELEASE PREVENTION AND COMPLIANCE.**—Subtitle I of the Solid Waste Disposal Act (42 U.S.C. 6991 et seq.) is amended by striking section 9010 and inserting the following:

“SEC. 9010. RELEASE PREVENTION AND COMPLIANCE.

“Funds made available under section 9011(2) from the Leaking Underground Storage Tank Trust Fund may be used for con-

ducting inspections, or for issuing orders or bringing actions under this subtitle—

“(1) by a State (pursuant to section 9003(h)(7)) acting under—

“(A) a program approved under section 9004; or

“(B) State requirements regulating underground storage tanks that are similar or identical to this subtitle; and

“(2) by the Administrator, acting under this subtitle or a State program approved under section 9004.

“SEC. 9011. AUTHORIZATION OF APPROPRIATIONS.

“In addition to amounts made available under section 2007(f), there are authorized to be appropriated from the Leaking Underground Storage Tank Trust Fund—

“(1) to carry out section 9003(h)(12), \$200,000,000 for fiscal year 2002, to remain available until expended; and

“(2) to carry out section 9010—

“(A) \$50,000,000 for fiscal year 2002; and

“(B) \$30,000,000 for each of fiscal years 2003 through 2007.”.

(c) **TECHNICAL AMENDMENTS.**—

(1) Section 1001 of the Solid Waste Disposal Act (42 U.S.C. prec. 6901) is amended by striking the item relating to section 9010 and inserting the following:

“Sec. 9010. Release prevention and compliance.

“Sec. 9011. Authorization of appropriations.”

(2) Section 9001(3)(A) of the Solid Waste Disposal Act (42 U.S.C. 6991(3)(A)) is amended by striking “substances” and inserting “substances”.

(3) Section 9003(f)(1) of the Solid Waste Disposal Act (42 U.S.C. 6991b(f)(1)) is amended by striking “subsection (c) and (d) of this section” and inserting “subsections (c) and (d)”.

(4) Section 9004(a) of the Solid Waste Disposal Act (42 U.S.C. 6991c(a)) is amended in the second sentence by striking “referred to” and all that follows and inserting “referred to in subparagraph (A) or (B), or both, of section 9001(2).”.

(5) Section 9005 of the Solid Waste Disposal Act (42 U.S.C. 6991d) is amended—

(A) in subsection (a), by striking “study taking” and inserting “study, taking”;

(B) in subsection (b)(1), by striking “relevant” and inserting “relevant”;

(C) in subsection (b)(4), by striking “Environmental” and inserting “Environmental”.

SEC. 3. AUTHORITY FOR WATER QUALITY PROTECTION FROM FUELS.

(a) **IN GENERAL.**—Section 211(c) of the Clean Air Act (42 U.S.C. 7545(c)) is amended—

(1) in paragraph (1)(A)—

(A) by inserting “fuel or fuel additive or” after “Administrator any”;

(B) by striking “air pollution which” and inserting “air pollution, or water pollution, that”;

(2) in paragraph (4)(B), by inserting “or water quality protection,” after “emission control.”;

(3) by adding at the end the following:

“(5) **BAN ON THE USE OF MTBE.**—Not later than 4 years after the date of enactment of this paragraph, the Administrator shall ban use of methyl tertiary butyl ether in motor vehicle fuel.”.

(b) **NO EFFECT ON LAW REGARDING STATE AUTHORITY.**—The amendments made by subsection (a) have no effect on the law in effect on the day before the date of enactment of this Act regarding the authority of States to limit the use of methyl tertiary butyl ether in gasoline.

SEC. 4. WAIVER OF OXYGEN CONTENT REQUIREMENT FOR REFORMULATED GASOLINE.

Section 211(k)(1) of the Clean Air Act (42 U.S.C. 7545(k)(1)) is amended—

(1) by striking “Within 1 year after the enactment of the Clean Air Act Amendments of 1990,” and inserting the following:

“(A) **IN GENERAL.**—Not later than November 15, 1991,”; and

(2) by adding at the end the following:

“(B) **WAIVER OF OXYGEN CONTENT REQUIREMENT.**—

“(i) **AUTHORITY OF THE GOVERNOR.**—

“(I) **IN GENERAL.**—Notwithstanding any other provision of this subsection, a Governor of a State, upon notification by the Governor to the Administrator during the 90-day period beginning on the date of enactment of this subparagraph, or during the 90-day period beginning on the date on which an area in the State becomes a covered area by operation of the second sentence of paragraph (10)(D), may waive the application of paragraphs (2)(B) and (3)(A)(v) to gasoline sold or dispensed in the State.

“(II) **OPT-IN AREAS.**—A Governor of a State that submits an application under paragraph (6) may, as part of that application, waive the application of paragraphs (2)(B) and (3)(A)(v) to gasoline sold or dispensed in the State.

“(ii) **TREATMENT AS REFORMULATED GASOLINE.**—In the case of a State for which the Governor invokes the waiver described in clause (i), gasoline that complies with all provisions of this subsection other than paragraphs (2)(B) and (3)(A)(v) shall be considered to be reformulated gasoline for the purposes of this subsection.

“(iii) **EFFECTIVE DATE OF WAIVER.**—A waiver under clause (i) shall take effect on the earlier of—

“(I) the date on which the performance standards under subparagraph (C) take effect; or

“(II) the date that is 270 days after the date of enactment of this subparagraph.

“(C) **MAINTENANCE OF TOXIC AIR POLLUTANT EMISSION REDUCTIONS.**—

“(i) **IN GENERAL.**—As soon as practicable after the date of enactment of this subparagraph, the Administrator shall—

“(I) promulgate regulations consistent with subparagraph (A) and paragraph (3)(B)(ii) to ensure that reductions of toxic air pollutant emissions achieved under the reformulated gasoline program under this section before the date of enactment of this subparagraph are maintained in States for which the Governor waives the oxygenate requirement under subparagraph (B)(i); or

“(II) determine that the requirement described in clause (iv)—

“(aa) is consistent with the bases for performance standards described in clause (ii); and

“(bb) shall be deemed to be the performance standards under clause (ii) and shall be applied in accordance with clause (iii).

“(ii) **PADD PERFORMANCE STANDARDS.**—The Administrator, in regulations promulgated under clause (i)(I), shall establish annual average performance standards for each Petroleum Administration for Defense District (referred to in this subparagraph as a ‘PADD’) based on—

“(I) the average of the annual aggregate reductions in emissions of toxic air pollutants achieved under the reformulated gasoline program in each PADD during calendar years 1999 and 2000, determined on the basis of the 1999 and 2000 Reformulated Gasoline Survey Data, as collected by the Administrator; and

“(II) such other information as the Administrator determines to be appropriate.

“(iii) APPLICABILITY.—

“(I) IN GENERAL.—The performance standards under this subparagraph shall be applied on an annual average importer or refinery-by-refinery basis to reformulated gasoline that is sold or introduced into commerce in a State for which the Governor waives the oxygenate requirement under subparagraph (B)(i).

“(II) MORE STRINGENT REQUIREMENTS.—The performance standards under this subparagraph shall not apply to the extent that any requirement under section 202(1) is more stringent than the performance standards.

“(III) STATE STANDARDS.—The performance standards under this subparagraph shall not apply in any State that has received a waiver under section 209(b).

“(IV) CREDIT PROGRAM.—The Administrator shall provide for the granting of credits for exceeding the performance standards under this subparagraph in the same manner as provided in paragraph (7).

“(iv) STATUTORY PERFORMANCE STANDARDS.—

“(I) IN GENERAL.—Subject to subclause (IV), if the regulations under clause (i)(I) have not been promulgated by the date that is 270 days after the date of enactment of this subparagraph, the requirement described in subclause (III) shall be deemed to be the performance standards under clause (ii) and shall be applied in accordance with clause (iii).

“(II) PUBLICATION IN FEDERAL REGISTER.—Not later than 30 days after the date of enactment of this subparagraph, the Administrator shall publish in the Federal Register, for each PADD, the percentage equal to the average of the annual aggregate reductions in the PADD described in clause (ii)(I).

“(III) TOXIC AIR POLLUTANT EMISSIONS.—The annual aggregate emissions of toxic air pollutants from baseline vehicles when using reformulated gasoline in each PADD shall be not greater than—

“(aa) the aggregate emissions of toxic air pollutants from baseline vehicles when using baseline gasoline in the PADD; reduced by

“(bb) the quantity obtained by multiplying the aggregate emissions described in item (aa) for the PADD by the percentage published under subclause (II) for the PADD.

“(IV) SUBSEQUENT REGULATIONS.—Through promulgation of regulations under clause (i)(I), the Administrator may modify the performance standards established under subclause (I) to require each PADD to achieve a greater percentage reduction than the percentage published under subclause (II) for the PADD.”

SEC. 5. PUBLIC HEALTH AND ENVIRONMENTAL IMPACTS OF FUELS AND FUEL ADDITIVES.

Section 211(b) of the Clean Air Act (42 U.S.C. 7545(b)) is amended—

(1) in paragraph (2)—

(A) by striking “may also” and inserting “shall, on a regular basis,”; and

(B) by striking subparagraph (A) and inserting the following:

“(A) to conduct tests to determine potential public health and environmental effects of the fuel or additive (including carcinogenic, teratogenic, or mutagenic effects); and”;

(2) by adding at the end the following:

“(4) ETHYL TERTIARY BUTYL ETHER.—

“(A) IN GENERAL.—Not later than 2 years after the date of enactment of this paragraph, the Administrator shall—

“(i) conduct a study on the effects on public health, air quality, and water resources of

increased use of, and the feasibility of using as substitutes for methyl tertiary butyl ether in gasoline—

“(I) ethyl tertiary butyl ether; and

“(II) other ethers, as determined by the Administrator; and

“(ii) submit to the Committee on Energy and Commerce of the House of Representatives and the Committee on Environment and Public Works of the Senate a report describing the results of the study.

“(B) CONTRACTS FOR STUDY.—In carrying out this paragraph, the Administrator may enter into 1 or more contracts with non-governmental entities.”

SEC. 6. ANALYSES OF MOTOR VEHICLE FUEL CHANGES.

Section 211 of the Clean Air Act (42 U.S.C. 7545) is amended—

(1) by redesignating subsection (o) as subsection (p); and

(2) by inserting after subsection (n) the following:

“(o) ANALYSES OF MOTOR VEHICLE FUEL CHANGES AND EMISSIONS MODEL.—

“(1) ANTI-BACKSLIDING ANALYSIS.—

“(A) DRAFT ANALYSIS.—Not later than 4 years after the date of enactment of this subsection, the Administrator shall publish for public comment a draft analysis of the changes in emissions of air pollutants and air quality due to the use of motor vehicle fuel and fuel additives resulting from implementation of the amendments made by the Federal Reformulated Fuels Act of 2001.

“(B) FINAL ANALYSIS.—After providing a reasonable opportunity for comment but not later than 5 years after the date of enactment of this subsection, the Administrator shall publish the analysis in final form.

“(2) EMISSIONS MODEL.—For the purposes of this subsection, as soon as the necessary data are available, the Administrator shall develop and finalize an emissions model that reasonably reflects the effects of fuel characteristics or components on emissions from vehicles in the motor vehicle fleet during calendar year 2005.”

SEC. 7. ELIMINATION OF ETHANOL WAIVER.

Section 211(h) of the Clean Air Act (42 U.S.C. 7545(h)) is amended—

(1) by striking paragraph (4); and

(2) by redesignating paragraph (5) as paragraph (4).

SEC. 8. ADDITIONAL OPT-IN AREAS UNDER REFORMULATED GASOLINE PROGRAM.

Section 211(k)(6) of the Clean Air Act (42 U.S.C. 7545(k)(6)) is amended—

(1) by striking “(6) OPT-IN AREAS.—(A) Upon” and inserting the following:

“(6) OPT-IN AREAS.—

“(A) CLASSIFIED AREAS.—

“(i) IN GENERAL.—Upon”;

(2) in subparagraph (B), by striking “(B) If” and inserting the following:

“(ii) EFFECT OF INSUFFICIENT DOMESTIC CAPACITY TO PRODUCE REFORMULATED GASOLINE.—If”;

(3) in subparagraph (A)(ii) (as so redesignated)—

(A) in the first sentence, by striking “subparagraph (A)” and inserting “clause (i)”;

(B) in the second sentence, by striking “this paragraph” and inserting “this subparagraph”;

(4) by adding at the end the following:

“(B) NONCLASSIFIED AREAS.—

“(i) IN GENERAL.—In accordance with section 110, a State may submit to the Administrator, and the Administrator may approve, a State implementation plan revision that provides for application of the prohibition

specified in paragraph (5) in any portion of the State that is not a covered area or an area referred to in subparagraph (A)(i).

“(ii) PERIOD OF EFFECTIVENESS.—Under clause (i), the State implementation plan shall establish a period of effectiveness for applying the prohibition specified in paragraph (5) to a portion of a State that—

“(I) commences not later than 1 year after the date of approval by the Administrator of the State implementation plan; and

“(II) ends not earlier than 4 years after the date of commencement under subclause (I).”

SEC. 9. MTBE MERCHANT PRODUCER CONVERSION ASSISTANCE.

Section 211(c) of the Clean Air Act (42 U.S.C. 7545(c)) (as amended by section 3(a)(3)) is amended by adding at the end the following:

“(6) MTBE MERCHANT PRODUCER CONVERSION ASSISTANCE.—

“(A) IN GENERAL.—The Administrator may make grants to merchant producers of methyl tertiary butyl ether in the United States to assist the producers in the conversion of eligible production facilities described in subparagraph (B) to the production of other fuel additives that—

“(i) will be consumed in nonattainment areas;

“(ii) will assist the nonattainment areas in achieving attainment with a national primary ambient air quality standard;

“(iii) will not degrade air quality or surface or ground water quality or resources; and

“(iv) have been registered and tested in accordance with the requirements of this section.

“(B) ELIGIBLE PRODUCTION FACILITIES.—A production facility shall be eligible to receive a grant under this paragraph if the production facility—

“(i) is located in the United States; and

“(ii) produced methyl tertiary butyl ether for consumption in nonattainment areas during the period—

“(I) beginning on the date of enactment of this paragraph; and

“(II) ending on the effective date of the ban on the use of methyl tertiary butyl ether under paragraph (5).

“(C) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this paragraph \$250,000,000 for each of fiscal years 2002 through 2004.”

SA 2233. Mr. VOINOVICH submitted an amendment intended to be proposed to amendment SA 2170 submitted by Mr. DASCHLE and intended to be proposed to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

On page 51, insert the following after Section 301 and redesignate accordingly:

SEC. PRICE-ANDERSON REAUTHORIZATION.

(a) INDEMNIFICATION OF LICENSEES.—Section 170c. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(c)) is amended—

(1) in the subsection heading, by striking “LICENSEES” and inserting “LICENSEES”;

(2) in the first sentence, by striking “August 1, 2001” and inserting “August 1, 2012”.

(b) REPORTS TO CONGRESS.—Section 170p. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(p)) is amended by striking “August 1, 1998” and inserting “August 1, 2008”.

(c) APPLICABILITY.—The amendments made by this section apply with respect to nuclear incidents occurring on or after the date of enactment of this Act.

SEC. . ELIMINATION OF FOREIGN OWNERSHIP RESTRICTIONS.

(a) COMMERCIAL LICENSES.—Section 103d. of the Atomic Energy Act of 1954 (42 U.S.C. 2133(d)) is amended by striking the second sentence.

(b) MEDICAL THERAPY AND RESEARCH AND DEVELOPMENT.—Section 104d. of the Atomic Energy Act of 1954 (42 U.S.C. 2134(d)) is amended by striking the second sentence.

SEC. . SCOPE OF ENVIRONMENTAL REVIEW.

(a) IN GENERAL.—Chapter 10 of title I of the Atomic Energy Act of 1954 (42 U.S.C. 2131 et seq.) is amended—

(1) by redesignating sections 110 and 111 as sections 111 and 112, respectively; and

(2) by inserting after section 109 the following:

SEC. 110. SCOPE OF ENVIRONMENTAL REVIEW.

“In conducting any environmental review (including any activity conducted under section 102 of the National Environmental Policy Act of 1969 (42 U.S.C. 4332)) in connection with an application for a license or a renewed license under this chapter, the Commission shall not give any consideration to the need for, or any alternative to, the facility to be licensed.”.

(b) CONFORMING AMENDMENTS.—

(1) The Atomic Energy Act of 1954 is amended—

(A) in the table of contents (42 U.S.C. prec. 2011), by striking the items relating to section 110 and inserting the following:

“Sec. 110. Scope of environmental review.

“Sec. 111. Exclusions.

“SEC. 112. LICENSING BY NUCLEAR REGULATORY COMMISSION OF DISTRIBUTION OF CERTAIN MATERIALS BY DEPARTMENT OF ENERGY.”;

(B) in the last sentence of section 57b. (42 U.S.C. 2077(b)), by striking “section 111 b.” and inserting “section 112b.”; and

(C) in section 131a.(2)(C), by striking “section 111 b.” and inserting “section 112b.”.

(2) Section 202 of the Energy Reorganization Act of 1974 (42 U.S.C. 5842) is amended—

(A) by striking “section 110 a.” and inserting “section 111a.”; and

(B) by striking “section 110 b.” and inserting “section 111b.”.

SEC. . ELIMINATION OF DUPLICATIVE ANTI-TRUST REVIEW.

Section 105 of the Atomic Energy Act of 1954 (42 U.S.C. 2135) is amended by striking subsection c. and inserting the following:

“(c) CONDITIONS.—

“(1) IN GENERAL.—A condition for a grant of a license imposed by the Commission under this section shall remain in effect until the condition is modified or removed by the Commission.

“(2) MODIFICATION.—If a person that is licensed to construct or operate a utilization or production facility applies for reconsideration under this section of a condition imposed in the person's license, the Commission shall conduct a proceeding, on an expedited basis, to determine whether the license condition—

“(A) is necessary to ensure compliance with subsection a.; or

“(B) should be modified or removed.”.

On page 52, insert the following after Section 304 and redesignate accordingly:

SEC. . HEARING PROCEDURES.

Section 189a.(1) of the Atomic Energy Act of 1954 (42 U.S.C. 2239(a)(1)) is amended by adding at the end the following:

“(C) HEARINGS.—A hearing under this section shall be conducted using informal adjudicatory procedures unless the Commission determines that formal adjudicatory procedures are necessary—

“(i) to develop a sufficient record; or

“(ii) to achieve fairness.”.

SEC. . AUTHORITY OVER FORMER LICENSEES FOR DECOMMISSIONING FUNDING.

Section 161i. of the Atomic Energy Act of 1954 (42 U.S.C. 2201(i)) is amended—

(1) by striking “and (3)” and inserting “(3)”;

(2) by inserting before the semicolon at the end the following: “, and (4) to ensure that sufficient funds will be available for the decommissioning of any production or utilization facility licensed under section 103 or 104b., including standards and restrictions governing the control, maintenance, use, and disbursement by any former licensee under this Act that has control over any fund for the decommissioning of the facility”.

SEC. . ELIMINATION OF PENSION OFFSET.

Section 161 of the Atomic Energy Act of 1954 (42 U.S.C. 2201) is amended by adding at the end the following:

“(y)” exempt from the application of sections 8344 and 8468 of title 5, United States Code, an annuitant who was formerly an employee of the Commission who is hired by the Commission as a consultant, if the Commission finds that the annuitant has a skill that is critical to the performance of the duties of the Commission.”.

On page 53, insert the following after Section 308 and redesignate accordingly

SEC. . CONTRACTS WITH THE NATIONAL LABORATORIES.

Section 170A of the Atomic Energy Act of 1954 (42 U.S.C. 2210a) is amended by striking subsection c. and inserting the following:

“(c) CONTRACTS, AGREEMENTS, AND OTHER ARRANGEMENTS WITH THE NATIONAL LABORATORIES.—Notwithstanding subsection b. and notwithstanding the potential for a conflict of interest that cannot be avoided, the Commission may enter into a contract, agreement, or other arrangement with a national laboratory if the Commission takes reasonable steps to mitigate the effect of the conflict of interest.”.

On page 108, insert the following after Section 2302 and redesignate accordingly:

SEC. . NRC TRAINING PROGRAM.

(a) IN GENERAL.—In order to maintain the human resources investment and infrastructure of the United States in the nuclear sciences, health physics, and engineering fields, in accordance with the statutory authorities of the Commission relating to the civilian nuclear energy program, the Nuclear Regulatory Commission shall carry out a training and fellowship program to address shortages of individuals with critical safety skills.

(b) AUTHORIZATION OF APPROPRIATIONS—

(1) IN GENERAL.—There are authorized to be appropriated to carry out this section \$1,000,000 for each of fiscal years 2002 through 2005.

(2) AVAILABILITY.—Funds made available under paragraph (1) shall remain available until expended.

SA 2234. Mr. CRAIG submitted an amendment intended to be proposed to amendment SA 2171 submitted by Mr. LOTT and intended to be proposed to the amendment SA 2170 proposed by Mr. DASCHLE to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

Strike sections 401 and 402 and insert the following:

SEC. 401. ALTERNATIVE CONDITIONS.

(a) ALTERNATIVE MANDATORY CONDITIONS.—Section 4 of the Federal Power Act (16 U.S.C.

797) is amended by adding at the end the following:

“(h)(1) Whenever any person applies for a license for any project works within any reservation of the United States under subsection (e), and the Secretary of the department under whose supervision such reservation falls (in this subsection referred to as the ‘Secretary’) shall deem a condition to such license to be necessary under the first proviso of such section, the license applicant may propose an alternative condition that will either—

“(A) cost less to implement, or

“(B) result in improved operation of the project works for electricity production.

“(2) Notwithstanding the first proviso of subsection (e), the Secretary shall accept the alternative condition proposed by the license applicant, and the Commission shall include in the license such alternative condition, if the Secretary determines that the alternative condition provides for the adequate protection and utilization of the reservation.

“(3) In making the determination set forth in subsection (2), the Secretary shall consult with and obtain the view of the Commission.

“(4) The Secretary shall submit to the Commission with any condition under subsection (e) or alternative condition it accepts under paragraph (2) a written statement explaining the basis for such condition and, if he determines not to accept an alternative condition proposed by the license applicant under paragraph (1), the basis for not accepting such alternative condition, along with all studies, data, and other information on which the Secretary based his decision.

“(5) The Commission shall place any statement, study, data, or other information received from the Secretary under paragraph (4) on the public record of the licensing proceeding.

“(6) The Secretary shall establish schedules for the submission of proposed conditions under paragraph (1) and the expedited review of the acceptance or rejection of proposed conditions under paragraph (2) that will enable the Secretary to submit conditions to the Commission in accordance with the Commission's license application review schedule.”.

(b) ALTERNATIVE FISHWAYS.—Section 18 of the Federal Power Act (16 U.S.C. 811) is amended by—

(1) inserting “(a)” before the first sentence; and

(2) adding at the end the following:

“(b)(1) Whenever the Commission shall require a licensee to construct, maintain, or operate a fishway prescribed by the Secretary of the Interior or the Secretary of Commerce under this section, the licensee may propose an alternative that will either—

“(A) cost less to implement, or

“(B) result in improved operation of the project works for electricity production.

“(2) Notwithstanding subsection (a), the Secretary of the Interior or the Secretary of Commerce, as appropriate, shall accept and prescribe, and the Commission shall require, the alternative proposed by the licensee, if the Secretary of the appropriate department determines that the alternative will be no less effective than the fishway initially prescribed by the Secretary.

“(3) In making the determination set forth in subsection (2), the Secretary shall consult with and obtain the view of the Commission.

“(4) The Secretary of the appropriate department shall submit to the Commission

with any fishway prescription under subsection (a) or alternative prescription it accepts under paragraph (2) a written statement explaining the basis of such prescription and, if it determines not to accept an alternative prescription proposed by the licensee under paragraph (1), the basis for not accepting such alternative prescription, along with all studies, data, and other information on which the Secretary based his decision.

“(5) The Commission shall place any statement, study, data or other information received from the Secretary under paragraph (3) on the public record of the licensing proceeding.

“(6) The Secretary of the appropriate department shall establish schedules for the submission of proposed conditions under paragraph (1) and the expedited review of the acceptance or rejection of proposed conditions under paragraph (2) that will enable the Secretary to submit conditions in accordance with the Commission’s license application review schedule.”.

SA 2235. Mr. CRAIG submitted an amendment intended to be proposed to amendment SA 2171 submitted by Mr. LOTT and intended to be proposed to the amendment SA 2170 proposed by Mr. DASCHLE to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following and redesignate accordingly:

SEC. 1. SHORT TITLE.

This Act may be cited as the “Climate Change Risk Management Act of 2001”.

SEC. 2. FINDINGS.

Congress finds that—

(1) human activities, namely energy production and use, contribute to increasing concentrations of greenhouse gases in the atmosphere, which may ultimately contribute to global climate change beyond that resulting from natural variability;

(2) although the science of global climate change has been advanced in the past ten years, the timing and magnitude of climate change-related impacts on the United States cannot currently be predicted with any reasonable certainty;

(3) furthermore, a recent National Research Council review of climate change science suggests that without an understanding of the sources and degree of uncertainty regarding climate change and its impacts, decision-makers could fail to define the best ways to manage the risk of climate change;

(4) despite this uncertainty, the potential impacts from human-induced climate change pose a substantial risk that should be managed in a responsible manner;

(5) given that the bulk of greenhouse gas emissions from human activities result from energy production and use, national and international energy policy decisions made now and in the longer-term future will influence the extent and timing of any climate change and resultant impacts from climate change later this century;

(6) the characteristics of greenhouse gases and the physical nature of the climate system require that stabilization of atmospheric greenhouse gas concentrations at any future level must be a long-term effort undertaken on a global basis;

(7) the characteristics of existing energy-related infrastructure and capital suggest that effective greenhouse gas management

efforts will depend on the development of long-term, cost-effective technologies and practices that can be demonstrated and deployed commercially in the United States and around the world;

(8) environmental progress, energy security, economic prosperity, and satisfaction of basic human needs are interrelated, particularly in developing countries;

(9) developing countries will constitute the major source of greenhouse gas emissions in the 21st century and the major source of increases in such emissions;

(10) any program to address the risks of climate change that does not fully include developing nations as integral participants will be ineffective;

(11) a new long-term, technology-based, cost-effective, flexible, and global strategy to ensure long-term energy security and manage the risk of climate change is needed, and should be promoted by the United States in its domestic and international activities in this regard.

SEC. 3. DEFINITIONS.

Title XVI of the Energy Policy Act of 1992 (42 U.S.C. 13381, et seq.) is amended by inserting before section 1601 the following:

“SEC. 1600. DEFINITIONS.

(1) **AGRICULTURAL ACTIVITY.**—The term “agricultural activity” means livestock production, cropland cultivation, biogas and other waste material recovery and nutrient management.

(2) **CLIMATE SYSTEM.**—The term “climate system” means the totality of the atmosphere, hydrosphere, biosphere and geosphere and their interactions.

(3) **CLIMATE CHANGE.**—The term “climate change” means a change in the state of the climate system attributed directly or indirectly to human activity which is in addition to natural climate variability observed over comparable time periods.

(4) **EMISSIONS.**—The term “emissions” means the net release of greenhouse gases and/or their precursors into the atmosphere over a specified area and period of time, after taking into account any reductions due to greenhouse gas sequestration.

(5) **GREENHOUSE GASES.**—The term “greenhouse gases” means those gaseous and aerosol constituents of the atmosphere, both natural and anthropogenic, that absorb and re-emit infrared radiation.

(6) **SEQUESTRATION.**—The term “sequestration” means any process, activity or mechanism which removes a greenhouse gas or its precursor from the atmosphere or from emissions streams.

(7) **FOREST PRODUCTS.**—The term “forest products” means all products or goods manufactured from trees.

(8) **FORESTRY ACTIVITY.**—

(A) **IN GENERAL.**—The term “forestry activity” means any ownership or management action that has a discernible impact on the use and productivity of forests.

(B) **INCLUSIONS.**—Forestry activities include, but are not limited to, the establishment of trees on an area not previously forested, the establishment of trees on an area previously forested if a net carbon benefit can be demonstrated, enhanced forest management (including thinning, stand improvement, fire protection, weed control, nutrient application, pest management, and other silvicultural practices), forest protection or conservation if a net carbon benefit can be demonstrated, and production or use of biomass energy (including the use of wood, grass or other biomass in lieu of fossil fuel).

(C) **EXCLUSIONS.**—The term “forest activity” does not include a land use change associated with—

(i) an act of war; or

(ii) an act of nature, including floods, storms, earthquakes, fires, hurricanes, and tornadoes.”.

SEC. 4. NATIONAL CLIMATE CHANGE STRATEGY.

(a) **IN GENERAL.**—Section 1601 of the Energy Policy Act of 1992 (42 U.S.C. 13381) is amended to read as follows:

“SEC. 1601. NATIONAL CLIMATE CHANGE STRATEGY.

(a) **IN GENERAL.**—The President, in consultation with appropriate Federal agencies and the Congress, shall develop and implement a national strategy to manage the risks posed by potential climate change.

(b) **GOAL.**—The strategy shall be consistent with the United Nations Framework Convention on Climate Change, done at New York on May 9, 1992, in a manner that—

(1) does not result in serious harm to the U.S. economy;

(2) adequately provides for the energy security of the U.S.;

(3) establishes and maintains U.S. leadership with respect to climate change-related scientific research, development and deployment of advanced energy technology; and

(4) will result in a reduction in the ratio that the net U.S. greenhouse gas emissions bears to the U.S. gross domestic production.

(c) **ELEMENTS.**—The strategy shall include short-term and long-term strategies, programs and policies that—

(1) enhance the scientific knowledge base for understanding and evaluation of natural and human-induced climate change, including the role of climate feedbacks and all climate forcing agents;

(2) improve scientific observation, modeling, analysis and prediction of climate change and its impacts, and the economic, social and environmental risks posed by such impacts;

(3) assess the economic, social, and environmental costs and benefits of current and potential options to reduce, avoid, or sequester greenhouse gas emissions.

(4) develop and implement market-directed policies that reduce, avoid or sequester greenhouse gas emissions, including

(i) cost-effective Federal, State, tribal, and local policies, programs, standards and incentives;

(ii) policies and incentives to speed development, deployment and consumer adoption of advanced energy technologies in the U.S. and throughout the world; and

(iii) removal of regulatory barriers that impede the development, deployment and consumer adoption of advanced energy technologies in the U.S. and throughout the world; and

(iv) participation in international institutions, or the support of international activities, that are established or conducted to facilitate effective measures to implement the United Nations Framework Convention on Climate Change.

(5) advance areas where bilateral or multilateral cooperation and investment would lead to adoption of advanced technologies for use within developing countries to reduce, avoid or sequester greenhouse gas emissions;

(6) identify activities and policies that provide for adaptation to natural and human-induced climate change;

(7) recommend specific legislative or administrative activities, giving preference to cost-effective and technologically feasible measures that will—

(A) result in a reduction in the ratio that the net U.S. greenhouse gas emissions bears to the U.S. gross domestic product;

(B) avoid adverse short-term and long-term economic and social impacts on the United States; and

(C) foster such changes in institutional and technology systems as are necessary to mitigate or adapt to climate change and its impacts in the short-term and the long-term;

(8) designate federal, state, tribal or local agencies responsible for carrying out recommended activities and programs, and identify interagency entities or activities that may be needed to coordinate actions carried out consistent with this strategy.

(d) CONSULTATION.—This strategy shall be developed in a manner that provides for meaningful participation by, and consultation among, Federal, State, tribal, and local government agencies, non-governmental organizations, academia, scientific bodies, industry, the public, and other interested parties.

(e) BIENNIAL REPORT.—No later than one year after the date of enactment of this section, and at the end of each second year thereafter, the President shall submit to Congress a report that includes—

(1) a description of the national climate change strategy and its goals and Federal programs and activities intended to carry out this strategy through mitigation, adaptation, and scientific research activities;

(2) an evaluation of Federal programs and activities implemented as part of this strategy against the goals and implementation dates outlined in the strategy;

(3) a description of changes to Federal programs or activities implemented to carry out this strategy, in light of new knowledge of climate change and its impacts and costs or benefits, or technological capacity to improve mitigation or adaptation activities;

(4) a description of all Federal spending on climate change for the current fiscal year and each of the five years previous, categorized by Federal agency and program function (including scientific research, energy research and development, regulation, education and other activities);

(5) an estimate of the budgetary impact for the current fiscal year and each of the five years previous of any Federal tax credits, tax deductions or other incentives claimed by taxpayers that are directly or indirectly attributable to greenhouse gas emissions reduction activities; and

(6) an estimate of the amount, in metric tons, of greenhouse gas emissions reduced, avoided or sequestered directly or indirectly as a result of each spending program or tax credit, deduction or other incentive for the current fiscal year and each of the five years previous.

(f) REVIEW BY NATIONAL ACADEMIES.—

(1) IN GENERAL.—Not later than 90 days after the date of publication of the each biennial report as directed by this section, the President shall commission the National Academies to conduct a review of the national climate change strategy and implementation plan required by this section.

(2) CRITERIA.—The National Academies' review shall evaluate the goals and recommendations contained in the national climate change strategy report in light of—

(A) new or improved scientific knowledge regarding climate change and its impacts;

(B) new understanding of human social and economic responses to climate change, and responses of natural ecosystems to climate change;

(C) advancements in energy technologies that reduce, avoid, or sequester greenhouse gases or otherwise mitigate the risks of climate change;

(D) new or revised understanding of economic costs and benefits of mitigation or adaptation activities; and

(E) the existence of alternative policy options that could achieve the strategy goals at lower economic, environmental, or social cost.

(3) REPORT.—The National Academies shall prepare and submit to Congress and the President a report concerning the results of such review, along with any recommendations as appropriate. Such report shall also be made available to the public.

(4) DEFINITION.—For the purposes of this Section, the term "National Academies" means the National Research Council, the National Academy of Sciences, the National Academy of Engineering, and the Institute of Medicine."

(b) CONFORMING AMENDMENT.—Section 1103(b) of the Global Climate Protection Act of 1987 (15 U.S.C. 2901) is amended by inserting "the Department of Energy, and other Federal agencies as appropriate" after "Environmental Protection Agency".

SEC. 5. CLIMATE TECHNOLOGY RESEARCH, DEVELOPMENT, DEMONSTRATION AND DEPLOYMENT PROGRAM.

(a) IN GENERAL.—Section 1604 of the Energy Policy Act of 1992 (42 U.S.C. 13384) is amended to read as follows:

"SEC. 1604. CLIMATE TECHNOLOGY RESEARCH, DEVELOPMENT, DEMONSTRATION AND DEPLOYMENT PROGRAM.

(a) IN GENERAL.—The Secretary, in consultation with the Advisory Board established under section 2302, shall establish a long-term Climate Technology Research, Development, Demonstration, and Deployment Program, in accordance with sections 3001 and 3002.

(b) PROGRAM OBJECTIVES.—The program shall conduct a long-term research, development, demonstration and deployment program to foster technologies and practices that—

(1) reduce or avoid anthropogenic emissions of greenhouse gases;

(2) remove and sequester greenhouse gases from emissions streams; and

(3) remove and sequester greenhouse gases from the atmosphere.

(c) PROGRAM PLAN.—Not later than 1 year after the date of enactment of this Act, the Secretary shall prepare and submit to the Congress a 10-year program plan to guide activities under this section. Thereafter, the Secretary shall biennially update and resubmit the program plan to the Congress. In preparing the program plan, the Secretary shall:

(1) include quantitative technology performance and carbon emissions reduction goals, schedule milestones, technology approaches, Federal funding requirements, and non-Federal cost sharing requirements;

(2) consult with appropriate representatives of industry, institutions of higher education, Department of Energy national laboratories, and professional, scientific and technical societies;

(3) take into consideration how the Federal Government, acting through the Secretary, can be effective in ensuring the availability of such technologies when they are needed and how the Federal Government can most effectively cooperate with the private sector in the accomplishment of the goals set forth in subsection (b); and

(4) consider how activities funded under the program can be complementary to, and not duplicative of, existing research and development activities within the Department.

(d) SOLICITATION.—Not later than 1 year after the date of submission of the 10-year program plan, the Secretary shall solicit proposals for conducting activities con-

sistent with the 10-year plan and select one or more proposals not later than 180 days after such solicitations.

(e) PROPOSALS.—Proposals may be submitted by applicants or consortia from industry, institutions of higher education, or Department of Energy national laboratories. At minimum, each proposal shall also include the following:

(1) a multi-year management plan that outlines how the proposed research, development, demonstration and deployment activities will be carried out;

(2) quantitative technology goals and greenhouse gas emission reduction targets that can be used to measure performance against program objectives;

(3) the total cost of the proposal for each year in which funding is requested, and a breakdown of those costs by category;

(4) evidence that the applicant has in existence or has access to—

(i) the technical capability to enable it to make use of existing research support and facilities in carrying out the research objectives of the proposal;

(ii) a multi-disciplinary research staff experienced in technologies or practices able to sequester, avoid, or capture greenhouse gas emissions;

(iii) access to facilities and equipment to enable the conduct of laboratory-scale testing or demonstration of technologies or related processes undertaken through the program; and

(iv) commitment for matching funds and other resources from non-Federal sources, including cash, equipment, services, materials, appropriate technology transfer activities, and other assets directly related to the cost of the proposal;

(5) evidence that the proposed activities are supplemental to, and not duplicative of, existing research and development activities carried out, funded, or otherwise supported by the Department;

(6) a description of the technology transfer mechanisms and industry partnerships that the applicant will use to make available research results to industry and to other researchers;

(7) a statement whether the unique capabilities of Department of Energy national laboratories warrant collaboration with those laboratories, and the extent of any such collaboration proposed; and

(8) demonstrated evidence of the ability of the applicant to undertake and complete the proposed project, including the successful introduction of the technology into commerce.

(f) SELECTION OF PROPOSALS.—From the proposals submitted, the Secretary shall select for funding one or more proposals that will best accomplish the program objectives outlined in this section.

(g) ANNUAL REPORT.—The Secretary shall prepare and submit an annual report to Congress that—

(1) demonstrates that the program objectives are adequately focused, peer-reviewed for merit, and not unnecessarily duplicative of the science and technology research being conducted by other Federal agencies and programs,

(2) states whether the program as conducted in the prior year addresses an adequate breadth and range of technologies and solutions to address anthropogenic climate change; and

(3) evaluates the quantitative progress of funded proposals towards the program objectives outlined in this section, and the technology and greenhouse gas emission reduction, avoidance or sequestration goals as described in their respective proposals.

(h) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated to carry out this subtitle \$200,000,000 for each of fiscal years 2002 through 2011, to remain available until expended.”

(b) **CONFORMING AMENDMENTS.**—Section 6 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5905) is amended—

(1) in subsection (a)—

(A) in paragraph (2), by striking “and” at the end;

(B) in paragraph (3) by striking the period at the end and inserting “, and”; and

(C) by adding at the end of the following:

“(4) solutions to the effective management of greenhouse gas emissions in the long term by the development of technologies and practices designed to—

(A) reduce or avoid anthropogenic emissions of greenhouse gases;

(B) remove and sequester greenhouse gases from emissions streams; and

(C) remove and sequester greenhouse gases from the atmosphere.”; and

(2) in subsection (b)—

(A) in paragraph (2), by striking “subsection (a)(1) through (3)” and inserting “paragraphs (1) through (4) of subsection (a)”; and

(B) in paragraph (3)—

(i) in subparagraph (R), by striking “and” at the end;

(ii) in subparagraph (S), by striking the period at the end and inserting “; and”; and

(iii) by adding at the end of the following:

“(T) to pursue a long-term climate technology strategy designed to demonstrate a variety of technologies by which stabilization of greenhouse gases might be best achieved, including accelerated research, development, demonstration and deployment of—

(i) renewable energy systems;

(ii) advanced fossil energy technology;

(iii) advanced nuclear power plant design;

(iv) fuel cell technology for residential, industrial and transportation applications;

(v) carbon sequestration practices and technologies, including agricultural and forestry practices that store and sequester carbon;

(vi) efficient electrical generation, transmission and distribution technologies; and

(vii) efficient end use energy technologies.”.

SEC. 6. INTERNATIONAL ENERGY TECHNOLOGY DEPLOYMENT PROGRAM.

Section 1608 of the Energy Policy Act of 1992 (42 U.S.C. 13387) is amended by striking subsection (1) and inserting the following:

“(1) **INTERNATIONAL ENERGY TECHNOLOGY DEPLOYMENT PROGRAM.**—

(1) **DEFINITIONS.**—In this subsection:

(A) **INTERNATIONAL ENERGY DEPLOYMENT PROJECT.**—The term “international energy deployment project” means a project to construct an energy production facility outside the United States—

(i) the output of which will be consumed outside the United States; and

(ii) the deployment of which will result in a greenhouse gas reduction per unit of energy produced when compared to the technology that would otherwise be implemented of—

(I) 10 percentage points or more, in the case of a unit placed in service before January 1, 2010;

(II) 20 percentage points or more, in the case of a unit placed in service after December 31, 2009, and before January 1, 2020; or

(III) 30 percentage points or more, in the case of a unit placed in service after December 31, 2019, and before January 1, 2030.

(C) **QUALIFYING INTERNATIONAL ENERGY DEPLOYMENT PROJECT.**—The term “qualifying international energy deployment project” means an international energy deployment project that—

(i) is submitted by a United States firm to the Secretary in accordance with procedures established by the Secretary by regulation;

(ii) uses technology that has been successfully developed or deployed in the United States, or in another country as a result of a partnership with a company based in the United States;

(iii) meets the criteria of subsection (k);

(iv) is approved by the Secretary, with notice of the approval being published in the Federal Register; and

(v) complies with such terms and conditions as the Secretary establishes by regulation.

(D) **UNITED STATES.**—The term “United States”, when used in a geographical sense, means the 50 States, the District of Columbia, Puerto Rico, Guam, the Virgin Islands, American Samoa, and the Commonwealth of the Northern Mariana Islands.

(2) **PILOT PROGRAM FOR FINANCIAL ASSISTANCE.**—

(A) **IN GENERAL.**—Not later than 180 days after the date of enactment of this Act, the Secretary shall, by regulation, provide for a pilot program for financial assistance for qualifying international energy deployment projects.

(B) **SELECTION CRITERIA.**—After consultation with the Secretary of State, the Secretary of Commerce, and the United States Trade Representative, the Secretary shall select projects for participation in the program based solely on the criteria under this title and without regard to the country in which the project is located.

(C) **FINANCIAL ASSISTANCE.**—

(i) **IN GENERAL.**—A United States firm that undertakes a qualifying international energy deployment project that is selected to participate in the pilot program shall be eligible to receive a loan or a loan guarantee from the Secretary.

(ii) **RATE OF INTEREST.**—The rate of interest of any loan made under clause (i) shall be equal to the rate for Treasury obligations then issued for periods of comparable maturities.

(iii) **AMOUNT.**—The amount of a loan or loan guarantee under clause (i) shall not exceed 50 percent of the total cost of the qualified international energy deployment project.

(iv) **DEVELOPED COUNTRIES.**—Loans or loan guarantees made for projects to be located in a developed country, as listed in Annex I of the United Nations Framework Convention on Climate Change, shall require at least a 50% contribution towards the total cost of the loan or loan guarantee by the host country.

(v) **DEVELOPING COUNTRIES.**—Loans or loan guarantees made for projects to be located in a developed country (those countries not listed in Annex I of the United Nations Framework Convention on Climate Change) shall require at least a 10% contribution towards the total cost of the loan or loan guarantee by the host country.

(vi) **CAPACITY BUILDING RESEARCH.**—Proposals made for projects to be located in a developing country may include a research component intended to build technological capacity within the host country. Such research must be related to the technologies being deployed and must involve both an institution in the host country and an industry, university or national laboratory partic-

ipant from the United States. The host institution must contribute at least 50% of funds provided for the capacity building research.

(D) **COORDINATION WITH OTHER PROGRAMS.**—A qualifying international energy deployment project funded under this section shall not be eligible as a qualifying clean coal technology under section 415 of the Clean Air Act (42 U.S.C. 7651n).

(E) **REPORT.**—Not later than 5 years after the date of enactment of this section, the Secretary shall submit to the President and the Congress a report on the results of the pilot projects.

(F) **RECOMMENDATIONS.**—Not later than 60 days after receiving the report under subparagraph (E), the Secretary shall submit to Congress a recommendation concerning whether the financial assistance program under this section should be continued, expanded, reduced, or eliminated.

(G) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated to carry out this section \$100,000,000 for each of fiscal years 2002 through 2011, to remain available until expended.”.

SEC. 7. NATIONAL GREENHOUSE GAS EMISSIONS REGISTRY.

Section 1605 of the Energy Policy Act of 1992 (42 U.S.C. 13385) is amended—

(1) by amending the second sentence of subsection (a) to read as follows:

“The Secretary shall annually update and analyze such inventory using available data, including, beginning in calendar year 2001, information collected as a result of voluntary reporting under subsection (b). The inventory shall identify for calendar year 2001 and thereafter the amount of emissions reductions attributed to those reported under subsection (b)”;

(2) by amending subsection (b)(1)(B) and (C) to read as follows—

“(B) annual reductions or avoidance of greenhouse gas emissions and carbon sequestration achieved through any measures, including agricultural activities, co-generation, appliance efficiency, energy efficiency, forestry activities that increase carbon sequestration stocks (including the use of forest products), fuel switching, management of crop lands, grazing lands, grasslands and drylands, manufacture or use of vehicles with reduced greenhouse gas emissions, methane recovery, ocean seeding, use of renewable energy, chlorofluorocarbon capture and replacement, and power plant heat rate improvement; and

(C) reductions in, or avoidance of, greenhouse gas emissions achieved as a result of voluntary activities domestically, or internationally, plant or facility closings, and State or Federal requirements.”.

(3) by striking in the first sentence of subsection (b)(2) the word “entities” and inserting “persons or entities” and in the second sentence of such subsection, by inserting after “Persons” the words “or entities”;

(4) by inserting in the second sentence of subsection (b)(4) the words “persons or” before “entity”;

(5) by adding after subsection (b)(4) the following new paragraphs—

“(5) **RECOGNITION OF VOLUNTARY GREENHOUSE GAS EMISSIONS REDUCTION, AVOIDANCE, OR SEQUESTRATION.**—To encourage new and increased voluntary efforts to reduce, avoid, or sequester emissions of greenhouse gases, the Secretary shall develop and establish a program of giving annual public recognition to all reporting persons and entities demonstrating voluntarily achieved greenhouse gases reduction, avoidance, or sequestration, pursuant to the voluntary collections and reporting guidelines issued under this section.

Such recognition shall be based on the information certified, subject to section 1001 of title 18, United States Code, by such persons or entities for accuracy as provided in paragraph 2 of this subsection, and shall include such information reported prior to the enactment of this paragraph. At a minimum such recognition shall annually be published in the Federal Register.

(6) REVIEW AND REVISION OF GUIDELINES.—

(A) IN GENERAL.—Not later than 1 year after the date of enactment of this subparagraph, the Secretary of Energy, acting through the Administrator of the Energy Information Administration, shall conduct a review of guidelines established under this section regarding the accuracy and reliability of reports of greenhouse gas reductions and related information.

(B) CONTENTS.—The review shall include the consideration of the need for any amendments to such guidelines, including—

(i) a random or other verification process using the authorities available to the Secretary under other provisions of law;

(ii) a range of reference cases for reporting of project-based activities in sectors, including the measures specified in subparagraph (1)(B) of this subsection, and the inclusion of benchmark and default methodologies and best practices for use as reference cases for eligible projects;

(iii) issues, such as comparability, that are associated with the option of reporting on an entity-wide basis or on an activity or project basis; and

(iv) safeguards to address the possibility of reporting, inadvertently or otherwise, of some of all of the same greenhouse gas emissions reductions by more than one reporting entity or person and to make corrections where necessary;

(v) provisions that encourage entities or persons to register their certified, by appropriate and credible means, baseline emissions levels on an annual basis, taking into consideration all of their reports made under this section prior to the enactment of this paragraph;

(vi) procedures and criteria for the review and registration of ownership of all or part of any reported and verified emissions reductions relative to a reported baseline emissions level under this section; and

(vii) accounting provisions needed to allow for changes in registration of ownership of emissions reductions resulting from a voluntary private transaction between reporting entities or persons.

For the purposes of this paragraph, the term “reductions” means any and all activities taken by a reporting entity or person that reduce, avoid or sequester greenhouse gas emissions, or sequester greenhouse gases from the atmosphere.

(C) ECONOMIC ANALYSIS.—The review should consider the costs and benefits of any such amendments, the effect of such amendments on participation in this program, including by farmers and small businesses, and the need to avoid creating undue economic advantages or disadvantages for persons or entities in the private sector. The review should provide, where appropriate, a range of reasonable options that are consistent with the voluntary nature of this section and that will help further the purposes of this section.

(D) PUBLIC COMMENT AND SUBMISSION OF REPORT.—The findings of the review shall be made available in draft form for public comment for at least 45 days, and a report containing the findings of the review shall be submitted to Congress and the President no later than one year after date of enactment of this section.

(E) REVISION OF GUIDELINES.—If the Secretary, after consultation with the Administrator, finds, based on the study results, that changes to the program are likely to be beneficial and cost effective in improving the accuracy and reliability of reported greenhouse gas reductions and related information, are consistent with the voluntary nature of this section, and further the purposes of this section, the Secretary shall propose and promulgate changes to program guidelines based with such findings. In carrying out the provisions of this paragraph, the Secretary shall consult with the Secretary of Agriculture and the Administrator of the Small Business Administration to encourage greater participation by small business and farmers in addressing greenhouse gas emission reductions and reporting such reductions.

(F) PERIODIC REVIEW AND REVISION OF GUIDELINES.—The Secretary shall thereafter review and revise these guidelines at least once every 5 years, following the provisions for economic analysis, public review, and revision set forth in subsections (C) through (E) of this section.”

(6) in subsection (c), by inserting “the Secretary of the Department of Agriculture, the Secretary of the Department of Commerce, the Administrator of the Energy Information Administration, and” before “the Administrator”; and

(7) by adding at the end the following:

“(d) PUBLIC AWARENESS PROGRAM.—

(1) IN GENERAL.—The Secretary shall create and implement a public awareness program to educate all persons in the United States of—

(A) the direct benefits of engaging in voluntary greenhouse gas emissions reduction measures and having the emissions reductions certified under this section and available for use therein; and

(B) the case of use of the forms and procedures for having emissions reductions certified under this section.

(2) AGRICULTURAL AND SMALL BUSINESS OUTREACH.—The Secretary of Agriculture and the Administrator of the Small Business Administration shall assist the Secretary in creating and implementing a targeted public awareness program to encourage voluntary participation by small businesses and farmers.”

SEC. 8. REVIEW OF FEDERALLY FUNDED ENERGY TECHNOLOGY RESEARCH AND DEVELOPMENT.

(a) IN GENERAL.—Title XVI of the Energy Policy Act of 1992 (42 U.S.C. 13381 et seq.) is amended by adding the following new section:

“SEC. 1610. REVIEW OF FEDERALLY FUNDED ENERGY TECHNOLOGY RESEARCH AND DEVELOPMENT.

(a) DEPARTMENT OF ENERGY REVIEW.—

(1) IN GENERAL.—The Secretary shall review annually all federally funded research and development activities carried out with respect to energy technology; and submit to a report to Congress by October 15 of each year.

(2) ASSESSMENT OF TECHNOLOGY READINESS AND BARRIERS TO DEPLOYMENT.—As part of this review, the Secretary shall—

(A) assess the status and readiness (including the potential commercialization) of each energy technology and any regulatory or market barriers to deployment;

(B) consider—

(i) the length of time it will take for deployment and use of the energy technology and for the technology to have a meaningful impact on emission reductions;

(ii) the cost of deploying the energy technology; and

(iii) the safety of the energy technology;

(C) assess the available resource base for any energy resources used by the energy technology, and the potential for expanded sustainable use of the resource base; and

(D) recommend to Congress any changes in law or regulation deemed appropriate by the Secretary to hasten deployment and use of the energy technology.

(b) ENERGY TECHNOLOGY RESEARCH AND DEVELOPMENT CLEARINGHOUSE.—The Secretary shall establish an information clearinghouse to facilitate the transfer and dissemination of the results of federally funded research and development activities being carried out on energy technology subject to any restrictions or safeguards established for national security or the protection of intellectual property rights (including trade secrets and confidential business information protected under section 552(b)(4) of title 5, United States Code).”

(c) TECHNICAL AMENDMENT.—The table of contents of the Energy Policy Act of 1992 (106 Stat. 2776) is amended by inserting after the item relating to section 1609 the following:

“Sec. 1610. Review of federally funded energy technology research and development.”

SEC. 9. OFFICE OF APPLIED ENERGY TECHNOLOGY AND GREENHOUSE GAS MANAGEMENT.

Section 1603 of the Energy Policy Act of 1992 (42 U.S.C. 13383) is amended to read as follows:

“SEC. 1603. OFFICE OF APPLIED ENERGY TECHNOLOGY AND GREENHOUSE GAS MANAGEMENT.

(a) ESTABLISHMENT.—There is established by this section in the Department of Energy an Office of Applied Energy Technology and Greenhouse Gas Management.

(b) FUNCTION.—The Office shall—

(1) establish appropriate quantitative performance and deployment goals for energy technologies that reduce, avoid, or sequester emissions of greenhouse gases, provided that such goals are consistent with any national climate change strategy;

(2) manage domestic and international energy technology demonstration and deployment programs for energy technologies that reduce, avoid or sequester emissions of greenhouse gases, including those authorized under this title; provided that such programs supplement and do not replace existing energy research and development activities within the Department;

(3) facilitate the development of domestic and international cooperative research and development agreements (as that term is defined in section 12(d)(1) of the Stevenson-Wylder Technology Innovation Act of 1980 (15 U.S.C. 3710a(d)(1))), or similar cooperative, cost-shared partnerships with non-Federal organizations to accelerate the rate of domestic and international demonstration and deployment of energy technologies that reduce, avoid or sequester emissions of greenhouse gases;

(4) conduct necessary programs of monitoring, experimentation, and analysis of the technological, scientific, and economic viability of energy technologies that reduce, avoid, or sequester greenhouse gas emissions; and

(5) coordinate issues, policies, and activities for the Department regarding climate change and related energy matters pursuant to this title, and coordinate the issuance of such reports as may be required under this title.

(c) **DIRECTOR.**—The Secretary shall appoint a director of the Office, who—

(1) shall report to the Secretary;

(2) shall be compensated at no less than level IV of the Executive Schedule; and

(3) at the request of the Committees of the Senate and House of Representatives with appropriation and legislative jurisdiction over programs and activities of the Department of Energy, shall report to Congress on the activities of the Office.

(d) **DUTIES.**—The Director shall, in addition to performing all functions necessary to carry out the functions of the Office—

(1) in the absence of the Secretary, serve as the Secretary's representative for inter-agency and multilateral policy discussions of global climate change, including the activities of the Committee on Earth and Environmental Sciences as established by the Global Change Research Act of 1990 (15 U.S.C. 2921 et seq.);

(2) participate, in cooperation with other federal agencies, in the development and monitoring of domestic and international policies for their effects on any kind of climate change globally and domestically and on the generation, reduction, avoidance, and sequestration of greenhouse gases;

(3) develop and implement a balanced, scientific, non-advocacy educational and informational public awareness program on—

(A) potential climate change, including any known adverse and beneficial effects on the United States and the economy of the United States and the world economy, taking into consideration whether those effects are known or expected to be temporary, long-term, or permanent;

(B) the role of national energy policy in the determination of current and future emissions of greenhouse gases, particularly measures that develop advanced energy technologies, improve energy efficiency, or expand the use of renewable energy or alternative fuels; and

(C) the development of voluntary means and measures to mitigate or minimize significant adverse effects of climate change and, where appropriate, to adapt, to the greatest extent practicable, to climate change.

(4) provide, consistent with applicable provisions of law, public access to all information on climate change, effects of climate change, and adaptation to climate change; and

(5) in accordance with all law administered by the Secretary and other applicable Federal law and contracts, including patent and intellectual property laws, and in furtherance of the United Nations Framework Convention on Climate Change—

(i) identify for, and transfer, deploy, diffuse, and apply to, Parties to such Convention, including the United States, any technologies, practices, or processes which reduce, avoid, or sequester emissions of greenhouse gases if such technologies, practices or processes have been developed with funding from the Department of Energy or any of its facilities or laboratories; and

(ii) support reasonable efforts by the Parties to such convention, including the United States, to identify and remove legal, trade, financial, and other barriers to the use and application of any technologies, practices, or processes which reduce, avoid, or sequester emissions of greenhouse gases.”.

SEC. 10. COORDINATION OF GLOBAL CHANGE RESEARCH.

(A) **DEFINITIONS.**—As used in this Section, the term—

(1) “Committee” means the Committee on Earth and Environmental Sciences estab-

lished under Section 102 of the Global Change Research Act of 1990 (15 U.S.C. 2933).

(2) “Program” means the United States Global Change Research Program established under Section 103 of the Global Change Research Act of 1990 (15 U.S.C. 2933).

(b) **COORDINATION OF CLIMATE OBSERVATION ACTIVITIES.**—At the direction of the Committee, the Director of the Program shall develop and implement activities within the Program that—

(1) coordinate system design and implementation and operation of a multi-user, multi-purpose long-term climate observing system for the measurement and monitoring of relevant climatic variables;

(2) carry out basic research, development and deployment of innovative scientific techniques and instruments (both in-situ and space-based) for measurement and monitoring of relevant climatic variables;

(3) coordinate Program activities to ensure the integrity and continuity of data records; including—

(i) calibration and inter-comparison of multiple instruments that measure the same climatic variable or set of variables;

(ii) backup instruments to ensure data record continuity; and

(iii) documentation of changes in instruments, observing practices, observing locations, sampling rates, processing algorithms and other changes;

(4) establish ongoing activities for the development, implementation, operation and management of climate-specific observational programs with special emphasis on activities that seek the most efficient and reliable means of observing the climate system;

(5) coordinate activities of the Program that contribute to the design, implementation, operation, and data management activities of international climate system observation networks; and

(6) establish and maintain a free and openly accessible national data management system for the storage, maintenance, and archival of climate observation data, with an emphasis on facilitating access to, use of and interpretation of such data by the scientific research community and the public.

(c) **COORDINATION OF CLIMATE MODELING ACTIVITIES.**—At the direction of the Committee, the Director of the Program shall develop and implement activities within the Program that—

(1) establish and periodically revise a national climate system modeling strategy designed to position the United States as a world leader in all aspects of climate system modeling;

(2) coordinate Program activities designed to carry out such a national climate system modeling strategy;

(3) carry out basic research, development and deployment of innovative computational techniques for climate system modeling;

(4) develop the intellectual and computational capacity to carry out climate system modeling activities to assess the potential consequences of climate change on the United States;

(5) carry out the continued development and inter-comparison of United States climate models with special emphasis on activities that—

(i) establish the ability of United States climate models to successfully reproduce the historical climate observational record;

(ii) incorporate new climate system processes or improve spatial temporal resolution of climate model simulations;

(iii) develop standardized tools and structures for climate model output, evaluation and programming design;

(iv) improve the accuracy and completeness of supporting data sets used to drive climate models; and

(v) reduce uncertainty in assessments of climate change and its impacts on the United States.

(6) coordinate activities of the Program that contribute to the design, implementation, operation, and data analysis activities of international climate system modeling inter-comparisons and assessments; and

(7) establish and maintain a free and openly accessible national data management system for the storage, maintenance, and archival of climate model code, auxiliary data, and results, with an emphasis on facilitating access to, use of and interpretation of such data by the scientific research community and the public.

(d) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated to carry out this section \$50,000,000 for each of fiscal years 2002 through 2004, to remain available until expended, and thereafter such sums as are necessary.

(e) **USE OF EXISTING INFRASTRUCTURE.**—In carry out new activities under subsections (b) and (c) of this section, the Program shall, where possible, use and incorporate existing Program activities and resources, such as Program Working Groups.

SA 2236. Mr. DOMENICI submitted an amendment intended to be proposed to amendment SA 2171 submitted by Mr. LOTT and intended to be proposed to the amendment SA 2170 proposed by Mr. DASCHLE to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place in the amendment, insert the following:

Subtitle —Price-Anderson Act
Reauthorization

SEC. 101. SHORT TITLE.

This subtitle may be cited as the “Price-Anderson Act Reauthorization Act of 2001”.

SEC. 102. INDEMNIFICATION AUTHORITY.

(a) **MULTIPLE REACTORS.**—Section 170 b. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(b)(1)) is amended by adding after the first proviso and before: “Such primary financial protection. . . .”: “And provided further, That for multiple modular reactors located at a single site, a combination of such reactors (irrespective of whether they are licensed jointly or singly) having a total rated capacity between 100,000 and 950,000 electrical kilowatts shall, exclusively and only for the purpose of this section, be denominated a single facility having a rated capacity of 100,000 electrical kilowatts or more.”

(b) **INDEMNIFICATION OF NRC LICENSEES.**—Section 170 c. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(c)) is amended by striking “August 1, 2002” each place it appears and inserting “August 1, 2012”.

(c) **INDEMNIFICATION OF DOE CONTRACTORS.**—Section 170 d.(1)(A) of the Atomic Energy Act of 1954 (42 U.S.C. 2210(d)(1)(A)) is amended by striking “, until August 1, 2002,”.

(d) **INDEMNIFICATION OF NONPROFIT EDUCATIONAL INSTITUTIONS.**—Section 170 k. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(k)) is amended by striking “August 1, 2002” each place it appears and inserting “August 1, 2012”.

SEC. 103. DOE LIABILITY LIMIT.

(a) **AGGREGATE LIABILITY LIMIT.**—Section 170 d. of the Atomic Energy Act of 1954 (42

U.S.C. 2210(d)) is amended by striking subsection (2) and inserting the following:

“(2) In agreements of indemnification entered into under paragraph (1), the Secretary—

“(A) may require the contractor to provide and maintain financial protection of such a type and in such amounts as the Secretary shall determine to be appropriate to cover public liability arising out of or in connection with the contractual activity; and

“(B) shall indemnify the persons indemnified against such claims above the amount of the financial protection required, in the amount of \$10,000,000,000 (subject to adjustment for inflation under subsection t.), in the aggregate, for all persons indemnified in connection with such contract and for each nuclear incident, including such legal costs of the contractor as are approved by the Secretary.”.

(b) **CONTRACT AMENDMENTS.**—Section 170 d. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(d)) is further amended by striking subsection (3) and inserting the following:

“(3) All agreements of indemnification under which the Department of Energy (or its predecessor agencies) may be required to indemnify any person, shall be deemed to be amended, on the date of the enactment of the Price-Anderson Amendments Act of 2001, to reflect the amount of indemnity for public liability and any applicable financial protection required of the contractor under this subsection on such date.”.

SEC. 104. INCIDENTS OUTSIDE THE UNITED STATES.

(a) **AMOUNT OF INDEMNIFICATION.**—Section 170 d.(5) of the Atomic Energy Act of 1954 (42 U.S.C. 2210(d)(5)) is amended by striking “\$100,000,000” and inserting “\$500,000,000”.

(b) **LIABILITY LIMIT.**—Section 170e.(4) of the Atomic Energy Act of 1954 (42 U.S.C. 2210(e)(4)) is amended by striking “\$100,000,000” and inserting “\$500,000,000”.

SEC. 105. REPORTS.

Section 170 p. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(p)) is amended by striking “August 1, 1998” and inserting “August 1, 2008”.

SEC. 106. INFLATION ADJUSTMENT.

Section 170 t. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(t)) is amended—

(a) by renumbering paragraph (2) as paragraph (3); and

(b) by adding after paragraph (1) the following new paragraph:

“(2) The Secretary shall adjust the amount of indemnification provided under an agreement of indemnification under subsection d. not less than once during each 5-year period following the date of the enactment of the Price-Anderson Amendments Act of 2001, in accordance with the aggregate percentage change in the Consumer Price Index since—

“(A) such date of enactment in the case of the first adjustment under this subsection; or

“(B) the previous adjustment under this subsection.”.

SEC. 107. CIVIL PENALTIES

(a) **REPEAL OF AUTOMATIC REMISSION.**—Section 234A b.(2) of the Atomic Energy Act of 1954 (42 U.S.C. 2282a(b)(2)) is amended by striking the last sentence.

(b) **LIMITATION FOR NONPROFIT INSTITUTIONS.**—Section 234A of the Atomic Energy Act of 1954 (42 U.S.C. 2282(a)) is further amended by striking subsection d. and inserting the following:

“d. Notwithstanding subsection a., no contractor, subcontractor, or supplier considered to be nonprofit under the Internal Revenue Code of 1954 shall be subject to a civil

penalty under this section in excess of the amount of the performance fee paid by the Secretary to such contractor, subcontractor, or supplier under the contract in the fiscal year under which the violation or violations occur.”.

SEC. 108. EFFECTIVE DATE.

(a) **IN GENERAL.**—The amendments made by this subtitle shall become effective on the date of the enactment of this subtitle.

(b) **INDEMNIFICATION PROVISIONS.**—The amendments made by sections 2103, 2104, and 2105 shall not apply to any nuclear incident occurring before the date of the enactment of this subtitle.

(c) **CIVIL PENALTY PROVISIONS.**—The amendments made by section 2108 to section 234A of the Atomic Energy Act of 1954 (42 U.S.C. 2281a(b)(2)) shall not apply to any violation occurring under a contract entered into before the date of the enactment of this subtitle.

SA 2237. Mr. DOMENICI submitted an amendment intended to be proposed to amendment SA 2171 submitted by Mr. LOTT and intended to be proposed to the amendment SA 2170 proposed by Mr. DASCHLE to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place in the Amendment, insert the following:

SEC. . OFFICE OF SPENT NUCLEAR FUEL RESEARCH.

(a) **FINDINGS.**—Congress finds that—

(1) before the Federal Government takes any irreversible action relating to the disposal of spent nuclear fuel, Congress must determine whether the spent fuel in the repository should be treated as waste subject to permanent burial or should be considered an energy resource that is needed to meet future energy requirements; and

(2) national policy on spent nuclear fuel may evolve with time as improved technologies for spent fuel are developed or as national energy needs evolve.

(b) **DEFINITIONS.**—In this section:

(1) **ASSOCIATE DIRECTOR.**—The term “Associate Director” means the Associate Director of the Office.

(2) **OFFICE.**—The term “Office” means the Office of Spent Nuclear Fuel Research within the Office of Nuclear Energy Science and Technology of the Department of Energy.

(c) **ESTABLISHMENT.**—There is established an Office of Spent Nuclear Fuel Research within the Office of Nuclear Energy Science and Technology of the Department of Energy.

(d) **HEAD OF OFFICE.**—The Office shall be headed by the Associate Director, who shall be a member of the Senior Executive Service appointed by the Director of the Office of Nuclear Energy Science and Technology, and compensated at a rate determined by applicable law.

(e) **DUTIES OF THE ASSOCIATE DIRECTOR.**—

(1) **IN GENERAL.**—The Associate Director shall be responsible for carrying out an integrated research, development, and demonstration program on technologies for treatment, recycling, and disposal of high-level nuclear radioactive waste and spent nuclear fuel, subject to the general supervision of the Secretary.

(2) **PARTICIPATION.**—The Associate Director shall coordinate the participation of national laboratories, universities, the commercial nuclear industry, and other organizations in the investigation of technologies

for the treatment, recycling, and disposal of spent nuclear fuel and high-level radioactive waste.

(3) **ACTIVITIES.**—The Associate Director shall—

(A) develop a research plan to provide recommendations by 2015;

(B) identify promising technologies for the treatment, recycling, and disposal of spent nuclear fuel and high-level radioactive waste;

(C) conduct research and development activities for promising technologies;

(D) ensure that all activities include as key objectives minimization of proliferation concerns and risk to the health of the general public or site workers, as well as development of cost-effective technologies;

(E) require research on both reactor- and accelerator-based transmutation systems;

(F) require research on advanced processing and separations;

(G) include participation of international collaborators in research efforts, and provide funding to a collaborator that brings unique capabilities not available in the United States if the country in which the collaborator is located is unable to provide for their support; and

(H) ensure that research efforts are coordinated with research on advanced fuel cycles and reactors conducted by the Office of Nuclear Energy Science and Technology.

(f) **GRANT AND CONTRACT AUTHORITY.**—The Secretary may make grants, or enter into contracts, for the purposes of the research projects and activities described in this section.

(g) **REPORT.**—The Associate Director shall annually submit to Congress a report on the activities and expenditures of the Office that describes the progress being made in achieving the objectives of this section.

SA 2238. Mr. DOMENICI submitted an amendment intended to be proposed to amendment SA 2171 submitted by Mr. LOTT and intended to be proposed to the amendment SA 2170 proposed by Mr. DASCHLE to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place in the Amendment, insert the following:

SEC. . UNIVERSITY NUCLEAR SCIENCE AND ENGINEERING SUPPORT.

(a) **ESTABLISHMENT.**—The Secretary shall support a program to maintain the nation's human resource investment and infrastructure in the nuclear sciences and engineering and related fields (including health physics and nuclear and radiochemistry), consistent with departmental missions related to civilian nuclear research and development.

(b) **DUTIES.**—In carrying out the program under this section, the Secretary shall—

(1) develop a graduate and undergraduate fellowship program to attract new and talented students;

(2) assist universities in recruiting and retaining new faculty in the nuclear sciences and engineering through a Junior Faculty Research Initiation Grant Program;

(3) support fundamental nuclear sciences and engineering research through the Nuclear Engineering Education Research Program;

(4) encourage collaborative nuclear research between industry, national laboratories and universities through the Nuclear Energy Research Initiative; and

(5) support communication and outreach related to nuclear science and engineering.

(c) MAINTAINING UNIVERSITY RESEARCH AND TRAINING REACTORS AND ASSOCIATED INFRASTRUCTURE.—Activities under this section may include:

(1) converting research reactors to low-enrichment fuels, upgrading operational instrumentation, and sharing of reactors among universities;

(2) providing technical assistance, in collaboration with the U.S. nuclear industry, in relicensing and upgrading training reactors as part of a student training program;

(3) providing funding for reactor improvements as part of a focused effort that emphasizes research, training, and education.

(d) UNIVERSITY-NATIONAL LABORATORY INTERACTIONS.—The Secretary shall develop—

(1) a sabbatical fellowship program for university professors to spend extended periods of time at National Laboratories in the areas of nuclear science and technology; and

(2) a visiting scientist program in which National Laboratory staff can spend time in academic nuclear science and engineering departments. The Secretary may provide for fellowships for students to spend time at National Laboratories in the area of nuclear science with a member of the Laboratory staff acting as a mentor.

(e) OPERATING AND MAINTENANCE COSTS.—Funding for a research project provided under this section may be used to offset a portion of the operating and maintenance costs of a university research reactor used in the research project, on a cost-shared basis with the university.

(f) AUTHORIZATION OF APPROPRIATIONS.—From amounts authorized under section 4401, the following amounts are authorized for activities under the section—

- (1) \$19,000,000 for fiscal year 2002;
- (2) \$33,000,000 for fiscal year 2003;
- (3) \$37,900,000 for fiscal year 2004;
- (4) \$43,600,000 for fiscal year 2005; and
- (5) \$50,100,000 for fiscal year 2006.

SA 2239. Mr. DOMENICI submitted an amendment intended to be proposed to amendment SA 2171 submitted by Mr. LOTT and intended to be proposed to the amendment SA 2170 proposed by Mr. DASCHLE to the bill (H.R. 10) to provide for pension reform, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place in the Amendment, insert the following:

SEC. . ADVANCED ACCELERATOR APPLICATIONS PROGRAM.

(a) ESTABLISHMENT OF PROGRAM.—The Secretary shall establish a program to be known as the “Advanced Accelerator Applications Program”.

(b) MISSION.—The mission of the program is research, development and demonstration of comprehensive spent fuel management strategies, which emphasize avoidance of proliferation issues and have minimal environmental impact, along with reasonable economic prospects that include efficient utilization of the energy resource of spent nuclear fuel and of repositories for the final waste products.

(c) GOALS.—The Office of Nuclear Energy, Science, and Technology of the Department of Energy, called the Office in this section, shall develop goals for the overall program that lead to final waste forms derived from spent nuclear fuel that significantly decrease the long-term toxicity to levels well below that of the original spent fuel. Secondary goals may be developed by the Office to efficiently utilize resources developed within this program, such as production of radio isotopes for medical applications and production of tritium for defense missions.

(d) ADMINISTRATION.—The program shall be administered by the Office—

(1) in consultation with the Office of Civilian Radioactive Waste Management, for all activities relating to the impact of waste transmutation on repository requirements of transmutation or reprocessing of spent fuel; and

(2) in consultation with the National Nuclear Security Administration, for any activities related to tritium production.

(e) PARTICIPATION.—The Office shall encourage participation of international collaborators, industrial partners, national laboratories, and universities.

(f) PROGRAM.—The Office shall pursue research, development and demonstration programs consistent with the goals of the program. The program shall include evaluation of strategies that involve combinations of current or innovative reactor designs and/or accelerator-driven facilities.

(g) FACILITIES.—The Program shall utilize existing facilities, either domestic or international, whenever possible, and develop plans as required for new facilities required to demonstrate key aspects of a final system.

(h) ADDITIONAL GOALS.—The Secretary is empowered to add additional goals to the program that increase the efficient utilization of the resources required for the primary mission. Production of tritium by accelerator-based systems may be one of these additional goals.

(i) AUTHORIZATION OF APPROPRIATIONS.—From amounts authorized under section 4401, there are authorized to be appropriated \$70,000,000 in fiscal year 2002 and such sums as are required in subsequent years.

PRIVILEGES OF THE FLOOR

Mr. HATCH. Mr. President, I request unanimous consent that Jim Byrne, a staff fellow in my office, be given privileges of the floor during the pendency of consideration of the Railroad Retirement bill, as well as the Defense Authorization bill, S. 1438, and the Defense Appropriations bill, H.R. 3338.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DORGAN. Mr. President, I ask unanimous consent that Mark Zaineddin, a fellow in my office from the U.S. Department of Commerce, be granted floor privileges for the day.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

**UNANIMOUS CONSENT REQUEST—
H.R. 2299**

Mr. REID. Mr. President, I ask unanimous consent that notwithstanding rule XXII, at 9:30 a.m., Tuesday, December 4, the Senate proceed to the conference report to accompany H.R. 2299, the Transportation appropriations bill; that the time be reduced to 60 minutes and divided as follows: 10 minutes each for the chair and ranking member of the subcommittee, Senator MURRAY and Senator SHELBY, as well as 10 minutes each for Senator DORGAN, Senator MCCAIN, and Senator GRAMM, and 5 minutes each for the chair and ranking member of the full committee; that the vote on adoption of the conference report occur on Tuesday at a time to be determined by the majority leader, following consultation with the Republican leader, without further intervening action.

The PRESIDING OFFICER. Without objection, it is so ordered.

**ORDERS FOR TUESDAY,
DECEMBER 4, 2001**

Mr. REID. Mr. President, I ask unanimous consent that when the Senate completes its business today, it adjourn until the hour of 9:30 a.m., Tuesday, December 4; that immediately following the prayer and the pledge, the Journal of proceedings be approved to date, the morning hour be deemed expired, the time for the two leaders be reserved for their use later in the day, and the Senate begin consideration of the Transportation appropriations conference report; further, that the Senate recess from 12:30 p.m. until 2:15 p.m. for the weekly party conferences, and that the time be charged against cloture on the Daschle substitute amendment, and that the time during the adjournment of the Senate also be charged against cloture.

The PRESIDING OFFICER. Without objection, it is so ordered.

**ADJOURNMENT UNTIL 9:30 A.M.
TOMORROW**

Mr. REID. Mr. President, if there is no further business to come before the Senate, I ask unanimous consent that the Senate stand in adjournment under the previous order.

There being no objection, the Senate, at 6:39 p.m., adjourned until Tuesday, December 4, 2001, at 9:30 a.m.

EXTENSIONS OF REMARKS

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Meetings scheduled for Tuesday, December 4, 2001 may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

DECEMBER 5

9 a.m.

Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee

To hold hearings to examine the response of the technology sector in times of crisis, focusing on the successes and failures in the aftermath of the events of September 11, 2001.

SR-253

9:30 a.m.

Energy and Natural Resources

To hold hearings on the nomination of Margaret S.Y. Chu, of New Mexico, to be Director of the Office of Civilian Radioactive Waste Management, and the nomination of Beverly Cook, of Idaho, to be Assistant Secretary for Environment, Safety and Health, both of the Department of Energy; and the nomination of Jeffrey D. Jarrett, of Pennsylvania, to be Director of the Office of Surface Mining Reclamation and Enforcement, and the nomination of Rebecca W. Watson, of Montana, to be Assistant Secretary for Land and Minerals Management, both of the Department of the Interior.

SD-366

Appropriations

Treasury and General Government Subcommittee

To hold hearings to examine United States northern border security policy.

SD-192

10 a.m.

Judiciary

To hold hearings to examine the nominations of Callie V. Granade, to be United

States District Judge for the Southern District of Alabama, Marcia S. Krieger, to be United States District Judge for the District of Colorado, James C. Mahan, to be United States District Judge for the District of Nevada, Philip R. Martinez, to be United States District Judge for the Western District of Texas, C. Ashley Royal, to be United States District Judge for the Middle District of Georgia, and Mauricio J. Tamargo, of Florida, to be Chairman of the Foreign Claims Settlement Commission of the United States, Department of Justice.

SD-226

1:30 p.m.

Judiciary

Crime and Drugs Subcommittee

To hold hearings to examine the future of the community oriented policing services program of the Department of Justice.

SD-226

2 p.m.

Conferees

Closed meeting of conferees on H.R.2883, to authorize appropriations for fiscal year 2002 for intelligence and intelligence-related activities of the United States Government, the Community Management Account, and the Central Intelligence Agency Retirement and Disability System.

S-407 Capitol

DECEMBER 6

9:30 a.m.

Governmental Affairs

To hold hearings to assess the vulnerability of United States seaports and whether the Federal Government is adequately structured to safeguard them.

SD-342

Energy and Natural Resources

To hold hearings to examine negotiations for renewing the Compact of Free Association.

SD-366

10 a.m.

Commerce, Science, and Transportation

To hold hearings to examine the corporate average fuel economy.

SR-253

Banking, Housing, and Urban Affairs

To hold hearings to examine the nomination of J. Joseph Grandmaison, of New Hampshire, to be a Member of the Board of Directors of the Export-Import Bank of the United States; and the nomination of Kenneth M. Donohue, Sr., of Virginia, to be Inspector General, Department of Housing and Urban Development.

SD-538

Judiciary

To resume oversight hearings to examine the Department of the Judiciary, focusing on how to preserve freedoms while defending against terrorism.

SD-106

10:30 a.m.

Foreign Relations

To hold hearings to examine the political future of Afghanistan.

SD-419

2 p.m.

Commission on Security and Cooperation in Europe

To hold hearings to examine the state of human rights, democracy and security concerns in Kyrgyzstan, focusing on human rights and democracy in the Central Asian region.

334 Cannon Building.

2:30 p.m.

Commerce, Science, and Transportation

To hold hearings on the nomination of Jeffrey Shane, of the District of Columbia, to be Associate Deputy Secretary, and the nomination of Emil H. Frankel, of Connecticut, to be Assistant Secretary of Transportation Policy, both of the Department of Transportation.

SR-253

DECEMBER 7

9:30 a.m.

Commerce, Science, and Transportation

To hold hearings on the nomination of Sean O'Keefe, of New York, to be Administrator of the National Aeronautics and Space Administration.

SR-253

DECEMBER 10

10 a.m.

Judiciary

To hold hearings on the nomination of David L. Bunning, to be United States District Judge for the Eastern District of Kentucky.

SD-226

DECEMBER 13

9:30 a.m.

Governmental Affairs

To hold hearings to examine security of the passenger and transit rail infrastructure.

SD-342

POSTPONEMENTS

DECEMBER 5

9:30 a.m.

Governmental Affairs

To hold hearings to examine the local role in homeland security.

SD-342

2:30 p.m.

Foreign Relations

Central Asia and South Caucasus Subcommittee

To hold hearings to examine contributions of Central Asian nations to the campaign against terrorism.

SD-419

SENATE—Tuesday, December 4, 2001

The Senate met at 9:30 a.m. and was called to order by the Honorable DEBBIE STABENOW, a Senator from the State of Michigan.

PRAYER

The Chaplain, Dr. Lloyd John Ogilvie, offered the following prayer:

Almighty God, on this day designated by Congress to be a Day of Reconciliation, we confess anything which stands between us and You and between us and anyone else. We long to be in a right relationship with You again. We know the love, joy, and peace that floods our being when we are reconciled with You. We become riverbeds for the flow of the supernatural gifts of leadership: wisdom, knowledge, discernment, vision, and authentic charisma. We confess our pride that estranges us from You and our judgmentalism that strains our relationships. Forgive our cutting words and hurting attitudes toward other religions or races and people with different beliefs, political preferences, or convictions on issues. So often we are divided into camps of liberal and conservative, Republican and Democrat, and are critical of those with whom we disagree. Help us to express to each other the grace we have received in being reconciled to You. May our efforts to reach out to each other be a way of telling You how much we love You. You are our Lord and Saviour. Amen.

PLEDGE OF ALLEGIANCE

The Honorable DEBBIE STABENOW led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. BYRD).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, December 4, 2001.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable DEBBIE STABENOW, a Senator from the State of Michigan, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Ms. STABENOW thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE ACTING MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The acting majority leader is recognized.

The ACTING PRESIDENT pro tempore. The Senator from Nevada.

SCHEDULE

Mr. REID. Madam President, this morning the Senate will consider the Transportation conference report under a 60-minute time agreement. A vote on the conference report will occur today. At approximately 10:30, the Senate will resume consideration of the Railroad Retirement Act with the Daschle substitute amendment pending under postcloture conditions. There will be rollcall votes on amendments to the Railroad Retirement Act during today's session.

The Senate will recess from 12:30 to 2:15 p.m. for the weekly party conferences.

On behalf of the majority leader, I have been asked to tell everyone we appreciate the cooperation yesterday. We are moving along on the legislation. There are just a few things left we have to do before we leave for the Christmas break.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATIONS ACT, 2002—CONFERENCE REPORT

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now proceed to the consideration of the conference report accompanying H.R. 2299, which the clerk will report.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 2299) "making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 2002, and for other purposes," having met, have agreed that the House recede from its disagreement to the amendment of the Senate and the House agree to the same, with an amendment, and the Senate agree to the same, signed by a majority of the conferees on the part of both Houses.

The ACTING PRESIDENT pro tempore. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD on November 29, 2001.)

The ACTING PRESIDENT pro tempore. Under a previous order, there will now be 60 minutes for debate.

The Senator from Washington.

Mrs. MURRAY. Madam President, I rise to bring before the Senate the conference report accompanying the Transportation appropriations bill for fiscal year 2002.

This conference agreement represents many weeks of negotiations with the House and the administration, and I am proud of the progress it will bring to our Nation's transportation system.

This conference agreement has already passed the House by an overwhelming margin of 371-11.

In total, the bill includes appropriations and obligation limitations totaling roughly \$59.6 billion.

While that is about \$1.5 billion more than the fiscal year 2001 level, it is approximately \$400 million less than the amount passed by the Senate on August 1.

It was very difficult to pare \$400 million out of the Senate bill, but we did so while carefully looking out for the needs of all of the critical agencies within the Department of Transportation as well as the Members' individual priorities.

The conference agreement provides funding levels that are equal to or higher than the operating accounts for agencies such as the Coast Guard, the FAA, and the National Highway Traffic Safety Administration.

Several important safety initiatives—that were included in the Senate bill—have been maintained, including: the hiring of new aviation safety and security inspectors, improvements to the Coast Guard's struggling search and rescue mission, and additional funding to increase seat belt use across the nation.

The bill before us also includes a full \$1.25 billion in funding to launch the transportation security act, which is the aviation security bill that was enacted just a few days ago.

The act required that the revenues from its user fees be appropriated before becoming available.

The security act includes many strict deadlines for the improvement of our aviation security system.

And we expect the DOT to meet those deadlines.

That is why we worked hard to get the \$1.25 billion in user fees into the hands of the Transportation Secretary in this bill as soon as possible—rather than wait for the Defense supplemental.

For highways, our bill includes \$100 million more than the amount guaranteed under TEA-21.

The bill also fully funds the levels authorized under AIR-21 for the FAA's air traffic control improvements and airport grants.

When the Senate considered this bill, we spent a lot of time debating the safety of Mexican trucks entering the United States.

While the conference agreement provides the administration flexibility in implementation, it carefully follows the safety provisions of the bill that passed the Senate in August.

The safety requirements in this bill are considerably stronger than anything the administration had proposed, and anything that was presented to the Senate as an alternative during our debate this past summer.

Let me mention quickly just a few of the safety provisions in the bill.

Licenses will be checked for every driver transporting hazardous materials and for at least half of all other Mexican truck drivers every time they cross the border.

Mexican trucks will undergo rigorous inspections before they are allowed full access to our highways, and they will be reinspected every 90 days.

And trucking firms will need to demonstrate that they have a drug and alcohol testing program, proof of insurance, and drivers who have clean driving records before the first truck crosses the border.

There are many people to thank for their contributions to this bill.

The former chairman of the subcommittee and now its ranking member, Senator SHELBY has been a stalwart ally and regular contributor to our efforts.

Congressman ROGERS, the chairman of the House subcommittee is not only an outstanding chairman, he is a true Kentucky gentleman as well.

I also want to thank Representative SABO of Minnesota, the ranking member of the House subcommittee, whose leadership on the Mexican truck issue was essential to our getting an outstanding safety regimen in place.

As always, I thank Senator BYRD and Senator STEVENS for their assistance throughout the process.

I also thank the House and Senate Appropriations subcommittee staffs—along with some members of my personal staff who have worked a great many hours to bring together this conference agreement, including:

On the Senate subcommittee on Transportation appropriations, for the majority: Peter Rogoff, Kate Hallahan, Cynthia Stowe, and Angela Lee;

For the minority: Wally Burnett, Paul Doerrer, and Candice Rogers,

On the House subcommittee on Transportation appropriations, for the majority: Rich Efford, Stephanie Gupta, Cheryle Tucker, Linda Muir, and Theresa Kohler;

For the minority: Bev Pheto;

On the chairman personal staff, Rich Desimone and Dale Learn;

On the Senate Commerce, Science, and Transportation Committee, Debbie Hersman.

I thank all these people who spent a lot of time helping us to get to this point. I reserve the remainder of my time.

The ACTING PRESIDENT pro tempore, The Senator from Alabama.

Mr. SHELBY. Madam President, I yield myself as much time as I consume.

I rise in support of the fiscal year 2002 Transportation appropriations conference report before the Senate this morning. While I do not support every item, policy, program, or initiative in the conference report or statement of managers, I do support the package reported overwhelmingly from the conference committee and as just described by the Senator from Washington.

This is the first year the Senator from Washington is chair of the Transportation Appropriations Subcommittee, and I believe that she has accounted herself well on this bill. This is a balanced bill.

Clearly, the Mexican truck issue reflects that balanced approach. I believe that the Senator from Washington did an admirable job of managing this issue through a lengthy debate on the Senate floor and through the conference committee negotiations with the House and the administration.

The resolution of the Mexican truck issue allows for the safe opening of the border to Mexican trucks with appropriate inspections, oversight, and audits of Mexican-domiciled trucks and trucking companies. This compromise kept the focus on truck safety and security at our border and never lost sight of the need to work with the administration and the House to forge a workable solution.

Our approach on this issue was always to move the debate forward and allow a resolution based on safety standards rather than prohibiting any action by the department to manage the truck safety issues we face at our southern border. I think the conference report treatment of this matter meets that test.

The FAA, the Coast Guard, and the Department's new Transportation Security Agency are all adequately, if not generously, funded in this bill. The funding levels match the AIR 21 levels for the FAA's two capital accounts, and the funding for FAA operations meets the President's budget request.

Accordingly, the conference report meets the TEA 21 transit funding levels and increases the obligation limitation for highways above the TEA 21 firewalled levels. This funding commitment recognizes the priorities our colleagues in the Senate place on these accounts.

This is not only the first year of the Senator from Washington as the chair of this subcommittee, it is also the first year that Peter Rogoff has assisted her on the bill as the majority clerk. The committee and the Senator from Washington were both well served by Peter Rogoff—and his staff, Kate Hallahan, and Coast Guard Commander Cyndi Stowe.

I also commend Wally Burnett and Paul Doerrer of my staff on the committee. They worked hand in hand with the Democrats. I believe that is why we are where we are today, on the verge of adopting this conference report.

I urge all of my colleagues to support the conference report and send it to the President for his signature, with the type of overwhelming margin we saw in the other body of a 371-to-11 vote on the adoption of this report.

I reserve the remainder of my time and yield the floor.

Mr. BYRD. Mr. President, the Senate has now turned to consideration of the conference report accompanying the Transportation and Related Agencies Appropriations Act for Fiscal Year 2002. The bill includes a combination of appropriations and obligation limitations totaling \$59.643 billion. That is \$1.526 billion or 2.6 percent higher than the level provided for fiscal year 2001.

This is the ninth of the thirteen appropriations conference reports to come before the Senate. It is the ninth conference report that is within its 302 (B) allocation and it is fully consistent with the \$686 billion bipartisan budget agreement on discretionary spending for the thirteen bills.

When the President signed the Transportation Equity Act for the 21st Century, he placed into law a provision I and my colleague from Texas, Senator GRAMM, championed here in the Senate. That provision served to guarantee that we appropriate every year on our Nation's highway system the funds that are received into the Highway Trust Fund through fuel taxes at the pump. I'm pleased to say that this year's Transportation bill, like every Transportation bill enacted since TEA-21, honors that commitment. Indeed, this year, for the first time since 1998, the Transportation bill provides more money for highways than was assumed in the highway guarantee—\$100 million more. This is made possible since we still have an unobligated balance in the trust fund that existed before TEA-21 was enacted. So I commend the managers of the bill, Senators MURRAY and SHELBY, for making this significant investment in our Nation's highway infrastructure which is very much in

need of repair, restoration, and expansion.

As long as I have had the pleasure of serving on the Transportation Subcommittee, it has always operated in an open and bipartisan manner. I am pleased to see that this tradition has continued under the leadership of Senator MURRAY. She and Senator SHELBY have cooperated on all aspects of this bill. Both of them were required to take on the very contentious issue regarding the safety risks of Mexican trucks traveling on our highways. We debated that issue for several days here in the Senate and took a total of three cloture votes during that debate. Senators MURRAY and SHELBY stood their ground on the floor of the Senate and they prevailed. They then went to conference and negotiated a compromise with the House that maintains the strong safety requirements passed by the Senate but eliminates the threat of a veto against this bill.

I commend both managers and their respective staffs for a job well done and I encourage all members to support the conference report.

Mr. BAUCUS. Mr. President, I rise today to voice my concern regarding an element on the Fiscal Year 2002 Transportation Appropriation Conference Report. While I believe that this report, for the most part, spends funding according to statute and aids our Nation's transportation system, I am very concerned about the distribution of a major funding category.

The Transportation Equity Act for the 21st Century, TEA 21, was passed by the Congress in 1998 by overwhelming margins. For the first time receipts into the Highway Trust Fund were guaranteed to be spent for transportation purposes. This is accomplished through the annual calculation of Revenue Aligned Budget Authority, RABA, which makes adjustments in obligations to compensate for actual receipts into the Trust Fund versus the estimated authorization included in TEA 21 for the fiscal year.

While I am pleased that the Appropriations Committee has upheld the firewalls in this conference report, I find the redistribution of RABA funds to be unacceptable. Under TEA 21, RABA funds are to be distributed proportionately to the States through formula apportionments and also to allocated programs. This conference report is a radical departure from that and is a cause for great concern. States receive less money in this conference report than is called for under TEA 21. For that reason, this conference report is in violation of TEA 21.

I am dismayed to have to voice my concern regarding an otherwise beneficial transportation bill. However, as an author of TEA 21 and a believer in its principles, I am saddened to see TEA 21 violated at the expense of the States.

Mr. SMITH of New Hampshire. Mr. President, I rise to speak about the transportation appropriations conference report.

First, I wish to commend the Appropriations Committee members for their determination to protect our highways from unsafe Mexican trucks.

I am not eager for trucks to freely cross from Mexico into the United States, for many reasons, but I am pleased that these trucks will at least be required to pass a safety compliance review.

The remainder of my comments have to do with the portion of the conference report that funds the Federal-aid highway program.

As the ranking member of the Environment and Public Works Committee, with authorizing jurisdiction over the highway program, I am pleased with the overall funding level for Federal-aid highways.

As my colleagues will recall, one of the major accomplishments of TEA-21, passed by Congress in 1998, was that for the first time, gas tax revenues into the Highway Trust Funds were guaranteed to be promptly returned to the States for transportation spending.

This guarantee is accomplished with a provision in TEA-21 called Revenue Aligned Budget Authority, or RABA as it is known.

RABA calculations compare actual gas tax receipts to our 1998 estimates, and guaranteed funding will go up or down depending on whether we have more or less revenue in the Highway Trust Fund than TEA-21 anticipated.

Reflecting several years of a strong economy, gas tax receipts have been billions of dollars more than we anticipated in 1998.

This year, as guaranteed by TEA-21, the Federal-aid highway program is funded at almost \$33 billion (\$32.954 billion); an increase of about \$1.2 billion over last year; which includes \$4.5 billion from RABA funds.

As I said, I am pleased with the success of these funding guarantees.

But I am concerned about the diversion of over \$1.5 billion to project earmarks instead of being distributed fairly under formulas developed in TEA-21.

There are 590 project earmarks from the Highway Trust Fund, and 55 more highway projects taken from the general fund.

I want to alert my colleagues to such extensive earmarking contained in this appropriations report.

This earmarking is mostly within discretionary programs created in TEA-21 and mostly funded with the RABA funds.

Almost a billion dollars in RABA funds are diverted away from the fair distribution that we agreed to in TEA-21, and are used for earmarks in this conference report.

This money does not get distributed evenly as authorized in TEA-21, but there are winners and losers.

Some States get a lot of this money for projects, some get very little.

This process completely distorts the funding formulas we agreed to in TEA-21.

It also distorts the discretionary programs we created in TEA-21 for projects that meet specified criteria.

For instance, one pilot program we created to fund local projects that link transportation and community needs, for instance, was authorized in TEA-21 at \$25 million per year.

This year, that program has become the catch-all for project earmarks, with a total of 219 projects at a cost of \$276 million.

This is incredible that a small discretionary program has grown to an earmarking account at over 10 times the authorized amount.

The Appropriations Committee began earmarking these TEA-21 accounts a few years ago, over strong objections from the authorizing committees, and the practice has grown exponentially each year.

Indeed, the Appropriations Committee has begun the practice of soliciting project requests, creating a terrible dilemma where the number of projects that Members submit far exceed any authorized amounts.

And now Members have no choice but to compete for these discretionary funds in the appropriations process.

I admit to requesting projects for my State that received funding only because the pot of money grew so large, again from \$25 million to \$276 million.

The Appropriations Committee has gone further now than in recent years toward making so many transportation project funding decisions.

I believe strongly that State and local agencies are responsible for transportation planning and funding decisions.

I much prefer to send Highway Trust Fund dollars back to the States and I do not think Congress should pick and choose projects.

Where any fault for this situation rests with the framework in TEA-21, we will address it in the reauthorization of TEA-21.

Next year the Environment and Public Works Committee will begin hearings on reauthorization, and I know that there is a lot of concern about this earmarking process.

I will vote in favor of this conference report for the good it contains, but I am compelled to register my strong objections to the hundreds of highway projects that do not belong in an appropriations bill.

Mr. SARBANES. Mr. President, I want to take a moment while the transportation appropriations conference report is pending before us to express my concern, as chairman of the Senate Banking Committee, which has jurisdiction over the Federal transit laws, about a provision in that report

that attempts by report language to re-write established law by reducing the Federal match for New Start transit projects from 80 percent to 60 percent. I am referring to language in the conference report that would "direct [the Federal Transit Administration] not to sign any new full funding grant agreements after September 30, 2002 that have a maximum federal share of higher than 60 percent." The Senate Banking Committee will begin to consider transit reauthorization issues next year. In the meantime, we have not had the benefit of any hearings or other public debate on this issue that would justify such report language.

Over 200 communities around the country, in urban, suburban, and rural areas, are considering light rail or other fixed guideway transit investments to meet their growing transportation needs. Recognizing this increasing demand, Congress in 1998 passed the Transportation Equity Act for the 21st Century, which authorized almost \$8.2 billion over 6 years to fund these New Starts projects.

The process for evaluating and awarding a Federal grant under the New Starts program is laid out in the Federal transit laws, found in section 5309 of Title 49, United States Code. Section 5309(h) specifies that "[a Federal] grant for [a New Starts] project is for 80 percent of the net project cost, unless the grant recipient requests a lower grant percentage." By including language in the conference report—not in the statute—directing the FTA not to sign new full funding grant agreements after September 30, 2002 with a Federal share greater than 60 percent, the conferees are seeking to direct the FTA to act contrary to existing law.

Efforts to alter the Federal share would disrupt the level playing field established when the Intermodal Surface Transportation Efficiency Act—ISTEA—set forth the 80 percent Federal cap for both highway and transit projects. ISTEA created a funding system by which communities could choose between transportation modes based on local needs, not based on the amount of Federal money available for the project. Seeking to lower the Federal match for transit projects while keeping the available highway match at 80 percent has the potential to skew the dynamics of choice for local communities.

It is true that there is very strong demand for New Starts funding. This is an issue which will be thoroughly considered as the transit laws are reauthorized in less than two years' time. Given the importance of the New Starts program to communities around the country, any proposal for dealing with this issue should be thoroughly considered. Report language directions to the FTA to act contrary to existing law are not a constructive contribution to this thorough consideration.

BUS REPLACEMENT

Mr. HARKIN. Mr. President, the conference report indicates that \$5 million is provided for bus replacement in Iowa. But, it is my understanding that the intent was to allow these funds which have been allocated in a collaborative process involving the Iowa DOT and the local transit authorities to be used for bus replacement, bus expansion and for facility and equipment costs.

Mrs. MURRAY. Mr. President, the Senator from Iowa is correct regarding the allocation of these funds. The intention is that the funds may be used for the authorized purposes that you noted.

FUNDING OF TRANSPORTATION SECURITY IMPROVEMENT MEASURES

Mr. LIEBERMAN. I say to Senator MURRAY, I would like to confirm my understanding that between the funding you have included in the conference report for the Transportation Security Administration and the funding included in the bill for the Federal Aviation Administration's research, engineering and development, there are sufficient funds for the expanded use of existing technology and research and development of new technology to improve aviation security. Is that correct?

Mrs. MURRAY. The Senator is correct. The funds appropriated are intended to cover those costs.

PAYMENT FOR WORK PERFORMED

Mrs. HUTCHISON. Mr. President, regarding this week's Senate passage of the fiscal year 2002 Transportation appropriations conference report, Senator DURBIN and I have recently become aware that several of the major contractors on the Tren Urbano project have substantial disputes outstanding with Puerto Rico concerning payment for work performed on the project. I find this troubling given the extent of oversight we have come to expect of major transit projects like this one.

Mr. DURBIN. I certainly agree with Senator HUTCHISON. It is indeed important that these transit projects be managed efficiently, and preferably without dispute; otherwise, these projects are viewed by the contracting community as more risky, and thus they become more costly to deliver, to the detriment of the taxpayers who ultimately bear the financial burden of these projects.

Mrs. HUTCHISON. I understand that the FTA is currently withholding approximately \$165M of funding for the Tren Urbano Project, and has required a more accurate cost estimate and schedule for the Project than has been previously furnished.

Mr. DURBIN. I want to encourage FTA to release only such funds as it considers appropriate in order to resolve outstanding disputes with respect to payment for work performed on the Tren Urbano project, and suspend all further Federal funding for the project.

Mrs. HUTCHISON. I concur with the Senator and, if such disputes have not been resolved by March 1, 2002, would further request that the Inspector General promptly report back to the House and Senate Committees on Appropriations on FTA's assessment of (i) The reasons why such disputes remain unresolved, (ii) the cost impact of such disputes, and (iii) the IG's recommendation, if appropriate, for a more cost effective dispute resolution process.

The ACTING PRESIDENT pro tempore. Who yields time?

Mr. SHELBY. Madam President, I suggest the absence of a quorum.

Mrs. MURRAY addressed the Chair.

The PRESIDING OFFICER. The Senator will withhold.

Mrs. MURRAY. I ask the Senator to ask the time be equally divided and request he retain the remainder of the time of the chairman and ranking member toward the end.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. REID. Madam President, I ask unanimous consent the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. REID. Madam President, for the information of all Members, the majority leader has indicated that the vote on this matter will occur at 12:30 today.

I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. Without objection, the quorum call will be charged as previously specified.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DORGAN. Madam President, I ask unanimous consent the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. DORGAN. Madam President, how much time am I allowed?

The ACTING PRESIDENT pro tempore. The Senator has 8 minutes.

Mr. DORGAN. Madam President, I shall not take all 8 minutes. I understand there is a long line of people wishing to speak on this conference report later.

First of all, I compliment the chairman and ranking member from the Senate side. I think they have done an extraordinary job on the conference report. I appreciate the work they have done on a range of issues. I think the Senate owes them a debt of gratitude.

I could spend some long period of time talking about the important provisions in this Transportation conference report. I know it took a long

while to get to this point. Senator MURRAY, chairing the subcommittee on the Senate side, and others who have worked on this bill for some length of time undoubtedly wish this had been completed much earlier, but there were a series of things that prevented it from happening. In any event, at the end of this session we have a conference report that contains a lot of important items for this country's transportation system. I compliment Senator SHELBY and Senator MURRAY and thank them for their work.

I do want to say—and I will say it briefly—there are two items in the conference report that provide some heartburn for me. The conference was required—or forced, I guess—to accept a provision dealing with the spending of \$400,000 to put airport signs up that describe National Airport really as Reagan National Airport. This conference report, because the House insisted, requires the Metro Airport Authority to spend \$400,000 changing signs so that people will not be confused that they are at the airport when, in fact, the signs now say “National Airport.”

George Will had a little something to say about that in a piece in April of this year. He said:

Travelers too oblivious to know they are at an airport, when large, clear signs say they are, should be given those little plastic pilot wings that are issued to unaccompanied children taken into protective custody. The conservatives want to get Congress to order Metro officials to spend several thousand dollars to add Reagan's name to the station signs and all references to the station on the maps.

He is talking about the station at the Metro stop.

He said:

Reagan had a memorable thing or two to say about bossy Federal institutions meddling in local affairs.

I want to make the point that the House of Representatives has insisted on this for some long while. I regret they forced their will into this conference. I think it is a waste of \$400,000 that probably could have better been used, if the House had thought clearly about this, for security.

We have a range of security needs, given post-September 11, on a range of transportation systems. I would have much rather seen, if the \$400,000 is to be spent, that it be spent on Metro security. I know the Senators from Washington and Alabama share my concern about that.

Let me make one additional point, and that is on the issue of Mexican trucks. The House of Representatives had a provision that actually prohibited the Mexican trucks from coming into this country beyond the 20-mile limit. The Senate provision was not as strong but was a pretty good provision. I would have preferred a stronger provision. The provision that came out of conference is weaker than both.

I understand the work that Senator MURRAY and Senator SHELBY did. I am not here to criticize their work. I respect the work they did in conference to try to resolve this issue. They make the point—and it is an accurate point—that this is a restriction on funding for 1 year during the appropriations year. So this issue will not be concluded with this judgment in this conference committee. This issue will be a part of the interests of the authorizing committee, oversight by this subcommittee, and also will be a part of the interest of others of us in the Congress who still believe it will be unsafe to have any wholesale movement of Mexican trucks beyond the 20-mile border limit.

It is interesting to me that we now have a limitation on the movement of Mexican trucks in this country, and yet Mexican truck drivers with Mexican trucks have been apprehended in North Dakota, which, of course, is significantly beyond the 20-mile limit from the Mexican border. And it is true they have been apprehended in a good many other States as well.

We have a lot of difficulties, problems, and concerns trying to merge two different kinds of economies with respect to transportation, two different kinds of systems dealing with short- and long-haul trucks, and two different safety standards, different standards with respect to both drivers and trucks.

I wish we had in fact had the House position, which originally came to conference with a prohibition until adequate safety standards were in place and adequate inspection opportunities were in place. That, regrettably, is not the case. And I am not here to suggest that our two Senators—Senator MURRAY and Senator SHELBY—in any way weakened this provision. I am here to say the conference itself forced that weakening. I think that will not and cannot be the last word on this subject. Those on the authorizing committee and those of us who will return to this subject in the appropriations process next year will have more to say.

But having spoken on both of those issues, let me again say to my colleague, Senator MURRAY, and my colleague, Senator SHELBY, they operate in good faith and do an extraordinary job. They run a subcommittee that is very important to this country, especially again in relation to post-September 11, the issue of transportation, the security of our transportation systems in the country.

Our transportation industry is so important to this country's economy. There is no way you can overstate it. The appropriations bill offered to us today by Senators MURRAY and SHELBY is an appropriations bill that I think the Senate will want to approve. This conference report will get the Senate's approval today.

Madam President, I yield the floor and suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. If the Senator will withhold, the Chair recognizes the Senator from Washington.

Mrs. MURRAY. Madam President, I ask unanimous consent the time be divided as before.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MCCAIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. CARPER). Without objection, it is so ordered.

Mr. MCCAIN. Mr. President, I understand under the UC I have 15 minutes; is that correct?

The PRESIDING OFFICER. The time has been reduced by a series of quorum calls. The Senator has 6 minutes.

Mr. MCCAIN. Six minutes. Mr. President, I ask unanimous consent I be granted 4 additional minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MCCAIN. Mr. President, I wish to express my strong opposition to the conference agreement on H.R. 2299, the fiscal year 2002 Transportation appropriations bill approved by the House and Senate conferees last week.

I once again find myself in a position in which I must express strong concerns with yet another appropriations bill. This measure, like the eight appropriations bills approved by the Congress this year and like so often has been the case during recent years, continues what I believe is an inappropriate overreach by the appropriators in an effort to fulfill their own agendas at the expense of both current law and the work of the authorizers.

They again are redirecting programmatic funding, funding that in many cases is authorized to be distributed by formula or at the discretion of the Secretary and based on competitive merit.

Instead of allowing the normal funding distribution process to go forward, the appropriators have earmarked that funding for pet projects for the members of the Appropriations Committee.

Before citing a host of examples of the pork barrel spending associated with this conference report, I want to first address the very important trade issue that the appropriators have tied to the pending measure, that is, the North American Free Trade Agreement, NAFTA.

As my colleagues well know, provisions in both the House and the Senate versions of the Transportation appropriations bill proposed to restrict the administration's ability to abide by our obligations under NAFTA. As a result of this fact, the Statement of Administrative Policy included a very

clear and direct veto threat stating that "the Senate Committee has adopted provisions that could cause the United States to violate our commitments under NAFTA. Unless changes are made to the Senate bill, the President's senior advisors will recommend that the President veto the bill."

Several of us also strongly objected to the appropriators' actions. As a result, we spent considerable floor time—nearly two full weeks in July—discussing the importance of NAFTA and our obligation to abide by our commitments to our trading partners.

At no time has the senior Senator from Texas or I argued that safety concerns were not of considerable importance in this debate. In fact, it was our proposal offered as an alternative to the Senate version that first called for an inspection of every Mexican truck similar to the model used in the State of California at the border.

Indeed, the proponents of NAFTA have had one goal since this issue surfaced in the DOT appropriations legislation this summer. From the beginning, our goal has been to ensure the appropriators did not succeed in their attempts through the DOT appropriations bill to effectively alter our solemn agreement with our neighbors to the South. If our trading partners are subject to the whimsical mood of the appropriators, how can we ever expect any nation that we have executed a trade agreement with, or one we are seeking to enter into trade agreements with, to have any faith that our word is true and we will abide by our agreements? If the appropriators' agenda had prevailed, I shudder to consider the consequences and the impact as we attempted to seek to negotiate new trade agreements or renewed ones.

After receiving assurances from the ranking member of the Appropriations Committee that he would work with the administration to ensure the conference agreement would not include any provisions that would prevent use from abiding by our NAFTA commitments, the senior Senator from Texas and I agreed to forgo some of our procedural rights and allowed the bill to go to conference without several additional votes and the expenditure of additional floor time. While early into the conference the Senate managers of the bill issued a release indicating a determination to provoke a Presidential veto, the appropriators finally agreed last week to incorporate provisions agreeable to the administration.

Upon hearing of the agreement with respect to Mexican trucks last week, I raised reservations over some of the provisions that I felt could be troublesome. However, in response to these concerns, the administration has assured us the agreement is not in violation of NAFTA. Last Friday, November 30, the White House issued the following statement of the President:

The compromise reached by the House and Senate appropriators on Mexican trucking is an important victory for safety and free trade. We must promote the highest level of safety and security on American highways while meeting our commitments to our friends to the South. The compromise reached by the conferees will achieve these twin objectives by permitting our border to be opened in a timely manner and ensuring that all United States safety standards will be applied to every truck and bus operating on our highways.

Moreover, I have received a letter from U.S. Trade Representative, Robert Zoellick, which states:

The Administration supports the agreement reached by the House and Senate appropriators on Mexican trucking as fully promoting highway safety and U.S. trade commitments. In addition, it will permit the United States to meet the commitments made to Mexico as part of the North American Free Trade Agreement.

I ask unanimous consent a copy of that letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

EXECUTIVE OFFICE OF THE PRESIDENT,
THE UNITED STATES TRADE REPRESENTATIVE,

Washington, DC.

Hon. JOHN McCAIN,
U.S. Senate,
Washington, DC.

DEAR SENATOR McCAIN: I am writing to convey the Administration's views on Section 350 of H.R. 2299, the Department of Transportation's appropriations bill for fiscal year 2002.

The Administration supports the agreement reached by the House and Senate appropriators on Mexican trucking as fully promoting highway safety and U.S. trade commitments. In addition, it will permit the United States to meet the commitments made to Mexico as part of the North American Free Trade Agreement.

Sincerely,

ROBERT B. ZOELLICK.

Mr. McCAIN. Additionally, I note the conference report does include additional funding to address the many safety related enforcement requirements concerning Mexican carriers and drivers. While much of my statement today will express disagreement to the actions of the appropriators, in this case I want to note for the record that they have worked to provide sufficient funding to allow DOT to carry out the requirements with respect to the Mexican trucking issue and enable the border to be opened in a time-frame deemed appropriate by the administration.

Mr. President, enactment of this legislation will not be the end of our due diligence to ensure we are allowed to open the border to Mexican carriers and in turn, allow American carriers to do business in Mexico. I intend to stay vigilant on this very important issue and will monitor the administration's actions with respect to the border opening in my capacity as ranking member of the Senate Committee on Commerce, Science, and Transpor-

tation. I remain committed to doing all I can to ensure the border is open consistent with our obligations under NAFTA while protecting the safety of the American traveling public.

Mr. President, this is a bittersweet victory for highway safety and free trade. On the one hand the United States will be allowed to keep its promise to abide by its solemn treaty. Yet on the other hand, the egregious process of pork barrel earmarking continues. Unless you are from a state with a member on the Appropriations Committee, your State's transportation dollars most likely will be reduced by enactment of this bill which in many cases redirects authorized funding programs for the sake of the home-state projects of the appropriators.

I recognize that there are very important provisions in the legislation, sections that appropriate funds for programs vital to the safety and security of the traveling public and our national transportation system over all. Yet despite that necessary funding, and the fact that the legislation is not in violation of NAFTA, it once again goes overboard on pork barrel spending.

It is so bad, in fact, yesterday's Wall Street Journal included an article highlighting the very egregious actions of the appropriators to reduce state transportation dollars and direct those funds to earmarked projects. The article is entitled "Bill Gains To Cut State-Controlled Highway Funds." I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BILL GAINS TO CUT STATE-CONTROLLED
HIGHWAY FUNDS
(By David Rogers)

WASHINGTON.—In a total display of patronage politics, Congress is poised to remove nearly \$450 million of federal highway aid from state control to instead spend the money on road projects selected by lawmakers.

The appropriations leadership added the provision to a \$59.6 billion transportation budget for fiscal-year 2002 that was filed just before dawn Friday and rushed through the House hours later, where it passed 371-11. Tight limits on Senate debate all but ensure final passage this week, despite complaints that lawmakers are tampering with funding formulas laid out in the 1998 highway act.

Until the dust settles, it is difficult to say precisely how individual states will fare, but three—Kentucky, Alabama, and West Virginia—are clear winners. Rep. Hal Rogers (R., Ky.), who led the House negotiators, engineered the arrangement and used it to corral extra dollars for his state. Alabama had three votes at the negotiating table, including Sen. Richard Shelby, the Senate's top GOP negotiator. West Virginia needed only one, Sen. Robert Byrd, chairman of the Appropriations panel and a master at capturing highway money for his rural state. Among the four largest earmarked highway accounts, Kentucky, West Virginia and Alabama are promised \$211 million, almost a fifth of the \$1.1 billion total.

Never before has the Appropriations leadership gone so far in tampering with the 1998 highway act, which was built on the premise that federal gas-tax receipts should be returned quickly to the states regardless of other federal spending priorities. The act even created a mechanism to adjust authorized highway funding upward as revenue rose. In recent years, that pot of money—identified by the title Revenue Aligned Budget Authority, or RABA—has exploded, reaching \$4.5 billion this year.

Under the highway law, \$3.95 billion was to be apportioned among the states this year with the remaining \$574 million going to about 40 highway programs authorized in the highway act and administered through the Transportation Department. The bill would cut the state share to \$3.5 billion and combine the extra \$450 million with the \$574 million, creating a \$1 billion-plus pot.

The negotiators made wholesale changes in the priorities set in the highway act, substituting projects they favor for the ones preferred by the House and Senate transportation committees that wrote the highway law. A \$25 million community-preservation pilot program, for example, ballooned to \$276 million, with virtually each dollar earmarked as to where it should be spent.

The Bush administration had opened the door by proposing changes in how RABA dollars are distributed. Negotiators said the \$3.5 billion apportioned to the states narrowly exceeds the amount proposed in the president's budget, and an additional \$100 million has been added elsewhere to core highway funds available to the states. There is little doubt the deal was driven by pork-barrel politics. There were bitter fights over unsuccessful Republican attempts to deny money for vulnerable Democrats in conservative House districts in Mississippi and Arkansas.

The bill would impose a much tougher safety regimen than the White House had wanted for Mexican trucks that are due to begin operating in the U.S. next year. The

Transportation Department expects to meet the requirements and open the border by the spring—just a few months later than planned. But the final settlement is a personal victory for Rep. Martin Sabo (D., Minn.) and Sen. Patty Murray (D. Wash.), the two managers of the bill who had insisted lawmakers must consider safety.

For Sen. Byrd, there will be more at stake than the transportation bill. The West Virginia Democrat will be at center stage again this week, which he is expected to force Senate roll calls on adding more money for homeland security to a pending Pentagon budget. Though the White House should win an early procedural vote, Sen. Byrd appears prepared to confront Republicans with the choice of accepting the money or pulling down the entire military budget.

Mr. McCain. Mr. President, I ask my colleagues, how much longer are we going to let the appropriators subordinate the jurisdiction and responsibilities of the authorizers? Didn't most of us think the multi-year highway funding legislation, known as TEA-21, would essentially be the law of the land through fiscal year 2003 with respect to highway funding formulas and state apportionments? I guess we were wrong, given the appropriations reprogramming maneuvers.

Let me again quote from the Wall Street Journal: "The negotiators made wholesale changes in the priorities set in the highway act, substituting projects they favor for the ones preferred by the House and Senate transportation committees that wrote the highway law." This is precisely why no projects should be earmarked by either the authorizers or the appropriators and we should instead allow the states

to fund the projects that meet the legitimate transportation needs of their states.

Mr. President, the Revenue Aligned Budget Authority—RABA—funds mentioned in the article are to be distributed proportionately to the states through formula apportionments and to allocated programs. This conference report represents a fundamental departure from that approach.

To pay for some of the report's many earmarks, \$423 million will be redirected from state apportionments, meaning the states lose 10.7 percent of RABA funds from the regular formula program. Further, another \$423 million will be redistributed from allocated programs in a manner in which the appropriators have selected programmatic winners and losers. In fact, 24 of 38 highway funding programs will receive none of the funding under RABA they were to receive before the appropriators' stroke of pen. But again, if you have the good fortune to reside in a state with a member in a leadership position on the DOT Appropriations Subcommittee, you are among the winners in this appropriations bill lottery. I ask unanimous consent that two charts prepared by the Federal Highway Administration to show the impact on each state and the allocated programs through the RABA redistributing work of the appropriators be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Mr. MCCAIN. In addition to the RABA funding shell game, host of other actions by the appropriators merit concern. For example, section 330 of the conference report appropriates \$144 million in grants for surface transportation projects while the Statement of Managers then earmarks the entire allotment for 55 projects in 31 States. I should point out that the Senate-passed version of the appropriations bill provided \$20 million for these grants, not a dime of which was earmarked, while the House bill did not appropriate any funding for such grants. But through the will of the conferees, the level of funding for surface transportation projects grants are increased by \$124 million and the conferees have recommended earmarks for every penny of the grant funding instead of allowing it to be made available for distribution on a competitive or meritorious basis.

Examples of these earmarks included in the Statement of Managers include:

\$1.5 million for the Big South Fork Scenic Railroad enhancement project in Kentucky; \$2 million for a public exhibition on “America’s Transportation Stories” in Michigan—this sounds like a very critical and legitimate use of transportation dollars—and one of my favorites, \$3 million for the Odyssey Maritime Project in Seattle, WA. What makes this last one a highlight is that the “Odyssey Maritime Project” is not a surface transportation project of all. It is, in fact, a museum. But the sponsor of that project must not have wanted us to really know what the funding was being allocated for and instead chose to incorporate some cleaver penmanship to mask the true nature of the so-called transportation project.

With respect to the Coast Guard, the conference report earmarks \$2,000,000 for the Coast Guard to participate in an unrequested joint facility that would locate a new air station in Chicago with a new facility that would also house city and State facilities. The new marine safety and rescue station is not justified, not requested, and in fact would provide duplicative air coverage already met by other Coast Guard air stations.

The conference report also earmarks \$4,650,000 to test and evaluate a currently developed 85-foot fast patrol craft that is manufactured in the United States and has a top speed of 40 knots. Interestingly, there is only one company with such a patrol craft, Guardian Marine International, LLC., and it is based in the State of Washington. The Coast Guard did not request this vessel, does not need this vessel, nor does this vessel meet the Coast Guard’s requirements. The Coast Guard’s resources are already stretched thin and this will only hamper its ability to meet its new challenges since September 11. But again, the appropriators know best.

The conference report further earmarks \$500,000 for the Columbia River Aquatic Non-indigenous Species Initiative—CRANSI—Center at Portland State University in Portland, Oregon, to support surveys of nonindigenous aquatic species in the Columbia River. This earmark is directly taking away much needed Coast Guard R&D funds that could be used to fight the war on drugs, protect our ports, or aid in search and rescue efforts.

And, as with other modes of transportation, the appropriators have larded the DOT’s aviation programs with numerous earmarks and authorizing language that is within the jurisdiction of the Commerce Committee. For example, the Statement of Managers earmarks more than \$206 million in FAA facilities and equipment

projects at dozens of specific airports. I am not sure how the appropriators seem to know precisely which pieces of equipment need to be installed at which airports, but I believe that we should be leaving these decisions to the FAA. The more projects that are forced upon the agency, the less ability it has to focus on those that are truly needed to enhance safety and capacity.

The appropriators do the same thing when it comes to airport projects and the expenditure of discretionary funds. The Statement of Managers earmarks more than 100 specific airport construction projects totaling more than \$200 million. Once again, this is intended to take away significantly from the discretion of the FAA to determine the most important needs of the system as a whole.

This might be the time to remind the Secretary and the modal administrators that the slew of projects included in the Statement of Managers are advisory only. The Statement of Managers does not have the force of law and the FAA and other modal agencies must exercise its judgment in complying with the recommendations of the managers.

While the aviation earmarking is bad, the raiding of existing aviation accounts for unrelated purposes is even worse. The FAA’s Airport Improvement Program is supposed to be devoted to the infrastructure needs of our nation’s airports. Yet the conference report takes tens of millions of dollars out of AIP to pay for the FAA’s costs of administering AIP, the Essential Air Service program, and the Small Community Air Service Developing Pilot Program. These are worthy activities and programs, but it violates the long-established purpose of AIP to use monies for these things.

Mr. President, last year I warned that we should just as well get rid of DOT and let the appropriators act as the authorizing agency since they so routinely substitute their own judgment for that of the agency’s. Well, apparently I have a job in my retirement predicting the future. There is a provision in this bill that prohibits the use of any funds for a regional airport in southeast Louisiana, unless a commission of stakeholders submits a comprehensive plan for the Administrator’s approval. While that is not necessarily good government, that is well within the agency purview. However, the bill goes further and requires that if the Administrator approves the plan, it must be then submitted to the Appropriations Committee for approval before funds can be spent.

This is unconscionable. Clearly the appropriators do not want this airport

to be funded unless they say so. Are the appropriators now going to require that every decision that is made by the oversight agency be approved by them first? Will the Administrator or Secretary have to send letters regarding transportation policy to Congress for approval? Will DOT leave requests and travel schedules have to be sent to the Appropriations Committees? Where does this end? I understand that Congress is supposed to act as a check and balance to the executive branch, but I must ask, who is serving as a check and balance to the appropriators? At a minimum, isn't it supposed to be the authorizers? But passage of this conference report will provide clear proof that once again there are no checks and there is no balance.

Mr. President, I could go on and on but will refrain. It is hard to imagine but despite the seemingly unlimited lists of projects and funding redirections provided for in this bill, it actually could have been worse. The appropriators did rightly reject some of the requests and wish-lists they received, such as including language to effectively alter the federal cap on the Boston Central Artery Tunnel Project—the Big Dig—or to take action to eliminate the Amtrak self-sufficiency requirement now that the Amtrak Reform Council has made its finding that Amtrak will not meet its statutory directive. Perhaps if the requesters were appropriators, their Christmas wish list would have been fulfilled as well. I tell my colleagues, I will be going all over the country discussing this egregious, outrageous procedure which has gone completely out of control on a bipartisan basis. Of all the years I have seen this egregious porkbarrel spending, this is one of the worst.

The PRESIDING OFFICER. The Senator from Washington has 5 minutes remaining; the Senator from Alabama has 5 minutes remaining.

Mrs. MURRAY. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. SHELBY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SHELBY. I yield 3 minutes of my time to the Senator from Pennsylvania, Mr. SPECTER.

Mr. SPECTER. Mr. President, I thank my colleague from Alabama for yielding me a brief period of time to comment about an omission from the appropriations conference report involving a constituent company of mine, Traffic.com. There had been an arrangement worked out in previous legislation. This would have given Traffic.com a followup contract for some \$50 million where they have devised systems for monitoring traffic on the highways so the people can be in-

formed where there is traffic congestion.

The first contract was awarded to Traffic.com under an arrangement where the second would follow through. There was competitive bidding for the first contract. The Department of Transportation wanted clarification, which was added in this Chamber on an amendment which was accepted to give the followup contract to Traffic.com. Then when we went to conference last week, I was informed a few minutes before the conference began that the provision had been dropped. There had been no notification.

When I raised the issue in the conference, I was advised there was legislation which prohibited this arrangement which they characterized as "sole source contracting," but, in fact, it was not because the first contract had been competitively bid with the understanding that the second contract would follow.

In any event, our research in the interim since the conference committee met last week, to today, shows there is no legislative prohibition against this arrangement, even if it were sole source contracting, which, I repeat again, it is not. We then discussed at the conference the approach of having it included in the supplemental appropriations bill, which we are working on now. The Appropriations Committee is meeting this afternoon.

I thank the distinguished chairman of the subcommittee, Senator MURRAY, and the distinguished ranking member, Senator SHELBY, for commenting at that time they would support the effort to get it in the supplemental appropriations bill so we hope we can be cured at that time.

I did want to make the brief statement on the record at this point. I thank Senator SHELBY for yielding me the time. I yield the floor.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. SHELBY. How much time remains?

The PRESIDING OFFICER. Three minutes five seconds.

Mr. SHELBY. I yield that time back.

UNANIMOUS CONSENT AGREEMENT

The PRESIDING OFFICER. The Senator from Washington.

Mrs. MURRAY. Under the authority granted to the majority leader by the unanimous consent agreement of December 3, I ask unanimous consent that the vote on adoption of the conference report to accompany H.R. 2299, the Transportation appropriations bill occur at 12:30 p.m. today, without further intervening action, and I now ask for the yeas and nays on adoption.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second. The yeas and nays are ordered.

Mrs. MURRAY. Mr. President, back in July and August, the Senate spent a lot of time talking about the safety of Mexican trucks.

Originally, the White House wanted to allow Mexican trucks to travel throughout the United States without sufficient safety checks.

That raised real safety concerns for everyone from the Advocates for Highway & Auto Safety to the AAA of Texas.

The House of Representatives, meanwhile, voted to prevent any Mexican trucks from traveling beyond a limited area near the border.

I have always believed that we could ensure our safety and promote commerce at the same time.

So Senator SHELBY and I—working with our colleagues on both sides of the aisle—created a commonsense safety plan.

The Senate turned back several amendments—and voted twice with strong bipartisan super-majorities—to invoke cloture both on the committee substitute and the bill itself.

This summer, there were several attempts to weaken the safety provisions, but the Senate consistently rejected them.

And I am proud to say that the final conference agreement strictly adheres to the outlines of the Senate bill.

This agreement prohibits the border from being opened to Mexican trucks until the DOT implements a number of important safety measures, and until the DOT's inspector general has concluded a thorough audit of the Department's efforts.

I would like to spend a moment comparing the conference agreement with the administration's original plan.

Let me start with compliance reviews, which are comprehensive inspections of a trucking firm's vehicles, its management systems, and all of its license, insurance, and maintenance records.

It looks at the trucking firm's operating and violation histories and yields a decision as to whether the firm should be allowed to continue operating in the U.S.

Under the administration's plans, there was never going to be a requirement that a Mexican trucking firm undergo a compliance review.

The conference agreement, however, includes a requirement that each and every Mexican trucking firm undergo a compliance review before being granted permanent operating authority. There are no exceptions.

Let's look at on-site inspections.

The administration never intended to require that inspections by U.S. truck safety inspectors take place on-site at a Mexican trucking firm's facilities.

The conference agreement, however, requires that U.S. truck safety inspectors must visit every Mexican trucking firm either when they conduct their initial safety examination or when they conduct a compliance review to determine whether the firm should be granted permanent operating authority in the U.S.

The only exception is granted to the smallest independent operators in Mexico. They will be required to have these same exams conducted at the border.

Even with this exception, it is likely that these smallest of firms will be visited on-site.

That's because the DOT will have to conduct on-site inspections of at least half of all firms and half of all the traffic volume coming into the U.S.

Originally, the administration did not intend to verify many licenses when Mexican truckers crossed the border.

The DOT told us that they would verify the licenses on a random basis—but deliberately avoided defining what was meant by the word "random."

That could mean verifying 1 out of every 100 licenses or 1 out of every 1,000 licenses.

Under the conference agreement, the DOT will be required to electronically verify at least one out of every two licenses.

And the actual ratio will be even higher.

That's because the conference agreement requires that border inspectors verify the license of every trucker carrying hazardous materials, and every trucker undergoing a Level I inspection, and then requires that inspectors verify 50 percent of all other vehicles crossing the border.

On the issue of overweight trucks, the administration did not intend to implement any special effort to address overweight vehicles—even though Mexican weight limits far exceed those in the U.S.

The conference agreement, however, requires that—within 1 year of the date of enactment—each and every truck crossing the border at the ten busiest border crossings between the U.S. and Mexico will be weighed.

In fact, the conference agreement prohibits the border from being opened at all—until half of these border crossings have weigh-in-motion systems fully installed.

The administration did not intend to require that Mexican trucks cross the border only where DOT safety inspectors are on duty.

The conference agreement requires that the trucks cross where inspectors are on duty.

It also requires that they enter the U.S. at crossings where there is adequate capacity for the inspectors to conduct meaningful inspections and, if need be, place vehicles out-of-service for safety violations.

The DOT was planning to open the border whether or not a number of critical truck safety rulemakings had been finalized and published.

Some of these rulemakings have been delayed for years, but the DOT planned to open the border anyway.

The conference agreement, however, requires that the Secretary either im-

plement policy directives or publish interim final rules that will immediately govern the behavior of trucking firms—before the border can be opened.

Now let's look at the hauling of hazardous materials across the border. The administration had not planned on implementing any unique requirements for hazardous materials trucks even though they represent a unique and dangerous threat on our highways.

The conference agreement, however, requires that even if other trucks have already been allowed to cross the border no hazardous material trucks will be allowed to enter the U.S. until the governments of the U.S. and Mexico enter into a separate agreement confirming that U.S. and Mexican drivers of these vehicles have been subjected to the same unique requirements.

Finally, concerning the oversight of the inspector general, the administration was planning to open the border without regard to the long list of safety deficiencies that had been cited by the DOT inspector general.

As far as the DOT was concerned, the inspector general could continue to publish as many critical audits as he wanted to—but they were going to open the border on January 1 without regard to whether any of the deficiencies had been addressed.

There wasn't even a process in place to require the Transportation Secretary to acknowledge the findings of the IG.

Under the conference agreement, no trucks may cross the border until the IG has completed another entire audit of the DOT's efforts.

And no trucks may cross the border until the Transportation Secretary has received the IG's findings and has certified in writing, in a manner addressing each of those findings, that the opening of the border does not present an unacceptable risk to our constituents.

So, the conference agreement includes a serious mechanism to hold the Transportation Secretary accountable for his decision to open the border.

And you can be sure that the Transportation Appropriations subcommittee will be holding a hearing with both the Transportation Secretary and the inspector general once the IG has made his findings and the Secretary is poised to issue his certification.

Some observers have suggested that the requirements of the conference agreement are not as restrictive as the measures that passed the Senate.

As I view it, the safety requirements are effectively the same.

The conference agreement gives the administration a degree of flexibility in implementing these safety requirements.

Others have said that the border is likely to open more quickly under the provisions of the conference agreement than under the Senate-passed bill.

That may be true. But I want to remind my colleagues that, it has never been our goal to keep the border closed.

I voted for NAFTA.

I represent a state that is highly-dependent on international trade.

And I believe in the economic benefits that come with lower trade barriers.

Throughout this entire process, my goal—and that of Senator SHELBY—has been to ensure the safety of our highways.

And I am proud that this conference agreement makes great progress for our safety.

I am prepared to yield back all of our time on the bill if there is no one to speak.

I yield back the remainder of our time.

COMPREHENSIVE RETIREMENT SECURITY AND PENSION REFORM ACT OF 2001—Resumed

The PRESIDING OFFICER. The clerk will report the pending business.

The assistant legislative clerk read as follows:

A bill (H.R. 10) to provide pension reform and for other purposes.

Pending:

Daschle (for Hatch/Baucus) Amendment No. 2170, in the nature of a substitute.

The PRESIDING OFFICER. The assistant majority leader.

Mr. REID. Mr. President, will the Chair indicate how much time is remaining on this matter?

The PRESIDING OFFICER. There remain 14 hours 40 minutes.

Mr. REID. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent the order for the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2202 TO AMENDMENT NO. 2170

Mr. DOMENICI. Mr. President, I call up amendment No. 2202 and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from New Mexico [Mr. DOMENICI] proposes an amendment numbered 2202 to amendment No. 2170.

(Purpose: To strike the provision related to directed scorekeeping)

Strike section 105(c).

Mr. DOMENICI. Mr. President, I put before the Senate an interesting, simple amendment that we as a Senate should adopt. I hope this amendment is aired for a while. Because Senators have asked me not to, I do not have

any intention to move rapidly. Other Senators are presently indisposed and they might come and perhaps become cosponsors. We will see what we can do.

But I want to make sure the Domenici amendment No. 2202 will not be mistaken for anything other than what it is. This amendment is not a killer amendment with reference to the underlying amendment. The railroad retirement bill will in no way be damaged by this amendment. This amendment is just a very simple recognition that the bill has some language in it that shouldn't be in it. As much as we want to do for the railroad retirees and for all of those who have joined in a rather mass number of Senators who want to see this happen—that is, passage of the bill—they actually should join in saying we want to do this. But we want to be honest with the American people in terms of what the bill costs and how you should score the actual costs against the Treasury.

My amendment would strike what we call directed scorekeeping language out of section 105. This technical language inserted just before the House passed the bill instructs the Office of Management and Budget to deviate—let me go slow here so everybody will get it—from the standard accounting practice when implementing this bill.

The Congressional Budget Office estimates that the provision allowing private investment in equities would increase outlays by \$15.3 billion in 2002. That means, if you follow the way we do things in a normal manner pursuant to the rules and guidelines in the law, this bill adds \$15.3 billion in increased outlays.

That is a matter of the Congressional Budget Office doing its work and telling us the answer when they are asked the question, How much does the bill cost? What do you put on the books of the United States?

They did their work. Now this bill, at the last minute, deviates from the standard accounting to the extent of \$15.3 billion.

If my amendment is agreed to, which strikes the language permitting the deviation and permitting the violation of the Congressional Budget Office, it does nothing, except it puts before us the reality, the truth. It doesn't cause the bill to be any more or any less in conformance with the rules and the Congressional Budget Office. It doesn't make the bill subject to a point of order. It is already subject to that. That has nothing to do with this amendment that I am offering to clarify and make consistent this bill, and make it consistent with what we ought to do in following the language and process and past procedures with reference to the estimated cost.

Once again, the Congressional Budget Office estimates that the provision allowing private investment in equities would increase outlays by \$15.3 billion

in 2002. It doesn't say you can't do it. It doesn't say you shouldn't do it. It just says if you do it, report it. Just put it in here. Ask the Congressional Budget Office and report their answer. Don't ask the Congressional Budget Office and then say, regardless of their answer, which we are supposed to follow, we are going to determine and declare that we are not going to follow it.

That is called directed scoring—telling them how to score things contrary to the rules, contrary to reality, and contrary to the way we have been doing it.

That is pathetic. We shouldn't do that on any bill.

I repeat that it does not kill the bill. It does not damage the bill. It just reports the reality of the bill for bookkeeping and scorekeeping, which I believe the American people want. They don't want one bill, as good as it is, to have inserted in it just before it passes the House language saying that whatever the reality and the truth is, don't report it this time for this bill. Just report it another way.

All I do is strike that language saying report it that way. It is a very simple idea. It is simple to understand. Just take that language out, return it to language which an ordinary, everyday bill of this type would have had in it and should be expected to be part of what we do.

By preventing the OMB from reporting that expenditure as an outlay, this, in fact, deviates from; it distorts. It makes us look at something and say it isn't what it is. That is a good way to say it. We just put language in saying no matter what it is, it isn't. I am saying no matter what it is, it is, in taking out the language that would do the contrary.

The Government has always recorded any investment from equities to research and development and to education and training as an outlay. The Government should get a good rate of return on all types of investments. In contrast to private sector accounting, we record these investments as an expenditure because the Government operates under cash accounting rules. We certainly cannot use that fact as a reason for changing it. If we are going to choose to change that system of accounting, we shouldn't do it selectively for one bill, no matter how good the bill is, and no matter how much support it has. You ought to change the whole system after a thoughtful evaluation of whether we should continue to use that kind of an approach.

I will not go into the reasons why the Federal Government uses the cash accounting system instead of an accrual accounting system. But I will say that the Federal Government has operated under cash accounting rules since 1789, the first year Congress appropriated \$639,000 to cover the expenses of our new government. This isn't the time to

change the rules. Obviously, it is neither the time, nor the bill. It is a bill with great support. I am going to support it. It seems to have huge support. We will get it done, but we ought not choose the bill to change the rules of accounting that have existed for our Government since 1789, the first time Congress appropriated \$639,000 as our expenditure.

We know, from example, in the private sector that bending the accounting rules creates confusion for the same reason we should not bend the accounting rules of the Federal Government to suit our purpose. Doing so reduces transparency and misleads the public.

If my amendment is not agreed to, this bill will set a troubling precedent for Social Security. Under current accounting practices, both the Government and the privately controlled investments of Social Security funds in stocks are treated consistently. They would increase outlays. If Government-controlled investments were not reported as outlay proposals to collectively invest in Social Security, the assets would have a significant advantage over proposals to create individual accounts. I don't think that should be done. Certainly we wouldn't want to use this as a precedent for that.

That is one of the problems when you violate precedent and pluck something out and say, we are not going to use it now, for whatever reason. We would rather not show the accounting as it is or for real.

Specifically, the proposals to have the Government invest in Social Security assets would be free, whereas proposals to establish individual accounts would cost trillions of dollars.

We understand that is not justified. This bill should not be used as something that gives impetus to that conclusion in a completely different area of huge confusion.

Regardless of whether you support individual accounts for Social Security, as the President's commission is about to propose, or collective investments such as President Clinton proposed, it doesn't make much sense for budget rules to save one policy over another. That is why I think we should be consistent, and do what is right.

Finally, the directed scorekeeping language in the bill creates a 306 budget point of order against the entire Railroad Retirement Act.

The point of order prevents Congress from changing the budget rules unless the proposal is reported from the Budget Committee. My amendment, by dropping the directed scorekeeping language, will ensure that we follow the right accounting proposals.

But understand, I do not make a point of order. There are plenty of votes for this bill. But I think plenty of those votes ought to be used to correct the accounting so there is no black

mark that follows this bill around as to why did we have to do that. We do not have to do that. We just do not have to do it.

At the point it went through the House, maybe it was some way to affect the cost and make it easier to get through because we were not going to charge so much against the surplus of the country. All of those kinds of problems have long gone away. As the occupant of the chair knows, we have been spending the surplus for many months. All of the spending that took place on behalf of the New York incident was out of the surplus there. We began to break the bank, so to speak.

So if there was some reason to manage or distort the real cost, it does not exist any longer. In fact, we should not have done it anyway. But if that was the reason, it is not needed and we ought to fix it. That one change will not kill this bill. It has nothing to do with the life. Whether it is good or not so good, this action just gets rid of something that puts a little black mark or maybe even a big black mark on this bill as seeking some super-attention by way of the budget rules that follow this.

That is all I have to say. But I note the presence of the chairman of the Budget Committee in this Chamber. From my standpoint, I am ready to proceed. But I do not want to cut anybody out of either joining me as a cosponsor or speaking.

So with that, I make a parliamentary inquiry. Was there a certain amount of time allocated to the Senator from New Mexico for this amendment?

The PRESIDING OFFICER. Under cloture, the Senator is limited to 1 hour. The Senator has consumed about 14 minutes.

Mr. DOMENICI. I reserve the remainder of my time and yield the floor.

The PRESIDING OFFICER. The majority whip.

Mr. REID. Mr. President, Senator INHOFE tried to arrange some time last week to speak when we had lots of time. The time is a little more constrained today, but he has always been so easy to work with, and I ask unanimous consent that following my remarks and those of Senator CONRAD, the Senator from Oklahoma be recognized for up to 40 minutes. Of course, the time would be charged against the 30 hours.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

Mr. REID. Mr. President, for me to speak against Senator DOMENICI and Senator CONRAD is difficult. I work very closely with Senator DOMENICI. We have been on the Appropriations Committee working side by side on a number of issues, including the Energy and Water Development Subcommittee, of which I have been chair-

man and he has been chairman, back and forth. Of course, Senator CONRAD and I came to the Senate together. There is no one I have more respect for than Senator CONRAD and for his integrity and his absolute brilliance. So for me to speak against something on which they agree is difficult. But as much respect as I have for both of these outstanding men, it does not mean they are always right. I respectfully submit that what they are trying to accomplish now is wrong.

Leave it in the bill is basically what my message is. I know I speak for the chairman of the Finance Committee, Senator BAUCUS, and I know I speak for the majority leader, Senator DASCHLE, when I say this.

The House-passed bill includes directed scorekeeping language. This language would require the CBO and OMB to treat the purchase of private sector securities by the new railroad retirement trust as a means of financing rather than as an outlay. OMB sets the official rules right now. Under those rules, the purchase of private sector securities is scored as an outlay just as any other purchase of goods and services would be scored.

However, the issue of how to score the purchase of private sector securities is really a very gray area. Unlike the purchase of goods and services, the purchase of private sector securities does not diminish the financial and budgetary wealth of the Government. So a case could be made that these purchases should not be scored as outlays. In such a case, a means of financing Federal deficits is a technical term for the budgetary category of the purchases. The primary means of financing Federal deficits historically has been Federal borrowing.

Those who would like to continue the current OMB scoring rules would argue that almost all the Federal budget is on a cash basis. From that perspective, the purchase of private sector securities requires cash and should be treated the same as any purchase of goods and services.

I do not have an opinion as to which is the best approach, which is superior. I think they both work. However, from a pragmatic point of view—and that is where I am today—this legislative session is winding down. We are facing a serious time constraint if we are going to be able to enact this important legislation this year.

The railroads have been working and trying to get something such as this done for decades. For once, now we have victory in our grasp. The railroad companies and the unions, which rarely agree on the time of day, have agreed on this package. I think it is a victory that we should not let fall from our grasp.

If this amendment passes, it is gone. Everyone should understand, it is gone. Why? Because this bill will not pass this year.

There are very few days left in the calendar. The House has already passed this legislation, the legislation that is basically before us, that includes directed scorekeeping, by a vote of 384 to 33. It was not a close call in the House: 384 to 33.

If we pass a bill that does not have directed scorekeeping, then we face one of three scenarios. No. 1, we have to go to conference. If this happens, curtains this year, this legislation is all through. No. 2, the House could send back our bill with an amendment in disagreement. In that case, there would not be enough time on the Senate floor to deal with this possibility. No. 3, the House could agree with our bill.

Under two of the three outcomes, the bill would not be enacted this year. We do not know which of the three outcomes will occur, but I have an idea. It is just too risky to proceed in this way. The prudent course of action is to leave the directed scorekeeping language in this bill, the legislation before us.

I urge my colleagues to defeat this amendment.

Mr. President, we have come a long way to arrive at a point where we actually have in our grasp this bill on which we can vote. I hope this amendment, while well intentioned by two fine Senators, both of whom want to protect their budget jurisdiction—I just think, in this instance, they are wrong. I think it would be much better if we went through with this legislation, followed the lead of the House.

The House, as I indicated, passed this bill overwhelmingly. I think if we did that, we would have a lot of happy widows, we would have a lot of happy railroad retirees; of course, we would have a railroad industry that would be much stronger and firmer.

I know in Nevada we have watched the railroads come through our State. We had a merger of Union Pacific coming through the northern part of the State on very shaky ground. But they were able to pull themselves out. We have done a number of remarkable things with the railroad to help them move more traffic because of the merger. One example is that they have come forward and we are building a depressed railroad sector through Reno to make it a much better, quieter program than we have had with railroads in the entire history of railroads coming through Nevada. All this amendment will do is set that back, and then many other things we have been able to accomplish. But of course the thing that really hurts has to do with the railroad retirees.

The PRESIDING OFFICER. The Senator from North Dakota.

Mr. CONRAD. Mr. President, I rise today to support the amendment of the Senator from New Mexico, the distinguished ranking member of the Budget Committee. I ask unanimous consent to be added as a cosponsor to his amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, will the Senator yield?

Mr. CONRAD. I am happy to yield.

Mr. DOMENICI. Mr. President, I thank Senator CONRAD. As chairman of the Budget Committee, it is really welcome that he would join me in this endeavor.

As a matter of fact, I believe by his joining, he makes the case that we are not trying to kill this bill. He has been a staunch advocate. I just told railroad retirees I am voting for the bill. I didn't tell them, nor did I tell the Senator, that I used to work for the railroad. I was a baggage clerk when I was 22. It was a fun job. I didn't work long enough to be part of any of this program. I want everybody to know, I have no interest. It was a great summer job. I became friends with some wonderful railroaders.

I repeat, so that nobody misunderstands the Senator's views, this takes out of the bill some language that is not needed for this bill and that in essence treats this bill in a way that says what is isn't; it is going to cost this much, but it is not going to cost it because we wrote language in the bill saying it isn't.

That is not the way to pass a bill. We don't do that for anybody on anything.

I welcome the Senator's support. I think it is a good way for him to start his chairmanship, saying that he is going to watch the rules carefully and abide by them. I thank the Senator so much for joining me.

(Mrs. CARNAHAN assumed the chair.)

Mr. CONRAD. I thank the Senator. My great-grandfather was a foreman on the railroad. My great-grandparents, when they went on their honeymoon, went on a pushcart for 100 miles on the railroad.

I do strongly favor this bill. I have to answer to my responsibility as chairman of the Budget Committee and as a Member of this body to be accurate with our colleagues as to the scoring of this legislation.

Directed scoring, if we are to be blunt about it, is to say something doesn't cost when we know that it does. I have an obligation to my colleagues to report accurately to them this legislation. I have been a staunch supporter of this bill the entire time it has been before the Senate. It represents an extraordinary effort by the rail companies and their employees and labor to work together to improve the lives of thousands and thousands of rail workers and their families.

I agree this legislation provides an important opportunity to modernize the rail pension program. I have received countless e-mails, phone calls, faxes, and letters from North Dakota rail workers and their spouses who have told me how important this legislation is to them and their families.

Some of my dearest friends and strongest supporters are in favor of this legislation. I am in favor of the legislation. But I have a special responsibility as chairman of the Budget Committee to give an accurate assessment to our colleagues of the cost of legislation that moves through this Chamber. That is an obligation I take seriously.

The directed scorekeeping provision creates the impression that the cost of this legislation in fiscal year 2002 has dropped from \$16 billion to \$250 million. In reality, with or without directed scorekeeping, the impact on the budget in 2002 is precisely the same. It is not \$250 million; it is \$16 billion.

That is the reality. That is the fact. With this amendment, the Senator from New Mexico has provided us with a second chance to review the directed scorekeeping provision of this bill. He is right to do so. That is why I have joined him in this effort.

Traditionally, those of us with special responsibility for the budget have vigorously opposed directed scorekeeping because it fundamentally undercuts the entire system of budget controls and budget discipline that is so important to the United States being fiscally prudent and wise. We cannot do our job of being stewards of the finances of this country if we don't report accurately and honestly to our colleagues the cost of legislation.

That is the most fundamental responsibility of any Budget Committee chairman and ranking member. Senator DOMENICI and I are meeting our responsibility by saying to our colleagues the simple fact is, this bill is going to cost \$16 billion in fiscal year 2002 no matter what the directed scorekeeping provision says. You can make it up, but it is not true. The fact is, the impact on the federal budget will be \$16 billion.

That is a cost for which I am willing to vote and support, but I am not willing to say it is something it is not. That is not, in my view, the appropriate role for any Budget Committee chairman.

It is not just a matter of \$16 billion in fiscal year 2002; it has much greater significance than that. If we establish the precedent that through directed scorekeeping we can say a \$16 billion expense is really a \$250 million expense, what is next? I predict what is next is: When we get to the reform of Social Security, some will say we can simply take a trillion dollars of the Social Security trust fund and move it over into private accounts and say there has been no expenditure. That is the implication of this vote and why it matters. If we say on this bill you can take something that cost \$16 billion and, by legislative language, direct the scorekeeping and say it doesn't cost \$16 billion, it costs \$250 million, then others may try to take a \$1 trillion trans-

fer of Social Security money and say it is cost free.

If we start down that path, we will rue the day, if we go down the path of creating fiscal fictions in this Chamber in order to accomplish even the best of intentions.

This is a good bill. It is worthy of support. But the price cannot be, should not be, must not be that we say to the American people that a bill that costs \$16 billion only costs \$250 million. That cannot be the way we do business in the Senate.

If that is the direction we take, I repeat to my colleagues the implication because I believe the next step will be in the Social Security reform debate, that others will try to say: A trillion dollars taken out of the Social Security trust fund and moved into private accounts doesn't cost anything. It is cost free.

That would not be true. That would be totally misleading. The money that is in the Social Security trust fund that has been credited to the Social Security trust fund, to be more accurate, has been credited to that fund to meet current promises, promises already made. We can't take that money and make a new set of promises and use the money that was raised to keep the previous promises. It won't work. We can't use the same money twice.

You can't use the same money twice. That is what will lead us into the swamp of deficits and debt and disastrous economic decline. Make no mistake, what is at stake here is a big deal. This matters. This is not a free vote. I remain committed to this legislation, but I also remain committed to being straight with our colleagues and our countrymen as to the cost of the legislation that is before us.

Our friends in the House included this directed scorekeeping back in July. It was a mistake then; it would be a mistake for us to repeat it here. Those who say, well, this kills the bill—I don't accept that. This legislation has to go back for further action in the House in any event because of the way it has come before us. It has to go back to the House for action in any event.

Let's pass this legislation, but let's do it right and let's do it by being straight with our colleagues and our countrymen as to its cost.

Mr. CARPER. Will the Senator from North Dakota yield?

Mr. CONRAD. I am happy to yield.

Mr. CARPER. I, too, am a strong advocate of this legislation. I have spoken for it in the Chamber and in our caucus meetings as well. As the Senator from North Dakota and the Senator from New Mexico have indicated about their relatives, my grandfather was also on the railroad. My grandmother lived many years on a survivor's pension from his service. Whenever the chairman of the Budget Committee and the ranking member on the

Budget Committee stand to endorse an amendment, it gives me pause. I want to make sure in the next several minutes—maybe hours—that we consider this legislation I understand the full ramifications of the amendment or the failure to adopt the amendment.

Let me ask the chairman of the Budget Committee this. When I first learned of the directed scorekeeping in the House of Representatives, which, as he said, is an extraordinary act, I tried to understand why they may have done that. Was it chicanery or was there real logic behind it?

As I studied the issue more, my understanding is if we were not on a cash basis of accounting, but an accrual basis, this probably would not be an issue. Most States used to be on a cash basis of accounting. The majority of States now use the accrual basis, and most States direct the retirement funds into U.S. Treasury obligations. Today, it is a whole array of investments, including equities, or stocks, bonds, and the kinds of things envisioned here under this legislation. There are, as we know, tier 1 benefits under the railroad and tier 2.

This is my question: The tier 1 benefits mirror Social Security benefits. Tier 2 are more private sector benefits. The moneys that go into those tier 2 funds for payout come from the railroad companies themselves—from the tax assessed on them—and also a payment by the railroad employees themselves. My understanding is that those monies that go into that retirement fund, paid into by the railroad companies and by the employees through the payroll deduction—those monies in the future will be invested not in U.S. Treasury obligations, but in a wide variety of investment options. But because of the peculiarity of our accounting rules, because those monies will now be not spent for roads or any other purpose, and not for space exploration, they will still be invested in the same pension benefits, but because of our accounting rules, those monies—simply by saying you can now invest those pension monies, the trust fund monies, in non-Treasury obligations triggers a \$15 billion outlay. Is that what this is all about? I know that is a long question, but let me lay that question at the feet of our Budget Committee chairman.

Mr. CONRAD. I am happy to respond. First of all, we use a cash method of accounting for the Federal budget. We do not use an accrual system. You can't mix the two or you start misleading people. That is No. 1.

No. 2, the Senator's question sounds as though it is prospective in nature; as though simply going forward, Tier II revenues would not be invested in Treasuries. That is not the case in this bill. In this bill, CBO estimates that approximately \$16 billion currently invested in Treasuries by the Federal

Government would be sold and instead invested through an investment trust in private-sector assets. Again, the amount is \$16 billion and they would be free to invest it in other ways. I support that.

But we have to be straight with people. It costs \$16 billion to the Federal Government in the fiscal year 2002 under the accounting rules that apply to every program of the Federal Government. It doesn't cost \$250 million; it costs \$16 billion. The money moves out of Government Treasuries and moves into a railroad investment trust, with the ability under a board, to invest those moneys in higher rate of return assets. I support that basic notion.

But the hard fact is that it costs the Federal Government \$16 billion. It means the fact is the Federal Government will have to borrow \$16 billion more in fiscal year 2002 than it was otherwise going to borrow.

Mr. CARPER. If the Senator will continue to yield, I have two glasses of water here. We will say one is the railroad pension fund as it currently exists, and it is full of U.S. Treasury obligations. There is another glass here and we will pretend it is empty for our purposes. What I think we are talking about doing is taking some of the moneys invested in these Treasury obligations in this one pension fund and, presumably, the railroad retirement fund would have to sell those obligations and then use the money from the sale of those obligations to put in their new pension fund. When they sell those, they are going to sell them to somebody—individuals, funds, banks, corporations. It is difficult for me to understand how that transaction I have just described should cost the Treasury \$16 billion. A lot of us are struggling on this one.

Mr. CONRAD. Let me say it as simply as I can state it. The reason it costs the U.S. Treasury \$16 billion is because the money moves out of U.S. Government Treasury and moves over to the control of a board that is run by private sector representatives to be invested in non-governmental assets. That is about as easy as I can make it.

The fact is that the Federal Government is going to have to borrow, as a result of that transaction, not \$250 million more, but \$16 billion more in 2002. For us to have our colleagues say "but it really doesn't mean that" is not accurate and it is not factual. To say to our colleagues, by direct scorekeeping, by legislative fiat, that it won't cost \$16 billion, that it won't mean the Federal Government has to borrow \$16 billion more in 2002, that it is only going to cost \$250 million more, is just not the truth. I don't know how more direct I can be.

Mr. CARPER. I thank the Senator.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. REID. Madam President, I ask unanimous consent that following the

statement of Senator INHOFE, Senator STABENOW be recognized for up to 15 minutes, and the time be charged against the 30 hours.

The PRESIDING OFFICER. Without objection, it is so ordered.

Under the previous order, the Senator from Oklahoma is recognized for 40 minutes.

AN ABSOLUTE VICTORY

Mr. INHOFE. I thank the Chair. First, I say to the leadership how much I appreciate the fact you are allowing me to bust in on a different subject. I think it is very significant at this time because something happened yesterday that I think makes it worthwhile to talk about this and maybe to do so at some length.

Willie George was right. Lest some of you do not know who Willie George is, some people consider Willie George a preacher, but he is also a very able historian. As I listened to him and added some perspectives on what the attack on America was all about, I realized the inside-Washington mentality is sometimes and often flawed and that mentality that comes from Oklahoma reflects more of real America.

The Apostle Paul gave us our marching orders in Ephesians 6, verses 10, 11, and 12. He said:

Finally, my brethren, be strong in the Lord, and in the power of his might. Put on the whole armor of God, that you may be able to stand against the wiles of the devil. For we wrestling is not against flesh and blood, but against the principalities, against the powers, against the rulers of this darkness—

About which we are talking—

against the spiritual hosts of wickedness in high places.

Make no mistake about it. This war is first and foremost a spiritual war. It is not a political war. It has never been a political war. It is not about politics. It is a spiritual war. It has its roots in spiritual conflict. It is a war to be fought to destroy the very fabric of our society and the very things for which we stand.

Many of the wars in history have been fought because of human desire or greed, to have that of a neighboring country—to have mineral deposits, to have what some other country has. But this war is of a different nature.

It is not just simple greed that motivated these people to kill. This war has been launched against the United States of America. It is a spiritual attack. It is an attack that was created in the mind and heart of Satan. It is a demonically inspired attack. It is not just the selfish ambitions of an egoistical leader. It is not just someone wanting to hold on to power. This is nothing more than a satanically inspired attack against America created by demonic powers through the perverted minds of terrorists.

One may ask: What is it about our Nation that makes them hate us so much? Three things. First, in our country, we have the freedom and the right to choose the kind of worship we want. I am a born-again Christian. I have accepted Jesus Christ as my virtual Lord and Savior. I believe it is through Him that we will reach the Father. I believe every American has a right to choose whether or not to believe that.

Some people have the notion that if you are a Christian who believes in the Bible, you are totally intolerant; you do not allow other people to have a choice. Nothing could be further from the truth.

In nations of this world where Christianity is the dominant way of worship, we also find Jewish synagogues, Islamic mosques; we find freedom of worship. But we will not find the same kinds of freedom in the militant Islamic nations of this world. They do not allow Christian churches and Jewish synagogues to operate freely. They do not allow people the freedom of choice. In Sudan, they sell Christians into slavery.

So one of the reasons America is hated so much is that we have allowed people through the years to choose what they are going to do. It is choice.

The second reason we are hated is that we have opened the door for people to achieve their God-given place on this Earth. We have not restrained people. We have allowed people freedom of expression, the freedom to pursue dreams, the freedom to pursue goals. This is not true around the world.

Freedom did not come cheap. One of my memories that I consider an advantage for me and that I hold over many others is when I first started my education in first grade, it was in a country schoolhouse. Not many people here know what they are. They are eight grades in one room out in the country. It was called Hazel Dell. In fact, I remember three brothers who rode on a workhorse to school every morning.

We had a different sense of history at that time. I remember so well reading and learning history as a very young child in that environment. Keep in mind, that was the environment at the beginning of World War II when we had a sense of patriotism that is comparable to today.

I remember my teacher said the Pilgrims did not come to this country for adventure; they did not come for excitement; they were not adventurous people. They came to this country to escape tyranny, to pursue freedoms—freedom of religion and economic freedom. Half of them died the first year. They knew it was going to happen. It was worth it to get these freedoms.

They had freedom of religion and economic freedom. Each was given a piece of property to do with as they wanted, and he could work his land and reap the benefits of this property. And he

prospered mightily, so mightily that in one of his letters back to England, Smith said: Now one farmer can grow 10 times as much corn as the previous farmers could.

They were prospering so mightily. I normally tell young people when you have a good thing going, quite often someone is going to try to take it away from you. That is exactly what happened. The British came across the sea. They wanted in on this prosperity, and they started imposing laws, rules, and regulations so that the trapper on the frontier could not make a hat of the pelt he caught. He had to sell it to British merchants at British prices to be shipped to Great Britain on English ships to be made into a hat by English laborers to be shipped back and sold to the trapper, who caught it in the first place, at English prices. Guess what happened. God bless him, the trapper kept right on making his own hats.

That was treason in those days. So they sent this great army to this country, the greatest army in the world at that time, to stop these things from occurring. They started marching up toward Lexington and Concord.

I remember so well sitting in that little one-room schoolhouse and having this vision of what it was really like. Farmers and trappers and frontiersmen were up there. They were not well educated, but they were ready to stop this resistance, the greatest army on the face of this Earth. Most of them could not read or write. As the saying goes, they did not know their right foot from their left foot, so they would put a tuft of hay in one boot and a tuft of straw in the other boot and marched to the cadence of "hay foot, straw foot."

While they were not greatly educated, they knew freedom, and they were going to keep that freedom. As they stood there knowing they were signing their death warrants, those soldiers, listening to the thundering cadence of the largest army in the world going towards Lexington and Concord, waited until they saw the whites of their eyes and fired the shot heard round the world, not knowing at that very moment a tall redhead stood in the House of Burgess and made a speech for them, made a speech for us today:

They tell us, sir, that we are weak; unable to cope with so formidable an adversary. But when shall we be stronger? Will it be the next week, or the next year? Will it be when we are totally disarmed, and when a British guard shall be stationed in every house? Shall we gather strength by irresolution and inaction? Shall we acquire the means of effectual resistance by lying supinely on our backs and hugging the delusive phantom of hope, until our enemies shall have bound us hand and foot? Sir, we are not weak if we make proper use of those means which the God of nature hath placed in our power. The millions of people, armed in the holy cause of liberty, and in such a country as that which we possess, are invincible by any force which our enemy can send against us.

This is critical.

Besides, sir, we shall not fight our battles alone. There is a just God who presides over the destinies of nations, and who will raise up friends to fight our battles with us. The battle, sir, is not to the strong alone; it is to the vigilant, the active, the brave . . . Gentlemen may cry, Peace, Peace—but there is no peace . . . Why stand we here idle? What is it that gentlemen wish? What would they have? Is life so dear, or peace so sweet, as to be purchased at the price of chains and slavery? Forbid it, Almighty God . . . but as for me, give me liberty or give me death.

He got both.

These freedoms are not found in every nation. America is a great nation because we have magnified the rights of individuals, protected the rights of individuals in our culture. We are careful to allow people to have expression in our society, and we are hated for it.

The third reason we are hated is because we are a nation of laws. We are a people ruled by laws. Lest one thinks that is common, do a careful study of the history of the world. Most of the world's countries do not have a 200-year-old Constitution. They are ruled by dictators. They are ruled by the whims of those leaders or by political parties as they change. The rule of law is what makes civilization possible. The rule of law is what makes an orderly society work. If there is no rule of law, the strongest, toughest bully is the one who runs the country.

America is a country of law and order because of the philosophies of the people who founded this Nation. They believed in the rule of law because of what they knew from the Bible. Our Constitution and the constitutions of most of the governments in the world are similar and are indeed based upon the Ten Commandments. Our fathers knew that the Ten Commandments and the laws of God were a basis for all laws. They understood the concepts of absolute right and absolute wrong. There were not many who believed in what we today call situational ethics where things change according to our needs. They believed in absolute right and absolute wrong. America was founded on those principles. That is a reason we are hated so much as a nation. We are hated because of the fact we are a beacon of light, a beacon of freedom all the way around the world. We know contemporarily what this means.

One of the greatest speeches of all times was "A Rendezvous with Destiny" made by Ronald Reagan before he was into politics. He talked about the atrocities committed in Castro's Communist Cuba and about the little boat that escaped and washed up on the southern shores of Florida. When the boat came up, a man who escaped talked about what was happening in Communist Cuba. When he was through talking about the atrocities, a woman said: I guess we in this country don't know how lucky we are.

He said: No, no. It is how lucky we are because we had a place to escape to.

What he was saying was, we were that beacon of freedom. Many, including the Senator sitting to my right, will remember 15 years ago when the Communists, then the Soviet Union, were trying to get a foothold in Nicaragua and the freedom fighters were fighting for their freedom. I remember going down there, watching them fight against impossible odds. There is no way they could win, by normal concept. They were fighting.

There was a hospital tent in Nicaragua. It was half the size of this Senate Chamber. I remember so well, this is where the freedom fighters from Nicaragua would come in and get taken care of medically. There was an operating table in the middle of this giant tent. All they did was amputations. The problem was, of course, the mines. They had the beds of all the patients around the perimeter of this hospital tent.

I went around and talked to the individuals. The average age of the fighter in Nicaragua at that time was 19 years old. All the older ones were either maimed or killed. I used to be a pilot in Mexico and I communicate well.

I asked each one: Why is it you are doing this against impossible odds? Why are you doing this? Why are you fighting?

I got to the last bed. Her name was Maria Gonzalez. I asked her that question. She was 18 years old, weighed 90 pounds, and this was her third trip back to the hospital tent. They amputated her leg that morning. Blood was coming through the bandages. That little girl said: We are fighting because they have taken everything we have, our farms, our houses, all that we have. Surely you in the United States don't have to ask that question because you had to fight for your freedoms against the same odds that we are doing today. And with God's help, we will win, as you, with God's help, won.

That little girl didn't know whether our Revolution was fought 25 years ago or 150 years ago. But she was brilliant in her knowledge of freedom. We were the beacon of hope. We were the beacon of freedom.

Do you know the outcome? We are hated because we are the beacon of freedom for the rest of the world. We are hated because in America we have freedom of choice and freedom of worship, we have freedom of expression, and we are a nation of laws.

Now, why was America attacked on September 11? Why did they single us out? America was attacked because of our system of values. It is a spiritual war. It is not just because we are Israel's best friend. We are Israel's best friend in the world because of the character we have as a nation. We came under attack and we are Israel's best friend.

One of the reasons God has blessed our country is because we have honored his people. Genesis 12:3 says: I will bless them who bless you. I will curse him who curses you. This is God talking about Israel.

Madam President, on the table where you sit is a Bible. You can look it up. He said: I will bless them who bless you. I will curse him who curses you. God is talking about Israel.

One of the reasons America has been blessed abundantly over the years is because we as a society have opened our doors to Jewish people. Jewish people have been blessed in the United States of America. When the tiny State of Israel was founded in 1948, we stood in the beginning with Israel. We were the first country to stand up for Israel. Because we took a stand, other nations in the world followed after very quickly. The United States made it possible for there to be an Israel. We stood with Israel again and again and again in its fight to survive.

Make no mistake. It is not just because of our support of Israel. It is what we believe as a nation that caused us to come under attack.

Recently in the city of Durban, South Africa, there was a conference called the World Conference on Racism. African Christians are being slaughtered by the thousands today by Islamic fundamentalists in Sudan. You didn't hear a lot about that in the reports of this conference; you didn't hear about racism in South Africa. I have a mission in West Africa and have become pretty familiar with some of the atrocities and the ethnic cleansing going on in the world today.

I can remember standing at this podium when we were under a different President. He was trying to get us to send troops into Kosovo, and used in his arguments in Kosovo all the ethnic cleansing and the difficulty going on. I said at that time, for every one person who is killed, who is ethnically cleansed in Kosovo, on any given day there are over 100 who are killed and ethnically cleansed in West Africa alone. Do we hear about that? No, we didn't hear about that at the Conference on Racism. What you heard was how the nations of the world came together and decided all the attention should be focused on the tensions in the Middle East. They were appeasing the terrorists.

Israel is under attack in the Middle East because it is the only true democracy that exists in the Middle East. There are more than 20 Arab nations in north Africa and in the Middle East. Virtually every Arab nation is run by either a king or a dictator. Israel is the only true democracy that exists in the Middle East.

Madam President, did you know if you are an Arab and have an Israeli citizenship, you can vote in the country of Israel? Did you know the Arabs

have parties in the Knesset, the Congress of Israel? Israel is the only true democracy that exists in the Middle East. It has a Western form of government based on the laws we see in the Bible. The laws of God that our country is based on are the same laws from which Israel gets its law. It represents the laws of God. That is the reason it is under attack.

We ought to be Israel's best friend. If we cannot stand for Israel today, can we ever again be counted on as a beacon of hope, a beacon of freedom for oppressed nations? You may ask what does this have to do with the attack on America? We are under attack because of our character and because we have supported the tiny little nation in the Middle East. That is why we are under attack. If we don't stand for this tiny country today, when do we start standing for tiny little countries in the world that are right?

Yasser Arafat and others do not recognize Israel's right to the land. They don't recognize Israel's right to exist.

I will discuss seven things I consider to be indisputable and incontrovertible evidence and grounds to Israel's right to the land. You have heard this before, but it has never been in the RECORD. Most know this. We are going to be hit by skeptics who are going to say we are being attacked all because of our support for Israel, and if we get out of the Middle East all of the problems will go away. That is not so. It is not true. If we withdraw, it will come to our door and will not go away. I have some observations to make about that in just a minute, but first the seven reasons that Israel has the right to the land.

Israel has a right to the land because of all the archeological evidence. This is reason No. 1. It all supports it. Every time there is a dig in Israel, it does nothing but support the fact that Israelis have had a presence there for 3,000 years. They have been there for a long time. The coins, the cities, the pottery, the culture—there are other people, groups that are there, but there is no mistaking the fact that Israelis have been present in that land for 3,000 years.

It predates any claims that other peoples in the regions may have. The ancient Philistines are extinct. Many other ancient peoples are extinct. They do not have the unbroken line to this date that the Israelis have.

Even the Egyptians of today are not racial Egyptians of 2,000, 3,000 years ago. They are primarily an Arab people. The land is called Egypt but they are not the same racial and ethnic stock as the old Egyptians of the ancient world. The Israelis are in fact descended from the original Israelites. The first proof, then, is the archeology.

The second proof of Israel's right to the land is the historic right. History supports it totally and completely. We know there has been an Israel up until

the time of the Roman Empire. The Romans conquered the land. Israel had no homeland, although Jews were allowed to live there. They were driven from the land in two dispersions: One was in 70 A.D. and the other was in 135 A.D. But there was always a Jewish presence in the land.

The Turks, who took over about 700 years ago and ruled the land up until about World War I, had control. Then the land was conquered by the British. The Turks entered World War I on the side of Germany. The British knew they had to do something to punish Turkey and also to break up that empire that was going to be a part of the whole effort of Germany in World War I, so the British sent troops against the Turks in the Holy Land.

One of the generals who was leading the British armies was a man named Allenby. Allenby was a Bible-believing Christian. He carried a Bible with him everywhere he went and he knew the significance of Jerusalem.

The night before the attack against Jerusalem to drive out the Turks, Allenby prayed that God would allow him to capture the city without doing damage to the holy places.

That day, Allenby sent World War I biplanes over the city of Jerusalem to do a reconnaissance mission. You have to understand that the Turks had at that time never seen an airplane. So there they were, flying around. They looked in the sky and saw these fascinating inventions and did not know what they were and they were terrified by them. Then they were told that they were being opposed by a man named Allenby the next day, which in their language means "man sent from God" or "prophet from God." They dared not fight against a prophet from God, so the next morning when Allenby went to take Jerusalem, he went in and captured it without firing a single shot.

The British Government was grateful to Jewish people around the world and particularly to one Jewish chemist who helped them with the manufacture of niter. Niter is an ingredient which goes into nitroglycerin, necessary to the war effort. They were getting dangerously low of niter in England at that time, so the chemist, who was called Weitzman, discovered a way to make it from materials that existed in England.

It was coming from the new world over there, the niter was. But the German U-boats were shooting them down so it was all at the bottom of the Atlantic Ocean. When Weitzman discovered a way to make it from materials that existed in England, it saved the British war effort. Out of gratitude to this Jew and out of gratitude to Jewish bankers and financiers and others who lent financial support, England said we are going to set aside a homeland in the Middle East for the Jewish people. And that is history.

The homeland that Britain said it would set aside consisted of all of what is now Israel and all of what was then the nation of Jordan, the whole thing. That was what Britain promised to give the Jews in 1917.

In the beginning, there was some Arab support for this. There was not a huge Arab population in the land at that time and there is a reason for that. The land was not able to sustain a large population of people. It just didn't have the development it needed to handle all those people, and the land wasn't really wanted by anybody.

I want you to listen to Mark Twain. Have you ever read "Huckleberry Finn" or "Tom Sawyer"? Mark Twain—Samuel Clemens—took a tour of Palestine in 1867. This is how he described it. We are talking about Israel. He said:

A desolate country whose soil is rich enough but is given over wholly to weeds. A silent, mournful expanse. We never saw a human being on the whole route. There was hardly a tree or a shrub anywhere. Even the olive and the cactus, those fast friends of a worthless soil, had almost deserted the country.

Where was this great Palestinian nation? It didn't exist. It wasn't there. The Palestinians weren't there. Palestine was a region named by the Romans, but at the time it was under the control of Turkey and there was no large mass of people there because the land would not support them.

This is the report of the Palestinian Royal Commission, created by the British. It quotes an account of the conditions on the coastal plain, along the Mediterranean Sea in 1913. This is the Palestinian Royal Commission. They said:

The road leading from Gaza to the north was only a summer track, suitable for transport by camels or carts. No orange groves, orchards or vineyards were to be seen until one reached the Yavnev village. Houses were mud. Schools did not exist. The western part toward the sea was almost a desert. The villages in this area were few and thinly populated. Many villages were deserted by their inhabitants.

The French author Voltaire described Palestine as:

A hopeless, dreary place.

In short, under the Turks the land suffered from neglect and low population, and that is a historical fact. The nation became populated with both Jews and Arabs because the land came to prosper when Jews came back and began to reclaim it. Historically, they began to reclaim it. If there had never been any archeological evidence at all to support the rights of the Israelis to the territory, it is also important to recognize that other nations in the area have no longstanding claim to the country either.

Madam President, did you know that Saudi Arabia was not created until 1913? Lebanon until 1920? Iraq didn't exist as a nation until 1932; Syria until

1941; the borders of Jordan were established in 1946, and Kuwait in 1961.

Any of these nations who would say that Israel is only a recent arrival would have to deny their own rights as recent arrivals as well. They did not exist as countries. They were all under the control of the Turks. So, historically, Israel gained its independence in 1948.

The third reason I believe the land belongs to Israel is because of the practical value of the Israelis being there. Israel today is a modern marvel of agriculture. Israel is able to bring more food out of a desert environment than any other country in the world. The Arab nations ought to make Israel their friend and import technology from Israel that would allow all the Middle East, not just Israel, to become an exporter of food. Israel has unarguable success in its agriculture.

The fourth reason I believe Israel has the right to the land is on the grounds of humanitarian concern. You see, there were 6 million Jews slaughtered in Europe in World War II. The persecution against the Jews has been very strong in Russia since the advent of communism. It was against them even before then under the Czars.

These people have a right to their homeland. If we are not going to allow them a homeland in the Middle East, then where? What other nation on Earth is going to cede territory? To give up land?

They are not asking for a great deal. You know the whole nation of Israel would fit into my State of Oklahoma seven times. So on humanitarian grounds alone, Israel ought to have the land.

The fifth reason Israel ought to have the land is because she is a strategic ally to the United States. Whether we realize it or not, Israel is a detriment, an impediment to certain groups hostile to democracies and hostile to those things that we believe in, hostile to the very things that make us the greatest nation in the history of the world. They have kept them from taking complete control of the Middle East. If it were not for Israel, they would overrun the region. They are our strategic ally.

Madam President, it is good to know that we have a friend in the Middle East that we can count on. They vote with us in the United Nations more than England. They vote with us more than Canada, more than France, more than Germany, more than any other country in the world.

The sixth reason is that Israel is a roadblock to terrorism. The war we are now facing is not against a sovereign nation. It is a group of terrorists who are very fluid, moving from one country to another. They are almost invisible. That is who we are fighting against. We need every ally we can get. If we do not stop terrorism in the Middle East, it will be on our shores. We

have said this and said this and said this.

One of the reasons I believe the spiritual door was opened for an attack against the United States of America is because the policy of our Government has been to ask Israelis and demand with pressure that they not retaliate in a significant way against the terrorist strikes that have been launched against them, the most recent one just 2 days ago.

Since its independence in 1948, Israel has fought four wars: the war in 1948-1949; the war in 1956, the Sinai campaign; the Six-Day War in 1967; and in 1973 the Yom Kippur War, the holiest day of the year, with Egypt and Syria.

You have to understand that in all four cases, Israel was attacked. Some people may argue that wasn't true because they went in first in the war of 1956. But they knew at that time that Egypt was building a huge military to become the aggressor. Israel, in fact, was not the aggressor and has not been the aggressor in any of the four wars.

Also, they won all four wars against impossible odds. They are great warriors. They consider a level playing field being outnumbered two to one.

There were 39 Scud missiles that landed on Israeli soil during the gulf war. Our President asked Israel not to respond. In order to have the Arab nations on board, we asked Israel not even to participate in the war. They showed tremendous restraint and did not. And now we've asked them to stand back and not do anything over these last several attacks.

We have criticized them. We have criticized them in our media. Local people in television and radio offer criticisms of Israel not knowing the true issues. We need to be informed.

I was so thrilled when I heard a reporter pose a question to our Secretary of State, Colin Powell. He said, "Mr. Powell, the United States has advocated a policy of restraint in the Middle East. We have discouraged Israel from retaliation again and again, and again because we've said it leads to continued escalation—that it escalates the violence." He said, "Are we going to follow that preaching ourselves?"

Mr. Powell indicated that we would strike back. In other words, we can tell Israel not to do it, but when it hits us we are going to do something. That is one of the reasons I believe the door was opened. Because we have held back our tiny little friend. We have not allowed them to go to the heart of the problem. The heart of the problem—that is where we are going now.

But all that changed yesterday when the Israelis went into the Gaza with gunships and into the West Bank with F-16s. With the exception of last May, the Israelis had not used F-16s since the 1967 7-Day War. And I am so proud of them because we have to stop terrorism. It is not going to go away. If

Israel were driven into the sea tomorrow, if every Jew in the Middle East were killed, terrorism would not end. You know that in your heart. Terrorism would continue.

It is not just a matter of Israel in the Middle East. It is the heart of the very people who are perpetrating this stuff. Should they be successful in overrunning Israel—they won't be—but should they be, it would not be enough. They will never be satisfied.

No. 7, I believe very strongly that we ought to support Israel; that it has a right to the land. This is the most important reason: Because God said so. As I said a minute ago, look it up in the book of Genesis.

In Genesis 13:14-17, the Bible says:

The Lord said to Abram, "Lift up now your eyes, and look from the place where you are northward, and southward, and eastward and westward: for all the land which you see, to you will I give it, and to your seed forever. . . . Arise, walk through the land in the length of it and in the breadth of it; for I will give it to thee."

That is God talking.

The Bible says that Abram removed his tent, and came and dwelt in the plain of Mamre, which is in Hebron, and built there an altar before the Lord. Hebron is in the West Bank. It is at this place where God appeared to Abram and said, "I am giving you this land,"—the West Bank.

This is not a political battle at all. It is a contest over whether or not the word of God is true. The seven reasons here, I am convinced, clearly establish that Israel has a right to the land.

Eight years ago on the lawn of the White House, Yitzhak Rabin shook hands with PLO Chairman, Yasser Arafat. It was a historic occasion. It was a tragic occasion.

At that time, the official policy of the Government of Israel began to be, "Let us appease the terrorists. Let us begin to trade the land for peace." This process has continued unabated up until last year. Here in our own Nation, at Camp David, in the summer of 2000, then Prime Minister of Israel, Ehud Barak, offered the most generous concessions to Yasser Arafat that had ever been laid on the table.

He offered him more than 90 percent of all the West Bank territory; sovereign control of it. There were some parts he did not want to offer, but in exchange for that he said he would give up land in Israel proper that the PLO was not asking for.

And he also did the unthinkable. He even spoke of dividing Jerusalem and allowing the Palestinians to have their capital there in the East. Yasser Arafat stormed out of the meeting.

Why did he storm out of the meeting? Everything he has said he has wanted all of these years was put into his hand. Why did he storm out of the meeting?

A couple of months later, there began to be riots, terrorism. The riots began

when, now Prime Minister, Ariel Sharon, went to the Temple Mount. And this was used as the thing that lit the fire and that caused the explosion.

Did you know that Sharon did not go unannounced and that he contacted the Islamic authorities before he went and secured their permission and had permission to be there? It was no surprise. The response was very carefully calculated. They knew the world would not pay attention to the details.

They would portray this in the Arab world as an attack upon the holy mosque. They would portray it as an attack upon that mosque and use it as an excuse to riot. Over the last eight years, during this time of the peace process, where the Israeli public has pressured its leaders to give up land for peace because they're tired of fighting, there has been increased terror.

In fact, it has been greater in the last eight years than any other time in Israel's history. Showing restraint and giving in has not produced any kind of peace. It is so much so, that today the leftist peace movement in Israel does not exist because the people feel they were deceived.

They did offer a hand of peace, and it was not taken. That is why the politics of Israel have changed drastically over the past 12 months. The Israelis have come to see that, "No matter what we do, these people do not want to deal with us . . . They want to destroy us." That is why even yet today the stationery of the PLO still has upon it the map of the entire state of Israel, not just the tiny little part they call the West Bank that they want. They want it all.

The unwavering loyalty we have received from our only consistent friend in the Middle East has got to be respected and appreciated by us. No longer should foreign policy in the Middle East be one of appeasement. As Hiram Mann said, "No man survives when freedom fails. The best men rot in filthy jails and those who cried 'appease, appease' are hanged by those they tried to please."

Islamic fundamentalist terrorism has now come to America. We have to use all of our friends, all of our assets, and all of our resources to defeat the satanic evil.

When Patrick Henry said, "We will not fight our battles alone. There is a just God who reigns over the destiny of nations who will raise up friends who will fight our battles with us," he was talking about all our friends, including Israel. And that is what is happening, as of yesterday and I thank God for that. Israel is now in the battle by our side.

That is what is happening. As of yesterday, Israel is now in the battle by our side, and I thank God for that. It is time for our policy of appeasement in the Middle East and appeasement to the terrorists to be over. With our

partners, our victory must and will be absolute victory.

I yield the floor.

The PRESIDING OFFICER. The Senator from Michigan.

Ms. STABENOW. Madam President, I was to speak next, but I ask unanimous consent that the Senator from Vermont be given 3 minutes and then I have the opportunity to address the Senate after that.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Vermont.

DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATIONS ACT, 2002—CONFERENCE REPORT—Continued

Mr. JEFFORDS. Madam President, as chairman of the Environment and Public Works Committee, which is the lead authorizing committee for many of the programs authorized in the Transportation Equity Act for the 21st Century, I would like to comment on the pending FY 2002 transportation appropriations conference report.

Overall, this is an excellent bill and I intend to vote for it. However, there are a few provisions in the highway portion of this legislation that concern me. TEA-21 represented a carefully negotiated compromise between many different points of view, numerous committees, and the entire House and Senate. One key provision of this compromise legislation was Revenue Aligned Budget Authority—RABA—which ensured that obligations from the Highway Trust Fund would equal revenues into the fund, called TEA-21. TEA-21 determined a carefully negotiated breakdown between the share of RABA funds that would flow to the States through the apportionment formulas and the share that would be competitively distributed through the allocated programs.

Unfortunately, the conference report makes significant changes to the authorization for RABA funding. As it has done in each of the past 2 years, the conference report ignores the authorized distribution of funds for allocated programs under RABA. However, this time, rather than giving the money back to the States through the formulas, this legislation earmarks it for special projects. In addition, the conference report earmarks nearly \$500 million that was supposed to be distributed to States through the apportionment formulas. As a result, some States will lose significant amounts of highway funding. In essence, I am very concerned that the appropriators are rewriting the apportionment formulas that were so carefully negotiated in TEA-21.

I do not mean to begrudge the appropriators their prerogative to earmark funding for specific projects. In fact, I

am very pleased that some of the funding is set aside for Vermont. However, at some point we do have to draw the line on earmarking when it threatens the very fabric of a carefully negotiated authorization. Unfortunately, this year we may have finally crossed that line.

I look forward to working with the appropriators next year and throughout the reauthorization process to make sure we do a better job of maintaining the integrity of TEA-21 while providing the appropriators flexibility within the guidelines set forth in that law. TEA-21 is a delicately balanced piece of legislation and we must be careful not to upset that balance.

I yield back any time I have.

The PRESIDING OFFICER (Mr. DURBIN). The Senator from Michigan is recognized.

PARTISAN ATTACKS ON THE MAJORITY LEADER

Ms. STABENOW. Mr. President, I rise today to express great concern about recent events and comments that have been made in this Chamber and in the House of Representatives that I believe are not in keeping with the sense of cooperation and bipartisanship that we have seen since September 11.

I remember, after the horrible attacks that we all grieved about and have focused on, on that day of September 11 we joined together on the Capitol steps, and one of our colleagues spontaneously started singing "God Bless America," and we all joined in. And there was a sense of purpose and dedication and commitment as Americans. We all said that while we may have had differences—that is what it is all about in a democracy—we were going to put aside the partisan bickering and the personal assaults and do as our President asked, which was to come together and focus on the needs of the country and to set a new tone.

And then a few weeks later we saw our own majority leader and his staff under another kind of attack, that of anthrax. It came to be an attack on those of us in the Hart Building. And we have now seen other letters. But we have seen our majority leader and his staff operating with incredible dedication, with poise, with tremendous leadership. And the hard work of the staff is continuing.

In fact, all of our staffs are continuing under very difficult circumstances. My own staff operates out of a room in the loading dock at Russell. We see people who are in various situations around this complex of the Capitol, but they continue to serve.

We have done a lot of things. We immediately responded to the attacks with a commitment of resources for New York and for the Pentagon. Yesterday I had the opportunity to visit

the Pentagon and see the incredible changes that have taken place since September 11. They are rebuilding the Pentagon with speed that is amazing. Everyone involved in that should be commended for the work they are doing to rebuild this important part of our country and our national security and leadership.

We have responded to that. We have passed airport security bills. Yes, there were differences, but they were worked out to move us forward in terms of airport and airline security.

We have passed economic legislation to support the airlines and passed a sweeping antiterrorism bill that has included the ability to track the money through money laundering provisions—I was pleased to be a part of it in the Banking Committee—as well as upgrading the tools available to law enforcement officials and create the kinds of opportunities to reach out and prevent terrorism as well as to respond to it.

We have continued to move the appropriations bills through this process. We are coming to the conclusion of that in the next couple of weeks. But we are still debating economic recovery, how best to do that. What should be our priorities? Should we, in fact, invest in additional homeland security, beefing up our public health infrastructure, as I hope we will do?

But we are now seeing a constant drone of attacks and comments being made about our Senate majority leader, and I just have to rise today to express deep disappointment and concern about that. We have seen personal comments being made.

Last week the chair of the House Ways and Means Committee made statements about our leader saying there was nothing inside the leader's head on which to focus. There have been implications, with all kinds of derogatory statements that have been made about his leadership and calls for him to step aside because he may be putting forward a different vision or set of values and priorities than someone on the other side—statement after statement, attacks about someone's sincerity and their patriotism and their leadership that are just not helpful and not necessary and, by the way, absolutely absurd.

I found it offensive, when we were listening to the debate on the energy bill on Friday; over and over again it was laced with personal comments, comments that are unbecoming to this body or the body on the other side of the building from which I came as a House Member.

Mrs. BOXER. Will the Senator yield for a question?

Ms. STABENOW. I am happy to yield to my good friend from California.

Mrs. BOXER. First, I want to say how proud I am you took to the floor to bring this to light. I think the

American people are ill-served, as you do, when there are personal attacks on any of our leaders.

Do we have differences? Yes. Should we express those differences? Absolutely. Because, frankly, I have a lot of people who say: What really is the difference between Democrats and Republicans? So the fact that we do not agree on an economic stimulus package is to be expected. The fact that the Democrats are fighting for people who lost their jobs, yes, that is to be expected. The fact that we do not think it is right to give big rebate checks to the largest and most wealthy corporations in America and call it a stimulus, the fact that we do not agree with it is to be expected. The fact that the other side would support that is to be expected. So debating that is fine.

But my colleague has pointed out the viciousness of the attack against the leader of this Senate, TOM DASCHLE, who happens to be one of the kindest, most compassionate people in politics today, is something that cannot go by without a statement.

So I say to my friend, by way of a question, isn't it true that the people of this country expect us to have differences, expect us, on domestic policy, to bring those differences to light, where we are so united on the terrorism front—and we support our President and our Secretary of State; and we are moving together in this fight; there are no differences really, not even around the edges on that. But isn't it a fact that it is fine for us to have these differences, but that these differences should be debated with respect, with fairness, and with dignity?

Ms. STABENOW. I couldn't agree more with my friend from California. I know the families I represent in Michigan are saying to me: We know there are differences in approaches.

That is a reason why they sent me here. And I am of a different party, a different philosophy, on economic questions possibly, or other domestic issues, than those on the other side of the aisle.

They expect us to operate with civility, with respect. I believe and in fact have been telling people in Michigan that there is a new day, that since September 11 we have come together. Yes, we have differences in priorities. We are Americans. Under the Constitution, we have a right, an obligation, to give our point of view. There will be differences.

The personal attacks, the vicious partisan attacks that we have heard recently are just the same old thing we have seen for too long around here. People don't want to see that happening.

I will not question someone's patriotism. I will not say because they differ with my thoughts that there is nothing between their ears or that they are somehow a child who wants a recess

and that they are a third grader—whatever the comments were last week. Those kinds of things, frankly, demean all of us. That is my concern.

We have a lot of work to do in this next couple of weeks. People expect us to be focused on their needs and on the needs of the country, the safety of the country, the economy. It is legitimate for us to debate, and we have legitimate differences on how to move the economy forward. I have spoken before in this Chamber about whether it is supply side economics or demand side economics, what is the best mix? That is legitimate. People expect us to do that. We would not be fulfilling our own responsibilities as individual Senators not to come forward with our own ideas. But when it goes on and we hear our leader being attacked for abrogating his responsibility or that every day someone is in pain should be laid at the foot of TOM DASCHLE, that is uncalled for.

I was particularly concerned that there are actually ads being run now attacking our leader in the Senate because of a meeting he had in Mexico with the President of Mexico. Our President has met with Vicente Fox. President Fox has been here. We have welcomed him to the Capitol. They are our neighbors to the south. We have important work to do with them. Certainly part of what happens economically relates to trade and the relationship of our two countries. Yet we have those who have actually paid for partisan ads back in our leader's home State to imply that while a weekend in Mexico might be a nice break from the attacks at hand, in fact, this trip was the wrong thing to do.

I hope we can decide we are going to dedicate the time between now and the end of this session to the serious, vital business at hand and the priorities about which we can disagree. We can disagree about whether or not to drill in Alaska's national wildlife refuge. We can disagree about appropriations priorities.

As someone who has tremendous respect for the leader of this body, I will continue to object when there are personal comments made either about our leader or about the Republican leader or about others on the Senate floor. We have been through too much together since September 11 to turn back to the personal kinds of derogatory statements that were a part of the past. We can do better than that. The American people deserve better. The American people expect us to do better than that.

I call on the President of the United States and the Republican leadership to join us in a vigorous, sincere debate on the priorities for the country, the best way to achieve economic recovery and security, and to do that with the highest and best that is in us. We have a great body and people of wonderful good will on both sides of the aisle in

both Houses, as well as the White House. We can do what the people expect us to do. We can do it right. I hope in fact we will get about the business of doing it.

I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. REID. Mr. President, I ask unanimous consent that the previously scheduled vote which is scheduled for 12:30 now begin at 12:25 p.m. today.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, I ask unanimous consent that the pending amendment, the Domenici amendment No. 2202, be laid aside, to recur at 2:15 p.m. today; that there then be 5 minutes of debate equally divided and controlled in the usual form prior to a vote in relation to the amendment; that there be no second-degree amendments in order, nor to the language proposed to be stricken.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATIONS ACT, 2002—Continued

The PRESIDING OFFICER. Under the previous order, the question is on agreeing to the conference report to accompany H.R. 2299.

The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. NICKLES. I announce that the Senator from Texas (Mrs. HUTCHISON) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 97, nays 2, as follows:

[Rollcall Vote No. 346 Leg.]

YEAS—97

Akaka	Durbin	McConnell
Allard	Edwards	Mikulski
Allen	Ensign	Miller
Baucus	Enzi	Murkowski
Bennett	Feingold	Murray
Biden	Feinstein	Nelson (FL)
Bingaman	Fitzgerald	Nelson (NE)
Bond	Frist	Nickles
Boxer	Graham	Reed
Breaux	Gramm	Reid
Brownback	Grassley	Roberts
Bunning	Gregg	Rockefeller
Burns	Hagel	Santorum
Byrd	Harkin	Sarbanes
Campbell	Hatch	Schumer
Cantwell	Helms	Sessions
Carnahan	Hollings	Shelby

Bayh McCain

NOT VOTING—1

Hutchinson

The conference report was agreed to. Mrs. MURRAY. Mr. President, I move to reconsider the vote, and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

RECESS

The PRESIDING OFFICER. Under the previous order, the Senate stands in recess until the hour of 2:15 p.m.

Thereupon, the Senate, at 12:55 p.m., recessed until 2:15 p.m. and reassembled when called to order by the Presiding Officer (Mr. CLELAND).

COMPREHENSIVE RETIREMENT SECURITY AND PENSION REFORM ACT OF 2001—Continued

The PRESIDING OFFICER. The Senator from New Mexico is recognized.

Mr. DOMENICI. Mr. President, parliamentary inquiry: What bill is pending before the Senate? What are the agreements regarding it?

The PRESIDING OFFICER. The pending bill is H.R. 10, to which pending is the Daschle substitute amendment, and an amendment to that is the amendment by the Senator from New Mexico with time for debate evenly divided.

Mr. DOMENICI. Has a vote been ordered?

The PRESIDING OFFICER. The yeas and nays have not been ordered.

Mr. DOMENICI. I ask for the yeas and nays on final passage.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. DOMENICI. Mr. President, I yield myself the 2½ minutes that I have.

First, I thank the chairman of the Budget Committee for cosponsoring this amendment.

Second, for those—they are numerous in the Senate—who are for the railroad retirement bill, this amendment is not a poison pill for the railroad retirement bill. It does not impact how this bill will be implemented. It simply will make sure the costs are recorded correctly. If you record them correctly rather than direct how they will be scored, you have no impact on whether the bill proceeds.

There is no additional point of order or anything that is an impediment to the bill. It is just that we very seldom, if ever, let a bill go through that costs money where we direct how it should be scored. In this case, the Congressional Budget Office was asked how much it will cost. They told us. Instead of scoring it as we would normally in almost every single bill that affects spending, the House, in the final moments as this bill was getting ready to be passed, put in language saying it shouldn't be scored as it is; we want to score it another way; we direct it not be scored costing \$15.3 billion.

All I ask is that provision be stricken. The bill does not have language in it, if the Domenici amendment is agreed to, that directs how you score it, but rather the costs will be scored as estimated by the Congressional Budget Office, which does the same thing for every bill that goes through. Bills do not have language telling you that you must score it differently than you score all the other bills and differently than the Congressional Budget Office indicates.

I reserve whatever time I have and yield the floor.

The PRESIDING OFFICER. Who yields time in opposition?

The Senator from Montana.

Mr. BAUCUS. Mr. President, I yield myself a minute and a half.

Mr. President, I have the highest regard for the Senator from New Mexico and also for Senator CONRAD, chairman of the Budget Committee. They do an excellent job in a very difficult situation trying to keep us on track with the budget matters. They are very good Senators. I think people from their home States know that. But I just wanted to state that.

The question here is, does this cost any money? If you assume it does cost money, then there is an argument against directed scorekeeping; that is, there is an argument we do have outlays of maybe \$15, \$17 billion.

What is it we are addressing? We are addressing that the tier 2 retirement trust fund buys securities; that is, stocks and bonds, rather than buying

Treasury bills. The question is, Is buying equity securities the same or different from buying Treasury notes? Under the rules, they are different; that is, one is an outlay and the other is not. So it will be a \$15 billion outlay cost under the budget rules if the trust fund invests in securities; that is, equity securities, and no outlay, no cost when the trust fund buys Treasury bonds.

I yield myself an additional 30 seconds.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, technically, the chairman and the Senator from New Mexico are right because that is the way the budget rules have been applied. And this is a gray area. This is not similar to buying a truck or a gold mine or buying another physical asset. Rather, it is buying securities instead of Treasury bonds.

I yield myself an additional 30 seconds.

So I am saying to my friends, the Government is no better off or worse off whatsoever if the trust fund buys securities rather than buying Treasury notes, as all pension funds do. They invest in both Treasury securities as well as equity securities.

So I urge my colleagues to not apply this rule at this time because the Government is no better or worse off; second, if the Senator's amendment were to be adopted, that would be the end of the railroad retirement bill this year because we would have to go back to the House and it would not survive this session or maybe even this Congress.

The PRESIDING OFFICER. The time for the Senator from Montana has expired.

The Senator from New Mexico.

Mr. DOMENICI. Mr. President, I yield whatever time I have to Senator CONRAD and thank him for cosponsoring the amendment.

The PRESIDING OFFICER. The Senator from North Dakota.

Mr. CONRAD. Mr. President, I favor the railroad retirement legislation. I strongly favor it. But I just as strongly support this amendment to knock out directed scorekeeping because I think it misleads our colleagues and our countrymen.

Directed scorekeeping would suggest this legislation costs \$250 million this year to implement. That simply is not correct. The cost is \$15.6 billion. The hard reality is, that is what the Federal Government is going to have to borrow to fund this legislation, \$15.6 billion, not \$250 million. We should not say otherwise.

We can support this legislation but be direct and clear with respect to its cost.

The PRESIDING OFFICER. The Senator's time has expired.

The question is on agreeing to amendment No. 2202. The yeas and nays

have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. NICKLES. I announce that the Senator from Texas (Mrs. HUTCHISON) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 40, nays 59, as follows:

[Rollcall Vote No. 347 Leg.]

The amendment (No. 2202) was rejected.

Mr. REID. Mr. President, I move to reconsider the vote.

Mr. BAUCUS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Minnesota.

UNANIMOUS CONSENT REQUEST—
H.R. 2716

Mr. WELLSTONE. Mr. President, I do not want to rudely interrupt, but I want to take a minute to make a unanimous consent request.

I see the ranking member of the Veterans' Committee in the Chamber. Shortly, I am going to ask unanimous consent to pass a veterans homeless bill. I will give my colleagues the background.

Three weeks prior to the Thanksgiving recess, I came to the Chamber to try to pass a version of the homeless veterans assistance bill. LANE EVANS has done a lot of work on the House

side, so has CHRIS SMITH. It is an excellent bill. We passed this bill out of the Veterans' Committee by a unanimous vote.

I had to come to the Chamber four times asking unanimous consent to pass the legislation. There was an anonymous hold. Again, I say to colleagues, any Senator certainly can object, but this whole business of anonymous holds and no arguments made is unbelievable. So I had to say to my colleagues on the other side that on non-emergency measures, I was putting a hold on everything. My hold was not anonymous. I said on the floor—it is me—I am putting a hold on it.

We have been doing all this work with Democrats and Republicans on the House side. CHRIS SMITH, who is chairman of the Veterans' Committee in the House, has been especially helpful on the bill. We had strong bipartisan support on the Senate side as well. We preconferenced it, and we have unanimity of opinion. This veterans homeless bill is superb legislation.

About a third of the homeless adult males in the country are veterans. Many of them are Vietnam vets. Most struggle with posttraumatic stress syndrome. Most struggle with addiction. They do not get help. It is a scandal.

This legislation is one-stop shopping, places where people can go for community-based care, mental health services, treatment, and assistance in getting affordable housing. My God, we could not do anything that is better.

This legislation came back from the House. I thought we certainly would pass it. I know the chair of the Veterans' Committee in the House, a Republican, has urged colleagues to do so.

Now I understand we have another one of these anonymous holds.

Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 201, H.R. 2716.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. CRAIG. Mr. President, I am sorry that I have to do this, but for the proceedings we are now under, and the fact we have dealt with this issue before—my colleague and I agree on much of what he has just said, but I do believe the way he now attempts to address this issue does not fit where we want to go or where the Senate has acted and the House has acted. Therefore, I object.

The PRESIDING OFFICER. Objection is heard.

The Senator from Minnesota.

Mr. WELLSTONE. If I had gone further, I would have mentioned also, with the support of Senator ROCKEFELLER and Senator SPECTER, the unanimous consent request was that the amendment be agreed to; the act, as amended, be read a third time and passed; and the motion to reconsider be

laid upon the table. Of course, my colleague from Idaho has objected.

I am a bit of an emotional Senator. I say to my good friend from Idaho that unlike the Senator who has put an anonymous hold on this bill, my hold is not anonymous. I have a hold on every single resolution and legislation introduced by my colleagues on the other side of the aisle that is non-emergency—all of it. It is not anonymous. I have just said it here.

I did it for 3 weeks before Thanksgiving. I cannot believe it. Now we are back at this again. It comes over here from the House with the full approval of the chair of the Veterans' Committee—I think unanimous support—support of both Senator ROCKEFELLER, who chairs the Veterans' Committee, and Senator SPECTER.

We have been working on this for several years. It is a scandal. Is it too much to ask that we get this support to veterans? People are giving all these speeches about how great it is that our men and women are serving our country, they are in harm's way, we support them—and we do, I agree—and then when they get out of the Armed Services and they are now veterans, all of a sudden we do not say thank you any longer. You don't think you can find it in your hearts to pass this bill that is so important to this group of veterans in this country? That is my first point.

My second point deals with my indignation, for which I apologize. I am just getting sick and tired of these anonymous holds. I really am. Therefore, I say to my good friend from Idaho, I know this is not his position. He has to come out here by proxy, representing someone who has put an anonymous hold on this bill again, in which case I have a hold on all legislation, all resolutions introduced by my good friends on the other side of the aisle that are nonemergency.

Mr. CRAIG. Will the Senator yield?

Mr. WELLSTONE. I will be pleased to yield. I do not yield the floor. I will be pleased to yield for a question.

Mr. CRAIG. Briefly on this issue.

The PRESIDING OFFICER. Will the Senator yield for a question?

Mr. WELLSTONE. I yield for a question.

Mr. CRAIG. I thank the Senator for yielding. As the Senator from Minnesota knows, a hold is not absolute. It merely is to notify those who have objection to the bill that it might be coming up. I think the Senator has operated appropriately. I am not the person who has the hold on his bill, but it is important we deal with the issue in a timely fashion.

There is much of what the Senator said I agree with. I serve on the Veterans' Committee. I do not say by this action I am not in support of veterans, homeless veterans, those who are in need. I understand where the Senator wants to go. My guess is ultimately we

can get there, and I will work with the Senator to make that happen.

Mr. WELLSTONE. Mr. President, I note my colleague from Texas is in the Chamber. I will only take 1 more minute.

I thank the Senator from Idaho. I take his remarks as being very sincere. Again, the reason I have to do this, I say to my colleague, is because I went through this for 3 weeks prior to Thanksgiving. I came to the Senate Chamber 4, 5 times and never could get approval. The hold was anonymous.

Last week, I tried to get approval, and I have tried to get approval since. It is out there. Everybody knows what the bill is. We have been working on this a long time. There is strong bipartisan support for the bill.

I thank my colleague. I hope we can work it out. In the meantime, before we work it out, I want all of my good friends on the other side to know my hold is not anonymous. I have a hold on all their resolutions, amendments, and bills unless they are emergency.

COMPREHENSIVE RETIREMENT SECURITY AND PENSION REFORM ACT OF 2001—Continued

AMENDMENT NO. 2196

(Purpose: To ensure that returns on investment are earned prior to any reduction in taxes or increase in benefits.)

Mr. GRAMM. Mr. President, I call up amendment 2196. It is a short amendment, and I would like it read.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Texas [Mr. GRAMM] proposes an amendment numbered 2196:

On page 2 of the amendment, insert before line 1 the following:

“SEC. 2. Notwithstanding any other provision of this Act, any reduction in tax or increase in benefits shall take effect only to the degree that the Secretary of the Treasury finds that the actual earnings of the Railroad Retirement Investment Trust Fund are sufficient to fund them.”.

Mr. GRAMM. Mr. President, we have before us a bill that 74 Members have cosponsored. It is clear from the previous vote where the votes are on this bill. I remind my colleagues that Senator DOMENICI offered an amendment to strike a provision of the bill that was not in any bill that anybody cosponsored, and it was literally a provision that was written into the bill that orders the Office of Management and Budget, which is the budget scoring arm of the executive branch, and the Congressional Budget Office, which is the budget scoring arm of the legislative branch of Government, to falsify the budget by not counting \$15 billion that is being taken out of the Treasury.

This is an extraordinary provision. It basically ordered both budgeting

arms—the budgeting arm of the executive branch of Government and the budgeting arm of the legislative branch of Government—to simply look the other way and not count \$15 billion being taken out of the Treasury.

Senator DOMENICI, with the support of the chairman of the Budget Committee, offered an amendment to strike that language so at least we could have honest bookkeeping. Only 40 Members of the Senate voted for honest bookkeeping. It is clear this railroad retirement bill is wired.

What I wanted to do was to offer an amendment to achieve everything proponents of the bill claim they want to do but to do it in a responsible manner. I don't know where this amendment is going. I expect it is going to get relatively few votes. However, I feel obligated to offer the amendment and people can do what they want to do with it.

Let me try to define the problem. If you read what people are saying in the paper and you talk to all these very nice people in the hallways who are lobbying for this bill, they say: Look, we have over \$15 billion in our trust fund. It is our money. It is invested in Government bonds. We don't think it is a good investment—I sure agree with them there. They claim they want to take the money and invest it. Then with the higher interest rates that they can earn, they want to lower taxes and increase benefits.

Now, there is a big problem here. If you look at the actual estimates done by the railroad retirement board, you find under any of the three economic scenarios that the railroad retirement trust fund actuaries look at, this proposal does a lot more than simply invest the money. In fact, as I pointed out on many occasions, what this bill does, in essence, is, over a 17-year period, it literally takes \$15 billion of capital out of the trust fund. This chart shows—and this is based on the Railroad Retirement Board's data; this is not my data—under current law the trust fund would build up along the black line entitled “Trust Fund Under Current Law.”

Let me remind my colleagues that railroad retirement is not fully funded. If we had ERISA laws applied to railroad retirement where you had to have a trust fund sufficient to pay benefits, ERISA would shut railroad retirement down today. This is a program that has no actuarial solvency whatever and it is currently receiving huge Federal taxpayer subsidies today and has always received Federal subsidies.

Basically what is going on, this is what the trust fund balance looks like under current law. Proponents of this bill say it doesn't make sense to invest this in Government bonds; let us invest it in stocks and bonds. We will have more money; we can have a better, more secure retirement program. I

agree with that. I am supportive of letting them invest the money. The problem is, that is a smokescreen.

What they are really doing, if you look at what happens to the trust fund before any money is invested, before one single penny is invested, they cut the amount of money the railroads are putting into retirement from 16.1 percent of payroll to 14.75 percent, and it falls to 14.2 percent and then to 13.1 percent. They also lower the retirement age from 62 to 60. At the same time we are raising the retirement age for Social Security, they lower the number of years to be vested from 10 to 5 and they raise benefits. The net result is, even though they assume they will earn 8 percent in real terms, whereas they are only getting 1 percent in real terms from Government bonds the way they are calculating it, even with as high a rate of return, what happens to the trust fund under this bill? What happens to the trust fund is, it goes down because not only are we paying out every penny of earnings from the higher rate of return but we are also paying out principal.

Why doesn't it go broke? The reason it doesn't go broke is, in 2021, the trust fund is now down to about a third of what it would be under current law because you have added all the new benefits. You reduce the amount of money going into the fund so even though you hope to earn a much higher rate of return, you expect all the return and two-thirds of the trust fund.

What happens in 2021 that keeps the system from going bankrupt? The way the bill is written, at that point, the payroll tax, which is down to 13.1 percent of payroll, skyrockets. It goes from 13.1 percent up to 22.1 percent and it does that all in a span of some 5 years.

I ask my colleagues the following question: If railroads are saying they cannot operate profitably while we are putting 16.1 percent of payroll into this retirement program—and remember, they have three retirees for every worker; Social Security has three workers for every retiree; this program is nine times as financially vulnerable as Social Security—if they can't afford to pay 16.1 percent today and they are urging us to let them cut that to 13.1 percent, how can they come in 2025 and afford to pay 22.1 percent of payroll, which is what their numbers require?

Does any Member here not believe that come 2019 the railroads are going to come to Congress and say, we would be required simply to maintain the trust fund at roughly one-fourth of what it would have been without this law, already four-fifths of the trust fund would be good? They are going to run to Congress in 18 years and say, we can't possibly pay a 22.1-percent payroll tax and remain in business. So you are going to either have to have the taxpayer come in and bail out this fund

or you are going to have every railroad in America going broke.

One question that is never answered is, if they can't afford to pay 16.1 percent today, how are they going to afford paying 22.1 percent in 25 years? The point is, they don't ever intend to pay that amount. They are, in essence, asking us, despite all the rhetoric to the contrary, to let them take four-fifths of the trust fund over the next 25 years and divide it up with retirees and then have the Federal Government guarantee the fund so 25 years from now we have one-fourth of the trust fund to pay benefits we have today, and the railroads, which cannot pay 16.1 percent, would be paying 22.1 percent then.

Now, they are going to argue the system would be solvent, they can pay the benefits. But they can only do that with a 22.1-percent payroll tax. Nobody that I know believes that is a tax they can pay. Anyone who looks at this realizes if we adopt this bill, 20 years from now we won't be here, other people will be here, but the railroads will be saying, you are going to have to come and do something because we can't pay these taxes.

Under the best of economic circumstances—and this is data from the railroad retirement board—under the best of circumstances, the bill before the Congress will deplete 53 percent of the trust fund by 2026. Under a more restricted and a more normal economic circumstance, it will deplete 75 percent of the trust fund. And under a pessimistic economic scenario it will bankrupt the trust fund in 20 years. These are not my numbers. These are the numbers of the actuaries of the railroad retirement trust fund.

Now, I understand people want to pass this bill, so I put together an amendment which lets the railroads and the unions do what they want to do, which is take \$15 billion out of the trust fund right now and invest it. That will become a private trust fund and they will have it in stocks and bonds and then they will earn on those stocks and bonds. The amendment I have offered says, look, do everything you are claiming to do here but don't reduce the amount of money going into the trust fund from the railroads and don't increase benefits until you have invested the \$15 billion, and until you have earned a rate of return on it. And then when you are dealing with the interest and not the principal, you can do whatever you want to do.

What this bill does is take the money out of Government bonds and allow it to be invested, \$15 billion of it; then as that money earns interest, you could lower the amount the railroads are paying in, you could lower the retirement age, you could increase benefits, but only to the degree you were doing it with the interest you are earning. You could not spend off the trust fund,

thereby putting the taxpayer at greater risk.

I know if anyone defends the proposal, they will say, look, the trust fund does not go broke under the bill. In fact, I guess they would concede it goes down in value under the expected economic scenario by three-fourths. But there is still enough money to pay the benefits. That is only part of the story. The rest of the story is, the only reason there is enough money to pay benefits at this point under the bill is that it is assumed by them that the tax on the railroads to pay for the retirement benefits has risen from 13.1 percent to 22.1 percent.

Does anybody believe the railroads are capable of paying 22.1 percent of the wages of all the railroad retirees into the railroad retirement trust fund? Are we not here today because the railroads say they cannot pay 16.1 percent? The whole logic, when you strip away the window dressing, is they want to lower the amount they are putting into the trust fund from 16.1 to 13.1 percent, to try to help the railroads. They have worked out an agreement to get the unions to support it by saying, in essence, \$7.5 billion goes to the railroads and giving \$7.5 billion to the union members. But the net result is the trust fund is \$15 billion poorer 17 years from today than it is now. Even though you are earning a higher rate of return, because you are taking out huge amounts, you are depleting the trust fund.

All I am trying to do with this amendment is say invest the money and every penny you earn belongs to the railroads and the unions. Forget about the taxpayer. But don't take the principal out, just take the earnings.

Frankly, if this were some kind of reasonable debate, you might say let's take these higher earnings; part should go to the taxpayer because the taxpayer is paying a substantial amount of these benefits, part should go to the railroads, and part should go to the retirees. But I am saying forget that; take the interest, but don't take the principal. That is the essence of the amendment.

I would like to submit the amendment. I hope my colleagues will accept it. I do not understand how it can be prudent public policy to set out a policy which, while claiming to get a higher rate of return, actually reduces the size of the trust fund available to pay benefits, between now and the year 2026, by 75 percent. How can that make sense? How can it be prudent public policy to set out a program which is salvaged only by the willingness of the railroads to pay to 22.1 percent of all wages into a trust fund, when today they claim they cannot afford to pay 16.1 percent? How can that possibly make any sense?

What I am saying is don't deplete the trust fund. But every penny you earn,

by investing it, you can give to the railroads and you can give to the retirees. But maintain the assets to protect the taxpayers. That is the proposal. I think it is simple and easy to understand. For those who want investment, it gives you investment. For those who want a better rate of return potentially, it gives you a better rate of return. But what it does not let you do is pillage 75 percent of the trust fund over the next 25 years. That it does not let you do.

That is the essence of the amendment.

I yield the floor.

The PRESIDING OFFICER (Mr. EDWARDS). The Senator from Montana.

Mr. BAUCUS. Mr. President, I have been listening carefully to my good friend from Texas, and a lot of what he says is accurate. But he does not, as they say, tell you the whole story. Ultimately, the question comes down to: Are there enough funds in tier 2, in the railroad retirement fund, to pay additional benefits to retirees and spouses and also to decrease the amount of taxes the railroads are now paying? Admittedly, it is a very high rate. That is the question. And can that be done in a fiscally sound manner?

Today the railroad retirement trust fund balance is growing very dramatically. Under current law, the trust fund will have balances this year of about six times the cost of benefits. Through about the year 2020, the ratio never sinks below six. At that point, the year 2020, it continues to decline forever. By the end of 75 years, the balances in the trust fund will equal an unbelievable 53 times the cost of 1 year's benefits.

So the question is, Why all this increase in balances? Isn't there something prudent that can be done about this very large increase in balances? Because under the actuarial estimates it just continues to grow and grow.

And how much of the balance is really necessary? In Social Security, the actuary considers the system to be in actuarial balance in any year the balances of the Social Security trust fund are equal to at least one time the amount of benefits that are paid out in a year. That is Social Security's standards. The actuaries have determined there is at least a 1-to-1 ratio of balances in the Social Security trust fund compared to the costs in that year that have to be paid out. Clearly, today it is much more than one, but the standard, the actuaries say, is 1 to 1. It is not six times or three times, but one.

Today, on the railroad retirement trust fund tier 2, there is a real need, frankly, to do something about the balances in a way that seems reasonable and prudent. There are some changes that should be made. One is the retirement age. Some industries are a lot more hazardous and dangerous than some others. Railroad is certainly

more hazardous and more dangerous than some other industries. The retirement age today in the railroad industry under current law is 62 years. It is only fair that it be reduced to 60 years. In many industries across the Nation, the retirement age is lower than that. It can be 55, and for a hazardous industry such as railroads it makes sense that the retirement age be 60.

In addition, vesting does not have to be a full 10 years as it is today. In many industries, vesting is less than that. It is 5 years.

For survivor benefits, today when a railroader retires, he and his wife will receive 145 percent of wages. If he dies, the widow gets 50 percent. If he were single, it would be 100 percent. So the thought is to at least raise the widow's. If she survives her husband, raise her benefits to 100 percent. It seems to me that the railroader himself would get 100 percent if he retired and is single. It just makes sense.

The current taxes that the company pays are too high. They are much higher than taxes paid in the private arena, and they are higher than what a company would pay in its pension program for its employees.

The idea is to lower the taxes and increase the benefits in a way that is reasonable and prudent so we don't have that huge balance accumulating in the railroad trust fund. I think it is done in a very sound and fair way.

The ultimate question really is, Is the balance of money in the trust fund large enough to accommodate these changes? In the legislation before us, which includes the changes I have indicated, the balances in the trust fund in any year are at least one and two-thirds times greater than the amount needed to pay benefits in that year. That is a higher standard by two-thirds than the standard currently for Social Security. By the end of the 75-year period under this bill, the balances are about 12 times the cost of paying benefits in any 1 year.

Look at the chart of the Senator from Texas. He has that red portion. It continually falls off until about the year 2023. In 2026, his chart stops. It doesn't keep going. If his chart were to keep going, it would have the effect of this chart behind me to my right. It falls down to the levels indicated on the chart of the Senator from Texas, but then it starts right up again at a very high rate.

The low level which is of concern to the Senator from Texas rightfully should be addressed. It is a level which is one and two-thirds times higher than the actuarial balance that the chief actuary at Social Security says must be maintained.

There are provisions in the bill—the Senator from Texas is correct, and the railroad industry agrees and thinks this is just fine—which say if the funds are not what we assume them to be,

then the railroader's and employer's taxes begin to rise. But the Senator from Texas says when that happens, and if it happens, Congress is going to just come right in and bail out the railroad industry.

We have not done that, historically. The last five times this Congress generally addressed the question of the financial viability of the railroads and/or the retirement system, in 1974, in 1981, in 1983, and in 1987, Congress did not bail out the railroads. Congress either decreased benefits or raised employer taxes. We encourage the railroad to solve these problems themselves. We have never "bailed out" the railroad industry.

Further, this legislation before us has lots of built-in sort of requirements of independent audits, of reports, and looking far ahead as possible to try to anticipate if there is going to be a problem of some kind or another.

Specifically, the legislation before us requires the trust fund to have an independent, qualified public accountant to audit the trust. The trust fund then must submit a report to Congress which includes a report based on the audit. The report supplied to Congress must contain financial statements of operations and cashflow.

Moreover, two financial reports required in current law would continue. The chief actuary for the Railroad Retirement Board must also do a major update of actuarial evaluations every 4 years but with annual updates every year by the chief actuary of the Railroad Retirement Board. The Railroad Retirement Board will report annually to the Congress and to the President as to the state of the system. Every year we will get updates.

The lines on the chart of the Senator from Texas as well as these are the intermediate assumptions; that is, there is a pessimistic assumption, there is an intermediate assumption, and there is an optimistic assumption. These are the intermediate assumptions on both of these charts.

What basically drives these assumptions? What is the biggest unknown that we have to look at?

It is essentially the level of employment in the railroad industry. When the level of employment in the railroad industry declines significantly, obviously, as is in the case of Social Security, there are fewer people paying into the trust fund compared with the number of people drawing benefits from the trust fund.

This is an industry which is almost the opposite of Social Security. For Social Security, there are about three workers for every one person paying in. In this industry, it is about one to three. It is a mature industry. It is not a young industry. It is an industry with fewer employees and more retirees.

The question is, How many more fewer employees will there be to accommodate the number of retirees?

I would like you to look at this chart behind me. It indicates that we need not worry about a cut in the number of employees. That is because of increased productivity and increased efficiencies in the railroad industry. It really can't get much lower per ton mile or per railroad mile traveled.

This chart shows the railroad crew size and productivity. As you can see, in about the years 1950 to 1964, the average crew size was five. In the years roughly 1960 to 1978, the crew size was four, and on down to about 1998, the average crew size is two.

You can't get much lower than two for a crew on a train. There is always going to be at least two. We are not going to have fewer employees. We will probably have more trains, which means more employees, but we are not going to have fewer employees per train.

Meanwhile, the revenue per ton mile and per employee, as you can tell by the chart, is increasing at a very high rate. We have more revenue for ton miles per employee. That is going to help the solvency of the trust fund. At the same time there are not going to be any fewer employees than there are today.

The basic point is, Is this the responsible way to solve the problem of explosive trust fund balances? I submit yes. One, the actuaries will maintain a balance that is proper. There will be annual reports galore.

I urge Senators to resist this amendment. It is unnecessary. It is wrong. It means the balances will stay forever. The benefits will not be greater. The burden on taxes will not be lower in due time.

If this amendment is agreed to, despite being wrong on its merits, it is going to probably mean no railroad bill this session, and maybe next year, because we will have to go to conference on this matter.

I yield the floor.

The PRESIDING OFFICER. The Senator from Texas.

Mr. GRAMM. Mr. President, let me be brief. When all the people came to see me about 6 months ago—actually, almost a year ago, in relation to this bill—I sat down to listen to them, having spent about 3 years working on Social Security.

Let me give you my response, based on something I think everybody can understand. Today we are really worried about Social Security because we have 3.3 workers per retiree. We are going to two workers per retiree. We are very concerned about our ability to pay Social Security benefits.

I have done a great deal of work and written a fair amount of material and articles explaining how investing Social Security surpluses in interest-

earning real assets will cause the trust fund in Social Security to grow and will enhance our ability to pay benefits.

But I have never suggested that investing the Social Security surplus could allow us to lower the retirement age in Social Security from 65 to 60. In fact, under current law, it is rising from 65 to 67 even at this moment. I have never suggested that before any money is invested that we could cut Social Security taxes. Someone would laugh in your face if you suggested that.

Now, into my office walk representatives of the railroads and unions, and they say: Look, we have a program which has one worker for every three retirees, not the other way around, which it is with Social Security. This retirement program is in much worse shape than Social Security. We want to invest our trust fund, and we are going to cut the retirement age, reduce the amount of time you have to work to get benefits, increase benefits, and reduce the amount that the railroads are putting into the program through two different payments they are making.

First of all, if, in your retirement, somebody told you they could spend 75 percent of your trust fund, give you more benefits, and you could pay less in, I do not think you would believe it. Well, you should not believe it because it is not true.

My colleague points out my chart ends in 2026. Why? Because in 2026 the payroll tax, which the railroads are saying have to be reduced for them to be able to operate—they have to be reduced from 16.1 percent down to 13.1 percent—by the time we get to 2026, the payroll tax is up not to 16.1 percent but 22.1 percent. Does anybody believe that the railroads can or will pay 22.1 percent of payroll into this retirement program? Nobody believes they can or will.

Everybody understands that 20 years from now we are going to hear this knock on our door. We are not going to be here, but somebody is going to be here, and the railroads are going to say: My God, this retirement program is in terrible trouble, and under law our payroll tax is getting ready to jump from 13.1 percent to 22.1 percent. We cannot pay these taxes. At that point whatever these charts show is not relevant because everybody knows the railroads cannot pay that amount into this program and operate viably in the American economy.

So what is going to happen? You have spent four-fifths of the trust fund or let the railroads spend four-fifths of the trust fund. You have a payroll tax of 22.1 percent. What is going to happen? They are going to say they can't pay it and they are going to ask the Federal Government to intervene.

When you are talking about what good shape this trust fund is in, what is

being called solvency here is having enough money to pay benefits for 4 years. There is no private retirement program under ERISA that would not be shut down if it had assets that would only pay for 4 years.

My amendment is not what I would call a stingy amendment. My amendment says, OK, take this trust fund, and we are going to give you \$15 billion right out of the Treasury. You can invest it on behalf of the retirees. And then you can spend every penny that you earn on that \$15 billion. You can lower the amount railroads are putting into the system. You can give new benefits, but you cannot spend the principal. That is all my amendment does.

If we do not adopt an amendment similar to this, I want to predict, even though I do not think any of us will be here 20 years from now—I certainly will not—that 20 years from now this retirement program is going to be on its back, the railroads are going to be being pulled down economically by having a 22.1-percent payroll tax, and we are going to have a transportation crisis in America.

I do not know if anybody will ever look back at what we are doing here, but they should. Because what we have done, underneath all else, is that while we are doing some things that make sense—letting them invest the trust fund makes sense—we are literally letting them take \$15 billion, we are letting the railroads pocket \$7.5 billion, we are letting them give \$7.5 billion in gifts to their retirees and workers, and we are setting up a situation where there is going to be a train wreck, and the taxpayers are going to be forced to pick up the pieces.

Senator NICKLES and I have no constituency. That is obvious. This thing has been sold. All the railroads have come to Republicans and said: This is great; it will be great for railroads. The unions have come to the Democrats and said: This will be great for the workers. And the bottom line is, nobody cares, apparently, about the taxpayer or about the future of this retirement program.

So we are on the verge of cutting this, taking 75 percent of the money out of this trust fund and giving it away, committing ourselves to the railroads, having to pay a tax that we know they are not capable of paying, that we know cannot be paid. How are railroads going to put 22.1 percent of every dollar they pay to every worker into this trust fund 20 years from now when they cannot put 16.1 percent in today? They are not going to be able to do it.

So all my amendment says is, let them invest it and do whatever they want to do with the interest, but do not let them spend the principal. What that will mean is, the trust fund will basically stay at its current level. They can reduce the amount railroads

are paying in. They can increase benefits. Neither of those actions, in my opinion, is fiscally responsible, but they cannot simply pillage the trust fund for \$15 billion over 17 years, which is exactly what happens under this proposal—and every set of figures used by every person in this debate all come from the railroad retirement board. All of them show that the trust fund, over the next 20 years, is depleted, under the expected economic projections, by 75 percent. That cannot be good public policy.

I understand that Senator NICKLES has an amendment. What I would like to do is yield the floor. If there is any more debate on this amendment, there can be, and I would be happy to have the amendment set aside. Senator NICKLES can offer his amendment, and then it can be debated. And then we could have the vote on the two amendments and sort of see where we are.

I yield the floor.

The PRESIDING OFFICER. The Senator from Oklahoma.

AMENDMENT NO. 2175 TO AMENDMENT NO. 2170

(Purpose: To use a 5-year average rather than a 10-year average on capturing the average account benefits ratio)

Mr. NICKLES. Mr. President, I ask unanimous consent the pending amendment be laid aside and I call up amendment No. 2175.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

The clerk will report.

The senior assistant bill clerk read as follows:

The Senator from Oklahoma [Mr. NICKLES] proposes an amendment numbered 2175 to amendment No. 2170:

On page 40, line 1, strike "10 most" and insert "5 most".

Mr. NICKLES. Mr. President, I compliment Senator GRAMM for reading the bill and trying to do something to protect the integrity of the trust fund.

He has said, No. 1, if we are going to give them \$15 billion, let's make sure we don't spend down the principal. And, No. 2, let's only spend the interest or the dividends from that trust fund to provide new benefits. I support him in that. I compliment him for that.

I also have an amendment that wants to protect the integrity of the trust fund. The trust fund, by any of the scenarios—I will show the charts in just a minute—the trust funds goes way too low. The bill's stated objective is to keep the trust fund equal to but somewhere between four and six times the annual payment to beneficiaries. That is their goal. That is their objective. Unfortunately, the bill before us, under the middle assumption, doesn't even come close to that.

As a matter of fact, the trust fund goes all the way down to about 1.3 annual payments. In other words, it almost goes bankrupt. It barely has enough to make 1 year's payments of

benefits. That is not a good deal for taxpayers, and it is certainly not a good deal for railroad retirees. I don't think it is a good deal for the railroad companies because they are going to be socked with a very large tax increase.

I will use the chart Senator BAUCUS has. I think it illustrates it. We start out with about 6 years of benefits under today's standard, but when we pass this bill, in a period of about 20 years, we go down to just a little over 1 year's balance. In other words, we take a fund—and I will insert this in the RECORD. Actually, I will insert for all three assumptions.

Under the assumption I will talk about, the employment assumption No. 2, the one in the middle, we start with a balance this year of \$19.3 billion. And under current law, that goes to \$34 billion.

Under the bill we are getting ready to pass—and I can count votes; frankly, I could count votes before this week started—that trust fund balance goes from \$19 to \$8.4 billion. Instead of being \$34 billion, it goes to \$8.4 billion. That is the bill we are getting ready to pass.

I wish I could wake up all my colleagues, most of whom have not read this bill, most of whom had nothing to do with drafting the bill. This is the first time I can recall in my 21 years in the Senate that we have had a bill that was totally written by special interest groups. In this case, railroad unions and management got together and said: Here is our bill, don't touch it. Don't have a hearing on it.

They didn't have a hearing in the House. We didn't have a hearing in the Senate. I asked for a hearing in the Senate Finance Committee. We did not get it. We had a markup but it was already railroaded. There were not going to be any amendments. There was one amendment adopted in the House or the Senate. That was the amendment dealing with scoring. We are not going to count it. It didn't say we will waive the Budget Act. It said will not count it, which I think is even worse than just waiving the Budget Act. Why have a Budget Act if you are going to have \$15.3 billion in budget outlays and it doesn't count?

We just had a vote on that by Chairman DOMENICI and ranking member CONRAD, and we lost. We lost that vote. So the special interest groups are together. And they said: Let's leave it in. They didn't request that amendment. It is interesting; that was put in by the House. So that was the only amendment they put in.

It was a bad amendment in my opinion. We are going to accept that, and we are going to keep the bill. We will not touch it. I think we are making a mistake.

You ask: Why are you still fighting this? You know this bill is going to pass? Sure, I do. But I want to make a statement. I want to show that we can

do a better job. We are not beholden to the special interest groups. We are beholden to taxpayers. This is a Federal statute. We are changing Federal law. How many CEOs of the railroad companies or how many union members were elected to the Senate? I don't know, but they wrote the law. They wrote the bill that is going to become law.

I don't think they did a very good job. If I thought they did a good job, maybe I would cosponsor the bill. I don't think they did a good job. History will tell.

I will make a prediction. I am not going to be here in 20 years. I guess if I was as studious and healthy as Senator THURMOND, maybe I could be. If I was fortunate enough to be reelected by the people of Oklahoma, maybe I could be. Agewise it is possible, but it is not possible after consulting with my spouse. But 20 years from now, if not well before that, Congress is going to have to readdress this issue because we are going to have a big problem.

As this chart shows—I am borrowing Senator BAUCUS's chart, and I thank him—we are going from 6 years of benefits down to a little over 1, we think. That is in 20-some years.

Then Senator BAUCUS said: Wait a minute. Way out in the outyears, it goes way up. Who knows? I know they are going to have problems when we get into the year 2021, 2022, 2023, 2024, 2025 and 2026. It goes way down. The trust fund actually falls by 65 percent. When you have that trigger, payroll taxes have to go way up. Payroll taxes have to go up by 69 percent.

That is because in the bill we say if it triggers at a certain point, we are going to have a tax increase, a tax increase that is paid by the railroad companies. And it goes from 13.1 percent to 22.1 percent.

Senator GRAMM said they are having problems. They have shrunk their labor force significantly. They are not going to be able to handle that kind of increase. They will come back to Congress and say: Here, it is yours. The trust fund is broke. It didn't work out very well, so pay our employees. And because the Railroad Retirement Act is a Federal statute, it becomes an entitlement.

Many people here say it is not that. No, they won't be coming back to us.

I predict that within 20 years they will be coming back to Congress and saying: We need a fix. We need a little bump. We need a little transfusion. Maybe the transfusion will be from Social Security. They are already getting it. I wonder how many of our colleagues know that they get billions of dollars from Social Security, basically from tier 1 going into tier 2, to pay their benefits. It is in the bill. I have an amendment that will address that. Possibly we will consider that soon.

Right now I offer an amendment that I urge my colleagues to look at, con-

sider, and hopefully pass. The triggering mechanism to have a tax increase is if the trust fund goes so low that there will be a tax increase. If you actually get low enough to pay benefits for 4 years, you have a tax increase. It is automatic. It is in the bill. It would become law soon. OK. That makes sense. But you ought to have some kind of triggering mechanism so if we keep the trust fund balanced, we won't be coming to the taxpayers for general revenues.

What is wrong is the calculation. You look back over 10 years to figure that average. By looking over 10 years, if you just see the revenue estimates, they estimate that the trust fund balance goes from a high, somewhere in the neighborhood, under present law, of about \$27 billion. Under the Daschle bill or the railroad bill we are getting ready to pass, the railroad trust fund runs about \$23 billion. Then the next several years it falls to 19, 18, 17, 16, 13, 12, 10, 8. You are looking at a 10-year average. If you look at a 10-year average and you are averaging 8 and averaging 20, maybe it won't trigger the tax increase until about the year 2021, 2022, 2023. In other words, it allows the fund to fall from about 6 years' payments down to a little over 1 before the tax increase is triggered.

That is too late. That doesn't allow the trust fund to have enough time to recharge, to build, to have a cushion to earn interest or to earn dividends. In other words, we allow this dip to go too low.

The effect of my amendment would be to smooth that out. Possibly it would smooth out the payroll tax increase. In other words, instead of looking back over 10, we would look over 5. So your average, once you got on the decline, it would say, if we get much lower, we will have to have a tax increase sooner to keep that fund from going so low. That is too big of a dip. That is too dangerous for railroad employees or retirees to have the fund balance dip down as low as 1.3 annual payments.

This is under the middle scenario. If you look under the pessimistic scenario, it goes in the red. Under the pessimistic scenario, the whole trust fund goes totally in the red by the year 2022. It will not be able to make payments. It will need either general revenue funds or it will have to cancel increases or suspend payments or whatever.

In other words, there is a scenario here where the fund is totally broke in 20 years. That is not acceptable. I don't think it is acceptable. I think we should protect railroad retirees. We have too much of a variable by using a 10-year average before you have a trigger for a tax increase. So my suggestion is, let's make it over a 5-year average. If you get on a down slope, the trust fund starts falling in value, we won't have to wait another 8 years before you trigger a tax increase.

That is the essence of my amendment. It is a friendly amendment. It is not an amendment to gut the bill. It is not an amendment to say we don't want railroad retirement and we are not going to have railroad retirement. It is an amendment that says they put together a deal that was negotiated between labor and the employees or the unions. They may have cut a good deal for the employers, basically saying let the fund go almost bankrupt before you trigger a tax increase.

We will do that in 20 years. Guess what. Everybody running those companies will all be retired by then, and Members of Congress will all be gone by then. Let somebody else worry about that. So these big tax increases are not triggered—it is interesting, they are not triggered until 15 years from now, but then they are pretty big. It is not a 10-percent increase in payroll taxes, not a 20-percent increase; they keep the tax rate basically at 13.1 percent for about the next 15 years and, bingo, you go from 13.1 percent to 22.1. That is a 69-percent increase in payroll taxes.

I just can imagine—as a matter of fact, I will make this prediction: When this happens 15, 20 years from now, somebody is going to come back—the railroad companies will say: We can't

afford that. That will bankrupt us. They will basically say: Taxpayers, you handle it or liquidate the railroad so they can pay these benefits.

You are in that kind of scenario. That will happen. That is too Draconian of an increase because we allowed the trust fund to get too low before we triggered the changes. I say, let's trigger the tax increase. Instead of over a 10-year average, do it over a 5-year average. That makes a lot more sense. We are not holding these funds to fiduciary standards. I have an amendment to do that. We don't hold them to fiduciary standards that we do all other multi-employer plans. Maybe we should.

I have told some of my colleagues who have been voting and saying they want to take up the bill, all right, we are on the bill. I want to consider the bill. They say let's consider amendments. Well, this is an amendment. This is an amendment that would help the security of the trust fund, make sure it doesn't get down too low. We would have the automatic trigger moved up a little bit. That is the essence of the amendment. Instead of letting the fund dip down quite so low—before it goes down too low, below the threshold of four times annual payments, we would trigger the tax increase a little earlier so it doesn't go

down quite so low. That is the essence of the amendment.

We want to save the trust funds so the funds will be there to make the payments and not bankrupt the railroads at the same time. Now, maybe if, in the interest in this bill, the railroad companies and the unions would have come before Congress and said, yes, let's have a hearing on this bill, I could have asked them questions. My guess is the railroad unions would say, yes, I like that idea. They would probably say I like that idea because we don't want to jeopardize our payments. If somebody is retired at age 60, and they happen to be age 80 and they are reading the reports, they would say, the trust fund went down to almost bankrupt. They can barely make payments this year. They are not going to get a lot of comfort over that. So the idea is, let's try to make greater protection of the trust fund.

Mr. President, I want to have printed in the RECORD a table that I have compiled, my staff, of the three various employment assumptions, 1, 2, and 3.

I ask unanimous consent that this table be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

RAIDING THE RAILROAD RETIREMENT TRUST FUND

[Daschle amendment 'versus' current law (in millions of dollars)]

Year	Railroad Retirement Trust Fund balance employment assumption 1				Railroad Retirement Trust Fund balance employment assumption 2				Railroad Retirement Trust Fund balance employment assumption 3			
	Current law	Daschle	Change	Percent change	Current law	Daschle	Difference	Percent change	Current law	Daschle	Difference	Percent change
2001	19,383	19,383			19,363	19,363			19,341	19,341

Source: Railroad Retirement Trust Fund actuaries. Provided by Senator Don Nickles, 12/4/01.

Mr. NICKLES. This compares present law to this bill, under those assumptions. Present law under the employment assumption, the middle assumption, shows in current law a trust fund balance of \$19.3 billion today and \$34 billion in the year 2025. Under the Daschle amendment, or the bill we have before us, we start at \$19.3 billion, and in 25 years we end at \$8.5 billion. In other words, the trust fund is only about—well, it is 75 percent below where it is today, or where it would be under current law. That is assuming a

21-percent payroll tax in the last few years. So even with enormous payroll tax increases, the fund is still in serious jeopardy of being able to pay benefits, being able to provide security and assurances that there is going to be money there for retirees who maybe worked most of their lives and depend on it.

I have put this in the RECORD because I want people to see it. I want railroad management companies to look at these scenarios and realize, OK, we are trading current law for this. This may

be a great deal for them for the intermediate time. People may say: Why are you doing this? Railroad companies will save a few hundred million dollars a year—over 10 years, \$4 billion; over 15, 17 years, \$17.5 billion. Their taxes are going to be cut. I will put that into the RECORD. Their taxes are going to be cut over \$400 million and that gets larger every year. That is what the companies get by reducing the payroll tax from present law, \$16.1 billion, to 13.1 percent, and then it eliminates another supplemental benefit tax that

boils down to, I think, 26 cents an hour. They eliminate both of those taxes and save about \$400 million a year—"they" being maybe a dozen railroad companies. They save \$400 million a year.

What do the employees get? The employees get a pretty good deal. They get a deal because they have tier 1 benefits that are supposed to be equal to Social Security; they pay the same tax. The Social Security tax is equal to 6.2 percent for employees, 6.2 percent for the employer. They pay the identical tax, same tax as everybody else in America. But they don't get the same benefit. Under Social Security benefits, people receive their full retirement benefits at age 65, which is going to age 67. Under railroad retirement, they get to receive 100 percent benefit now at 62. This bill makes that 60. They pay the same tax with more benefit. You get zero if you retire at age 60 under Social Security. If you retire at 62 under Social Security, you get 80 percent of the benefit you were expected to receive at age 65. That 80 percent is being reduced under current law to 70 percent over the next several years. So under Social Security, a person who retires at 62, many years from now, gets 70 percent; and under railroad retirement, they get 100 percent benefit at age 60—and they pay the same taxes. There is a big difference there.

What about the survivor benefit? That is a great big benefit increase for railroad retirees. It costs money. How much does it cost? Guess what. It costs about \$4 billion a year over the next 10 years. They also have another little benefit: tier 2 benefits, non-Social Security benefits, the other railroad retirement benefits, a survivor benefit equal to 100 percent of what the employee was receiving. That is pretty nice because in most private pension systems the survivor receives 50 percent. I wish they could pay that much and more. Who is going to have to pay the bill? What are those benefits? They add up to \$4 billion over the next 10 years. That is about \$400 million per year in a couple of years. So it totals about \$4 billion over the next 10 years. It just happens to come out even that the railroad companies and employees come out with the same amount of benefit. That is what they mutually agreed upon. Well, what they didn't do, in my opinion, they didn't protect the fund. The fund goes almost bankrupt before this triggering mechanism to make sure the fund stays solvent is kicked in. That is not to get too technical, but they have a 10-year lookback average before, and if that average gets below 4 years' annual payments, then they have an automatic tax increase. That waits too long and allows the fund to go down to 1.3 annual payments before the tax is really kicked in—maybe it is kicked in in the last couple years, but it doesn't catch up.

So the fund is in jeopardy. The payments are in jeopardy. The whole con-

cept of paying railroad retirement is in serious jeopardy because we didn't do a good enough job, when we created this change, to make sure it would be solvent. So I have an amendment—really a simple amendment—that says instead of looking back over 10 years, look back over 5 years. I think it is a reasonable amendment, one that if the railroad employees could look at, they would support in a minute, absolutely, totally, completely. It is a good provision to try to make sure there will be a trust fund there instead of allowing it to dip so low.

I urge my colleagues to support the amendment. I yield the floor.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, basically, this amendment offered by the Senator from Oklahoma is just unnecessary. In fact, he used my chart. My chart makes a case that is much worse than would occur under the bill.

I am just trying to present the facts so people can make a reasonable judgment. I looked at the balance on a year-by-year basis. That is what that chart shows. Under the bill before us, there is a 10-year rolling average lookback which means that lower level on the chart would never get that low under the bill. The Senator from Oklahoma wants to change it from 10 to 5. Even 5 will not get that low.

The main point is that many people have looked at this issue from different directions and have concluded that this legislation is a good way to deal with the excess balance in the railroad retirement trust fund. By increasing some benefits, by lowering taxes, and yet building in some automatic auditing devices, that comports with requiring the actuary to report whether the trust fund is actuarially sound in the current year and succeeding years under various economic assumptions.

I do not know how much better we can do than that. It is very difficult to predict the future. I remind my colleagues that CBO, in trying to make 10-year estimates, let alone the 20 years we are talking about here, has varied its 10-year totals by \$1 trillion over a 6-month period of time. It is because economic assumptions change so quickly, so often.

We are in a more uncertain world than we were, say, 10, 15, 20, 30, 40 years ago. The actuaries have done the best they can with what they have. They made three different projections. One is pessimistic, one is intermediate, one is optimistic. The assumption we have been talking about is the intermediate. It is not the pessimistic, not the optimistic; it is the intermediate.

I submit that with the annual reports from the actuaries coming to the Congress, we will know whether we are getting into trouble or not.

This is the best solution we could come up with at this time, and it is done on a fair, reasonable basis.

Taking a more pessimistic analysis than provided by the analysis of the Senator from Oklahoma, the worst case is about the year 2020, 2022, and that is when the ratio is 1 to two-thirds, balance to costs. The Social Security actuary says we can get as low as 1 to 1. We are not 1 to 1 today in Social Security. The Social Security actuary says that is the lowest benchmark with which he deals.

Under our intermediate assumptions, we do not get that low. We get 1 to two-thirds, 1 to 1. I suggest we are even too pessimistic.

I asked the question of the chief actuary how the economic estimates have been on employment levels, which is the most difficult estimate to make. His response is: Employment levels over the last 5 years—railroad employment—have decreased an average of .9 percent per year. He said this decrease is better than assumption 1. Assumption 1 is the most optimistic assumption. He says for the last 5 years, the actual decrease in employment was .9 percent per year, which is better than provided for in assumption 1. We are talking about the intermediate, not assumption 1.

He also says employment levels over the last 10 years have decreased an average of 1.8 percent which falls somewhere in between assumption 1 and assumption 2.

We have been a little too conservative actually. The main point is, who knows what the world is going to be like in the year 2020? The Senator from Oklahoma takes the most pessimistic assumption and says we cannot have that. My Lord, if we are in that bad a shape in 18, 19 years, I can tell my colleagues we are going to be doing a lot of other things in this body in addition to railroad retirement. I have confidence in the Congress, in the system. We analyzed this thoroughly. We will do well.

Mr. NICKLES. Will the Senator yield for a question?

Mr. BAUCUS. In just a second. I also say this measure before us has 73 cosponsors. It was considered last year in September in the Finance Committee. We had 20 amendments in the Finance Committee. It passed by a very large margin in the House.

In sum, this amendment is unnecessary, and it is also mischievous because if it were to be adopted, this bill would have to go to conference. There would be no railroad retirement bill this session, and there could be no railroad retirement bill this Congress.

I urge Members not to agree to this amendment.

Mr. NICKLES. Will the Senator yield for a question?

Mr. BAUCUS. Yes.

Mr. NICKLES. The Senator said I took the most pessimistic assumption. I correct him. All my statements and the charts are on the middle assumption, not the most pessimistic assumption. The most pessimistic assumption

says this bill has real problems. I did not use that. I used the middle assumption.

Mr. BAUCUS. I stand corrected. Mr. President, most of his analysis was on the intermediate assumption. At one point, he was talking about the most pessimistic assumption. My response was to both.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. NICKLES. Mr. President, I do not want to inflate anything. I am very particular on being factual. I want to correct a mistake I made in my earliest debate. This came up, frankly, when those of us who had some concerns about the legislation were informed of it on Monday and we were to debate it on Tuesday. I cited from memory that this fund had actually paid out more every year than it had taken in, to the tune of about \$90 billion. That was not factually correct.

The facts are the fund has paid out more than it has taken in every year since 1957. For the last 43 years, it has actually received payroll taxes, contributions from employees, and it has made benefit payments. The benefit payments have exceeded payroll taxes and company contributions every year for the last 43 years, so I was correct from 1957 on. I wanted to state that, and I will insert that in the RECORD as well.

I want to be factually correct. I want my colleagues to understand that when I state that 20 years from now there is going to be a big problem if we do not do something because we are getting ready to set up a system that allows this fund to almost go bankrupt, almost to where they cannot pay the benefits before we let the tax increase trigger.

Some people have said: This is self-funding. This is great. We are going to keep these fund balances between four and six times annual payments for the next 75 years. If the trust fund balances go up, they make good investments, they invest in a lot of stocks that did exceptionally well, great; they can have payroll tax cuts.

If they do poorly, if they get below that four, we will have automatic payroll tax increases on the employer, not the employee. Fine, if that works.

Under the middle assumption, the tax increases are not triggered until well after the fund is depleted because they use a 10-year average. So they are on a sliding-down scale before the tax increases trigger, so the fund almost goes bankrupt. It goes down to about 1.3 annual payments before they have the tax increases, and then they are in serious trouble.

Somebody said this is the law; this does not allow general fund financing, which is one of the reasons I happened to be concerned about it. Somebody asks: Why are you so concerned? Ultimately the Federal Government could

be liable. You say: Why? Let me read a couple statements.

I like to think the railroad companies would take care of their employees, and if they did, I couldn't care less what benefits they pay. If this were out of the Federal system, they could pay whatever benefits they want. I do not care if they have retirement at age 40 if they pay for it and the Federal Government is not liable for it. I do not care if they have early retirement.

I do not care if they have a spouse benefit that exceeds 100 percent if they pay for it.

What I disagree with strongly is if they greatly increase benefits and underfund the system and then say: If this does not work out, taxpayers, you pick up the cost. Why should we be asking people in Minnesota or Oklahoma who make \$40,000 a year or \$20,000 a year to increase their taxes to pay benefits for people who make a lot more money than they do and enable them to retire at age 60 when people in Oklahoma do not get to retire until they are 65 or 67 and then they receive benefits far greater than people in Oklahoma receive? I do not want the people of Oklahoma to have to pay taxes for them to do that.

I will read a couple quotes. Supporters insist the amendment places responsibility on future benefits on the railroads in the event investments do not work out.

I will read what the railroad industry thinks of its responsibility. This is a quote from the United Transportation newsletter dated May of 2000:

The legislation also requires that the railroads would be responsible if the trust fund falls below a certain level. If this happens, a tax would automatically be placed solely on the carriers in order to replenish the fund. In order to add a final assurance to the integrity of the fund, it is still bound by the full faith and credit of the United States Government. They would be required to pay the obligations of the fund if, for some reason, the other safety nets in place were insufficient.

Earlier this year, the Lincoln Journal Star—on 8/15 of this year—stated:

Other unions and the Association of American Railroads are promoting the bill as a self-financed shoo-in. In fact, the U.S. government would still back the retirement fund, acknowledged Obie O'Bannon, vice president of legislative affairs for the association. But, he pointed out, the "automatic tax ratchet" would require the railroads to kick in more money any time the fund's balance is below four times annual benefits, so that's protection that would mean all U.S. railroads would face insolvency before the Federal liability applies.

I don't want the railroad to go insolvent, but I don't want the Federal liability to apply either. I don't want our taxpayers across the country to have to bail this system out because we did a crummy job of legislating in 2001, and in 20 years we say: Well, we made a mistake. Darn, Senators GRAMM and NICKLES were right. Now the railroad companies are faced with a huge tax increase they cannot pay.

The fund is raising towards insolvency. Taxpayers, would you please give a supplemental. Let us raid a little more from Social Security—which they do under this bill, as well. There is about a \$2 billion transfer from Social Security to help pay tier 2 benefits. That is interesting. I thought we would protect Social Security. But we have a Social Security bailout for the bill. Maybe we will address that shortly.

How else do we fix the fund? Are we going to write a check? Is the Federal Government going to write the check? I don't know. Some people in the unions say that is what we will do. Some in management say that is what we will do. I don't think that is the solution.

Let me read the last sentence of the vice president of legislative affairs for the Association of American Railroads:

All railroads would face insolvency before the federal liability applies.

I don't want the railroads to become insolvent, nor do I want the Federal taxpayers to become liable for all the generous benefits. These benefits, in comparison to retirement benefits in the private sector, are very generous—overly generous. Find other private pension systems that offer full retirement at age 60. You won't find very many. Find other pension systems that offer spousal benefits or survivor benefits at 100 percent. You won't find very many. I doubt the department stores offer these kinds of benefits. Manufacturing companies don't offer these benefits. Yet we are getting ready to do it.

Now I read that if it doesn't work out, taxpayers "will bail us out."

I won't be in the Senate, or I doubt I will be in the Senate, 20 years from now, but if I am, I guarantee I will be opposing a taxpayer bailout of this industry. And conversely, I hope there will be others opposing this. This will happen. It is a prediction. It will be in the CONGRESSIONAL RECORD.

I hope I am wrong. I hope they find investments that do enormously well. They might find good investments such as Intel, 10 years ago, going up in multiples. They might also find investments such as Enron. I am concerned. Everybody indicated this is not so bad.

I have not raised this on the general issue of debate. This investing in private funds is a good idea. I love for private individuals investing for themselves to buy parts of different companies. I am reluctant to think: What will this board invest in? Mr. President, \$15 or \$16 billion is a lot of money. What companies will they buy? Are they going to be politically correct? Would they buy Microsoft? Our Government was suing Microsoft. I guess they still have suits pending against Microsoft. Maybe that is not politically correct. What about tobacco? Our Government in the previous

administration was going after tobacco. Philip Morris was a good investment the last year. Microsoft was a good investment the last year. Would they be buying utility companies? A lot of utility companies are being sued for a lot of different reasons. Do they have to wash their hands from investments?

I have concerns when you have a board comprised of rail management representatives, union representatives, and they select one additional person they mutually agree upon to invest billions and billions. I have reservations about that. That is not what I raised this issue on.

For the information of colleagues, we will vote on the Gramm amendment and the Nickles amendment starting around 4:30. For the information of our colleagues, we will have the joint prayer service, which we desperately need, starting at 5 o'clock. The amendment I am offering says, before we allow the trust funds to be depleted on such a steep decline, if a 5-year average gets below 4 years, annual payments trigger the tax increases at that time instead of using the 10-year average. That would keep this a lot more shallow. It will keep the fund probably well above 2 or 3 in the annual balance statement, certainly above 2—not allowed to dip down so deep. That is for the protection of the railroad retirees and for the protection of taxpayers, to make sure we will not have to do what the United Transportation Newsletter said: We can always fall back on the full faith and credit of the U.S. Government.

I hope that doesn't happen. I will work energetically to see it doesn't happen. If we keep the trust balance more level, it will not happen.

I urge my colleagues to support the amendment that would say, instead of having a 10-year lookback before you trigger an automatic tax increase, do it over 5 years so we don't allow the trust fund balances to go as low as they are now projected to by the railroads' own actuaries of the pension plan.

I yield the floor.

Mr. BAUCUS. Mr. President, I don't see any other Senators wishing to speak, and the leadership would like to schedule these votes around 4:30, so we have 15 more minutes. I will take that time to make a couple of points.

First, this amendment offered by the Senator from Oklahoma simply is unnecessary. It is true that there is a dip. The fact is, on a yearly basis the dip is as represented on that chart, but the bill before the Senate will not be as low as represented on the chart. Even if it is as low as represented on the chart, this is unnecessary.

It is true that there is a question in the year 2021. There are a lot of questions. We have to do the best we can with what we have. The vast majority of Senators and House Members have considered and concluded that this is a

fair way to deal with this issue. This issue, if it arises, will not arise, according to the basis of this debate, for another 20 years. So we are talking about what may or may not occur in 20 years. Because of the annual reports provided in the bill and the actuarial estimates on an annual basis, when it gets closer to 20 years from now, we will have an idea whether or not this is working. If it is not working, we will make adjustments. This amendment is totally unnecessary.

A couple of other points. The Senator mentioned there is a lot of Social Security money going into railroad retirement. I will address that. It is a point that is not commonly understood. In America today, clearly, there is a wide variety of industries. Some are new young industries, service industries; some are older, mature industries, such as railroad or mining industries. Industries come and go. They expand. They are just different, which means they have different ratios of the number of employees paying into Social Security compared with retirees receiving Social Security in that industry.

Social Security, of course, doesn't collect and pay on an industry basis. It collects and pays on a national basis. It is a large pool of Americans, American workers paying into Social Security, and there are a large number of retirees in America receiving benefits.

So as a practical matter, if we look at an industry, say a mature industry where there are fewer employees paying into a Social Security trust fund, and a lot of retirees receiving benefits, in effect there is a transfer of Social Security to that industry away from a younger industry where there are so many more employees paying in and so many fewer retirees receiving benefits. In effect, that is what happens today in America under Social Security. That is what is happening today in railroad retirement under tier 1, which is essentially Social Security. Because it is a mature industry and because there are fewer employees—railroaders in the industry, compared with the number of retirees proportionate to the average industry in America—there are transfers in effect to railroad retirees under tier 1 as is the case for all industries and for all workers in America today. There is no difference. There is no difference.

So it sounds as if Social Security is helping out unfairly, enriching railroad retirees under tier 1. It just is not because the Social Security tier 1 employees are treated the same way as are employees in a mature industry receiving benefits.

The second point is it has been suggested here that it is not fair to lower the retirement age to 60 from 62. After all, the retirement age under Social Security is higher. It has been suggested that it is not fair to vest earlier, 5 years instead of 10 years; that it is

not fair that survivor's benefits for a survivor would be 100 percent instead of, say, 45 percent. And the point is made under Social Security retirees' survivors get benefits at a later age. So isn't this some special deal that railroad retirees are getting? It is not fair.

On the face of it that is a question. But, as they say, that is only half of the story. In the rest of the story, the facts are that tier 2 in railroad retirement is very comparable to a private pension plan that a company may have for its employees. The company's employees—retirees, say—would receive benefits under Social Security, tier 1 in the railroad system, and they receive benefits under their pension plan, tier 2 in the railroad industry. Many pension plans provide for an earlier retirement age—not 65 or up to 67, as required in Social Security, but at an earlier age.

Those people pay Social Security. Those are Social Security retirees. How does all that work out? What is happening here?

It is very simple. In the private sector pension plans participate in what is called a bridge with Social Security; that is, under Social Security the retirement age is 65, but under the private pension plan if you fully vest—say 30 years employment at, say, 60—the private pension plan makes up the amount that Social Security does not pay. It is called a bridge. That is how it works and it makes sense. If Social Security does not provide those benefits for early retirement age, then the private pension plan provides the benefits. That is what is happening in this legislation. It is just the same.

That is, tier 2 would provide the extra benefits under a bridge to tier 1, in effect. Actually, they don't provide it in tier 1. It is just that the extra benefits go to the retiree to make up the difference.

I submit, railroading is pretty hazardous. It is a dangerous industry. And a 62 retirement age—excuse me, a 60 retirement age after 30 years of hard work as a railroader certainly seems fair to me. There are other industries not as dangerous or demanding, but this one certainly is. It is a dangerous industry.

It has been suggested that ERISA provisions ought to apply. Railroad pensions should be fully funded, and this is not fully funded—as is the case under ERISA, which is what applies to most private pension plans.

First of all, Social Security is not fully funded. Maybe it should be. We would like to work in that direction, but it is not today. But more important, to fully fund the railroad retirement plan would require the injection of \$40 billion. Then it could be fully funded. We do not have \$40 billion. I think the total revenue of the railroad system in America is about \$40 billion per year, and I think the income per year is close to \$4 billion in the railroad industry.

Still more to the point, this trust fund, tier 2, would have about \$40 billion today, an extra \$40 billion, if Congress in the past had lived up to its word. It would have it. What am I saying?

Many years ago, Congress—I think it was in 1950—passed something called dual benefits. The effect of it is that railroad retirees got dual benefits. They got twice the benefits.

Clearly, that got to be a lot of money for the trust fund. If they get double benefits for Social Security compared with other retirement systems, that adds up pretty quickly. Congress decided to change that, in 1974—to end that. Congress said we are going to end this dual benefits idea. It is just too expensive. It is just too much.

But we, Congress, will grandfather in prior retirees so they do not get less than they thought they were going to get. So as a practical matter, that would have been—those benefits paid prior to 1974 would have been about \$3.5 billion. If the railroad retirement system had that \$3.5 billion—they did not

get it, Congress did not give it to them—today that would be worth about \$30 billion, \$40 billion.

If Congress had lived up to its word in the past, we could come close to having enough dollars in the fund to make it fully funded and ERISA applicable. But ERISA cannot be applicable today because it is \$40 billion short because Congress didn't live up to its word. Nevertheless, I think the provisions in this bill requiring all these reports assure us of notice, adequately in advance, whether or not there is going to be a problem during the next 20 years. It could be just the opposite. It could be a lot better than we expect. But if it is worse than we expect, there will be more than enough benefits for Congress to be able to change it.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. NICKLES. Mr. President, I will ask unanimous consent to have printed in the RECORD the "Railroad Retirement and Survivors Improvement Act of 2001 Progress of the Railroad Retirement and Social Security Equivalent

Benefit Accounts under Employment Assumption II."

It basically says let's transfer \$1.586 billion in from Social Security, or the tier 1 fund, into the tier 2 fund. Social Security is subsidizing tier 2 benefits.

I also state to my colleagues, a real solution would be if tier 1 is supposed to be equivalent to Social Security, and people want that—and then as Senator BAUCUS says, tier 2, if they want to subsidize Social Security for a lower retirement, they can do that—let's just put them under Social Security so we do not intermingle these funds. There is a little raiding going on. Under this bill, there is about \$2 billion, then, \$80-some million almost every year, and then it increases to almost \$100 million every year that is transferred from tier 1 to tier 2.

I do not like it. We are raiding the Social Security fund.

I ask unanimous consent to have this table printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TABLE 3—II.—RAILROAD RETIREMENT AND SURVIVORS' IMPROVEMENT ACT OF 2001

[Progress of the Railroad Retirement and Social Security Equivalent Benefit Accounts under Employment Assumption II (dollar amounts in millions)]

Calendar year	Interest rate (percent)	Tier 2 tax rate (percent)	Railroad Retirement Account					Social Security Equivalent Benefit Account					Railroad Retirement Trust Fund			Combined balance end year	
			Benefits and admin- istration	Tax in- come	Other inc/exp	Transfer to RRTF	Balance, end year	Benefits and admin- istration	Tax in- come	Interest income	Other inc/exp	Transfer to RRTF	Balance, end year	Benefit pay- ments	Income		Balance end year
2001	5	21.0	\$3,127	\$2,870	\$1,056		\$17,913	5,265	2,225	\$77	\$2,653		\$1,450	\$3,371	\$23,802	\$20,431	\$19,363
2002	8	20.5	57	2,816		\$20,673		5,335	2,254	73	3,145	\$1,586		3,554	4,317	21,194	20,431

Source: Railroad Retirement Board actuarial, 12/3/01.

Mr. NICKLES. Mr. President, we can solve that by putting all railroad employees, like we put all new Federal employees, under Social Security. We did it. We put Members of Congress under Social Security. To me, it would help this problem so we would get away from this little financial wiggling that

has been going on with this fund for a long time.

Also, I ask unanimous consent to have printed in the RECORD a table that I have that shows the benefits for employees and the benefits for railroad companies, or management, on a year-to-year basis. I alluded to this in my

statement, but I wanted to have the facts with these charts substantiating my oral comments.

There being no objection, the material ordered to be printed in the RECORD, as follows:

RAILROAD RETIREMENT: H.R. 1140 AS PASSED BY THE HOUSE

[In millions of dollars]

	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	Total

Source: CBO. Provided by Senator Don Nickles, 11/26/01.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, I ask unanimous consent that there be 4 minutes for debate prior to the vote in relation to the Gramm amendment No. 2196; that regardless of the outcome of the vote, there be 4 minutes of debate prior to the vote in relation to the Nickles amendment No. 2175 with the time equally divided and controlled in the usual form, and that no second-degree amendments be in order to either amendment nor the language that may be stricken.

Mr. REID. Mr. President, reserving the right to object, I wonder if Senator NICKLES will also agree that we have 1 minute on each rather than 4 minutes. The Senator wants 4?

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Who yields time?

Mr. BAUCUS. Mr. President, I ask unanimous consent that the amendments the Senate gave consent to earlier be reversed so the first vote will be on the Nickles amendment No. 2175 and the second vote will be on the Gramm amendment No. 2196.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Who yields time?

Mr. NICKLES. Mr. President, this amendment is to help protect the solvency of the trust fund. As the chart shows, the trust fund falls under the middle scenario. The trust fund falls from about 6 years' of payments. There is enough money in the trust fund to pay 6 years' worth of benefits. Under that scenario, if we pass this bill, which we are going to do, it goes down to about 1.3. I keep hearing 1.6. I believe it is 1.3—barely enough to pay 1 years' benefit. That is because we use a 10-year average looking back. The fund has to fall so far before the tax increase is triggered.

Under this amendment, we strike the 10 years and say let us make it 5. As the fund balance starts to fall under the railroad retirement assumption, it falls all the way down to \$8 billion. We pay \$8 billion in benefits right now.

I am saying, let us not let it go quite that low. Let us look back over 5 because if it starts falling, that fund gets below the 4 years' payments—enough to pay for 4 years' worth of benefits—if it gets below that, let us have the tax increase triggered then. Not 10 years, it will be 5 years out.

That will keep the fund solvent for railroad retirees. It will decrease the

pressure on the railroad companies later on. It also gives some protection to taxpayers. It will decrease the likelihood that there will be a bailout or a necessity for a bailout to be falling on general revenues or general taxpayers in the year—whether it is 2015, 2017, or 2021, I do not know. Let us not let the fund go all the way down to almost 1 year's payment before we trigger a tax increase. Let us do it a little bit earlier. Let us use the 5-year average instead of the 10-year average.

I used to do this work. Anybody who talks to their actuary will say that makes a lot of sense. Waiting for a 10-year average would be absurd.

I yield the floor.

Mr. BAUCUS. Mr. President, this amendment is, first, totally unnecessary. The actuaries project that the balance of the fund without this bill over 75 years will be at least one and one-thirds above the benefits paid. That is the lowest level; that is, about the year 2002, which is significantly more than the short-term actuarial balance necessary for Social Security. One and two-thirds; one for Social Security.

This amendment is totally unnecessary. It is, second, a killer amendment. If this amendment is agreed to, we will go to conference. There are not many days left in the session. There will be no railroad retirement bill passed this year and probably not in this Congress. It is unnecessary and I particularly urge Members to oppose it.

The underlying bill requires many audit reports, financial and actuarial reports on a yearly basis on the strength, viability, and the health of this trust fund. We will have plenty of time and many years in advance to see whether or not some of the dire predictions made in this Chamber are accurate.

We have a hard time knowing 10-year budgets in the budget process around here. We are talking about 20 years down the road. A, it is not necessary; B, a lot of reports, if the dire predictions do come true; and, C, it is a killer amendment.

I urge colleagues to oppose this amendment.

Mr. NICKLES. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The question is on agreeing to the amendment. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. NICKLES. I announce that the Senator from Texas (Mrs. HUTCHISON) is necessarily absent.

The PRESIDING OFFICER (Mr. REED). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 27, nays 72, as follows:

[Rollcall Vote No. 348 Leg.]

YEAS—27

Allard	Frist	McConnell
Bennett	Gramm	Nickles
Bond	Grassley	Santorum

NOT VOTING—1

Hutchison

The amendment (No. 2175) was rejected.

Mr. KERRY. Mr. President, I move to reconsider the vote and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2196

The PRESIDING OFFICER. Under the previous order, there are 4 minutes evenly divided with respect to the Gramm amendment.

The Senator from Montana is recognized.

Mr. BAUCUS. Mr. President, this is an amendment offered by the Senator from Texas, Mr. GRAMM. I strongly urge Members to not vote for it. It is unnecessary. There are actuarial reports required in this bill to the Congress, and financials are required annually. We will know well in advance of any potential problem that may occur in 20 years. This is a killer amendment. If it passes, we have to go to conference. That means no bill this year. I

urge Members not to support this amendment.

The PRESIDING OFFICER. Who yields time?

The Senator from Texas.

Mr. GRAMM. Mr. President, the amendment is very simple. The amendment before us says you can invest the railroad retirement trust fund, you can invest it in stocks and bonds, but you cannot spend out of it until you have earned something on the investment.

Under the bill before us, you lower the amount of money going into the fund and you raise benefits before one penny is earned, before one investment is made, and in fact you take money out so quickly that you deplete 75 percent of the trust fund before the tax on railroads has to rise from 13.1 percent to over 22 percent in order to maintain absolute minimum solvency.

The amendment before us simply says invest the money, earn income on the money, use the income to lower taxes to fund railroad retirement and to increase benefits, but don't spend the trust fund's money, spend the earnings on the money. It is an eminently reasonable amendment. It is in no way a gutting amendment. If we could have gone to committee with a bill, I believe this would have been the solution. I understand my colleagues are for the bill, but I think this is a prudent way of doing it. Make the investments, do it exactly as the bill would do it, but don't spend the principal, spend the earnings. Don't do the things the bill calls for until you have the money in hand.

I think that is a simple principle. The people understand it. I would appreciate if they would vote for it.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. BAUCUS. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The clerk will call the roll.

The legislative clerk called the roll.

Mr. NICKLES. I announce that the Senator from Texas (Mrs. HUTCHISON) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 21, nays 78, as follows:

[Rollcall Vote No. 349 Leg.]

YEAS—21

Allard	Fitzgerald	Lugar
Bond	Frist	McCain
Bunning	Gramm	McConnell
Burns	Gregg	Nickles
Campbell	Helms	Smith (NH)

Enzi	Miller	Wellstone
Feingold	Murkowski	Wyden

NOT VOTING—1

Hutchison

The amendment was rejected.

Mr. FITZGERALD. Mr. President, I would like to bring attention to one particular segment of the railroad industry—commuter rail. As a Senator from Illinois, I have had the opportunity to become very acquainted with the excellent commuter rail system that serves Chicago and northeastern Illinois. This system—Metra—is the second largest commuter rail system in the country and is a key part of the overall, growing, commuter rail industry. Metra employs between 2,500 and 3,000 workers, nearly all of whom are covered under the Railroad Retirement Board benefit plan.

The extent of commuter rail's growth over recent decades is made clear by looking at the number of workers that it employs. Nationally, roughly one-quarter of all rail employees work for commuter and passenger rail, and it is expected that this number will grow substantially in the future.

For these reasons, I believe commuter rail, because of its growing size, importance, and impact, should be represented on the Railroad Retirement Board of Trustees that is created by this bill. As this bill moves forward in the legislative process, I hope that I will be able to work with the chairman and ranking member of the Senate Finance Committee and other conferees to ensure that commuter rail is represented on the Board of Trustees.

Ms. MIKULSKI. Mr. President, I rise in strong support of the Railroad Retirement and Survivors' Improvement Act of 2001. Finally, Congress is going to consider this important bill. I have been working to improve the benefits for our retired railroad workers for many years. Today, we can finally say that promises made are promises kept to our rail workers and their families.

The people who have made their contribution to family and to society by working on our Nation's railroads deserve a decent retirement. I know the job that railroad employees perform is very hard, very important work. Our country has an obligation to help those

who have worked hard, saved, and played by the rules. That is why I am proud to have been a sponsor of Railroad Retirement Improvement legislation for many years and am proud to be a supporter of this bill.

I have been fighting to improve the benefits for railroad workers and their families since I was first elected to Congress. The retirement age for railroad workers and their spouses to qualify for railroad retirement benefits should be lowered. It is difficult for people and families to plan for their retirement in today's world, even with two salaries. That is why strengthening retirement benefits for all Americans has always been one of my highest priorities.

This bill is bipartisan. The House passed their version of this important bill by an overwhelming vote of 384-33. Seventy-four of my colleagues are co-sponsors of the Senate version of the Railroad Retirement and Survivors' Improvement Act of 2001. The support for this measure is clear, and the time to act is now.

The Railroad Retirement and Survivor's Improvement Act expands benefits for the widows of rail employees and lowers the minimum retirement age at which employees with 30 years of experience are eligible for full retirement benefits to 60 years old. This legislation also reduces the number of years required to be fully vested for tier II benefits and expands the system's investment authority by creating an independent, non-governmental Railroad Retirement Trust Fund.

I urge all my colleagues to join me in standing up for our railroad retirees and their families and support this very important bill.

Mr. REID. I move to reconsider the vote by which the amendment was agreed to.

Mr. NICKLES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL DAY OF RECONCILIATION

Mr. REID. Senator BROWNBACK and Senator AKAKA have asked me to make this announcement. They have worked very hard on a piece of legislation which is now law, setting forth today as a National Day of Reconciliation. Members of the House of Representatives and the Senate are encouraged to attend. The meeting is taking place in the Rotunda of the Capitol as we speak. It just started. During assembly, Members of both Houses gather to seek the blessings of Providence for forgiveness, reconciliation, unity, and charity for all of the people of the United States, thereby assisting the Nation to realize its potential as a champion of hope, a vindicator of the

defenseless, and the guardian of freedom.

I hope all who are able will drop what they are doing and make themselves available at the Capitol Rotunda. It will go until 7 p.m. today.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent the order for the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

MORNING BUSINESS

Mr. REID. Mr. President, I ask unanimous consent that we now proceed to a period of morning business with Senators permitted to speak for not to exceed 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE DEATH OF MRS. ELISABETH THURMOND OF NORTH AUGUSTA, SC

Mr. THURMOND. Mr. President, I rise today in remembrance of Mrs. Elisabeth T. Thurmond, my sister-in-law and a valued member of the community of North Augusta, SC, who passed away Friday, November 16, 2001, at the age of 90.

Elisabeth Thurmond, who was married to my late brother Dr. J. William Thurmond, will be remembered as a caring and generous woman. She was known for volunteering much of her time to serve the people of North Augusta and she made significant contributions to her community in a host of areas. For example, she was a charter member of Fairview Presbyterian Church and served in a variety of roles within the church, including as a trustee and a Sunday school teacher. Furthermore, Mrs. Thurmond worked to help improve the educational system of North Augusta. She was very active in school PTAs and served as the chairwoman of the North Augusta Parent Teacher Association Council that helped to establish the Paul Knox Educational Endowment Fund. In addition, she was a member of countless boards and councils and often held important leadership positions such as a seat on the Board of Directors of the North Augusta Chamber of Commerce. Clearly Elisabeth Thurmond lived a life full of civic accomplishment, and she was honored for her service as the 1981 North Augusta Citizen of the Year.

However, the impact of Mrs. Thurmond's good deeds were seen not only by the people of North Augusta but also across State lines. She was very active with the local chapter of the Girl Scouts of America for many years and, after serving as member of the Re-

gional Board of Directors for the Girl Scouts of America, she was named a member of the national board of directors of the organization.

In conclusion, Mrs. Elisabeth Thurmond was a woman of character and integrity. She lived a life of great accomplishment and made wonderful contributions to the city and people of North Augusta. Our State is a better place because of all her hard work, and the impact she made in the lives of others will be felt long after her passing. She was a true American and a fine South Carolinian, and she will certainly be missed by a wide circle of friends.

LOCAL LAW ENFORCEMENT ACT OF 2001

Mr. SMITH of Oregon. Mr. President, I rise today to speak about hate crimes legislation I introduced with Senator KENNEDY in March of this year. The Local Law Enforcement Act of 2001 would add new categories to current hate crimes legislation sending a signal that violence of any kind is unacceptable in our society.

I would like to describe a terrible crime that occurred August 24, 2000 in Somerset, KY. Two women, while working as caretakers at a hospital, beat and abused a mentally retarded patient. The assailants, Valerie Hoskins and Crystal Wright, were indicted on criminal charges in connection with the incident.

I believe that government's first duty is to defend its citizens, to defend them against the harms that come out of hate. The Local Law Enforcement Enhancement Act of 2001 is now a symbol that can become substance. I believe that by passing this legislation, we can change hearts and minds as well.

ADDITIONAL STATEMENTS

CONGRATULATING IDAHO'S NATIONAL BOARD CERTIFIED TEACHERS

• Mr. CRAPO. Mr. President, I rise today to honor a very special group of educators in my home State of Idaho.

Last month, sixty-six teachers received a National Board Certification from the National Board for Professional Teaching Standards, the highest professional credential in the field of teaching. With the addition of these individuals, there are now 272 National Board Certified Teachers in Idaho.

High-quality teachers are the most important assets to any educational system. In order to gain a National Board Certification, these teachers voluntarily, often at great personal expense and sacrifice, submit to a nearly yearlong performance-based assessment. They must demonstrate their mastery in several areas including:

Knowledge of subject matter; ability to effectively teach their subjects to students; and ability to manage and measure student learning. In fact, the State of Idaho recognizes teachers who gain a National Board Certification as "master teachers." I commend these educators for the dedication and sacrifice it takes to successfully complete this program. Not only do they benefit in their teaching techniques, but Idaho's school children benefit through their dedication.

Each one of these teachers has touched countless lives of students. They have been diligent in the trust that has been given to them by parents throughout Idaho. It is appropriate that we honor them today and recognize how hard they have worked to achieve this certification. Sometimes these types of recognitions are only hung on walls, and that rarely provides the public acknowledgement of the achievement. For this reason, I wanted to rise today and share with the U.S. Senate how important this achievement is to the education of young Idahoans.

I ask that the names of the sixty-six Idahoans newly named as National Board Certified Teachers be printed in the RECORD following my statement.

The names follow:

Susan Alt, Boise, ID, Independent School District of Boise City, Early Childhood/Generalist.

Carleen Baldwin, Lapwai, ID, Lapwai, Middle Childhood/Generalist.

Arlene Balls, Soda Springs, ID, Soda Springs District 150, Early Adolescence/Science.

Devon Barker, Nezperce, ID, Nezperce Jt School District No. 302, Middle Childhood/Generalist.

Leslie Rae Bedke, Sugar City, ID, Sugar Salem School District 322, Early Adolescence/English Language Arts.

Marta Bidondo, Boise, ID, Meridian School District No. 2, Early Adolescence/Generalist.

Leah Bug-Townsend, Idaho Falls, ID, Idaho Falls School District 91, Early Adolescence/Social Studies-History.

Khrista Buschhorn, Aberdeen, ID, Aberdeen V, Early and Middle Childhood/English as a New Language.

William Dean, Post Falls, ID, Post Falls School District 273, Adolescence and Young Adulthood/English Language Arts.

Lisa Dreadfulwater, Nezperce, ID, Nezperce 302, Early Childhood/Generalist.

Julie Elliott, Tampa, ID, Nampa 131, Middle Childhood/Generalist.

Anne Marie Elmore, Bellevue, ID, Blaine County, Early Childhood/Generalist.

Joanna Ferris, Inkom, ID, Marsh Valley School District No. 21, Early Childhood/Generalist.

Paula Fisher, Boise, ID, Meridian Joint School District No. 2 Adolescence and Young Adulthood/English Language Arts.

Elaine Forsnes, Rexburg, ID, Madison 321, Adolescence and Young Adulthood/Mathematics.

Victoria Francis, Boise, ID, Independent School District of Boise, Early Adolescence through Young Adulthood/Career and Technical Education.

THANKING MR. BERNARD MARCUS

● Mr. CLELAND. Mr. President, I would like to offer my thanks and appreciation to Mr. Bernard Marcus for his generous donation of \$200 million for the construction of a five-million-gallon aquarium in the city of Atlanta, GA. This gift, made by the Marcus Foundation, is one of the largest single grants ever made by a private foundation and will provide the people of Georgia and those who visit our great State the opportunity to experience the wonders of aquatic and riparian wildlife. In addition to this most recent gesture of generosity, Mr. Marcus has contributed to causes ranging from the Centers for Disease Control and Prevention, vascular diseases, developmentally disabled children, and Jewish charities. Those who have benefitted from his benevolence know him to be a man dedicated to his community and friends. I thank him for his friendship and generosity and look forward to this exciting new addition to the City of Atlanta and the State of Georgia. At this

time, I would like to ask that the text of two Atlanta Journal-Constitution articles be printed in the RECORD.

The articles follow:

[From the Atlanta Journal-Constitution, Nov. 20, 2001]

AQUARIUM "WILL BE A GREAT MARVEL" HOME DEPOT CHIEF PLEDGES \$200 MILLION

(By Shelia M. Poole)

Home Depot Chairman Bernard Marcus promised that the huge Georgia Aquarium announced Monday would have "no boundaries" in offering top-notch entertainment and research opportunities for residents and visitors.

"It will be a great marvel," said Marcus, whose private Marcus Foundation will spend up to \$200 million to build and endow the aquarium, which will be owned by the state.

The nonprofit aquarium—at 5 million gallons and 250,000 square feet—would be among the largest and most elaborate in the nation. It will contain freshwater and saltwater fish and mammals.

Marcus, the 72-year-old cofounder of Home Depot, said the aquarium is a way for him and his wife, Billi, to give back to the community in a way that is "meaningful and will last past our lifetimes."

The aquarium, to open in 2005, will be built on 15.5 acres adjacent to Atlantic Station, a planned \$2 billion minicity under construction west of the Downtown Connector. When completed, the development will include apartments, condominiums, offices, shops and a 20-screen movie theater.

The site for the aquarium is just north of Atlantic Station, east of Mecal Street and south of Deering Road, near the former National Lead Industries site.

The developer of Atlantic Station, Jim Jacoby, who owns Marineland in Florida, is assisting in acquiring the property.

On Monday, representatives of state and local government, business, academia and the tourism and convention industry attended the announcement in the Georgia Capitol's Senate chamber.

Atlanta Mayor-elect Shirley Franklin called it "a wonderful gift for the city."

She said the aquarium would not only provide entertainment and education opportunities for residents, but also create a draw for tourists and conventioners. City boosters have long decried the lack of attractions in downtown Atlanta.

Marcus' announcement effectively supercedes other efforts to build aquariums in Atlanta. At least two proposals had been floated to build aquariums at Stone Mountain Park and near Turner Field.

"We're not in business to compete," but to work toward getting quality recreation facilities in the area, said Thomas Dortch, chairman of the Atlanta-Fulton County Recreation Authority, which had tried for years to find financing and a downtown site for an aquarium. "With the commitment from Mr. Marcus and the governor, we're excited about the fact there will be a world-class aquarium."

The aquarium is still very much a work in progress, say those associated with it. There are no renderings, site plans or economic impact figures, although attendance is projected to be between 1.5 million and 2.5 million annually.

Don Harrison, a Home Depot spokesman, said Marcus planned to visit aquariums across the United States and elsewhere, including China. The design will be finalized over the next 18 months.

"Now is when all the work begins," said Harrison. The aquarium will be global in

scope, drawing researchers and visitors from around the world, he said. "The world is, frankly, our target."

Former Atlantan Jeffrey Swanagan, executive director and chief executive officer of the Florida Aquarium in Tampa, has been tapped to run the project. Swanagan spent 10 years as deputy director of Zoo Atlanta and was a protege of director Terry Maple.

Marcus first approached Gov. Roy Barnes about the project a year ago. The governor suggested Atlantic Station as a possible site. "Location was key," Marcus said. "In our minds it will become a destination to visitors."

Already the city has museums, art galleries and theater. What it doesn't have, Marcus said, is an aquarium.

Dan Graveline—executive director of the Georgia World Congress Center—said, "It will be a wonderful asset for the city. One of [the city's] biggest shortcomings is that convention[goers] lack things to do in downtown Atlanta."

The aquarium represents the largest donation to date from the Marcus Foundation and is a departure from previous endeavors, noted Harrison, the spokesman for Home Depot.

With the private funding, the Georgia aquarium will open with no debt. Other aquariums, typically funded by municipal bonds and saddled with enormous debt, have struggled to prosper. Many have had difficulty funding new exhibits critical to attracting repeat customers.

A notable exception is the Monterey Bay Aquarium in California. The aquarium, which opened in October 1984, was privately financed with a \$55 million gift from David and Lucile Packard of the Hewlett-Packard fortune.

There were "no bonds and no debt," said Ken Peterson, a spokesman for the Monterey Bay Aquarium, which attracts 1.8 million visitors annually and was expanded in 1996. "When you're paying a mortgage plus your operating expenses, it doesn't leave a lot of extra revenue for developing special exhibitions or new exhibit galleries."

Bob Masterson, president of Orlando-based Ripley Entertainment Inc., which operates aquariums in Myrtle Beach, S.C., and Gatlinburg, Tenn., said the size of the Atlanta Facility will make it expensive to operate.

"We spend about \$30,000 a day to run the 1.3 million-gallon aquarium in Myrtle Beach and a little more than that in Gatlinburg," he said. "With a 5 million-gallon tank, I'd guess it would cost at least \$50,000 a day to operate. And if it fails, there is nothing else you can do with that building."

[From the Atlanta Journal-Constitution,
Nov. 20, 2001]

AN AQUARIUM FOR ATLANTA: GIANT FACILITY WILL INCREASE KNOWLEDGE ABOUT OCEANS (By Charles Seabrook)

Call it the Atlanta Ocean.

A world-class aquarium in Atlanta will mean not only a place where people can marvel over ocean wonders, but also a place where scientists and students can unravel mysteries of the sea.

Understanding the oceans' workings is vital, scientists say, because the declining health of the world's seas has become a pressing public problem.

Dozens of ocean fish species are in peril because of overfishing, and marine biologists estimate that more than 25 percent of the coral reefs in the world's tropical oceans are sick or dying.

"If this aquarium is built the way it's envisioned, it will be wonderful not only for eco-

nomics development but also for basic science," said Mark Hay, professor of environmental biology at Georgia Tech. "It will be of immense importance for researchers."

The Georgia Aquarium that Bernard Marcus, chairman of Home Depot, says he wants to build—spending up to \$200 million—will hold more than 5 million gallons of water and encompass 250,000 square feet.

"People who may never travel to the coast will be able to come to Atlanta to learn the lessons of the sea," Hay said.

For scientists, the size and scope of the aquarium, scheduled for completion in 2005, means they may be able to conduct studies that cannot be done very well in laboratories.

"We can buy little tanks and put little creatures in them and observe them in our labs," Hay said.

But a large aquarium, he says, could accommodate complete ecosystems—such as a living coral reef—replete with large numbers of different creatures and plants and minerals.

Scientists say the ocean will never be fully understood until they understand how its ecosystems function.

The Georgia Aquarium will follow the lead of other major aquariums around the world. Scientific research is a basic mission at most of those institutions.

"We realize that health oceans are essential to our survival on Earth," says Ken Peterson of the Monterey Bay Aquarium in California.

"As an aquarium, we see our role as raising public awareness of the oceans and conducting research to help resolve the problems the oceans face."

He notes that half the Earth's oxygen comes from the sea, and the only protein for more than a billion people is provided by the ocean.

"We believe it is important that people know that and know how important the oceans are for their survival," he says.

Jeffrey Swanagan, who has been tapped as the executive director of the aquarium, says a theme has not been chosen. "But it will have a world focus, so that we can tell any freshwater or saltwater story," he says.

Swanagan, a Georgia Tech graduate who spent 10 years at Zoo Atlanta, said the "value of research and conservation is very strong in me."

Swanagan said he hopes the Georgia Aquarium will make people in Atlanta as familiar with the sea as they are with the Chattahoochee River.

"In Tampa, where I live now, kids take the sea for granted because it's all around them," he said. "They think nothing of driving over a causeway and seeing dolphins jumping out the water. We want the people in Atlanta to have similar experiences, albeit it will be an indoor one."

Swanagan, executive director of the Florida Aquarium, said he and his staff will be looking closely at aquariums all over the world to study their exhibits, planning and their public appeal.

Universities and other academic institutions in Georgia also are being asked for help in establishing a marine research program.

"We want an aquarium like no other," he says.

That means, he adds, that the aquarium might attempt to house sea creatures that have been heretofore difficult for other aquariums to maintain.

Some of those creatures, say marine biologists, include fish, squids and other animals that live deep in the ocean under tremendous

pressures—and which have never been seen alive on land.

For Hay and other scientists, the aquarium will be the chance of a lifetime.

Hay helped build the renowned living coral reef aquarium at the Smithsonian Institution 20 years ago.

Many scientists said that facility could not be done because of all the requirements needed to keep the reef animals alive and healthy.

"We did have to learn as we went along," he said.

For instance, one scientist argued that a machine was needed to create wave patterns in the aquarium, but others argued that it was unnecessary.

The researchers found, however, that wave action is vital to maintaining a health coral reef system.

"So, designing and building a new aquarium will further our knowledge even more," he says. ●

DEPARTING NATIONAL INSTITUTE OF MENTAL HEALTH DIRECTOR: DR. STEVEN E. HYMAN

● Mr. KENNEDY. Mr. President, it is a privilege to take this opportunity to commend Steven E. Hyman for his distinguished leadership at the National Institute of Mental Health at NIH for the past 5 years. Dr. Hyman will soon be turning his immense talents to his new duties as the Provost at Harvard University, and I wish him well in this new chapter of his outstanding career.

Steven Hyman was remarkably effective in bringing issues to the national agenda that for too long have met with shame and stigma. As a renowned neuroscientist, he used his considerable talent, reputation, and communication skills to demonstrate to the entire Nation the progress that is being made in understanding and healing mental illnesses. He worked closely with the Surgeon General in his efforts to bring this profoundly important message to the attention of the country.

It is because of efforts like these that we are closer than ever before to providing fair treatment for patients and their families, who have suffered from discrimination because mental illness for so long has been treated unfairly. Under Dr. Hyman's leadership, the NIMH has charted a bold course, initiating new clinical trials that will not exclude patients who are coping with difficulties so often associated with mental illness. He has insisted on including members of the public in the Institutes' research planning, including the groups reviewing grant applications. He has increased the Institute's research emphasis on areas of critical need, such as children and the elderly. He has worked skillfully to guarantee that greater effort is made to translate research into practice.

I know that the National Institute of Mental Health will miss Dr. Hyman's bold and brilliant presence, and so will the nation, as he takes up his eminent new position at Harvard I commend

him for his outstanding service to this country.●

TRIBUTE TO MAYOR BRUCE TOBEY

● Mr. KENNEDY. Mr. President, it is a privilege to take this opportunity to pay tribute to Bruce Tobey, the outstanding Mayor of Gloucester, MA, who is retiring at the end of this year. I join the people of Gloucester in expressing my deep appreciation for his commitment and dedication to the City of Gloucester and I thank him for his leadership and his friendship.

Mayor Tobey has been a strong and effective leader for Gloucester, working to improve opportunities for all of Gloucester's residents. Mayor Tobey took a particular interest in the fishing community. Fishing has been the lifeblood of Gloucester for nearly four hundred years, and Mayor Tobey has worked tirelessly to continue this proud tradition.

Mayor Tobey's leadership was especially significant in opening the Gloucester Fish Exchange. The Fish Exchange has been a major success as a site for fishermen to sell their fish and for buyers to view the fish. It is the second Fish Exchange to be established in the entire country. I commend the Mayor for his foresight and perseverance, which has made Gloucester's Fish Exchange such a resounding success.

Mayor Tobey has also worked skillfully to rehabilitate the State Fish Pier in Gloucester. New businesses on the pier, including the Cape Ann Seafood Center, a 50,000-square-foot seafood-processing center, are there today because of Mayor Tobey's leadership and dedication. New businesses on the pier have been essential in improving access to local seafood processing, and have also created numerous new jobs on the waterfront.

Mayor Tobey has also been a strong supporter of the Gloucester Fisheries Forum, a day-long symposium dedicated to the discussion of major fisheries issues. Year in and year out, this Forum has become a productive opportunity for members of the local fishing community to speak to leaders in the field and learn from them about the current challenges and future hopes for the fishing industry. Mayor Tobey understood the need to bring people together, and he did an outstanding job.

There has been no greater friend or supporter of these fishing communities than Mayor Tobey. We are grateful for his distinguished service to the City of Gloucester and to our state, and we're proud of his friendship. I know that his commitment to public service will continue in other ways, and he will be deeply missed.●

TRIBUTE TO MAYOR GERRY DOYLE OF PITTSFIELD

● Mr. KENNEDY. Mr. President, it is a privilege to take this opportunity to

pay tribute to Gerry Doyle, the outstanding Mayor of Pittsfield, MA, who is retiring at the end of this year. He has been a wonderful mayor for the people of Pittsfield, and I know they join me in thanking him for his commitment and dedication to public service.

Mayor Doyle will long be remembered for his outstanding leadership in achieving an historic agreement to clean up the Housatonic River and the General Electric industrial site. He was the driving force behind this impressive agreement which protects the magnificent environmental heritage of the Berkshires and the public health of the entire community, and has laid a solid basis for future economic development in Pittsfield.

The settlement is one of the largest of its kind ever achieved in Massachusetts, Mayor Doyle won great progress for all the Berkshires by striking this all-important balance between economic development and environmental cleanup. The day this agreement was reached was the dawning of a new era for Pittsfield, and for that we will always be grateful to Mayor Doyle for his outstanding leadership.

Mayor Doyle has also done an outstanding job of increasing tourism in the Berkshires and in improving the quality of life for the people of Pittsfield. He's worked skillfully to improve transportation in the city, which in turn has helped attract new businesses to Pittsfield.

All of us in Massachusetts are grateful for Mayor Doyle's distinguished service to the City of Pittsfield and to our State, and we are grateful for his friendship. We know that his commitment to public service will continue in other ways, and he will be deeply missed.●

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Ms. Evans, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

REPORT ON THE EMERGENCY REGARDING PROLIFERATION OF WEAPONS OF MASS DESTRUCTION—MESSAGE FROM THE PRESIDENT—PM 60

The PRESIDING OFFICER laid before the Senate the following message

from the President of the United States, together with an accompanying report; which was referred to the Committee on Banking, Housing, and Urban Affairs.

To the Congress of the United States:

As required by section 204(c) of the International Emergency Economic Powers Act, 50 U.S.C. 1703(c), and section 401(c) of the National Emergencies Act, 50 U.S.C. 1641(c), I transmit herewith a 6-month periodic report on the national emergency with respect to the proliferation of weapons of mass destruction that was declared in Executive Order 12938 of November 14, 1994.

GEORGE W. BUSH.
THE WHITE HOUSE, December 4, 2001.

PERIODIC REPORT ON THE NATIONAL EMERGENCIES WITH RESPECT TO THE FEDERAL REPUBLIC OF YUGOSLAVIA (SERBIA AND MONTENEGRO) AND KOSOVO—MESSAGE FROM THE PRESIDENT—PM 61

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Banking, Housing, and Urban Affairs.

To the Congress of the United States:

As required by section 401(c) of the National emergencies Act, 50 U.S.C. 1641(c), and section 204(c) of the International Emergency Economic Powers Act, 50 U.S.C. 1703(c), I transmit herewith a combined 6-month periodic report on the national emergencies declared with respect to the Federal Republic of Yugoslavia (Serbia and Montenegro) in Executive Order 12808 on May 30, 1992, and Kosovo in Executive Order 13088 on June 9, 1998.

GEORGE W. BUSH.
THE WHITE HOUSE, December 4, 2001.

MESSAGE FROM THE HOUSE

ENROLLED BILL SIGNED

At 2:17 p.m., a message from the House of Representatives, delivered by Ms. Niland, one of its reading clerks, announced that the Speaker has signed the following enrolled bills:

H.R. 717. An act to amend the Public Health Service Act to provide for research with respect to various forms of muscular dystrophy, including Duchenne, Becker, limb girdle, congenital, facioscapulohumeral, myotonic, oculopharyngeal, distal, and Emery-Dreifuss muscular dystrophies.

H.R. 2291. An act to extend the authorization of the Drug-Free Communities Support Program for an additional 5 years, to authorize a National Community Antidrug Coalition Institute, and for other purposes.

The enrolled bills were signed subsequently by the president pro tempore (Mr. BYRD).

MEASURES READ THE FIRST TIME

The following bill was read the first time:

S. 1765. A bill to improve the ability of the United States to prepare for and respond to a biological threat or attack.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-4796. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "4-Amino-6-(1, 1-dimethylethyl)-3-(methylthio)-2, 2, 4-triazin-5(4H)-one (Metribuzin), Dichlobenil, Diphenylamine, Sulprofos, Pendimethalin, and Terbacil; Tolerance Actions" (FRL6804-4) received on December 3, 2001; to the Committee on Agriculture, Nutrition, and Forestry.

EC-4797. A communication from the Acting Assistant General Counsel for Regulatory Services, Office of the Chief Financial Officer, Department of Education, transmitting, pursuant to law, the report of a rule entitled "Direct Grant Programs" (RIN1890-AA02) received on November 29, 2001; to the Committee on Health, Education, Labor, and Pensions.

EC-4798. A communication from the Secretary of Labor, transmitting, pursuant to law, the Eighth Annual Report relative to Trade and Employment Effects of the Andean Trade Preference Act, November 2001; to the Committee on Finance.

EC-4799. A communication from the Assistant Secretary of Defense, Command, Control, Communications, and Intelligence, transmitting, pursuant to law, a report entitled "Financial Addendum to Fiscal Year Department of Defense Chief Information Officer Annual Information Assurance Report"; to the Committee on Armed Services.

EC-4800. A communication from the Chairman of the Advisory Panel to Assess Domestic Response Capabilities for Terrorism Involving Weapons of Mass Destruction, transmitting, pursuant to law, the Advance Executive Summary of the Third Annual Report of the Advisory Panel dated October 31, 2001; to the Committee on Armed Services.

EC-4801. A communication from the Acting Assistant Secretary of Land and Minerals Management, Engineering and Operations Division, Department of the Interior, transmitting, pursuant to law, the report of a rule entitled "Leasing of Sulphur or Oil and Gas in the Outer Continental Shelf-Revision of Requirements Governing Surety Bonds for Outer Continental Shelf Leases" (RIN1010-AC68) received on November 29, 2001; to the Committee on Energy and Natural Resources.

EC-4802. A communication from the Acting Director of the Office of Surface Mining, Department of the Interior, transmitting, pursuant to law, the report of a rule entitled "Utah Regulatory Program" (UT-037-FOR) received on November 29, 2001; to the Committee on Energy and Natural Resources.

EC-4803. A communication from the Assistant General Counsel for Regulatory Law, Office of Energy Efficiency and Renewable Energy, Department of Energy, transmitting, pursuant to law, the report of a rule entitled "Weatherization Assistance Program for

Low-Income Persons" (RIN1901-AB05) received on December 3, 2001; to the Committee on Energy and Natural Resources.

EC-4804. A communication from the Secretary of Labor, transmitting, pursuant to law, the Semiannual Report of the Office of the Inspector General for the period April 1, 2001, through September 30, 2001; to the Committee on Governmental Affairs.

EC-4805. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14-177, "Parking Meter Fee Moratorium Temporary Act of 2001"; to the Committee on Governmental Affairs.

EC-4806. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14-174, "Chief Financial Officer Establishment Reprogramming During Non-Control Years Technical Temporary Amendment Act of 2001"; to the Committee on Governmental Affairs.

EC-4807. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14-173, "Sentencing Reform Technical Amendment Temporary Act of 2001"; to the Committee on Governmental Affairs.

EC-4808. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14-170, "Closing of a Portion of F Street, N.W., S.O. 99-70, Act of 2001"; to the Committee on Governmental Affairs.

EC-4809. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14-172, "Redevelopment Land Agency-RLA Revitalization Corporation Transfer Temporary Act of 2001"; to the Committee on Governmental Affairs.

EC-4810. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14-169, "Citizens with Mental Retardation Substituted Consent for Health Care Decisions Temporary Amendment Act of 2001"; to the Committee on Governmental Affairs.

EC-4811. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14-184, "Disposal of District Owned Surplus Real Property Temporary Amendment Act of 2001"; to the Committee on Governmental Affairs.

EC-4812. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14-183, "Mandatory Autopsy for Deceased Wards of the District of Columbia and Mandatory Unusual Incident Report Temporary Act of 2001"; to the Committee on Governmental Affairs.

EC-4813. A communication from the Chairman of the District of Columbia, transmitting, pursuant to law, a report on D.C. Act 14-182, "Public Disclosure of Findings and Information in Cases of Child Fatality or Near Fatality Amendment Act of 2001"; to the Committee on Governmental Affairs.

EC-4814. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Clean Air Act Full Approval of the Operating Permits Program; for the Pinal County Air Quality Control District, Arizona" (FRL7112-8) received on November 29, 2001; to the Committee on Environment and Public Works.

EC-4815. A communication from the Principal Deputy Associate Administrator of the

Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Revisions to the Arizona State Implementation Plan, Maricopa County Environmental Services Department" (FRL7105-3) received on November 29, 2001; to the Committee on Environment and Public Works.

EC-4816. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Minnesota; Final Approval of State Underground Storage Tank Program" (FRL7110-8) received on November 29, 2001; to the Committee on Environment and Public Works.

EC-4817. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Clean Air Act Final Approval of Operating Permits Program; State of Vermont" (FRL7110-2) received on November 29, 2001; to the Committee on Environment and Public Works.

EC-4818. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of State Implementation Plans; Illinois" (FRL7111-1) received on November 29, 2001; to the Committee on Environment and Public Works.

EC-4819. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Implementation Plans, State of Missouri" (FRL7110-5) received on November 29, 2001; to the Committee on Environment and Public Works.

EC-4820. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Implementation Plans; Illinois" (FRL7107-9) received on November 29, 2001; to the Committee on Environment and Public Works.

EC-4821. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Implementation Plans; Illinois" (FRL7108-8) received on November 29, 2001; to the Committee on Environment and Public Works.

EC-4822. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of the Implementation Plans; Illinois" (FRL7107-7) received on November 29, 2001; to the Committee on Environment and Public Works.

EC-4823. EC-4830. A communication from the Principal Deputy Associate Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Clean Air Act Full Approval of Operating Permit Program; Virginia" (FRL7112-5) received on November 29, 2001; to the Committee on Environment and Public Works.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. LEAHY, from the Committee on the Judiciary:

Report to accompany S. 1233, a bill to provide penalties for certain unauthorized writing with respect to consumer products. (Rept. No. 107-106).

By Mr. INOUE, from the Committee on Appropriations, with an amendment in the nature of a substitute:

H.R. 3338: A bill making appropriations for the Department of Defense for the fiscal year ending September 30, 2002, and for other purposes.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mr. THOMAS (for himself and Mrs. LINCOLN):

S. 1760. A bill to amend title XVIII of the Social Security Act to provide for the cov-

erage of marriage and family therapist services and mental health counselor services under part B of the medicare program, and for other purposes; to the Committee on Finance.

By Mr. DORGAN (for himself, Mr. CAMPBELL, and Mr. BINGAMAN):

S. 1761. A bill to amend title XVIII of the Social Security Act to provide for coverage of cholesterol and blood lipid screening under the medicare program; to the Committee on Finance.

By Mr. JOHNSON:

S. 1762. A bill to amend the Higher Education Act of 1965 to establish fixed interest rates for student and parent borrowers, to extend current law with respect to special allowances for lenders, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

By Mr. DASCHLE (for himself and Mr. JOHNSON):

S. 1763. A bill to promote rural safety and improve rural law enforcement; to the Committee on Finance.

By Mr. LIEBERMAN:

S. 1764. A bill to provide incentives to increase research by commercial, for-profit entities to develop vaccines, microbicides, diagnostic technologies, and other drugs to prevent and treat illnesses associated with a biological or chemical weapons attack; to the Committee on Finance.

By Mr. FRIST (for himself, Mr. KENNEDY, Mr. ALLEN, Mr. DASCHLE, Mr. BENNETT, Mr. AKAKA, Mr. BOND, Mr. BAUCUS, Mr. BROWNBACK, Mr. BAYH, Mr. BURNS, Mr. BIDEN, Mr. CAMPBELL, Mr. BINGAMAN, Mr. CHAFFEE, Mr. BREAUX, Mr. COCHRAN, Mrs. CARNAHAN, Ms. COLLINS, Mr. CLELAND, Mr. CRAIG, Mrs. CLINTON, Mr. CRAPO, Mr. CORZINE, Mr. DEWINE, Mr. DODD, Mr. DOMENICI, Mr. DORGAN, Mr. GRASSLEY, Mr. DURBIN, Mr. HAGEL, Mr. EDWARDS, Mr. HUTCHINSON, Mrs. FEINSTEIN, Mrs. HUTCHISON, Mr. HARKIN, Mr. LUGAR, Mr. JEFFORDS, Mr. MCCONNELL, Mr. JOHNSON, Mr. MURKOWSKI, Mr. KERRY, Mr. ROBERTS, Ms. LANDRIEU, Mr. SANTORUM, Mr. LEAHY, Ms. SNOWE, Mr. LIEBERMAN, Mr. SPECTER, Mrs. LINCOLN, Mr. STEVENS, Ms. MIKULSKI, Mr. THOMAS, Mr. MILLER, Mr. THOMPSON, Mrs. MURRAY, Mr. THURMOND, Mr. NELSON of Florida, Mr. VOINOVICH, Mr. REED, Mr. WARNER, Mr. REID, Mr. ROCKEFELLER, Mr. SARBANES, Mr. TORRICELLI, Mr. WELLSTONE, Mr. SCHUMER, Mr. DAYTON, Mr. HELMS, Mr. FITZGERALD, Mr. CONRAD, Mr. HATCH, and Ms. STABENOW):

S. 1765. A bill to improve the ability of the United States to prepare for and respond to a biological threat or attack; read the first time.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. DASCHLE:

S. Res. 186. A resolution to authorize representation of Senator Lott in the case of Lee v. Lott; considered and agreed to.

ADDITIONAL COSPONSORS

S. 690

At the request of Mr. WELLSTONE, the name of the Senator from Maryland (Mr. SARBANES) was added as a cosponsor of S. 690, a bill to amend title XVIII of the Social Security Act to expand and improve coverage of mental health services under the medicare program.

S. 724

At the request of Mr. BOND, the name of the Senator from Ohio (Mr. DEWINE) was added as a cosponsor of S. 724, a bill to amend title XXI of the Social Security Act to provide for coverage of pregnancy-related assistance for targeted low-income pregnant women.

S. 990

At the request of Mr. SMITH of New Hampshire, the name of the Senator from Arkansas (Mrs. LINCOLN) was added as a cosponsor of S. 990, a bill to amend the Pittman-Robertson Wildlife Restoration Act to improve the provisions relating to wildlife conservation and restoration programs, and for other purposes.

S. 999

At the request of Mr. BINGAMAN, the name of the Senator from Maryland (Mr. SARBANES) was added as a cosponsor of S. 999, a bill to amend title 10, United States Code, to provide for a Korea Defense Service Medal to be issued to members of the Armed Forces who participated in operations in Korea after the end of the Korean War.

S. 1008

At the request of Mr. BYRD, the name of the Senator from Ohio (Mr. DEWINE) was added as a cosponsor of S. 1008, a bill to amend the Energy Policy Act of 1992 to develop the United States Climate Change Response Strategy with the goal of stabilization of greenhouse gas concentrations in the atmosphere at a level that would prevent dangerous anthropogenic interference with the climate system, while minimizing adverse short-term and long-term economic and social impacts, aligning the Strategy with United States energy policy, and promoting a sound national environmental policy, to establish a research and development program that focuses on bold technological breakthroughs that make significant progress toward the goal of stabilization of greenhouse gas concentrations, to establish the National Office of Climate Change Response within the Executive Office of the President, and for other purposes.

S. 1209

At the request of Mr. BINGAMAN, the name of the Senator from Maine (Ms. SNOWE) was added as a cosponsor of S. 1209, a bill to amend the Trade Act of 1974 to consolidate and improve the trade adjustment assistance programs, to provide community-based economic development assistance for trade-affected communities, and for other purposes.

S. 1248

At the request of Mr. JOHNSON, his name was added as a cosponsor of S. 1248, a bill to establish a National Housing Trust Fund in the Treasury of the United States to provide for the development of decent, safe, and affordable, housing for low-income families, and for other purposes.

S. 1312

At the request of Mr. NELSON of Florida, the name of the Senator from Florida (Mr. GRAHAM) was added as a cosponsor of S. 1312, a bill to authorize the Secretary of the Interior to conduct a special resource study of Virginia Key Beach, Florida, for possible inclusion in the National Park System.

S. 1373

At the request of Mr. BUNNING, his name was added as a cosponsor of S. 1373, a bill to protect the right to life of each born and preborn human person in existence at fertilization.

S. 1478

At the request of Mr. SANTORUM, the names of the Senator from Nevada (Mr. ENSIGN) and the Senator from Connecticut (Mr. DODD) were added as cosponsors of S. 1478, a bill to amend the Animal Welfare Act to improve the treatment of certain animals, and for other purposes.

S. 1609

At the request of Mr. KERRY, the names of the Senator from Connecticut (Mr. DODD) and the Senator from Connecticut (Mr. LIEBERMAN) were added as cosponsors of S. 1609, a bill to amend the National Trails System Act to direct the Secretary of the Interior to conduct a study on the feasibility of designating the Metacomb-Monadnock-Mattabesett Trail extending through western Massachusetts and central Connecticut as a national historic trail.

S. 1618

At the request of Mr. KENNEDY, the name of the Senator from South Dakota (Mr. DASCHLE) was added as a cosponsor of S. 1618, a bill to enhance the border security of the United States, and for other purposes.

S. 1678

At the request of Mr. MCCAIN, the name of the Senator from Vermont (Mr. JEFFORDS) was added as a cosponsor of S. 1678, a bill to amend the Internal Revenue Code of 1986 to provide that a member of the uniformed services or the Foreign Service shall be treated as using a principal residence while away from home on qualified official extended duty in determining the exclusion of gain from the sale of such residence.

S. 1707

At the request of Mr. JEFFORDS, the name of the Senator from Missouri (Mr. BOND) was added as a cosponsor of S. 1707, a bill to amend title XVIII of the Social Security Act to specify the update for payments under the medi-

care physician fee schedule for 2002 and to direct the Medicare Payment Advisory Commission to conduct a study on replacing the use of the sustainable growth rate as a factor in determining such update in subsequent years.

S. 1738

At the request of Mr. KERRY, the names of the Senator from Pennsylvania (Mr. SPECTER) and the Senator from Montana (Mr. BURNS) were added as cosponsors of S. 1738, a bill to amend title XVIII of the Social Security Act to provide regulatory relief, appeals process reforms, contracting flexibility, and education improvements under the medicare program, and for other purposes.

S. 1745

At the request of Mrs. LINCOLN, the names of the Senator from Massachusetts (Mr. KENNEDY), the Senator from Washington (Mrs. MURRAY), the Senator from Georgia (Mr. CLELAND), the Senator from New Jersey (Mr. TORRICELLI), and the Senator from New York (Mr. SCHUMER) were added as cosponsors of S. 1745, a bill to delay until at least January 1, 2003, any changes in medicaid regulations that modify the medicaid upper payment limit for non-State Government-owned or operated hospitals.

S. 1749

At the request of Mr. KENNEDY, the names of the Senator from New Mexico (Mr. BINGAMAN), the Senator from New York (Mr. SCHUMER), the Senator from Nebraska (Mr. HAGEL), and the Senator from Nevada (Mr. REID) were added as cosponsors of S. 1749, a bill to enhance the border security of the United States, and for other purposes.

S. 1757

At the request of Mr. CRAIG, the name of the Senator from Idaho (Mr. CRAPO) was added as a cosponsor of S. 1757, a bill to authorize an additional permanent judgeship in the district of Idaho, and for other purposes.

S.J. RES. 12

At the request of Mr. SMITH of New Hampshire, the name of the Senator from Maine (Ms. SNOWE) was added as a cosponsor of S.J. Res. 12, a joint resolution granting the consent of Congress to the International Emergency Management Assistance Memorandum of Understanding.

AMENDMENT NO. 2152

At the request of Mr. DEWINE, the name of the Senator from Hawaii (Mr. INOUE) was added as a cosponsor of amendment No. 2152 intended to be proposed to H.R. 3090, a bill to provide tax incentives for economic recovery.

AMENDMENT NO. 2157

At the request of Mr. MCCAIN, the name of the Senator from Vermont (Mr. JEFFORDS) was added as a cosponsor of amendment No. 2157 intended to be proposed to H.R. 3090, a bill to provide tax incentives for economic recovery.

AMENDMENT NO. 2202

At the request of Mr. CONRAD, his name was added as a cosponsor of amendment No. 2202.

STATEMENTS ON INTRODUCED BILLS AND JOINTS RESOLUTIONS

By Mr. THOMAS (for himself and Mrs. LINCOLN):

S. 1760. A bill to amend title XVIII of the Social Security Act to provide for the coverage of marriage and family therapist services and mental health counselor services under part B of the Medicare Program, and for other purposes; to the Committee on Finance.

Mr. THOMAS. Mr. President, I am pleased to rise today to introduce the Seniors Mental Health Access Improvement Act of 2001 with my distinguished colleague from Arkansas, Mrs. LINCOLN. Specifically, the Seniors Mental Health Access Improvement Act of 2001 permits mental health counselors and marriage and family therapists to bill Medicare for their services. This will result in an increased choice of providers for seniors and enhance their ability to access mental health services in their communities.

This legislation is especially crucial to rural seniors who are often forced to travel long distances to utilize the services of mental health providers currently recognized by the Medicare program. Rural communities have difficulty recruiting and retaining providers, especially mental health providers. In many small towns a mental health counselor or a marriage and family therapist is the only mental health care provider in the area. Medicare law, as it exists today, compounds the situation because only psychiatrists, clinical psychologists, clinical social workers and clinical nurse specialists are able to bill Medicare for their services.

It is time the Medicare program recognized the qualifications of mental health counselors and marriage and family therapists as well as the critical role they play in the mental health care infrastructure. These providers go through rigorous training, similar to the curriculum of masters level social workers, and yet are excluded from the Medicare program.

Particularly troubling to me is the fact that seniors have disproportionately higher rates of depression and suicide than other populations. Additionally, 75 percent of the 518 nationally designated Mental Health Professional Shortage Areas are located in rural areas and one-fifth of all rural counties have no mental health services of any kind. Frontier counties have even more drastic numbers as 95 percent do not have a psychiatrist, 68 percent do not have a psychologist and 78 percent do not have a social worker. It is quite obvious we have an enormous task ahead of us to

reduce these staggering statistics. Providing mental health counselors and marriage and family therapists the ability to bill Medicare for their services is a key part of the solution.

Virtually all of my State of Wyoming is a mental health professional shortage area and will greatly benefit from this legislation. Wyoming has 169 psychologists, 121 psychiatrists, and 247 social workers for a total of 537 Medicare eligible mental health providers. Enactment of the Seniors Mental Health Access Improvement Act of 2001 will double the number of mental health providers available to seniors in my State with the addition of 517 mental health counselors and 55 marriage and family therapists currently licensed in the State.

In crafting this legislation Senator LINCOLN and I worked with numerous outside organizations with an interest in this issue. As a result of this collaboration, the "Seniors Mental Health Access Improvement Act of 2001" is strongly supported by the American Counseling Association, the Wyoming Counseling Association, the American Mental Health Counselors Association, the Arkansas Mental Health Counselors Association, the American Association for Marriage and Family Therapy, the Wyoming and Arkansas Chapters of the Association for Marriage and Family Therapy, the California Association of Marriage and Family Therapists, and the National Rural Health Association.

I believe this legislation is critically important to the health and well-being of our Nation's Seniors and I strongly urge all my colleagues to become a co-sponsor.

Mr. President, I ask unanimous consent that the text of the bill and letters of endorsement from supporting organizations be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1760

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Seniors Mental Health Access Improvement Act of 2001".

SEC. 2. COVERAGE OF MARRIAGE AND FAMILY THERAPIST SERVICES AND MENTAL HEALTH COUNSELOR SERVICES UNDER PART B OF THE MEDICARE PROGRAM.

(a) COVERAGE OF SERVICES.—

(1) IN GENERAL.—Section 1861(s)(2) of the Social Security Act (42 U.S.C. 1395x(s)(2)), as amended by sections 102(a) and 105(a) of the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 (114 Stat. 2763A-468 and 2763A-471), as enacted into law by section 1(a)(6) of Public Law 106-554, is amended—

(A) in subparagraph (U), by striking "and" after the semicolon at the end;

(B) in subparagraph (V)(iii), by inserting "and" after the semicolon at the end; and

(C) by adding at the end the following new subparagraph:

"(W) marriage and family therapist services (as defined in subsection (ww)(1)) and mental health counselor services (as defined in subsection (ww)(3));".

(2) DEFINITIONS.—Section 1861 of such Act (42 U.S.C. 1395x), as amended by sections 102(b) and 105(b) of the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 (114 Stat. 2763A-468 and 2763A-471), as enacted into law by section 1(a)(6) of Public Law 106-554, is amended by adding at the end the following new subsection:

"Marriage and Family Therapist Services; Marriage and Family Therapist; Mental Health Counselor Services; Mental Health Counselor

"(ww)(1) The term 'marriage and family therapist services' means services performed by a marriage and family therapist (as defined in paragraph (2)) for the diagnosis and treatment of mental illnesses, which the marriage and family therapist is legally authorized to perform under State law (or the State regulatory mechanism provided by State law) of the State in which such services are performed, as would otherwise be covered if furnished by a physician or as an incident to a physician's professional service, but only if no facility or other provider charges or is paid any amounts with respect to the furnishing of such services.

"(2) The term 'marriage and family therapist' means an individual who—

"(A) possesses a master's or doctoral degree which qualifies for licensure or certification as a marriage and family therapist pursuant to State law;

"(B) after obtaining such degree has performed at least 2 years of clinical supervised experience in marriage and family therapy; and

"(C) in the case of an individual performing services in a State that provides for licensure or certification of marriage and family therapists, is licensed or certified as a marriage and family therapist in such State.

"(3) The term 'mental health counselor services' means services performed by a mental health counselor (as defined in paragraph (2)) for the diagnosis and treatment of mental illnesses which the mental health counselor is legally authorized to perform under State law (or the State regulatory mechanism provided by the State law) of the State in which such services are performed, as would otherwise be covered if furnished by a physician or as incident to a physician's professional service, but only if no facility or other provider charges or is paid any amounts with respect to the furnishing of such services.

"(4) The term 'mental health counselor' means an individual who—

"(A) possesses a master's or doctor's degree in mental health counseling or a related field;

"(B) after obtaining such a degree has performed at least 2 years of supervised mental health counselor practice; and

"(C) in the case of an individual performing services in a State that provides for licensure or certification of mental health counselors or professional counselors, is licensed or certified as a mental health counselor or professional counselor in such State."

(3) PROVISION FOR PAYMENT UNDER PART B.—Section 1832(a)(2)(B) of such Act (42 U.S.C. 1395k(a)(2)(B)) is amended by adding at the end the following new clause:

"(v) marriage and family therapist services and mental health counselor services;".

(4) AMOUNT OF PAYMENT.—Section 1833(a)(1) of such Act (42 U.S.C. 1395l(a)(1)), as amended by sections 105(c) and 223(c) of the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 (114 Stat. 2763A-472 and 2763A-489), as enacted into law by section 1(a)(6) of Public Law 106-554, is amended—

(A) by striking "and (U)" and inserting "(U)"; and

(B) by inserting before the semicolon at the end the following: ", and (V) with respect to marriage and family therapist services and mental health counselor services under section 1861(s)(2)(W), the amounts paid shall be 80 percent of the lesser of the actual charge for the services or 75 percent of the amount determined for payment of a psychologist under clause (L)".

(5) EXCLUSION OF MARRIAGE AND FAMILY THERAPIST SERVICES AND MENTAL HEALTH COUNSELOR SERVICES FROM SKILLED NURSING FACILITY PROSPECTIVE PAYMENT SYSTEM.—Section 1888(e) of the Social Security Act (42 U.S.C. 1395yy(e)) is amended—

(A) in paragraph (2)(A)(i)(II), by striking "clauses (ii) and (iii)" and inserting "clauses (ii) through (iv)"; and

(B) by adding at the end of paragraph (2)(A) the following new clause:

"(iv) EXCLUSION OF CERTAIN MENTAL HEALTH SERVICES.—Services described in this clause are marriage and family therapist services (as defined in section 1861(ww)(1)) and mental health counselor services (as defined in section 1861(ww)(3))."

(6) INCLUSION OF MARRIAGE AND FAMILY THERAPISTS AND MENTAL HEALTH COUNSELORS AS PRACTITIONERS FOR ASSIGNMENT OF CLAIMS.—Section 1842(b)(18)(C) of such Act (42 U.S.C. 1395u(b)(18)(C)), as amended by section 105(d) of the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 (114 Stat. 2763A-472), as enacted into law by section 1(a)(6) of Public Law 106-554, is amended by adding at the end the following new clauses:

"(vii) A marriage and family therapist (as defined in section 1861(ww)(2)).

"(viii) A mental health counselor (as defined in section 1861(ww)(4))."

(b) COVERAGE OF CERTAIN MENTAL HEALTH SERVICES PROVIDED IN CERTAIN SETTINGS.—

(1) RURAL HEALTH CLINICS AND FEDERALLY QUALIFIED HEALTH CENTERS.—Section 1861(aa)(1)(B) of the Social Security Act (42 U.S.C. 1395x(aa)(1)(B)) is amended by inserting ", by a marriage and family therapist (as defined in subsection (ww)(2)), by a mental health counselor (as defined in subsection (ww)(4)), after "by a clinical psychologist (as defined by the Secretary)".

(2) HOSPICE PROGRAMS.—Section 1861(dd)(2)(B)(i)(III) of such Act (42 U.S.C. 1395x(dd)(2)(B)(i)(III)) is amended by inserting "or a marriage and family therapist (as defined in subsection (ww)(2))" after "social worker".

(c) AUTHORIZATION OF MARRIAGE AND FAMILY THERAPISTS TO DEVELOP DISCHARGE PLANS FOR POST-HOSPITAL SERVICES.—Section 1861(ee)(2)(G) of the Social Security Act (42 U.S.C. 1395x(ee)(2)(G)) is amended by inserting "marriage and family therapist (as defined in subsection (ww)(2))" after "social worker".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to services furnished on or after January 1, 2002.

AMERICAN COUNSELING ASSOCIATION,
Alexandria, VA, November 27, 2001.

Hon. CRAIG THOMAS,
U.S. Senate,
Washington, DC.

DEAR SENATOR THOMAS: I am writing on behalf of the American Counseling Association, which with over 53,000 members is the nation's largest non-profit membership organization representing state-licensed professional mental health counselors, to express our strong support for your legislation, the "Seniors Mental Health Access Improvement Act of 2001". We applaud your leadership in introducing this legislation.

Medicare's mental health benefit currently excludes two core mental health professions: licensed professional counselors and licensed marriage and family therapists. Statistics such as those included in the attached fact sheet show that Medicare beneficiaries are not getting the mental health treatment they need. Lack of access to providers is one of the primary factors involved.

As with other areas of health care, accessing mental health services is especially problematic in rural areas. In many underserved communities, licensed professional counselors are the only mental health specialists available. We feel strongly that proposals to improve rural Medicare beneficiaries' access to mental health care must include expanding the pool of covered providers. However, access to providers is not only a rural issue. An article cited on the enclosed fact sheet, recently published by the American Psychiatric Association, states that "the supply of both specialists and resources cannot meet current or future demands" for mental health treatment of older Americans.

Coverage of licensed professional counselors under Medicare is a common-sense step toward ensuring that all beneficiaries get the help they need. There are over 81,000 professional counselors licensed as master's level mental health professionals in Wyoming and 44 other states across the country. These providers meet education, training, and examination requirements on par with those of clinical social workers, who have been covered under Medicare for over ten years.

Thank you for your leadership in introducing this important legislation. We look forward to working with you to gain its enactment, and I urge you and your staff to call on us if we can be of any assistance.

Sincerely,

JANE GOODMAN,
President.

AMERICAN COUNSELING ASSOCIATION,
Alexandria, VA, November 27, 2001.

Hon. BLANCHE L. LINCOLN,
U.S. Senate,
Washington, DC.

DEAR SENATOR LINCOLN: I am writing on behalf of the American Counseling Association, which with over 53,000 members is the nation's largest non-profit membership organization representing state-licensed professional mental health counselors, to express our strong support for your legislation, the "Seniors Mental Health Access Improvement Act of 2001". We applaud your leadership in introducing this legislation.

Medicare's mental health benefit currently excludes two core mental health professions: licensed professional counselors and licensed marriage and family therapists. Statistics such as those included in the attached fact sheet show that Medicare beneficiaries are not getting the mental health treatment they need. Lack of access to providers is one of the primary factors involved.

As with other areas of health care, accessing mental health services is especially problematic in rural areas. In many underserved communities, licensed professional counselors are the only mental health specialists available. We feel strongly that proposals to improve rural Medicare beneficiaries' access to mental health care must include expanding the pool of covered providers. However, access to providers is not only a rural issue. An article cited on the enclosed fact sheet, recently published by the American Psychiatric Association, states that "the supply of both specialists and resources cannot meet current or future demands" for mental health treatment of older Americans.

Coverage of licensed professional counselors under Medicare is a common-sense step toward ensuring that all beneficiaries get the help they need. There are over 81,000 professional counselors licensed as master's level mental health professionals in Arkansas and 44 other states across the country. These providers meet education, training, and examination requirements on par with those of clinical social workers, who have been covered under Medicare for over ten years.

Thank you for your leadership in introducing this important legislation. We look forward to working with you to gain its enactment, and I urge you and your staff to call on us if we can be of any assistance.

Sincerely,

JANE GOODMAN,
President.

WYOMING COUNSELING ASSOCIATION,
November 27, 2001.

Hon. CRAIG THOMAS,
U.S. Senate,
Washington, DC.

DEAR SENATOR THOMAS: The Wyoming Counseling Association is pleased to convey its strong support of your legislation, the "Seniors Mental Health Access Improvement Act of 2001". We are proud of your leadership on mental health issues, as evidenced by your introduction of this and other legislation, and your support of S. 543, the "Mental Health Equitable Treatment Act of 2001".

Wyoming's residents often have only limited—if any—access to mental health professionals. There simply aren't enough providers. Given this fact, it makes no sense to continue to exclude licensed professional counselors from Medicare coverage, when similarly-trained providers are covered. In many parts of the state, licensed professional counselors are the only mental health specialists around.

We believe that establishing Medicare coverage of licensed professional counselors is a cost-effective means of improving the health and well-being of enrollees. The more than 500 professional counselors licensed in Wyoming should be allowed to help meet their mental health needs. It should jolt Congress into action to know that older Americans are the demographic group in the U.S. most at risk of committing suicide. This must be remedied.

Please let us know if there is anything we can do to assist you on mental health issues, and thank you again for your leadership, initiative, and hard work.

Sincerely,

KAREN ROBERTSON,
President.
DR. DAVID L. BECK,
Past-President.
LESLEY TRAVERS,
President-elect.

AMERICAN MENTAL HEALTH
COUNSELORS ASSOCIATION,
Alexandria, VA, November 27, 2001.

Hon. CRAIG THOMAS,
U.S. Senate, Hart Senate Office Building,
Washington, DC.

DEAR SENATOR THOMAS: I am writing on behalf of the American Mental Health Counselors Association (AMHCA) to express our strong support for the Seniors Mental Health Access Improvement Act, legislation to expand access to mental health providers in the Medicare program. As president of AMHCA and a Licensed Mental Health Counselor (LMHC), I commend you and Senator Lincoln for introducing this important legislation.

AMHCA is the nation's largest professional organization exclusively representing the mental health counseling profession. Our members practice in a variety of settings, including hospitals, community mental health centers, managed behavioral health care organizations, employee assistance plans, substance abuse treatment centers, and private practice. Currently, there are more than 80,000 licensed or certified professional counselors practicing in the United States, including many in rural areas where access to mental health care is often scarce.

As you know, Medicare covers the services of independently practicing psychiatrists, clinical psychologists, clinical social workers, and clinical nurse specialists, but does not recognize mental health counselors or marriage and family therapists as separately reimbursable mental health providers. Specifically, the Seniors Mental Health Access Improvement Act would correct this inequity by including mental health counselors and marriage and family therapists among the list of providers who can deliver mental health services to Medicare beneficiaries, provided they are legally authorized to deliver such care under state law. Enactment of this provision would increase access to and the availability of mental health services to Medicare beneficiaries, particularly for those seniors who reside in rural and underserved areas. The inclusion of mental health counselors and marriage and family therapists as Medicare providers would also afford beneficiaries greater choice among qualified providers.

Again, thank you for the leadership you have shown in introducing this legislation and for your commitment to ensuring greater access for seniors affected by mental illness. If I can be of assistance to you as you work towards the enactment of the Seniors Mental Health Access Improvement Act, please feel free to contact me. Beth Powell, AMHCA's Director of Public Policy and Professional Issues, is also available to assist you and your staff.

Sincerely,

MIDGE WILLIAMS,
President.

AMERICAN MENTAL HEALTH
COUNSELORS ASSOCIATION,
Alexandria, VA, November 28, 2001

Hon. BLANCHE L. LINCOLN,
U.S. Senate, Dirksen Senate Office Building,
Washington, DC.

DEAR SENATOR LINCOLN: I am writing on behalf of the American Mental Health Counselors Association (AMHCA) to express our strong support of the Seniors Mental Health Access Improvement Act, legislation to expand access to mental health providers in the Medicare program. As president of AMHCA and a Licensed Mental Health Counselor (LMHC), I commend you and Senator

Thomas for introducing this important legislation.

AMHCA is the nation's largest professional organization exclusively representing the mental health counseling profession. Our members practice in a variety of settings, including hospitals, community mental health centers, managed behavioral health care organizations, employee assistance plans, substance abuse treatment centers, and private practice. Currently, there are more than 80,000 licensed or certified professional counselors practicing in the United States, including many in rural areas where access to mental health care is often scarce. The Arkansas Mental Health Counselors Association (ArMHCA), a state chapter of AMHCA, represents the interests of mental health counselors practicing in your state.

As you know, Medicare covers the services of independently practicing psychiatrists, clinical psychologists, clinical social workers, and clinical nurse specialists, but does not recognize mental health counselors or marriage and family therapists as separately reimbursable mental health providers. Specifically, the Seniors Mental Health Access Improvement Act would correct this inequity by including mental health counselors and marriage and family therapists among the list of providers who can deliver mental health services to Medicare beneficiaries, provided they are legally authorized to deliver such care under state law. Enactment of this provision would increase access to and the availability of mental health services to Medicare beneficiaries, particularly for those seniors who reside in rural and underserved areas. The inclusion of mental health counselors and marriage and family therapists as Medicare providers would also afford beneficiaries greater choice among qualified providers.

Again, thank you for the leadership you have shown in introducing this legislation and for your commitment to ensuring greater access for seniors affected by mental illness. If I can be of assistance to you as you work towards the enactment of the Seniors Mental Health Access Improvement Act, please feel free to contact me. Beth Powell, AMHCA's Director of Public Policy and Professional Issues, is also available to assist you and your staff.

Sincerely,

MIDGE WILLIAMS,
President.

ARKANSAS MENTAL HEALTH
COUNSELORS ASSOCIATION,
Jonesboro, AR, November 27, 2001.

Hon. BLANCHE L. LINCOLN,
*U.S. Senate, Dirksen Senate Office Building,
Washington, DC.*

DEAR SENATOR LINCOLN: I am writing on behalf of the Arkansas Mental Health Counselors Association (ArMHCA) to express our strong support for the Seniors Mental Health Access Improvement Act and to convey our sincere appreciation to you for introducing this legislation. As a Licensed Professional Counselor (LPC) and a constituent, I want to express to you the importance of this legislation to LPCs in our state and to the nation's 39 million Medicare beneficiaries.

Mental health counselors-called Licensed Professional Counselor in Arkansas are mental health professionals with a master's or doctoral degree in counseling or related disciplines who provide services along a continuum of care. Currently, 45 states and the District of Columbia license or certify mental health counselors to independently provide mental health services, including the di-

agnosis and treatment of mental and emotional disorders. LPCs practice in a variety of settings, including hospitals, community mental health centers, managed behavioral health care organizations, employee assistance plans, substance abuse treatment centers, and private practice.

Medicare currently covers the services of independently practicing psychiatrists, clinical psychologists, clinical social workers, and clinical nurse specialists, however; it does not recognize mental health counselors or marriage and family therapists as separately reimbursable mental health providers. The Seniors Mental Health Access Improvement Act corrects this oversight by including mental health counselors and marriage and family therapist among the list of providers who deliver mental health services to Medicare beneficiaries, provided they are legally authorized to perform the services under state law. Enactment of this provision would increase access to and the availability of mental health services to Medicare beneficiaries, particularly for those seniors who reside in rural and underserved area. The inclusion of mental health counselors and marriage and family therapists in the program would also afford beneficiaries a choice among qualified providers.

Again, thank you for the leadership you have shown in introducing this important legislation. If I can be of assistance to you as your work towards enactment of the Seniors Mental Health Access Improvement Act please feel free to contact me. Beth Powell, AMHCA's Director of Public and Professional Issues, is also available to assist you and your staff.

Sincerely,

DEE KERNODLE
President.

AMERICAN ASSOCIATION FOR
MARRIAGE AND FAMILY THERAPY,
Washington, DC, December 3, 2001.

Hon. CRAIG THOMAS,
*Hart Senate Office Building,
Washington, DC.*

DEAR SENATOR THOMAS: The American Association for Marriage and Family Therapy is writing on behalf of the 46,000 marriage and family therapists throughout the United States to commend you for sponsoring the Seniors Mental Health Access Improvement Act of 2001. This crucial legislation to expand the mental health benefits for our elderly will go a long way towards improving Medicare beneficiaries' access to critical mental health services provided by Marriage and Family Therapist (MFTs) and Mental Health Counselors (MHCs) across the nation.

As you know, mental illness is a major problem for many Americans, and particularly for the elderly. Research demonstrates that depression is disproportionately high among older persons, as is the incidence of suicide. The Surgeon General's Report on Mental Health has indicated that there are effective treatments for these and other mental illnesses. The Seniors Mental Health Access Improvement Act of 2001 helps make these treatments accessible to elderly citizens. By expanding the pool of qualified providers, the bill also achieves the important objective of increasing access to mental health services for elderly in rural areas, where there is a recognized shortage of professionals.

Passage of the Seniors Mental Health Access Improvement Act of 2001 will ensure that Medicare beneficiaries in need of mental health services will have the same freedom to choose a mental health professional

available in their community as the non-Medicare population. The Archives of General Psychiatry projects that the number of people over 65 years with psychiatric disorders will increase from about 4 million in 1970 to 15 million in 2030. It also indicates that the current health care system is unprepared to meet the upcoming crisis in geriatric mental health. Providing access to licensed MFTs and MHCs will help ensure that there are an adequate number of providers available to meet the needs of the growing elderly population.

Your leadership and support to address the mental health needs of our seniors is greatly appreciated. It is about time the Medicare program is structured to respond to the demands of the elderly population it serves. AAMFT hopes the Seniors Mental Health Improvement Act of 2001 will become law. We look forward to working with you to meet this objective. Thank you again for your commitment to improving the lives of the elderly.

Sincerely,

DAVID M. BERGMAN,
*Director of
Legal and Government Affairs.*

AMERICAN ASSOCIATION FOR
MARRIAGE AND FAMILY THERAPY,
Washington, DC, December 3, 2001.

Hon. BLANCHE LAMBERT LINCOLN,
*Dirksen Senate Office Building,
Washington, DC.*

DEAR SENATOR LINCOLN: The American Association for Marriage and Family Therapy is writing on behalf of the 46,000 marriage and family therapists throughout the United States to commend you for sponsoring the Seniors Mental Health Access Improvement Act of 2001. This crucial legislation to expand the mental health benefits for our elderly will go a long way towards improving Medicare beneficiaries' access to critical mental health services provided by Marriage and Family Therapist (MFTs) and Mental Health Counselors (MHCs) across the nation.

WYOMING ASSOCIATION FOR
MARRIAGE AND FAMILY THERAPY,
Jackson, WY, November 30, 2001.

Hon. CRAIG THOMAS,
*Hart Senate Office Building,
Washington, DC.*

DEAR SENATOR THOMAS: On behalf of the Wyoming Association for Marriage and Family Therapy, I want to thank you for agreeing to sponsor the Seniors Mental Health Improvement Act of 2001.

This important legislation will go a long way toward improving Medicare beneficiaries' access to critical mental health services in our state. As you know, more than 90 percent of Wyoming has been designated by the federal government as a mental health professional shortage area. By authorizing Medicare coverage for both Marriage and Family Therapists (MFTs) and Mental Health Counselors (MHCs), you are more than doubling the number of mental health professionals available to provide services to the Medicare population in these underserved areas.

Your legislation will also ensure that Wyoming beneficiaries in need of mental health services will have the same freedom to choose the mental health professional available in their community as the non-Medicare population. As you are aware, our state has already authorized MFTs to provide a wide range of mental health services covered by the Medicare program. Unfortunately, because Medicare does not currently recognize MFTs, Medicare beneficiaries must often travel hundreds of miles to be seen by a mental health professional who is recognized by the Medicare program. This, despite the fact that there may be a Marriage and Family Therapist in their community that the state has already deemed qualified to provide the covered services.

Your support for improved access to mental health services is greatly appreciated. We look forward to working with you on this important legislation. I would also personally like to send my best wishes to you and Susan and hope that all is well in Washington.

Sincerely,

CINDY KNIGHT
President.

ARKANSAS ASSOCIATION FOR
MARRIAGE AND FAMILY THERAPY,
December 1, 2001.

Hon. BLANCHE LAMBERT LINCOLN,
*Dirksen Senate Office Building,
Washington, DC.*

DEAR SENATOR LINCOLN: I was part of a coalition of four mental health organizations that wrote to you last week on behalf of the Seniors Mental Health Improvement Act of 2001. However, I wanted to address that again with you specifically from the Arkansas Association for Marriage and Family Therapy. This is such an important piece of legislation on behalf of our aging population.

This important legislation will go a long way towards improving Medicare bene-

ficiaries' access to critical mental health services in our state. As you know, more than 90 percent of Arkansas has been designated by the federal government as a mental health professional shortage area. By authorizing Medicare coverage for both Marriage and Family Therapists (MFTs) and Licensed Professional Counselors (LPCs) or Mental Health counselors (MHCs) you are more than doubling the number of mental health professionals available to provide services to the Medicare population in these under-served regions.

Your legislation will also ensure that Arkansas Medicare beneficiaries in need of mental health services will have the same freedom to choose the mental health professional available in their community as the non-Medicare population. As you are aware, our state has already authorized MFTs to provide a wide range of mental health services covered by the Medicare program. Unfortunately, because Medicare does not currently recognize MFTs, Medicare beneficiaries must often travel hundreds of miles to be seen by a mental health professional that is recognized by Medicare. In my practice, I am aware of long waits for seniors to see providers due to the few and the overload of those providers. This, despite the fact that there may be a Marriage and Family Therapist in their community that the state has already deemed qualified to provide the covered services.

Your support for improved access to mental health services is greatly appreciated. We look forward to working with you on this important legislation.

Sincerely,

DELL TYSON,
President.

NATIONAL RURAL HEALTH ASSOCIATION,
Kansas City, MO, December 3, 2001.

Hon. CRAIG THOMAS,
*U.S. Senate, Hart Senate Office Building,
Washington, DC.*

DEAR SENATOR THOMAS: On behalf of the National Rural Health Association, I would like to convey our strong support for the Seniors Mental Health Access Improvement Act of 2001.

While a lack of primary care services in rural and frontier areas has long been acknowledged, the scarcity of rural mental health services has only recently received increased attention. At the end of 1997, 76% of designated mental health professional shortage areas were located in non-metropolitan areas with a total population of over 30 million Americans. Currently there is an increased need for intervention by mental health care professionals to help people cope with the aftermath of the September 11 terrorist attacks as well as the ongoing war on terrorism. Because there is less access to mental health care in rural America, rural residents will have a subsequent lack of professional guidance in dealing with the recent trauma experienced by our country.

The Seniors Mental Health Access Improvement Act of 2001 would help provide increased access to mental health care services in rural and frontier areas by allowing Licensed Professional Counselors and Marriage and Family Therapists to bill Medicare for their services and be paid 80 percent of the lesser of the actual charge for the services or 75 percent of the amount determined for payment of a psychologist.

The membership of the NRHA appreciates your bringing attention to the critical issue of access to mental health care in rural areas as well as your ongoing leadership on rural

health issues. The NRHA stands ready to work with you on enactment of the Seniors Mental Health Access Improvement Act of 2001, which would help to increase the availability of mental health care in rural and frontier areas.

Sincerely,

CHARLOTTE HARDT,
President.

NATIONAL RURAL HEALTH ASSOCIATION,
Kansas City, MO, December 3, 2001.

Hon. BLANCHE LINCOLN,
*U.S. Senate, Hart Senate Office Building,
Washington, DC.*

DEAR SENATOR LINCOLN: On behalf of the National Rural Health Association, I would like to convey our strong support for the Seniors Mental Health Access Improvement Act of 2001.

CALIFORNIA ASSOCIATION OF
MARRIAGE AND FAMILY THERAPISTS,
San Diego, CA, November 19, 2001.

Re Medicare Legislation to Recognize Marriage and Family Therapists and Professional Counselors.

Hon. CRAIG THOMAS,
*U.S. Senate,
Washington, DC.*

DEAR SENATOR THOMAS: We are writing to you in recognition and support of your willingness to cosponsor legislation that would dramatically improve access to mental health services for Medicare beneficiaries. By adding licensed marriage and family therapists and licensed professional counselors, it will open many opportunities within Medicare for patients to locate and receive therapy from appropriately trained and qualified professionals.

On behalf of the 24,500 members of the California Association of Marriage and Family

Therapists, we support your willingness to co-sponsor this legislation. Under California law, licensed marriage and family therapists are legally authorized to provide mental health services and are reimbursed by most all third party payers for the diagnosis and treatment of mental disorders. However, because Medicare does not recognize this particular discipline, California licensed marriage and family therapists are precluded from providing these services and Medicare beneficiaries are precluded from utilizing marriage and family therapists to provide mental health counseling and treatment.

Marriage and family therapists are considered one of the five "core mental health professions" recognized by the federal government. Unfortunately, however, we are the only core mental health profession not recognized by Medicare.

We appreciate and thank you for your willingness to take on the challenge of sponsoring legislation to make LMFTs and LPCs eligible for reimbursement by Medicare.

Sincerely,

MARY RIEMERSMA,
Executive Director.

CALIFORNIA ASSOCIATION OF
MARRIAGE AND FAMILY THERAPISTS,
San Diego, CA, November 19, 2001.

Re Medicare Legislation to Recognize Marriage and Family Therapists and Professional Counselors.

Hon. BLANCHE LINCOLN,
*U.S. Senate,
Washington, DC.*

DEAR SENATOR LINCOLN: We are writing to you in recognition and support of your willingness to cosponsor legislation that would dramatically improve access to mental health services for Medicare beneficiaries. By adding licensed marriage and family therapists and licensed professional counselors, it will open many opportunities within Medicare for patients to locate and receive therapy from appropriately trained and qualified professionals.

On behalf of the 24,500 members of the California Association of Marriage and Family Therapists, we support your willingness to co-sponsor this legislation. Under California law, licensed marriage and family therapists are legally authorized to provide mental health services and are reimbursed by most all third party payers for the diagnosis and treatment of mental disorders. Marriage and family therapists are considered one of the five "core mental health professions" recognized by the federal government. Unfortunately, however, we are the only core mental health profession not recognized by Medicare.

We appreciate and thank you for your willingness to take on the challenge of sponsoring legislation to make LMFTs and LPCs eligible for reimbursement by Medicare.

Sincerely,

MARY RIEMERSMA,
Executive Director.

Mrs. LINCOLN. Mr. President, I am pleased to join my colleague Senator THOMAS today in introducing the Seniors Mental Health Access Improvement Act of 2001.

This bill would expand Medicare coverage to licensed professional coun-

sors and licensed marriage and family therapists. One result of this expanded coverage will be to increase seniors' access to mental health services, especially in rural and underserved areas.

Licensed professional counselors and marriage and family therapists are currently excluded from Medicare coverage even though they meet the same education, training, and examination requirements that clinical social workers do. The only difference is that clinical social workers have been covered under Medicare for over a decade.

Why do we need this legislation? The mental health needs of older Americans are not being met. Although the rate of suicide among older Americans is higher than for any other age group, less than three percent of older Americans report seeing mental health professionals for treatment. And going to their primary care physician is simply not enough. Research shows that most primary care providers receive inadequate mental health training, particularly in geriatrics.

Lack of access to mental health providers is one of the primary reasons why older Americans don't get the mental health treatment they need. Not surprisingly, this problem is exacerbated in rural and underserved areas.

Licensed professional counselors are often the only mental health specialists available in rural and underserved communities. This is true in my home State of Arkansas, where 91 percent of Arkansans reside in a mental health professional shortage area.

Since there are more licensed professional counselors practicing in my State than any other mental health professional, this legislation will significantly increase the number of Medicare-eligible mental health providers in Arkansas. Licensed professional counselors are already serving patients who have private insurance or Medicaid. It is time for Medicare patients to also have access to these professionals.

The bill we are introducing today is an important first step in expanding access to good mental health. By including licensed professional counselors and licensed marriage and family therapists among the list of providers who deliver mental health services to Medicare beneficiaries, we will help ensure that all seniors, no matter where they live, have the opportunity to receive mental health treatment.

By Mr. DORGAN (for himself, Mr. CAMPBELL, and Mr. BINGAMAN):

S. 1761. A bill to amend title XVII of the Social Security Act to provide for coverage of cholesterol and blood lipid screening under the Medicare Program; to the Committee on Finance.

Mr. DORGAN. Mr. President, today I am introducing the Medicare Cholesterol Screening Coverage Act of 2001,

along with my colleagues Mr. CAMPBELL and Mr. BINGAMAN. This bipartisan legislation, which also has been introduced in the House of Representatives, would add blood cholesterol screening as a covered benefit for Medicare beneficiaries.

The most recent guidelines from the National Heart, Lung and Blood Institute recommends that all Americans over the age of 20 be screened for high cholesterol. Yet current Medicare policy only covers cholesterol testing for patients who already have heart disease, stroke or other disorders associated with elevated cholesterol levels. Thus, enactment of this bill will help save lives of the approximately one-third of Medicare recipients not already covered for cholesterol testing.

High cholesterol is a major risk factor for heart disease and stroke, the Nation's number 1 and number 3 killers of both men and women. Cardiovascular disease kills nearly a million people each year in this country, more than the next seven leading causes of death combined. In particular, Americans over the age of 65 have the highest rate of coronary heart disease, CHD, in the Nation and about 80 percent of the deaths from CHD occur in this age group. It is not surprising that cardiovascular diseases account for one-third of all Medicare's spending for hospitalizations.

Obviously, in order to slow the onset of CHD, it is first necessary to identify those with elevated cholesterol, which is why passage of this bill is so critical. The importance of identifying those at risk for CHD is illustrated by the results of just released research from Oxford University. This study showed that in elderly people, lowering of cholesterol was associated with a one-third reduction in heart attack and stroke and a substantially reduced need for surgery to repair or open clogged arteries.

Clearly, this bill can save lives. Yet despite the importance of identifying this major, changeable risk factor for cardiovascular disease, screening for cholesterol is not covered by Medicare. I have felt for a long while that our health care system, and Medicare in particular, needs to place a greater emphasis on preventative health care. Implementation of the measures in this bill can potentially decrease the incidence of cardiovascular disease resulting in reduced illness, debilitation and death. Early detection of illness is often an important factor in successful treatment and has been effective in reducing long-term health care costs.

Previously, Congress in its wisdom, has acted to provide for other screening tests including bone mass measurement, and screenings for glaucoma and for colorectal, prostate and breast cancer. Now we must take another step in the right direction by extending Medicare coverage for cholesterol screening.

It is only right that the Congress do what it can to help implement the guidelines of the National Heart, Lung and Blood Institute, and it is only right that we provide these benefits for all Medicare recipients. I urge my Senate colleagues to join me in cosponsoring this piece of legislation. I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1761

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Medicare Cholesterol Screening Coverage Act of 2001".

SEC. 2. MEDICARE COVERAGE OF CHOLESTEROL AND BLOOD LIPID SCREENING.

(a) IN GENERAL.—Section 1861 of the Social Security Act (42 U.S.C. 1395x) is amended—

(1) in subsection (s)(2)—

(A) by striking "and" at the end of subparagraph (U);

(B) by adding "and" at the end of subparagraph (V); and

(C) by adding at the end the following new subparagraph:

"(W) cholesterol and other blood lipid screening tests (as defined in subsection (ww)(1));"; and

(2) by adding at the end the following new subsection:

"Cholesterol and Other Blood Lipid Screening Test

"(ww)(1) The term 'cholesterol and other blood lipid screening test' means diagnostic testing of cholesterol and other lipid levels of the blood for the purpose of early detection of abnormal cholesterol and other lipid levels.

"(2) The Secretary shall establish standards, in consultation with appropriate organizations, regarding the frequency and type of cholesterol and other blood lipid screening tests for individuals who do not otherwise qualify for coverage for cholesterol and other blood lipid testing based on established clinical diagnoses."

(b) FREQUENCY.—Section 1862(a)(1) of such Act (42 U.S.C. 1395y(a)(1)) is amended—

(1) by striking "and" at the end of subparagraph (H);

(2) by striking the semicolon at the end of subparagraph (I) and inserting "and"; and

(3) by adding at the end the following new subparagraph:

"(J) in the case of a cholesterol and other blood lipid screening test (as defined in section 1861(ww)(1)), which is performed more frequently than is covered under section 1861(ww)(2)."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to tests furnished on or after January 1, 2003.

By Mr. DASCHLE (for himself and Mr. JOHNSON):

S. 1763. A bill to promote rural safety and improve rural law enforcement; to the Committee on Finance.

Mr. DASCHLE. Mr. President, in the weeks since September 11, we've heard a lot about homeland security. Right now, we're working to make our Nation's infrastructure more secure, our food and water supply safer, and to im-

prove our government's ability to respond to chemical and biological weapons attacks.

To me, homeland security also means giving all of our Nation's law enforcement officers the tools and training they need to do their jobs. And that means recognizing that law enforcement in rural America has its own unique set of challenges: rural law enforcement officers patrol larger areas, and operate under tighter budgets with smaller staffs, than most of their urban and suburban counterparts.

In States like South Dakota, often, just a handful of people are responsible for patrolling an entire county. Law enforcement officers respond to a lot of calls alone, and often have to communicate with each other by cell phone. Backup can be several hours away. Yet we expect the same quality of service, and we demand lower crime rates.

I believe Washington can and must do a better job of helping rural law enforcement do their work. That is why I am proud to join my colleague and friend, Senator TIM JOHNSON, in introducing the Rural Safety Act of 2001.

While TIM and I are the ones introducing this bill, we want to thank all of the South Dakota sheriffs with whom we've spoken whose ideas and experiences are incorporated within it. For my part, I'd like to recognize: Sheriff Mike Milstead of Minnehaha County, Sheriff Mark Milbrandt of Brown County, Sheriff Leidholt of Hughes County, Chief Al Aden of Pierre, Chief Duane Heeney of Yankton, Chief Ken Schwab of my hometown, Aberdeen, Chief Doug Feltman of Mitchell, and Chief Craig Tieszen of Rapid City.

One theme I've heard repeated on visit after visit is this: Washington needs to do a better job working with State and local law enforcement agencies. To me, that means building on what we know works, and developing new initiatives that respond to the special law enforcement challenges of small towns and rural communities. To that end, this bill does six things: First, it builds on our success with the COPS program. COPS has enabled South Dakota communities to hire more than 300 law enforcement officers. Across the country, it's added more than 100,000 new officers to the "thin blue line." Under this proposal, rural communities that hire officers through the COPS program will be eligible for federal funding to keep those offices on for a fourth year.

Second, because rural law enforcement officers have to cover such large areas, rural law enforcement agencies arguably have a greater need for advanced communications equipment than many urban and suburban departments, but have fewer resources to purchase them. Recently, I received a letter from Sgt. Marty Goetsch in the Lawrence County Sheriff's Office in

Deadwood, SD. He told me that his office, and its staff of 11, are "very much behind in the available technology." This bill provides funds to help rural communities obtain things like mobile data computers and dash-mounted video cameras. It will also provide additional funds for training to use new technologies.

Third, this bill will establish a Rural Policing Institute as a way to help rural law enforcement officers upgrade their skills and tactics.

Fourth, it will expand and improve the 9-1-1 emergency assistance systems in rural areas. Many of us take for granted that in an emergency, we can call 9-1-1, and help will be there. In rural and remote areas, the nearest help may be miles away. We need to make sure that people in rural areas can rely on a modern, integrated system of communication between law enforcement, and fire and other safety officials. The Rural Safety Act will provide the resources to finish the job and develop a seamless 9-1-1 system all across America.

Fifth, the bill will help communities create "restorative justice" for first-time, non-violent juvenile offenders. These programs offer victims the opportunity to confront youthful offenders and require that these offenders make meaningful restitution to their victims. In many cases, that will meet our societal goals more effectively and more efficiently than costly incarceration.

Sixth, it will enable us to stop the spread of "meth" now, before it becomes a crisis. A study released last year by the Center on Addiction and Substance Abuse at Columbia University shows that eighth graders living in rural communities are 104 percent more likely to have used amphetamines, including methamphetamine. We need to stop the use of all of these drugs, but in rural America, meth is particularly addictive, and devastatingly destructive. This proposal will increase prevention and treatment of meth use, and cleanup of meth labs that have been discovered and shut down.

Seventh and finally, our plan will offer gun owners tax credits to purchase gun safes. It will also provide law enforcement agencies with resources to buy and install gun safes or gun storage racks for officers' homes. I don't believe Washington should restrict the right of law-abiding citizens to own guns. But if gun owners want help in preventing accidental gun tragedies, I believe Washington can, and should, help.

When we talk about homeland security, I believe we need to think about the law enforcement needs of those who live in America's rural areas. That is what this bill does, and that is why I encourage all of my colleagues to support it.

By Mr. LIEBERMAN:

S. 1764. A bill to provide incentives to increase research by commercial, for-profit entities to develop vaccines, microbicides, diagnostic technologies, and other drugs to prevent and treat illnesses associated with a biological or chemical weapons attack; to the Committee on Finance.

Mr. LIEBERMAN. Mr. President, America has a major flaw in its defenses against bioterrorism. Recent hearings I chaired in the Government Affairs Committee on bioterrorism demonstrated that America has not made a national commitment to research and development of treatments and cures for those who might be exposed to or infected by a biological agent or chemical toxin. Correcting this critical gap is the purpose of legislation I am introducing today.

Obviously, our first priority must be to attempt to prevent the use of these agents and toxins by terrorists, quickly assess when an attack has occurred, take appropriate public health steps to contain the exposure, stop the spread of contagion, and then detoxify the site. These are all critical functions, but in the end we must recognize that some individuals may be exposed or infected. Then the critical issue is whether we can treat and cure them and prevent death and disability.

We need a diversified portfolio of medicines. In cases where we have ample advance warning of an attack and specific information about the agent or toxin, we may be able to vaccinate the vulnerable population in advance. In other cases, even if we have a vaccine, we might well prefer to use medicines that would quickly stop the progression of the disease or the toxic effects. We also need a powerful capacity quickly to develop new countermeasures where we face a new agent or toxin.

Unfortunately, we are woefully short of vaccines and medicines to treat individuals who are exposed or infected. We have antibiotics that seem to work for most of those infected in the current anthrax attack, but these have not prevented five deaths. We have no effective vaccines or medicines for most other biological agents and chemical toxins we might confront. In some cases we have vaccines to prevent, but no medicines to treat, an agent. We have limited capacity to speed the development of vaccines and medicines to prevent or treat novel agents and toxins not currently known to us.

We have provided, and should continue to provide, direct Federal funding for research and development of new medicines, however, this funding is unlikely to be sufficient. Even with ample Federal funding, many private companies will be reluctant to enter into agreements with government agencies to conduct this research. Other companies would be willing to

conduct the research with their own capital and at their own risk but are not able to secure the funding from investors.

The legislation I introduce today would provide incentives for private biotechnology companies to form capital to develop countermeasures, medicines, to prevent, treat and cure victims of bioterror attacks. This will enable this industry to become a vital part of the national defense infrastructure and do so for business reasons that make sense for their investors on the bottom line.

Enactment of these incentives is necessary as most biotech companies have no approved products or revenue from product sales to fund research. They rely on investors and equity capital markets to fund the research. They must necessarily focus on research that will lead to product sales and revenue and, thus, to an end to their dependence on investor capital. There is no established or predictable market for countermeasures. Investors are justifiably reluctant to fund this research, which will present challenges similar in complexity to AIDS. Investors need assurances that research on countermeasures has the potential to provide a rate of return commensurate with the risk, complexity and cost of the research, a rate of return comparable to that which may arise from a treatment for cancer, MS, Cystic Fibrosis and other major diseases.

It is in our national interest to enlist these companies in the development of countermeasures as biotech companies tend to be innovative and nimble and intently focused on the intractable diseases for which no effective medical treatments are available.

The incentives I have proposed are innovative and some may be controversial. I invite everyone who has an interest and a stake in this research to enter into a dialogue about the issue and about the nature and terms of the appropriate incentives. I have attempted to anticipate the many complicated technical and policy issues that this legislation raises. The key focus of our debate should be how, not whether, we address this critical gap in our public health infrastructure and the role that the private sector should play. Millions of Americans will be at risk if we fail to enact legislation to meet this need.

My proposal is complimentary to legislation on bioterrorism preparedness sponsored by Senators FRIST and KENNEDY. Their bill, the Bioweapons Preparedness Act of 2001, S. 1715, focuses on many needed improvements in our public health infrastructure. It builds on their proposal in the 106th Congress, S. 2731, and H.R. 4961, sponsored by Congressman RICHARD BURR.

Among the provisions in these bills are initiatives on improving bioterrorism preparedness capacities, im-

proving communication about bioterrorism, protection of children, protection of food safety, and global pathogen surveillance and response. The Senate Appropriations Committee reported legislation to appropriate the funds for the purposes authorized in the Frist-Kennedy proposal and that was incorporated in the stimulus package pending in the Senate before the Thanksgiving recess.

Title IV of their bill includes provisions to expand research on biological agents and toxins, as well as new treatments and vaccines for such agents and toxins. Since the effectiveness of vaccines, drugs, and therapeutics for many biological agents and toxins often may not ethically be tested in humans, the bill ensures that the Food and Drug Administration, FDA, will finalize by a date certain its rule regarding the approval of new countermeasures on the basis of animal data. Priority countermeasures will also be given enhanced consideration for expedited review by the FDA. They rely on the authority, through an existing Executive Order, to ensure indemnification of sponsors who supply vaccines to the Government. And the bill provides a limited antitrust exemption to allow potential sponsors to discuss and agree upon how to develop, manufacture, and produce new countermeasures, including vaccines, and drugs. Federal Trade Commission and the Department of Justice approval of such agreements is required to ensure such agreements are not anti-competitive.

My legislation builds on these provisions by providing incentives to enable the biotechnology industry acting on its own initiative to fund and conduct research on countermeasures. It includes tax, procurement, intellectual property and liability incentives. Accordingly, my proposal raises issues falling within the jurisdiction of the HELP, Finance, and Judiciary Committees.

The Frist-Kennedy bill and my bill are complimentary. We do need to conform the two bills to one another on some issues: the bills have different definitions of the term "countermeasure," my bill gives the Director of Homeland Defense authority over the countermeasure list whereas the Secretary of Health and Human Services would have authority under Frist/Kennedy, and my bill establishes a "purchase fund" and Frist-Kennedy is a "stockpile." The best, most comprehensive approach would be to meld the two bills together.

The bottom line is that we need both bills, one focusing on public health and one focusing on medical research. Without medical research, public health workers will not have the single most important tool to use in an attack, medicine to prevent death and disability and medicine that will help us avoid public panic.

We are fortunate that we have broad-spectrum antibiotics including Cipro to treat the type of anthrax to which so many have been exposed. This treatment seems to be effective before the anthrax symptoms become manifest, and effective to treat cutaneous anthrax, and we have been able to effectively treat some individuals who have inhalation anthrax. I am thankful that this drug exists to treat those who have been exposed, including my own Senate staff. Our offices are immediately above those of Senator DASCHLE.

We have seen how reassuring it is that we have an effective treatment for this biological agent. We see long lines of Congressional staffers and postal workers awaiting their Cipro. Think what it would be like if we could only say, "We have nothing to treat you and hope you don't contract the disease." Think of the public panic that we might see.

I am grateful that this product exists and proud of the fact that the Bayer Company is based in Connecticut. The last thing we should be doing is criticizing this company for their research success. The company has dispensed millions of dollars worth of Cipro free of charge. Criticizing it for the price that it charges tells other research companies that the more valuable their products are in protecting the public health, the more likely they are to be criticized and bullied.

It is fortuitous that Cipro seems to be effective against anthrax. The product was not developed with this use in mind. My point with this legislation is we cannot rely on good fortune and chance in the development of countermeasures. We need to make sure that these countermeasures will be developed. We need more companies like Bayer, we need them focused specifically on developing medicines to deal with the new bioterror threat, and we need to tell them that there are good business reasons for this focus.

We also are fortunate to have an FDA-licensed vaccine, made by BioPort Corporation, that is recommended by our country's medical experts at the DOD and CDC for pre-anthrax exposure vaccination of individuals in the military and some individuals in certain laboratory and other occupational settings where there is a high risk of exposure to anthrax. This vaccine is also recommended for use with Cipro after exposure to anthrax to give optimal and long-lasting protection. That vaccine is not now available for use. We must do everything necessary to make this and other vaccines available in adequate quantities to protect against future attacks. But the point of this legislation is that we need many more Cipro-like and anthrax vaccine-like products. That we have these products is the good news; that we have so few others is the problem.

One unfortunate truth in this debate is that we cannot rely upon international legal norms and treaties alone to protect our citizens from the threat of biological or chemical attack.

The United States ratified the Biological and Toxin Weapons Convention, BWC, on January 22, 1975. That Convention now counts 144 nations as parties. Twenty-two years later, on April 24, 1997, the United States Senate joined 74 other countries when it ratified the Chemical Weapons Convention, CWC. While these Conventions serve important purposes, they do not in any way guarantee our safety in a world with rogue states and terrorist organizations.

The effectiveness of both Conventions is constrained by the fact that many countries have failed to sign on to either of them. Furthermore, two signatories of the BWC, Iran and Iraq, are among the seven governments that the Secretary of State has designated as state sponsors of international terrorism, and we know for a fact that they have both pursued clandestine biological weapons programs. The BWC, unlike the CWC, has no teeth, it does not include any provisions for verification or enforcement. Since we clearly cannot assume that any country that signs on to the Convention does so in good faith, the Convention's protective value is limited.

On November 1 of this year, the President announced his intent to strengthen the BWC as part of his comprehensive strategy for combating terrorism. A BWC review conference, held every 5 years to consider ways of improving the Convention's effectiveness, will convene in Geneva beginning November 19. In anticipation of that meeting, the President has urged that all parties to the Convention enact strict national criminal legislation to crack down on prohibited biological weapons activities, and he has called for an effective United Nations procedure for investigating suspicious outbreaks of disease or allegations of biological weapons use.

These steps are welcomed, but they are small. Even sweeping reforms, like creating a more stringent verification and enforcement regime, would not guarantee our safety. The robust verification and enforcement mechanisms in the CWC, for instance, have proven to be imperfect, and scientists agree that it is much easier to conceal the production of biological agents than chemical weapons.

The inescapable fact, therefore, is that we cannot count on international regimes to prevent those who wish us ill from acquiring biological and chemical weapons. We must be prepared for the reality that these weapons could fall into the hands of terrorists, and could be used against Americans on American soil. And we must be prepared to treat the victims of such an attack if it were ever to occur.

On November 26, the Centers for Disease Control issued its interim working draft plan for responding to an outbreak of smallpox. The plan does not call for mass vaccination in advance of a smallpox outbreak because the risk of side effects from the vaccine outweighs the risks of someone actually being exposed to the smallpox virus. At the heart of the plan is a strategy sometimes called "search and containment."

This strategy involves identifying infected individual or individuals with confirmed smallpox, identifying and locating those people who come in contact with that person, and vaccinating those people in outward rings of contact. The goal is to produce a buffer of immune individuals and was shown to prevent smallpox and to ultimately eradicate the outbreak. Priorities would be set on who is vaccinated, perhaps focusing on the outward rings before those at the center of the outbreak. The plan assumes that the smallpox vaccination is effective for persons who have been exposed to the disease as long as the disease has not taken hold.

In practice it may be necessary to set a wide perimeter for these areas because smallpox is highly contagious before it might be diagnosed. There may be many areas subject to search and containment because people in our society travel frequently and widely. Terrorists might trigger attacks in a wide range of locations to multiply the confusion and panic. The most common form of smallpox has a 30-percent mortality rate, but terrorists might be able to obtain supplies of "flat-type" smallpox with a mortality rate of 96 percent and hemorrhagic-type smallpox, which is almost always fatal. For these reasons, the CDC plan accepts the possibility that whole cities or other geographic areas could be cordoned off, letting no one in or out, a quarantine enforced by police or troops.

The plan focuses on enforcement authority through police or National Guard, isolation and quarantine, mandatory medical examinations, and rationing of medicines. It includes a discussion of "population-wide quarantine measures which restrict activities or limit movement of individuals [including] suspension of large public gatherings, closing of public places, restriction on travel [air, rail, water, motor vehicle, and pedestrian], and/or 'cordon sanitaire' [literally a 'sanitary cord' or line around a quarantined area guarded to prevent spread of disease by restricting passage into or out of the area]." The CDC recommends that States update their laws to provide authority for "enforcing quarantine measures" and it recommends that States in "pre-event planning" identify "personnel who can enforce these isolation and quarantine measures, if necessary." Guide C, Isolation and Quarantine, page 17.

On October 23, 2001, the CDC published a "Model State Emergency Health Powers Act." It was prepared by the Center for Law and the Public's Health at Georgetown and Johns Hopkins Universities, in conjunction with the National Governors Association, National Conference of State Legislatures, Association of State and Territorial Health Officials, National Association of City and County Health Officers, and National Association of Attorneys General. A copy of the model law is printed at www.publichealthlaw.net. The law would provide powers to enforce the "compulsory physical separation, including the restriction of movement or confinement, of individuals and/or groups believed to have been exposed to or known to have been infected with a contagious disease from individuals who are believed not to have been exposed or infected, in order to prevent or limit the transmission of the disease to others." Federal law on this subject is very strong and the Administration can always rely on the President's Constitution authority as Commander in Chief.

Let us try to imagine, however, what it would be like if a quarantine is imposed. Let us assume that there is not enough smallpox vaccine available for use in a large outbreak, that the priority is to vaccinate those in the outward rings of the containment area first, that the available vaccines cannot be quickly deployed inside the quarantined area, that it is not possible to quickly trace and identify all of the individuals who might have been exposed, and/or that public health workers themselves might be infected. We know that there is no medicine to treat those who do become infected. We know the mortality rates. It is not hard to imagine how much force might be necessary to enforce the quarantine. It would be quite unacceptable to permit individuals to leave the quarantined area no matter how much panic had taken hold.

Think about how different this scenario would be if we had medicines that could effectively treat and cure those who become infected by smallpox. We still might implement the CDC plan but a major element of the strategy would be to persuade people to visit their local clinic or hospital to be dispensed their supply of medicine. We could trust that there would be a very high degree of voluntary compliance. This would give us more time, give us options if the containment is not successful, give us options to treat those in the containment area who are infected, and enable us to quell the public panic.

Because we have no medicine to treat those infected by smallpox, we have to be prepared to implement a plan like the one CDC has proposed. There is the only option because our options are so

limited. We need to expand our range of options.

We should not be lulled by the apparent successes with Cipro and the strains of anthrax we have seen in the recent attacks. We have not been able to prevent death in some of the patients with late-stage inhalation anthrax and Robert Stevens, Thomas Morris Jr., Joseph Curseen, Kathy Nguyen, and Otilie Lundgren have died. This legislation is named in honor of them. What we needed for them, and did not have, is a drug or vaccine that would treat late stage inhalation anthrax.

As I have said, we need an effective treatment for those who become infected with smallpox. We have a vaccine that effectively prevents smallpox infection, and administering this vaccine within four days of first exposure has been shown to offer some protections against acquiring infection and significant protection against a fatal outcome. The problem is that administering the vaccine in this time frame to all those who might have been exposed may be exceedingly difficult. And once infection has occurred, we have no effective treatment options.

In the last century 500 million people have died of smallpox, more than have from any other infectious diseases, as compared to 320 million deaths in all the wars of the twentieth century. Smallpox was one of the diseases that nearly wiped out the entire Native American population in this hemisphere. The last naturally acquired case of smallpox occurred in Somalia in 1977 and the last case from laboratory exposure was in 1978.

Smallpox is a nasty pathogen, carried in microscopic airborne droplets inhaled by its victims. The first signs are headache, fever, nausea and backache, sometimes convulsions and delirium. Soon, the skin turns scarlet. When the fever lets up, the telltale rash appears, flat red spots that turn into pimples, then big yellow pustules, then scabs. Smallpox also affects the throat and eyes, and inflames the heart, lungs, liver, intestines and other internal organs. Death often came from internal bleeding, or from the organs simply being overwhelmed by the virus. Survivors were left covered with pockmarks, if they were lucky. The unlucky ones were left blind, their eyes permanently clouded over. Nearly one in four victims died. The infection rate is estimated to be 25–40 percent for those who are unvaccinated and a single case can cause 20 or more additional infections.

During the 16th Century, 3.5 million Aztecs, more than half the population, died of smallpox during a 2-year span after the Spanish army brought the disease to Mexico. Two centuries later, the virus ravaged George Washington's troops at Valley Forge. And it cut a deadly path through the Crow, Dakota,

Sioux, Blackfoot, Apache, Comanche and other American Indian tribes, helping to clear the way for white settlers to lay claim to the western plains. The epidemics began to subside with one of medicine's most famous discoveries: the finding by British physician Edward Jenner in 1796 that English milkmaids who were exposed to cowpox, a mild second cousin to smallpox that afflicts cattle, seemed to be protected against the more deadly disease. Jenner's work led to the development of the first vaccine in Western medicine. While later vaccines used either a killed or inactivated form of the virus they were intended to combat, the smallpox vaccine worked in a different way. It relied on a separate, albeit related virus: first cowpox and the vaccinia, a virus of mysterious origins that is believed to be a cowpox derivative. The last American was vaccinated back in the 1970s and half of the U.S. population has never been vaccinated. It is not known how long these vaccines provide protection, but it is estimated that the term is 3–5 years.

In an elaborate smallpox biowarfare scenario enacted in February 1999 by the Johns Hopkins Center for Civilian Biodefense Studies, it was projected that within 2 months 15,000 people had died, epidemics were out of control in fourteen countries, all supplies of smallpox vaccine were depleted, the global economy was on the verge of collapse, and military control and quarantines were in place. Within twelve months it was projected that eighty million people worldwide had died.

A single case of smallpox today would become a global public health threat and it has been estimated that a single smallpox bioterror attack on a single American city would necessitate the vaccination of 30–40 million people.

The U.S. Government is now in the process of purchasing substantial stocks of the smallpox vaccine. We then face a very difficult decision on deploying the vaccine. We know that some individuals will have an adverse reaction to this vaccine. No one in the United States has been vaccinated against smallpox in 25 years. Those that were vaccinated back then may not be protected against the disease today. If we had an effective treatment for those who might become infected by smallpox, we would face much less pressure regarding deploying the vaccine. If we face a smallpox epidemic from a bioterrorism attack, we will have no Cipro to reassure the public and we will be facing a highly contagious disease and epidemic. To be blunt, it will make the current anthrax attack look benign by comparison.

Smallpox is not the only threat. We have seen other epidemics in this century. The 1918 influenza epidemic provides a sobering admonition about the need for research to develop medicines.

In 2 years, a fifth of the world's population was infected. In the United States the 1918 epidemic killed more than 650,000 people in a short period of time and left 20 million seriously ill, one-fourth of the entire population. The average lifespan in the U.S. was depressed by ten years. In just 1 year, the epidemic killed 21 million human beings worldwide—well over twice the number of combat deaths in the whole of World War I. The flu was exceptionally virulent to begin with and it then underwent several sudden and dramatic mutations in its structure. Such mutations can turn flu into a killer because its victims' immune systems have no antibodies to fight off the altered virus. Fatal pneumonia can rapidly develop.

Another deadly toxin, ricin toxin, was of interest to the al-Qaeda terrorist network. At an al-Qaeda safehouse in Saraq Panza, Kabul reporters found instructions for making ricin. The instructions make chilling reading. "A certain amount, equal to a strong dose, will be able to kill an adult, and a dose equal to seven seeds will kill a child," one page reads. Another page says: "Gloves and face mask are essential for the preparation of ricin. Period of death varies from 3-5 days minimum, 4-14 days maximum." The instructions listed the symptoms of ricin as vomiting, stomach cramps, extreme thirst, bloody diarrhoea, throat irritation, respiratory collapse and death.

No specific treatment or vaccine for ricin toxin exists. Ricin is produced easily and inexpensively, highly toxic, and stable in aerosolized form. A large amount of ricin is necessary to infect whole populations, the amount of ricin necessary to cover a 100-km² area and cause 50 percent lethality, assuming aerosol toxicity of 3 mcg/kg and optimum dispersal conditions, is approximately 4 metric tons, whereas only 1 kg of *Bacillus anthracis* is required. But it can be used to terrorize a large population with great effect because it is so lethal.

Use of ricin as a terror weapon is not theoretical. In 1991 in Minnesota, 4 members of the Patriots Council, an extremist group that held antigovernment and antitax ideals and advocated the overthrow of the U.S. Government, were arrested for plotting to kill a U.S. marshal with ricin. The ricin was produced in a home laboratory. They planned to mix the ricin with the solvent dimethyl sulfoxide, DMSO, and then smear it on the door handles of the marshal's vehicle. The plan was discovered, and the 4 men were convicted. In 1995, a man entered Canada from Alaska on his way to North Carolina. Canadian custom officials stopped the man and found him in possession of several guns, \$98,000, and a container of white powder, which was identified as ricin. In 1997, a man shot

his stepson in the face. Investigators discovered a makeshift laboratory in his basement and found agents such as ricin and nicotine sulfate. And, ricin was used by the Bulgarian secret police when they killed Georgi Markov by stabbing him with a poison umbrella as he crossed Waterloo Bridge in 1978.

Going beyond smallpox, influenza, and ricin, we do not have an effective vaccine or treatment for dozens of other deadly and disabling agents and toxins. Here is a partial list of some of the other biological agents and chemical toxins for which we have no effective treatments: clostridium botulinum toxin, botulism; francisella tularensis, tularemia; Ebola hemorrhagic fever, Marburg hemorrhagic fever, Lassa fever, Junin, Argentine hemorrhagic fever; Coxiella burnetii, Q fever; brucella species, brucellosis; burkholderia mallei, glanders; Venezuelan encephalomyelitis, eastern and western equine encephalomyelitis, epistaxis toxin of clostridium perfringens, staphylococcus enterotoxin B, salmonella species, shigella dysenteriae, escherichia coli O157:H7, vibrio cholerae, cryptosporidium parvum, nipah virus, hantaviruses, tickborne hemorrhagic fever viruses, tickborne encephalitis virus, yellow fever, nerve agents, tabun, sarin, soman, GF, and VX; blood agents, hydrogen cyanide and cyanogens chloride; blister agents, lewisite, nitrogen mustard, sulfur mustard, and phosgene oxime; heavy metals, arsenic, lead, and mercury; and volatile toxins, benzene, chloroform, trihalomethanes; pulmonary agents, Phosgene, chlorine, vinyl chloride; and incapacitating agents, BZ.

The naturally occurring forms of these agents and toxins are enough to cause concern, but we also know that during the 1980s and 1990s the Soviet Union conducted bioweapons research at 47 laboratories and testing sites, employed nearly 50,000 scientists in the work, and that they developed genetically modified versions of some of these agents and toxins. The goal was to develop an agent or toxin that was particularly virulent or not vulnerable to available antibiotics.

The United States has publicly stated that five countries are developing biological weapons in violation of the Biological Weapons convention, North Korea, Iraq, Iran, Syria, and Libya, and stated that additional countries not yet named, possibly including Russia, China, Israel, Sudan and Egypt, are also doing so as well.

What is so insidious about biological weapons is that in many cases the symptoms resulting from a biological weapons attack would likely take time to develop, so an act of bioterrorism may go undetected for days or weeks. Affected individuals would seek medical attention not from special emergency response teams but in a variety of civilian settings at scattered loca-

tions. This means we will need medicines that can treat a late stage of the disease, long after the infection has taken hold.

We must recognize that the distinctive characteristic of biological weapons is that they are living microorganisms and are thus the only weapons that can continue to proliferate without further assistance once released in a suitable environment.

The lethality of these agents and toxins, and the panic they can cause, is quite frightening. The capacity for terror is nearly beyond comprehension. I do not believe it is necessary to describe the facts here. My point is simple: we need more than military intelligence, surveillance, and public health capacity. We also need effective medicines. We also need more powerful research tools that will enable us to quickly develop treatments for agents and toxins not on this or any other list.

We need to do whatever it takes to be able to reassure the American people that hospitals and doctors have powerful medicines to treat them if they are exposed to biological agents or toxins, that we can contain an outbreak of an infectious agent, and that there is little to fear. To achieve this objective, we need to rely on the entrepreneurship of the biotechnology industry.

There is already some direct funding of research by the Defense Advanced Research Projects Agency, DARPA, the National Institutes of Health, NIH, and the Centers for Disease Control, CDC. This research should go forward.

DARPA, for instance, has been described as the Pentagon's "venture capital fund," its mission to provide seed money for novel research projects that offer the potential for revolutionary findings. Last year, DARPA's Unconventional Pathogen Countermeasures program awarded contracts totalling \$50 million to universities, foundations, pharmaceutical and biotechnology companies seeking new ways to fight biological agents and toxins.

The Unconventional Pathogen Countermeasures program now funds 43 separate research efforts on antibacterials, anti-toxins, anti-virals, decontamination, external protection from pathogens, immunization and multi-purpose vaccines and treatments. A common thread among many of these undertakings is the goal of developing drugs that provide broad-spectrum protection against several different pathogens. This year, with a budget of \$63 million, the program has received over 100 research proposals in the last two months alone.

Some of this DARPA research is directed at developing revolutionary, broad-spectrum, medical countermeasures against significantly pathogenic microorganisms and/or their pathogenic products. The goal is to develop countermeasures that are

versatile enough to eliminate biological threats, whether from natural sources or modified through bioengineering or other manipulation. The countermeasures would need the potential to provide protection both within the body and at the most common portals of entry, e.g., inhalation, ingestion, transcutaneous. The strategies might include defeating the pathogen's ability to enter the body, traverse the bloodstream or lymphatics, and enter target tissues; identifying novel pathogen vulnerabilities based on fundamental, critical molecular mechanisms of survival or pathogenesis, e.g., Type III secretion, cellular energetics, virulence modulation; constructing unique, robust vehicles for the delivery of countermeasures into or within the body; and modulating the advantageous and/or deleterious aspects of the immune response to significantly pathogenic microorganisms and/or the pathogenic products in the body.

While DAPRA's work is specifically aimed at protecting our military personnel, the National Institutes of Health also spent \$49.7 million in the last fiscal year to find new therapies for those who contract smallpox and on systems for detecting the disease. In recent years, NIH's research programs have sought to create more rapid and accurate diagnostics, develop vaccines for those at risk of exposure to biological agents, and improve treatment for those infected. Moreover, in the last fiscal year, the Centers for Disease Control has allocated \$18 million to continue research on an anthrax vaccine and \$22.4 million on smallpox research.

Some companies are willing to enter into a research relationships funded by DARPA and other agencies to develop countermeasures. Relationships between the Government and private industry can be very productive, but they can also involve complex issues reflecting the different cultures of government and industry. Some companies, including some of the most entrepreneurial, might prefer to take their own initiative to conduct this research. Relationships with government entities involve risks, issues, and bureaucracy that are not present in relationships among biotechnology companies and between them and non-governmental partners.

The Defense Departments Joint Vaccine Acquisition Program, JVAP, illustrates the problems with a government led and managed program. A report in December 2000 by a panel of independent experts found that the current program "is insufficient and will fail" and recommended it adopt an approach more on the model of a private sector effort. It needs to adopt "industry practices," "capture industry interest," "implement an organizational alignment that mirrors the vaccine industry's short chain of command and

decision making," "adopt an industry-based management philosophy," and "develop a sound investment strategy." It bemoaned the "extremely limited" input from industry in the JVAP program.

It is clear from this experience that we should not rely exclusively on government funding of countermeasures research. We should take advantage of the entrepreneurial fervor, and the independence, of our biotechnology industry entrepreneurs. It is not likely that the Government will be willing or able to provide sufficient funding for the development of the countermeasures we need. Some of the most innovative approaches to vaccines and medicines might not be funded with the limited funds available to the Government. We need to provide incentives that will encourage every biotech company to review its research priorities and technology portfolio for its relevance and potential for countermeasure research. Some of this research is early stage, basic research that is being developed and considered only for its value in treating an entirely different disease. We need to kindle the imagination of biotechnology companies and their tens of thousands of scientists regarding countermeasures research.

My proposal would supplement direct Federal government funding of research with incentives that make it possible for private companies to form the capital to conduct this research on their own initiative, utilizing their own capital, and at their own risk, all for good business reasons going to their bottom line.

The U.S. biotechnology industry, approximately 1,300 companies, spent \$13.8 billion on research last year. Only 350 of these companies have managed to go public. The industry employs 124,000, Ernest & Young data, people. The top five companies spent an average of \$89,000 per employee on research, making it the most research-intensive industry in the world. The industry has 350 products in human clinical trials targeting more than 200 diseases. Losses for the industry were \$5.8 billion in 2001, \$5.6 billion in 2000, \$4.4 billion in 1999, \$4.1 billion in 1998, \$4.5 billion in 1997, \$4.6 billion in 1996, and similar amounts before that. In 2000 fully 38 percent of the public biotech companies had less than 2 years of funding for their research. Only one-quarter of the biotech companies in the United States are publicly traded and they tend to be the best funded.

There is a broad range of research that could be undertaken under this legislation. Vaccines could be developed to prevent infection or treat an infection from a bioterror attack. Broad-spectrum antibiotics are needed. Also, promising research has been undertaken on antitoxins that could neutralize the toxins that are released, for

example, by anthrax. With anthrax it is the toxins, not the bacteria itself, that cause death. An antitoxin could act like a decoy, attaching itself to sites on cells where active anthrax toxin binds and then combining with normal active forms of the toxin and inactivating them. An antitoxin could block the production of the toxin.

We can rely on the innovativeness of the biotech industry, working in collaboration with academic medical centers, to explore a broad range of innovative approaches. This mobilizes the entire biotechnology industry as a vital component of our national defense against bioterror weapons.

The legislation takes a comprehensive approach to the challenges the biotechnology industry faces in forming capital to conduct research on countermeasures. It includes capital formation tax incentives, guaranteed purchase funds, patent protections, and liability protections. I believe we will have to include each of these types of incentives to ensure that we mobilize the biotechnology industry for this urgent national defense research.

I am aware that all three of the tax incentives I have proposed, and both of the two patent incentives I have proposed, may be controversial. In my view, we can debate tax or patent policy as long as you want, but let's not lose track of the issue here, development of countermeasures to treat people infected or exposed to lethal and disabling bioterror weapons.

We know that incentives can spur research. In 1983 we enacted the Orphan Drug Act to provide incentives for companies to develop treatments for rare diseases with small potential markets deemed to be unprofitable by the industry. In the decade before this legislation was enacted, fewer than 10 drugs for orphan diseases were developed and these were mostly chance discoveries. Since the Act became law, 218 orphan drugs have been approved and 800 more are in the pipeline. The Act provides 7 years of market exclusivity and a tax credit covering some research costs. The effectiveness of the incentives we have enacted for orphan disease research show us how much we can accomplish when we set a national priority for certain types of research.

The incentives I have proposed differ from those set by the Orphan Drug Act. We need to maintain the effectiveness of the Orphan Drug Act and not undermine it by adding many other disease research targets. In addition, the tax credits for research for orphan drug research have no value for most biotechnology companies because few of them have tax liability with respect to which to claim the credit. This explains why I have not proposed to utilize tax credits to spur countermeasures research. It is also clear that the market for countermeasures is even more speculative than the market

for orphan drugs and we need to enact a broader and deeper package of incentives.

The Government determines which research is covered by the legislation. The legislation confers on the Director of the Office of Homeland Security, in consultation with the Secretary of Defense and Secretary of Health and Human Services, authority to set the list of agents and toxins with respect to which the legislation applies. The Director determines which agents and toxins present a threat and on whether the countermeasures are more likely to be developed with the application of the incentives of the legislation. The Director may determine that an agent or toxin does not present a threat or that countermeasures are not more likely to be developed with the incentives. The legislation includes an illustrative list of agents and toxins that might be selected by the Director. The decisions of the Director are final and cannot be subject to judicial review.

Once the list of agents and toxins is set, companies may register with the Food and Drug Administration their intent to undertake research and development of a countermeasure to prevent or treat the agent or toxin. This registration is required only for companies that seek to be eligible for the tax, purchase, patent, and liability provisions of the legislation. The registration does not apply to non-profit entities or to companies that do not seek such eligibility. The registration requirement gives the FDA vital information about the research effort and the personnel involved with the research.

The Director of the Office of Homeland Security then may certify that the company is eligible for the tax, purchase, patent, and liability incentives in the legislation. Eligibility for the purchase fund, patent and liability incentives is contingent on successful development of a countermeasure according to the standards set in the legislation.

The legislation contemplates that a company might well register and seek certification with respect to more than one research project and become eligible for the tax, purchase, patent, and liability incentives for each. There is no policy rationale for limiting a company to one registration and one certification.

This process is similar to the current registration process for research on orphan, rare, diseases. In that case, companies that are certified by the FDA become eligible for both tax and market exclusivity incentives. This process gives the Government complete control on the number of registrations and certifications. This gives the Government control over the cost and impact of the legislation on private sector research.

The legislation includes three tax incentives to enable biotechnology com-

panies to form capital to fund research and development of countermeasures. Companies must irrevocably elect only one of the incentives with regard to the research. These tax incentives are available only to biotechnology companies with less than \$750,000,000 in paid-in capital.

The paid-in capital of a corporation is quite distinct from the market capitalization of the firm. The paid-in capital is the aggregate amount paid by investors into the corporation when this stock was issued, the price at issue multiplied by the number of shares sold. The market capitalization is the value of this stock in the stock market as it is traded among investors. I have focused on the paid-in capital as this is the amount of capital actually available to the corporation to fund its research.

The legislation includes three different tax incentives to give companies flexibility in forming capital to fund the research. Each of the options comes with advantages and limitations that may make it appropriate or inappropriate for a given company or research project. We do not now know fully how investors and capital markets will respond to the different options, but we assume that companies will consult with the investor community about which option will work best for a given research project. Capital markets are diverse and investors have different needs and expectations. Over time these markets and investor expectations evolve. If companies register for more than one research project, they may well utilize different tax incentives for the different projects.

Companies are permitted to undertake a series of discrete and separate research projects and make this election with respect to each project. They may only utilize one of the options with respect to each of these research projects.

The company is eligible to establish an R&D Limited Partnership to conduct the research. The partnership passes through all business deductions and credits to the partners. For example, under this arrangement, the research and development tax credits and depreciation deductions for the company may be passed by the corporation through to its partners to be used to offset their individual tax liability. These deductions and credits are then lost to the corporation.

The company is eligible to issue a special class of stock for the entity to conduct the research. The investors would be entitled to a zero capital gains tax rate on any gains realized on the stock held for at least 3 years. This is a modification of the current Section 1202 where only 50 percent of the gains are not taxed. This provision is adapted from legislation I have introduced, S. 1134, and introduced in the House by Representatives DUNN and

MATSUI, H.R. 2383. A similar bill has been introduced by Senator COLLINS, S. 455.

The company is eligible to receive refunds for Net Operating Losses, NOLs, to fund the research. Under current law, net operating losses can only be used to offset a company's tax liability. If a company has no profits and therefore no tax liability, it cannot use its net operating losses. It can carry them forward, but the losses have no current value. This option would allow the company to receive a refund of its NOLs at a rate of 75 percent of their value. Once the company becomes profitable, and incurs tax liability, it must repay all of the refunds it has received. The provision in my legislation is adapted from bills introduced by Senator TORRICELLI, S. 1049, and Congressman ROBERT MATSUI, H.R. 2153.

A company that elects to utilize one of these incentives is not eligible to receive benefits of the Orphan Drug Tax Credit. Companies that can utilize tax credits, companies with taxable income and tax liability, might find the Orphan Credit more valuable. The legislation includes an amendment to the Orphan Credit to correct a defect in the current credit. The amendment has been introduced in the Senate as S. 1341 by Senators HATCH, KENNEDY and JEFFORDS. The amendment simply states that the Credit is available starting the day an application for orphan drug status is filed, not the date the FDA finally acts on it. The amendment was one of many initiatives championed by Lisa J. Raines, who died on September 11 in the plane that hit the Pentagon, and the amendment is named in her honor. As we go forward in the legislative process, I hope we will have an opportunity to speak in more detail about the service of Ms. Raines on behalf of medical research, particularly on rare diseases.

My legislation does not include an enhanced tax credit for this research. Very few biotechnology companies can utilize a tax credit as they have no taxable revenue and tax liability with respect to which to claim a credit. Instead, they can carry the credit forward and utilize it when they do have tax liability. But that may be many years from now. That is why I have focused on other incentives to assist the biotechnology industry to form capital to fund this countermeasures research.

The guaranteed purchase fund, and the patent bonus and liability provisions described below provide an additional incentive for investors to fund the research. Without capital from investors these biotechnology companies do not have the capacity, irrespective of their interest, to conduct the research.

The market for countermeasures is speculative and small. This means that if a company successfully develops a countermeasure, it may not receive

sufficient revenue on sales to justify the risk and expense of the research. This is why the legislation establishes a countermeasures purchase fund that will define the market for the products with some specificity before the research begins.

The fund managers will set standards for which countermeasures it will purchase and define the financial terms of the purchase commitment. This will enable companies to evaluate the market potential of its research before it launches into the project. The specifications will need to be set with sufficient specificity so that the company, and its investors, can evaluate the market and with enough flexibility so that it does not inhibit the innovativeness of the researchers. This approach is akin to setting a performance standard for a new military aircraft.

The legislation provides that the purchase fund is not obligated to purchase more than one product per class. This seeks to avoid a situation where the Government must purchase more than one product when it only intends to use one. But it might make more sense, as an incentive, for the Government to commit to purchasing more than one product so that many more than one company conducts the research. A winner-take-all system may well intimidate some companies and we may end up without a countermeasure to be purchased. It is also possible that we will find that we need more than one countermeasure because different products are useful for different patients. We may also find that the first product developed is not the most effective. Given the urgency of the research, we would like to have the problem of seeing more than one effective countermeasure developed. How we reconcile these competing considerations is a key issue we need to resolve.

My legislation provides that the countermeasure must be approved by the FDA. The standards that the FDA should apply in reviewing these types of products is an issue have been discussed in some detail and we need to fashion the most effective provision on this subject. We need to recognize that the requirement for FDA approval might, in some cases, not be needed, appropriate or possible.

The purchase commitment for countermeasures is available to any company irrespective of its paid-in capital.

Intellectual property protection of research is essential to biotechnology companies for one simple reason: they need to know that if they successfully develop a medical product another company cannot expropriate it. It's a simple matter of incentives.

The patent system has its basis in the U.S. Constitution where the Federal Government is given the mandate to "promote the Progress of Science and the Useful Arts by securing for a limited time to Authors and Inventors

the exclusive right to their respective Writings and Discoveries." In exchange for full disclosure of the terms of their inventions, inventors are granted the right to exclude others from making, using, or selling their inventions for a limited period of time. This quid pro quo provides investors with the incentive to invent. In the absence of the patent law, discoverable inventions would be freely available to anyone who wanted to use them and inventors would not be able to capture the value of their inventions or secure a return on their investments.

The patent system strikes a balance. Companies receive limited protection of their inventions if they are willing to publish the terms of their invention for all to see. At the end of the term of the patent, anyone can practice the invention without any threat of an infringement action. During the term of the patent, competitors can learn from the published description of the invention and may well find a new and distinct patentable invention.

The legislation provides two types of intellectual property protection. One simply provides that the term of the patent on the countermeasure will be the term of the patent granted by the Patent and Trademark Office without any erosion due to delays in approval of the product by the Food and Drug Administration. The second provides that a company that successfully develops a countermeasure will receive a bonus of 2 years on the term of any patent held by that company. Companies must elect one of these two protections and only small biotechnology companies may elect the second protection. Large, profitable pharmaceutical companies may elect only the first of the two options.

The first protection against erosion of the term of the patent is an issue that is partially addressed in current law, the Hatch-Waxman Patent Term Restoration Act. That act provides partial protection against erosion of the term, length of a patent when there are delays at the FDA in approving a product. The erosion occurs when the PTO issues a patent before the product is approved by the FDA. In these cases, the term of the patent is running but the company cannot market the product. The Hatch-Waxman Act provides some protections against erosion of the term of the patent, but the protections are incomplete. As a result, many companies end up with a patent with a reduced term, sometimes substantially reduced.

The issue of patent term erosion has become more serious due to changes at the PTO in the patent system. The term of a patent used to be fixed at 17 years from the date the patent was granted by the PTO. It made no difference how long it took for the PTO to process the patent application and sometimes the processing took years,

even decades. Under this system, there were cases where the patent would issue before final action at the FDA, but there were other cases where the FDA acted to approve a product before the patent was issued. Erosion was an issue, but it did not occur in many cases.

Since 1995 the term of a patent has been set at 20 years from the date of application for the patent. This means that the processing time by the PTO of the application all came while the term of the patent is running. This gives companies a profound incentive to rush the patent through the PTO. Under the old system, companies had the opposite incentive. With patents being issued earlier by the PTO, the issue of erosion of patent term due to delays at the FDA is becoming more serious and more common.

The provision in my legislation simply states that in the case of bioterrorism countermeasures, no erosion in the term of the patent will occur. The term of the patent at the date of FDA approval will be the same as the term of the patent when it was issued by the PTO. There is no extension of the patent, simply protections against erosion. Under the new 20-year term, patents might be more or less than 17 years depending on the processing time at the PTO, and all this legislation says is that whatever term is set by the PTO will govern irrespective of the delays at the FDA. This option is available to any company that successfully develops a countermeasure eligible to be purchased by the fund.

The second option, the bonus patent term, is only available to small biotechnology companies. It provides that a company that successfully develops a countermeasure is entitled to a 2-year extension of any patent in its portfolio. This does not apply to any patent of another company bought or transferred in to the countermeasure research company.

I am well aware that this bonus patent term provision will be controversial with some. A company would tend to utilize this option if it owned the patent on a product that still had, or might have, market value at the end of the term of the patent. Because this option is only available to small biotechnology companies, most of whom have no product on the market, in most cases they would be speculating about the value of a product at the end of its patent. The company might apply this provision to a patent that otherwise would be eroded due to FDA delays or it might apply it to a patent that was not eroded. The result might be a patent term that is no longer than the patent term issued by the PTO. It all depends on which companies elect this option and which patent they select. In some cases, the effect of this provision might be to delay the entry onto the market of lower priced

generics. This would tend to shift some of the cost of the incentive to develop a countermeasure to insurance companies and patients with an unrelated disease.

My rationale for including the patent bonus in the legislation is simple: I want this legislation to say emphatically that we mean business, we are serious, and we want biotechnology companies to reconfigure their research portfolios to focus in part on development of countermeasures. The other provisions in the legislation are powerful, but they may not be sufficient.

This proposal protects companies willing to take the risks of producing anti-terrorism products for the American public from potential losses incurred from lawsuits alleging adverse reactions to these products. It also preserves the right for plaintiffs to seek recourse for alleged adverse reactions in Federal District Court, with procedural and monetary limitations.

Under the plan, the Secretary of HHS is authorized, and in the case of contractors with HHS, is required, to indemnify and defend persons engaged in research, development and other activities related to biological defense products through execution of "indemnification and defense agreements." An exclusive means of resolving civil cases that fall within the scope of the indemnification and defense agreements is provided with litigation rights for injured parties. Non-economic damages are limited to \$250,000 per plaintiff and no punitive or exemplary damages may be awarded.

Some have tried to apply the existing Vaccine Injury Compensation Program, VICP, to this national effort. That is inappropriate because that program will be extremely difficult to use, both administratively and scientifically. For example, it would take several years to develop the appropriate "table" that identifies a compensable injury. Companies will be liable during this process. Note that when VICP was created, there had been studies of what adverse reactions to mandated childhood vaccines had occurred and the table was based largely on this experience. Even so, it has taken years of effort, ultimately resulting in wholesale revisions to the table by regulation, to get the current table in place. For anti-bioterrorism products currently being developed, it will simply be impossible to construct a meaningful Vaccine Injury Table, there will be no experience with the product.

The Frist-Kennedy bill relies on the President's Executive Order regarding liability protections, so there is a basis for an agreement regarding this issue as applied to bioterrorism countermeasures. The provisions that I have proposed are superior to those in the Executive Order because the order provides protection only on a contract basis. So, it doesn't provide protection

based on the product being developed, only if that product is being developed under a specific government contract. Therefore, it's negotiated case by case by HHS and a company. Your proposal provides assurance to companies, especially small and medium sized companies, that they will be protected. This will allow them to go forward with their development plans. Their lawyers may be leery of trying to negotiate their own deal with HHS. So, the EO may be effective for a large company when it negotiates making additional smallpox vaccine, but it provides little assurance to a small company that wants to start development. Also, the administration says the EO will be used to protect companies, however, the next administration could interpret it differently. That's why a statutory provision will provide greater assurance to companies.

The legislation focuses intently on development of vaccines and medicines, but it is possible that we will face biological agents and chemical agents we've never seen before. As I've mentioned, the Soviet Union bioterror research focused in part on use of genetic modification technology to develop agents and toxins that currently-available antibiotics can not treat. Australian researchers accidentally created a modified mousepox virus, which does not affect humans, but it was 100 percent lethal to the mice. Their research focused on trying to make a mouse contraceptive vaccine for pest control. The surprise was that it totally suppressed the "cell-mediated response," the arm of the immune system that combats viral infection. To make matters worse, the engineered virus also appears unnaturally resistant to attempts to vaccinate the mice. A vaccine that would normally protect mouse strains that are susceptible to the virus only worked in half the mice exposed to the killer version. If bioterrorists created a human version of the virus, vaccination programs would be of limited use. This highlights the drawback of working on vaccines against bioweapons rather than treatments.

With the advances in gene sequencing, genomics, we will know the exact genetic structure of a biological agent. This information in the wrong hands could easily be manipulated to design and possibly grow a lethal new bacterial and viral strains not found in nature. A scientist might be able to mix and match traits from different microorganisms, called recombinant technology, to take a gene that makes a deadly toxin from one strain of bacteria and introduce it into other bacterial strains. Dangerous pathogens or infectious agents could be made more deadly, and relatively benign agents could be designed as major public health problems. Bacteria that cause diseases such as anthrax could be al-

tered in such a way that would make current vaccines or antibiotics against them ineffective. It is even possible that a scientist could develop an organism that develops resistance to antibiotics at an accelerated rate.

This means we need to develop technology, research tools, that will enable us to quickly develop a tailor-made, specific countermeasure to a previously unknown organism or agent. These research tools will enable us to develop a tailor-made vaccine or drug to deploy as a countermeasure against a new threat. The legislation authorizes companies to register and receive a certification making them eligible for the tax incentives in the bill for this research.

Perhaps the greatest strength of our biomedical research establishment in the United States is the synergy between our superb basic research institutions and private companies. The Bayh-Dole Act and Stevenson-Wydler Act form the legal framework for mutually beneficially partnerships between academia and industry. My legislation strengthens this synergy and these relationships with two provisions, one to upgrades in the basic research infrastructure available to conduct research on countermeasures and the other to increase cooperation between the National Institutes of Health and private companies.

Research on countermeasures necessitates the use of special facilities where biological agents can be handled safely without exposing researchers and the public to danger. Very few academic institutions or private companies can justify or capitalize the construction of these special facilities. The Federal Government can facilitate research and development of countermeasures by financing the construction of these facilities for use on a fee-for-service basis. The legislation authorizes appropriations for grants to non-profit and for-profit institutions to construct, maintain, and manage up to ten Biosafety Level 3-4 facilities, or their equivalent, in different regions of the country for use in research to develop countermeasures. BSL 3-4 facilities are ones used for research on indigenous, exotic or dangerous agents with potential for aerosol transmission of disease that may have serious or lethal consequences or where the agents pose high risk of life-threatening disease, aerosol-transmitted lab infections, or related agents with unknown risk of transmission. The Director of the Office and NIH shall issue regulations regarding the qualifications of the researchers who may utilize the facilities. Companies that have registered with and been certified by the Director, to develop countermeasures under Section 5(d) of the legislation, shall be given priority in the use of the facilities.

The legislation also reauthorizes a very successful NIH-industry partnership program launched in FY 2000 in Public Law 106-113. The funding is for partnership challenge grants to promote joint ventures between NIH and its grantees and for-profit biotechnology, pharmaceutical and medical device industries with regard to the development of countermeasures, as defined in Section 3 of the bill, and research tools, as defined in Section 4(d)(3) of the bill. Such grants shall be awarded on a one-for-one matching basis. So far the matching grants have focused on development of medicines to treat malaria, tuberculosis, emerging and resistant infections, and therapeutics for emerging threats. My proposal should be matched by reauthorization of the challenge grant program for these deadly diseases.

My legislation is carefully calibrated to provide incentives only where they are needed. This accounts for the choices in the legislation about which provisions are available to small biotechnology companies and large pharmaceutical companies.

Most biotechnology companies rely on infusions of investor capital to fund research, so the capital formation tax incentives only apply to them. Large pharmaceutical companies have ample revenues from product sales, and access to debt capital, so they do not need these incentives for capital formation.

The guaranteed purchase fund applies to any company that successfully develops a countermeasure. There is no reason to make any distinction between small and large companies. They all need to know the terms and dimensions of the potential market for the products they seek to develop. With countermeasures the market may well be uncertain or small, necessitating the creation of the purchase fund.

The patent protection provisions are also well calibrated. Both small and large companies face the patent term erosion problem due to delays at the FDA. There is no reason why companies that successfully develop a countermeasure should end up with a patent with an eroded term.

With regard to the patent bonus provision, this is included to supplement the capital formation tax incentives for small biotechnology companies. It provides a dramatic statement to investors that this research makes good business sense. As capital formation is not a challenge for a large pharmaceutical company, this patent bonus provision is not available to them.

Finally, with regard to the liability provisions, there is no reason to make any distinction between small and large companies.

The legislation makes choices. It sets the priorities. It provides a dose of incentives and seeks a response in the private sector. We are attempting here to do something that has not been done

before. This is uncharted territory. And it's also an urgent mission.

There may be cases where a countermeasure developed to treat a biological toxin or chemical agent will have applications beyond this use. A broad-spectrum antibiotic capable of treating many different biological agents may well have the capacity to treat naturally occurring diseases.

This same issue arises with the Orphan Drug Act, which provides both tax and FDA approval incentives for companies that develop medicines to treat rare diseases. In some cases these treatments can also be used for larger disease populations. There are few who object to this situation. We have come to the judgment that the urgency of this research is worth the possible additional benefits that might accrue to a company.

In the context of research to develop countermeasures, I do not consider it a problem that a company might find a broader commercial market for a countermeasure. Indeed, it may well be the combination of the incentives in this legislation and these broader markets that drives the successful development of a countermeasure. If our intense focus on developing countermeasures, and research tools, provides benefits for mankind going well beyond terror weapons, we should rejoice. If this research helps us to develop an effective vaccine or treatment for AIDS, we should give the company the Nobel Prize for Medicine. If we do not develop a vaccine or treatment for AIDS, we may see 100 million people die of AIDS. We also have 400 million people infected with malaria and more than a million annual deaths. Millions of children die of diarrhea, cholera and other deadly and disabling diseases. Countermeasures research may deepen our understanding of the immune system and speed development of treatments for cancer and autoimmune diseases. That is not the central purpose of this legislation, but it is an additional rationale for it.

The issue raised by my legislation is very simple: do we want the Federal Government to fund and supervise much of the research to develop countermeasures or should we also provide incentives that make it possible for the private sector, at its own expense, and at its own risk, to undertake this research for good business reasons. The Frist-Kennedy legislation focuses effectively on direct Federal funding and coordination issues, but it does not include sufficient incentives for the private sector to undertake this research on its own initiative. Their proposal and mine are perfectly complimentary. We need to enact both to ensure that we are prepared for bioterror attacks.

I ask unanimous consent that an outline of my legislation appear at this point in the RECORD.

There being no objection, the outline was ordered to be printed in the RECORD, as follows

BIOLOGICAL AND CHEMICAL WEAPONS COUNTERMEASURES RESEARCH ACT OF 2001

The premise of the legislation is that there will be limits on direct Federal funding of research and development of countermeasures, vaccines, drugs, and other medicines, to prevent or treat infections from biological and chemical agents and toxins. The legislation proposes incentives that will enable biotechnology companies to take the initiative, for good business reasons, to conduct research to develop these countermeasures.

The incentives are needed because most biotech companies have no approved products or revenue from product sales to fund research. They rely on investors and equity capital markets to fund the research. These companies must focus on research that will lead to product sales and revenue and end their dependence on investor capital. When they are able to form the capital to fund research, biotech companies tend to be innovative and nimble and focused on the intractable diseases for which no effective medical treatments are available.

There is no established or predictable market for countermeasures. Investors are justifiably reluctant to fund this research, which will present technical challenges similar in complexity to development of effective treatments for AIDS. Investors need assurances that research on countermeasures has the potential to provide a rate of return commensurate with the risk, complexity and cost of the research, a rate of return comparable to that which may arise from a treatment for cancer, MS, Cystic Fibrosis and other major diseases or from other investments.

The legislation provides tax incentives to enable biotech companies to form capital to conduct the research. It then provides a guaranteed and pre-determined market for the countermeasures and special intellectual property protections to serve as a substitute for a market. Finally, it establishes liability protections for the countermeasures that are developed.

Specifics of the legislation are as follows: one, Office of Homeland Security sets research priorities in advance. Biotech companies that seek to be eligible for the incentives in the legislation must register with the Food and Drug Administration and be certified as eligible for the incentives; two, once a company is certified as eligible for the incentives, it becomes eligible for the tax, purchasing, patent, and liability provisions. A company is eligible for certification for the tax and patent provisions if it seeks to develop a research tool that will make it possible to quickly develop a countermeasure to a previously unknown agent or toxin, or an agent or toxin not targeted for research; three, Capital Formation for Countermeasures Research: The legislation provides that a company seeking to fund research is eligible to elect from among three tax incentives. The three alternatives are as follows: a. The company is eligible to establish an R&D Limited Partnership to conduct the research. The partnership passes through all business deductions and credits to the partners; b. The company is eligible to issue a special class of stock for the entity to conduct the research. The investors would be entitled to a zero capital gains tax rate on any gains realized on the stock; and, c. The company is eligible to receive refunds for Net Operating Losses, NOLs, to fund the research.

These tax incentives are available only to biotechnology companies with less than \$750,000 in paid-in capital.

A company must elect only one of these incentives and, if it elects one of these incentives, it is then not eligible to receive benefits under the Orphan Drug Act. The legislation includes amendments to the Orphan Drug Act championed by Senators HATCH, KENNEDY and JEFFORDS, S. 1341. The amendments make the Credit available from the date of the application for Orphan Drug status, not the date the application is approved as provided under current law; four, Countermeasure Purchase Fund: The legislation provides that a company that successfully develops a countermeasure, through FDA approval, is eligible to sell the product to the Federal Government at a pre-established price and in a pre-determined amount. The company is given notice of the terms of the sale before it commences the research. Sales to this fund may be made by any company irrespective of its paid-in capital; five, Intellectual Property Incentives: The legislation provides that a company that successfully develops a countermeasure is eligible to elect one of two patent incentives. The two alternatives are as follows: a. The company is eligible to receive a patent for its invention with a term as long as the term of the patent when it was issued by the Patent and Trademark Office, without any erosion due to delays in the FDA approval process. This alternative is available to any company that successfully develops a countermeasure irrespective of its paid-in capital; b. The company is eligible to extend the term of any patent owned by the company for two years. The patent may not be one that is acquired by the company from a third party. This is included as a capital formation incentive for small biotechnology companies with less than \$750,000 in paid-in capital.

Six, Liability Protections: The legislation provides for protections against liability for the company that successfully develops a countermeasure. This option is available to any company that successfully develops a countermeasure irrespective of its paid-in capital; and seven, Strengthening of Biomedical Research Infrastructure: Authorizes appropriations for grants to construct specialized biosafety containment facilities where biological agents can be handled safely without exposing researchers and the public to danger. Also reauthorizes a successful NIH-industry partnership challenge grants to promote joint ventures between NIH and its grantees and for-profit biotechnology, pharmaceutical and medical device industries with regard to the development of countermeasures and research tools.

SUBMITTED RESOLUTIONS

SENATE RESOLUTION 186—TO AUTHORIZE REPRESENTATION OF SENATOR LOTT IN THE CASE OF LEE V. LOTT

Mr. DASCHLE submitted the following resolution; which was considered and agreed to:

S. RES. 186

Whereas, in the case of Lee v. Lott, Case No. 01-CV-792, pending in the United States District Court for the Southern District of Mississippi, the plaintiff has named Senator Trent Lott as the sole defendant; and

Whereas, pursuant to sections 703(a) and 704(a)(1) of the Ethics in Government Act of

1978, 2 U.S.C. §§ 288b(a) and 288c(a)(1), the Senate may direct its counsel to defend Members of the Senate in civil actions relating to their official responsibilities: Now, therefore, be it

Resolved, That the Senate Legal Counsel is authorized to represent Senator Lott in the case of Lee v. Lott.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ARMED SERVICES

Ms. STABENOW. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the Senate on Tuesday, December 4, 2001, at 9:30 a.m., in open session to consider the nomination of Claude M. Bolton, Jr. to be Assistant Secretary of the Army for Acquisition, Logistics, and Technology and, following the open session, to meet in executive session to consider certain pending nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS

Ms. STABENOW. Mr. President, I ask unanimous consent that the Committee on Environment and Public Works be authorized to meet on Tuesday, December 4, 2001, at 9:30 a.m. to conduct a hearing on the remediation process of biologically contaminated buildings. Specifically, the Committee is interested in the challenges of, and technologies available for, remediating buildings contaminated by biological contaminants. The hearing will be held in the Rm. SD-406.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Ms. STABENOW. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Tuesday, December 4, 2001, at 2:15 p.m. to hold a nomination hearing.

Agenda

Nominees: Adolfo Franco, of Virginia, to be an Assistant Administrator (Latin America and the Caribbean) of the United States Agency for International Development; Frederick Schieck, of Virginia, to be Deputy Administrator of the United States Agency for International Development; and Roger Winter, of Maryland, to be an Assistant Administrator (Democracy, Conflict, and Humanitarian Assistance) of the United States Agency for International Development.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Ms. STABENOW. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Tuesday, December 4, 2001,

at 4:30 p.m. to hold a nomination hearing.

Agenda

Nominees: William R. Brownfield, of Texas, to be Ambassador to the Republic of Chile; and Charles S. Shapiro, of Georgia, to be Ambassador to the Bolivarian Republic of Venezuela.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Ms. STABENOW. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet to conduct a hearing on "Department of Justice Oversight: Preserving Our Freedoms While Defending Against Terrorism," Tuesday, December 4, 2001, at 10 a.m. in Dirksen Room 226.

Tentative Witness List

Panel I: The Honorable Pierre-Richard Prosper, Ambassador-at-Large for War Crimes Issues, Department of State, Washington, DC.

Panel II: George J. Terwilliger III, Partner, White and Case, former Deputy Attorney General, Washington, DC; Professor Laurence H. Tribe, Harvard Law School, Cambridge, MA; Major General Michael J. Nardotti, Jr., Partner, Patton Boggs LLP, former Army Judge Advocate General, Washington, DC; Professor Cass R. Sunstein, University of Chicago Law School, Chicago, IL; and Timothy Lynch, Esq., Director, Project on Criminal Justice, Cato Institute, Washington, DC.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Ms. STABENOW. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet to conduct a hearing on "Department of Justice Oversight: Preserving Our Freedoms While Defending Against Terrorism," Tuesday, December 4, 2001, at 2 p.m. in Dirksen Room 226.

Witness List

Panel I: Viet D. Dinh, Assistant Attorney General, Office of Legal Policy, U.S. Department of Justice.

Panel II: Ali Al-Maqtari, New Haven, CT; Michael J. Boyle, Esq., Law Offices of Michael J. Boyle, North Haven CT; Steven Emerson, The Investigative Project, Washington, DC; Gerald H. Goldstein, Esq., Goldstein, Goldstein & Hilley, San Antonio, TX; Nadine Strossen, President, American Civil Liberties Union, Professor, New York Law School, New York, NY; and Victoria Toensing, Esq., DiGenova & Toensing, Washington, DC.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRIVILEGE OF THE FLOOR

Mr. REID. Mr. President, John Stewart and Scott Donnelly are interns in

the office of the Finance Committee chairman, Senator BAUCUS. I ask unanimous consent that the privilege of the floor be granted to them today during the pendency of the Railroad Retirement Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS CONSENT AGREEMENT—H.R. 10

Mr. REID. Mr. President, I ask unanimous consent that at 9:30 a.m. tomorrow Senator NICKLES be recognized to raise a point of order against the pending substitute with Senator BAUCUS then immediately to be recognized to make a motion to waive. Further, I ask unanimous consent that there then be 30 minutes equally divided between Senators BAUCUS and NICKLES or their designees. I also ask unanimous consent that following the debate time the Senate proceed to a vote on the motion to waive, and if the motion to waive is agreed to then the substitute amendment be agreed to, the bill be read the third time, and the Senate then proceed to a vote on passage of H.R. 10, with the cloture vote having been vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZING LEGAL REPRESENTATION

Mr. REID. Mr. President, I ask unanimous consent the Senate proceed to the immediate consideration of S. Res. 186, submitted earlier today by the majority leader.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 186) to authorize representation of Senator LOTT in the case of *Lee v. Lott*.

There being no objection, the Senate proceeded to consider the resolution.

Mr. DASCHLE. Mr. President, this resolution concerns a civil action commenced in the United States District Court for the Southern District of Mississippi. The lawsuit, filed by a prolific, pro se plaintiff, names Senator LOTT as the sole defendant. The plaintiff has filed a number of prior lawsuits against other public officials, which have been dismissed by several courts.

In this action, the plaintiff calls upon Senator LOTT to commence impeachment proceedings against the United States Supreme Court for its ruling in *Bush v. Gore*. The plaintiff contends that because the Supreme Court's decision in that case was unlawful, all actions taken by President George Bush are unconstitutional, including one allegedly denying him disability benefits. This resolution authorizes the Senate Legal Counsel to represent Sen-

ator LOTT in this suit to move for its dismissal. Of course, under the Constitution, it is the House of Representatives, not the Senate, that initiates impeachment proceedings and the judgment of neither House in impeachment matters is the subject of judicial review.

Mr. REID. I ask unanimous consent the resolution and its preamble be agreed to en bloc, the motion to reconsider be laid on the table, and that statements by the majority leader be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 186) was agreed to.

The preamble were agreed to.
(The resolution, with its preamble, is printed in today's RECORD under "Submitted Resolutions.")

MEASURE READ THE FIRST TIME—S. 1765

Mr. REID. I send a bill to the desk regarding bioterrorism preparedness and ask for its first reading.

The PRESIDING OFFICER. The clerk will read the bill by title.

The assistant legislative clerk read as follows:

A bill (S. 1765) to improve the ability of the United States to prepare for and respond to a biological threat or attack.

Mr. FRIST. Mr. President, I rise today on behalf of myself, Senator KENNEDY, and dozens of our colleagues on both sides of the aisle to support critical legislation that will help our Nation better prepare to defend against potential bioterrorist attacks.

The Bioterrorism Preparedness Act of 2001 was first introduced on November 15. Today, we are reintroducing this bill so that it may be placed directly on the calendar and available for consideration by the full Senate.

As my colleagues will note, the Bioterrorism Preparedness Act enjoys broad bipartisan support. We are reintroducing the legislation today with 71 cosponsors—33 Republicans and 38 Democrats. In addition, in the two weeks since the legislation was first introduced, we have gained the support of over two dozen organizations, including the American Medical Association, the Biotechnology Industry Organization, the American Academy of Family Physicians, the American Public Health Association, the Association of Minority Health Professions Schools, and the National Association of Children's Hospitals & Related Institutions. The list of supporters is growing every day.

In light of this overwhelming support and the short time remaining this session of Congress, we are moving the bill directly onto the Senate calendar so that it will be available for us to consider as soon as possible.

In the wake of the attacks at the Pentagon and World Trade Center on

September 11 and subsequent bioterrorist attacks, we know that bioterrorism is a significant and growing threat. I believe we must take steps this year to strengthen our capabilities to prepare for and respond to potential attacks.

Three years ago, as Chair of the Senate Public Health Subcommittee, I began a series of hearings to study in-depth the ability of our nation's public health infrastructure—at the local, state, and national level—to respond to public health threats and emergencies, including bioterrorism. Those hearings culminated in the passage of legislation last year—the Public Health Threats and Emergencies Act of 2000—intended to enhance coordination and improve resources for our public health system, principally at the state and local levels. But that authorizing legislation has never fully been funded, and it is now clear that more resources are needed to immediately strengthen our response capabilities.

That is why I feel so strongly that we must pass the Bioterrorism Preparedness Act of 2001. The legislation will address gaps in our Nation's defenses by expanding the capabilities of local, state, and federal government to respond to bioterrorist attacks, improving coordination among those responsible for responding to bioterrorist threats, speeding the development of vaccines and other countermeasures, and safeguarding the Nation's food supply and agriculture.

In closing, I want to thank my colleagues who have worked so hard to develop this legislation. In particular, I would like to single out Senator ROBERTS, Senator DASCHLE, and Senator HUTCHISON for their work on the agricultural provisions; Senators GREGG and HUTCHINSON for their contributions on the drug and vaccine development components; and Senator COLLINS for her input on the food safety provisions. Of course, I would also like to acknowledge my chief Democratic cosponsor, Senator KENNEDY. I encourage my colleagues who have not yet cosponsored this legislation to do so. And I encourage the leadership of the Senate to work with Senator KENNEDY and myself to find time in the days remaining so that this important legislation can be passed.

I yield the floor.

Mr. REID. Mr. President, I ask for the second reading and object to my own request.

The PRESIDING OFFICER. Objection having been heard, the bill will receive its second reading on the next legislative day.

ORDERS FOR WEDNESDAY, DECEMBER 5, 2001

Mr. REID. Mr. President, I ask unanimous consent that when the Senate completes its business today, it adjourn until the hour of 9:30 a.m.,

Wednesday, December 5; that immediately following the prayer and the pledge, the Journal of proceedings be approved to date, the morning hour be deemed expired, the time for the two leaders be reserved for their use later in the day, and the Senate resume consideration of H.R. 10; further, that upon disposition of H.R. 10, there be 1 hour of debate equally divided between the two leaders or their designees prior to the vote on cloture on the motion to proceed to S. 1731, with the live quorum being waived.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADJOURNMENT UNTIL 9:30 A.M.
TOMORROW

Mr. REID. Mr. President, if there is no further business to come before the Senate, I ask unanimous consent the Senate stand in adjournment under the previous order.

There being no objection, the Senate, at 5:35 p.m., adjourned until Wednesday, December 5, 2001, at 9:30 a.m.

NOMINATIONS

Executive nominations received by the Senate December 4, 2001:

DEPARTMENT OF COMMERCE

JAMES R. MAHONEY, OF VIRGINIA, TO BE ASSISTANT SECRETARY OF COMMERCE FOR OCEANS AND ATMOSPHERE, VICE ELWOOD HOLSTEIN, JR.

DEPARTMENT OF STATE

GRANT S. GREEN, JR., OF VIRGINIA, TO BE DEPUTY SECRETARY OF STATE FOR MANAGEMENT AND RESOURCES. (NEW POSITION)

OVERSEAS PRIVATE INVESTMENT CORPORATION

SAMUEL E. EBBESEN, OF THE VIRGIN ISLANDS, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE OVERSEAS PRIVATE INVESTMENT CORPORATION FOR A TERM EXPIRING DECEMBER 17, 2003, VICE GEORGE DARDEN.

DISTRICT OF COLUMBIA OFFENDER SUPERVISION, DEFENDER, AND COURTS SERVICES AGENCY

PAUL A. QUANDER, JR., OF THE DISTRICT OF COLUMBIA, TO BE DIRECTOR OF THE DISTRICT OF COLUMBIA OFFENDER SUPERVISION, DEFENDER, AND COURTS SERVICES AGENCY FOR A TERM OF SIX YEARS. (NEW POSITION)

HOUSE OF REPRESENTATIVES—Tuesday, December 4, 2001

The House met at 12:30 p.m.

MORNING HOUR DEBATES

The SPEAKER. Pursuant to the order of the House of January 3, 2001, the Chair will now recognize Members from lists submitted by the majority and minority leaders for morning hour debates. The Chair will alternate recognition between the parties, with each party limited to not to exceed 30 minutes, and each Member except the majority leader, the minority leader, or the minority whip limited to not to exceed 5 minutes.

The Chair recognizes the gentleman from Indiana (Mr. PENCE) for 5 minutes.

ISRAEL ACTING IN SELF-DEFENSE

Mr. PENCE. Mr. Speaker, I rise today after a harrowing set of days, explosions, fire, innocent civilians running in panic through the streets; and I do not refer to life in America, New York City, or in the environs of the Pentagon on September 11; but I speak of Jerusalem and Israel. I speak of a nation that in the last week and past several days has grievously lost husbands and fathers, wives and mothers, sons and daughters, grandsons and granddaughters to the scourge of political terror.

I rise today humbly to speak of Israel and of the precious relationship that does and must continue to exist between the Government of the United States and the government of that great and historic people. As an American, a Christian, and a Hoosier, it is my firm belief now more than ever that it is my duty to insist that the United States of America never waver in protecting and defending the interests of the State of Israel in its battle for survival in this dangerous part of the world, and in its efforts now to open up, as the President's press secretary spoke yesterday, of the second front of the war on terrorism.

Mr. Speaker, many of these things may seem obvious, but many in the media are having a hard time figuring out who is right in the current conflict and how to best stop, we are told, the cycle of violence in order to help the parties get back to the negotiating table so they can iron out differences and misunderstandings. While I will say I am the first to admit that I know less than most of my colleagues do about Israel and its importance to America, let me say what I think this

conflict is about and see whether my colleagues might agree.

Mr. Speaker, first I want to assert that I do not think that there is anything current about this conflict. I believe it is part of a continuing struggle being waged by many in the Arab world of extremists' views to do nothing other than to destroy the State of Israel, period. It is the historic aim of many in the terrorist organizations of Palestine and elsewhere, and the conflict today is simply an extension of that.

As to the question of who is right, that is simple. Mr. Speaker, it has ever been the policy of the United States of America and the people of this country since 1948 that Israel is right, believing as I do, as millions of Americans do, that He will still bless those who bless Israel, and so we stand with her.

A cycle of violence, I reject the term. When terrorists blow up a school bus or explode bombs in a mall killing children and innocent men and women, this is their aim. When Israel defense forces strike back, as they are at this hour and have in the last 24 hours, killing known terrorists and neutralizing terrorist assets, Mr. Speaker, this is not a cycle of violence; it is Israel performing her own self-defense.

As to returning to negotiations, one might ask what is there left to negotiate. Last summer at Camp David former Prime Minister Barak offered Yasser Arafat virtually everything. And how did Arafat respond? By launching a 9-month guerrilla war culminating this weekend, targeting women and children, some of whom were born in this country, and even in my State of Indiana. No, Yasser Arafat is not an effective negotiating partner. He is a terrorist, and it is time America stood strongly by Israel and said to Yasser Arafat, it is time that the terrorists and their capabilities are secured within the Palestinian Authority or else.

Mr. Speaker, the Bible tells us of another time when a man of God stood alone with his servant and hostile forces were arrayed against him. His servant was frightened, and so he prayed that God might open the eyes of his servant, that he would see more of those who are with us than those that are with them. It is my prayer, Mr. Speaker, that Israel's eyes would be opened, to know that though her enemies are ruthless, her friends in this country and this government are many, many more.

INCREASED TRANSPORTATION BENEFIT IS A WIN FOR HOUSE EMPLOYEES AND ENVIRONMENT

The SPEAKER pro tempore (Mr. CULBERSON). Under the Speaker's announced policy of January 3, 2001, the gentleman from Oregon (Mr. BLUMENAUER) is recognized during morning hour debates for 5 minutes.

Mr. BLUMENAUER. Mr. Speaker, I came to Congress with the notion that the Federal Government ought to be a better partner with American communities, local governments, business and citizens to help promote the livability of these communities, to make our families safe, healthy and economically secure.

One of the examples of where we could in fact make a difference was found upon my arrival here in Washington, D.C. Despite the fact that the District of Columbia was reputed to have the second worst traffic congestion of any metropolitan region in the country, despite concerns about congestion, pollution, a lack of parking here on Capitol Hill, the House of Representatives provided unlimited free parking for our employees, but would not do anything to help those who wanted to use mass transit and perhaps be part of the solution, despite the fact that we were arguing that the private sector and other governments ought to step up and try and help their employees with transit.

Mr. Speaker, it took an effort of almost 2 years and working with the gentlewoman from Maryland (Mrs. MORELLA), the gentleman from Michigan (Mr. EHLERS), the gentleman from Maryland (Mr. HOYER), the gentleman from Virginia (Mr. MORAN) we were able to implement a transit benefit program for the House employees.

Mr. Speaker, I am pleased that we have moved into a new era of that. We have more than tripled the benefit. Starting this month, employees will be able to have a \$65 transportation benefit for those who do not avail themselves of free parking on Capitol Hill; and starting January 1, they will be able to deduct pretax an additional \$35 for a \$100 transit benefit.

I am extremely grateful, Mr. Speaker, to the leadership of the Committee on Administration under the leadership of the gentleman from Ohio (Mr. NEY) with the gentleman from Maryland (Mr. HOYER), the ranking member, where they stepped up, worked with the committee and put in place a program that is going to allow us to provide an extensive benefit for our employees; but it also, in a time when we

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

are concerned about the energy security of this country, when we are deeply concerned about the quality of life in and around our Nation's capital, and when we are watching the problems associated with increased security every day stack up cars as they are waiting to be inspected coming into our House parking lots, this transportation benefit is a win for the environment, it is a win for the morale and efficiency of employees on the House. It is a win for those who want to make sure that Congress leads by example.

I strongly urge that each office look anew at this enhanced benefit program to make sure that each eligible employee takes advantage of it, and in fact, that each Member of Congress and their chief of staff encourage others to take advantage of it, because it is going to be good for them in the long run. We want the program to be a success. It is an important step to save money, to save the environment, and make Capitol Hill a little more livable.

ANTI-DUMPING LAWS LAST LINE OF DEFENSE AGAINST UNFAIRLY TRADED IMPORTS

The SPEAKER pro tempore. Under the Speaker's announced policy of January 3, 2001, the gentleman from Ohio (Mr. BROWN) is recognized during morning hour debates for 5 minutes.

Mr. BROWN of Ohio. Mr. Speaker, despite the overwhelming passage of a sense of Congress resolution urging the President to keep U.S. anti-dumping laws off of Qatar's negotiating table, the U.S. Trade Representative, Bob Zoellick, did just the opposite after a 410 to 4 vote.

U.S. officials have signaled that they are willing to negotiate on trade dumping laws that provide safeguards against countries selling products in the U.S. marketplace at below cost. The American steel industry, like so many others, relies on anti-dumping laws as their last line of defense against unfairly traded imports.

Unfortunately, since the WTO Uruguay Round, the steel industry's ability to defend itself against dumping has been severely weakened. Now, in Qatar, a couple of weeks ago, the U.S. Trade Representative has remained open to further weakening the rules on trade dumping, further jeopardizing American steel, further threatening American jobs.

Many of us were concerned about Qatar long before the negotiations began. It is a country that does not allow free elections. It is a country that does not allow freedom of expression. It is a country where women are treated not much differently from the way women are treated by the Taliban in Afghanistan.

□ 1245

It is a country where public worship by non-Muslims is banned. The mes-

sage that sends to people around the world that the trade ministers of all of the nations in the world are meeting in a city, in a country, where public protest will not be allowed, where free speech is not allowed, where public expression is not allowed, where freedom of worship is not allowed, and where free elections are not allowed, the message that sends is troubling. It is troubling because all too often our own trade minister, Robert Zoellick, has used in the past language to suggest that those of us who do not support his free trade agenda, his agenda to weaken environmental standards, to weaken labor standards around the world, those of us who do not support this free trade agenda, he implies, are indifferent to terrorism. He has questioned our patriotism saying, we do not really share American values if we do not support Fast Track, if we do not support his trade legislation because, he tells us, that is the way to combat terrorism around the world: You are either with us or you are against us. Many of us resent the U.S. Trade Representative questioning our patriotism, claiming we are indifferent to terrorism because we believe his Fast Track proposal is not coincident with American values and does not do the right things for our country.

Supporters of Fast Track argue that the U.S. is being left behind. They tell us we need Fast Track to increase American exports and provide new jobs for American workers. But this country's history of flawed trade agreements has led to a trade deficit with the rest of the world that surges well above \$350 billion. The 2000 trade deficit is 40 percent higher than the previous record set in 1999. The Department of Labor has reported that NAFTA, and these are very conservative government figures, that NAFTA has caused the loss of 300,000 jobs.

The American steel industry is no stranger to trade-induced adversity. Thousands of steel workers have lost their jobs. Mr. Speaker, 25 companies have filed for bankruptcy, 16 in the last year. We import 39 million tons of steel, double the 16 million tons we imported only 10 years ago, and steel prices, because of that, are below 1998 levels. In my home district, steel workers from LTV are learning firsthand that our trade policies put American workers in jeopardy. LTV terminated negotiations with its major union and went to bankruptcy court seeking permission to shut down its steel-making operations in anticipation of its sale. Now 11,000 jobs and the pensions and health benefits of more than 65,000 retirees and surviving spouses hang in the balance. LTV and the rest of the steel industry need Congress' assistance in solving this problem. Fast Track is not the answer. While our trade agreements go to great lengths to protect investors and protect prop-

erty rights, these agreements do not include enforceable protections for workers or for the environment.

CEOs of multinational corporations tell us that globalization stimulates development and allows nations to improve their environmental and labor record. The truth is, flawed trade agreements cost American jobs, put downward pressure on U.S. wages and working conditions, and erode the ability of government to protect public health and to protect the environment. If we fail to include these important provisions and trade agreements, multinational corporations will continue to dismiss labor and environmental protection as discretionary and wholly unnecessary. Global working conditions, global living conditions will continue to suffer.

We need to press for U.S. trade policy with provisions that protect American workers. We need to press for a U.S. trade policy with provisions that protect the American environment. We have experienced an economic slowdown, a drop in the stock market. Fast Track will not solve that problem, it will only make it worse.

ISRAEL MUST DEFEND ITSELF

The SPEAKER pro tempore (Mr. CULBERSON). Under the Speaker's announced policy of January 3, 2001, the gentleman from Massachusetts (Mr. FRANK) is recognized during morning hour debates for 5 minutes.

Mr. FRANK. Mr. Speaker, at a profoundly troubling time in the Middle East, I want to express very strongly my complete support for the right of the government of Israel to defend itself, its existence as a Nation, and its people from the systematic campaign of mass murder that is being inflicted on it. Americans should understand that if we take into account the populations of the two countries, the number of victims of blatant terrorism against unarmed civilians in Israel exceeds in the past few months the number of tragic deaths suffered here in America, and the Israeli government has every right to respond in a way that protects its people.

I say that, Mr. Speaker, as one who was a strong supporter of the peace process that President Clinton encouraged the parties in the Middle East to undertake. I thought that Prime Minister Barak, former Prime Minister Barak, took very creditworthy risks on behalf of peace. I defend the right of the Israeli government to support itself, not because peace is an irrelevancy, but because peace cannot come in an atmosphere of terror. In fact, we should be very clear that the recent terrible, tragic increase in the deaths of innocent people was brought about, in part, by people who are threatened by peace, who do not want to see coexistence of an Israeli and Palestinian State. It is not an accident

that as the Bush administration repudiated its past mistake of staying out of the Middle East peace process in their effort to repudiate everything that President Clinton had done, it is not a coincidence that the terror stepped up after the Bush administration sought to increase peace efforts.

The mistake, however, would be to say that the terrorism should be allowed to have an impact. People who argue that the way to end and respond to terrorism in the short run is in some ways to move towards the policies advocated by the terrorists make an error.

I am in favor of some change in Israeli policy. I think that the expansion of settlements is a grave error. I think the Mitchell Commission was right on that point. I think there ought to be movement towards peace. But if that movement is seen to have come as a result of mass murder, it gives an encouragement to the policy of murder.

The second question that has to be addressed here is, can Yasser Arafat in fact put an end to this. People have said well, in defense of Arafat, even if he wanted to put an end to this terror, he could not do it. Those who make that argument, and I am skeptical that anyone really knows the answer, but those who make that argument should be very clear: That is an attack on the peace process. If in fact Arafat confronts a population so imbued with hatred for Israel, so opposed to the notion of a genuine peace that could be acceptable to both sides, that he is powerless to put an end to this systematic murder campaign, then the prospects for peace are very bleak indeed.

I hope that is not the case. I think the Israeli government, with the encouragement and support of the U.S. Government should continue to probe. But we should be very clear that the so-called defense of Arafat, namely that bringing about an end to the terror and bringing about a genuine commitment to peace is beyond his capacity or the capacity of any other Palestinian leader is, in fact, a repudiation of the peace process. And in any case, whether that bleak prospect is what faces us or not, no one can deny the right of the democratically elected government of Israel to defend its people against a systematic campaign of mass murder, and no government should be asked to divert its attention from that most fundamental task of a government, that most fundamental responsibility of government to protect its innocent and unarmed citizens from systematic murder; no one should be diverted from that.

If, in fact, Arafat is sincere and he has the power, we will see that soon. He will genuinely cooperate in putting an end to this campaign. And if not, and if the peace process founders because of that, since no government can be expected to seriously negotiate

under the threat of this sort of systematic campaign of terror, then it will be clear where the responsibility lies, and it will not be with the government of Israel.

RECESS

The SPEAKER pro tempore. Pursuant to clause 12 of rule I, the Chair declares the House in recess until 2 p.m.

Accordingly (at 12 o'clock and 53 minutes p.m.), the House stood in recess until 2 p.m.

□ 1400

AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore (Mr. PETRI) at 2 p.m.

PRAYER

The Chaplain, the Reverend Daniel P. Coughlin, offered the following prayer:

Lord God, judge of all and savior of Your people, prepare the hearts and minds of Your servants that they may attend to Your Holy Word and be moved to reconciliation.

You alone forgive sin. From You alone comes the first movement of grace which changes human hearts. Destroy all false images and idols that all may come to know You, the one true living God.

Be with the Members of the House of Representatives on this National Day of Reconciliation as they join Members of the Senate in solemn assembly to seek the blessings of Your Divine Providence for forgiveness, reconciliation, unity and charity for all people of the United States.

As Members humble themselves in prayer before You, may Your healing Spirit touch profoundly all divided communities across this Nation. Make us one Nation, truly wise, a symbol of equal justice to the world, a responsive partner, defender of life and friend of the poor.

Renewed as Your people, forgiven of our sins, may this Nation be a sign of hope to others as You bring peace and goodwill to earth, both now and forever.

Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER pro tempore. Will the gentleman from Michigan (Mr.

KNOLLENBERG) come forward and lead the House in the Pledge of Allegiance.

Mr. KNOLLENBERG led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

DISPENSING WITH CALL OF PRIVATE CALENDAR ON TODAY

Mr. GIBBONS. Mr. Speaker, I ask unanimous consent that the call of the Private Calendar be dispensed with today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Nevada?

There was no objection.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore laid before the House the following communication from the Clerk of the House of Representatives:

OFFICE OF THE CLERK,
HOUSE OF REPRESENTATIVES,
Washington, DC, December 3, 2001.

Hon. J. DENNIS HASTERT,
The Speaker, House of Representatives,
Washington, DC.

DEAR MR. SPEAKER: Pursuant to the permission granted in Clause 2(h) of Rule II of the Rules of the U.S. House of Representatives, the Clerk received the following message from the Secretary of the Senate on December 3, 2001 at 10:34 a.m.

That the Senate passed without amendment H.R. 1766.

That the Senate passed without amendment H.R. 2261.

That the Senate passed without amendment H.R. 2454.

That the Senate passed without amendment H.J. Res. 71.

With best wishes, I am

Sincerely,

JEFF TRANDAHLL,
Clerk of the House.

COMMUNICATION FROM STAFF MEMBER OF THE HONORABLE JOHN CONYERS, JR., MEMBER OF CONGRESS

The SPEAKER pro tempore laid before the House the following communication from Deanna Maher, congressional aide to the Honorable JOHN CONYERS, Jr., Member of Congress:

HOUSE OF REPRESENTATIVES,
Washington, DC, October 11, 2001

Hon. J. DENNIS HASTERT,
Speaker, House of Representatives,
Washington, DC.

DEAR MR. SPEAKER: This is to notify you formally, pursuant to Rule VIII of the Rules of the House of Representatives, that I have been served with a subpoena for production of documents issued by the Washtenaw County Circuit Court.

After consultation with the Office of General Counsel, I have determined that compliance with the subpoena is consistent with the privileges and rights of the House.

Sincerely,

DEANNA MAHER,
Congressional Aide.

PASSAGE OF TRADE PROMOTION AUTHORITY

(Mr. RYUN of Kansas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RYUN of Kansas. Mr. Speaker, in my home State of Kansas, family farms are no longer able to make ends meet. Farmers tell me it is crucial that we expand markets for their products now or they will not be in business in 10 years.

Today, one in three acres planted by our farmers is harvested for export. We can and should do better.

Trade Promotion Authority is a tool that can boost the profits of American farmers and make them even more self-sufficient. If we streamline the trade agreement process that President Bush must follow, we will have increased competition, economic efficiency, and greater markets for our farm products.

As the key player on the world stage, we should give President Bush our vote of confidence to promote trade without excessive barriers.

I believe in the American farmer, and I trust President Bush. I urge my colleagues to allow the President to create more markets for American grains and products by granting Trade Promotion Authority.

TERRORIST ATTACKS AGAINST ISRAEL

(Mr. LANTOS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LANTOS. Mr. Speaker, today the gentleman from Illinois (Mr. HYDE), the distinguished chairman of the House Committee on International Relations, and I will introduce a resolution that categorically condemns this week's outrageous terrorist strikes against the State of Israel and Israeli people.

In the attacks of September 11, our Nation suffered the loss of over 3,000 innocent men, women, and children. Since that fateful day, our ally Israel has suffered a comparable loss. With 6 million citizens compared to our 280 million, Israel's 60 victims since September equates to over 2,700 American victims. Nearly half this number perished in a span of just 14 hours this past weekend.

Mr. Speaker, the United States is currently targeting regimes that harbor terrorists, as well as terrorists themselves. Israel must also target the terrorists' protectors. The Palestinian Authority bears full responsibility for the attacks of December 1 and 2, just as the Taliban bears full responsibility for the attacks of September 11.

I urge all of our colleagues to join the gentleman from Illinois (Mr. HYDE) and me in this resolution expressing solidarity with the people of Israel.

VOTING FOR TRADE PROMOTION AUTHORITY

(Mr. KNOLLENBERG asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KNOLLENBERG. Mr. Speaker, when we vote in 2 days on Trade Promotion Authority, nothing less than American leadership in the world is at stake.

As we lead the world in an effort to eradicate terrorism, we risk abdicating our position of leadership in an area that is just as vital to America's well-being and that is international trade.

The United States has been falling rapidly behind the rest of the world in international trade. I said rapidly behind. There are more than 130 trade agreements in effect in the world today, but the United States is party to just three.

For the world's most open society, the U.S., which should be leading the charge to open up other countries to our products, this is a sorry state of affairs.

We have a chance on Thursday to reclaim the mantle of leadership by passing TPA. When we do, the exports will go abroad; and the high paying jobs will stay here.

I urge all my colleagues to support TPA.

RECOGNITION OF THE ROLE WOMEN PLAYED IN THE TRAGEDY OF SEPTEMBER 11

(Mrs. CHRISTENSEN asked and was given permission to address the House for 1 minute.)

Mrs. CHRISTENSEN. Mr. Speaker, today I join the other members of the Caucus of Women's Issues at a luncheon to honor women at Ground Zero.

To look at the media reporting, we believe that all who responded were men; but as was the case, there was a need, and the women were there were, firefighters, police officers, construction workers, emergency medical personnel, doctors, nurses and others, putting their lives on the line and in some cases giving their lives.

I want to thank the co-chairs, the gentlewoman from Illinois (Mrs. BIGGERT) and the gentlewoman from California (Ms. MILLENDER-MCDONALD), for having the NOW legal defense and education fund, and Lieutenant Brenda Berkman there to tell the story of the brave and selfless women who were there with the men to respond in our country's tragic hour of need.

The story brought a tear to many an eye, male and female, not just because of the stories the women told, and they were powerful, but also because once again women were invisible, in the media, in the new recruits, also in the recovery planning; and this is America, not Afghanistan.

This is a potent reminder that women even here are still underrep-

resented at high levels of business and politics and that we are underpaid and have less opportunity.

As we put our country back on the road to recovery, let us not get back to normal. Let us get better.

HALT STORAGE OF NUCLEAR WASTE AT YUCCA MOUNTAIN

(Mr. GIBBONS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GIBBONS. Mr. Speaker, here we go again. The General Accounting Office, a nonpartisan congressional investigative agency, is calling on the President and the Department of Energy to indefinitely postpone its decision on whether to build a huge permanent centralized waste storage site at Yucca Mountain, Nevada.

The GAO report calls the plan to bury waste at Yucca Mountain a failed scientific process, echoing the concern I and my fellow Nevadans have expressed for years.

Yet the report goes on further; it warns that the plans the DOE has been showing to Congress and Nevadans may not describe the facilities that DOE would actually develop.

Mr. Speaker, it is obvious that the plan to bury nuclear waste at Yucca Mountain has not only been an obscene waste of taxpayer money but also a huge conspiracy to misrepresent the facts and deceive the American public.

It is time for the DOE to tell the truth. Storing nuclear waste at Yucca Mountain is not a safe plan, and I call upon my colleagues in the Congress to protect the American people and halt Yucca Mountain.

SUPPORT TRADE PROMOTION AUTHORITY

(Mrs. BIGGERT asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BIGGERT. Mr. Speaker, we hear many reasons why this House should pass legislation to renew Trade Promotion Authority. Today, I rise on behalf of working American families who need TPA.

American families in the bottom 20 percent of the income scale spend 52 percent of their after-tax income on food and clothing. Unfortunately for these hard-working families, food and clothing are the most heavily taxed income sectors, accounting for more than half of U.S. import taxes.

In fact, the average American family of four pays \$1,100 every year because of import taxes. Talk about regressive taxation. Families struggling to make ends meet are disproportionately hit by import taxes at the same time our trade negotiators sit on the sidelines, lacking authority to make the deals needed to eliminate these taxes.

Passing TPA will help working families. Let us pass H.R. 3005 and give them a break.

SUPPORTING ISRAEL'S WAR ON TERRORISM

(Mr. FERGUSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FERGUSON. Mr. Speaker, the scene is one that we know all too well: mindless terrorists attacking the young and the innocent, fleeing civilians with terror in their eyes, and once again, Mr. Speaker, scores of young people, their lives ended by the violent hatred of terrorism. We saw this on our own soil on September 11, and we saw it again this past weekend in Israel.

Mr. Speaker, September 11, while devastating for us, also gave us a sense for what our friends in Israel have been dealing with for decades; but beyond our new understanding of Israeli suffering, September 11 also gave us a new responsibility, to support Israel's own war on terrorism.

I applaud President Bush and the recent comments from Secretary of State Colin Powell. They have recognized that Israel has a right and a responsibility to defend itself.

Mr. Speaker, I ask my colleagues in Congress and the American people to support our friends in Israel as they struggle for peace and security.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the House by Ms. Wanda Evans, one of his secretaries.

PERIODIC REPORT ON NATIONAL EMERGENCIES WITH RESPECT TO YUGOSLAVIA AND KOSOVO—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 107-154)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on International Relations and ordered to be printed:

To the Congress of the United States:

As required by section 401(c) of the National Emergencies Act, 50 U.S.C. 1641(c), and section 204(c) of the International Emergency Economic Powers Act, 50 U.S.C. 1703(c), I transmit herewith a combined 6-month periodic report on the national emergencies declared with respect to the Federal Republic of Yugoslavia (Serbia and Montenegro) in Executive Order 12808 on May 30, 1992, and Kosovo in Executive Order 13088 on June 9, 1998.

GEORGE W. BUSH.

THE WHITE HOUSE, December 4, 2001.

PERIODIC REPORT ON NATIONAL EMERGENCY WITH RESPECT TO PROLIFERATION OF WEAPONS OF MASS DESTRUCTION—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 107-155)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on International Relations and ordered to be printed:

To the Congress of the United States:

As required by section 204(c) of the International Emergency Economic Powers Act, 50 U.S.C. 1703(c), and section 401(c) of the National Emergencies Act, 50 U.S.C. 1641(c), I transmit herewith a 6-month periodic report on the national emergency with respect to the proliferation of weapons of mass destruction that was declared in Executive Order 12938 of November 14, 1994.

GEORGE W. BUSH.

THE WHITE HOUSE, December 4, 2001.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 6 of rule XX.

Any record votes on postponed questions will be taken after debate has concluded on all motions to suspend the rules, but not before 7 p.m. today.

RECOGNIZING RADIO FREE EUROPE/RADIO LIBERTY'S SUCCESS IN PROMOTING DEMOCRACY

Mr. LEACH. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 242) recognizing Radio Free Europe/Radio Liberty's success in promoting democracy and its continuing contribution to United States national interests.

The Clerk read as follows:

H. CON. RES. 242

Whereas on May 1, 1951, Radio Free Europe inaugurated its full schedule of broadcast services to the people of Eastern Europe and, subsequently, Radio Liberty initiated its broadcast services to the peoples of the Soviet Union on March 1, 1953, just before the death of Stalin;

Whereas now fifty years later, Radio Free Europe/Radio Liberty (RFE/RL, Inc.) continues to promote democracy and human rights and serve United States national interests by fulfilling its mission "to promote democratic values and institutions by disseminating factual information and ideas";

Whereas Radio Free Europe and Radio Liberty were established in the darkest days of the cold war as a substitute for the free media which no longer existed in the com-

munist-dominated countries of Central and Eastern Europe and the Soviet Union;

Whereas Radio Free Europe and Radio Liberty developed a unique form of international broadcasting known as surrogate broadcasting by airing local news about the countries to which they broadcast as well as providing regional and international news, thus preventing the communist governments from establishing a monopoly on the dissemination of information and providing an alternative to the state-controlled, party dominated domestic media;

Whereas the broadcast of uncensored news and information by Radio Free Europe and Radio Liberty was a critical element contributing to the collapse of the totalitarian communist governments of Central and Eastern Europe and the Soviet Union;

Whereas since the fall of the Iron Curtain, RFE/RL has continued to inform and therefore strengthen democratic forces in Central Europe and the countries of the former Soviet Union, and has contributed to the development of a new generation of political and economic leaders who have worked to strengthen civil society, free market economies, and democratic government institutions;

Whereas United States Government funding established and continues to support international broadcasting, including RFE/RL, and this funding is among the most useful and effective in promoting and enhancing the Nation's national security over the past half century;

Whereas RFE/RL has successfully downsized in response to legislative mandate and adapted its programming to the changing international broadcast environment in order to serve a broad spectrum of target audiences—people living in fledgling democracies where private media are still weak and do not enjoy full editorial independence, transitional societies where democratic institutions and practices are poorly developed, as well as countries which still have tightly controlled state media;

Whereas RFE/RL continues to provide objective news, analysis, and discussion of domestic and regional issues crucial to democratic and free-market transformations in emerging democracies as well as strengthening civil society in these areas;

Whereas RFE/RL broadcasts seek to combat ethnic, racial, and religious intolerance and promote mutual understanding among peoples;

Whereas RFE/RL provides a model for local media, assists in training to encourage media professionalism and independence, and develops partnerships with local media outlets in emerging democracies;

Whereas RFE/RL is a unique broadcasting institution long regarded by its audience as an alternative national media that provides both credibility and security for local journalists who work as its stringers and editors in the broadcast region; and

Whereas RFE/RL fosters closer relations between the United States and other democratic states, and the states of Central Europe and the former Soviet republics: Now therefore be it

Resolved by the House of Representatives (the Senate concurring), That the Congress—

(1) congratulates the editors, journalists, and managers of Radio Free Europe/Radio Liberty on a half century of effort in promoting democratic values, and particularly their contribution to promoting freedom of the press and freedom of expression in areas of the world where such liberties have been denied or are not yet fully institutionalized; and

(2) recognizes the major contribution of Radio Free Europe/Radio Liberty to the growth of democracy throughout the world and its continuing efforts to advance the vital national interests of the United States in building a world community that is more peaceful, democratic, free, and stable.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Iowa (Mr. LEACH) and the gentleman from California (Mr. LANTOS) each will control 20 minutes.

The Chair recognizes the gentleman from Iowa (Mr. LEACH).

□ 1415

GENERAL LEAVE

Mr. LEACH. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include extraneous material on H. Con. Res. 242, the concurrent resolution under consideration.

The SPEAKER pro tempore (Mr. PETRI). Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. LEACH. Mr. Speaker, I yield myself such time as I may consume, and simply stress that this resolution recognizes 50 years of outstanding broadcasts by Radio Free Europe/Radio Liberty.

Earlier this year, we celebrated the one-half century of service of Radio Free Europe/Radio Liberty, and now we bring before this House a resolution to memorialize this occasion: Today, RFE/RL continues its mission to promote democratic values and institutions by disseminating factual information and ideas, thus expressing the idealism of the American experience.

As we face the war against terrorism and continued suppression of free media in many countries, it is clear that there remains a compelling mission for U.S. support of international broadcasting to provide factual information about world events and events within a given country.

The resolution before us recognizes the work of the broadcasters, the editors, the journalists, and the managers of RFE/RL, who see their work not just as a job but as a mission. Daily, they bring hope to people who do not have access to fair and independent media.

I urge my colleagues to support this resolution to formally recognize the work and successes of Radio Free Europe/Radio Liberty and our support for their ongoing work to promote democratic values around the world.

Before reserving the balance of my time, let me just say I am particularly appreciative of the work of the gentleman from Illinois (Mr. HYDE), the gentleman from California (Mr. LANTOS), the gentleman from California (Mr. BERMAN), the gentleman from New Jersey (Mr. SMITH), and the gentleman from California (Mr. ROYCE), and so many others for their strong support of public diplomacy of the United States.

Mr. Speaker, I reserve the balance of my time.

Mr. LANTOS. Mr. Speaker, I yield myself such time as I may consume, and I would like to add to that good list of names the gentleman just recited the name of my dear friend, the gentleman from California (Mr. LEACH), who has made such enormous contributions to this issue and to all other issues before our committee.

Mr. Speaker, I rise in strong support of this resolution. I was pleased to join the gentleman from Illinois (Mr. HYDE) in introducing this important resolution, Mr. Speaker, and I commend the chairman for his initiative.

As the United States mounts an intensive public diplomacy campaign in the Middle East in support of our war on terrorism, it is critical that we reflect on our Nation's past success in amplifying American values around the globe through the airwaves. Radio Free Europe and Radio Liberty stand as shining examples of the power of American democratic values and the potential of public diplomacy to advance United States national interests.

Since the founding of Radio Free Europe a half a century ago and the founding of Radio Liberty 48 years ago, these two broadcasting services have provided people around the world with hope and support in their struggle against repression. During the Cold War, Mr. Speaker, Radio Free Europe/Radio Liberty responded to the yearnings of those people who were suffering under the yoke of Communism and the Soviet Union in Eastern Europe. Since the fall of the Berlin Wall, the two broadcasting services have adapted their missions, reformed their institutions, and extended their reach to Iraq, Iran, Afghanistan, and beyond.

As a young man in occupied Hungary during the Second World War, I recall the inspirational and liberating broadcasts of the BBC, and I can testify personally to the dramatic effect those radio programs had in providing hope to people denied basic information.

Unlike the dictators whom we resist, we have truth on our side. Democracy and the market economy are destined to prevail. To hasten this state, we must promote aggressively our values by all means of communication available to us. Radio Free Europe and Radio Liberty are among the most effective tools in our public diplomacy toolbox, and they deserve our continued and strong support.

I commend Radio Free Europe and Radio Liberty on 50 years of distinguished service to our Nation, and I ask all of my colleagues to join me in wishing this great organization many more years of success by supporting this resolution.

Mr. Speaker, I yield back the balance of my time.

Mr. LEACH. Mr. Speaker, I yield myself such time as I may consume to just

again compliment the gentleman from California (Mr. LANTOS), whose visions on these issues have been nothing less than extraordinary.

Mr. GILMAN. Mr. Speaker, I would like to voice my ardent support for H. Con. Res. 242, which congratulates Radio Free Europe/Radio Liberty for its half century of work in promoting democratic values, and recognizes the organization's contribution to the growth of democracy throughout the world, as we strive toward creating a world of free democratic states living in peace with one another.

One of the most effective, efficient ways to promote the growth of democratic institutions on every continent is for Americans to communicate directly with people in other countries. For 50 years, Radio Free Europe/Radio Liberty has continued to broadcast daily news, analysis, and current affairs programming in a coherent, objective manner throughout the world. Radio Free Europe/Radio Liberty programs continue to provide 35 million listeners with balanced, reliable information, aimed at bolstering democratic development and market economies in countries where peaceful evolution to civil societies is of vital national interest to the United States.

With the advent of the war on terrorism, it becomes vital that Radio Free Europe/Radio Liberty continues to demonstrate to other societies how having the freedom to live and do business creates a dynamic economy and a vibrant society. Explaining the value of freedom by directly communicating with the general population of other countries and their power elites is the best example of public diplomacy.

Mr. LEACH. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Iowa (Mr. LEACH) that the House suspend the rules and agree to the concurrent resolution, H. Con. Res. 242.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds of those present have voted in the affirmative.

Mr. LANTOS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

GEORGE P. SHULTZ NATIONAL FOREIGN AFFAIRS TRAINING CENTER

Mr. LEACH. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3348) to designate the National Foreign Affairs Training Center as the George P. Shultz National Foreign Affairs Training Center.

The Clerk read as follows:

H.R. 3348

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DESIGNATION OF THE GEORGE P. SHULTZ NATIONAL FOREIGN AFFAIRS TRAINING CENTER.

(a) IN GENERAL.—

(1) Section 701(a) of the Foreign Service Act of 1980 (22 U.S.C. 4021(a)) is amended by adding at the end the following: "The institution shall be designated the 'George P. Shultz National Foreign Affairs Training Center'."

(2) Any reference in any provision of law to the National Foreign Affairs Training Center or the Foreign Service Institute shall be considered to be a reference to the George P. Shultz National Foreign Affairs Training Center.

(b) CONFORMING AMENDMENTS.—

(1) Section 53 of the State Department Basic Authorities Act of 1956 (22 U.S.C. 2725) is amended—

(A) in the section heading by inserting "GEORGE P. SHULTZ" after "THE"; and

(B) by inserting "George P. Shultz" after "use of the".

(2) Section 708(a) of the Foreign Service Act of 1980 (22 U.S.C. 4028(a)) is amended by inserting "George P. Shultz" after "director of the".

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Iowa (Mr. LEACH) and the gentleman from California (Mr. LANTOS) each will control 20 minutes.

The Chair recognizes the gentleman from Iowa (Mr. LEACH).

GENERAL LEAVE

Mr. LEACH. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include extraneous matter on H.R. 3348, the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. LEACH. Mr. Speaker, I yield myself such time as I may consume, and let me welcome this opportunity to bring H.R. 3348 to the House floor. The bill designates the National Foreign Affairs Training Center after a distinguished American, George Shultz.

Mr. Shultz, among his many achievements, was responsible for creation of the new Foreign Service training facility established in Arlington, Virginia. He undertook the difficult task of convincing Congress that the funding of the new campus would be an investment in the future of our foreign affairs community. In 1993, the professional and modern facilities opened as the National Foreign Affairs Training Center.

Secretary Shultz has a strong belief that the Nation should have a permanent home for training U.S. Government officials that serve overseas. Since 1947, the State Department has operated an in-service training facility, but by the late 1980s, it was apparent that there was a need for expanded course offerings and a larger facility to accommodate the increased number of participants. Secretary Shultz successfully pursued his goal to have a first-rate training facility established,

which today has an enrollment of approximately 30,000 a year.

As thrice a graduate of courses at the old Foreign Service Institute, it is an honor to bring this bill before the House. As a longtime admirer of the public service of Secretary Shultz, it is a particular honor to help bring his vision to reality.

I would urge strong support for this resolution and again would commend my good friend, the gentleman from California (Mr. LANTOS), for his support for this initiative.

Mr. Speaker, I reserve the balance of my time.

Mr. LANTOS. Mr. Speaker, I yield myself such time as I may consume. And let me just say at the outset that one of the many reasons why the contributions of the gentleman from Iowa (Mr. LEACH) to the work of this body and to the Committee on International Relations is of such high quality is because of his earlier service as a member of our Foreign Service. He exemplifies the extraordinary talent of our diplomatic corps, and I want to commend him for bringing this legislation to our attention.

Mr. Speaker, I am delighted to cosponsor this bill with the gentleman from Illinois (Mr. HYDE) because Secretary George Shultz deserves all the recognition that this Congress and the American people may offer. George Shultz was a brilliant Secretary of State and he guided the United States through a most critical time in our Nation's history.

I was a member of the Committee on International Relations during Secretary Shultz's entire tenure, and I have the highest regard for him both professionally and personally. After leaving Washington, Secretary Shultz made the wise decision to return to my area of the country, the San Francisco Bay area, and I have been delighted to claim him both as a constituent and as a friend.

George Shultz is proud of his Princeton and Marine Corps background, and he has provided a quality of integrity and intelligence and commitment to public service which is truly extraordinary. He may have left the government and moved away from Washington, but George continues to be actively engaged in our foreign policy and committed to strengthening and supporting the Department of State and the men and women who work there. I think it is more than fitting that this great institution that he worked so hard to establish, that he has been so dedicated to, should bear his name.

The Foreign Service Institute was originally created in 1943, and it provides training to the State Department and 43 other Federal agencies, providing instruction to over 30,000 U.S. Government employees every year in 63 foreign languages as well as in courses

on management, leadership, diplomacy, security, economics, and other valuable skills and subjects.

Secretary Shultz was instrumental in obtaining the land and the funding to move the Institute to its current home on a 72-acre plot at the National Foreign Affairs Training Center in Arlington, Virginia. I am indeed proud to be a cosponsor of this bill to designate the National Foreign Affairs Training Institute as the George P. Shultz National Foreign Affairs Training Center.

I thank the chairman and the gentleman from Iowa (Mr. LEACH) for their leadership on this issue. I urge all of my colleagues to support this bill.

Mr. Speaker, I yield back the balance of my time.

Mr. LEACH. Mr. Speaker, I yield 5 minutes to the gentleman from California (Mr. ROYCE).

□ 1430

Mr. ROYCE. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, I think that it is indeed proper that the many achievements of George P. Shultz be recognized by the naming of this new National Foreign Affairs Training Center after Mr. Shultz.

As well as commending the gentleman from Iowa (Mr. LEACH) for the gentleman's efforts, I also commend the ranking member, the gentleman from California (Mr. LANTOS), for the bill that he brought up prior to this measure, and take a moment, if I could, to speak about the importance of commemorating the 50th anniversary of Radio Free Europe and Radio Liberty.

I think it is important that we remember within 10 minutes of the establishment of Radio Free Europe, the Soviets were already attempting in 1951 to jam those broadcasts, and yet those broadcasts got through. What Joseph Stalin was afraid of was what was being told over the air waves. He was afraid of the truth; Radio Free Europe/Radio Liberty developed a rather unique form of international broadcasting. We call that today surrogate radio, airing local news about the countries to which they broadcast, operating as if they had a free and vibrant press.

During the Cold War, these radios brought the news of the Hungarian revolution of 1956, the Prague uprising of 1968, and most importantly, the rise of the solidarity movement in Poland. And when we talk with the leaders of the Czech Republic or Poland, they say that the hearts and minds of people were turned by the opportunity to listen every day to a radio broadcast which explained what was actually happening inside their country. These broadcasts were able to explain and to put into context what people were hearing from the Soviet broadcasts, and over time we know that this was

the most effective single thing that changed the attitudes of the average person in Eastern Europe, we know that from the leaders of these countries today. They were critical in contributing to the collapse of communism, the collapse of the totalitarian governments of Eastern Europe and the former Soviet Union. And besides its outstanding impact behind the Iron Curtain during the Cold War, the radios also aided in Afghanistan from 1985–1993 during the Soviet invasion.

Radio Free Europe/Radio Liberty still continues to tell the truth, countering dictators like Saddam Hussein. Saddam Hussein has long complained that Radio Free Iraq is, in his words, an act of aggression. The Iraqi dictator has become so irked by his attempt to undermine his control over the media that Saddam Hussein instructed his intelligence officials, and apparently recently there has been a plot uncovered by Iraq to bomb Radio Free Europe's headquarters in Prague.

Last month this House passed legislation authored by myself and the gentleman from California (Mr. BERMAN) to re-create Radio Free Afghanistan by a margin of 405 to two. The Taliban is on its way out; but if Afghanistan is to have a chance of becoming stable, if its various factions and ethnic groups are to strike a workable governing accord, the country will need free-flowing, accurate news information.

Unfortunately, the country is starting from scratch. What media the Taliban did not corrupt, it destroyed. Looking ahead at the great challenges Afghanistan faces, it is clear to those that are on the ground that a credible and effective media will not emerge any time soon. This legislation will provide for 12 hours of broadcasting a day in the two major dialects of Afghanistan, and that is vital to the peace and stability in that country. The bill awaits action by the other body. Radio Free Europe has been heard by individuals with a message of hope and freedom for the past 50 years, and I commend Radio Free Europe and Radio Liberty on their anniversary.

Mr. Speaker, I wanted to speak on behalf of the measure of the gentleman from California (Mr. LANTOS), and also speak on the appropriate resolution today for a very distinguished American, George P. Shultz, and to thank the gentleman from Iowa (Mr. LEACH) for bringing that resolution to the floor.

Mr. LEACH. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, George P. Shultz began his career in the South Pacific in World War II. He is ending his career, to the degree it is ending, and we hope it is not fully, with a bill aimed in his honor, a facility designed to prevent further wars. I think this could not be more fitting.

Mr. GILMAN. Mr. Speaker, long before the current emphasis on training for the foreign af-

fairs community, George Shultz had a vision of a world-class foreign affairs training center for those who staff our foreign affairs establishment. That vision eventually became the National Foreign Affairs Training Center in Arlington, Virginia, which by this act, we name it after Secretary Shultz.

With all due respect to the current occupant of that office, George Shultz is in my estimation the finest person I have had the honor of working with during his or her service as Secretary of State. He played an enormous role in the tremendous expansion of the scope of liberty in the world during the Reagan Administration, all while protecting our national security from real threats. At times, he suffered the slings and arrows of fierce partisan attack, as he advanced the sometimes unpopular policies of his Administration. He did so always with inspiring grace and intellectual honesty.

If those who serve our Nation in foreign affairs were to model themselves after George Shultz, we would do well indeed. Let us help keep his spirit in their consciousness by naming the facility he planned after this visionary Secretary of State, our friend George Shultz.

I urge all my colleagues to support this tribute to an outstanding American, Secretary of State, George P. Shultz.

Mr. LEACH. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. PETRI). The question is on the motion offered by the gentleman from Iowa (Mr. LEACH) that the House suspend the rules and pass the bill, H.R. 3348.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds of those present have voted in the affirmative.

Mr. LANTOS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

HUNGER TO HARVEST: DECADE OF SUPPORT FOR SUB-SAHARAN AFRICA RESOLUTION

Mr. LEACH. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Con. Res. 102) relating to efforts to reduce hunger in sub-Saharan Africa, as amended.

The Clerk read as follows:

H. CON. RES. 102

Resolved by the House of Representatives (the Senate concurring),

SECTION 1. SHORT TITLE.

This concurrent resolution may be cited as the "Hunger to Harvest: Decade of Support for Sub-Saharan Africa Resolution".

SEC. 2. FINDINGS.

Congress finds the following:

(1) Despite some progress in recent years, sub-Saharan Africa enters the new millennium with many of the world's poorest countries and is the one region of the world where hunger is both pervasive and increasing.

(2) Thirty-three of the world's 41 poorest debtor countries are in sub-Saharan Africa

and an estimated 291,000,000 people, nearly one-half of sub-Saharan Africa's total population, currently live in extreme poverty on less than \$1 a day.

(3) One in three people in sub-Saharan Africa is chronically undernourished, double the number of three decades ago. One child out of seven dies before the age of five, and one-half of these deaths are due to malnutrition.

(4) Sub-Saharan Africa is the region in the world most affected by infectious disease, accounting for one-half of the deaths worldwide from HIV/AIDS, tuberculosis, malaria, cholera, and several other diseases.

(5) Sub-Saharan Africa is home to 70 percent of adults, and 80 percent of children, living with the HIV virus, and 75 percent of the people worldwide who have died of AIDS lived in Africa.

(6) The HIV/AIDS pandemic has erased many of the development gains of the past generation in sub-Saharan Africa and now threatens to undermine economic and social progress for the next generation, with life expectancy in parts of sub-Saharan Africa having already decreased by 10–20 years as a result of AIDS.

(7) Despite these immense challenges, the number of sub-Saharan African countries that are moving toward open economies and more accountable governments has increased, and these countries are beginning to achieve local solutions to their common problems.

(8) To make lasting improvements in the lives of their people, sub-Saharan Africa governments need support as they act to solve conflicts, make critical investments in human capacity and infrastructure, combat corruption, reform their economies, stimulate trade and equitable economic growth, and build democracy.

(9) Despite sub-Saharan Africa's enormous development challenges, United States companies hold approximately \$12,800,000,000 in investments in sub-Saharan Africa, greater than United States investments in either the Middle East or Eastern Europe, and total United States trade with sub-Saharan Africa currently exceeds that with all of the independent states of the former Soviet Union, including the Russian Federation. This economic relationship could be put at risk unless additional public and private resources are provided to combat poverty and promote equitable economic growth in sub-Saharan Africa.

(10) Bread for the World Institute calculates that the goal of reducing world hunger by one-half by 2015 is achievable through an increase of \$4,000,000,000 in annual funding from all donors for poverty-focused development. If the United States were to shoulder one-fourth of this aid burden—approximately \$1,000,000,000 a year—the cost to each United States citizen would be one penny per day.

(11) Failure to effectively address sub-Saharan Africa's development needs could result in greater conflict and increased poverty, heightening the prospect of humanitarian intervention and potentially threatening a wide range of United States interests in sub-Saharan Africa.

SEC. 3. SENSE OF CONGRESS.

It is the sense of Congress that—

(1) the United States should declare "A Decade of Support for Sub-Saharan Africa";

(2) not later than 90 days after the date of adoption of this concurrent resolution, the President should submit a report to Congress setting forth a five-year strategy, and a ten-year strategy, to achieve a reversal of current levels of hunger and poverty in sub-Saharan Africa, including a commitment to

contribute an appropriate United States share of increased bilateral and multilateral poverty-focused resources for sub-Saharan Africa, with an emphasis on—

(A) health, including efforts to prevent, treat, and control HIV/AIDS, tuberculosis, malaria, and other diseases that contribute to malnutrition and hunger, and to promote maternal health and child survival;

(B) education, with an emphasis on equal access to learning for girls and women;

(C) agriculture, including strengthening subsistence agriculture as well as the ability to compete in global agricultural markets, and investment in infrastructure and rural development;

(D) private sector and free market development, to bring sub-Saharan Africa into the global economy, enable people to purchase food, and make health and education investments sustainable;

(E) democratic institutions and the rule of law, including strengthening civil society and independent judiciaries;

(F) micro-finance development; and

(G) debt relief that provides incentives for sub-Saharan African countries to invest in poverty-focused development, and to expand democratic participation, free markets, trade, and investment;

(3) the President should work with the heads of other donor countries and sub-Saharan African countries, and with United States and sub-Saharan African private and voluntary organizations and other civic organizations, including faith-based organizations, to implement the strategies described in paragraph (2);

(4) Congress should undertake a multi-year commitment to provide the resources to implement those strategies; and

(5) 120 days after the date of adoption of this concurrent resolution, and every year thereafter, the Administrator of the United States Agency for International Development, in consultation with the heads of other appropriate Federal departments and agencies, should submit to Congress a report on the implementation of those strategies, including the action taken under paragraph (3), describing—

(A) the results of the implementation of those strategies as of the date of the report, including the progress made and any setbacks suffered;

(B) impediments to, and opportunities for, future progress;

(C) proposed changes to those strategies, if any; and

(D) the role and extent of cooperation of the governments of sub-Saharan countries and other donors, both public and private, in combating poverty and promoting equitable economic development.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Iowa (Mr. LEACH) and the gentleman from California (Mr. LANTOS) each will control 20 minutes.

The Chair recognizes the gentleman from Iowa (Mr. LEACH).

GENERAL LEAVE

Mr. LEACH. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include extraneous material on H. Con. Res. 102, the resolution under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. LEACH. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I appreciate the cooperation of the majority leader, the gentleman from Illinois (Chairman HYDE) and the gentleman from California (Mr. LANTOS) for allowing the House to consider this Hunger to Harvest: Decade of Support for sub-Saharan Africa Resolution.

The bill was introduced by the gentleman from New Jersey (Mr. PAYNE) and me earlier this year and currently has 150 cosponsor, including many of our colleagues on the Committee on International Relations. The amendment in the nature of a substitute that the committee is offering today conforms the House version with similar language already passed by the Senate.

This resolution expresses the sense of the Congress that the United States should commit itself to acting with its partners in sub-Saharan Africa to reduce poverty and hunger on the subcontinent over the next decade.

What is most extraordinary about the 20th century in relation to the rest of human history is that economic and social development, coupled with modern medicines, caused the life spans of human beings to double on much of the planet. Tragically, the exception has been in Africa, particularly sub-Saharan Africa, where not only have life spans not been extended, but life has been shortened in the last several decades.

While sub-Saharan Africa has tremendous untapped human and economic potential, for the most part the region has not prospered. Indeed, in all of the developing regions of the world, the severity of poverty and malnutrition is greatest in that subcontinent and is also growing at the fastest rate on the Earth. Roughly 290 million people in the region, nearly half the total population, live on less than a dollar a day.

Mr. Speaker, 33 of the world's 41 most heavily indebted poor countries are in sub-Saharan Africa. According to the World Bank, those more vulnerable to poverty live in rural areas in large households which are often headed by women.

In addition, the scourge of HIV/AIDS is fast reversing many of the modest social gains which have been achieved in recent years. There are many causes for this distressing state of affairs: interstate conflict, natural disaster, corruption, underdeveloped private sectors, to name a few. While the people of sub-Saharan Africa must take ultimate responsibility for the success or failure of these countries, the United States has the moral obligation and resources to help improve the lives of millions of people living there.

This resolution directs the Agency for International Development to devise 5- and 10-year strategic plans in

health, education and agriculture, and for promoting free market economies, trade investment, democracy, and the rule of law.

In closing, I would like to acknowledge the extraordinary leadership of America's faith-based community, churches, synagogues, mosques and associated institutes like Bread for the World and its thoughtful president, David Beckman, for compelling support for this resolution. It is this private, faith-based community that has awakened the conscience of the world on the need to confront the moral and development challenges of issues such as debt relief and world hunger. In their name, I urge passage of this resolution.

Before turning to the distinguished ranking member of the committee, let me thank the gentleman for his leadership and that of course of the gentleman from New Jersey (Mr. PAYNE), which has been so extraordinary on this subject.

Mr. Speaker, I reserve the balance of my time.

Mr. LANTOS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of this resolution. First, I would like to commend the gentleman from Iowa (Mr. LEACH) for introducing this important resolution. I want to commend our Chair, the gentleman from Illinois (Mr. HYDE); and I certainly pay tribute to the chairman of the Subcommittee on Africa, the gentleman from California (Mr. ROYCE), and to the ranking member, the gentleman from New Jersey (Mr. PAYNE), whose contribution on the subject of Africa and indeed on all subjects coming before our committee is immeasurable in importance.

Mr. Speaker, each night more than 800 million people around the globe, many of them children, go to bed not knowing if they will have enough to eat the next day. Most of these poor and hungry souls live in sub-Saharan Africa. In Africa, hunger is both pervasive and growing. The sad truth is that hunger, poverty, and disease go hand in hand. A poor and hungry mother has few defenses against tuberculosis, malaria, cholera, HIV-AIDS, and other deadly diseases when hunger, too, gnaws at her body and saps her spirit.

Some of Africa's poverty is caused by decades of civil strife where the sole purpose of conflict is to rob the nation of its wealth. Resource wars fought over diamonds, oil, or simply the largess of the state leave little behind for the citizens of the nation. Mr. Speaker, this must end. These wars leave farming areas seeded with land mines instead of maize. Young boys stripped of their innocence become vicious child soldiers instead of school boys. War lords reap millions in personal gain.

Global indifference, Mr. Speaker, has caused some of the Africa's poverty. The ubiquitous faces of hungry African

children cease to stir concern in rich countries as new crises arise that affect our own lives. One is only stirred from the seeming banality of Africa's hunger when one truly looks into the eyes of a malnourished child or a helpless mother. It has become too easy to turn away and worry instead about tax relief or global trade or school reform.

Mr. Speaker, taxes, trade and education matter; but they do not relieve us of our obligation to care for Africa's poor and hungry. Despite immense challenges, the number of sub-Saharan African countries digging deep to find local solutions to their problems is growing. They are moving toward open economies and more accountable and transparent government. To make long-term, sustainable improvements in the lives of their people, African governments need the support that we can give them to resolve their conflicts, make critical investment in human capacity and infrastructure, combat corruption, reform their economies, and ultimately build democracy. They do not need handouts, but they certainly do need us to join hands.

Mr. Speaker, we can come together with those African leaders who are ready to act responsibly. We can build strong economic relationships that combat poverty and promote equitable economic growth in Africa. Together we can address effectively Africa's human needs and bring about a continent with a different face, a face no longer filled with hunger, hopelessness and despair, but one etched with promise, prosperity and hope.

□ 1445

Mr. Speaker, the Hunger to Harvest Resolution is a very important piece of legislation. Its passage will put Congress on record in support of efforts to alleviate hunger in Africa, and I ask every one of our colleagues to vote in support of this resolution.

Mr. Speaker, I reserve the balance of my time.

Mr. LEACH. Mr. Speaker, I yield 3 minutes to the gentleman from California (Mr. ROYCE).

Mr. ROYCE. Mr. Speaker, I rise in support of this legislation, and I rise to commend the gentleman from Iowa (Mr. LEACH) for his humanitarian efforts and his work over the years with AID and his efforts to bring focus on this issue of hunger in Africa, and also to commend the gentleman from New Jersey (Mr. PAYNE), the ranking member of the Subcommittee on Africa, for his efforts to raise before this body this critically important issue of what we can do to reduce hunger in sub-Saharan Africa.

Far too little progress has been made over the years in fighting hunger. I believe that Congress has taken several tangible steps, in addition to this Hunger to Harvest legislation, that have helped in some way to reduce poverty

and hunger in Africa. One that I wanted to focus on for just a minute was the fact that in May of 2000, after years of effort, Congress passed and the President signed into law the African Growth and Opportunity Act. Although the bill has only been in effect for a year, it has had a very positive development impact in terms of some of the poorest African countries.

I will give my colleagues two examples: Malawi and Madagascar, two of the world's poorest countries, have experienced a 70 percent and 120 percent increase respectively in trade with the United States, causing a direct increase there in jobs and causing an increase in income to the neediest people in those countries; and that means food on the plates of children who might otherwise not eat, and shoes on their feet.

Mr. Speaker, we should do more in fighting hunger in Africa, and this resolution focuses on that issue, and we should also do more to promote trade with Africa, which is good for African countries and, frankly, good for America too. With a global economic slowdown underway, Africa is one of the few regions in the world, frankly, where we are increasing trade, and Africa wants to do business with the United States.

The U.S. has a growing commercial interest there. It has a growing strategic interest in Africa which has been described as the "soft underbelly" in our war against terrorism but, most important for us, the U.S. has an important humanitarian interest there. America has always had that humanitarian interest in Africa. I want to commend these Members of Congress who have routinely tried to keep that focus on that issue, and it is that interest that the Hunger to Harvest legislation speaks to.

So I again wanted to commend the gentleman from Iowa (Mr. LEACH) and to commend the gentleman from New Jersey (Mr. PAYNE) for their efforts.

Mr. LANTOS. Mr. Speaker, I am delighted to yield such time as he may consume to our distinguished colleague, the gentleman from New Jersey (Mr. PAYNE), my dear friend, who has been our leader on our side of the aisle on all issues relating to these matters.

Mr. PAYNE. Mr. Speaker, I rise in strong support of H. Con. Res. 102.

Let me thank the gentleman from Illinois (Mr. HYDE) for moving this important piece of legislation through and the ranking member, the gentleman from California (Mr. LANTOS), whose long interest in foreign affairs throughout the world and his own experience has been an example of leadership to our committee. Let me commend the gentleman from California (Mr. ROYCE), who has led the Subcommittee on Africa into a forward-moving committee, and the gentleman from Iowa (Mr. LEACH), who not only

on this bill dealing with hunger, but his leadership on legislation focusing the attention of the Global AIDS Fund with the gentlewoman from California (Ms. LEE), who should be commended for his tireless effort on behalf of people of the world who are less fortunate.

While the Nation's attention is understandably with the war in Afghanistan, Congress has made a firm pledge to poor and hungry people in Africa with this legislation, H. Con. Res. 102, Hunger to Harvest: A Decade of Concern for Africa, which calls for significant new poverty-focused development assistance to sub-Saharan Africa. Hunger to Harvest would increase poverty-focused assistance to sub-Saharan Africa by \$1 billion. According to Bread for the World, the national grass-roots organization that works with antihunger programs, and they have actively lobbied for this bill, a commitment of \$4 billion a year from the G-8 countries would cut world hunger in half by the year 2015. The U.S. share of that would be \$1 billion, which translates into a mere penny a day for each American. We can certainly afford that. We have the means to effectively attack hunger and we have the means to feed every child in the world where, as it has been mentioned, 200 million children out of 800 million people go hungry every day. We have the means to save the precious lives of innocent children when, in developing countries, 6 million children die every year, mostly because of hunger-related illnesses.

The world produces enough food to feed its growing population, so the issue is not the sufficiency of food. The issue is about access and distribution. The long-term solution to hunger in sub-Saharan Africa, therefore, must include strengthening agriculture as a source of food and income and improving basic health and education in sub-Saharan Africa.

We cannot as a country say we are for development and not deal with the issue of hunger, which inhibits progress, growth, and life, nor can we effectively fight the war on terrorism and win if we do not deal with conditions of hunger and poverty which can lead to feelings of disillusionment and marginalization. Helping Africa work its way to prosperity is not only the right thing to do but it also makes good sense to America's workers. The United States holds approximately \$13 billion in investments in sub-Saharan Africa, more than in the Middle East or Eastern Europe, and the total U.S. trade with sub-Saharan Africa exceeds that of the entire former Soviet Union.

What Congress will do in enthusiastically passing the Hunger to Harvest Resolution is join our G-8 partners and the World Bank in expressing support for the long-term development initiatives of African governments as expressed in the new Program for African Development announced by Presidents

Mbeki of South Africa, Obasanjo of Nigeria, Wade of Senegal, and Bouteflika of Algeria.

I have been inspired by this bipartisan effort and by the work of Bread for the World. With more than a third of the Members of the House cosponsoring this resolution from both sides of the aisle, I think together we can fight hunger and poverty in Africa. Let me once again commend the gentleman from Iowa (Mr. LEACH) who has fought tirelessly to reach this milestone. While our two parties may disagree on some issues, it is wonderful to see that ending hunger and aiding in Africa's development is something we can all agree on.

At a time when more and more Americans say the U.S. would benefit from greater involvement in world affairs, America has helped put Congress on record.

Mr. Speaker, I ask our colleagues to pass this bill.

Mr. LANTOS. Mr. Speaker, I yield back the balance of my time.

Mr. LEACH. Mr. Speaker, I yield myself such time as I may consume.

In conclusion, let me again thank the gentleman from California (Mr. LANTOS), the gentleman from New Jersey (Mr. PAYNE), and the gentleman from California (Mr. ROYCE) for their leadership on so many African issues. Symbolically, this bill is about the world family, about kids and their grandparents. If we keep our priorities right, the likelihood of moral and national splintering becomes remote. If, on the other hand, we wear blinkers, chaos is inevitable. The American national spirit, as well as our national interest, is interlinked with the commitment to end despair in the furthest reaches of the globe. Hope is the only hope for the world today.

Mr. GILMAN. Mr. Speaker, I would like to take time to voice my support for H. Con. Res. 102. Sub-Saharan Africa is clearly a region afflicted by poverty. Despite some positive economic and political changes in sub-Saharan Africa, it remains an area of the world where hunger is pervasive and steadily increasing with one of every three persons being chronically undernourished. This hunger has multiple causes, including severe poverty, the HIV/AIDS pandemic, civil wars, continued foreign debt, degraded land, and inadequate education.

African nations need additional U.S. aid to develop their human and natural resources—and thereby strengthen their capacity to deal with hunger, poverty, and related problems. Sub-Saharan Africa needs additional resources to improve farming and support farmer-owned businesses; help prevent and treat HIV/AIDS, malaria, tuberculosis, and other infectious diseases; encourage the enrollment of more children in school; and help develop microenterprises and other business opportunities.

However, assistance alone will not solve their problems. Although such poverty-focused development aid has proven effective, our ef-

forts to assist sub-Saharan Africans to overcome poverty must remain focused on encouraging their participation in the private sector. The foundation for sustained economic growth in sub-Saharan Africa depends upon the development of an environment receptive to trade and investment. This can only be brought about by investments in human resources, domestic economic development, the implementation of free market policies, and the widespread application of the rule of law and democratic governance by the sub-Saharan nations themselves.

I urge support for this measure.

Mr. BEREUTER. Mr. Speaker, this Member rises in strong support of H. Con. Res. 102, the Hunger to Harvest Resolution: A Decade of Concern for Africa. Additionally, this Member, as a cosponsor of this resolution, would like to thank the distinguished gentleman from Iowa (Mr. LEACH) and the distinguished gentleman from New Jersey (Mr. PAYNE) for introducing this important legislation.

Mr. Speaker, the terrorist attacks of September 11th highlighted the extent to which American security is placed at risk when the U.S. fails to provide development aid and assistance to areas in peril of falling into the hands of unfriendly regimes. Indeed, sub-Saharan Africa currently faces many of the same conditions which coalesced to create the Afghanistan in which the Taliban has thrived. Much of sub-Saharan Africa has fought ravaging civil wars, demoralizing poverty, recurring droughts, and debilitating disease.

This country's own long-term security depends to a large extent on stability in sub-Saharan Africa. The micro-enterprise, agriculture development, debt relief, and health programs which are outlined in this bill have the potential to serve as key investments in preventing terrorism against the U.S. and against U.S. interests.

Mr. Speaker, this Member strongly urges his colleagues to vote for H. Con. Res. 102.

Mr. MATHESON. Mr. Speaker, I am grateful today for the opportunity to speak on a topic that is important to all Americans.

The issue of hunger in sub-Saharan Africa strikes at the very core of our nation's values. The current situation in this part of the world is both alarming and poignant. Many of the people in this region suffer from disease, malnutrition, and hunger. The suffering of so many is attributed to the lack of such basic needs as food and adequate shelter which makes the situation all the more disturbing.

Currently the American people are focused on overcoming recent tragedy and forging new roads toward progress and prosperity. The humanity and compassion that the people of this nation have displayed transcends geographical borders. As noted in H. Con. Res. 102, the majority of Americans want to see the United States, along with the rest of the world, join together in a concerted effort to alleviate world hunger.

As the United States leads the world into the twenty-first century, we must ensure that we leave no one behind. There is a risk that if left unresolved, the gap between rich and poor nations of the world will only increase. It is important that the United States lead the world in showing a real commitment to eliminating the suffering of the world's hungry.

While it is important that we act quickly, we must also be willing to persevere in order to create real and lasting change.

Sub-Saharan Africa is a region fraught with many problems. One in three people are chronically undernourished, leading one-seventh of all children to die before they are five years old. Upwards of 70 percent of all AIDS patients reside in sub-Saharan Africa, and though almost half of its population survives on less than \$1 a day, U.S. companies hold \$15 billion in investments there—more than either the Middle East or Eastern Europe.

Mr. Speaker, I am confident that this resolution takes the necessary steps to begin substantial change. H. Con. Res. 102 calls for the engagement of other nations in a multi-lateral effort to be conducted for several years. Through a multi-year commitment to funding health, education, agriculture, and micro-finance programs, as well as debt relief, we can show our commitment to real progress. I encourage my colleagues to vote for this resolution, declare "A Decade of Concern" for sub-Saharan Africa, and begin the process of alleviating this human suffering.

Ms. JACKSON-LEE of Texas. Mr. Speaker, I rise to express my strong support for H. Con. Res. 102. This resolution highlights the stark realities facing the African sub-continent at the precipice of this millennium, and highlights the commitments that the United States must make in order to further the health and safety of the African peoples.

The findings in this resolution tell a stark story. Africa is the one area of the world where hunger is both pervasive and increasing; 33 of the 41 poorest debtor countries are in sub-Saharan Africa. Nearly half of the total population of this geographic population lives on less than \$1 a day; 70 percent of the adults and 80 percent of children living with HIV are in Africa, and two-thirds of worldwide deaths due to the ravages of AIDS have taken place there.

Mr. Speaker, the American people overwhelmingly think that the U.S. should commit to cutting world hunger in half by 2015. Private organizations such as Bread of the World estimate that the U.S. burden for this project would be around a penny per day. This makes Congress' action here that much more important.

Mr. Speaker, I share the sense of this body that "a moral people cannot tolerate the existence of hunger, poverty, and disease in any part of the world." This nation should declare a "Decade of Concern for Africa" and commit to increased levels of poverty focused development assistance across sub-Saharan Africa. I agree that this support should be focused on the immediate needs of the African Diaspora by directing funding toward health and HIV prevention, education and equal learning for girls and women, agriculture and sustainable development, and bilateral and multilateral debt relief that acknowledges the West's role in creating instability in Africa.

By passing this resolution, this Congress moves closer to my goal of a stable, healthy, and viable Africa for all its nations and peoples. This body follows the efforts of the Congressional Black Caucus to highlight the horrific conditions at play in the region. In light of the U.S. actions during the recent U.N. Conference Against Racism held in South Africa,

this resolution establishes that the American people are humane and compassionate.

Mr. Speaker, I am again happy to support this resolution, and encourage all members to further its goals of a stable, healthy, and hunger-free Africa.

Mr. LEACH. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. PETRI). The question is on the motion offered by the gentleman from Iowa (Mr. LEACH) that the House suspend the rules and agree to the concurrent resolution, H. Con. Res. 102, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds of those present have voted in the affirmative.

Mr. LANTOS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

ZIMBABWE DEMOCRACY AND ECONOMIC RECOVERY ACT OF 2001

Mr. ROYCE. Mr. Speaker, I move to suspend the rules and pass the Senate bill (S. 494) to provide for a transition to democracy and to promote economic recovery in Zimbabwe, as amended.

The Clerk read as follows:

S. 494

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Zimbabwe Democracy and Economic Recovery Act of 2001".

SEC. 2. STATEMENT OF POLICY.

It is the policy of the United States to support the people of Zimbabwe in their struggle to effect peaceful, democratic change, achieve broad-based and equitable economic growth, and restore the rule of law.

SEC. 3. DEFINITIONS.

In this Act:

(1) **INTERNATIONAL FINANCIAL INSTITUTIONS.**—The term "international financial institutions" means the multilateral development banks and the International Monetary Fund.

(2) **MULTILATERAL DEVELOPMENT BANKS.**—The term "multilateral development banks" means the International Bank for Reconstruction and Development, the International Development Association, the International Finance Corporation, the Asian Development Bank, the Inter-American Investment Corporation, the African Development Bank, the African Development Fund, the European Bank for Reconstruction and Development, and the Multilateral Investment Guarantee Agency.

SEC. 4. SUPPORT FOR DEMOCRATIC TRANSITION AND ECONOMIC RECOVERY.

(a) **FINDINGS.**—Congress makes the following findings:

(1) Through economic mismanagement, undemocratic practices, and the costly deployment of troops to the Democratic Republic of the Congo, the Government of Zimbabwe has rendered itself ineligible to participate in International Bank for Reconstruction and Develop-

ment and International Monetary Fund programs, which would otherwise be providing substantial resources to assist in the recovery and modernization of Zimbabwe's economy. The people of Zimbabwe have thus been denied the economic and democratic benefits envisioned by the donors to such programs, including the United States.

(2) In September 1999 the IMF suspended its support under a "Stand By Arrangement", approved the previous month, for economic adjustment and reform in Zimbabwe.

(3) In October 1999, the International Development Association (in this section referred to as the "IDA") suspended all structural adjustment loans, credits, and guarantees to the Government of Zimbabwe.

(4) In May 2000, the IDA suspended all other new lending to the Government of Zimbabwe.

(5) In September 2000, the IDA suspended disbursement of funds for ongoing projects under previously-approved loans, credits, and guarantees to the Government of Zimbabwe.

(b) SUPPORT FOR DEMOCRATIC TRANSITION AND ECONOMIC RECOVERY.—

(1) **BILATERAL DEBT RELIEF.**—Upon receipt by the appropriate congressional committees of a certification described in subsection (d), the Secretary of the Treasury shall undertake a review of the feasibility of restructuring, rescheduling, or eliminating the sovereign debt of Zimbabwe held by any agency of the United States Government.

(2) **MULTILATERAL DEBT RELIEF AND OTHER FINANCIAL ASSISTANCE.**—It is the sense of Congress that, upon receipt by the appropriate congressional committees of a certification described in subsection (d), the Secretary of the Treasury should—

(A) direct the United States executive director of each multilateral development bank to propose that the bank should undertake a review of the feasibility of restructuring, rescheduling, or eliminating the sovereign debt of Zimbabwe held by that bank; and

(B) direct the United States executive director of each international financial institution to which the United States is a member to propose to undertake financial and technical support for Zimbabwe, especially support that is intended to promote Zimbabwe's economic recovery and development, the stabilization of the Zimbabwean dollar, and the viability of Zimbabwe's democratic institutions.

(c) **MULTILATERAL FINANCING RESTRICTION.**—Until the President makes the certification described in subsection (d), and except as may be required to meet basic human needs or for good governance, the Secretary of the Treasury shall instruct the United States executive director to each international financial institution to oppose and vote against—

(1) any extension by the respective institution of any loan, credit, or guarantee to the Government of Zimbabwe; or

(2) any cancellation or reduction of indebtedness owed by the Government of Zimbabwe to the United States or any international financial institution.

(d) **PRESIDENTIAL CERTIFICATION THAT CERTAIN CONDITIONS ARE SATISFIED.**—A certification under this subsection is a certification transmitted to the appropriate congressional committees of a determination made by the President that the following conditions are satisfied:

(1) **RESTORATION OF THE RULE OF LAW.**—The rule of law has been restored in Zimbabwe, including respect for ownership and title to property, freedom of speech and association, and an end to the lawlessness, violence, and intimidation sponsored, condoned, or tolerated by the Government of Zimbabwe, the ruling party, and their supporters or entities.

(2) **ELECTION OR PRE-ELECTION CONDITIONS.**—Either of the following two conditions is satisfied:

(A) **PRESIDENTIAL ELECTION.**—Zimbabwe has held a presidential election that is widely accepted as free and fair by independent international monitors, and the president-elect is free to assume the duties of the office.

(B) **PRE-ELECTION CONDITIONS.**—In the event the certification is made before the presidential election takes place, the Government of Zimbabwe has sufficiently improved the pre-election environment to a degree consistent with accepted international standards for security and freedom of movement and association.

(3) **COMMITMENT TO EQUITABLE, LEGAL, AND TRANSPARENT LAND REFORM.**—The Government of Zimbabwe has demonstrated a commitment to an equitable, legal, and transparent land reform program consistent with agreements reached at the International Donors' Conference on Land Reform and Resettlement in Zimbabwe held in Harare, Zimbabwe, in September 1998.

(4) **FULFILLMENT OF AGREEMENT ENDING WAR IN DEMOCRATIC REPUBLIC OF CONGO.**—The Government of Zimbabwe is making a good faith effort to fulfill the terms of the Lusaka, Zambia, agreement on ending the war in the Democratic Republic of Congo.

(5) **MILITARY AND NATIONAL POLICE SUBORDINATE TO CIVILIAN GOVERNMENT.**—The Zimbabwean Armed Forces, the National Police of Zimbabwe, and other state security forces are responsible to and serve the elected civilian government.

(e) **WAIVER.**—The President may waive the provisions of subsection (b)(1) or subsection (c), if the President determines that it is in the national interest of the United States to do so.

SEC. 5. SUPPORT FOR DEMOCRATIC INSTITUTIONS, THE FREE PRESS AND INDEPENDENT MEDIA, AND THE RULE OF LAW.

(a) **IN GENERAL.**—The President is authorized to provide assistance under part I and chapter 4 of part II of the Foreign Assistance Act of 1961 to—

(1) support an independent and free press and electronic media in Zimbabwe;

(2) support equitable, legal, and transparent mechanisms of land reform in Zimbabwe, including the payment of costs related to the acquisition of land and the resettlement of individuals, consistent with the International Donors' Conference on Land Reform and Resettlement in Zimbabwe held in Harare, Zimbabwe, in September 1998, or any subsequent agreement relating thereto; and

(3) provide for democracy and governance programs in Zimbabwe.

(b) **FUNDING.**—Of the funds authorized to be appropriated to carry out part I and chapter 4 of part II of the Foreign Assistance Act of 1961 for fiscal year 2002—

(1) \$20,000,000 is authorized to be available to provide the assistance described in subsection (a)(2); and

(2) \$6,000,000 is authorized to be available to provide the assistance described in subsection (a)(3).

(c) **SUPERSEDES OTHER LAWS.**—The authority in this section supersedes any other provision of law.

SEC. 6. SENSE OF CONGRESS ON THE ACTIONS TO BE TAKEN AGAINST INDIVIDUALS RESPONSIBLE FOR VIOLENCE AND THE BREAKDOWN OF THE RULE OF LAW IN ZIMBABWE.

It is the sense of Congress that the President should begin immediate consultation with the governments of European Union member states, Canada, and other appropriate foreign countries on ways in which to—

(1) identify and share information regarding individuals responsible for the deliberate breakdown of the rule of law, politically motivated violence, and intimidation in Zimbabwe;

(2) identify assets of those individuals held outside Zimbabwe;

(3) implement travel and economic sanctions against those individuals and their associates and families; and

(4) provide for the eventual removal or amendment of those sanctions.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from California (Mr. ROYCE) and the gentleman from California (Mr. LANTOS) each will control 20 minutes.

The Chair recognizes the gentleman from California (Mr. ROYCE).

GENERAL LEAVE

Mr. ROYCE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include extraneous material on S. 494.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. ROYCE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to begin by expressing my appreciation to the gentleman from Illinois (Mr. HYDE), the chairman of the Committee on International Relations, and the gentleman from Ohio (Mr. OXLEY), the chairman of the Committee on Financial Services, for moving this important legislation. I would also like to express my appreciation to the gentleman from California (Mr. LANTOS), the ranking member of the Committee on International Relations, and the gentleman from New Jersey (Mr. PAYNE), the ranking member of the Subcommittee on Africa that I chair, for their support of this bill. With elections approaching in Zimbabwe, and the conditions on the ground deteriorating, it is important that we pass the Zimbabwe Democracy and Economic Recovery Act of 2001 before this Congress adjourns.

In Zimbabwe we are sadly seeing a dictator there literally burning his country down. I feel that he is very desperate there to keep his perks and avoid accountability for his crimes. As a consequence of that, he has sanctioned utter anarchy in his homeland in an attempt to win an election that he has been pressured by Zimbabweans into holding. I think that if he had his way, Mr. Mugabe would undoubtedly run Zimbabwe as a one-party State as he did run it during the 1980s, but Mugabe has spared no means in his attempt to suppress democratic expression in Zimbabwe. His ZANU-PF Party thugs have employed murder, mass beatings, systematic torture, gang rape, house burning, death threats, and every type of police brutality. And while Zimbabwe police are quick to crack down on peaceful political protests, violent ZANU-PF operatives are rarely brought to justice. The Zimbabwe Lawyers for Human Rights group has observed that it is "outraged by the continued brutality, lack of re-

spect for fundamental human rights and political partisanship of the Zimbabwe Republic Police." Offices of the political opposition there are routinely fire-bombed. Dozens of political opponents have been murdered in State-sanctioned violence, yet Mr. Mugabe does not speak out against those doing the violence. Instead, President Mugabe calls the peaceful political opposition "terrorists" and vows to crush them.

□ 1500

For Zimbabweans, it is a sad irony that the Mugabe Government represses political opponents with the same Law and Order Maintenance Act which Ian Smith's Rhodesian repressive government pioneered to prevent majority rule there.

Having led a congressional delegation to Saudi Arabia some years back, I saw then the climate of fear the Zimbabwe Government long ago created. This legislation provides reasonable guidelines for U.S. engagement with Zimbabwe. It expresses the United States' interest in assisting the Zimbabwean people with economic development; and it provides funding for such efforts, but only when the climate is right, that is, when the rule of law has been established and when free and fair elections are possible.

We must be realistic, though. The prospects are increasingly remote that the presidential elections, which must be held by March, will be free and fair. The U.S.-based International Foundation for Electoral Systems has been chased from the country.

The government rejected a call by the European Union to allow for election monitors. While it recently relented on its decision, it is likely to reverse course. The government is likely to again prohibit those observers from coming in for the elections.

I was scheduled to lead an election observation team for the 2000 parliamentary elections there, but the Zimbabwean Government pulled the visas at the last minute.

A U.S. District Court judge in New York recently ruled that Zimbabwe's governing political party, ZANU-PF, was liable for murdering and torturing its political opponents in the run-up to those elections. The court found that ZANU-PF, in its organized violence and methodological terror, worked in tandem with Zimbabwean Government officials. That was in the year 2000. The current Mugabe Government has never changed its modus operandi.

Mugabe is doing all that he can to see that the world is not watching him. The Washington Post and the New York Times reporters have been denied visas to cover the chaos there. The BBC was booted out in July. Foreign journalists are routinely harassed and intimidated.

It is Zimbabwean journalists, though, that have borne the brunt of it. News-

paper offices have been bombed. Against this, we have seen many profiles in courage. Jeff Nyarota, editor of the Daily News, Zimbabwe's only independent newspaper, recently won the New York-based Committee to Protect Journalists Press Freedom Award for his courageous work uncovering government corruption.

I am certain that this legislation is a morale boost to brave Zimbabwean journalists who fear that the world ignores them. Let me just say a word about the economy there.

Predictably, the Zimbabwean economy is now in ruins. With farmland under government siege, half a million Zimbabweans face starvation in a country that traditionally produces enough food to export. The current government is oblivious to the suffering of the people there.

ZANU-PF leadership, though, is not hurting. The U.N. recently reported how Zimbabwean troops are clear-cutting invaluable forests in the Democratic Republic of Congo, and proceeds from this environmental crime assuredly are going to supporting the luxurious lifestyle of Zimbabwe's ruling elite.

This legislation, importantly, asks the administration to begin a process of identifying the assets of those involved, those military personnel involved in just that effort, and to impose personal economic sanctions against them for breaking down the rule of law in Zimbabwe. It does not affect trade, however.

This legislation provides aid for lawful and transparent land resettlement, and I believe that this will have to come after there is a new government. We should not lose sight of the fact that President Mugabe has created the current land crisis. He has sanctioned the violent land invasions and the murders of Zimbabweans, black and white, precisely because it serves his political interests. That is why many attempts by the international community to aid a lawful land reform program have gone for naught.

The latest attempt, the Abuja Agreement, has fallen apart, with the Mugabe Government intensifying farm invasions and violence. President Mugabe's land reform program has been to take land and give it to the generals and to give it to his political associates. Recent reports have him now giving land to Libyan business partners.

The Mugabe Government has shown little interest in the welfare of the people of Zimbabwe, and that is why we need to move this legislation.

Mr. Speaker, I include for the RECORD an exchange of letters between the gentleman from Ohio (Chairman OXLEY) of the Committee on Financial Services and Chairman HYDE concerning the Senate bill, S. 494:

U.S. HOUSE OF REPRESENTATIVES,
COMMITTEE ON FINANCIAL SERVICES,

Washington, DC, November 30, 2001.

Hon. HENRY J. HYDE,
Chairman, Committee on International Relations,
Washington, DC.

DEAR MR. CHAIRMAN: I understand that on November 28, 2001, the Committee on International Relations ordered S. 494, the Zimbabwe Democracy and Economic Recovery Act of 2001, reported to the House. As you know, the Committee on Financial Services was granted the primary referral of the bill upon its introduction pursuant to the Committee's jurisdiction over debt relief and other financial assistance under Rule X of the Rules of the House of Representatives.

Because of the importance of this matter and your commitment to address this Committee's concerns, I recognize your desire to bring this legislation before the House in an expeditious manner and will waive consideration of the bill by the Financial Services Committee. By agreeing to waive its consideration of the bill, the Financial Services Committee does not waive its jurisdiction over S. 494. In addition, the Committee on Financial Services reserves its authority to seek conferees on any provisions of the bill that are within its jurisdiction during any House-Senate conference that may be convened on this legislation. I ask your commitment to support any request by the Committee on Financial Services for conferees on S. 494 or related legislation.

I request that you include this letter and your response as part of the Congressional Record during consideration of the legislation on the House floor.

Thank you for your attention to these matters.

Sincerely,

MICHAEL G. OXLEY,
Chairman.

U.S. HOUSE OF REPRESENTATIVES,
Washington, DC, November 29, 2001.

Hon. MICHAEL OXLEY,
Chairman, Committee on Financial Services,
Washington, DC.

DEAR MR. CHAIRMAN: I am writing you concerning the bill S. 494, Zimbabwe Democracy and Economic Recovery Act of 2001, which this Committee ordered reported yesterday. I recognize that the bill was jointly referred to the Committee on Financial Services based on your Committee's jurisdiction over language relating to debt relief and other financial assistance.

It is my intention to take this matter up under suspension of the rules. While recognizing your jurisdiction over this subject matter, I would appreciate your willingness to waive your right to consider this bill without waiving your jurisdiction over the general subject matter. I will support the Speaker's naming Members of your Committee as conferees on the matter should it get to conference.

As you have requested, I will include this exchange of letters in the Record during consideration of the resolution.

I appreciate your assistance in getting this important bill to the floor.

Sincerely,

HENRY J. HYDE,
Chairman.

Mr. Speaker, I reserve the balance of my time.

Mr. LANTOS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of S. 494, the Zimbabwe Democracy and Economic Recovery Act.

First, I would like to commend the distinguished chairman of the Subcommittee on Africa, my good friend and fellow Californian, the gentleman from California (Mr. ROYCE), and the ranking minority member, our distinguished colleague, the gentleman from New Jersey (Mr. PAYNE), for their active pursuit of human rights, democracy, and decency in Zimbabwe, and for their strong support for this legislation.

I also want to thank the gentleman from Illinois (Mr. HYDE), the chairman, for expediting the consideration of this important legislation.

Mr. Speaker, the Zimbabwe Democracy and Economic Recovery Act of 2001 is designed to support the people of Zimbabwe, and provides a clear strategy for the United States and Zimbabwe to reengage in normal political and economic activity. This is an incentives bill, not a sanctions bill, Mr. Speaker.

Our legislation provides that the United States will initiate a plan to promote Zimbabwe's economic recovery, but only after certain political conditions will have been met. These conditions include restoring the rule of law, ensuring a positive pre-election environment, pursuing equitable legal and transparent land reform, and ensuring civilian control of both the military and the police.

The House is acting on this legislation today because, unfortunately, the situation in Zimbabwe is increasingly grim. Partisan political violence condoned and encouraged by Mugabe has crippled a once prosperous economy. Once an exporter of maize, Zimbabwe is set to run out by February of this coming year. Without emergency humanitarian assistance, thousands of Zimbabweans will go hungry, fall prey to disease, and starve.

Mugabe has made the so-called land question central to his political campaign and used it to justify pervasive violence. He has unleashed so-called war veterans and party militants on black farm workers, white farmers, journalists, professionals, academics, and indeed, anyone who opposes his land seizure policy.

His policy has not unified the country behind him. To the contrary, according to the most recent opinion poll, his criminal practice is turning the people of Zimbabwe against him.

Mr. Speaker, Zimbabwe's economic and political disaster threatens the whole of southern Africa. The Presidents of Africa's three largest economies, South Africa, Nigeria, and Algeria, recently launched a new Partnership for Africa's Development. This plan calls for a new relationship between Africa and the international community; and it is premised on the African states making commitments to good government, democracy, and human rights. Zimbabwe, under Mugabe, is the antithesis of this vision.

Mr. Speaker, our bill provides a set of incentives for Mugabe and his government to move in the right direction, away from intimidation, violence, corruption, and Draconian economic policies towards land reform that reflects the rule of law, policies that restore an independent judiciary, allow political competition, and support a free and independent media.

Mr. Speaker, I urge all of our colleagues to vote for this bill. It will send a strong signal to Mugabe that the people of America reject the violent situation he has created and that we support the people of Zimbabwe.
